TRANSMITTAL OF PARTS LISTS

NOTE: It is requested that commitments for tooling on the barrel
marking be held pending action by Operations Committee and
Management as to designation for this caliber. Although the
Ammunition Division Operations Committee agenda for April refers
to this as "22 Short Remington Magnum", there have been reports
of some other descriptive name having been recommended by Sales
REMARKS but still unapproved.

B-15486: Dimensional changes requested by PE&C, and alter title
block to show new model designation.

B-15455: Alter set-up dim. for grinding Sear-Firing Pin Head
contact angle, as requested by PE&C; and title block
change to show new model designation.
