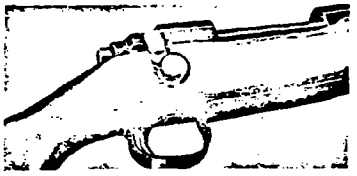
REMINGTON MODELS 721 & 722

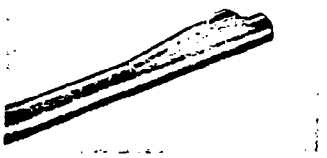
Gun experts and big game hunters everywhere have praised these sensational new rifles recently introduced and now available at a low price. You, as a hunter, are bound to like the clean, graceful lines. You'll find the light-weight (about 7 lbs.) pays off when you're coming up out of that last canyon on a long day's hunt. You'll be pleased with the perfect balance which makes them fast pointing as well as easy to carry. You'll be amazed at the entirely new and exclusive design of the encased bolthead, which helps give these rifles the *strongest* action ever built in a bolt-action rifle. You'll like the crisp match trigger with its lightning-fast let-off. You'll admire the smooth performance of these ruggedly strong rifles really built to take it.

CLEAN, TRIM LINES...Minimum of dirt-catching openings, few projections. Convenient thumb-operated safety blocks the firing pin and locks the bolt.

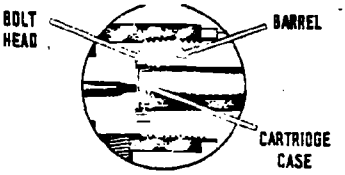
BOLT COCKS ON OPENING...Low telescope mounting. Receiver drilled and tapped for adaptable scope mounts and micrometer receiver sights.



EXCELLENT MATCH RIFLE TRIGGER MECHANISM . . . No backlash. Sharp, crisp, lightning-fast let-off. New, easy-to-operate bolt release.



WHITE METAL BEAD FRONT SIGHT for quick sighting against any background. Matted ramp reduces glare. Step adjustable sporting rear sight.



STRONGEST ACTION ever developed. Cartridge case completely supported and enclosed by encased bolt head and barrel. Maximum safety, accuracy.

SPECIFICATIONS

MODEL 721A "STANDARD" GRADE — Chambered for 30-06 Springfield or 270 Win. cartridges. 24-inch round, tapered barrel of ordnance steel. Carefully bored and rifled for extreme accuracy. New style sporting stock of genuine American walnut. Properly shaped pistol grip. Long, full, well rounded fore-end of semi-beavertail type. Shotgun style metal butt plate, checkered to prevent slipping. Rifle cocks on opening movement of bolt. Sensational new trigger with lightning fast let-off — no back-lash. Side placed thumb operated safety. Polished bolt and action. Special bolt stop. Magazine holds 4 cartridges which with one in chamber gives a capacity of 5 shots. White metal bead front sight mounted on matted ramp. Step adjustable sporting rear sight. Receiver properly drilled and tapped for adaptable scope mounts and standard micrometer receiver sights. Weight about 7¼ lbs. Length over-all 44¼". **Model 721A Chambered for 300 Magnum Cartridge:** Same as above model except as follows: 26" heavy barrel, soft rubber recoil pad, 3 shot magazine plus one in chamber, weight about 8½ lbs., length over-all — 46¼".

MODEL 722A "STANDARD" GRADE — Same as No. 721A except with shorter action and chambered for 300 Savage and 257 Roberts cartridges. Weight about 7 pounds. Length over-all 43¼".

High Comb Stock. Especially designed and properly proportioned for use with telescope or receiver sight. Available on both Model 721 and 722 in "A" Standard and "B" Special grades at slightly higher cost. No extra charge on "D" Peerless and "F" Premier grades. (See page seven)

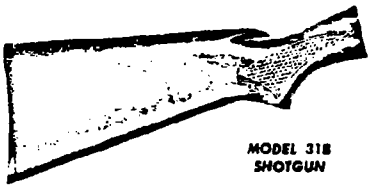
REMINGTON SPECIAL HIGH GRADE GUNS

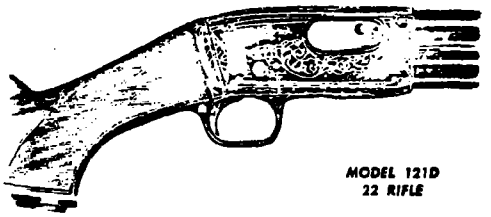
Every sportsman has a place in his heart for a high grade rifle or shotgun built by a master craftsman with unhurried care and meticulous skill. Remington Special High Grade guns have that unmistakable stamp of quality made possible only by long years of experience at the gun-makers bench. These skills of the gun-makers art are handed down through generations of professional craftsmen who build High Grade guns in our Ilion plant.

The long graceful receivers on Remington guns are exceptionally well adapted to creative engravings of various types such as elaborate scroll, game scenes and gold inlay. All types of Remington rifles and shotguns except 22 caliber bolt action and the Model 550, 22 autoloader, are available in fancy grades with high quality walnut stocks and fore-ends and artistically engraved receivers and barrels. A few examples of the advanced art of gun building by master Remington craftsmen are shown on this page.

SPECIFICATIONS



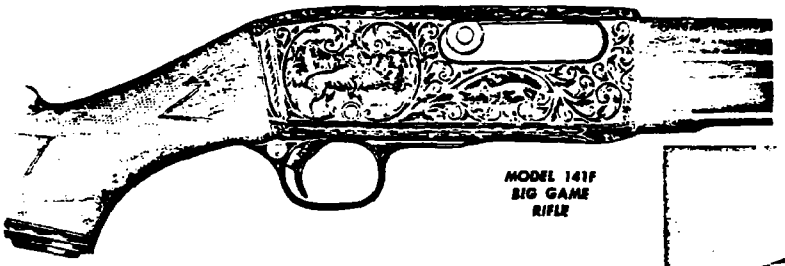
MODEL 31B
SHOTGUN



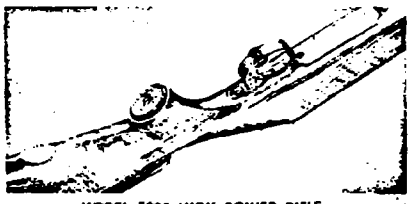
MODEL 121D
22 RIFLE

B "Special" Grade: This grade is the same throughout as the A "Standard" grade, except that the stock and fore-end are made of selected figured American walnut, neatly hand checkered. Prices for "Special" grades are only a few dollars higher than for "Standard" grades, well worth the difference to the man who is a lover of fine guns.

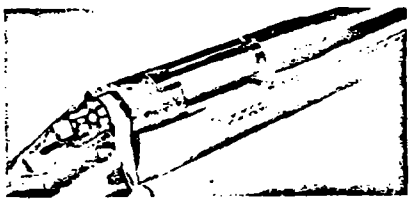
D "Tournament" Grade Shotguns and D "Peerless" Grade Rifles: Stocks and fore-ends are made of very high grade walnut, especially selected for its natural beauty, and finely checkered by hand. Any stock dimensions, including special drop or length, check-piece, Monte Carlo, or cast-off, will be furnished without extra charge. The receiver and barrel are finished with handsome scroll engraving. All working parts are honed.



MODEL 141F
BIG GAME
RIFLE



MODEL 722F HIGH POWER RIFLE



MODEL 722F HIGH POWER RIFLE

F "Premier" Grade: The finest obtainable walnut is used for the stock and fore-end. It is finished by hand with beautiful checkering, and is fitted with a gold name plate on which owner's initials will be engraved, if desired. The stock is furnished with any dimensions desired at no extra charge, including a cheek-piece, Monte Carlo, or cast-off. The barrel and receiver are finished with extensive engraving of game scenes and fine scroll. All working parts are carefully polished and hand-honed.

All Remington rifles and shotguns shown on pages 2 thru 17 of this catalog are available in the following fancy grades: B "Special" Grade for rifles and shotguns, D "Tournament" Grade for shotguns, D "Peerless" Grade for rifles and F "Premier" Grade for rifles and shotguns.

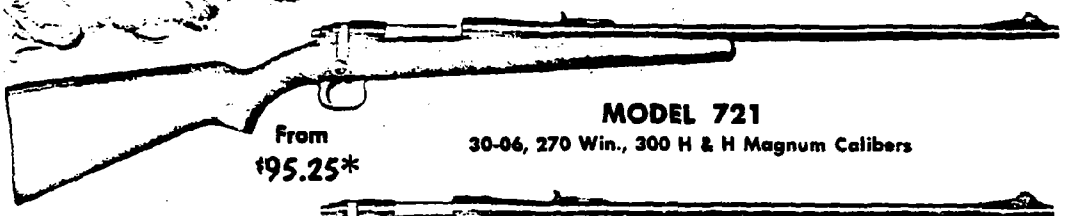
REMINGTON HIGH POWER RIFLES

MODELS 721 AND 722 FEATURE WORLD'S STRONGEST BOLT ACTION--MATCH RIFLE TRIGGER -- FINE ACCURACY

Now in 8 Popular Calibers!

You'll be proud to own a bolt action big game rifle as far ahead of the others as a new Remington. An exclusive new encased bolt head with *no extractor cuts* helps give these rifles the strongest bolt action ever built. Torture tests have proved their high degree of strength and durability. You'll like the clean, graceful lines, the light weight that pays off on a long hunt, the perfect balance and crisp, match rifle trigger. Best of all, you'll like their high quality construction and long-life dependability.



MODEL 721

1969

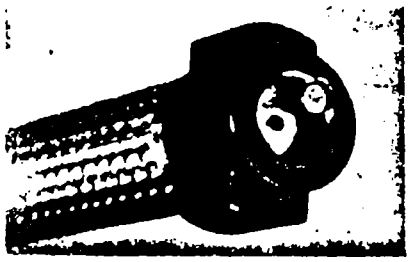
700 Bolt Action Center Fire Rifle Now Available in 15 Versatile Calibers — Priced from $134.95

Again, last year's sales records proved the famous Remington Model 700 bolt action center fire rifle continued to be America's best seller. One of the outstanding reasons for its success is the availability of a wide caliber selection, more than any other American manufacturer.

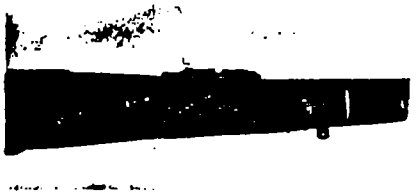
The Model 700 offers a caliber for every type of hunting from varmints to elephants — A TOTAL OF 15 DIFFERENT CARTRIDGES IN ALL. The 700 has seven magnum calibers to choose from (one more than our major competitor) and five varmint cartridges (two more than our biggest competitor). It's the ideal gun for a shooter looking for an "all-around" rifle.



STRENGTH — Tests have proven the Model 700 action is the strongest bolt action center fire ever made. Just the ticket for handloaders who want strength where strength belongs. The secret is in the three rings of solid steel that "surround the cartridge head."

There are no extractor cutaways to weaken this critical area.

The Model 700 has the appearance of a far more expensive rifle. New in 1969 on the ADL grades is a jeweled bolt with a shrouded bolt plug, a restyled stock that improves balance and pointing, a new butt plate, a unique low profile safety that will not accidentally move on or off, and a new checkering pattern.



The 700 BDL version has also been dressed up. Along with the ADL features, the BDL models have a sharp white spacer forward of the new butt plate, a new easier to adjust sling strap, and the addition of the hard hitting 350 Rem. Magnum and 6.5 Rem. Magnum calibers.

Along with these new features the Model 700 still offers the shooter the same list of extras that have made it the best seller it is. ACCURACY — a product of Remington's famous precision rifling and short, crisp trigger pull. CRAFTSMANSHIP — the traditional beauty of fine checkering and beautiful wood finish that is tough, hard, and scratch-resistant (we call it RK-W). ADDED FEATURES — Monte Carlo stock and cheek piece, receiver drilled and tapped for 'scope mounts, checkered bolt knob, detachable sights for the shooters using a 'scope. BDL models feature a hinged floor plate, hooded front sight, sling strap and swivels, black grip cap and fore-end tip with white spacers.

Model 700 BDL "VARMINT SPECIAL"

The tremendous acceptance of the 700 and constant shooter demand have brought about the availability of a special heavy barreled varmint rifle, the 700 BDL "Varmint Special." Designed for minimum-target, maximum-range precision shooting, it is chambered for five of the most popular varmint cartridges going — 222 Rem., 223 Rem., 22-250 Rem., 6mm Rem., and 243 Win. A heavy 24" barrel places this rifle in a new accuracy class. It's equipped with 'scope bases, hinged floor plate, quick release swivels and new easier to adjust sling strap. Monte Carlo stock and cheek plate, RK-W wood finish and new custom checkering.

Model 700 "CUSTOM" RIFLE

The 700 "Custom" is the finest bolt action rifle ever manufactured by the Remington Arms Company. Available on special order only, the 700 "Custom" offers the sportsman a choice of specifications. It is available in a variety of calibers and features a select American Walnut stock, hand checkering, and a highly polished barrel (with or without sights) and receiver for the finest blueing possible. It is truly the ultimate gun for the ultimate sportsman.

788 Bolt Action Rifle – Priced from $89.95

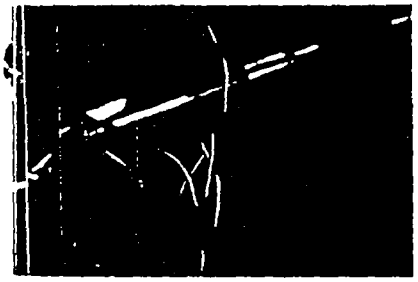
Remington Model 660 Bolt Action Carbine – Priced from $119.95

Model 788

FEW NEW RIFLES HAVE EARNED, IN SUCH A SHORT PERIOD OF TIME, THE REPUTATION OUR MODEL 788 HAS ACQUIRED FOR ACCURACY AND DEPENDABILITY.

In the two years it has been manufactured, hunters and target shooters alike have found it to be the best all-around, economically priced bolt action rifle on the market.

This year the Model 788 IS AVAILABLE IN TWO NEW CALIBERS (6mm Rem. and 308) and with a LEFT HAND BOLT for southpaw shooters.



In order to chamber a rifle for a cartridge like the potent 22-250 Rem., you've got to have an action that will stand an unbelievable amount of pressure. Not many $89.95 bolt actions will. The nine extra-heavy locking lugs on the Model 788 bolt engage grooves in the solid steel receiver for a strong, secure lock-up.

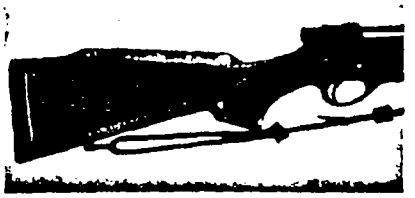
The secret of the Model 788's exceptional accuracy lies in its fast lock time (the interval between the time you pull the trigger and the rifle actually fires). The lock time is so fast the bullet has left the barrel of the Model 788 before a comparative bullet has left the cartridge case of competitive models.

Model 660

THE MODEL 660 IS THE MOST POWERFUL BOLT ACTION CARBINE ON THE MARKET TODAY! NO OTHER GUN IN ITS CLASS IS CHAMBERED FOR THE HARD HITTING 350 REM. MAGNUM AND 6.5 REM. MAGNUM.

The cartridge head is supported by three rings of steel to insure super strength where strength belongs.

The 660 is available in other popular calibers too: 243, 308, 222 Rem., and 6mm Rem. The Model 660 bolt action carbine is versatile enough to hunt all big game animals of North America. Its convenient carbine length 20" barrel means easy carrying in the field without loss of accuracy or velocity. A special barrel bracket adds support to the 'scope mount making it more rigid. The 'scope can't be easily knocked out of adjustment when the going gets rough. New "vibra-honing" metal finish, inside and out, are silky-smooth for fast, friction-free operation. The receiver is drilled and tapped. It's a simple matter to install a 'scope. Adjustable sights are the same dependable type that are on the Remington Model 700. A good-looking black fore-end tip, fine-line checkering, plus a black grip cap and butt plate (recoil pad on magnum models) help give this carbine the looks of a far more expensive gun. Magnum models feature a lamination of walnut and beech for extra strength, stability, and beauty. Sling straps and swivels are standard equipment on the 660 Magnum.



The Model 660's "S" shape bolt handle hugs the stock and won't interfere with brush or clothing. This bolt knob is serrated on the bottom for a good secure grip. RK-W wood finish, developed by Du Pont, protects the stock and brings out the lustrous beauty of the wood grain.

The Model 660 has many features of higher priced rifles. Standard equipment includes a Monte Carlo stock for a better cheek-to-stock fit for quicker, surer sight alignment with either a 'scope or open sights. The trigger is extra wide and serrated so your finger won't slip even when wearing a glove; it's extra crisp and clean, no creep or spongy action.

Economically priced in all calibers, the Model 660 is the most versatile carbine your money can buy.

Action 22 Cal. Rifles

Models 580, 581, 582 — Priced from $34.95

Model 514 — Priced at $26.95

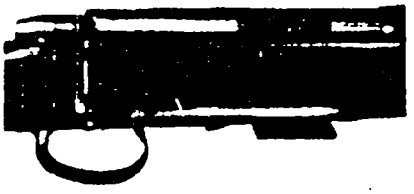
[redacted] Single Shot [redacted] know your rifle is designed with this plus factor.

581 Clip Repeater and
582 Tubular Repeater

They have the look, feel and balance of big game center fire rifles — plus the strongest, most powerful bolt ever designed into a 22 caliber hunting rifle.

A NEW LEFT HAND MODEL 581 WITH THE BOLT ON THE LEFT SIDE IS AVAILABLE THIS YEAR FOR SOUTHPAW SHOOTERS. IT IS THE ONLY LEFT HAND BOLT ACTION RIM FIRE RIFLE EVER MANUFACTURED IN AMERICA, ANOTHER FIRST FROM REMINGTON.

The 580 series feature an artillery type bolt with rear lock-up. Six extra-heavy rotary locking lugs at the back engage grooves in the solid steel receiver. Together they lock up tight, like a bank vault. Try it — work the action a few times. It's silky-smooth, solid and secure, made of ordnance steel.



Here is strength that has never been equaled in any 22 bolt action hunting rifle. Actually, there's more built-in strength here than you'll ever need, but it's nice to

Remington looked at all the other desirable features that make up a fine big game rifle . . . and we put them into this new rim fire line. Here they are:

HUNTING-TYPE TRIGGER is wide and the trigger pull is crisp, sharp, clean — no drag. Big, sturdy trigger guard is roomy enough to accommodate a gloved finger. Everything about these new rifles is man-size. There's no corner cutting anywhere.

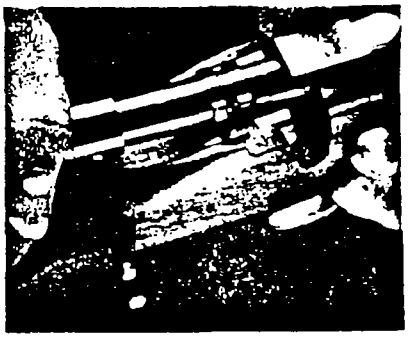
FULL SIZE Monte Carlo stock with pistol grip looks and feels like a center fire rifle. It assures a snug, comfortable cheek-to-stock fit that means more hits — with or without a 'scope. And there's no skimping on the fore-end, it's long, tapered, man-size to prevent canting and provides a good secure grip.

NON-SLIP THUMB SAFETY is conveniently located at the right rear of the receiver. Positive safety — forward for fire; rearward for safe.

TWO EXTRACTORS are standard on this series of 22 rifles. Remington feels that two are better than one (so you get 2). Another extra at no extra charge.

SIGHTS are rugged, similar to those on big game rifles. Bead front sight and U notch adjustable rear with lock screw. You'll hit what you aim at with these sights.

ROUND STEEL RECEIVER means bedding into the stock can be more precise, which in turn contributes to fine accuracy. The receiver is also grooved for tip-off 'scope mounts. Actually, it's the strongest, most rigid receiver of any 22 bolt action hunting rifle because there are no slots or notches to weaken it. Bolt handle isn't used as a lock-up lug. Here again, Remington designers made it like a center fire rifle. Costs the shooter no more; it's an extra bonus he gets because of good design.



BOLT COVER keeps dirt and bad weather out. Assures smooth operation within. Adds to streamlining of the rifle, too. Here's an accuracy combination that's hard to beat . . . in all three models: 580 single shot, 581 clip repeater and 582 tubular repeater.

Model 514

Here is an excellent 22 caliber rifle . . . at a popular price. It's a single-shot bolt action model with a self-cocking bolt, rotary thumb safety, and takes all 22 caliber cartridges — short, long or long rifle; standard velocity or high speed. For the young shooter, it's also available as Model 514 BR, with shortened stock.

1 — MODEL 514 BR, Single Shot, Boy's Rifle, $26.95 2 — MODEL 514, Single Shot, $26.95 3 — MODEL 582, Tubular Repeater, $49.95
4 — MODEL 581, Clip Repeater, $44.95 5 — MODEL 580, Single Shot, $34.95 6 — MODEL 581, LEFT HAND, Clip Repeater, $49.95

R2525017

1964

NEW Remington Model 540X 22 Cal

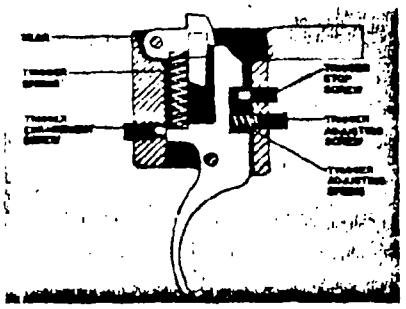
40XB "Rangemaster" Target Rifle

International Free Rifle

Rim Fire and Center Fire

The New Model 540X Match Target Rifle — Priced from $89.95

The Model 540X has all the design features and special attachments to make it the most accurate target rifle in its class. Designed for the intermediate and junior shooter, the Model 540X is super accurate, well balanced, and loaded with extras, the extras needed to win.



To continually punch holes in the X ring with any rifle, you need a gun with a good crisp trigger pull, one that will fire when you want it to. The 540X has a fully adjustable trigger that does exactly that. The secret's in its fast lock time. Lock time is the interval between the time you pull the trigger and the rifle actually fires. The 540X trigger is the fastest of any target rifle now manufactured.

A unique feature of this rifle is its four-way adjustable butt plate. The stock can be adjusted with the same wrench for length of pull, vertical, pitch or cant (left or right).

A butt plate of this type eliminates the need for costly stock alterations and is designed to fit the needs of all rifle shooters regardless of their physical characteristics.

The stock was designed with the target shooter in mind. Thumb cuts give you that secure grip for top scores. A new stock design and special rear sight bracket gives common sight alignment for shooting with either a 'scope or iron sights.

A front swivel block, Redfield #63 front and Redfield #75 rear sights are optional. The receiver is drilled and tapped for popular 'scope mounts.

Model 40XB "Rangemaster" (Rim Fire Model) — Priced from $169.95

Exclusive loading platform provides straight line feeding; no shaved bullets. Specially selected heavy ordnance steel barrel with new Remington rifling process assures utmost accuracy. High comb gives same sighting plane for iron and telescope sights. Comb is grooved for bolt removal. Mershon White Line non-slip rubber butt plate, adjustable sling swivel and hand-stop are standard equipment. Other features are: extra strong bolt with double extractors, crisp trigger with positive adjustments for weight of pull, wide trigger for more uniform pull and comfort, thumb operated safety. The receiver is drilled and tapped for all standard sight mounts, telescope and metallic Redfield Olympic front and rear sights optional. A new long rail for the adjustable fore-end stop and palm rest makes shooting good scores easier.

Model 40XB "Rangemaster" (Center Fire Model) — Priced from $224.95

Now available in repeating models for use in National Match Courses, the 40XB is designed with clip slots for the conventional five shot clip. It loads from the top of the receiver and the magazine has a hinged floor plate. Repeating models are provided *only* in calibers equal to or shorter than the loaded length of the 308 cartridge.

The 40XB center fire repeating rifle is ideal for the rapid fire events, especially in the 7.62mm NATO (308) caliber, because of its shorter bolt throw and extreme accuracy, plus its optimum weight for "over the course" competition.

As a single shot model, the Remington Model 40XB center fire is offered in a variety of center fire calibers as listed in specifications. The action is hand bedded and the barrel is free floating. The 40XB meets the National Bench Rest Shooters Association rules for the Heavy Varmint Class with most target telescopes (max. weight 13½ lbs.). Stainless steel barrels are supplied as standard on 7mm Rem. Magnum, 30-338, and other magnum calibers. Stainless steel is also recommended for 22-250 and 6mm Rem. (at extra charge). Stainless 40XB barrels are not blued.

International Free Rifle (Rim Fire and Center Fire) Priced from $361.05

The International Free Rifle features the 40XB action, precision heavy barrel, a Remington designed adjustable butt plate and hook, adjustable palm rest, adjustable front sling swivel and 2-ounce trigger. Left-hand stock supplied at extra charge.

1 — MODEL 540X, 22 Cal. Match Target Rifle, $109.95 (Hand-Stop Extra). 2 — MODEL 40XB, 22 Cal. Rim Fire Target Rifle, $204.95
3 — MODEL 40XB, Center Fire, 7.62mm NATO Target Rifle, $224.95 (Target Sights Extra). 4 — MODEL 40XB Bench Rest, Center Fire, 222 Rem. Cal., Stainless Steel Barrel, Target Rifle, $259.95. (Target 'scope Extra). 5 — INTERNATIONAL FREE RIFLE, Center Fire, 222 Rem., $361.05

Remington Model 700 Bolt Action Center Fire Rifle...Available in 16 Calibers Including the NEW 25-06 Remington– Priced from $139.95

gain, last year's sales records proved e famous Remington Model 700 bolt tion center fire rifle continued to be merica's best seller. One of the outstandg reasons for its success is the availbility of a wide caliber selection, more an any other American manufacturer.

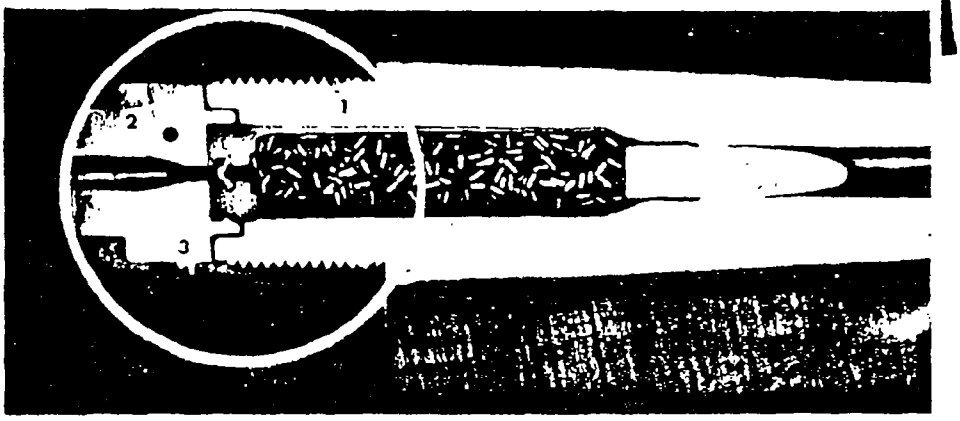
DDED, THIS YEAR, TO THE LIST CALIBER FAVORITES IS THE PULAR 25-06. NOW VARMINT ND SMALL GAME HUNTERS KE CAN BUY COMMERCIALLY E CARTRIDGE AND GUN COMINATION RELOADERS HAVE EN PRAISING FOR YEARS. The del 700 offers a caliber for every type unting from varmints to elephants — TOTAL OF 16 DIFFERENT CARTIDGES IN ALL. The 700 has seven agnum calibers to choose from (one re than our major competitor) and six rmint cartridges (three more than our ggest competitor). It's the ideal gun for shooter looking for an "all-around" rifle.

TRENGTH — Tests have proven the del 700 action is the strongest bolt on center fire ever made. Just the for handloaders who want strength e strength belongs. The secret is in three rings of solid steel that "surround the cartridge head."

here are no extractor cutaways to aken this critical area.

he Model 700 has the appearance of a more expensive rifle. The ADL grade a jeweled bolt with a shrouded bolt , a restyled stock that improves balland pointing and a unique low prosafety that brush will not accidentally e on or off. BDL models have a sharp e spacer forward of the butt plate easier to adjust sling strap.

g with these features the Model 700 offers the shooter the same list of



Three reasons why the Model 700 is the Strongest Bolt Action ever made

extras that have made it the best seller it is. ACCURACY — a product of Remington's famous precision rifling and short, crisp trigger pull. CRAFTSMANSHIP — the traditional beauty of fine checkering and beautiful wood finish that is tough, hard, and scratch-resistant (we call it RK-W). ADDED FEATURES — Monte Carlo stock and cheek piece, receiver drilled and tapped for scope mounts, checkered bolt knob, detachable sights for the shooters using a scope. BDL models feature a hinged floor plate, hooded front sight, sling strap and swivels, black grip cap and fore-end tip with white spacers.

Model 700 BDL "VARMINT SPECIAL"

The tremendous acceptance of the 700 and constant shooter demand have brought about the availability of a special heavy barreled varmint rifle, the 700 BDL "Varmint Special." Designed for minimum-target, maximum-range precision shooting, it is chambered for five of the most popular varmint cartridges going — 222 Rem., 223 Rem., 22-250 Rem., 6mm Rem., and 243 Win. A heavy 24" barrel places this rifle in a new accuracy class. It's equipped with scope bases, hinged floor plate, quick release swivels and an easier to adjust sling strap. Monte Carlo stock and cheek plate. RK-W wood finish and custom checkering.

Model 700 "Custom" Rifle

The 700 "Custom" is the finest bolt action rifle ever manufactured by the Remington Arms Company. Available on special order only, the 700 "Custom" offers the sportsman a choice of specifications. It is available in a variety of calibers and features a select American Walnut stock, hand checkering, and a highly polished barrel (with or without sights) and receiver for the finest blueing possible. It is truly the ultimate gun for the ultimate sportsman.

MODEL 700 ADL DELUXE, 30-06 Spfd., $139.95 2 — MODEL 700 BDL "CUSTOM/DELUXE", 25-06 Rem., $159.95
MODEL 700 BDL "VARMINT SPECIAL", 22-250 Rem., $174.95 4 — MODEL 700 "CUSTOM SPECIAL", 6mm Rem., $345.00

Remington Model 788 Bolt Action Rifle – Priced from $89.95 Model 660 Bolt Action Carbine – Priced from $124.95

Model 660 — Power Plus Accuracy

Model 660

THE MODEL 660 IS THE MOST POWERFUL BOLT ACTION CARBINE ON THE MARKET TODAY! NO OTHER GUN IN ITS CLASS IS CHAMBERED FOR THE HARD HITTING 350 REM. MAGNUM AND 6.5 REM. MAGNUM.

The 660 is available in other popular calibers too: 243, 308, 222 Rem., and 6mm Rem. The Model 660 bolt action carbine is versatile enough to hunt all big game animals of North America. Its convenient carbine length 20" barrel means easy carrying in the field without loss of accuracy or velocity. A special barrel bracket adds support to the 'scope mount making it more rigid. The 'scope can't be easily knocked out of adjustment when the going gets rough. New "vibra-honing" metal finish, inside and out, are silky-smooth for fast, friction-free operation. The receiver is drilled and tapped. It's a simple matter to install a 'scope. Adjustable sights are the same dependable type that are on the Remington Model 700. A good-looking black fore-end tip, fine-line checkering, plus a black grip cap and butt plate (recoil pad on magnum models) help give this carbine the looks of a far more expensive gun. Magnum models feature a lamination of walnut and beech for extra strength, stability, and beauty. Sling straps and swivels are standard equipment on the 660 Magnum.

The Model 660's "S" shape bolt handle hugs the stock and won't interfere with brush or clothing. This bolt knob is serrated on the bottom for a good secure grip. RK-W wood finish, developed by Du Pont, protects the stock and brings out the lustrous beauty of the wood grain.

The Model 660 has many features of higher priced rifles. Standard equipment includes a Monte Carlo stock for a better cheek-to-stock fit for quicker, surer sight alignment with either a 'scope or open sights. The trigger is extra wide and serrated so your finger won't slip even when wearing a glove; it's extra crisp and clean, no creep or spongy action.

Economically priced in all calibers, the Model 660 is the most versatile carbine your money can buy.

Model 788

FEW NEW RIFLES HAVE EARNED, IN SUCH A SHORT PERIOD OF TIME, THE REPUTATION OUR MODEL 788 HAS ACQUIRED FOR ACCURACY AND DEPENDABILITY.

In the three years it has been manufactured, hunters and target shooters alike have found it to be the best all-around, economically priced bolt action rifle on the market.

The Model 788 is also available for southpaw shooters. A left hand bolt is furnished in 6mm Rem. and 308 Win. calibers.

In order to chamber a rifle for a cartridge like the potent 22-250 Rem., you've got to have an action that will stand an unbelievable amount of pressure. Not many $89.95 bolt actions will. The nine extra-heavy locking lugs on the Model 788 bolt engage grooves in the solid steel receiver for a strong, secure lock-up.

The secret of the Model 788's exceptional accuracy lies in its fast lock time (the interval between the time you pull the trigger and the rifle actually fires). The lock time is so fast the bullet has left the barrel of the Model 788 before a comparative bullet has left the cartridge case in competitive models.

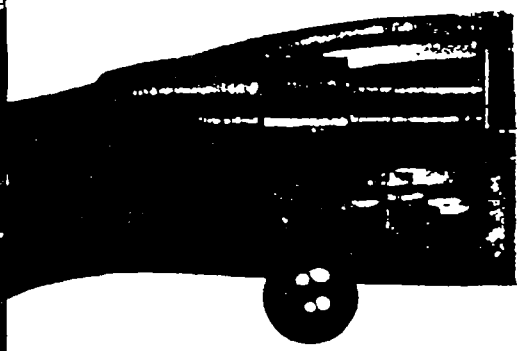
NEW

Remington the 5mm and the

Models 591 and 592
Priced from $64.95

The new Remington Models 591 clip repeater and 592 tubular repeater bolt action rifles are chambered for the new sensational 5mm Remington rim fire magnum cartridge. Why sensational? For these reasons. It's the fastest rim fire cartridge ever made (muzzle velocity 2100 feet per second) — the most accurate rim fire hunting cartridge and the only rim fire cartridge made with the super accurate "Power-Lokt" bullet. It looks like a center fire cartridge and it has the accuracy of a center fire cartridge — great for small game, varmint hunting, and informal target shooting. Other outstanding features of the Models 591 and 592 are:



1 — MODEL 592, Tubular Repeater, 5mm Rim Fire Magnum, $69.95
2 — MODEL 591, Clip Repeater, 5mm Rim Fire Magnum, $64.95
3 — NYLON 77, Clip Repeater, $49.95

Models 591 and 592 Chambered for Remington Rim Fire Magnum

Nylon 77 Clip 22 Caliber Automatic

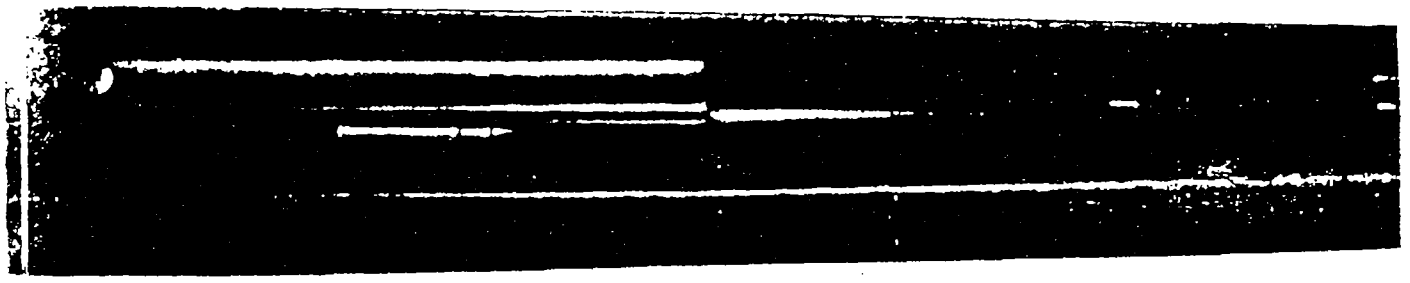
SIX EXTRA HEAVY ROTARY LUGS on the bolt engage grooves in the solid steel receiver. Together they lock up tight, like a bank vault. Here is extra strength to handle the powerful 5mm Remington rim fire magnum cartridge. BOLT COVER at rear keeps out dirt and grit. UNIQUE TWO STAGE EXTRACTORS permit the bolt to completely enclose the cartridge head — assures utmost safety. FULL SIZE Monte Carlo stock with pistol grip looks and feels like a center fire rifle. SIGHTS are rugged, similar to those on big game rifles. Bead front sight and U notch lock-screw rear. ROUND RECEIVER means bedding into the stock can be more precise which, in turn, contributes to fine accuracy. The receiver is also grooved for tip-off 'scope mounts. ORDNANCE STEEL BARREL is precision rifled, crowned at the muzzle, polished and blued for good looks and long wear. NON-SLIP THUMB SAFETY is conveniently located at the right rear of the receiver. Positive safety — forward for fire, rearward for safe. Marked "F" for fire; "S" for safe. MATCH TRIGGER QUALITY — A good trigger pull is an important asset to any rifle. The lock time of the Models 591 and 592 is the fastest of any rim fire made today. What's lock time? It's the length of time, measured in a millisecond, between the release of the trigger sear and instant ignition. This means better accuracy, no trigger movement to pull the gun off target.

Nylon 77 Clip Automatic

Priced at $49.95

The unprecedented popularity of the Nylon 66 is directly responsible for the innovation of another new 22 cal. autoloader, the Nylon 77. This sleek little 4 lb. beauty has the looks, feel, and balance of the Nylon 66 but features a removable clip magazine for fast loading and unloading.

Designed with rugged handling in mind, the stock of the Nylon 77 is guaranteed not to warp, crack, chip, fade, or peel for the life of the rifle — or we will replace it free. No other manufacturer makes this claim. Remington's quite proud of the Nylon 77 and we have every reason to believe our customers will be too.



The Strongest Rim Fire Bolt Action Rifle Ever Made

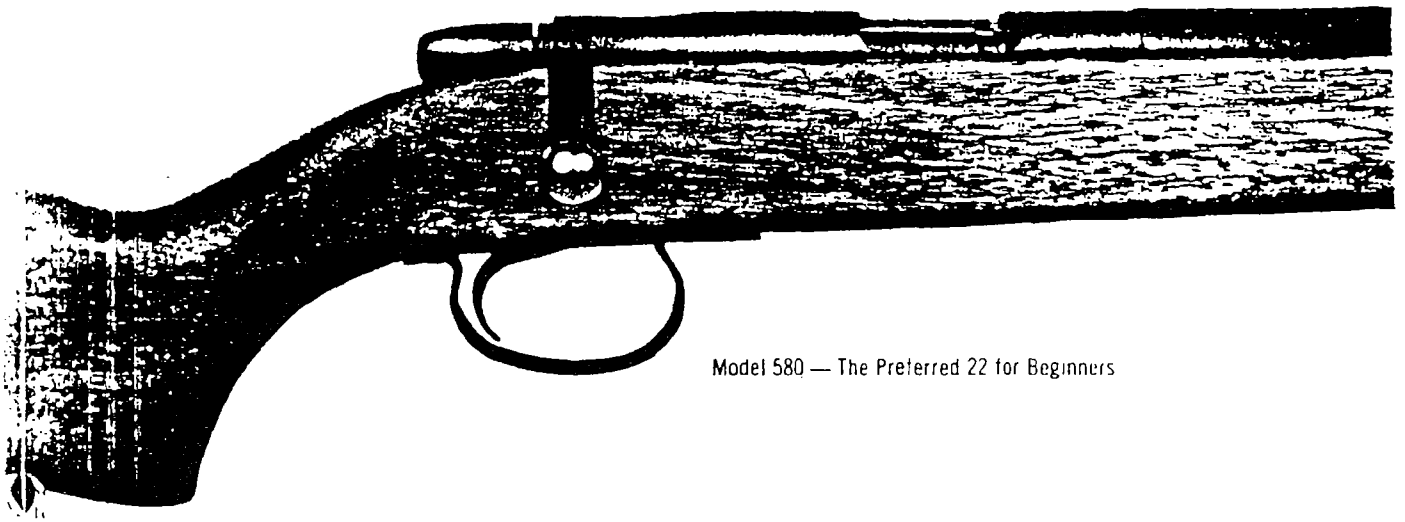
Remington Bolt Action 22 Caliber Rifles...Models 580, 581 and 582—Priced from $39.95 Model 514—Priced at $26.95



Model 580 — The Preferred 22 for Beginners

Models 580 Single Shot, 581 Clip Repeater and 582 Tubular Repeater

They have the look, feel and balance of big game center fire rifles — plus the strongest, most powerful bolt ever designed into a 22 caliber hunting rifle.

A left hand model 581 with the bolt on the left side is available for southpaw shooters. It is the only left hand bolt action rim fire rifle ever manufactured in America, another first from Remington.

The 580 series feature an artillery type bolt with rear lock-up. Six extra-heavy rotary locking lugs at the back engage grooves in the solid steel receiver. Together they lock up tight, like a bank vault. Try it — work the action a few times. It's silky-smooth, solid and secure, made of ordnance steel.

Here is strength that has never been equaled in any 22 bolt action hunting rifle. Actually, there's more built-in strength here than you'll ever need, but it's nice to know your rifle is designed with this plus factor.

Remington looked at all the other desirable features that make up a fine big game rifle . . . and we put them into this new rim fire line. Here they are:

HUNTING-TYPE TRIGGER is wide and the trigger pull is crisp, sharp, clean — no drag. Big, sturdy trigger guard is roomy enough to accommodate a gloved finger. Everything about these new rifles is man-size. There's no corner cutting anywhere.

FULL SIZE Monte Carlo stock with pistol grip looks and feels like a center fire rifle. It assures a snug, comfortable cheek-to-stock fit that means more hits — with or without a 'scope. And there's no skimping on the fore-end, it's long, tapered, man-size to prevent canting and provides a good secure grip.

NON-SLIP THUMB SAFETY is conveniently located at the right rear of the receiver. Positive safety - - forward for fire; rearward for safe.

TWO EXTRACTORS are standard on this series of 22 rifles. Remington feels that two are better than one (so you get 2). Another extra at no extra charge.

SIGHTS are rugged, similar to those on big game rifles. Bead front sight and U notch adjustable rear with lock screw. You'll hit what you aim at with these sights.

ROUND STEEL RECEIVER means bedding into the stock can be more precise, which in turn contributes to fine accuracy. The receiver is also grooved for tip-off 'scope mounts. Actually, it's the strongest, most rigid receiver of any 22 bolt action hunting rifle because there are no slots or notches to weaken it. Bolt handle isn't used as a lock-up lug. Here again, Remington designers made it like a center fire rifle. Costs the shooter no more, its an extra bonus he gets because of good design.

BOLT COVER keeps dirt and bad weather out. Assures smooth operation within. Adds to streamlining of the rifle too. Here's an accuracy combination that's hard to beat — in all three models, 580 single shot, 581 clip repeater and 582 tubular repeater.

Model 514

Here is an excellent 22 caliber rifle at a popular price. It's a single shot bolt action model with a self-cocking bolt, rotary thumb safety, and takes all 22 caliber cartridges — short, long or long rifle; standard velocity or high speed. For the young shooter it's also available as Model 514 BR, with shortened stock

1 — MODEL 514, Single Shot, $26.95 2 — MODEL 580, Single Shot, $39.95 3 — MODEL 581, Clip Repeater, $49.95
4 — MODEL 582, Tubular Repeater, $54.95

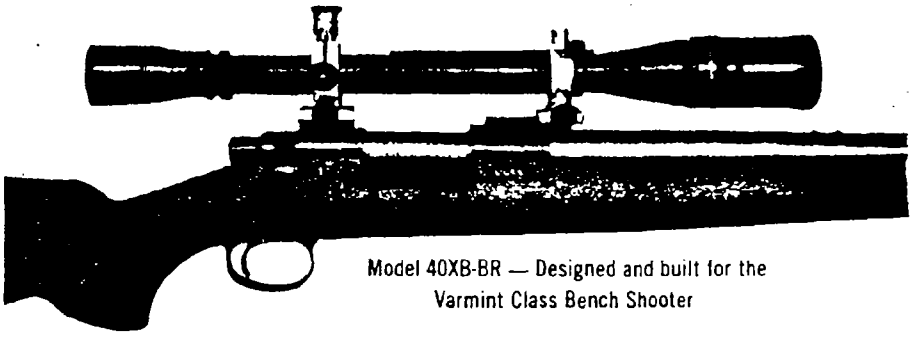
Remington Models 40XB "Rangemaster", 40XB-BR Bench Rest Target Rifles...Model 540X 22 Caliber Match Target Rifle...

International Free Rifle



Model 40XB-BR — Designed and built for the Varmint Class Bench Shooter

Model 40XB "Rangemaster"
(Rim Fire Model) Priced from $184.95

Exclusive loading platform provides straight line feeding; no shaved bullets. High comb gives same sighting plane for iron and telescope sights. Comb is grooved for bolt removal. Mershon White Line non-slip rubber butt plate, adjustable sling swivel and hand-stop are standard equipment. Other features are: extra strong bolt with double extractors, crisp trigger with positive adjustments for weight of pull, wide trigger for more uniform pull and comfort, thumb operated safety. The receiver is drilled and tapped for all standard sight mounts, telescope and metallic Redfield Olympic front and rear sights optional. A new long rail for the adjustable fore-end stop and palm rest makes shooting good scores easier.

Model 40XB "Rangemaster"
(Center Fire Model) Priced from $235.00

Now available in repeating models for use in National Match Courses, the 40XB is designed with clip slots for the conventional five shot clip. (Available in heavy barrel models only). It loads from the top of the receiver and the magazine has a hinged floor plate. Repeating models are provided only in calibers equal to or shorter than the loaded length of the .308 cartridge.

The 40XB center fire repeating rifle is ideal for the rapid fire events, especially in the 7.62mm NATO (308) caliber, because of its shorter bolt throw and extreme accuracy, plus its optimum weight for "over the course" competition.

As a single shot model, the Remington Model 40XB center fire is offered in a variety of center fire calibers as listed in specifications. The action is hand bedded and the barrel is free floating. The 40XB meets the National Bench Rest Association rules for the Heavy Varmint Class with most target telescopes (Max. weight 13½ lbs.) Stainless steel barrels are supplied as standard on all magnum and varmint calibers except 222 Rem., 222 Rem. Mag., 223 Rem., 308 Win. and 30-06 Spfd. Stainless 40XB barrels are not blued. 40XB "Sporter" (22 long rifle version of Model 700 "Custom") available on special order.

Model 40XB-BR-Bench Rest
(Center Fire) Priced at $275.00

Built with all the features of the extremely accurate Model 40XB-CF but modified to give the competitive bench rest shooter a standardized rifle that provides the inherent accuracy advantages of a short (20") heavy, extremely stiff barrel. Wider, squared off fore-end gives a more stable rest on sand bags or other supports. In combination with the new Remington target 'scope, the resulting package weighs just under 10½ lbs. and meets weight limitations for the sporter and light varmint classes of National Bench Rest Shooters Association competition. For shooters competing in the heavy varmint class, a 13½ lb. 26" barrel version is available.

Remington 20 Power Target 'Scope Priced at $159.95

Remington's new 20 power rifle 'scope is designed primarily for accuracy in critical bench rest shooting. Its relatively short length permits fore and aft receiver mounting, and eliminates the need of a forward mounting on the barrel. Produced in 20 power only, the target 'scope contains optics of the highest quality. Because of its lighter weight, shooters have greater flexibility in assembling rifle and 'scope combinations to meet National Bench Rest Shooters Association weight limitations.

Model 540X Match Target Rifle Priced from $99.95

The Model 540X has all the design features and special attachments to make it the most accurate target rifle in its class. Designed for the intermediate and junior shooter, the Model 540X is super accurate, well balanced, and loaded with extras. To continually punch holes in the X ring with any rifle, you need a gun with a good crisp trigger pull. The 540X has a fully adjustable trigger that does exactly that. The secret's in its fast lock time.

A unique feature of this rifle is its five-way adjustable butt plate. The stock can be adjusted with the same wrench for length of pull, vertical, pitch or cant (left or right).

International Free Rifle
(Rim Fire and Center Fire)
Priced from $365.00

The International Free Rifle features the 40XB action, precision heavy barrel, a Remington designed adjustable butt plate and hook, adjustable palm rest, adjustable front sling swivel and 2-ounce trigger. Left-hand stock supplied at extra charge.

1 — MODEL 40XB, 22 Cal. Rim Fire Target Rifle, $184.95 (Target Sights Extra) 2 — MODEL 540X, 22 Cal. Match Target Rifle, $119.95
3 — MODEL 40XB BENCH REST, Center Fire, 222 Rem., Stainless Steel Barrel, Target Rifle, $275.00 (Target 'Scope Extra)
4 — INTERNATIONAL FREE RIFLE, Center Fire, 222 Rem. $365.00

Remington Model 70(1971
Bolt Action Center Fire Rifle... Available in 17 Calibers Including The New 17 Remington

ou want a rifle that's rugged, dependable, hly accurate, distinctive, the world's strong- available in a dozen or more calibers, and uilt like a Rolls...you want a Remington Model 700.

This year, you can choose from 17 differ- calibers, including the latest, hottest, and he smallest commercially loaded center fire ridge—the 17 Remington. This 4,000 plus -per-second cartridge is just what the var- t-small-game-accuracy shooter has been ing and waiting for. And only Remington neering and the Model 700 can deliver this e cartridge with the accuracy and power serves.

With this latest addition, the Model 700 ers a caliber selection unmatched in the in- try. The Model 700 has a caliber for every pe of hunting from varmints to elephants— even magnum calibers and seven varmint l bers. It's the ideal gun for the shooter look- r the finest design and largest selection olt action rifle.

ENGTH—Tests have proven the Model action is the strongest bolt action center ever made. It's just the ticket for hand- aders who want strength where strength elongs. The secret is in the three rings of solid el that surround the cartridge head. There no extractor cuts to weaken this critical ea.

PPEARANCE—The Model 700 has the ap- earance of a far more expensive rifle. The dis- tinctive ADL grade has a jeweled bolt that re- tains lubrication, a shrouded bolt cover to keep out dirt and grit, a restyled stock with attrac- tive checkering to improve pointing, balance, and grip, and a unique low profile safety that will not accidentally move on or off. White- line spacers at the butt plate, fore-end tip, and pistol grip, and "quick-adjust" sling strap with swivels are standard on BDL models.

Along with these features, the Model 700 offers the shooter the same list of extras that have made it the best selling bolt action rifle.

ACCURACY—Like all Remington firearms, the Model 700 is built one at a time by the world's finest gunsmiths. This care assures snug bed- ding, precision working parts, and a short crisp trigger pull. When you fire a Model 700, you hit what you aim at.

CRAFTSMANSHIP—The traditional beauty of fine checkering is accented with an exclu- sive, tough, hard, scratch-resistant Du Pont wood finish called RK-W.

EXTRA FEATURES—All Model 700 rifles have Monte Carlo stocks with cheek piece, check- ered bolt knobs and detachable sights for scope users. The 700 receiver is drilled and tapped for scope mounts.

To make sure you get the most from this highly accurate and well built rifle, be sure to use Remington-Peters "Core-Lokt" or "Power- Lokt" center fire ammunition. It's the ammu- nition used to sight-in and test all Model 700 rifles.

MODEL 700 BDL "VARMINT SPECIAL"

For 1971, this heavy barreled varmint rifle is available in six great varmint calibers includ- ing the new 25-06 Remington. The Model 700 "Varmint Special" is designed for small target- long range precision shooting. Additional cal- ibers include the 222 Remington, 223 Reming- ton, 22-250 Remington, 6mm Remington and 243 Win. Its heavy barrel eliminates whip- ping and the result is superb accuracy— enough to put the Model 700 "Varmint Spe- cial" in a new accuracy class. It's equipped with scope bases, hinged floor plate, quick release swivels and "quick-adjust" sling strap, Monte Carlo stock with cheek piece, RK-W wood finish and custom checkering.

MODEL 700 "CUSTOM" RIFLE

If you're interested in an "extra special" Model 700, the Model 700 "Custom" is the rifle for you. Available on special order only, the Model 700 "Custom" offers you a choice of tailored specifications. It's available in a variety of cal- ibers and features a select American Walnut stock, hand checkering, a highly polished bar- rel (with or without sights) and highly pol- ished receiver for the finest blueing possible. The Model 700 "Custom" is the finest in Rem- ington gunmaking.

Model 760 "Gamema[1971]_ump Action Rifle, Left And Right Hand Models- Model 788 Bolt Action Rifle, Left And Right Hand Models-

ODEL 760 "GAMEMASTER"

ou already own a pump shotgun, the Rem- ton Model 760 will feel right the moment pick it up.

Why? Let's start with the action bars. Model 760 has two of them. When you p the action, the fore-end doesn't twist or l. It comes back straight and fast in a ortable natural movement. Your finger leaves the trigger as it does in a lever n letting you stay on target for fast ad- nal shots, if they're needed.

Point two. The receiver and interior work- arts are put through our exclusive "vibra- p" process. They come out mirror smooth shiny—free from metal burrs that cause gish operation. The friction-free parts op- te with silky-smooth ease.

Point three. It looks distinctive. All Model s have the exclusive gleam that comes Du Pont RK-W wood finish. They also distinctive black fore-end tips and grip white line spacers, and streamlined bea- l fore-ends. Standard grades have skip checkering and the BDL Deluxe grade fea- basket weave checkering and Monte Carlo with cheek piece (available in left hand ons too). An 18½" barrel carbine version unting in heavy brush is also available.

Point four. It's strong. The Model 760 is nly pump action rifle strong enough to dle the powerful 30-06 Springfield idge. The secret is in the 760's solid steel iver and super-strong artillery type bolt.

Add up these four points plus fast, remov- le magazine clips and receivers that are ed and tapped for scope mounts, optional hand BDL models with reversed safety d cheek piece on left side for southpaw oters, and you'll know why the Remington Model 760 is the quality leader in the center fire pump action field.

THE REMINGTON MODEL 788 BOLT ACTION RIFLE— EXTREMELY ACCURATE, EXTRA STRONG, AND UNBELIEVABLY INEXPENSIVE.

These statements are all true. In just four years, the Model 788 has built up a tremendous reputation among hunters and shooters.

It was built for the sportsman who wanted a low price big game rifle in popular, modern cartridges. The 788 gave him that in both left and right hand models.

The Model 788 was also designed to give good accuracy. It delivered that plus. Take the outdated 30-30 for example. The 788 shot groups with this cartridge that could have put it in the far more expensive target rifle class. Try the Model 788 in 22-250 or 6mm Remington and you'll see what pin-point accuracy is like.

The unusual accuracy of the Model 788 comes from its extremely fast lock time (the interval between pulling the trigger and primer ignition). The lock time is so fast that the bullet has left the 788's barrel before a comparative bullet in a competitive gun has left the cartridge case.

In short, the trigger pull is crisp, with no drag, and that means you'll hit what you aim at.

To handle the potent 22-250 Remington, the Model 788 had to be strong. The secret of the 788's strength is in the nine locking lugs on the bolt and the grooved receiver. Together, they lock up tight and secure.

With terrific accuracy, extra strength, and a low price going for it, the Model 788 is a tough rifle to beat.

You can't beat Remington-Peters big game cartridges either. They're the cartridges used to test and sight in all 788's and 760's at the factory. These rifles, combined with Remington-Peters big game cartridges are "Partners in Power and Accuracy."

1971

Remington Models 5 /771 592 Chambered for The 5mm Rem. Rim Fire Magnum. Model 572 Pump Action 22 Caliber Rim Fire.

MODELS 591 and 592 Priced from $69.95

Remington Models 591 clip repeater and tubular repeater bolt action rifles are chambered for the sensational 5mm Remington rim fire magnum cartridge. Why sensational? For these reasons. It's the fastest rim fire cartridge ever made (muzzle velocity 2100 feet per second)—the most accurate rim fire hunting cartridge and the only rim fire cartridge made with the super accurate "Power-Lokt" bullet. It looks like a center fire cartridge and has the accuracy of a center fire cartridge for great for small game, varmint hunting, and informal target shooting. Other outstanding features of the Models 591 and 592 are:

SIX EXTRA HEAVY ROTARY LUGS on bolt engage grooves in the solid steel receiver. Together they lock up tight, like a bank vault. Here is extra strength to handle the powerful 5mm Remington rim fire magnum cartridge. BOLT COVER at rear keeps out dirt and grit. UNIQUE TWO STAGE EXTRACTOR permits the bolt to completely enclose the cartridge head—assures utmost safety. FULL SIZE Monte Carlo stock with pistol grip looks and feels like a center fire rifle. SIGHTS are rugged, similar to those on big game rifles. Bead front sight and U notch—lock screw rear. ROUND RECEIVER means bedding into the stock can be more precise which, in turn, contributes to fine accuracy. The receiver is also grooved for tip-off scope mounts. ORDNANCE STEEL BARREL is precision rifled, crowned at the muzzle, polished and blued for good looks and long wear. NON-SLIP THUMB SAFETY is conveniently located at the right rear of the receiver. Positive safety—forward for fire, rearward for safe. Marked "F" for fire; "S" for safe. MATCH TRIGGER QUALITY—A good trigger pull is an important asset to any rifle. The lock time of the Models 591 and 592 is the fastest of any rim fire made today. What's lock time? It's the length of time, measured in milliseconds, between the release of the trigger sear and instant ignition. This means better accuracy, no trigger movement to pull the gun off target.

MODEL 572 "FIELDMASTER" PUMP ACTION Priced from $69.95

For the shooter who likes a pump action 22 caliber rifle, the "Fieldmaster" Model 572 is best...action is slick and smooth. Exclusive cartridge feeding design prevents jamming, permits easy single loading. By simply removing the inner magazine tube, parent or instructor can convert the "Fieldmaster" into a single shot rifle. Receiver has dovetail grooves for "tip-off" scope mounts. Capacity is large; tubular magazine holds 20 Short, 17 Long or 15 Long Rifle cartridges. It has a cross bolt safety conveniently located at the rear of the trigger guard where it can be snapped on or off with the index finger. The Model 572 is beautifully streamlined and balanced—rugged and dependable like Remington big game rifles and shotguns. BDL deluxe models feature extra tough RK-W wood finish, custom checkering, grip cap, and big game type sights.

REMINGTON MAGNUM

Available in both Remington and Peters brands, the 5mm Remington Magnum has a 38 grain "Power-Lokt" hollow point bullet. Needle point accuracy with perfect expansion goes hand in hand. The fastest rim fire cartridge ever and the hardest hitting with more energy, less drift, greater accuracy, superior mushrooming.

1971

Remington Bolt Act. 1971 Caliber Rifles... Models 580, 581, And 582, Left Hand Model 581, New Model 580 "Boys' Rifle"-

lodels 580 Single Shot, 581 Clip Repeater and 582 Tubular Repeater.

r 22s have the look, feel and balance of ame center fire rifles—plus the strongest, powerful bolt ever designed into a 22 ber hunting rifle.

The 580 series features an artillery type with rear lock-up. What does that mean ? It means brute strength. When the closed on the cartridge, six rotary lock- s are engaged in a grooved receiver. ers they lock up tight—bank vault That's more strength than you'll ever The pressure is on ordnance steel locked ordnance steel not on a bolt handle locked wooden stock. Try the action. It's silky- oth solid, secure and extra strong.

The new 580 "Boys' Rifle" has all the fea- of the standard model 580 but the stock shorter for the young shooter

A left hand Model 581, with the bolt de on the left side is available for south- shooters. It's the only left hand bolt action rim fire rifle made in America and it's another first from Remington.

Other great features of this super strong rim fire series include:

HUNTING-TYPE TRIGGER that's wide and has a crisp, sharp, clean trigger pull without drag. That means when you pull the trigger, you hit what you aim at. Another plus feature is a big, sturdy trigger guard that's roomy enough to handle a gloved finger.

FULL SIZE MONTE CARLO STOCK with pistol grip looks and feels like a center fire rifle. It assures a snug, comfortable cheek-to-stock fit and that means more hits with or without a scope. The fore-end is long, tapered and man-size to prevent canting giving you a good secure grip.

NON-SLIP THUMB SAFETY is conveniently located at the right rear of the receiver. It gives you positive safety—forward for fire; rear-ward for safe.

DUAL EXTRACTORS give a two-handed grip on the cartridge to make sure ejection is fast and smooth without jamming.

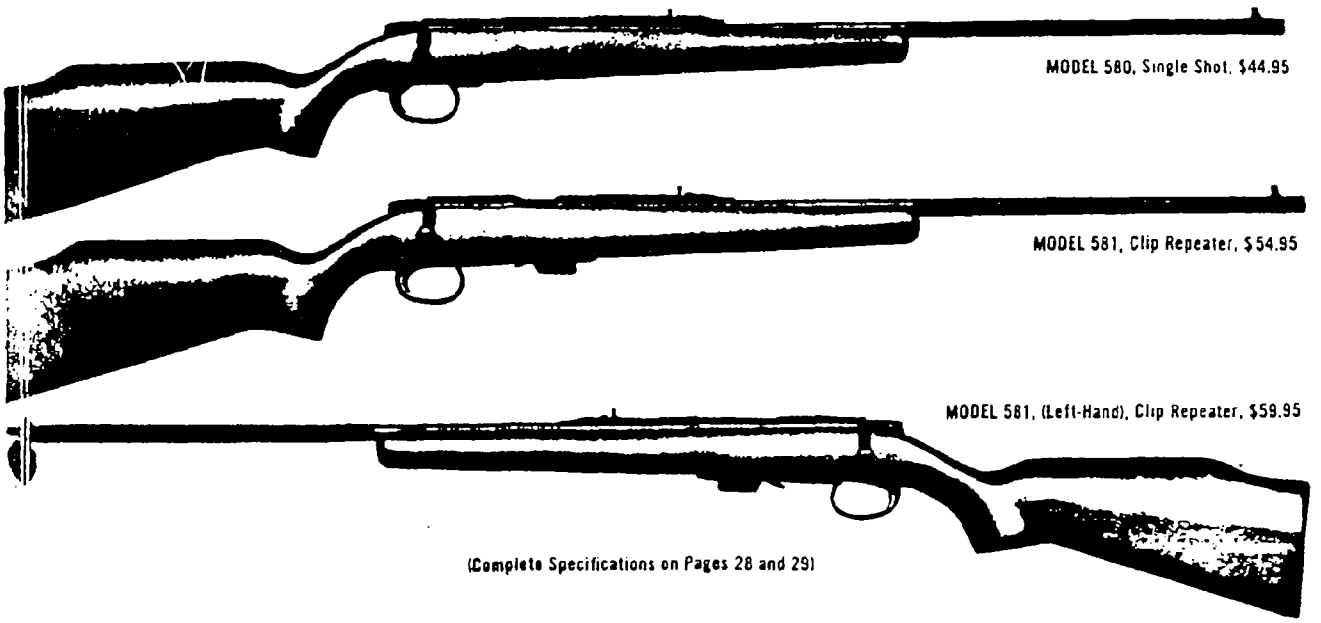
SIGHTS are rugged, similar to those on big game rifles. Bead front sight and U notch adjustable rear sight with lock screw.

ROUND STEEL RECEIVER makes stock bedding more precise and, in turn, contributes to fine accuracy. It's also grooved for "tip-off" scope mounts.

BOLT COVER keeps dirt, grit and bad weather out assuring smooth operation inside. It also gives the gun the streamlined look of a center fire big game rifle.

FOR THE BEST in accuracy and dependability, use Remington-Peters 22 caliber cartridges...the same cartridges used to test these rifles at the factory.

Put all of the 580 series features together and you will know what competition is shooting for.



MODEL 580, Single Shot, $44.95

MODEL 581, Clip Repeater, $54.95

MODEL 581, (Left-Hand), Clip Repeater, $59.95

(Complete Specifications on Pages 28 and 29)

582, Tubular Repeater, $59.95

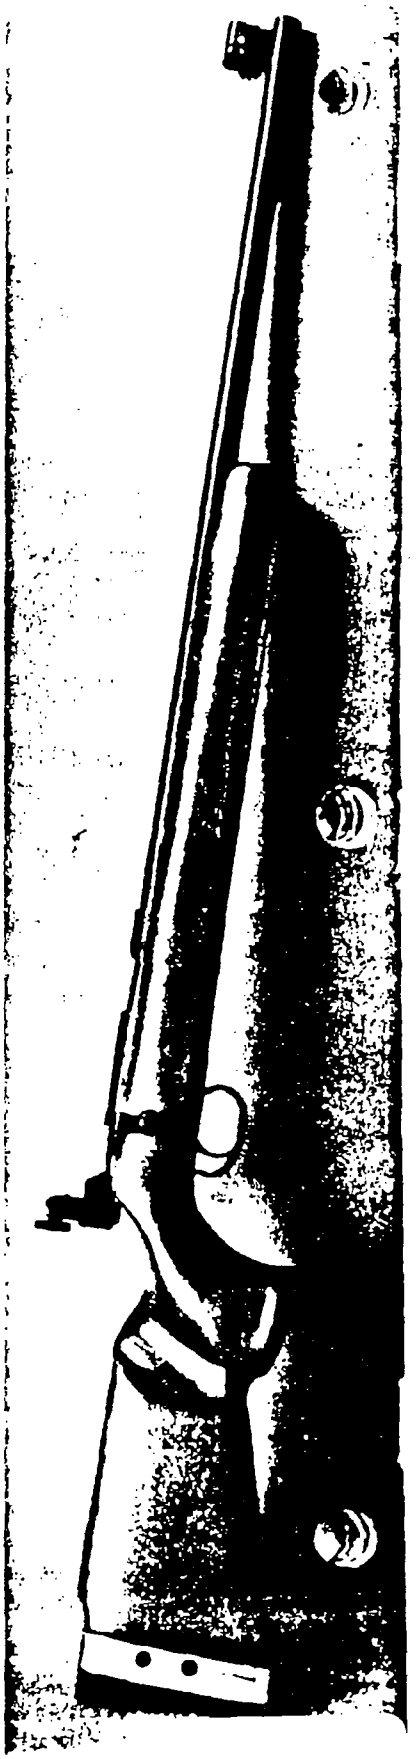
1971



Remington Models 40[illegible] "Rangemaster," [illegible]XB-BR Bench Rest Target Rifles... Model 540X 22 Caliber Match Target Rifle... International Free Rifle.

1971

MODEL 40XB "RANGEMASTER" (RIM FIRE MODEL) Priced from $199.95

[illegible]clusive loading platform provides straight [illegible] feeding, no shaved bullets. High comb [illegible]s same sighting plane for iron and tele[illegible]ope sights. *Comb is grooved for bolt re*moval. Mershon White Line non-slip rubber [illegible] plate, adjustable sling swivel and hand[illegible] are standard equipment. Other features [illegible] extra strong bolt with double extractors, [illegible] trigger with positive adjustments for [illegible]ht of pull, wide trigger for more uniform [illegible] and comfort, thumb operated safety. The [illegible]ver is drilled and tapped for all standard [illegible] mounts, telescope and metallic Redfield [illegible]pic front and rear sights optional. A [illegible] long rail for the adjustable fore-end stop [illegible] palm rest makes shooting good scores [illegible].

MODEL 40XB "RANGEMASTER" [illegible]NTER FIRE MODEL) [illegible]d from $249.95

[illegible]vailable in repeating models for use in [illegible]nal Match Courses, the 40XB is de[illegible]d with clip slots for the conventional [illegible] shot clip. (Available in heavy barrel [illegible]s only). It loads from the top of the [illegible]er and the magazine has a hinged floor [illegible].

Repeating models are provided only in [illegible]es equal to or shorter than the loaded [illegible]th of the 308 cartridge.

The 40XB center fire repeating rifle is [illegible]d for the rapid fire events, especially in [illegible]7.62mm NATO (308) caliber, because of [illegible] shorter bolt throw and extreme accuracy, [illegible]s optimum weight for "over the [illegible]" competition.

As a single shot model, the Remington Model 40XB center fire is offered in a variety of center fire calibers as listed in specifications. The action is hand bedded and the barrel is free floating. The 40XB meets the National Bench Rest Association rules for the Heavy Varmint Class with most target telescopes. *(Max. weight 13½ lbs.)* Stainless steel barrels are supplied as standard on all magnum and varmint calibers except 222 Rem., 222 Rem. Mag., 223 Rem., 308 Win. and 30-06 Spfd. Stainless 40XB barrels are not blued. 40XB "Sporter" (22 long rifle version of Model 700 "Custom") available on special order.

MODEL 40XB-BR BENCH REST (CENTER FIRE) Priced at $289.95

Built with all the features of the extremely accurate Model 40XB-CF but modified to give the competitive bench rest shooter a standardized rifle that provides the inherent accuracy advantages of a short (20") heavy, extremely stiff barrel. Wider, squared off fore-end gives a more stable rest on sand bags or other supports. In combination with the new Remington target scope, the resulting package weighs just under 10½ lbs. and meets weight limitations for the sporter and light varmint classes of National Bench Rest Shooters Association competition. For shooters competing in the heavy varmint class, a 13½ lb. 26" barrel version is available.

REMINGTON 20 POWER TARGET SCOPE Priced at $169.95

Remington's new 20 power rifle scope is designed primarily for accuracy in critical bench rest shooting. Its relatively short length permits fore and aft receiver mounting and eliminates the need of a forward mounting on the barrel. Produced in 20 power only the target scope contains optics of the highest quality. Because of its lighter weight, shooters have greater flexibility in assembling rifle and scope combinations to meet National Bench Rest Shooters Association weight limitations.

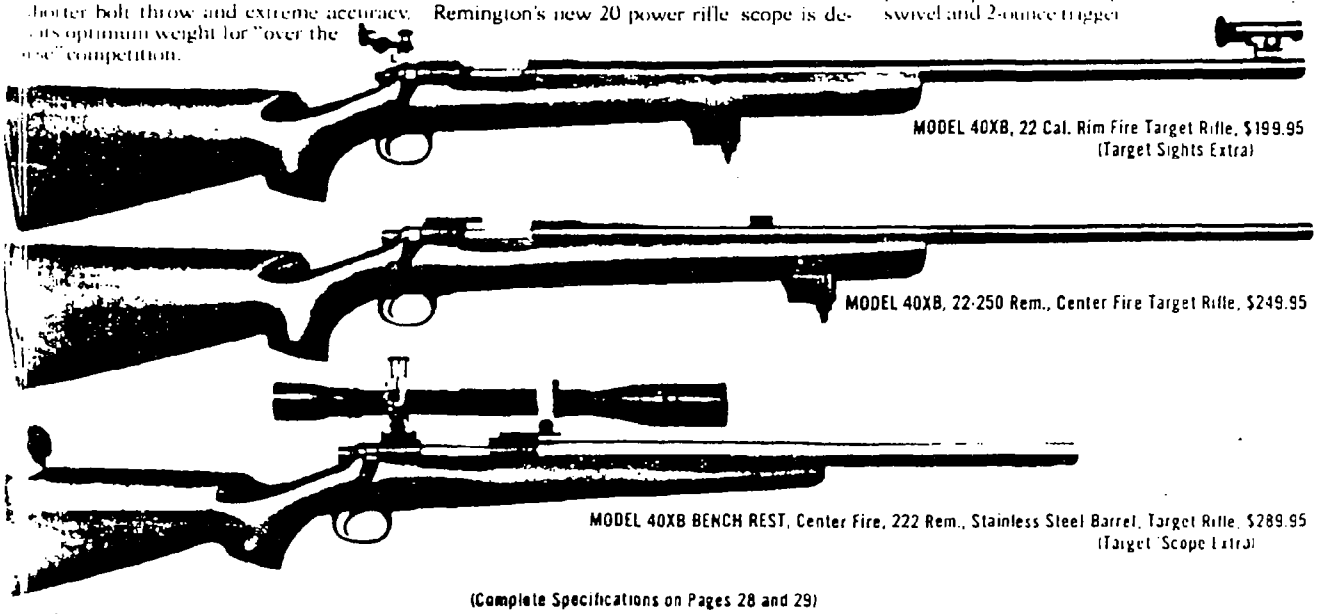
MODEL 540X MATCH TARGET RIFLE Priced from $99.95

The Model 540X has all the design features and special attachments to make it the most accurate target rifle in its class. Designed for the intermediate and junior shooter the Model 540X is super accurate, well balanced, and loaded with extras. To continually punch holes in the X ring with any rifle you need a gun with a good crisp trigger pull. The 540X has a fully adjustable trigger that does exactly that. The secret's in its last lock time.

A unique feature of this rifle is its lever way adjustable butt plate. The cheek piece is adjusted with the same wrench for length of pull, vertical, pitch or cant (left or right).

INTERNATIONAL FREE RIFLE (RIM FIRE AND CENTER FIRE) Priced at $395.00

The International Free Rifle features the 40XB action, precision heavy barrel, a Remington designed adjustable butt plate and hook, adjustable palm rest, adjustable front sling swivel and 2-ounce trigger.



MODEL 40XB, 22 Cal. Rim Fire Target Rifle, $199.95 (Target Sights Extra)

MODEL 40XB, 22-250 Rem., Center Fire Target Rifle, $249.95

MODEL 40XB BENCH REST, Center Fire, 222 Rem., Stainless Steel Barrel, Target Rifle, $289.95 (Target Scope Extra)

(Complete Specifications on Pages 28 and 29)

Remington

CUSTOM GUN SHOP

R2525049

The experience gets better.

Through experience comes a finer appreciation of the shooting sports, and a heightened awareness of the special place they hold in your life.

Your personal expression of that experience, that interest, takes no higher form than the acquisition of a truly fine firearm.

The kind of gun most shooters only dream about. The kind of gun we make in the Remington Custom Shop.

Here, we craft one-of-a-kind guns to fit the taste, style and experience of just one person. You.

It is the very best of our gunmaker's art, and for pure joy and satisfaction of ownership, few things in this life can match it.

In the Custom Shop, craftsmen ply skills unknown to machines to create masterpieces of precision and beauty. From deep within walnut-scented storerooms, the one piece of wood with just the right grain structure, color and pattern is selected for your gun. Then our master stockmaker cuts, chisels, files and sands the wood into its final form.

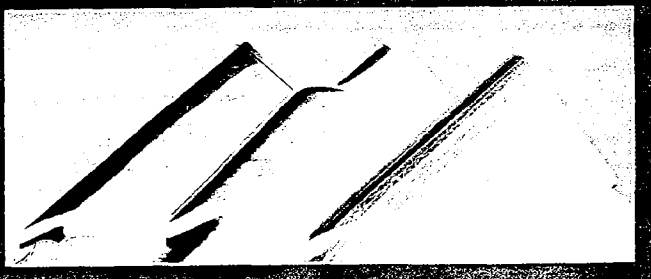
Checkering lines are skillfully cut by hand. The same attentive care is given to the stock's finish. In some cases, as many as 10 hand-rubbed coats are applied to achieve a luster and depth of finish worthy of a Remington Custom Gun.

Let us form your stock from one of our three premium woods. Choose the warm beauty of traditional American walnut, the richly figured patterns of California Claro, or the distinctive, tight grain of English walnut.

Rosewood and ebony are sculpted for plugs, fore-end tips and other finishing touches.

R2525050

One mark of a truly fine gun is its wood finish. The Remington Custom Shop gives you a choice of three. Select the highly protective high-gloss finish or the classic look of our satin finish. If you prefer a more subtle touch, choose the rich, low luster of our optional hand-rubbed oil finish.



In the Custom Shop, checkering is still hand cut one line at a time, with great care. This exacting work gives your gun a refined look and a sure feel that machines simply cannot duplicate. The elegant fleur-de-lis pattern is shown above.

R2525051

In the Custom Shop, craftsmanship goes beyond aesthetics. Our first and foremost goal is to create a firearm that shoots as good as it looks.

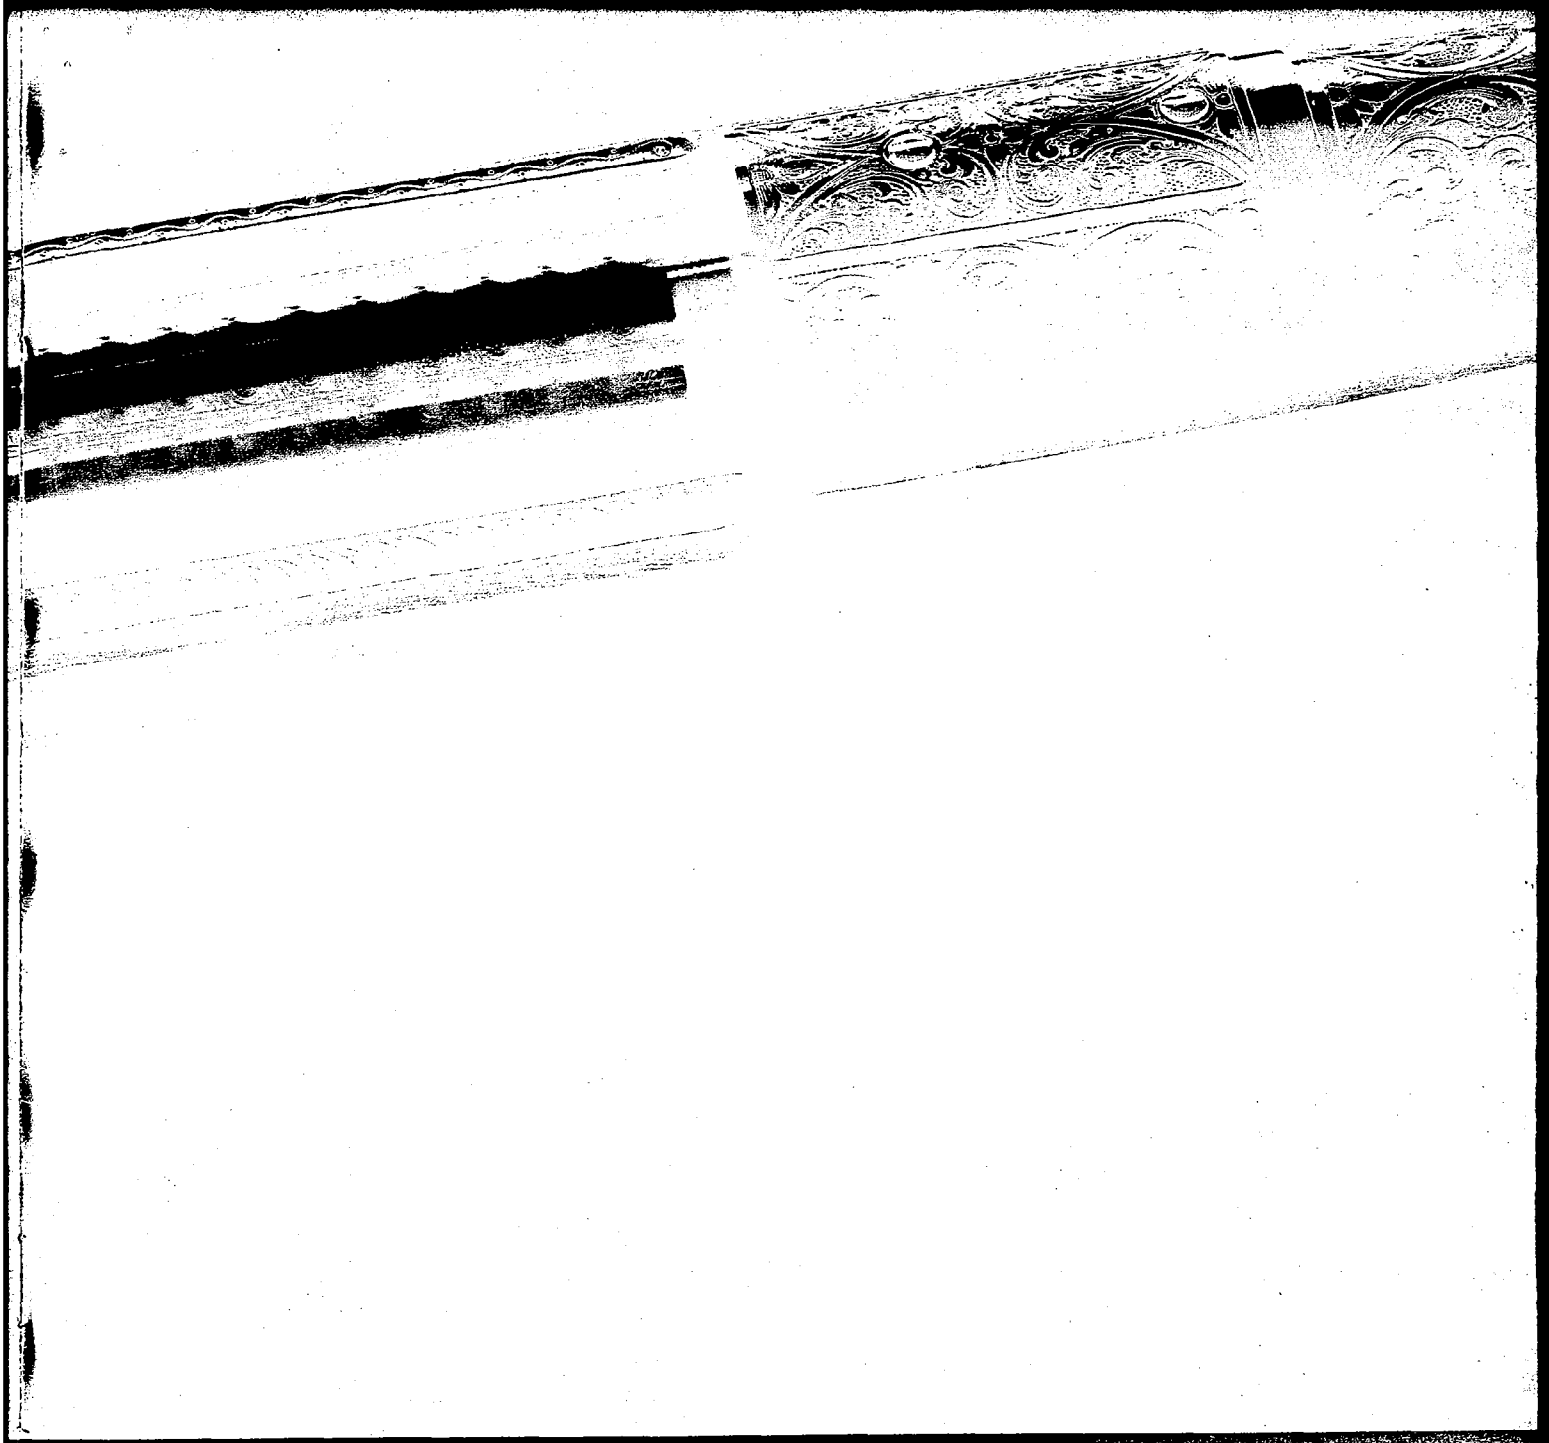
Each and every component receives individual attention from our master gunsmiths. The hammer-forged barrel is individually selected, then chambered, contoured, crowned and fitted to the receiver by hand. Parts are hand assembled.

This dedication to fit, finish and detail ensures that your Remington Custom Gun will stand above the ordinary in performance and beauty.

Each trigger is hand assembled in the Custom Shop. The result is an incredibly crisp trigger with virtually no creep or backlash.

The foundation of accuracy is the barrel. That's why the Custom Shop pays extra attention to every step of the barrel-making process. Steel strength and uniformity, bore smoothness, groove depth and land height must meet our rigid Custom Shop standards.

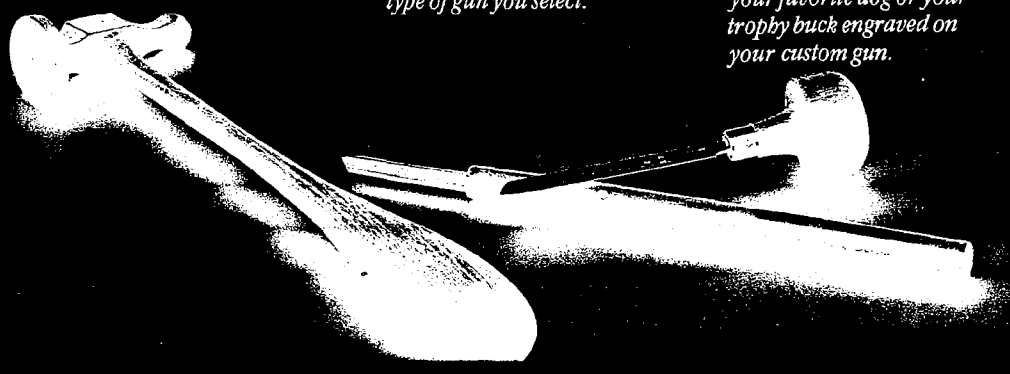
R2525052

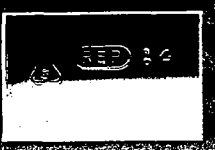


In the skillful hands of Remington engravers, these time-tested tools turn your custom gun into a work of art that will be admired for generations. The extent and pattern of engraving varies according to the grade and type of gun you select.

With our highest grades, our master engravers will work with you to create your own original designs. Imagine your favorite dog or your trophy buck engraved on your custom gun.

When a great masterpiece is completed, tradition holds that the creator signs his work. That's why you'll find the mark of one very proud craftsman unobtrusively placed on your custom Remington gun.





R2525053

Grades I & II

The Custom Shop proudly offers the Remington Model 700 in four distinctive grades. Grades vary primarily by aesthetic differences, such as wood selection, checkering patterns and extent of engraving. But no matter which grade you order, you'll get a hand-assembled version of our legendary Model 700 action—the standard others are measured against.

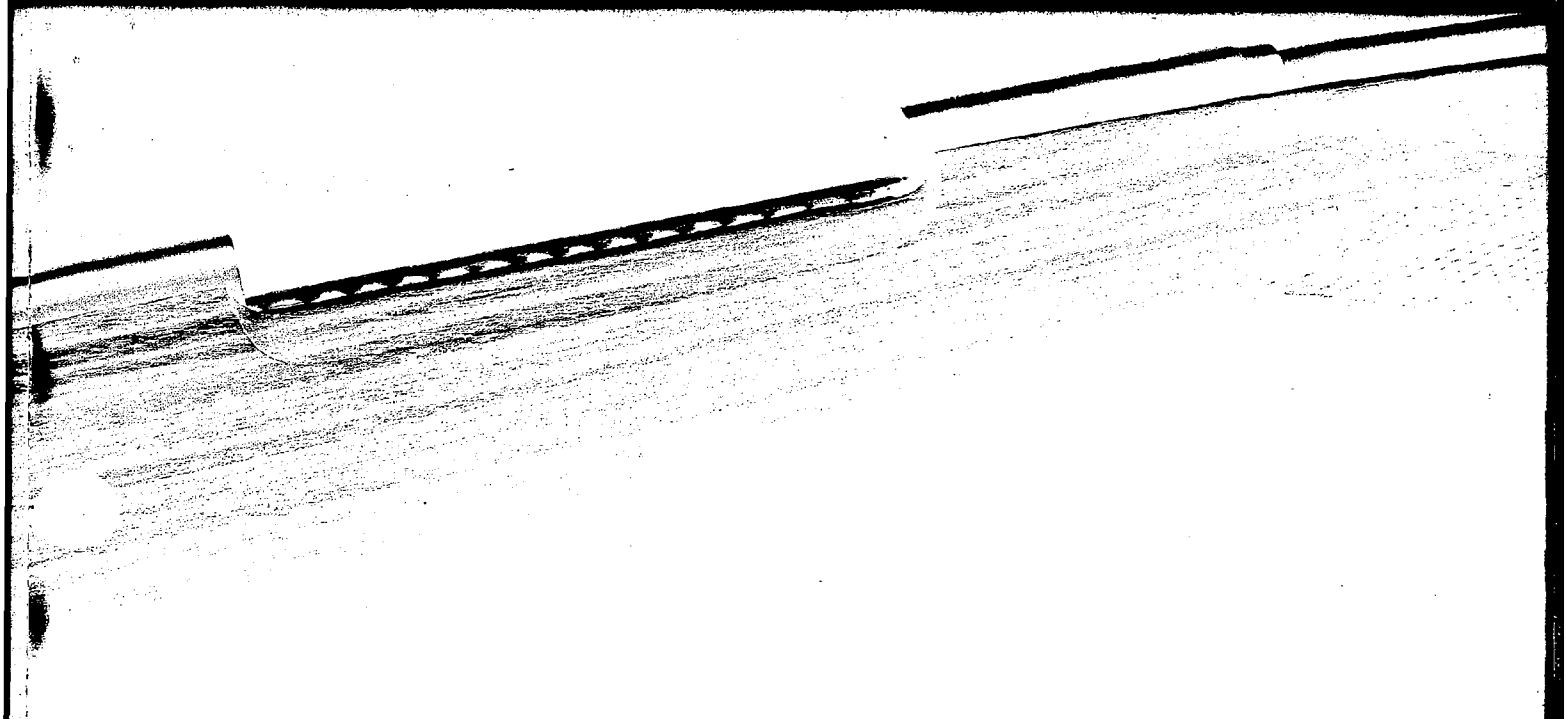
GRADE I

■ Monte Carlo or straight comb stock hand crafted from richly figured California Claro or select American walnut. ■ Hand-cut checkering in a distinctive point pattern. ■ A custom steel barrel, chambered, crowned and fitted by hand. ■ Trigger mechanism, hand assembled and adjusted for the utmost in crispness. ■ Barreled action painstakingly bedded to the stock. ■ Wide range of calibers. ■ Your choice of recoil pad, stock style, wood type and metal finish, grip cap and fore-end tip.

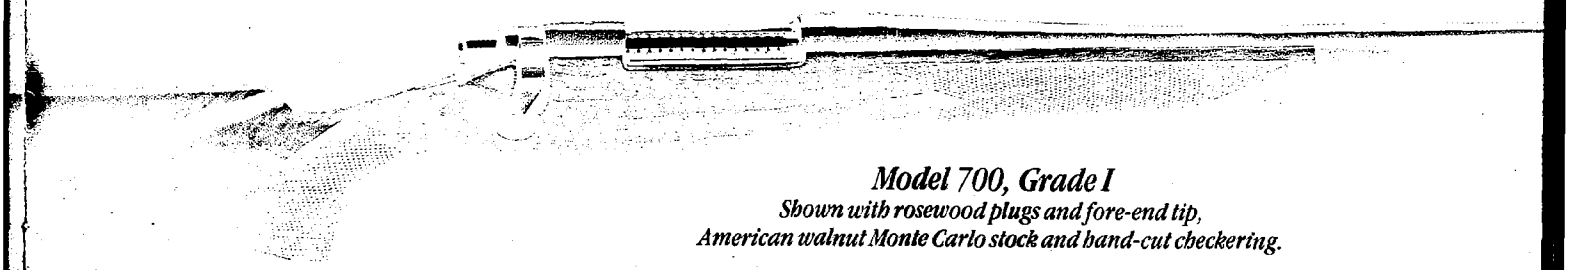
GRADE II

The Model 700 Custom Grade II has every feature of the Grade I, plus some additional enhancements. ■ Distinctive English walnut stocks are available as well as California Claro and American walnut. ■ The trigger guard and floor plate are made of rugged, machined steel. ■ Skeleton steel grip cap and butt plate available with hand checkering on the wood. A solid steel butt plate also is available. ■ Shadowline style cheekpiece may be selected.

R2525054



Model 700, Grade II
Shown with English walnut stock, ebony plugs, skeleton grip cap and distinctive ribbon pattern checkering.



Model 700, Grade I
Shown with rosewood plugs and fore-end tip, American walnut Monte Carlo stock and hand-cut checkering.

Grades I and II Specifics:

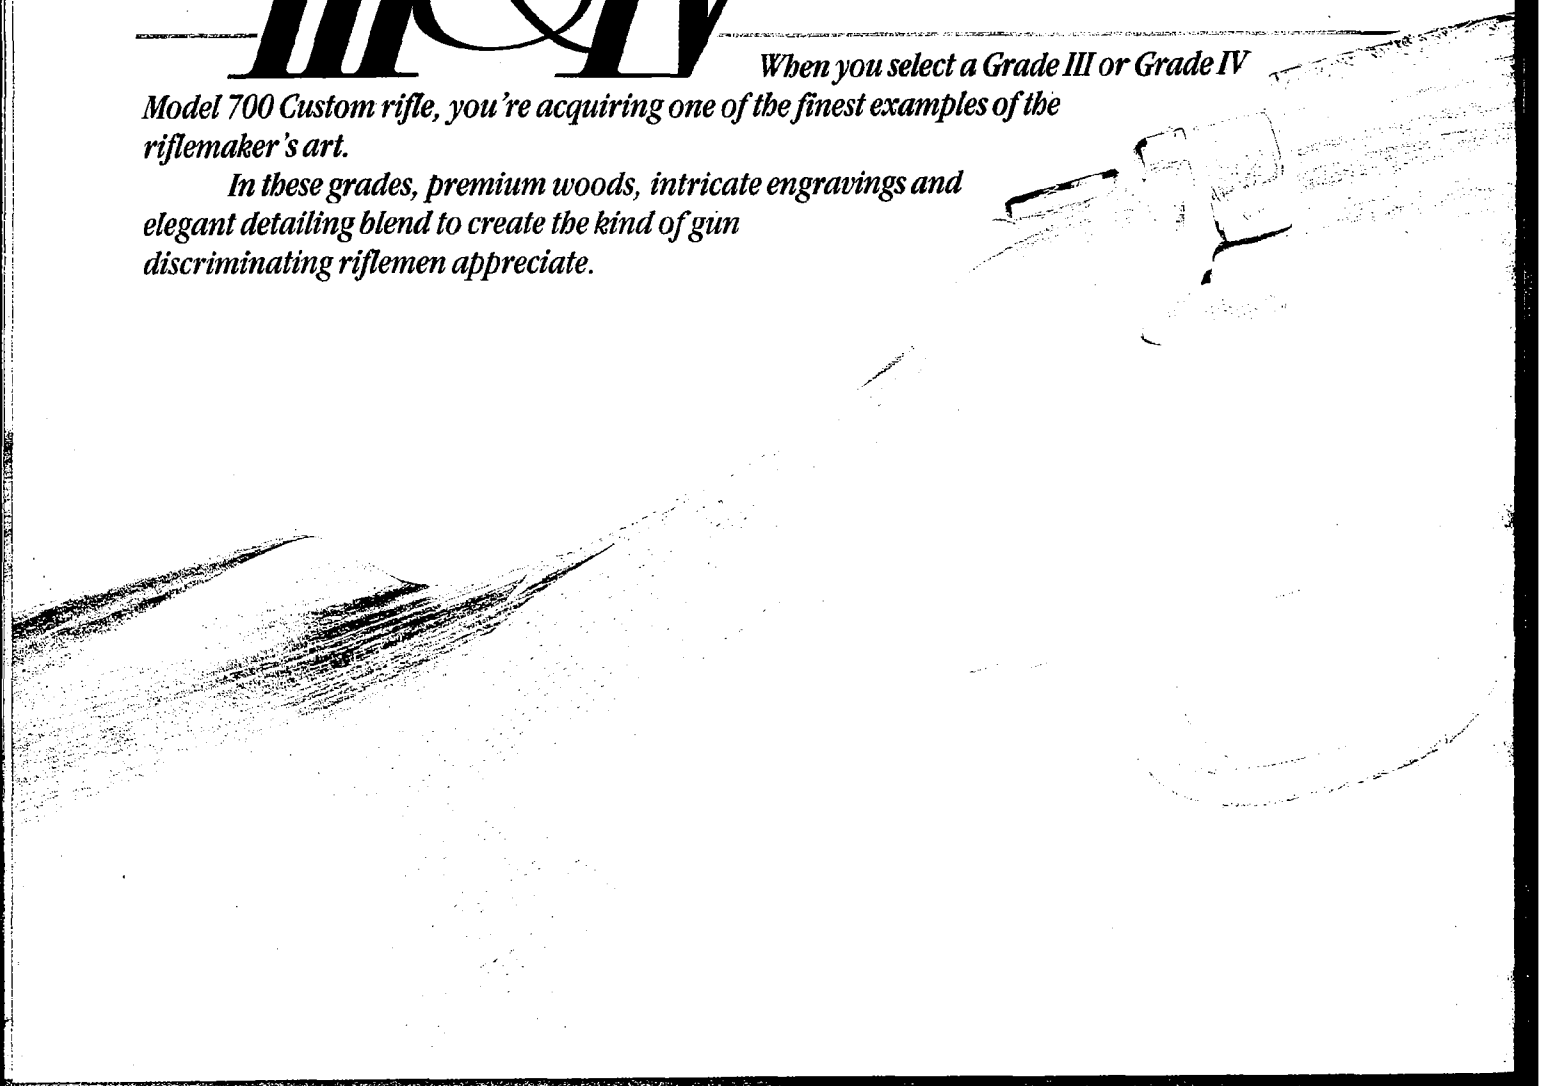
1. Both grades are available in 30 calibers: 17 Rem, 222 Rem, 223 Rem, 22-250 Rem, 243 Win, 6mm Rem, 250 Savage, 257 Roberts, 25-06 Rem, 264 Win Mag, 270 Win, 7mm Mauser, 7mm-08 Rem, 280 Rem, 6.5mm Rem Mag, 7mm Rem Mag, 308 Win, 30-06 Spfld, 300 H&H Mag, 300 Win Mag, 300 Wby Mag, 30-338 Mag, 338 Win Mag, 8mm Rem Mag, 350 Rem Mag, 35 Rem, 35 Whelen, 375 H&H Mag, 416 Rem Mag or 458 Win Mag.
2. Barrel length can be specified from 18½ to 24 inches. Contour can be light, medium or heavy in most calibers.
3. Stock is available with or without cheekpiece.
4. Grip cap, fore-end tip and cross bolt plugs available in either rosewood or ebony.
5. High-gloss or satin finishes are standard. Hand-rubbed oil finish also is available.
6. Grade I comes with sling swivel studs. Grade II comes with inletted 2-screwstyle sling swivel mounts.
7. Adjustable iron sights are optional.
8. Each grade has its own distinctive checkering pattern.
9. Left-hand versions are available in most calibers, including some short actions.
10. Personalized 10-kt. gold nameplate is available.

R2525055

Grades III & IV

When you select a Grade III or Grade IV Model 700 Custom rifle, you're acquiring one of the finest examples of the riflemaker's art.

In these grades, premium woods, intricate engravings and elegant detailing blend to create the kind of gun discriminating riflemen appreciate.



GRADE III

■ The receiver, barrel, bolt handle, trigger guard and floor plate are hand engraved with patterns unique to Remington's Custom Grade III. ■ An intricate, 22-line-per-inch ribbon checkering pattern is standard on all Grade III guns.

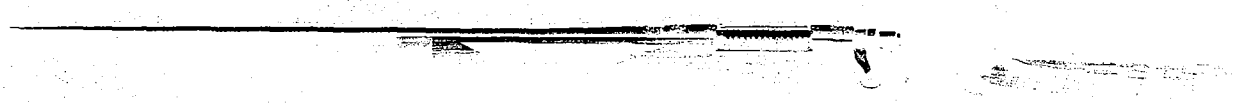
GRADE IV

The ultimate expression of individuality and pride of ownership is represented by a Custom Grade IV. Our traditional Grade IV engraving pattern is a scroll design. We also can incorporate a big-game trophy, a favorite symbol or the design of your choice. Just give our craftsmen a few guidelines and let them create a masterpiece with built-in memories.

R2525056

Model 700, Grade IV

Shown with English walnut stock, hand-rubbed oil finish, and fleur-de-lis checkering. Traditional hand-engraved scroll pattern covers the trigger guard, floor plate, receiver and breech end of barrel on Grade IV rifles.



Model 700, Grade III

Optional left-hand version shown with English walnut straight comb stock, hand-rubbed oil finish, ribbon pattern checkering, ebony fore-end tip and Old English butt pad.

Grades III and IV Specifics:

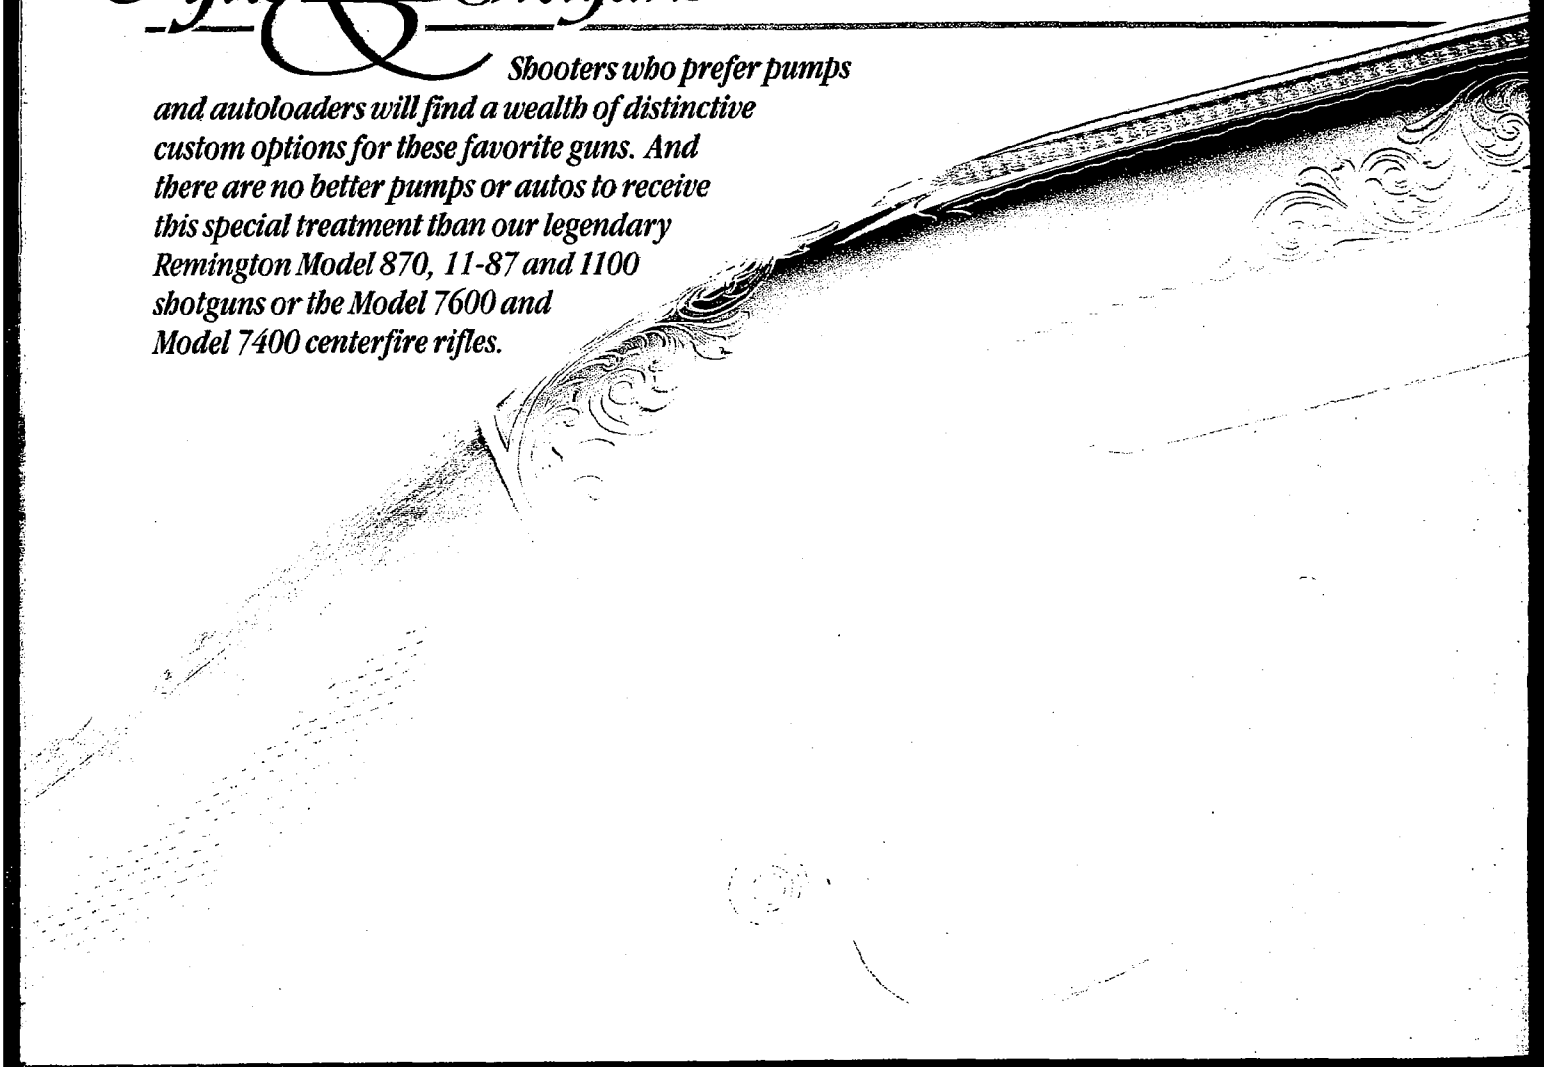
Grades III and IV include all specifics and calibers offered for Grades I and II, as well as these features:

1. Premium grade California Claro, American or English walnut stocks.
2. Model IV features unique fleur-de-lis checkering pattern.
3. 24-kt. gold inlay available on the floor plate of the Model IV.
4. Grade III has portions of hand engraving on the receiver, floor plate and breech end of barrel.
5. On Grade IV, the receiver, floor plate and breech end of barrel have full coverage custom engraving.

R2525057

D Grade Rifles & Shotguns

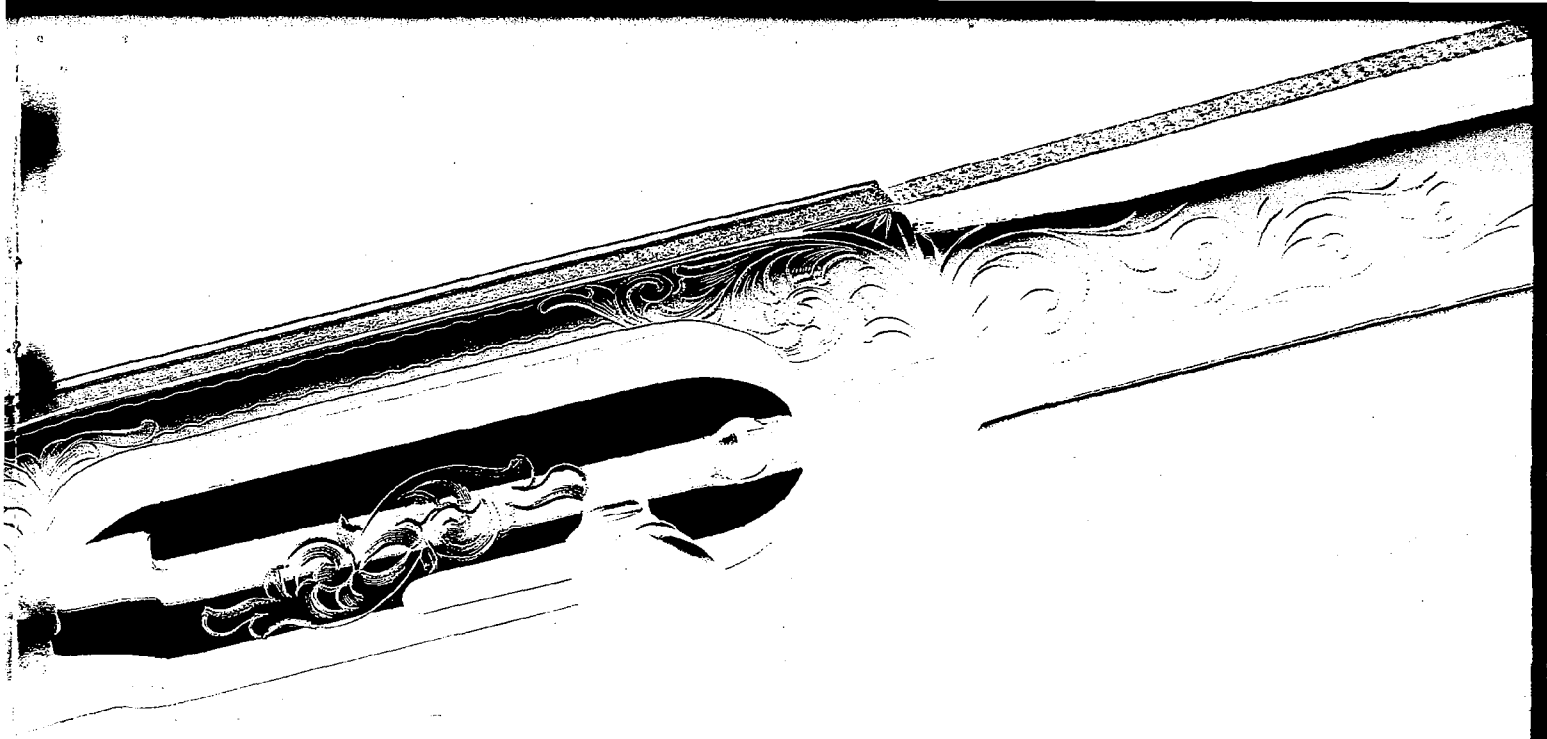
Shooters who prefer pumps and autoloaders will find a wealth of distinctive custom options for these favorite guns. And there are no better pumps or autos to receive this special treatment than our legendary Remington Model 870, 11-87 and 1100 shotguns or the Model 7600 and Model 7400 centerfire rifles.



D GRADE RIFLES AND SHOTGUNS

Our Grade D shotguns and centerfire rifles start receiving special attention while they are still blocks of wood and steel. The individual attention continues as wood is hand-shaped and fitted to select barrels and receivers. Checkering, engraving, highly polished and blued components all come together to create the look and feel of a fine custom firearm.

R2525058



D Grade Model 11-87

The autoloader shown here features select American walnut stock with unique, hand-cut checkering, and hand engraving on approximately one-third of metal surfaces.

D Grade Specifics:

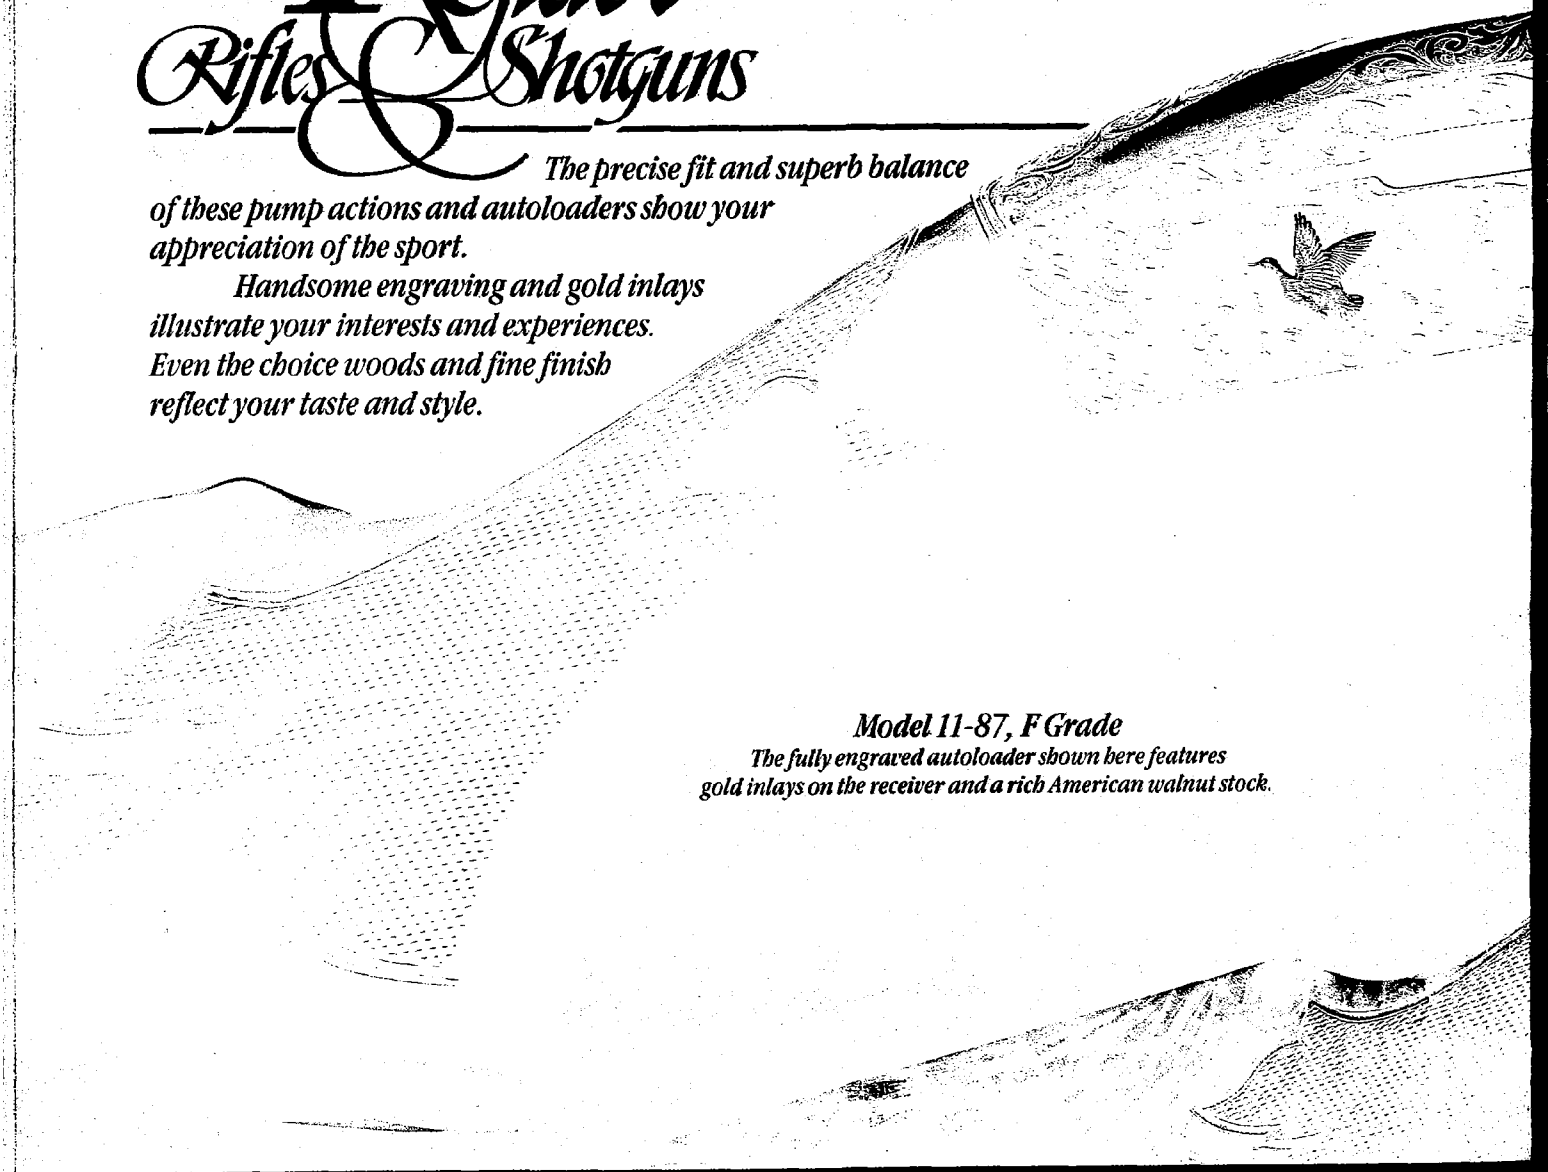
1. D Grade shotguns, pump or auto, are available in 12, 20 and 28 or .410 bore.
2. All standard barrel lengths can be specified.
3. Full, modified, improved cylinder or skeet choke. New interchangeable Rem™ Choke available on all 12- and 20-gauge Custom 870s, 1100s, and 12 gauge 11-87s.
4. Left-hand versions are available in 12-gauge only.
5. Centerfire pump and auto rifles can be ordered in 243 Win, 30-06 Spfld or 308 Win. The 7400 and 7600 are also available in 270 and 280 Rem. The 7600 can be ordered in 35 Whelen.
6. Custom hand engraving unique to the D Grade covers one third of receiver, trigger guard and breech end of barrel.
7. All have highly figured stocks of select American walnut.
8. Monte Carlo, straight comb with pistol grip or English style stock is available with or without cheekpiece.
9. Wood is protected with high-gloss finish or satin finish. Hand-rubbed oil also is available.
10. Distinctive checkering is hand cut at 22 lines per inch.
11. A butt pad can be specified in Old English, Presentation Grade, or the standard Remington style butt plate.
12. A 10-kt. gold oval monogrammed nameplate can be inletted into the stock.

R2525059

F Grade Rifles & Shotguns

The precise fit and superb balance of these pump actions and autoloaders show your appreciation of the sport.

Handsome engraving and gold inlays illustrate your interests and experiences. Even the choice woods and fine finish reflect your taste and style.



Model 11-87, F Grade
The fully engraved autoloader shown here features gold inlays on the receiver and a rich American walnut stock.

F GRADE RIFLES AND SHOTGUNS

On F Grade firearms, receivers, trigger guards and the breech end of barrels are graced by the handwork of our master engravers.

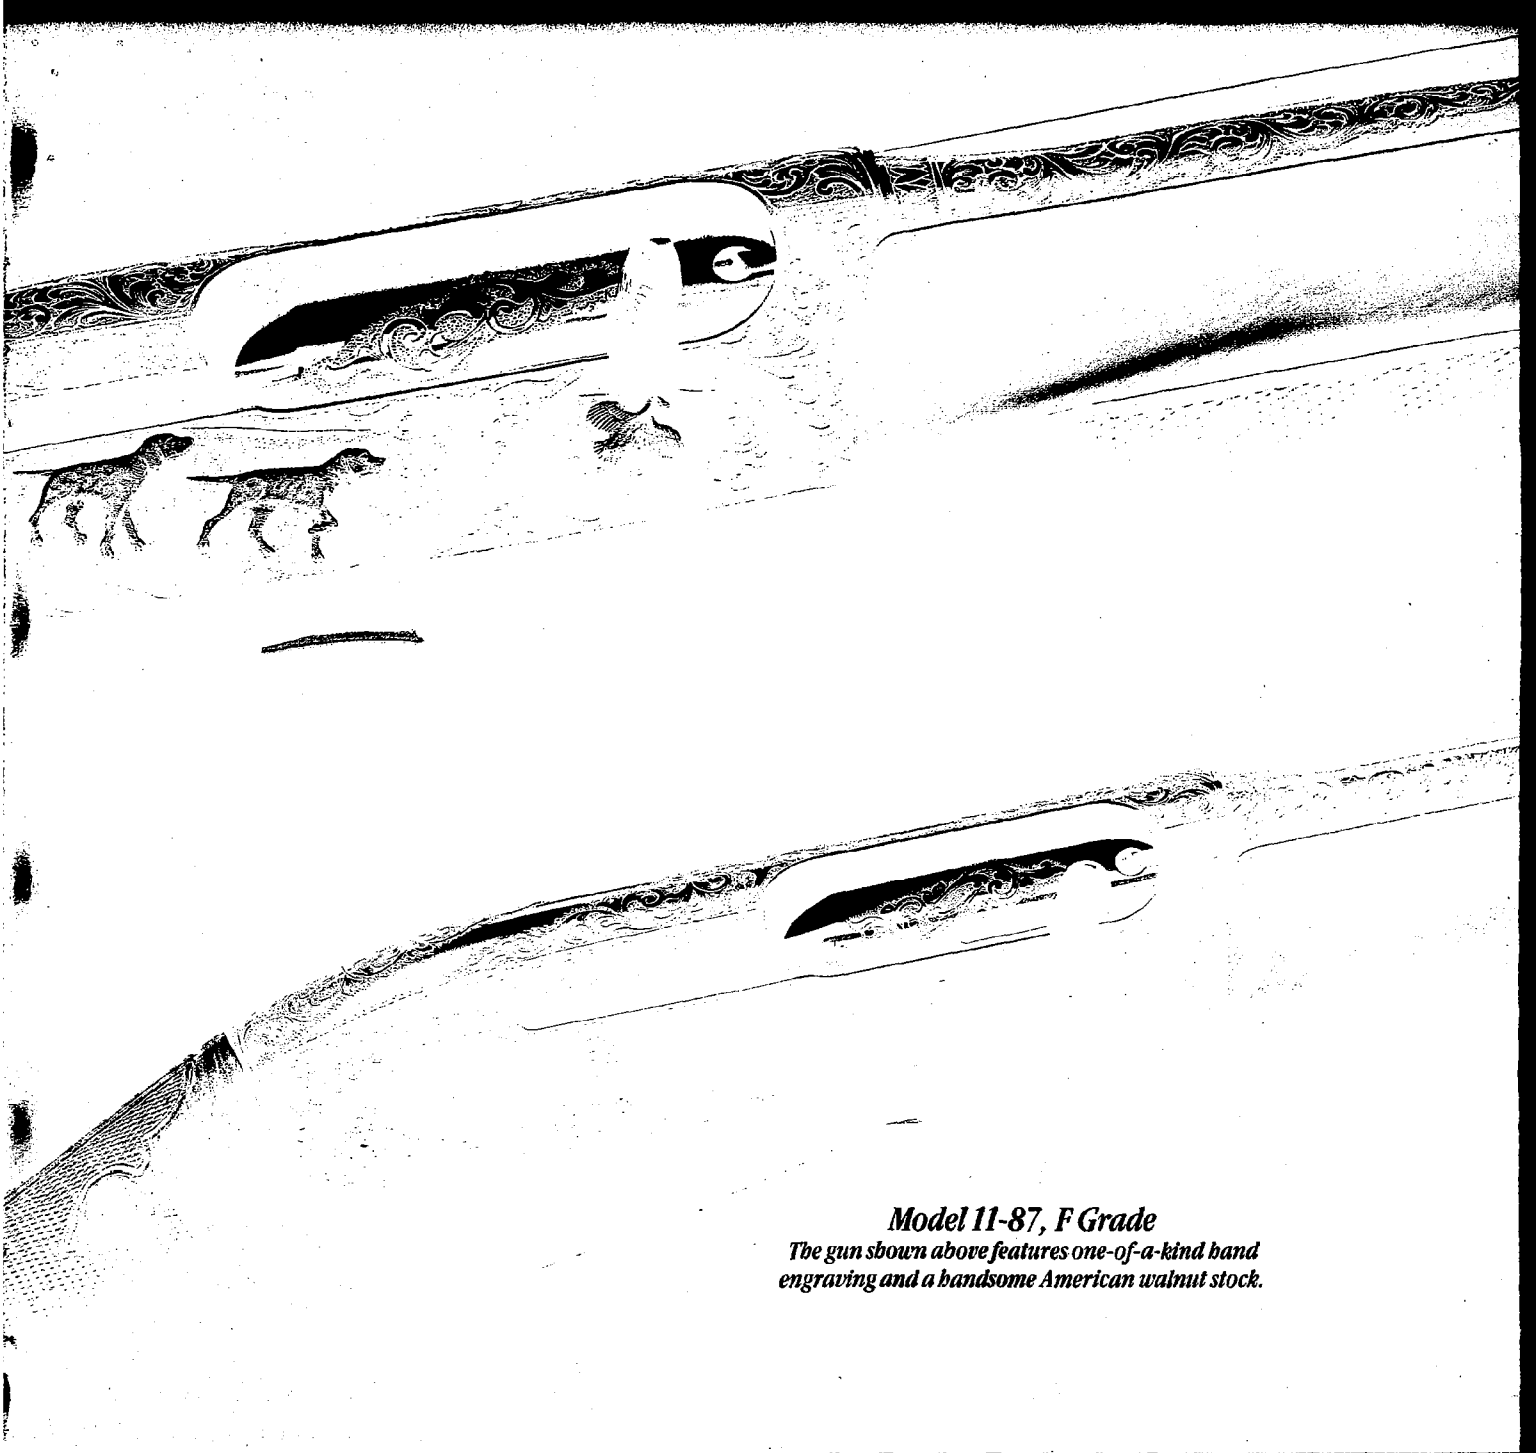
You can choose up to four distinctive game birds and animals to be engraved on each side of your receiver.

Or for a one-of-a-kind look, ask our custom engravers to incorporate your own original ideas. With a photograph of your prized mount or loyal hunting dog, we can create a truly unique and personalized firearm.

For the crowning touch, let us add 24-kt. gold inlays to the sides of your receiver. These precious metal sculptures make your F Grade gun a work of art.

But F Grade guns are not mere showpieces. Each Remington Custom Gun is individually inspected, assembled and tested. Your custom gun must meet our most rigorous performance standards before it will be released. We're sticklers about perfor-- mance because we believe your gun should be as worthwhile an investment on the range as it is in the cabinet.

R2525060



Model 11-87, F Grade
The gun shown above features one-of-a-kind hand engraving and a handsome American walnut stock.

F Grade Specifics:

1. F Grade pump shotguns and autoloaders are available in 12, 20 and 28 or .410 bore.
2. All standard barrel lengths can be specified.
3. Full, modified, improved cylinder or skeet choke. New interchangeable "Rem" Choke is available on all 12- and 20-gauge Custom 870s, 1100s and 12-gauge 11-87s.
4. Left-hand versions available in 12-gauge only.
5. Centerfire pump and autoloading rifles can be ordered in 243 Win, 30-06 Spfld or 308 Win. The 7400 and 7600 are also available in 270 and 280 Rem. The 7600 can be ordered in 35 Whelen.
6. Full coverage hand engraving on trigger guard, receiver and breech end of the barrel.
7. All have highly figured stocks of select American walnut.
8. Monte Carlo, straight comb with a pistol grip or English style stock is available with or without cheekpiece.
9. Checkering hand cut at 22 lines per inch.
10. Wood is protected with high-gloss, satin, or hand-rubbed oil finish.
11. A butt pad can be specified in Old English, Presentation Grade, or the standard Remington style butt plate.
12. A 10-kt. gold oval monogrammed nameplate can be inletted into the stock.

Now That You've Got His Attention, Make Your Point.

He weighs as much as a pickup truck. And when he turns and charges, you can feel the ground rumble under your feet.

It takes a rifle with real muscle to knock out this heavyweight. And that's exactly what the Remington Custom Gun Shop is ready to build for you.

Presenting the Model 700™ Safari Grade rifle in the potent new .416 Remington Magnum caliber.

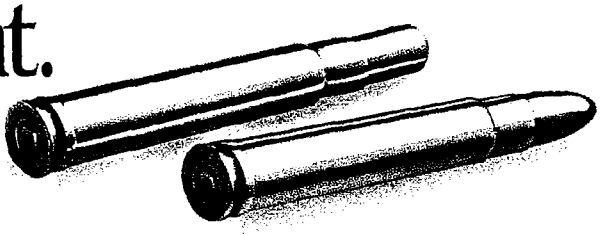
This superbly crafted firearm, with its legendary accuracy and steadfast reliability, lets you go toe to toe with the toughest, most dangerous game animals on earth. And win.

But the Model 700 Safari is a thing of beauty as well as performance. It is hand assembled and hand finished to your personal specifications by the custom gunmakers of Remington.

You'll choose the stock style (Classic straight comb or Monte Carlo) and the stock material (premium walnut or gray Kevlar®). We add deep-cut checkering, 18 lines to the inch, and give the wood a traditional low-gloss finish.

The result is a rifle that is distinctly yours, flawless in fit and finish.

All our custom rifles and shotguns, including the new Model 700 Safari Grade, are shown in full color in the Remington Custom Gun Shop catalog. For your copy, send $5.00 to Remington Arms Company, Custom Gun Shop Catalog (SI19), Eden Park, E71853, Wilmington, DE 19898.



Remington factory-loaded .416 ammunition delivers 2400 fps muzzle velocity with soft point or metal case round nose bullets.

Remember, always point the muzzle in a safe direction.

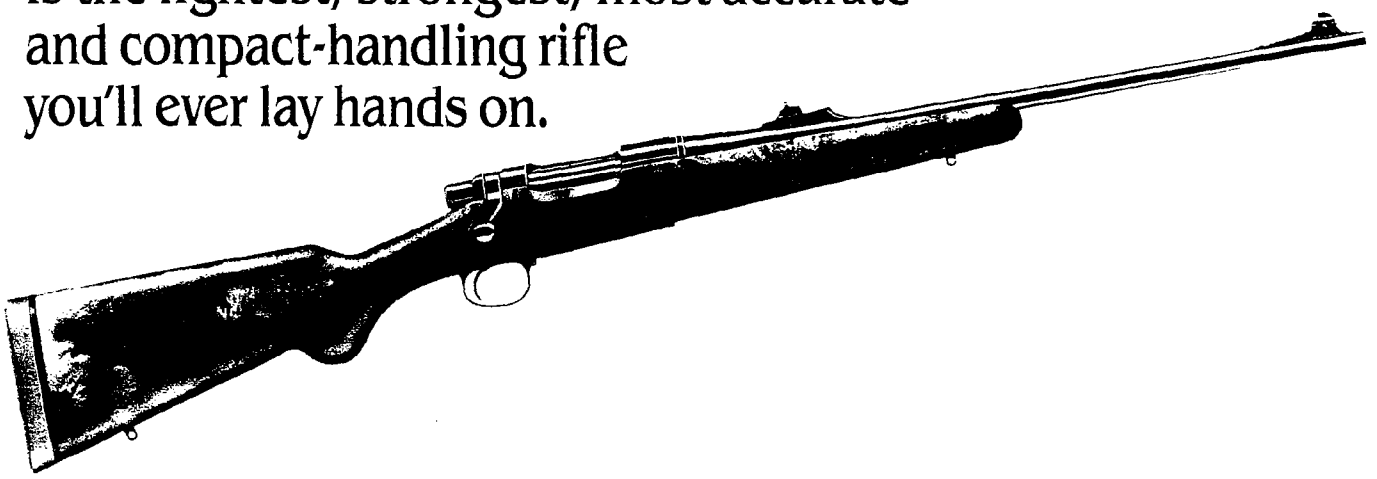
MODEL SEVEN "CUSTOM" "KS"

The Model Seven "Custom" "KS" with Kevlar® stock is the lightest, strongest, most accurate and compact-handling rifle you'll ever lay hands on.



With a tapered 20" barrel set into a classic-style Kevlar stock with cheekpiece and straight comb, the new Remington Model Seven "Custom" "KS" rifle weighs just 5¾ pounds for the ultimate in comfortable, flexible handling. Available in 5 calibers, this remarkable rifle offers many custom features, including a European knob pistol grip, 1" black Old English recoil pad, fully adjustable front and rear sights and a black, glare-free bolt.

Pound for pound, the Kevlar stock is four times stronger than steel, and weighs less than fiberglass. Available in nonreflective gray camouflage, this classic stock is pleasing to the eye, comfortable to the touch and virtually indestructible and impervious to the elements. Its dimensional stability provides a consistent aiming point and outstanding accuracy.

Bolt face, barrel and receiver surround the cartridge with three rings of solid steel for security. The trigger mechanism is hand assembled and tested to assure crisp, reliable performance, shot after shot.

The barrel and action of every Model Seven "Custom" "KS" rifle are products of the Remington Custom Gun Shop. Each rifle is individually test fired from the shoulder.

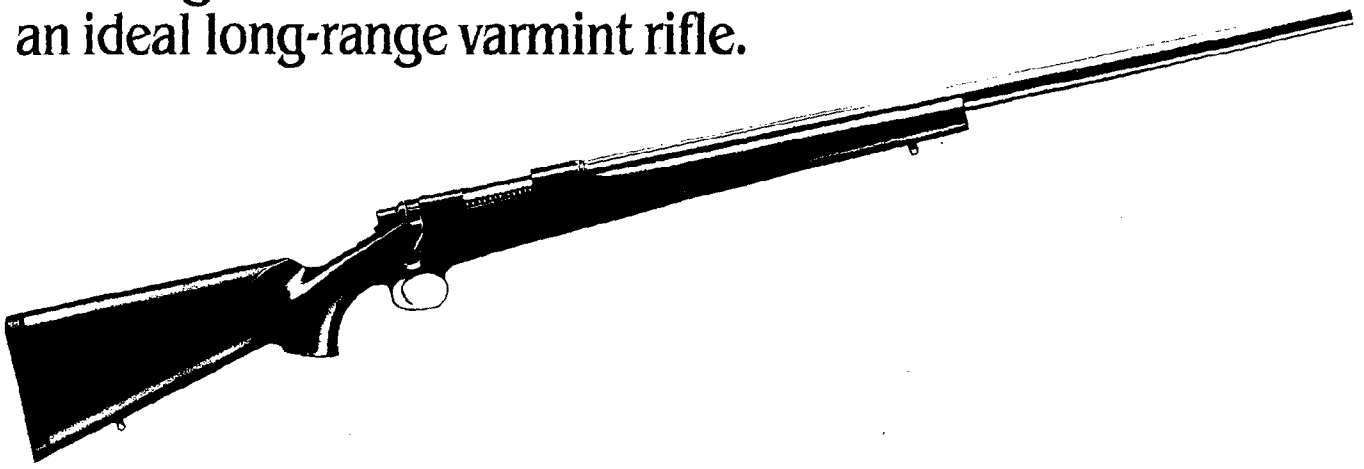
MODEL 40-XB "VARMINT SPECIAL"

The Model 40-XB "Varmint Special" with Kevlar® stock is strong and accurate – an ideal long-range varmint rifle.



With a 27¼" barrel, set into a custom Kevlar stock, the new Remington Model 40-XB "Varmint Special" weighs an average of 10 pounds. The rifle is available in 14 calibers, and can be ordered as a single-shot or, in certain calibers, as a repeater.

Pound for pound, the Kevlar stock is four times stronger than steel, and weighs less than fiberglass. Available in black satin nonreflective finish, it features a "beavertail" fore-end with flat bottom for increased stability when shooting from a rest. This custom stock, with its 1" Old English recoil pad, is attractive and comfortable to handle. The Kevlar makes it virtually indestructible and impervious to moisture and extremes of temperature and humidity.

The receiver is drilled and tapped for scope mounting. It is hand bedded to the stock for a perfect, custom fit. Trigger pull is externally adjustable from 1½ to 3½ pounds. A special 2-oz. trigger is available on single-shot models.

The barrel and action of every Model 40-XB "Varmint Special" rifle are products of the Remington Custom Gun Shop. Each rifle is individually test fired.

For more information about this and other Remington custom firearms, visit your local full-line Remington dealer.

Up to 1963 55% LESS RECOIL...up to ...tested with

From $144.95

This Amazing and Unusual REMINGTON MODEL 1100 AUTOMATIC SHOTGUN is scientifically designed to make everyone a better shot

What makes this new Remington automatic so special—so unique? Many things! Here's what we mean. Hunters, clay target shooters and gun experts from all over the country took part in the field testing of this gun and here's what they liked: Its perfect balance, excellent pointing qualities, dependable performance and smooth lines. Model 1100 is a gun that any sportsman is proud to own — to use — and to show to his friends. "Swings like it's part of you" . . . "Points itself" . . . "Feels right" is the way these experts described it. Recoil sensation is amazingly light, up to 40% less recoil than any other automatic; your shoulder feels a pat instead of a pow. And there's no barrel whip or jarring recoil which means you can get back on target fast. You'll drop those doubles . . . and have time to spare. They liked the wood finish too . . . the same type of finish used on bowling pins. It's durable and yet beautiful — colorfast, chip and scratch resistant and gives lasting protection against all kinds of weather and wear. It's a clear finish that lets the natural beauty of the wood show through.

Pick a Remington and you pick a winner. Skeet shooters do . . . have for years. Since 1953 Remington automatic shotguns have won more National Skeet Championships than all other brands of shotguns combined . . . and the same fine balance and pointing qualities are built into this new Remington. Remington's many years of experience in making automatic shotguns (longest of any gun maker) are behind the new Model 1100.

SPECIFICATIONS

STYLE	5-shot gas-operated automatic shotgun.
GAUGE	Made in 12 gauge. (16 and 20 gauge in 1964).
BARREL	High strength Remington proof steel. Extra barrel is interchangeable within gauge.
SAFETY	Convenient cross-bolt type, positive.
RECEIVER	Made from solid steel, top matted, scroll work on bolt and both sides of receiver.
STANDARD STOCK DIMENSIONS	Stock and fore-end: rich American walnut. 14" long, 2½" drop at heel, 1⅝" drop at comb.
WEIGHT	12 gauge about 7½ lbs.

FEATURES THAT MAKE THE MODEL 1100 NEW — DIFFERENT — BETTER

CUSTOM CHECKERING on stock and fore-end . . . fleur-de-lis design. Checkering is fine-lined, uniform, goodlooking.

TEAR DROP PISTOL GRIP with attractive white diamond inlay provides a natural, non-slip, comfortable grip.

FORE-END has swept back, streamlined design. Fine checkering and fluting give secure gripping area.

DISTINCT WHITE SPACERS on butt plate and grip cap add attractiveness.

NEW METAL FINISH looks better, wears better . . . because the metal is more highly polished.

BIG 5-SHOT CAPACITY — Easy to load. Four in magazine . . . one in chamber. Three-shot plug furnished.

NEEDS NO ADJUSTMENT — Performs perfectly for different loads; automatically. Shoots high base, low base, 2¾" magnum shells without adjustment.

QUICK-CHANGE BARRELS for all types of shooting. They're interchangeable in seconds; no factory fitting is required. Use one gun for all your shooting and get more game, targets, sport.

FASTEST LOADING — Drop a shell in the breech; load another in the magazine in one motion. Load five shells in five seconds.

LIGHTEST RECOIL — Power-pulse action tames recoil; it smooths and cushions . . . and with no loss of power. Shooter feels a [illegible] of a pow on his shoulder.

RK-W PROTECTIVE FINISH — New DuPont wood finish is clear. Lets the wood grain show through. It's similar to that used on bowling pins; tough, hard, scratch-resistant . . . gives lasting protection against hard usage and bad weather.

AVAILABLE IN MAGNUM MODEL — Chambered for 3" magnum shells. Uses 2¾" magnums too. A rugged, dependable shotgun . . . reaches out and drops the high flyers.

DECORATIVE SCROLL WORK on receiver and bolt adds real beauty and value to this gun.

SELF CLEANING — The gas operation of this gun is unusual. It blows dirt and grime away, keeps action bright and shining for long periods of time. In the laboratory, thousands of shells were fired in the Model 1100 and the action was still as clean as a hound's tooth.

SUPREME DEPENDABILITY — Better, because it's made better. When you buy a shotgun you expect it to last a long time . . . maybe even a lifetime. Chances are the new Model 1100 will do just that! Tests prove the shooting life of this new gun is up to seven times longer than any other automatic shotgun on the market.

BALANCE AND WEIGHT are just right, only 7½ lbs. in 12 gauge. Can be carried comfortably all day. No sacrifice of steel in barrel or receiver . . . not a "featherweight floater" that's too light to point right.

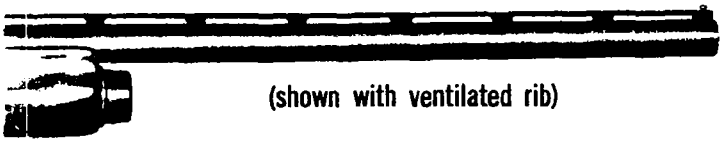
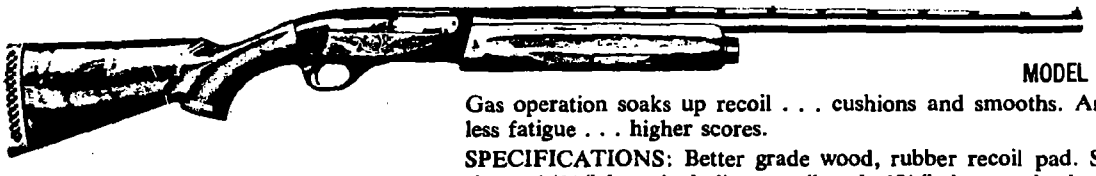
AUTOMATIC SHOTGUNS



(12 gauge in 1963) (16 & 20 gauges in 1964)

(shown with ventilated rib)

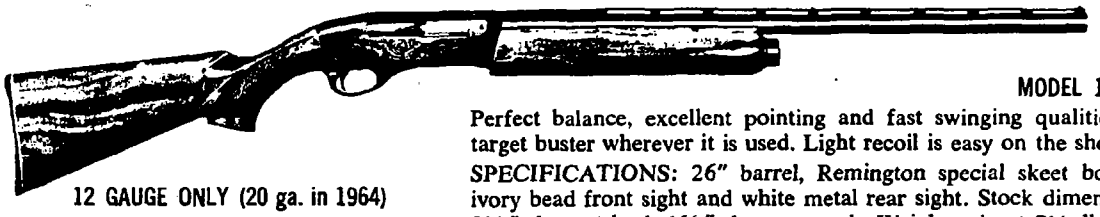


$209.95

MODEL 1100 TB — Trap Gun

Gas operation soaks up recoil . . . cushions and smooths. And less recoil means less fatigue . . . higher scores.

SPECIFICATIONS: Better grade wood, rubber recoil pad. Special stock dimensions: 14⅜" long including recoil pad, 1⅞" drop at heel, 1½" drop at comb. Weight: about 8¼ lbs. Available in 28" and 30" full choke ventilated rib barrels only. Ivory bead front sight, white metal rear sight.



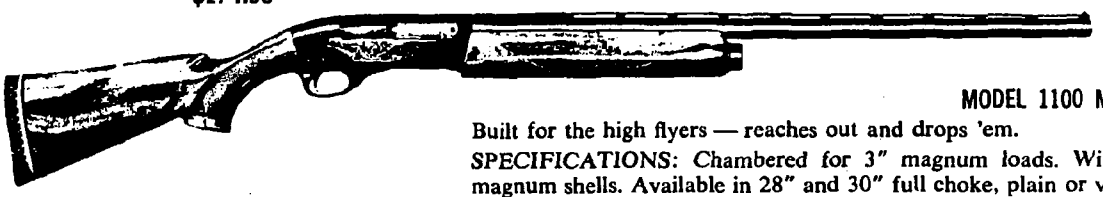
12 GAUGE ONLY (20 ga. in 1964)

$174.95

MODEL 1100 SA — Skeet Gun

Perfect balance, excellent pointing and fast swinging qualities make this gun a target buster wherever it is used. Light recoil is easy on the shoulder, too.

SPECIFICATIONS: 26" barrel, Remington special skeet boring, ventilated rib, ivory bead front sight and white metal rear sight. Stock dimensions are: 14" long, 2½" drop at heel, 1⅝" drop at comb. Weight: about 7½ lbs.



12 GAUGE ONLY (Shown with Ventilated Rib)

From $159.95

MODEL 1100 MAGNUM — Duck Gun

Built for the high flyers — reaches out and drops 'em.

SPECIFICATIONS: Chambered for 3" magnum loads. Will also handle 2¾" magnum shells. Available in 28" and 30" full choke, plain or ventilated rib barrels. Stock dimensions: 14" long including pad, 2½" drop at heel, 1⅝" drop at comb. Furnished with recoil pad. Weight: about 8 lbs.

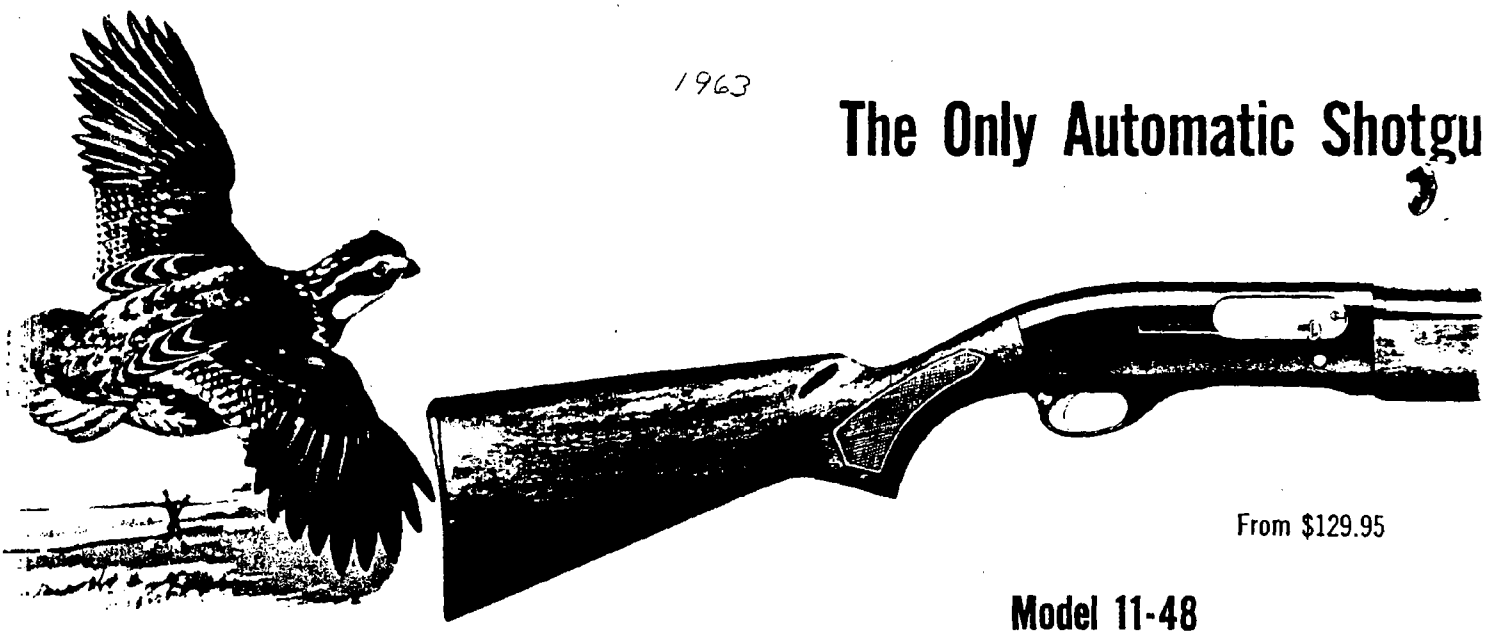
The Only Automatic Shotgu



From $129.95

Model 11-48

Model 11-48 is an automatic shotgun that packs a lot of value for the money. It's a big favorite with shooters for many reasons — such as: The price is attractive — feature for feature the 11-48 is truly a great gun buy. It's the only automatic on the market made in all five gauges, 12, 16, 20, 28 and 410 . . . and it's also available in skeet models, including 28 and 410 gauges. Here's a Remington automatic that's a dependable, trouble-free shotgun . . . and shooters the world over have proved it! They've bought over a half million since it was first announced. Satisfied customers tell us a trip to the gunsmith is rare because of its good design and construction. Remington guns are better because they're made better. Other features are: big 5 shot capacity (4 in 28 and 410 gauges), interchangeable barrels feature and light weight and light recoil of 28 and 410 models make it an excellent gun for women shooters and young boys just starting with a shotgun.

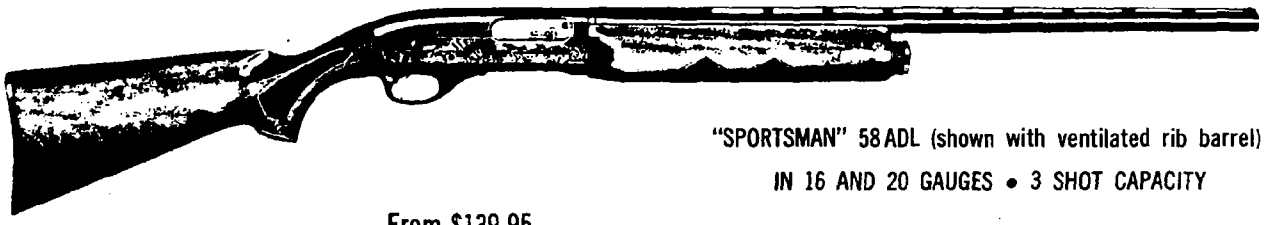
AUTOMATIC SHOTGUNS

MODEL 11-48A (shown with ventilated rib barrel)



"SPORTSMAN" 58 ADL (shown with ventilated rib barrel)

IN 16 AND 20 GAUGES • 3 SHOT CAPACITY

From $139.95

"Sportsman" 58

"Sportsman" 58 gives you Power-Matic action that softens recoil (with no power loss) and reduces barrel whip so you can get off an accurate second and third shot. And here is proof of quality throughout. Double action bars — interchangeable barrels — light weight for fast handling, easier carrying — game scenes on receiver — beautiful wood and metal finishes. It's the gun used by more skeet shooters than any other gun . . . and that's where dependability and fast-handling really count.

	SPECIFICATIONS
STYLE	3 shot gas-operated automatic shotgun.
GAUGES	16 and 20
BARREL	High Strength Remington Proof steel. Extra barrel is interchangeable within gauge.
SAFETY	Convenient cross-bolt type, positive.
RECEIVER	Made from solid steel, top matted. Inscribed game scenes.
STANDARD STOCK DIMENSIONS	Stock and fore-end: rich American walnut. 14" long, 2½" drop at heel, 1⅝" drop at comb.
WEIGHT	16 gauge - 7 lbs. 20 gauge - 6¾ lbs.

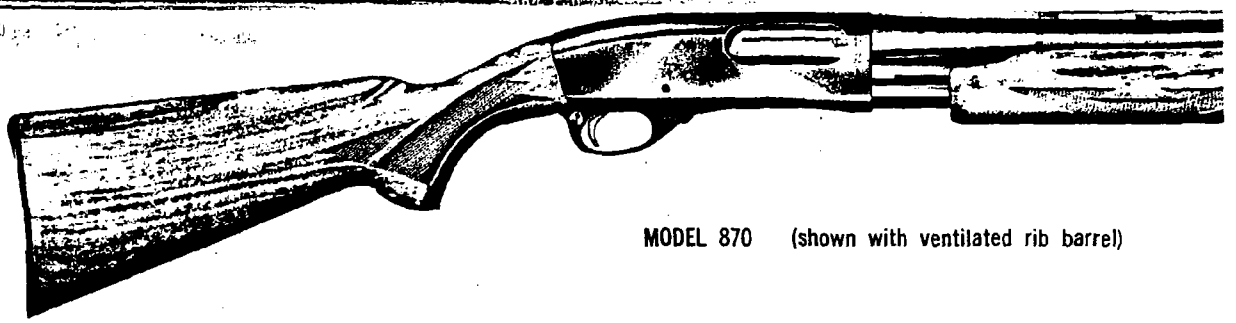
Now—Remington Model 870 Made in Beautiful



MODEL 870 (shown with ventilated rib barrel)

From $94.95

Some changes have been made on the outside of the Model 870. It looks a lot more attractive . . . and sportier. But we haven't changed the inside one bit. No need to. It's still the solid, dependable, trouble-free shotgun it has always been . . . the gun that has racked up a record for reliability with close to a million sportsmen who own Model 870's (and wouldn't trade them for anything). Here's where we've improved it:

CUSTOM CHECKERING on stock and fore-end is fine lined, uniform, extra good looking. Fine checkering, full measure beavertail and fluting on fore-end give a secure gripping area.

IMPROVED WOOD FINISH gives stock and fore-end a high gloss. Smooth, rich finish looks better — enhances the value of the gun. The Model 870 "Wingmaster" is good to look at . . . and even better to shoot.

GRIP CAP is a little "extra" but an important one that gives the gun that "finished look." You'll find many other shotguns do not have one.

These are just the new features — but it still has all the other great ones, such as: Double action bars (most pump guns have only one). They prevent twisting and binding, give smooth gliding action. The receiver is another example of quality — it's made from a solid block of high strength steel. And there's the interchangeable barrel feature that lets you change barrels in seconds without factory fitting.

Take a Model 870 anywhere — swing it on those zigzagging doves in the South — towering pheasants in the Dakotas — and high-flying geese at Mattamuskeet. It will be right at home among the thousands of other 870's.

	SPECIFICATIONS
STYLE	5 shot pump action shotgun. Take down.

Wingmaster" Pump Shotgun 1963 Remington Model 870 "Wingmaster"

New De Luxe Grade

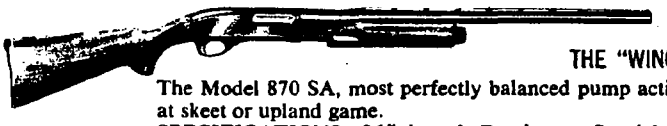
PUMP ACTION SHOTGUNS

TRAP, SKEET, "BRUSHMASTER," AND MAGNUM MODEL 870 SHOTGUNS

$219.95

THE "WINGMASTER" MODEL 870 TC — Trap Gun

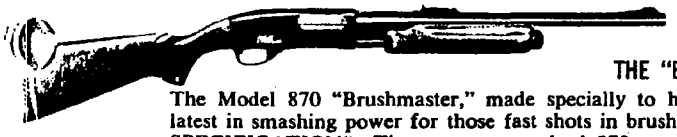
The "Wingmaster" Model 870 TC is the world's most perfectly balanced trap gun!
SPECIFICATIONS: Available with 28" modified, 28" or 30" full choke, ventilated rib barrel. Ivory bead front and white metal rear sight. Recoil pad. Special target grade sear, hammer and trigger assembly. Stock dimensions: 14⅜" long including recoil pad, 1⅛" drop at heel, 1½" drop at comb. Highly figured and finished American Walnut with finely checkered stock and fore-end. Hand fitted action and parts. Will furnish made to order stock lengths from 13½" to 14¾" on Model 870 TC only, without extra charge. Weight: about 8 lbs. This model also available in TB grade 14⅜" stock only, lower price.



12 AND 20 GAUGES From $135.95

THE "WINGMASTER" MODEL 870 SA — Skeet Gun

The Model 870 SA, most perfectly balanced pump action shotgun, is ideal for fast second shots at skeet or upland game.
SPECIFICATIONS: 26" barrel. Remington Special Skeet Boring. Ventilated rib with ivory bead front and white metal rear sight. Stock dimensions: 14" long, 2½" drop at heel, 1⅝" drop at comb. Weight: 12 gauge about 7 lbs., 20 gauge about 6½ lbs.

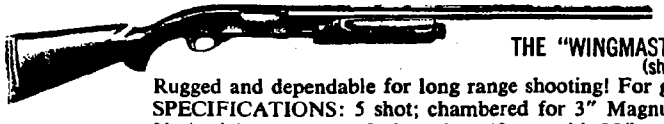


$114.95

12 GAUGE, with Rifle Sight Barrel

THE "BRUSHMASTER" MODEL 870 — Deer Gun

The Model 870 "Brushmaster," made specially to handle rifled slugs and buck shot, is the latest in smashing power for those fast shots in brush country.
SPECIFICATIONS: The same as standard 870 except as follows: Lightning-fast 20" barrel with fully adjustable rifle-type sights. Stock fitted with rubber recoil pad and white line spacer.



12 AND 20 GAUGES From $114.95

THE "WINGMASTER" MODEL 870 MAGNUM — Duck Gun
(shown with ventilated rib barrel)

Rugged and dependable for long range shooting! For geese and ducks.
SPECIFICATIONS: 5 shot; chambered for 3" Magnum shells — will also handle 2¾" shells. Variweight and wood 3 shot plug. 12 ga. with 28" and 30" full choke, plain or ventilated rib barrel. Steel bead front sight, rubber recoil pad. Checkered stock and fore-end. Stock: 14" long including pad, 2½" drop at heel, 1⅝" drop at comb. 20 ga. furnished in 28" full choke ventilated rib and plain barrels. Weight: 12 ga. about 8 lbs., 20 ga. about 7½ lbs., including variweight plug.

QUICK CHANGE BARRELS — Change them in seconds, right in the field. No factory fitting or special tools required. Use one gun for all your shotgun shooting and get more game, targets, sport.

GOOD DESIGN — Barrel is made with a hardened extension into which the breech block must lock before firing. Result . . . longer life, less wear, constant head space.

DOUBLE ACTION BARS prevent twisting and binding, give smooth gliding action for which Remington "Wingmaster" is famous. Many shooters say it works like a ball bearing action. And they're right!

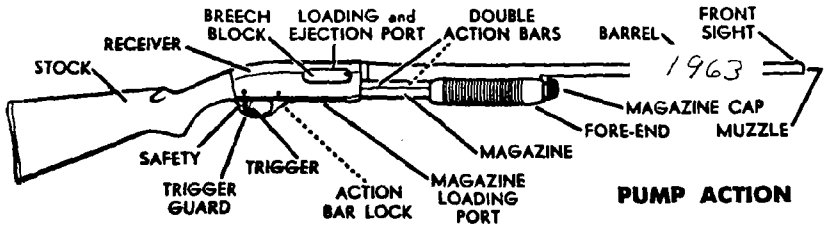
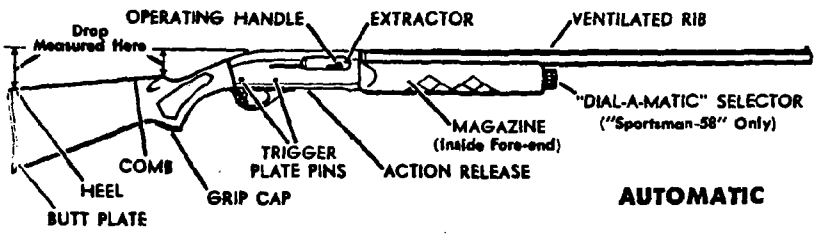
R2525083



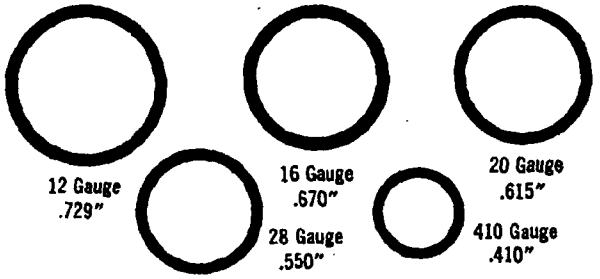
SHOTGUN TERMS



GAUGES, CHOKES and BARRELS

GAUGES — Shotguns are made in several well-known gauges, 12, 16, 20, 28 and 410. Other gauges have been made in the past but are not at present in common use. These include 4, 8, 10, 14, 24 and 32 gauges.

The unit of gauge measurement is based on numbers of uniform lead balls weighing one pound. 12 gauge is approximately the diameter of a lead ball of which 12 weigh one pound, 16 gauge is the diameter of a lead ball of which 16 weigh one pound, etc. The one exception is 410 gauge, which is actually 410 caliber. In terms of gauge, it would be 67 gauge. Measurements of minimum bore diameters in thousandths of inches are as follows:



SHELL LENGTH is measured in inches, in terms of the overall length of fired shell, with the crimp open. A 2¾" shell measures about 2½" to 2⅝" before it is fired, but 2¾" overall after firing. This method of measuring has been adopted to conform to standard chamber lengths of shotguns. A gun with a 2¾" chamber will thus handle shells of the proper gauge up to 2¾" length.

PATTERN — Pattern is the spread of shot pellets at any given yardage. All loads with the exception of 410 and skeet are tested for pattern at 40 yards. 410 and skeet loads are tested at 25 yards. The percentage of the total shot charge registering within a 30" circle (20" for 410) at these distances determines the quality of a pattern. No two patterns will be exactly the same. Average results should be taken from at least 25 patterns.

CHOKE — Choke is partial constriction of the bore of a shotgun barrel at the muzzle end. Its purpose is to control patterns. By using different degrees of choke boring, it is possible to control the spread of the shot charge for the best distribution of pellets at various ranges. For example, the bore diameter of a 12 gauge gun is .729". If the diameter at the muzzle end is reduced to .694", the constriction of .035" (difference) will control the shot sufficiently to give patterns averaging about 70% of the shot in a 30" circle at 40 yards. This is known as full choke boring, and is intended for long range shooting. The following table shows the percentage of shot that can be expected in the various choke borings:

CHOKES	% at 40 yards in 30" circle
Full Choke	70
Modified Choke	60
Improved Cylinder	50
Cylinder	40

CHOKE USES — A shooter should select the degree of choke boring for his barrel according to the range at which most of his shots are taken. Some kinds of birds and small animals are usually shot at close range, others at long range. Also, some persons are inclined to shoot quickly, while others tend to "ride" their game or targets. Most hunters find the following borings give the best results, though much depends on shooting conditions and personal preferences.

Full Choke .....ducks, geese, pheasant, crows, turkey, fox, racoon, trap shooting.

Modified Choke .....rabbit, woodcock, doves, squirrels, also all-round usefulness including ducks, quail, etc.

Improved Cylinder, Special Skeet .....quail, grouse, partridge, rail, skeet shooting, guard duty, riot, rifled slugs.

BARREL LENGTH — Shotgun barrels are usually supplied in 26, 28, and 30 inch lengths; also 20 and 26 inch lengths with rifle sights. The longer barrels are often preferred for long range shooting because the greater length gives a longer sighting radius, permitting more accurate pointing. Long barrels also minimize discomfort of muzzle blast, and the added weight reduces recoil. Short barrels are often preferred for close range shooting because they are easier to handle for quick shots . . . especially in heavy brush.

It is not practical to cut off a shotgun barrel. To do so will change the shooting qualities of the gun because the choke constriction is within the last two inches at the muzzle end. It is also impractical to cut down the length of the barrel and then attempt to restore the original degree of choke boring because the metal necessary for this will already have been reamed out at the time of manufacture.

A barrel may be rebored from one degree of choke to a more open degree, full to modified, modified to improved cylinder, etc., as long as the barrel length is left unchanged.

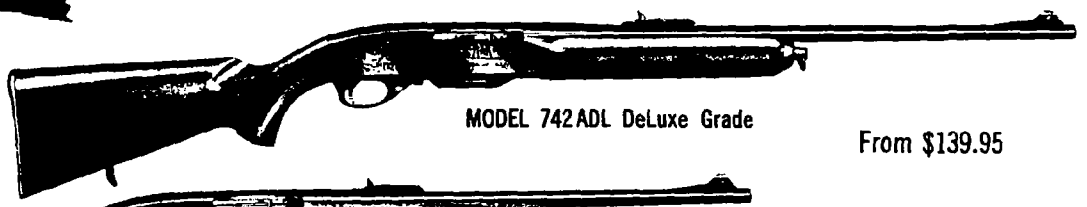
Remington Model 742 "Woodsmaster"

AUTOMATIC BIG GAME RIFLES



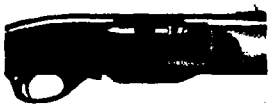
MODEL 742 ADL DeLuxe Grade

From $139.95

MODEL 742 CDL Carbine

Most Powerful Automatic Big Game Rifle

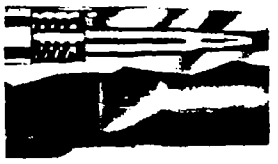
When you're looking through the sights of a Remington Model 742 "Woodsmaster" automatic rifle, you're ready for that bouncing run of a big buck, a bear you've just taken by surprise or a trophy-rack bull moose that comes crashing out of the bush. In your favorite caliber and bullet weight, a Model 742 will drop any North American big game. You can get off five shots as fast as you can squeeze the trigger. And because of its gas-operated "Power-Matic" action which reduces recoil and barrel whip (with no loss of power), you can get back on target immediately for successive shots. If you hunt in heavy brush, you'll be interested in the short barrel carbine model.



EXTRA STRONG, DEPENDABLE. Solid steel receiver, rotary multiple-lug breech lock, and high strength barrel breech ring make Model 742 extra strong, safe, dependable . . . allow it to be chambered for super powerful calibers.

AMAZING "POWER-MATIC" ACTION — works on jet airplane principle. Gas moves rearward to operate action. "Jet" effect forces rifle forward—softens recoil with no power loss!

FAST, EASY LOADING, INTERCHANGEABLE—4-cartridge magazine facilitates loading and unloading. Extra loaded magazines are easy to carry in pocket.



ROTARY MULTIPLE-LUG BREECH BOLT locks bolt and barrel together securely. Insures constant head space. Same exclusive design as on famous Remington Model 760 "Gamemaster."

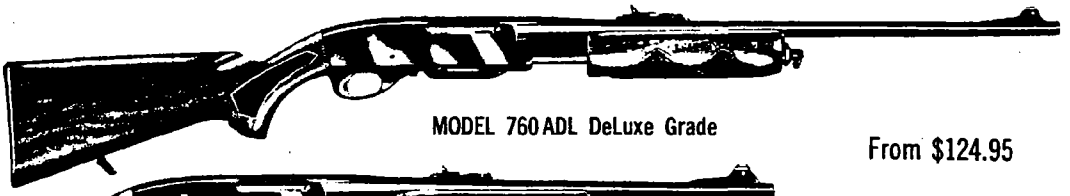
R2525086

1963 Remington Model 760 "Gamemaster"

PUMP ACTION BIG GAME RIFLES

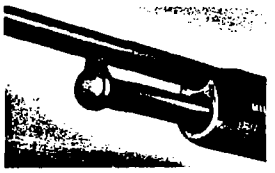


MODEL 760 ADL DeLuxe Grade

From $124.95

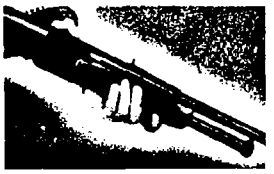
MODEL 760 CDL Carbine

Makes no difference where you hunt . . . in Maine's wild Allagash country, far out in the big timbered Olympic Peninsula in Washington, or deer hunting in Wisconsin and Michigan —you'll stop 'em and drop 'em if you're carrying a lightweight, fast-handling Remington Model 760 "Gamemaster." It's the only pump action big game rifle made — anywhere! Five lightning-fast shots are yours at the flick of your wrist . . . one more reason why this rifle has been a consistent winner in the International Running Deer Matches. Pump action is slick, smooth — so fast and effortless, shooters say it works like a "ball-bearing" action. Four-shot clip magazine is interchangeable. An extra loaded one in your pocket means you can reload in seconds . . . you've reserve fire power at your finger tips. The Remington Model 760 "Gamemaster" is a member of the look-alike Remington "family of guns" — rugged, dependable, trouble-free with the famous rotary multiple-lug bolt for extra strength. Another Remington gun "that's better — because it's made better" . . . in five powerful calibers: 280 Remington, 270, 30-06, 308, 35 Remington. Also made in short barrel "carbine" model.

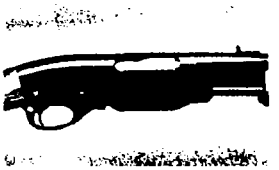


AMAZING ACCURACY because of free floating barrel, encased bolt head, and advanced method of securing barrel to receiver.

EXCEPTIONAL TRIGGER MECHANISM. No backlash, drag or creep. Convenient, positive cross-bolt safety.



SMOOTH, TROUBLE-FREE ACTION — Parts perfectly fitted, double action bars, split second pump action—all insure fast, dependable operation.



REMINGTON FIRE CONTROL trigger must be released and squeezed for each shot — can't fire unless action is completely closed. An important safety feature.

The Remington 700 bolt-action is designed for the real rifleman: *The shooter* who wants the accuracy bonus of Remington's famous precision rifling and short, crisp trigger pull. *The hunter* who appreciates the comfort of a Monte Carlo comb and cheekpiece on an all-purpose stock that gives superb balance, natural shouldering, perfect alignment with either 'scope or open sights. *The craftsman* who loves the traditional beauty of fine checkering.

The 700 owner also gets a butter-smooth bolt action — the world's strongest. The bolt head completely encloses the cartridge case in a ring of steel. Double locking lugs provide extra strength for modern, high velocity loads.

This is the finest rifle Remington has ever made. We think it will become one of the finest rifles of all time. Here is true custom quality. The Remington Model 700 is also available in the new big game hot caliber — 7 m/m Remington Magnum. Ballistics are close to perfection. Accuracy of the Model 700 is amazing and it's available in twelve calibers — 'chucks to elephants.

Remington's New NYLON 66 Automatic

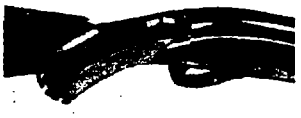
Remington's new Nylon 66 is setting an amazing record in sales and customer acclaim. Here's why!

Structural-nylon is many ways better than conventional material for the gun's stock and fore-end. Today nylon is used everywhere — for gears, precision parts, bearings, even horseshoes . . . and in many industries such as automotive and aircraft, electronics and missiles. Because this super-strong material doesn't warp, the same barrel bedding principle used on the world's most expensive target rifles is yours. The result is an automatic that nails targets, tin cans and small game with tremendous accuracy. This is the same model rifle used to establish an accuracy record on hand-thrown 2½" wood blocks. Only six misses out of over 100,000 blocks thrown . . . and without a malfunction.

Receiver parts, stock and barrel are a bold interlocking of steel and structural nylon that creates the most trouble-free automatic action ever known. There's no need for lubrication because friction-free parts glide on "greaseless bearings" of nylon. Perfect checkering makes for fast, sure holding, and the convenient top-of-grip thumb safety slips off "safe" in a wink for running game shots. The handsome Nylon 66 comes in Mohawk Brown and has white diamond inlays and white line spacers at grip cap, butt plate and fore-end tip.

Only Remington Nylon 22 gun stocks are guaranteed for a lifetime!

Top-of-grip thumb safety. The most convenient, easiest to use safety ever designed for 22 rifles.



Nylon 66 withstood torture tests of water, dust and mud combined with extremes of heat, and freezing cold — and it still functioned perfectly after thousands of rounds.

New Remington designed rear sight has thumb screws for adjustment for windage and elevation. It means easier sighting and improved shooting. Receiver also grooved for instant use of "tip-off" 'scope mounts.

Sharp, fine-line checkering on pistol grip and fore-end provides shooters with a steady, secure hold. White diamond inlay and spacers add to the dramatic new look of the Nylon 66.

NYLON 76AB "PRESENTATION" GRADE
in Apache Black and Chrome.

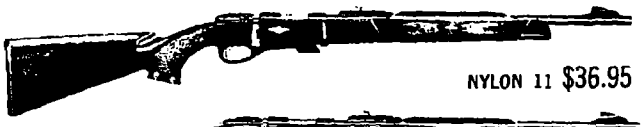
Take a good look at Remington's rugged Nylon 76, first lever action 22 with *built-in accuracy!* The big difference is the accuracy advantage of structural nylon. This amazing chip-proof, waterproof, warp-proof, self-lubricating material makes the strongest, most rugged stock and fore-end known.

This extra nylon stability lets Remington precision-fit stock to barrel with *three-point bedding*, the same principle that gives costly target rifles their accuracy. Add to this a precision-rifled ordnance steel barrel and a short 35° lever throw, and you have the fastest, most accurate lever action you've ever shouldered.

$25.75

NYLON 10

For extreme accuracy and reliability the Nylon 10 out-performs all other single shot 22 caliber rifles on the market . . . handles 22 Short, Long, and Long Rifle cartridges. It feeds from a special loading platform, has an automatic safety that sets on cocking bolt — and has such quality features as: Enclosed bolt, two extractors, two locking lugs, and chrome plated bolt handle. The automatic safety is an excellent feature for the young or just-beginning shooter. Also available in smooth bore for 22 shot cartridges.



NYLON 11 $36.95

NYLON 12 $39.95

NYLON 11 AND 12

Whatever you want in a bolt action 22 — these guns have it! Bull's-eye accuracy, ultra modern design and the years and years of rugged performance only Remington structural nylon and ordnance steel can give. Choose either clip magazine (Nylon 11) or tubular magazine (Nylon 12). Both are winners! Features? The Nylon 11 and 12 give you plenty! Custom-grade features you won't find on 22's at twice the price! Examples: Super-accurate three-point bedding, the same principle used in expensive target rifles . . . perfect checkering and inletting . . . streamlined, chrome-plated Mannlicher-type bolt handle . . . and *unequaled features* like handy top-mounted thumb safety, fully adjustable rear sight and receiver grooved for "tip-off" 'scope mounts.

So if you want a gun that's tops for features, fun and fine shooting, see the Nylon 11 and 12. They're at your Remington dealer's, now!

Nylon sling strap and swivels loops available for all nylon rifles at additional charge.

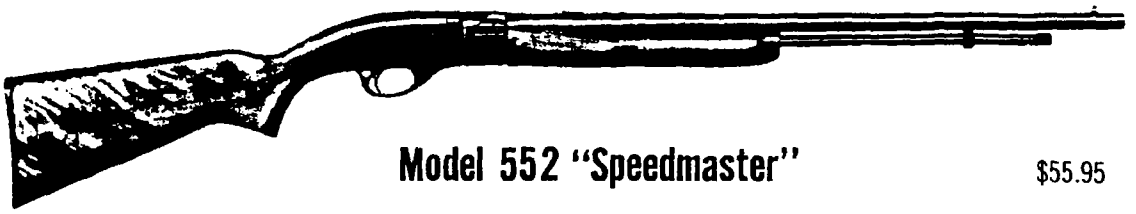
Remington Automatic

22 RIM FIRE RIFLES

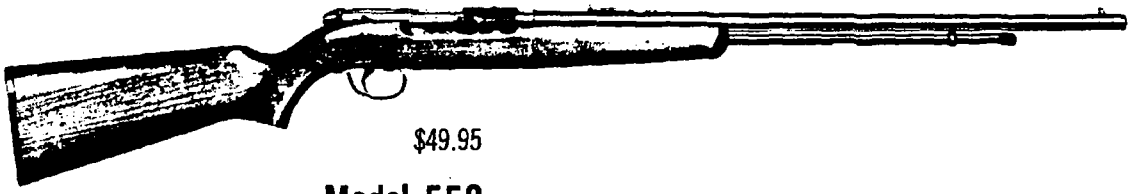


Model 552 "Speedmaster" $55.95

VERSATILE. Shoots 22 Short, Long and Long Rifle cartridges interchangeably without adjustment. Load 'em up in any order and start shooting. Your trigger finger does all the work.

SINGLE LOADING — AUTO EJECTION. For use as a single shot rifle, pull back bolt, drop cartridge into the ejection port, release bolt and you're ready to shoot. Empty cartridge case will be ejected automatically.

Here's the Remington 22 caliber automatic that's fast shooting, accurate, nicely balanced . . . the rifle you'll want for small game hunting, controlling crop-destroying and marauding pests, or for just plain fun-shooting. The Model 552 is the newest member of Remington's "family of guns"; looks, handles and shoots like its big brother, the Model 742 big game rifle. "Speedmaster has every feature the shooter wants, such as: twenty shots as fast as you can squeeze the trigger, rich walnut stock, cross bolt safety, receiver grooved for "tip-off" 'scope mounts. Also available in the short barrel (21") carbine model and the Gallery Special. Pick a Model 552 off the rack at your dealer's — heft it — throw it to your shoulder. We think you'll agree, it's the rifle that "feels right" . . . because it's made better.



$49.95

Model 550

Rapid fire, extra ruggedness and dependability are points shooters like about this Remington automatic. It's the famous 22 caliber rifle that shoots Short, Long and Long Rifle cartridges with no adjustment. Mix them up, drop them in the tubular magazine and fire away. Model 550 takes 'em as they come. Other fine features are: Large capacity, up to 22 Shorts, American walnut stock, fine accuracy, thumb safety, receiver grooved for "tip-off" 'scope mounts. The Model 550 is well-built, well-designed — an exceptionally fine all-around rifle for the hunter or plinker . . . and good for week-end family fun, too.

This rugged and dependable automatic will handle, interchangeably and without adjustment, Short, Long and Long Rifle cartridges.

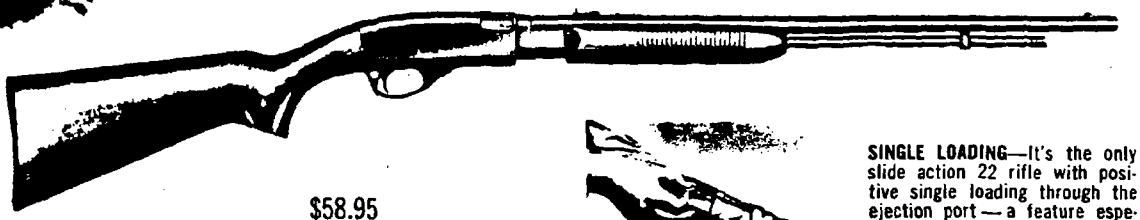
1963 Remington Pump and Bolt Action

22 RIM FIRE RIFLES



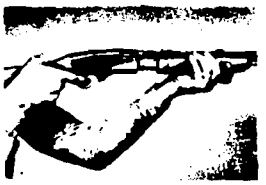
$58.95

Model 572 "Fieldmaster"

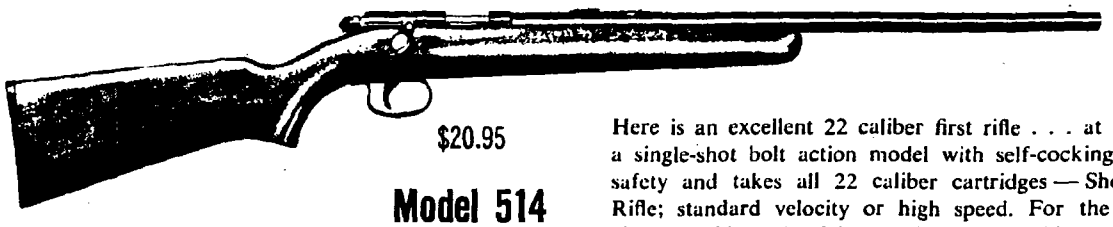
For the shooter who likes a pump action 22 caliber rifle, the "Fieldmaster" Model 572 is best . . . by test. Exclusive cartridge feeding design prevents jamming, permits easy single loading. By simply removing the inner magazine tube, parent or instructor can convert the "Fieldmaster" into a single shot rifle. Receiver has dovetail grooves for "tip-off" 'scope mounts. The Model 572 is beautifully streamlined and balanced — rugged and dependable like Remington big game rifles and shotguns.

SINGLE LOADING—It's the only slide action 22 rifle with positive single loading through the ejection port — a feature especially important to parents and shooting instructors.

FAST, POSITIVE ACTION — short stroke operation is fast and smooth . . . ideal for plinking or for getting off quick shots at hard-to-hit game. The Model 572 "Fieldmaster" shoots as fast as you can flick the fore-end.



SHOOTERS FORGET—but a "Fieldmaster" won't. For extra safety it's designed not to fire if the trigger is pressed while the action is being closed. Trigger must be released and pressed for each shot.



$20.95

Model 514

Here is an excellent 22 caliber first rifle . . . at a popular price. It's a single-shot bolt action model with self-cocking bolt, rotary thumb safety and takes all 22 caliber cartridges — Short, Long, or Long Rifle; standard velocity or high speed. For the young shooter, it's also available as Model 514 BC "Boy's Carbine" with cut down stock.

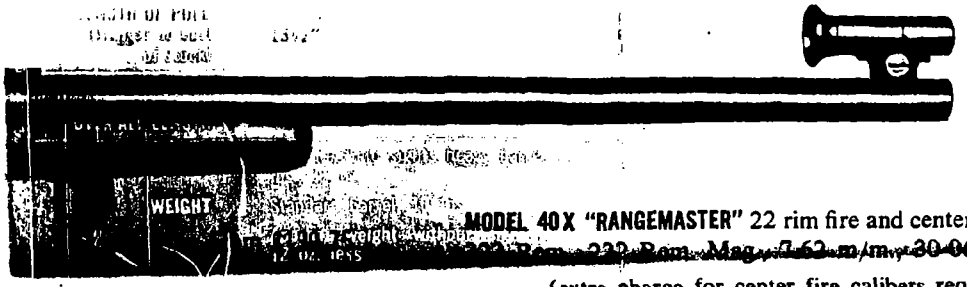
TARGET RIFLES



MODEL 40X "RANGEMASTER" 22 rim fire and center fire target rifle. Center fire calibers: ~~222 Rem., 222 Rem. Mag., 7.62 m/m, 30-06~~ and others on special order.

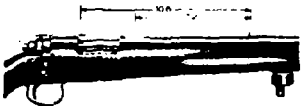
* Also available in center fire model in following calibers (extra charge for center fire calibers requiring stainless steel barrels)

Here is the sensationally accurate Remington Model 40X that is taking top honors in the United States and at International matches throughout the world. It reflects all that Remington is famous for . . . craftsmanship, precision design, quality materials, attention to detail. The 40X is truly a target rifle that only Remington — the nation's oldest gun maker could create. Features are:

Bolt action single-shot with loading platform. Specially selected long-wearing ordnance steel barrel, with new precision rifling. Choice of standard or heavy barrel. Custom-style stock with high comb giving same sighting plane for iron and telescope sights. Comb grooved for easy bolt removal. Mershon White Line non-slip rubber butt plate.

Built-in adjustable bedding device. Adjustable sling swivel. Extra-strong bolt with heavy, over-size locking lugs insuring constant headspace. Double extractors. Loading platform gives absolutely straight-line feed. Adjustable, crisp trigger with positive click adjustments for weight of pull. Thumb safety. Large, strong receiver drilled and tapped for standard sight mounts — telescope and iron. Redfield Olympic front and rear sights optional. Greatly increased distance between 'scope blocks gives improved sight adjustment. Barrel length 28". Stock length 33". Overall length 46¾". Weight without Redfield Olympic sights: heavy barrel rifle 12 lbs., standard barrel rifle 10 lbs. Weight with sights: add 12 oz.

"GROUP TIGHTENER" . . . first production rifle ever made with convenient built-in bedding device. Adjustment of "tuning" screws can be done manually with small screw driver.



GREATER DISTANCE between telescope blocks means 50% finer sight adjustment. Reduces "sighting-in" errors. Photo shows difference between old 7.2" inter-mount radius and more precise 10.6" inter-mount radius on Model 40X.

Ballistics obtained in the XP-100, 10½" barrel.

NOW...after years of Research & Development by America's Oldest Gunmaker

. . . a super-accurate, long range pistol that fires the new 221 Remington "Fire Ball" faster, farther and flatter than any handgun you ever held: The new and exciting REMINGTON XP-100 LONG RANGE PISTOL.

Exclusively styled and designed with a one-piece stock of Du Pont "Zytel" — the "gunmaker's nylon" that gives a gun more durability, finest barrel-bedding (for greater accuracy) and lasting good looks — the XP-100 is new from butt to muzzle and made for new shooting satisfactions, extra sporting pleasures you've never had before.

It's exciting to shoot — exciting to own — and even exciting to look at. Built with the world's strongest bolt (three rings of steel support the cartridge head) this new gun and cartridge have been "cross-engineered" — made for each other, by Remington, to give you the power-and-precision no other pistol and load can deliver.

EXCITING TO SHOOT

beautiful to look at, and handsomely cased, too (at no extra charge.) New specially fitted, custom style zipper case is practical, durable . . . protects pistol wherever you go.

SPECIFICATIONS

STOCK: Du Pont "ZYTEL". **ACTION:** Bolt, solid frame. **CAPACITY:** Single shot. **CALIBER:** 221 Remington "Fire Ball". **LENGTH:** Barrel 10½". Overall 16¾". **TRIGGER:** Match type; grooved. **SIGHTS:** Fixed front; rear adjustable for windage and elevation. **WEIGHT:** 3¾" lbs., shipping weight with zipper case 7 lbs. **ORDER NUMBER** 5470.

FEATURES

ROTATING THUMB-SAFETY Bolt handle cannot be raised to open action, trigger cannot be pulled, when on SAFE position.

VENTILATED RIB for improved sighting, "custom-crafted" appearance.

CUSTOM-STYLE CHECKERING, white spacers and diamond inlays enhance appearance and value.

INTERNAL FORE-END CAVITIES (5 of 'em) permit addition of weights to suit your personal shooting preferences. Cavities hold 38 caliber, 130 grain, metal case bullets (Remington Components Index Number B 22848).

MATCH TYPE TRIGGER with no backlash, no wobble . . . and it's grooved for a better finger feel. It's crisp — there's no lag in the let-off; extremely fast lock time.

SCIENTIFICALLY BALANCED to give minimum whip, jump and recoil. Grip is positioned at best position for steady holding . . . it's the comfort king of pistols.

ONE-PIECE STOCK OF DU PONT "ZYTEL" "the gunmaker's nylon" that gives a gun more durability, finest barrel-bedding (for greater accuracy) and lasting good looks.

WORLD'S STRONGEST BOLT same as featured on famous Remington center fire rifles.

RIFLE-TYPE REAR SIGHT is adjustable for windage and elevation.

UNIVERSAL GRIP fits either left—or right hand, is shaped to fit fingers and heel of hand.

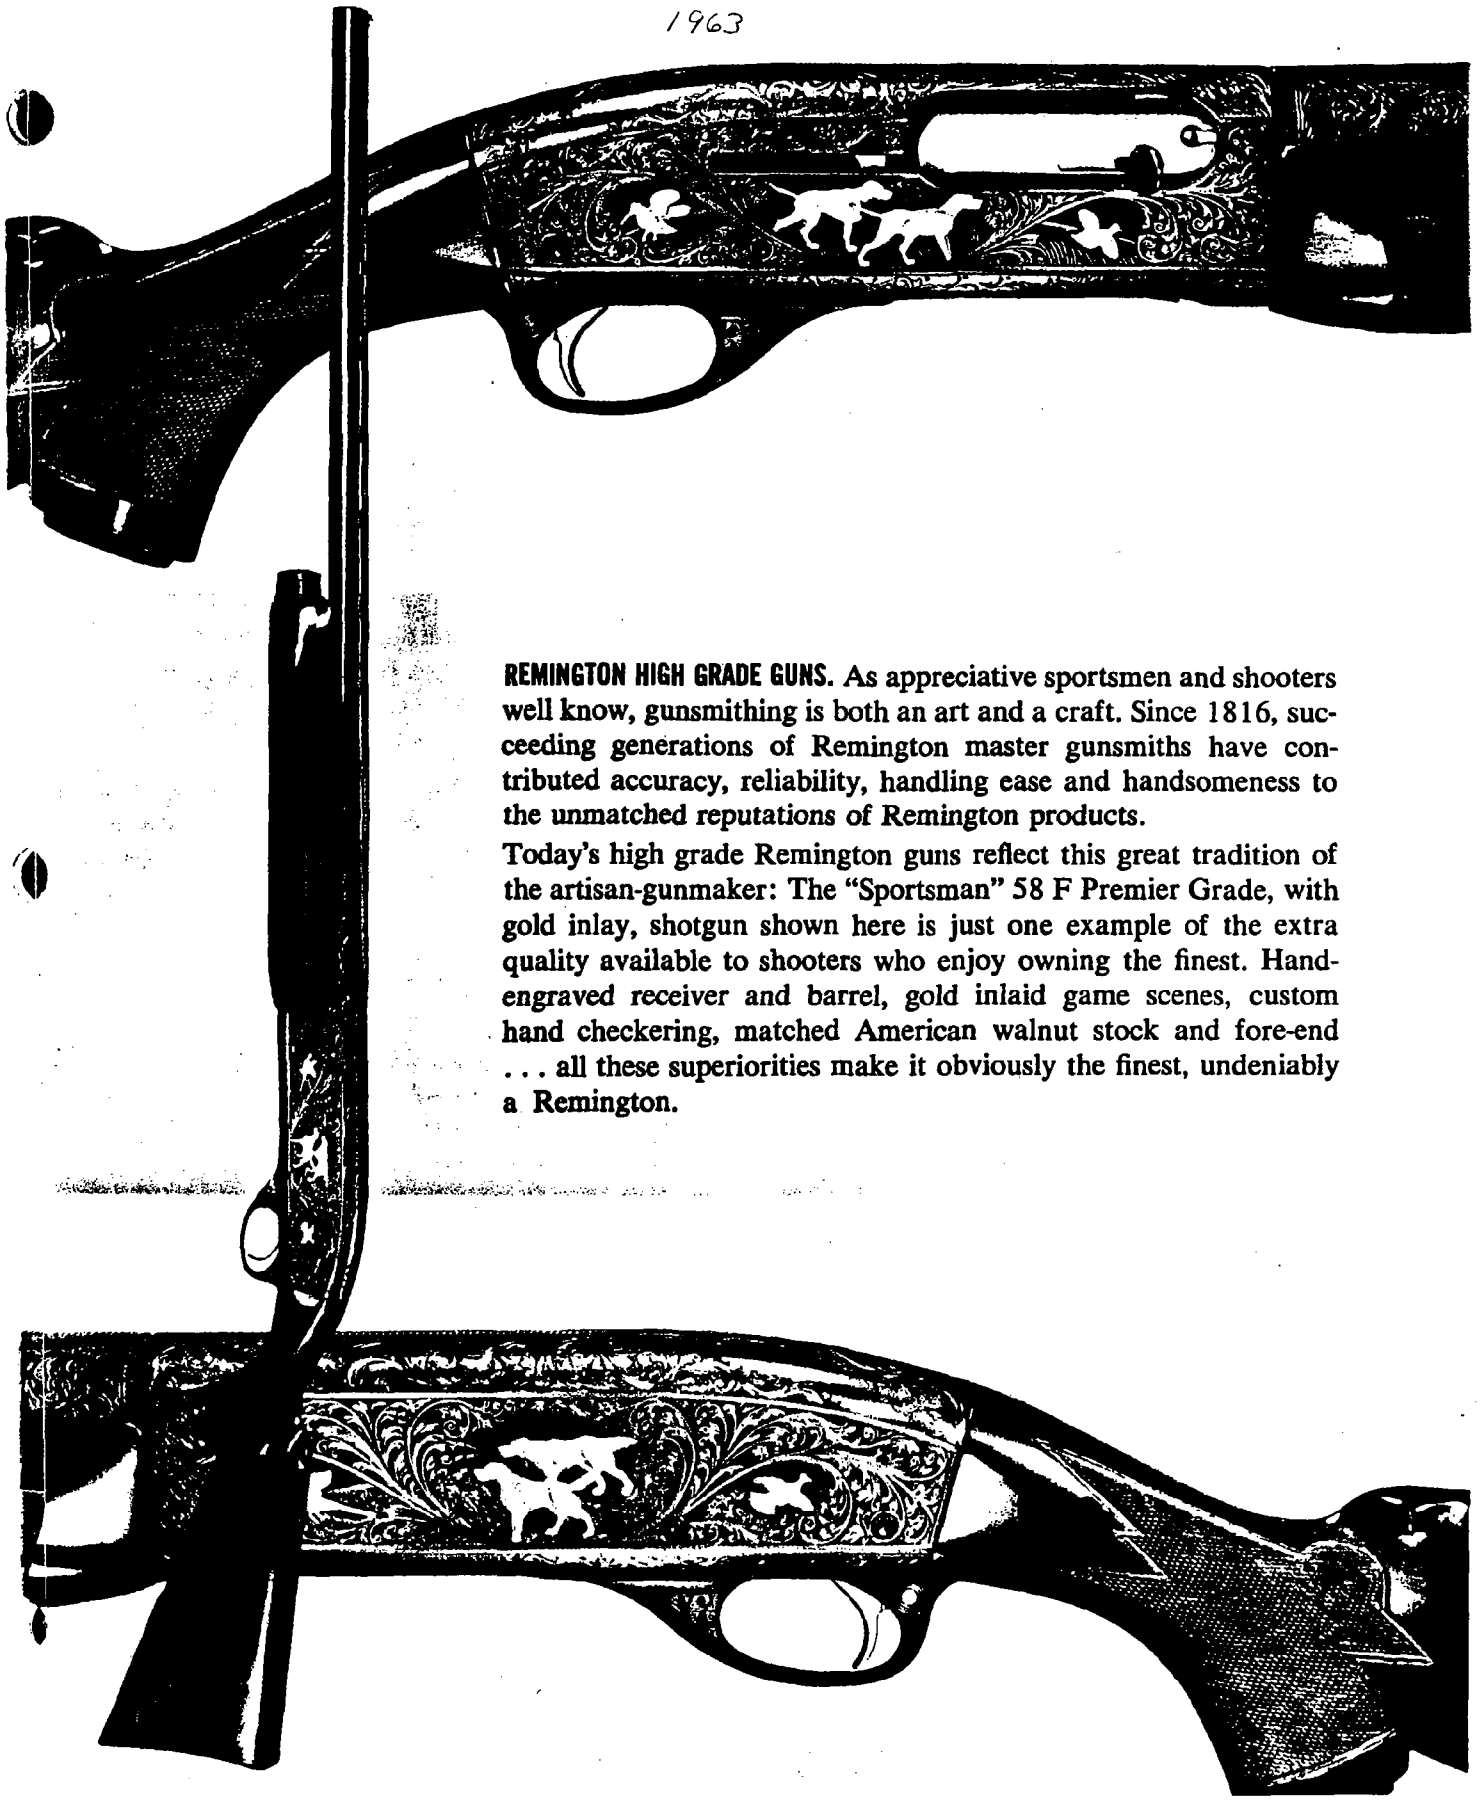
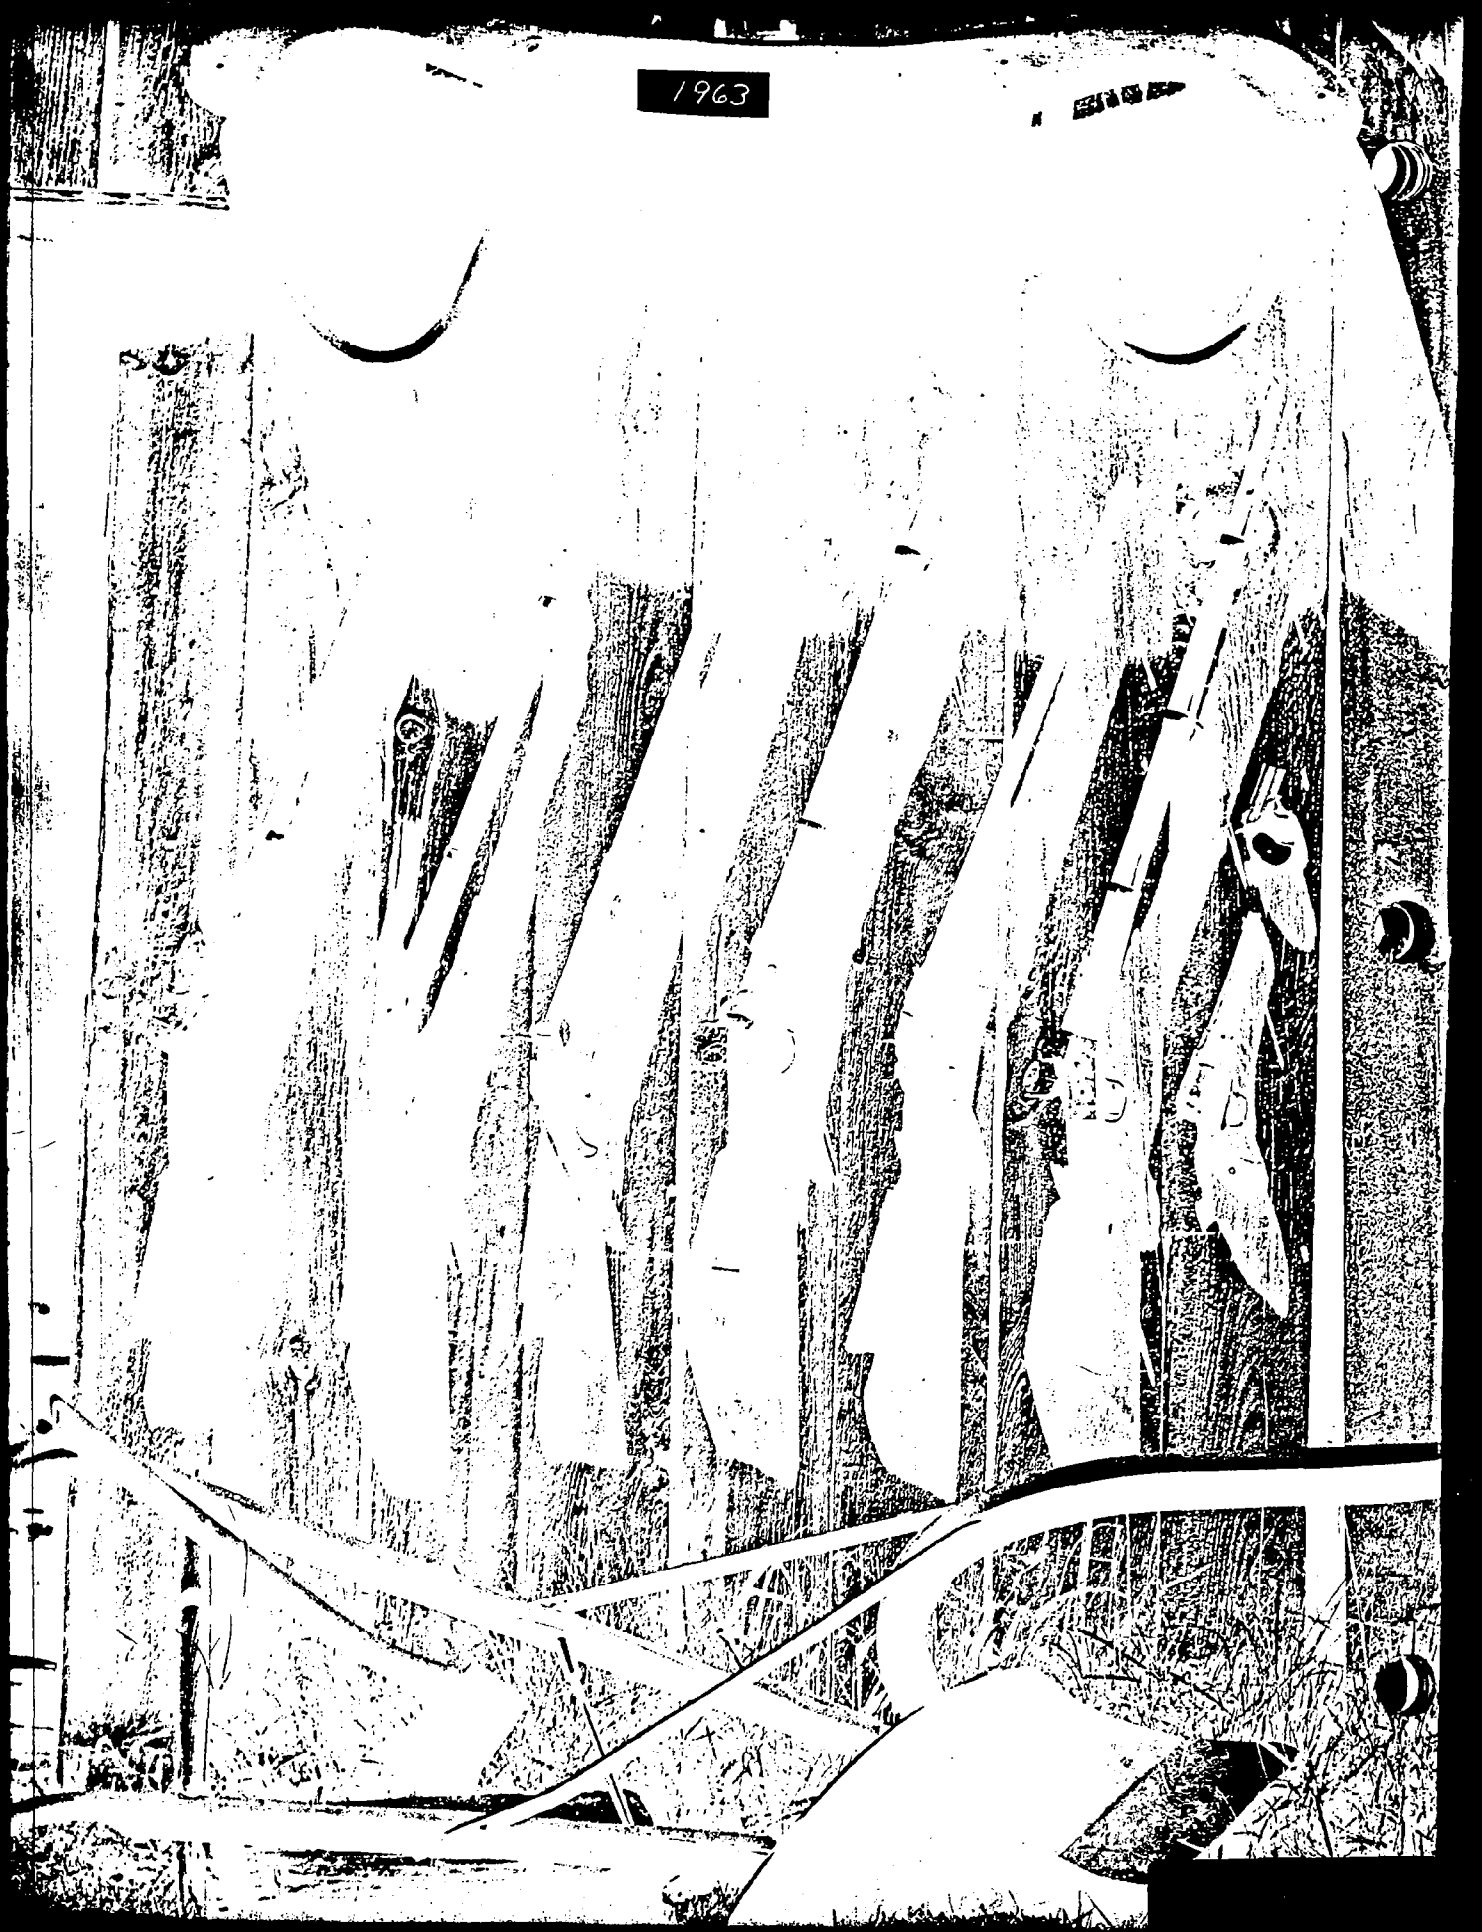
1963



REMINGTON HIGH GRADE GUNS. As appreciative sportsmen and shooters well know, gunsmithing is both an art and a craft. Since 1816, succeeding generations of Remington master gunsmiths have contributed accuracy, reliability, handling ease and handsomeness to the unmatched reputations of Remington products.

Today's high grade Remington guns reflect this great tradition of the artisan-gunmaker: The "Sportsman" 58 F Premier Grade, with gold inlay, shotgun shown here is just one example of the extra quality available to shooters who enjoy owning the finest. Hand-engraved receiver and barrel, gold inlaid game scenes, custom hand checkering, matched American walnut stock and fore-end . . . all these superiorities make it obviously the finest, undeniably a Remington.

R2525097



R2525098

1963

To carve a nation out of a wilderness, tools were needed. But even before settlers headed West behind a yoke of oxen or cleared land with the axe and cultivated it with a plow, pioneers of the young United States realized that the firearm was the basic tool needed to open the vast interior of a growing nation to the westward migration.

For with a rifle alone, a man could enter the wilderness with protection, and even more important — with a tool that would provide sustenance for himself and his family. To early Americans the rifle, shotgun and pistol were an indispensable part of pioneer life. When the land was being opened and hungry settlers waited the necessary months or years for their first crops to ripen, it was the firearm that provided them with food from nature's larder of game. It was this demand for the firearm as a tool . . . not as a weapon . . . that made the growth of Remington Arms Company, Inc. possible. From the first Remington flintlock made in 1816 to the incomparable Remington rolling block rifle of the late 19th century—Remington guns led the way wherever pioneers ventured.

In the formative, critical years of our young nation's growth, Remington . . . the oldest gunmaker in America . . . filled the need for the most indispensable of all pioneering tools — the firearm. Since 1816 Remington guns have proudly contributed towards our nation's heritage and in doing so, acquired a reputation for excellence in design and dependability.

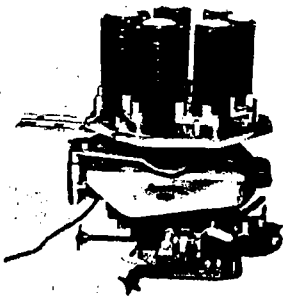
Remington TRAP & SKEET EQUIPMENT

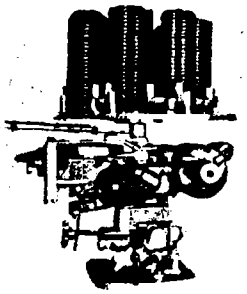
1963



MODEL A100T FOR TRAP
1 Remington autoloading trap with ½ HP motor, 60 cycle, 115 volts, and special auto-angling base.
1 push button release unit with 100 feet of wire.
1 power control box.

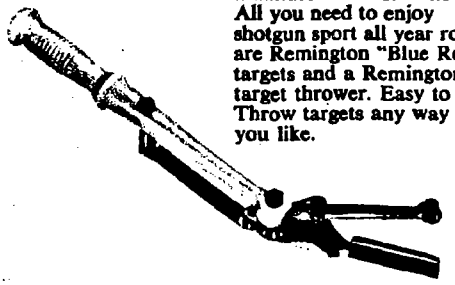
REMINGTON AUTOLOADING TRAP

- Labor-saving *(no trap boy needed)*
- Large capacity (203 targets)
- Easy loading, stack at a time
- Connects to 110 volt wiring system
- No tools required
- Makes commercial gun clubs profitable!

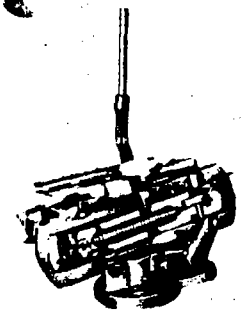


MODEL M200S FOR SKEET
2 Remington autoloading traps with ½ HP motors, 60 cycle, 115 volts. 1 walk around release unit and 70 feet of wire. 2 power control boxes. 1 connection box.

REMINGTON "BLUE ROCK" TARGETS
The new Remington square shoulder "Blue Rock" has weight where weight belongs! Dome of target is thin, rim is heavier, giving greater stability, more spin. More pronounced shot rings on dome catch shot — targets break easier when hit by only a few pellets. All adding up to higher scores!

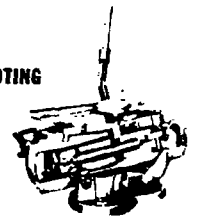


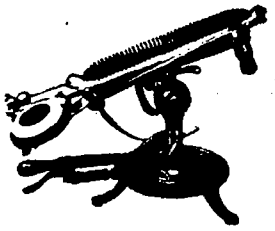
REMINGTON TARGET THROWER
All you need to enjoy shotgun sport all year round are Remington "Blue Rock" targets and a Remington target thrower. Easy to use. Throw targets any way you like.



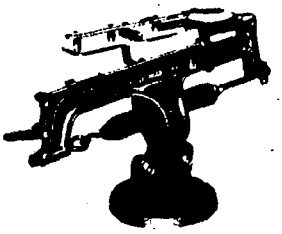
REMINGTON "WONDER" TRAP
For straight trap and skeet. Tested in service . . . proved in practice. "Wonder" trap meets every requirement. Less vibration, automatically "sets" itself. Instant adjustment.

REMINGTON "WONDER" TRAPS FOR SKEET SHOOTING
Two Remington "Wonder" traps with Remington's exclusive Singlever manual control, all other accessories. Also Remington Electric release.

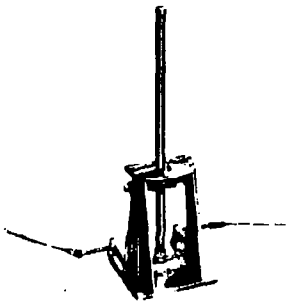




REMINGTON "EXPERT" TRAP
A strong, lightweight, sturdily built portable trap. Smooth operating. Just right for use at summer camps, cottages, aboard boats, or for trips into the country. Fine for "walk up" shooting games.



REMINGTON "BLUE ROCK" TRAP
For straight trap and skeet. Throws either doubles or singles. Ideal for small clubs or private estates. Available also as complete skeet outfit: 2 "Blue Rock" Traps and Remington's exclusive Singlever Pull for manual operation.



MANUAL RELEASE
for "Wonder" or "Blue Rock" Outfits
Simple to attach and easy to use, the Remington Singlever Pull is especially designed for manual operation of the "Wonder" Skeet Outfit. Easily and quickly converted to electric operation.

REMINGTON MODEL 1100 AUTOMATIC SHOTGUN

Large 5-Shot Capacity
in 12, 16 and 20 Gauges
Up to 55% Less Recoil
Fast Two-Action Cycle

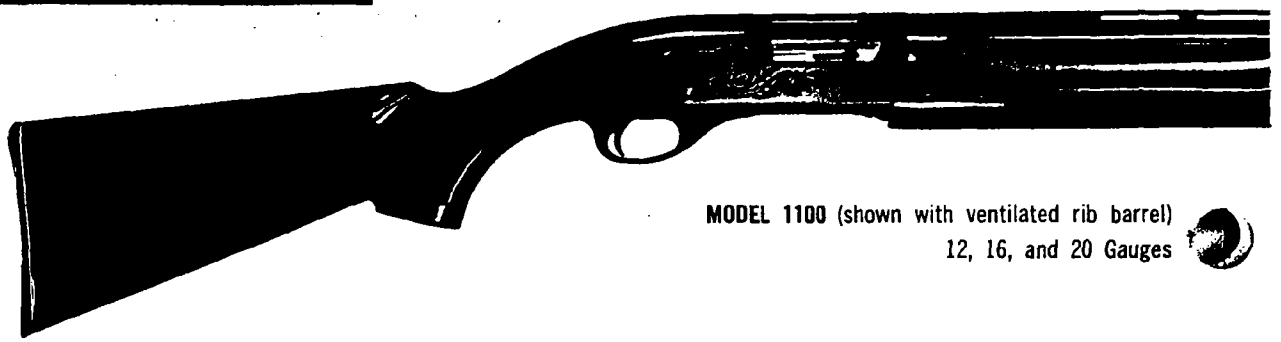
Shooters throughout the country have made the new Remington Model 1100 the "most popular" — "most wanted" automatic shotgun . . . and for good reasons, too. For example, duck and goose shooters, dove and quail hunters; gunners who swung the 1100 on pheasants and small game all last season tell us:

"It works, never jammed on me once, and I hunted every weekend."

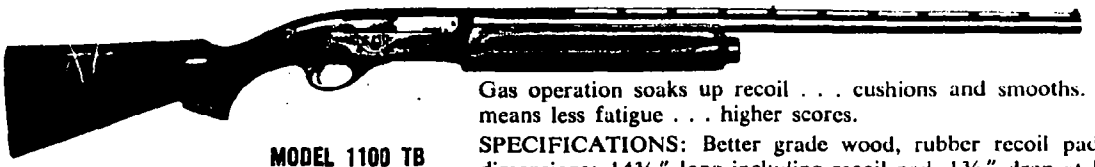
"Recoil is light" writes a trap shooter. "My boy says the kick doesn't bother him a bit . . . and it doesn't. He's shooting better than ever." Light recoil also pays off in doubles, too: for the trap shooter, skeet shooter and the hunter. Where that second shot counts — you can count on the Model 1100.

"Finish is good — stands up" reports a West Coast duck and goose shooter who shot it throughout the season . . . "And we get some mighty wet weather out here . . . it's tough on almost everything."

"It's a beautiful gun" — is a typical comment. And no wonder — with its fine-lined checkering, DuPont RKW finish, scroll work, steel receiver, white line spacers and tear drop pistol grip. Shooters are proud of this gun, in the field, and in their gun rack. You'll be too. Your dealer's got 'em in 12, 16, and 20 gauges, with both plain and ventilated rib barrels.



MODEL 1100 (shown with ventilated rib barrel)
12, 16, and 20 Gauges

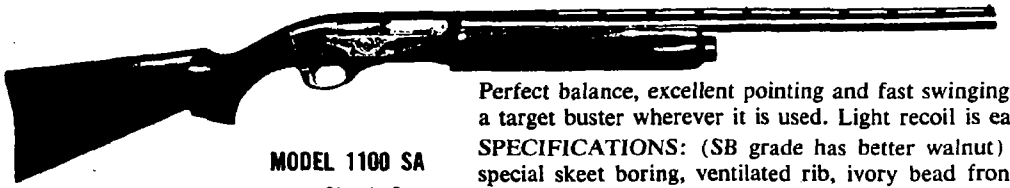


12 GAUGE ONLY

MODEL 1100 TB
Trap Gun

Gas operation soaks up recoil . . . cushions and smooths. And less recoil means less fatigue . . . higher scores.

SPECIFICATIONS: Better grade wood, rubber recoil pad. Special stock dimensions: 14⅜" long including recoil pad, 1¾" drop at heel, 1⅜" drop at comb. Available in 28" and 30" full choke and 28" modified choke, ventilated rib barrels only. Ivory bead front sight, white metal rear sight. *Weight:* about 8¼ lbs.

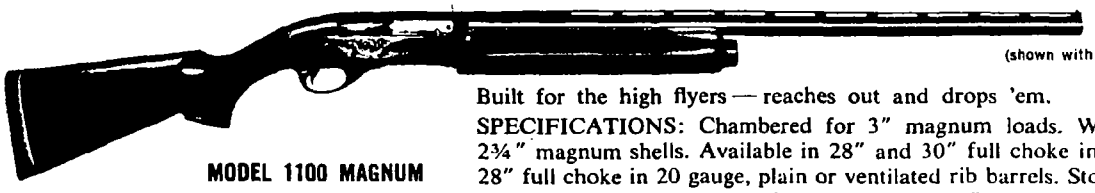


12, 20 GAUGE

MODEL 1100 SA
Skeet Gun

Perfect balance, excellent pointing and fast swinging qualities make this gun a target buster wherever it is used. Light recoil is easy on the shoulder, too.

SPECIFICATIONS: (SB grade has better walnut) 26" barrel, Remington special skeet boring, ventilated rib, ivory bead front sight and white metal rear sight. Stock dimensions are: 14" long, 2½" drop at heel, 1½" drop at comb. *Weight:* about 7½ lbs.



12, 20 GAUGE
(shown with ventilated rib barrel)

MODEL 1100 MAGNUM
Duck Gun

Built for the high flyers — reaches out and drops 'em.

SPECIFICATIONS: Chambered for 3" magnum loads. Will also handle 2¾" magnum shells. Available in 28" and 30" full choke in 12 gauge, and 28" full choke in 20 gauge, plain or ventilated rib barrels. Stock dimensions: 14" long including pad, 2½" drop at heel, 1½" drop at comb. Furnished with recoil pad. *Weight:* about 7¾ lbs.

R2525104

1964

SPECIFICATIONS

STYLE	5 shot gas operated shotgun.
GAUGE	Made in 12, 16 and 20 gauge.
BARREL	Special Remington proof steel. Extra barrel is interchangeable within gauge.
OVER-ALL LENGTH	48" (with 28" Barrel).
SAFETY	Convenient cross-bolt type.
RECEIVER	Made from solid steel, top matted, scroll work on bolt and both sides of receiver.
STANDARD STOCK DIMENSIONS	Stock and fore-end: Rich American walnut. 14" long, 2½" drop at heel, 1½" drop at comb.
AVERAGE WEIGHT	12 ga. 7½ lbs. 16 ga. 7¼ lbs. 20 ga. 7 lbs.

FEATURES THAT MAKE THE MODEL 1100 NEW—DIFFERENT—BETTER!

— on stock and fore-end . . . fleur-de-lis design. Checkering is fine-lined, uniform, good looking.

— with attractive white diamond inlay provides a natural, non-slip, comfortable grip.

— has swept back, streamlined design. Fine checkering and fluting give secure gripping area.

— on butt plate and grip cap add attractiveness.

— looks better, wears better . . . because the metal is even highly polished.

— Easy to load. Four in magazine . . . one in chamber. Three-shot plug furnished.

— Performs perfectly for different loads; automatically — Shoots high base, low base, 2¾" magnum shells without adjustment.

— They're interchangeable in seconds; no factory fitting is required. Use one gun for all your shooting and get more sport, variety, interest.

— Drop a shell in the breech, load another in the magazine in one motion. Load five shells in five seconds.

— Gas action tames recoil; it smooths and cushions . . . lots of power.

— New DuPont wood finish is clear. Lets the wood grain show through. It's similar to that used on bowling pins; tough, hard, scratch-resistant . . . gives lasting protection against hard usage and bad weather.

— is made from a solid block of steel for extra strength, . . . dependability.

— Chambered for 3" magnum shells. Uses 2¾" magnums too. A rugged, dependable shotgun . . . reaches . . . and stays for high doves.

— on receiver and bolt adds real beauty and . . . to this gun.

— The gas operation of this gun is unusual. It blows dirt and grime away, keeps action bright and shining for long periods of time.

— Tests prove the shooting life of this new gun is up to seven times longer than any other automatic shotgun on the market.

— are just right, only 7½ lbs. in 12 gauge. Can be carried comfortably all day. No sacrifice of steel in barrel or receiver . . . not a "featherweight finisher" that's too light to point right.

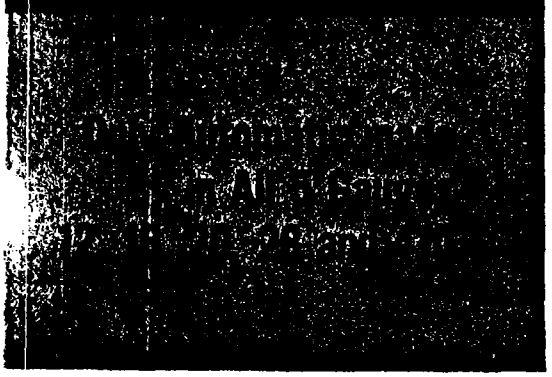
MODEL 11-48

AUTOMATIC SHOTGUN

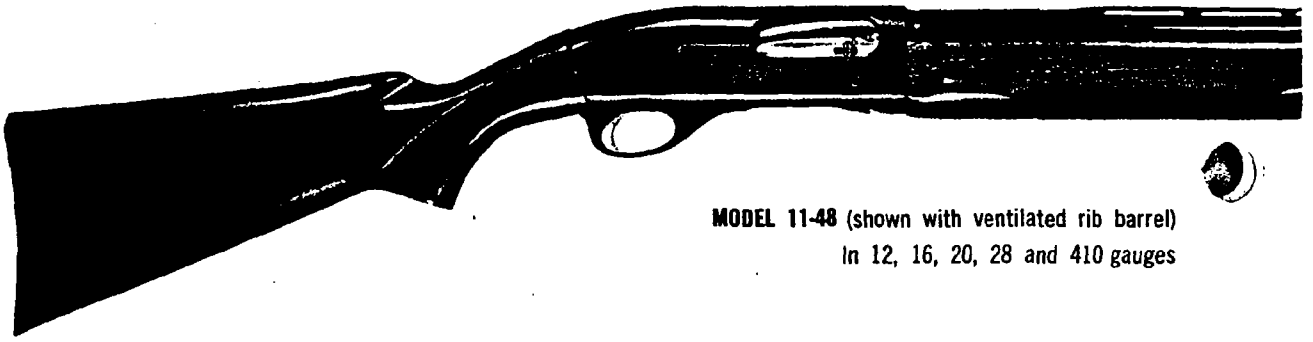


The Remington Model 11-48 is an automatic shotgun with a fine reputation that has been earned in the field and wherever skeet targets are thrown. Over a half million proud owners are our best salesmen, and they'll tell you the 11-48 is one of the finest automatics on the market. And it is!

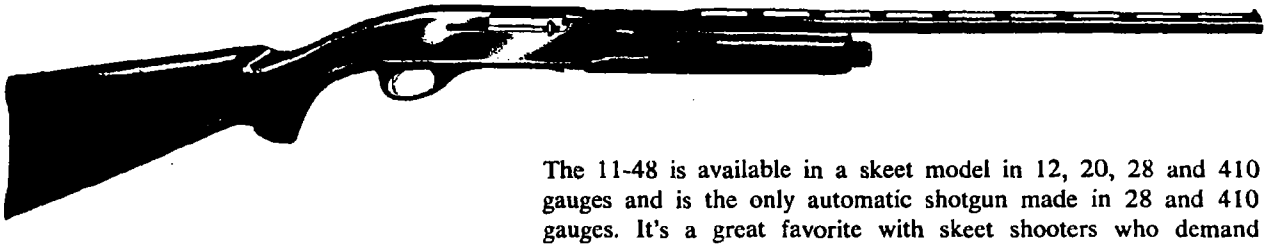
It's the only automatic made in 12, 16, 20, 28 and 410 gauges and in the 28 and 410 gauges it's a big favorite with skeet shooters, youngsters, women . . . and hunters who like a small bore shotgun. And speaking of Remington automatic shotguns, they have won more National Skeet Championships than all other brands put together. Here is where shot-after-shot dependability really counts.

Model 11-48 is an excellent value . . . you get a lot of gun for the money, such as: Custom fine-lined checkering, receiver milled from a solid block of steel, rich American Walnut stock and fore-end, 5-shot capacity (in 12, 16 and 20 ga.) and it shoots all brands of ammunition, high and low base, rifled slugs and standard length magnum shells . . . all without adjustment.

Barrels are interchangeable, too. Takes only a minute to change them and you can do it right in the field. No special tools or factory fittings are required. Dependability, ruggedness, lightweight, fine balance, good looks . . . that's the Remington Model 11-48, a gun that's built the "Remington Way" — to last!



MODEL 11-48 (shown with ventilated rib barrel)
In 12, 16, 20, 28 and 410 gauges



MODEL 11-48 SA
Skeet Gun
Available in 12, 20, 28 and 410 gauges
(410 gauge shown above)

The 11-48 is available in a skeet model in 12, 20, 28 and 410 gauges and is the only automatic shotgun made in 28 and 410 gauges. It's a great favorite with skeet shooters who demand supreme dependability in the guns they shoot. The Model 11-48 has everything the skeet shooter wants . . . fine balance, excellent pointing qualities, ruggedness . . . plus many other features that all add up to higher scores.

SPECIFICATIONS: 26" barrel (25" on 28 and 410 gauges) Remington special skeet boring, ventilated rib barrel, ivory bead front sight and white metal rear sight. Stock dimensions: 12 and 20 gauge, 14" long, 2½" drop at heel, 1⅝" drop at comb. 28 and 410 gauges, 13⅞" long, 2⅝" drop at heel, 1⅝" drop at comb. Weight: 12 ga. — 7¼ lbs., 20 ga. — 6½ lbs., 28 and 410 ga. — 6¼ lbs.

REMINGTON MODEL 870 PUMP ACTION SHOTGUN

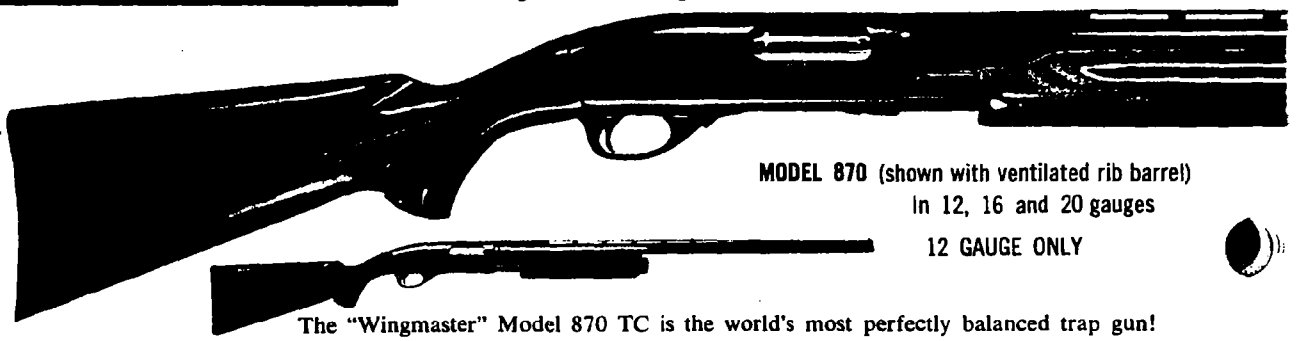
1964

Time for a new pump gun? If it is — and you're looking . . . we'd like to help. First of all you want a gun that shucks shells at the flick of your wrist — a gun that's got twin action bars and pumps like a ball-bearing action without twisting or binding. There is a gun like this. It's the slick Remington Model 870!

Want one that's going to last? Of course. Then pick a pump that has a receiver machined from a solid block of steel if you want strength and ruggedness. That's the way a Remington 870 is built . . . we don't make them any other way.

Chances are you'll want to use that gun on different kinds of game. That means interchangeable barrels you can change in seconds — right in the field and without any factory fitting or special tools. With a Remington 870 "Wingmaster" it's so easy — anyone can do it.

Everyone wants a good-looking gun. The 870 is a stand-out in any company and here's why: Custom fine-lined checkering, rich American Walnut stock and fore-end, full beavertail and fluting on fore-end, high-gloss wood finish and decorative grip cap. A Remington 870 pump is one of the best investments you can make in shooting enjoyment — for yourself — as a gift — or some day as a pass-along gun to that youngster of yours. So, for good hunting this season, why not take along a new Remington Model 870.



MODEL 870 (shown with ventilated rib barrel)
In 12, 16 and 20 gauges

12 GAUGE ONLY

"WINGMASTER" MODEL 870 TC
Trap Gun

The "Wingmaster" Model 870 TC is the world's most perfectly balanced trap gun!

SPECIFICATIONS: Available with 28" modified, 28" or 30" full choke, ventilated rib barrel. Ivory bead front and white metal rear sight. Recoil pad. Special target grade sear, hammer and trigger assembly. Stock dimensions: 14⅜" long including recoil pad, 1⅞" drop at heel, 1½" drop at comb. Highly figured and finished American Walnut with finely checkered stock and fore-end. Hand fitted action and parts. Will furnish made to order stock lengths from 13½" to 14¾" on Model 870 TC only, without extra charge. *Weight*: about 8 lbs. This model also available in TB grade 14⅜" stock only, lower price.

"WINGMASTER" MODEL 870 SA
Skeet Gun

The Model 870 SA, most perfectly balanced pump action shotgun, is ideal for fast second shots at skeet or upland game. Also available in SC grade with specially selected wood and hand checkering.

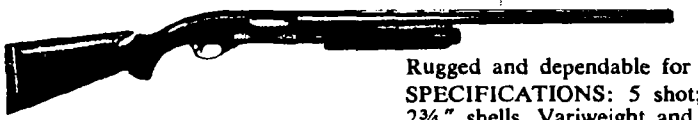
SPECIFICATIONS: (12 and 20 Gauges) *26" barrel. Remington Special Skeet Boring* Ventilated rib with ivory bead front and white metal rear sight. Stock dimensions: 14" long, 2½" drop at heel, 1⅝" drop at comb. *Weight*: 12 gauge about 7 lbs., 20 gauge about 6½ lbs.

12 GAUGE, WITH RIFLE SIGHT BARREL

"BRUSHMASTER" MODEL 870
Deer Gun

The Model 870 "Brushmaster," made specially to handle rifled slugs and buck shot, is the latest in smashing power for those fast shots in brush country.

SPECIFICATIONS: The same as standard 870 except as follows: Lightning-fast 20" barrel with fully adjustable rifle-type sights. Stock fitted with rubber recoil pad and white line spacer.



12 AND 20 GAUGES

"WINGMASTER" MODEL 870 MAGNUM
Duck Gun
(shown with ventilated rib barrel)

Rugged and dependable for long range shooting! For geese and ducks.

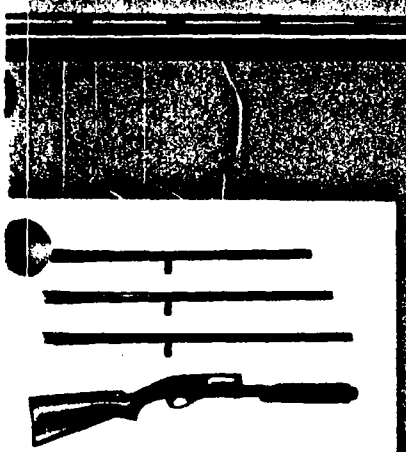
SPECIFICATIONS: 5 shot; chambered for 3" Magnum shells — will also handle 2¾" shells. Variweight and wood 3 shot plug. 12 ga. with 28" and 30" full choke, plain or vent. rib barrel. Steel bead front sight, rubber recoil pad. Checkered stock and fore-end. Stock: 14" long including pad, 2½" drop at heel, 1⅝" drop at comb. 20 ga. furnished in 28" full choke vent. rib and plain barrels. *Weight*: 12 ga. about 8 lbs., 20 ga. about 7½ lbs., including variweight plug.

R2525108

1964

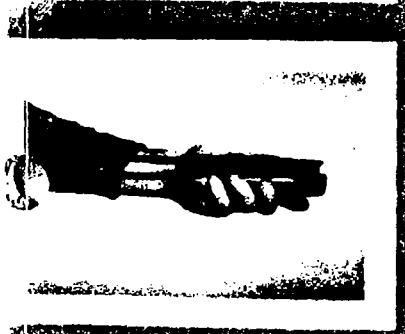
SPECIFICATIONS

RIFLE	5 shot pump action shotgun. Take down.
GAUGES	12, 16 and 20.
BARREL	Special Remington proof steel. Extra barrel is interchangeable within gauge.
OVER-ALL LENGTH	48½" with 28" barrel.
SAFETY	Convenient cross-bolt type, positive.
RECEIVER	Made from solid steel bar, machined.
STANDARD STOCK DIMENSIONS	Pistol grip type, fine American walnut. Length of pull 14" with 1" rubber recoil pad. Drop at heel 2½", drop at comb 1½".
AVERAGE WEIGHT	12 ga. - 7 lbs. 8 oz.; 16 ga. - 7 lbs.; 20 ga. - 6½ lbs.



QUICK CHANGE BARRELS — Change them in seconds, right in the field. No factory fitting or special tools required. Use one gun for all your shotgun shooting and get more game, more sport.

LOCK DESIGN — Barrel is made with a hardened extension into which the breech block must lock before firing. Result: ... less wear, constant ... shots.



DOUBLE ACTION BARS prevent twisting and binding, give smooth gliding action for which Remington "Wingmaster" is famous. Many shooters say it works like a ball bearing action. And they're right.

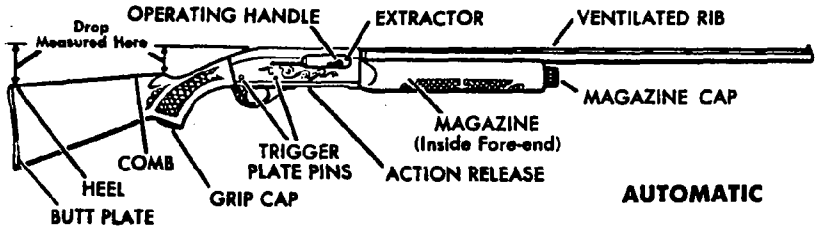
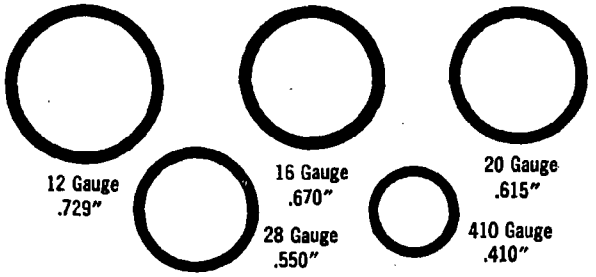
SHOTGUN TERMS



GAUGES, CHOKES and BARRELS

GAUGES — Shotguns are made in several well-known gauges, 12, 16, 20, 28 and 410. Other gauges have been made in the past but are not at present in common use. These include 4, 8, 10, 14, 24 and 32 gauges.

The unit of gauge measurement is based on numbers of uniform lead balls weighing one pound. 12 gauge is approximately the diameter of a lead ball of which 12 weigh one pound, 16 gauge is the diameter of a lead ball of which 16 weigh one pound, etc. The one exception is 410 gauge, which is actually 410 caliber. In terms of gauge, it would be 67 gauge. Measurements of minimum bore diameters in thousandths of inches are as follows:



SHELL LENGTH is measured in inches, in terms of the overall length of fired shell, with the crimp open. A 2¾" shell measures about 2½" to 2⅝" before it is fired, but 2¾" overall after firing. This method of measuring has been adopted to conform to standard chamber lengths of shotguns. A gun with a 2¾" chamber will thus handle shells of the proper gauge up to 2¾" length.

PATTERN — Pattern is the spread of shot pellets at any given yardage. All loads with the exception of 410 and skeet are tested for pattern at 40 yards. 410 and skeet loads are tested at 25 yards. The percentage of the total shot charge registering within a 30" circle (20" for 410) at these distances determines the quality of a pattern. No two patterns will be exactly the same. Average results should be taken from at least 25 patterns.

CHOKE — Choke is partial constriction of the bore of a shotgun barrel at the muzzle end. Its purpose is to control patterns. By using different degrees of choke boring, it is possible to control the spread of the shot charge for the best distribution of pellets at various ranges. For example, the bore diameter of a 12 gauge gun is .729". If the diameter at the muzzle end is reduced to .694", the constriction of .035" (difference) will control the shot sufficiently to give patterns averaging about 70% of the shot in a 30" circle at 40 yards. This is known as full choke boring, and is intended for long range shooting. The following table shows the percentage of shot that can be expected in the various choke borings:

CHOKES	% at 40 yards in 30" circle
Full Choke	70
Modified Choke	60
Improved Cylinder	50
Cylinder	40

CHOKE USES — A shooter should select the degree of choke boring for his barrel according to the range at which most of his shots are taken. Some kinds of birds and small animals are usually shot at close range, others at long range. Also, some persons are inclined to shoot quickly, while others tend to "ride" their game or targets. Most hunters find the following borings give the best results, though much depends on shooting conditions and personal preferences.

Full Choke .....ducks, geese, pheasant, crows, turkey, fox, racoon, trap shooting.

Modified Choke .....rabbit, woodcock, doves, squirrels, also all-round usefulness including ducks, quail, etc.

Improved Cylinder, Special Skeet .....quail, grouse, partridge, rail, skeet shooting, guard duty, riot, rifled slugs.

BARREL LENGTH — Shotgun barrels are usually supplied in 26, 28, and 30 inch lengths; also 20 and 26 inch lengths with rifle sights. The longer barrels are often preferred for long range shooting because the greater length gives a longer sighting radius, permitting more accurate pointing. Long barrels also minimize discomfort of muzzle blast, and the added weight reduces recoil. Short barrels are often preferred for close range shooting because they are easier to handle for quick shots . . . especially in heavy brush.

It is not practical to cut off a shotgun barrel. To do so will change the shooting qualities of the gun because the choke constriction is within the last two inches at the muzzle end. It is also impractical to cut down the length of the barrel and then attempt to restore the original degree of choke boring because the metal necessary for this will already have been reamed out at the time of manufacture.

A barrel may be rebored from one degree of choke to a more open degree, full to modified, modified to improved cylinder, etc., as long as the barrel length is left unchanged.

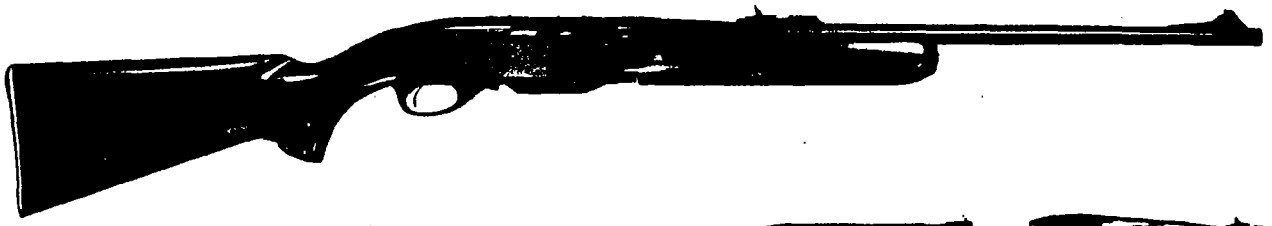
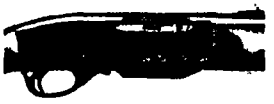
742

1964

The Most Powerful Automatic Big Game Rifle

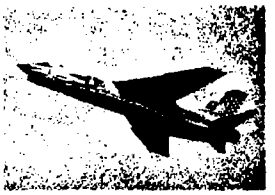


IF YOU'RE AN AUTOMATIC FAN . . . then the 742 "Woodsmaster" is your gun. There's meat in camp whenever you're shooting the Remington Model 742 Automatic . . . the modern rifle that's built for speed and power. You're packing a ton and a half of muzzle energy in the world's most powerful automatic hunting rifle — the only one that handles the pile-driving force of that All-American 30/06 Springfield cartridge (available in 9 bullet weights and styles for every kind of American game from woodchucks to grizzlies). Fast, gas-operated action soaks up recoil. No tooth-rattling "kick", no loss of power and almost no muzzle whip. That's why you're back on target before your trigger finger can squeeze off a second shot. The 742 Automatic lets you concentrate on aiming and not on working the action. In fact, this modern light weight Remington powerhouse actually reloads itself faster than you can shoot! Doubt it? Try it yourself the next time that big buck busts out of the brush. Model 742 "Woodsmaster" is available in 30/06 Springfield, 280 Remington, 308 and 6 m/m Remington. If you hunt in heavy brush country, you'll be interested in the short barrel carbine model, in 30/06 and 308 calibers. Both regular and carbine models have the new custom fine line checkering.

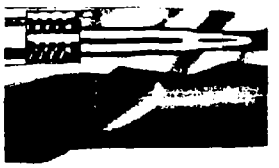


EXTRA STRONG, DEPENDABLE. Solid steel receiver, rotary multiple-lug breech lock, and high strength barrel breech ring make Model 742 extra strong, safe, dependable . . . allow it to be chambered for super powerful calibers like the 30-06.

FAST, EASY LOADING. Interchangeable — 4 cartridge magazine facilitates loading and unloading. Extra loaded magazines are easy to carry in pocket.



AMAZING "POWER-MATIC" ACTION — works on jet airplane principle. Gas moves rearward to operate action. "Jet" effect forces rifle forward—softens recoil with no power loss!



ROTARY MULTIPLE-LUG BREECH BOLT locks bolt and barrel together securely. Insures constant head space. Same exclusive design as on famous Remington Model 760 "Gamemaster."

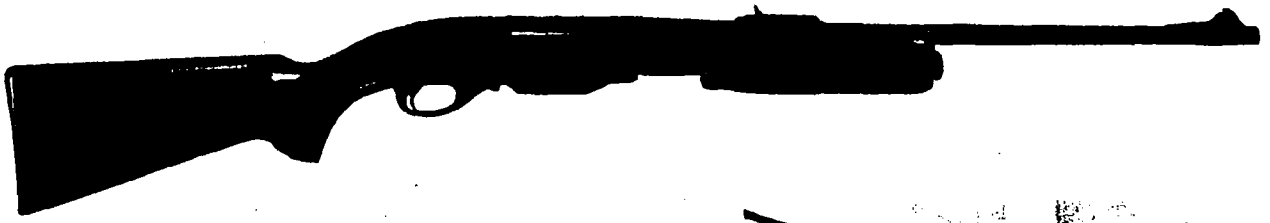
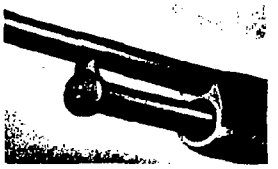
Fast handling, Accurate Big Game Rifle

760

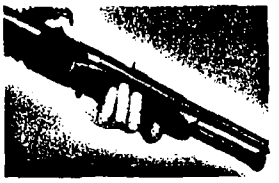


IF YOU'RE A PUMP GUN MAN . . . used to shooting a pump action shotgun, then the Remington Model 760 is the gun you'll want. You'll stop 'em and drop 'em if you're carrying a light weight, fast-handling Remington Model 760 "Gamemaster." It's the only pump action big game rifle made that's chambered for the popular and powerful 30/06 Springfield cartridge. Five lightning-fast shots are yours at the flick of your wrist . . . one more reason why this rifle has been a consistent winner in the International Running Deer Matches. Pump action is slick, smooth — so fast and effortless, shooters say it works like a "ball-bearing" action. An extra loaded clip magazine in your pocket means you can reload in seconds . . . you've reserve fire power at your fingertips. The Model 760 "Gamemaster" is another member of the Remington family of modern guns — rugged, dependable, trouble-free with the famous rotary multi-lug bolt for extra strength. Custom, fine line checkering make it a standout in any gun rack. Another modern Remington gun "that's better — because it's made better" . . . in six powerful calibers: 223 Remington, 280 Remington, 270, 30/06, 308, 35 Remington. Also made in a carbine model in 35 Remington, 30/06 and 308 calibers.

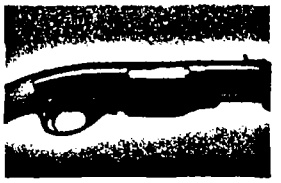


AMAZING ACCURACY—Free floating barrel gives the kind of accuracy that means meat on the table, more first-shot hits.

EXCEPTIONAL TRIGGER MECHANISM. No backlash, drag or creep. Convenient, positive cross-bolt safety.



LIGHTNING FAST ACTION — A flick of your forearm keeps you shooting; double action bars prevent twisting and binding. Pumping is effortless, like a ball-bearing action.



REMINGTON FIRE CONTROL trigger must be released and squeezed for each shot — can't fire unless action is completely closed. An important safety feature.

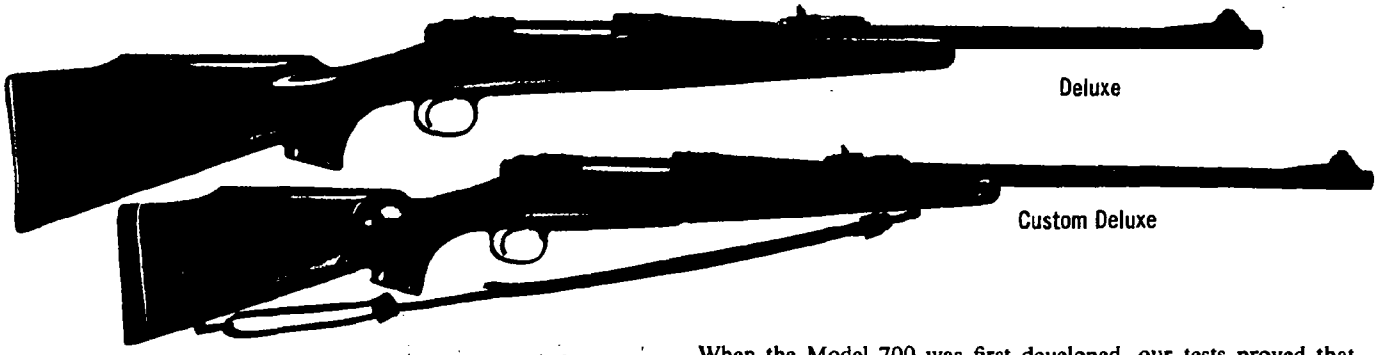
World's Most Wanted Bolt Action Rifle in 13 Calibers

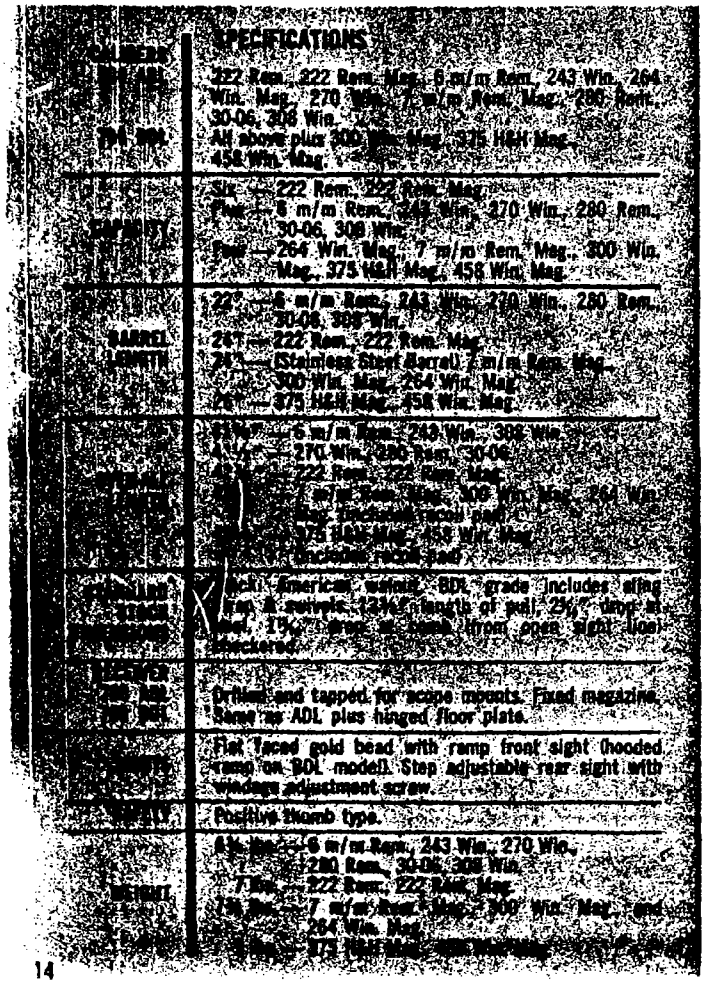


Deluxe

Custom Deluxe

WORLD'S STRONGEST BOLT ACTION. Cartridge head is encased and supported by ring of solid steel. When action is closed, three rings of steel support the cartridge head. It's super-strong.

BOLT KNOB is checkered, top and bottom. Grip is custom checkered. BDL Model has grip cap and white spacers.



When the Model 700 was first developed, our tests proved that we had produced the finest center fire bolt action rifle ever made. Now our sales records have proven it again. Since its introduction, shooters have bought more Remington Model 700's than any other center fire bolt action rifle on the market in its price class. And their reasons for buying make good sense. For example:

The Remington 700 bolt action is designed for the real rifleman. *The shooter* who wants the accuracy bonus of Remington's famous precision rifling and short, crisp trigger pull. *The hunter* who appreciates the comfort of a cheek piece and Monte Carlo comb on an all-purpose stock that gives superb balance and perfect alignment with either 'scope or open sights. *The craftsman* who loves the traditional beauty of fine checkering. And it has a beautiful wood finish that is tough, hard, scratch-resistant — gives lasting protection against hard usage and bad weather. The 700 owner also gets the world's strongest bolt action. The bolt head completely encloses the cartridge case in a ring of steel. And the Model 700 is available in 13 popular calibers.

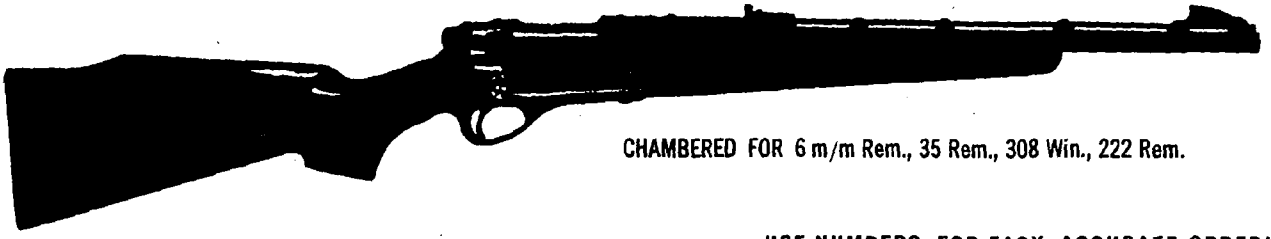
Packs more 1964 and Accuracy than any other Carbine in its class

REMINGTON

600



CHAMBERED FOR 6 m/m Rem., 35 Rem., 308 Win., 222 Rem.

GOOD LOOKS Model 600 has a new rugged look — every inch a rifle built to take it. It looks different and it is . . . in many ways. Notice the ventilated rib on the barrel. But there's more to it than looks. The rib, with its matted top surface, forms a "quick sight-line" that your eye just naturally follows — helps you get on a running target faster.

LIGHT WEIGHT There's none lighter — just 5½ well-balanced pounds which mean you can carry it all day and still finish fresh. This rifle is a carbine, it's short; you can handle it faster in heavy brush. Model 600 packs well, too; slips in a saddle scabbard, fits snugly in a car rack or in the cab of a pick up truck.

POWER Model 600 is available in four popular calibers — the brush-busting 35 Remington, powerful 6 m/m Remington, 308 Win. for big game; and the 222 Remington . . . a high velocity, flat trajectory cartridge that's rough on coyotes. To get the most from this cartridge, a rifle must be very accurate. Model 600 is! Other features like custom checkering and the world's strongest bolt action make it a gun you can't forget (and wouldn't want to). Why not see your dealer soon; he will be glad to show it to you.

USE NUMBERS, FOR EASY, ACCURATE ORDERING

Model 600 Carbine	Order Nos.	Retail Prices*
6 m/m Remington	5730	$99.95
35 Remington	5728	
308 Win.	5722	
222 Remington	5726	
Sling Strap & Swivels (installed)	5732	8.00

on fore-end and grip is fine-lined, uniform, good looking. We suggest you do as other smart gun buyers do, compare this checkering with that found on other makes of guns. Then judge for yourself.

with fluted comb means a better cheek-to-stock fit for quicker, surer sight alignment. Rich American Walnut Stock has all-purpose dimensions which give perfect alignment with either a scope or open sights. Functional shape of fore-end provides a good reliable, non-slip grip for steady holding.

Cartridge head is completely encased by a ring of solid steel. When bolt is closed, three rings of steel support the cartridge head. Strong? . . . there's none stronger.

— Only 5½ pounds but packs more power per pound than other carbines, from the brush-busting 35 Remington, powerful 6 m/m Remington and 308 Win. calibers, to the high velocity, flat trajectory 222 Remington coyote-walloping caliber. Carry it all day and at day's end you'll still be hunting — not just moving your feet.

It's the first time a domestic commercially produced sporting rifle has ever been designed with a ventilated rib. (Another first for Remington). It helps you aim, gives a definite sight-line so you get on running game faster.

— Short over-all length (37¼") makes Model 600 just right for hunting in heavy brush country because you can handle it faster, easier. It's a great saddle gun, too — fits a scabbard neatly or tucks in the rack of a pick-up truck.

Here's where Model 600 really shines. Free floating barrel of Remington proof steel is precision rifled to exact standards, by Remington's special methods. Trigger pull is short, crisp and clean. At the factory and in the field we shot close groups — and so will you. It was designed to shoot this way.

hugs the stock — doesn't stick out — slips in and out of scabbard with ease. Half knob is serrated on the bottom so you get a good secure grip. It's the same bolt handle as on the sensational Remington XP-100 pistol.

is conveniently located at the rear of the receiver where you can get at it in a hurry. Rearward for "safe". Forward for "fire."

with brass bead and sturdy U notch rear sight is adjustable for elevation and windage. Receiver drilled and tapped for scope and receiver sights.

is extra wide and corrugated; finger fits securely. Trigger pull is crisp and clean — no creep, no spongy action.

Ballistics obtained in the XP-100, 10½" barrel.

NOW... after years of Research & Development by America's Oldest Gunmaker

... a super-accurate, long range pistol that fires the new 221 Remington "Fire Ball" faster, farther and flatter than any handgun you ever held: The new and exciting REMINGTON XP-100 LONG RANGE PISTOL. Exclusively styled and designed with a one-piece stock of Du Pont "Zytel" — the "gunmaker's nylon" that gives a gun more durability, finest barrel-bedding (for greater accuracy) and lasting good looks — the XP-100 is new from butt to muzzle and made for new shooting satisfactions, extra sporting pleasures you've never had before.

It's exciting to shoot — exciting to own — and even exciting to look at. Built with the world's strongest bolt (three rings of steel support the cartridge head) this new gun and cartridge have been "cross-engineered" — made for each other, by Remington, to give you the power-and-precision no other pistol and load can deliver.

Price includes Zippered Carrying Case.

FEATURES

ROTATING THUMB-SAFETY Bolt handle cannot be raised to open action, trigger cannot be pulled, when on SAFE position.

VENTILATED RIB for improved sighting, "custom-crafted" appearance.

CUSTOM-STYLE CHECKERING, white spacers and diamond inlays enhance appearance and value.

INTERNAL FORE-END CAVITIES (5 of 'em) permit addition of weights to suit your personal shooting preferences. Cavities hold 38 caliber, 130 grain, metal case bullets (Remington Components Index Number B 22848).

MATCH TYPE TRIGGER with no backlash, no wobble . . . and it's grooved for a better finger feel. It's crisp — there's no lag in the let-off; extremely fast lock time.

SCIENTIFICALLY BALANCED to give minimum whip, jump and recoil. Grip is positioned at best position for steady holding . . . it's the comfort king of pistols.

ONE-PIECE STOCK OF DU PONT "ZYTEL" "the gunmaker's nylon" that gives a gun more durability, finest barrel-bedding (for greater accuracy) and lasting good looks.

WORLD'S STRONGEST BOLT same as featured on famous Remington center fire rifles.

RIFLE-TYPE REAR SIGHT is adjustable for windage and elevation.

UNIVERSAL GRIP fits either left—or right hand, is shaped to fit fingers and heel of hand.

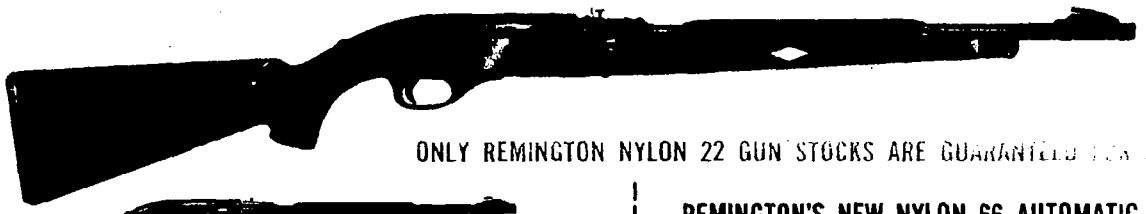
NYLON 22s

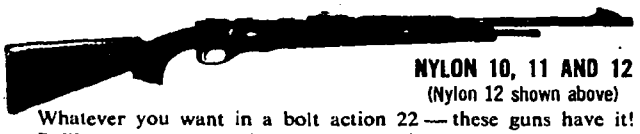
All made of Du Pont Zytel® Nylon



ONLY REMINGTON NYLON 22 GUN STOCKS ARE GUARANTEED

NYLON 76 "TRAIL RIDER"

Take a good look at Remington's rugged Nylon 76, first lever action 22 with built-in accuracy! The big difference is the accuracy advantage of structural nylon. This extra nylon stability lets Remington precision-fit stock to barrel with three-point bedding, the same principle that gives costly target rifles their accuracy. Comes in Mohawk Brown and Apache Black with chrome barrel and receiver.



NYLON 10, 11 AND 12

(Nylon 12 shown above)

Whatever you want in a bolt action 22 — these guns have it! Bull's-eye accuracy, ultra modern design and the years and years of rugged performance only Remington structural nylon and ordnance steel can give. Choose the single shot (Nylon 10) clip magazine (Nylon 11) or tubular magazine (Nylon 12). All are winners! Features? They give you plenty! Super-accurate three-point bedding . . . perfect checkering and inletting . . . streamlined, chrome-plated Mannlicher-type bolt handle . . . and unequaled features like handy top-mounted thumb safety, fully adjustable rear sight and receiver grooved for "tip-off" 'scope mounts. Shoot modern — Shoot Remington.

REMINGTON'S NEW NYLON 66 AUTOMATIC

Remington's new Nylon 66 is setting an amazing record in sales and customer acclaim. Here's why!

Structural-nylon is many ways better than conventional material for the gun's stock and fore-end. Because this super-strong material doesn't warp, the same barrel bedding principle used on the world's most expensive target rifles is yours. The result is an automatic that nails targets, tin cans and small game with tremendous accuracy. This is the same model rifle used to establish an accuracy record on hand-thrown 2½" wood blocks. Only six misses out of over 100,000 blocks thrown . . . and without a malfunction.

Receiver parts, stock and barrel are a bold interlocking of steel and structural nylon that creates the most trouble-free automatic action ever known. There's no need for lubrication because friction-free parts glide on "greaseless bearings" of nylon. Perfect checkering makes for fast, sure holding, and the convenient top-of-grip thumb safety slips off "safe" in a wink for running game shots. The handsome Nylon 66 has white diamond inlays and white line spacers at grip cap, butt plate and fore-end tip. Available in Mohawk Brown and Apache Black with chrome plated barrel and receiver.

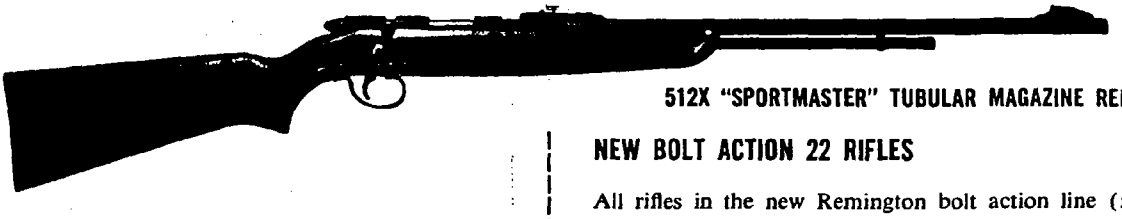
For Plinking, Target Shooting, or Hunting

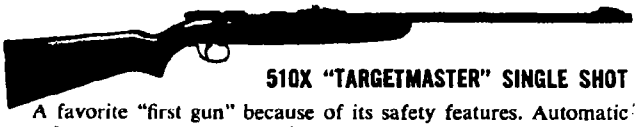
BOLT ACTION 22s



512X "SPORTMASTER" TUBULAR MAGAZINE REPEATER

NEW BOLT ACTION 22 RIFLES

All rifles in the new Remington bolt action line (models 510X, 511X, and 512X) have an American Walnut stock, new 24-inch precision barrel, fully adjustable rear sight and blade ramp front sight. In addition, the receiver is grooved for 'scope mounts and all rifles have a red dot firing indicator, side lever thumb safety, self cocking bolt, double cocking cams, double locking lugs, double extractors, bright steel bolt with swept back, sure-grip oval ball handle. Pick the one that suits you best; model 510X is a single shot, model 511X a 6-shot clip magazine repeater and 512X shown above is a big capacity tubular magazine repeater. All three have true Remington high quality throughout. See them at your dealer's. He'll be glad to point out their many exclusive features that make them excellent buys.



510X "TARGETMASTER" SINGLE SHOT

A favorite "first gun" because of its safety features. Automatic safety goes on when bolt is cocked and red dot shows when rifle is ready to fire. Also available in smooth bore model for shot cartridges.

511X "SCOREMASTER" CLIP MAGAZINE REPEATER

HOLDS 6 cartridges; short, long or long rifle.

MODEL 514

Here is an excellent 22 caliber rifle . . . at a popular price. It's a single-shot bolt action model with self-cocking bolt, rotary thumb safety and takes all 22 caliber cartridges — short, long or long rifle; standard velocity or high speed. For the young shooter, it's also available as Model 514 BR "Boy's Rifle" with cut down stock.

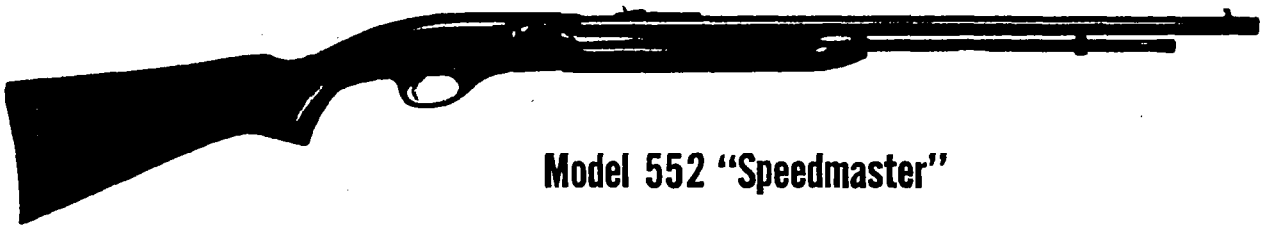
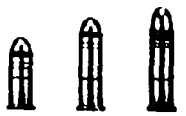
AUTOMATIC

1964

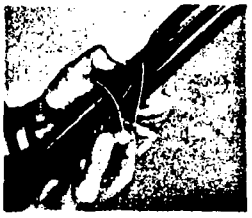
Rapid Fire
Extra Rugged
Dependable



Model 552 "Speedmaster"

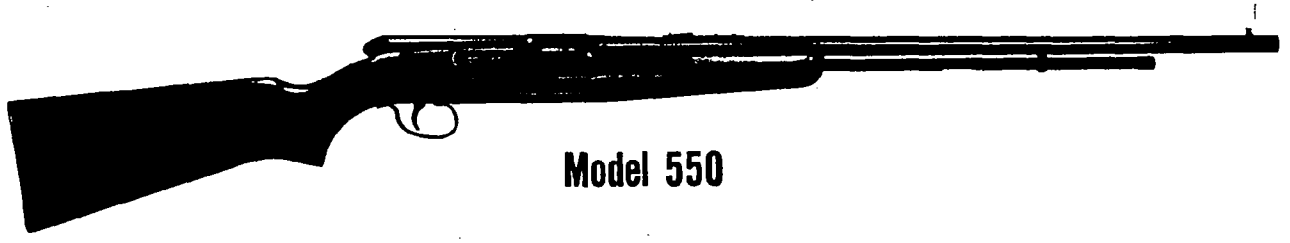


VERSATILE. Shoots 22 Short, Long and Long Rifle cartridges interchangeably without adjustment. Load 'em up in any order and start shooting. Your trigger finger does all the work.



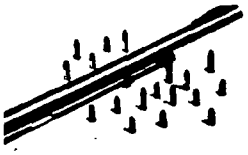
SINGLE LOADING — AUTO EJECTION. For use as a single shot rifle, pull back bolt, drop cartridge into the ejection port, release bolt and you're ready to shoot. Empty cartridge case will be ejected automatically.

Here's the Remington 22 caliber automatic that's fast shooting, accurate, nicely balanced . . . the rifle you'll want for small game hunting, controlling crop-destroying and marauding pests, or for just plain fun-shooting. The Model 552 is another member of Remington's "family of guns"; looks, handles and shoots like its big brother, the Model 742 big game rifle. "Speedmaster" has every feature the shooter wants, such as: twenty shots as fast as you can squeeze the trigger, rich walnut stock, cross bolt safety, receiver grooved for "tip-off" 'scope mounts. Also available in the short barrel (21") carbine model and the Gallery Special. Pick a Model 552 off the rack at your dealer's — heft it — throw it to your shoulder. We think you'll agree, it's the rifle that "feels right" . . . because it's made right.



Model 550

Rapid fire, extra ruggedness and dependability are points shooters like about this Remington automatic. It's the famous 22 caliber rifle that shoots Short, Long and Long Rifle cartridges with no adjustment. Mix them up, drop them in the tubular magazine and fire away. Model 550 takes 'em as they come. Other fine features are: Large capacity, up to 22 Shorts, American walnut stock, fine accuracy, thumb safety, receiver grooved for "tip-off" 'scope mounts. The Model 550 is well-built, well-designed — an exceptionally fine all-around rifle for the hunter or plinker . . . and good for week-end family fun, too.



This rugged and dependable automatic will handle, interchangeably and without adjustment, Short, Long and Long Rifle cartridges.

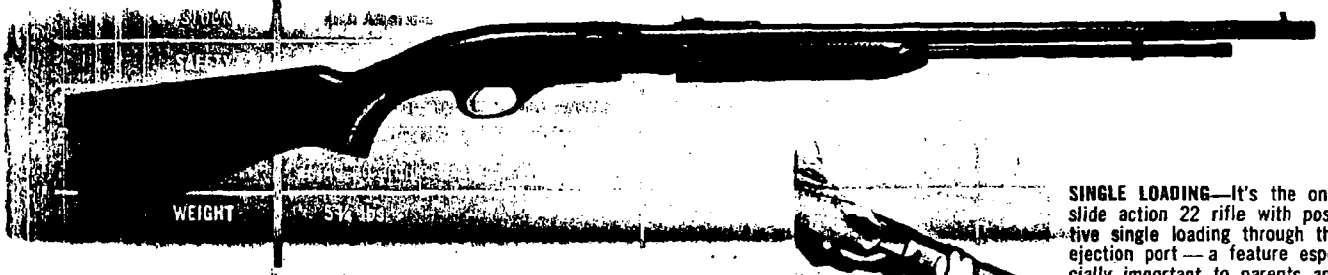
PUMP ACTION



Model 572 "Fieldmaster"

SINGLE LOADING—It's the only slide action 22 rifle with positive single loading through the ejection port — a feature especially important to parents and shooting instructors.

For the shooter who likes a pump action 22 caliber rifle, the "Fieldmaster" Model 572 is best . . . action is slick and smooth. Exclusive cartridge feeding design prevents jamming, permits easy single loading. By simply removing the inner magazine tube, parent or instructor can convert the "Fieldmaster" into a single shot rifle. Receiver has dovetail grooves for "tip-off" 'scope mounts. Capacity is large; tubular magazine holds 20 short, 17 long or 15 long rifle cartridges. It has a cross bolt safety conveniently located at the rear of the trigger guard where it can be snapped on or off with the index finger. The Model 572 is beautifully streamlined and balanced — rugged and dependable like Remington big game rifles and shotguns. Also available with a smooth bore barrel.

FAST, POSITIVE ACTION — short stroke operation is fast and smooth . . . ideal for plinking or for getting off quick shots at hard-to-hit game. The Model 572 "Fieldmaster" shoots as fast as you can flick the fore-end.

SHOOTERS FORGET—but a "Fieldmaster" won't. For extra safety it's designed not to fire if the trigger is pressed while the action is being closed. Trigger must be released and pressed for each shot.

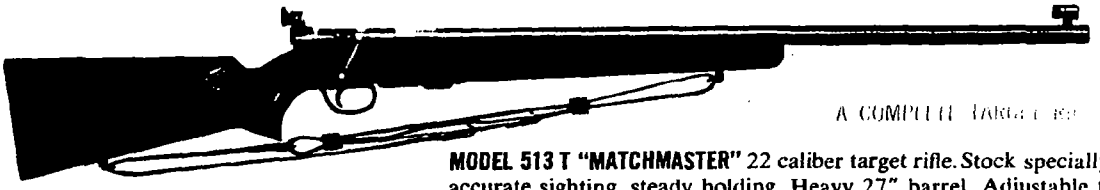
Model 40XB World's Most Accurate Target Rifle

Here is the sensationally accurate Remington Model 40XB that is taking top honors in the United States and at International matches throughout the world. It reflects all that Remington is famous for . . . craftsmanship, precision design, quality materials, attention to details. The 40XB is truly a target rifle that only Remington — the nation's oldest gun maker could create. Features are:

Bolt action single-shot with loading platform: Specially selected long-wearing ordnance steel barrel, with new precision rifling. Choice of standard or heavy barrel. Custom-style stock with high comb giving same sighting plane for iron and telescope sights. Comb grooved for easy bolt removal. Mershon White Line non-slip rubber butt plate.

Built-in adjustable bedding device. Adjustable sling swivel. Extra-strong bolt with heavy, over-size locking lugs insuring constant headspace. Double extractors. Loading platform gives absolutely straight-line feed. Adjustable, crisp trigger with positive click adjustments for weight of pull. Thumb safety. Large, strong receiver drilled and tapped for standard sight mounts — telescope and iron. Redfield Olympic front and rear sights optional. Greatly increased distance between 'scope blocks gives improved sight adjustment. Barrel length 28". Stock length 33". Overall length 47". Weight without Redfield Olympic sights: heavy barrel rifle 12 lbs., standard barrel rifle 10 lbs. Weight with sights: add 12 oz.



A COMPLETE TARGET [illegible]

MODEL 513 T "MATCHMASTER" 22 caliber target rifle. Stock specially proportioned for accurate sighting, steady holding. Heavy 27" barrel. Adjustable trigger pull. 6-shot box magazine. Redfield front and rear sights. 1¼" leather sling, adjustable front swivel. Length 45". Weight about 8¾ pounds.

A FINE COMBINATION HUNTING [illegible]

MODEL 521 T — Remington's lowest-priced target 22 — and it's convertible! Just remove target aperture from micrometer rear sight and you have a fine hunting rifle with peep sight. Patridge-type front sight. 6-shot box magazine, 1 shot in chamber gives 7-shot capacity. Complete with sling strap, adjustable swivel. Chambered for 22 long rifle only.

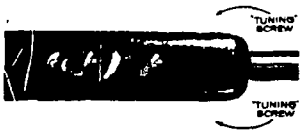
INTERNATIONAL FREE RIFLE [illegible]

Center Fire Calibers: 222 Rem., 222 Rem. Mag., 7.62 m/m, 30-06 and others on special order.

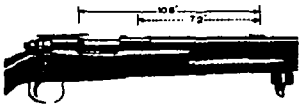
40XB type action, precision heavy barrel, rough-turned laminated stock, a Remington designed adjustable butt plate with interchangeable rubber plate and hook, adjustable palm rest, adjustable front sling swivel, 2-ounce trigger. Left-hand stock supplied at $25 extra cost.

R2525122

1964



"GROUP TIGHTENER" . . . first production rifle ever made with convenient built-in bedding device. Adjustment of "tuning" screws can be done manually with small screw driver.



GREATER DISTANCE between telescope blocks means 50% finer sight adjustment. Reduces "sighting-in" errors. Photo shows difference between old 7.2" inter-mount radius and more precise 10.6" inter-mount radius on Model 40XB.

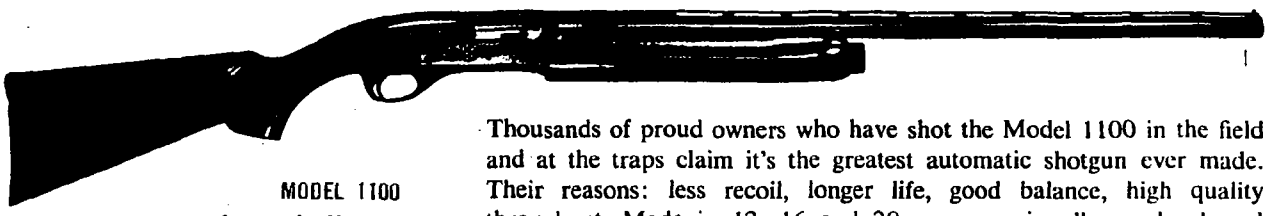
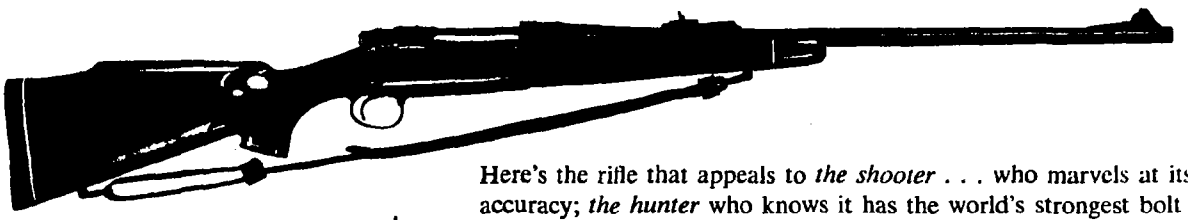
REMINGTON Presents.... NEW GUNS....

1964



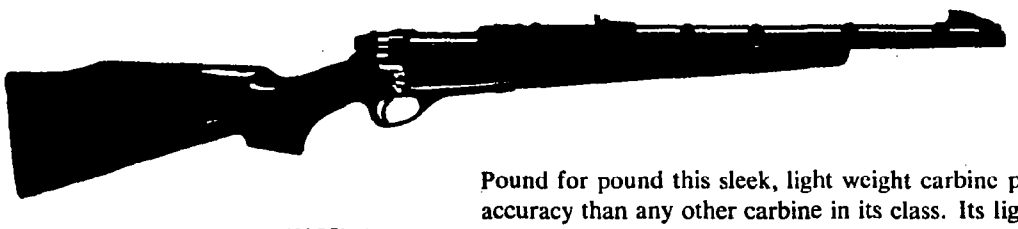
MODEL 1100
Automatic Shotgun

Thousands of proud owners who have shot the Model 1100 in the field and at the traps claim it's the greatest automatic shotgun ever made. Their reasons: less recoil, longer life, good balance, high quality throughout. Made in 12, 16 and 20 gauges — in all popular barrel lengths, chokes and models.



MODEL 700
Big Game Rifle

Here's the rifle that appeals to *the shooter* . . . who marvels at its great accuracy; *the hunter* who knows it has the world's strongest bolt action with power to take any North American game; and *the craftsman* who appreciates the traditional beauty and workmanship of this rifle. Available in 13 most wanted calibers.



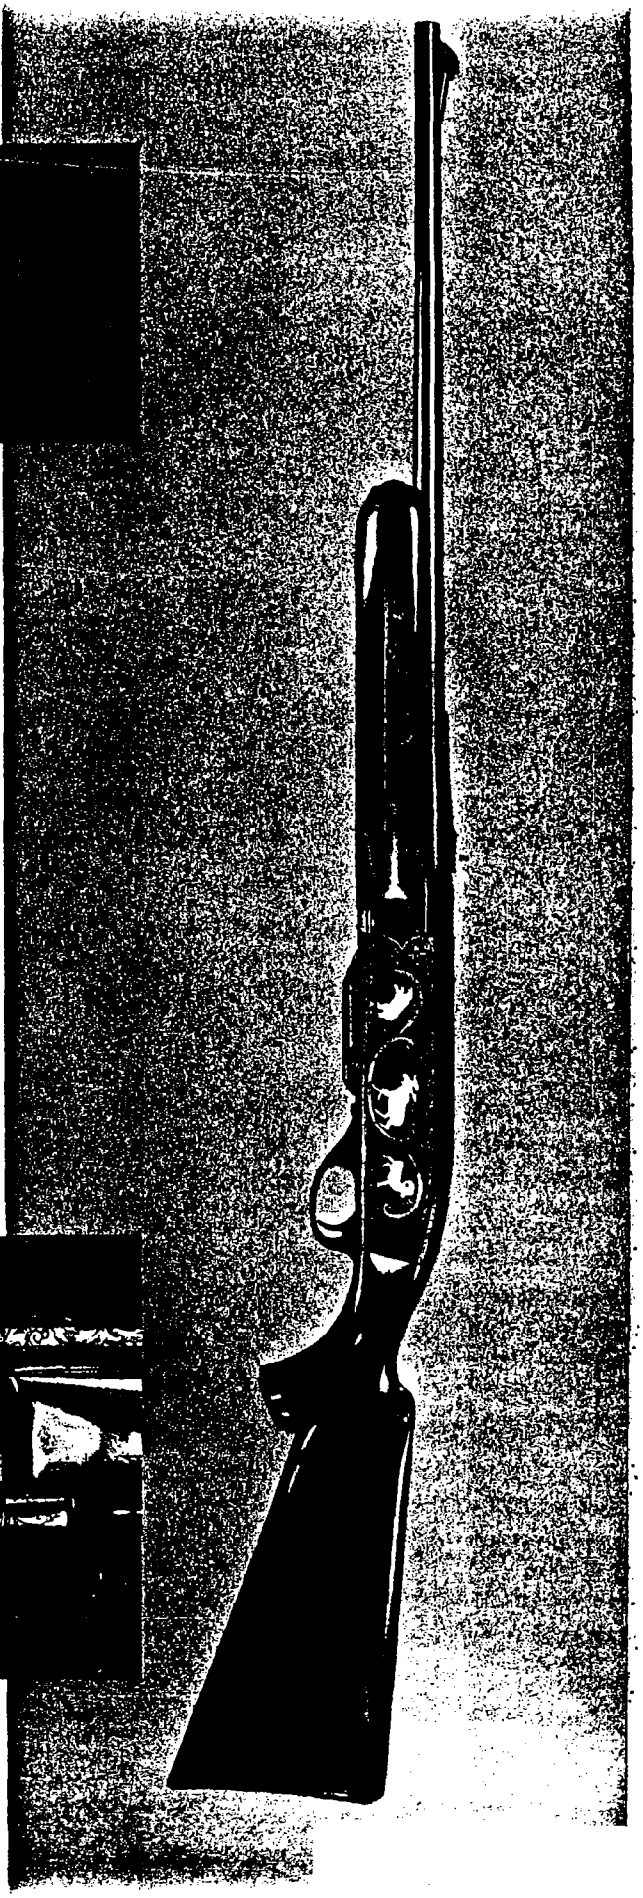
MODEL 600
Powerful, Light Weight Carbine

Pound for pound this sleek, light weight carbine packs more power and accuracy than any other carbine in its class. Its light weight and carbine length make it the ideal brush gun; tucks nicely in a saddle scabbard, too. Now in 35 Remington, 6 m/m Rem., 308 Win. and 222 Remington calibers.

R2525124

1964

HIGH GRADE GUNS



THE FINEST! As appreciative sportsmen and shooters well know, gunsmithing is both an art and a craft. Since 1816, succeeding generations of Remington master gunsmiths have contributed accuracy, reliability, handling ease and handsomeness to the unmatched reputation of Remington products.

Today's high grade Remington guns reflect this great tradition of the artisan-gunmaker: The "Woodsmaster" F Premier Grade automatic big game rifle is just one example of the extra quality available to shooters who enjoy owning the finest. Hand-engraved receiver and barrel, game scenes, custom hand checkering, matched American walnut stock and fore-end . . . all these superiorities make it obviously the finest, undeniably a Remington.

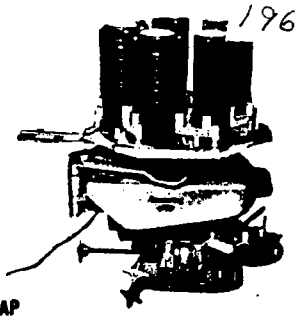
1964

Trap & Skeet

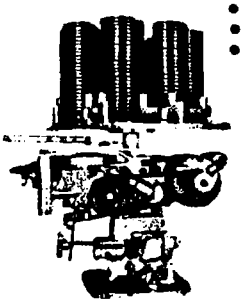


MODEL M100T FOR TRAP

1 Remington autoloading trap with ½ HP motor, 60 cycle, 115 volts, and special auto-angling base. 1 push button release unit with 100 feet of wire. 1 power control box.

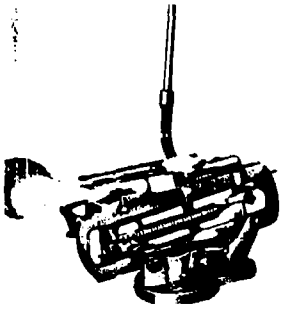
REMINGTON AUTOLOADING TRAP

- Labor-saving *(no trap boy needed)*
- Large capacity (203 targets)
- Easy loading, stack at a time
- Connects to 110 volt wiring system
- No tools required
- Makes commercial gun clubs profitable!



MODEL A200S FOR SKEET

2 Remington autoloading traps with ½ HP motors, 60 cycle, 115 volts. 1 walk around release unit and 80 feet of wire. 2 power control boxes. 1 connection box.



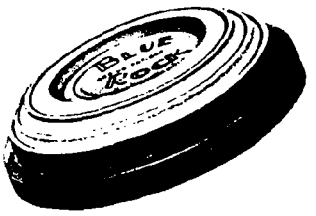
REMINGTON "WONDER" TRAP

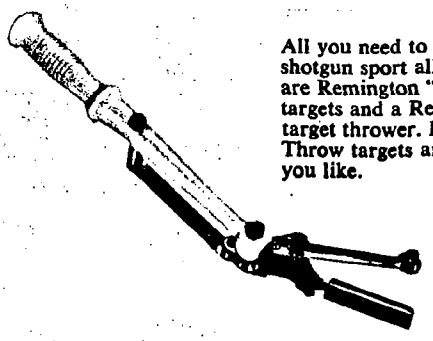
For straight trap and skeet. Tested in service . . . proved in practice. "Wonder" trap meets every requirement. Less vibration, automatically "sets" itself. Instant adjustment.

REMINGTON "WONDER" TRAPS FOR SKEET SHOOTING

Two Remington "Wonder" traps with Remington's exclusive Singlever manual control, all other accessories. Also Remington Electric release.

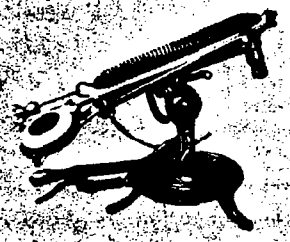
The new Remington square shoulder "Blue Rock" has weight where weight belongs! Dome of target is thin, rim is heavier, giving greater stability, more spin. More pronounced shot rings on dome catch shot — targets break easier when hit by only a few pellets. All adding up to higher scores!





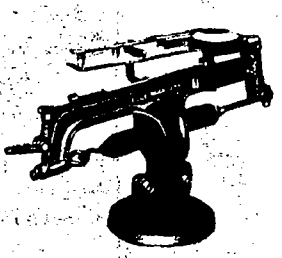
All you need to enjoy shotgun sport all year round are Remington "Blue Rock" targets and a Remington target thrower. Easy to use. Throw targets any way you like.

Remington, Wingmaster, Power-Matic, Woodsmaster, Gamemaster, Speedmaster, Rangemaster, Matchmaster, Fieldmaster, Scoremaster, Sportmaster, Targetmaster, Target, Power Piston, Blue Shot, Core-Lokt, Blue Rock, Expert, Wonder, Kleanbore, Brushmaster and Jet are trademarks registered in the United States Patent Office. XP-100, Fire Ball, Rib-Lokt, Express, Nylon 10, Nylon 11, Nylon 12, Nylon 66, Nylon 76, Hi-Speed, Golden, H wad and Spatter-less are trademarks of Remington Arms Company, Inc., Bridgeport 2, Conn. Zytel is a registered trademark of E. I. du Pont de Nemours & Co. for nylon resins.



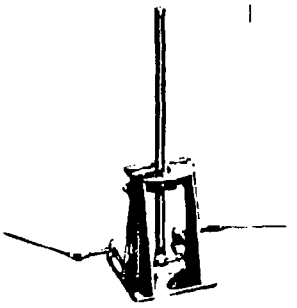
REMINGTON "EXPERT" TRAP

A strong, lightweight, sturdily built portable trap. Smooth operating. Just right for use at summer camps, cottages, aboard boats, or for trips into the country. Fine for "walk up" shooting games.



REMINGTON "BLUE ROCK" TRAP

For straight trap and skeet. Throws either doubles or singles. Ideal for small clubs or private estates. Available also as complete skeet outfit: 2 "Blue Rock" Traps and Remington's exclusive Singlever Pull for manual operation.



MANUAL RELEASE for "Wonder" or "Blue Rock" Outfits

Simple to attach and easy to use, the Remington Singlever Pull is especially designed for manual operation of the "Wonder" Skeet Outfit. Easily and quickly converted to electric operation.

THE COVER — The pronghorn antelope scene shown on the cover is reproduced from an original painting by Bob Kuhn, famous outdoor artist and sportsman. Our pronghorn antelope (Antilocapra americana) is truly an All-American, for this fine western prairie animal is found nowhere except in North America. They have super-sharp eyesight and their fleetness is also extraordinary; forty miles per hour is not unusual and in short bursts they have been clocked doing sixty miles per hour. For speed, they're the champs; fastest of all big game in America. Back in the twenties, the pronghorn population was in trouble, but today, due to wise conservation practices, and stringent hunting laws, the antelope has made a strong come back; they're at their peak — in range capacity. States that have large herds are Wyoming, Montana, New Mexico, Texas, Idaho, Oregon, South Dakota, Nevada, Colorado and Arizona.

REMINGTON

Model 1100

AUTOMATIC SHOTGUN

1965

Large 5-Shot Capacity In 12, 16 and 20 Gauges

Up to 55% Less Recoil than Fixed-Action Guns

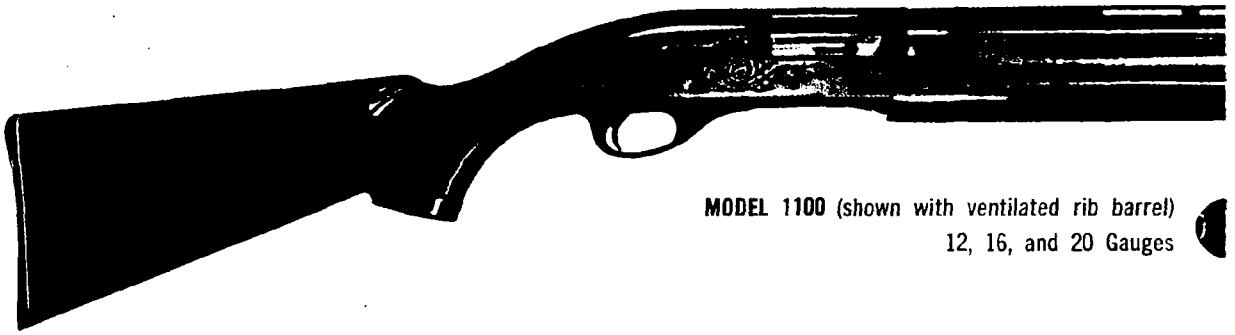
Shooters throughout the country have made the new Remington Model 1100 the "most popular" — "most wanted" automatic shotgun . . . and for good reasons, too. For example, duck and goose shooters, dove and quail hunters; gunners who swung the 1100 on pheasants and small game all last season tell us:

"It works, never jammed on me once, and I hunted every weekend."

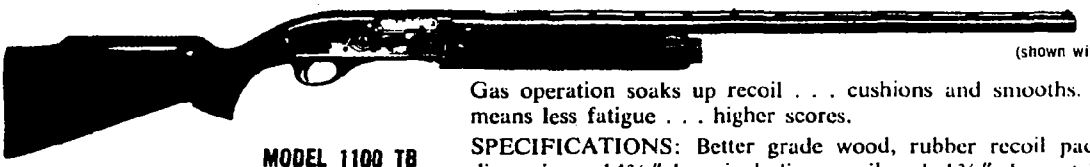
"Recoil is light" writes a trap shooter. "My boy says the kick doesn't bother him a bit . . . and it doesn't. He's shooting better than ever." Light recoil also pays off in doubles, too; for the trap shooter, skeet shooter and the hunter. Where that second shot counts — you can count on the Model 1100.

"Finish is good — stands up" reports a West Coast duck and goose shooter who shot it throughout the season . . . "And we get some mighty wet weather out here . . . it's tough on almost everything."

"It's a beautiful gun" — is a typical comment. And no wonder — with its fine-lined checkering, DuPont RK-W wood finish, scroll work, steel receiver, white line spacers and tear drop pistol grip. Shooters are proud of this gun, in the field, and in their gun rack. You'll be too. Your dealer's got 'em in 12, 16, and 20 gauges, with both plain and ventilated rib barrels.



MODEL 1100 (shown with ventilated rib barrel)
12, 16, and 20 Gauges

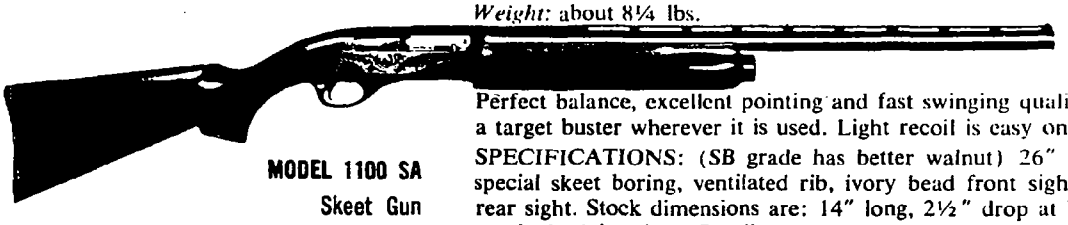


12 GAUGE ONLY
(shown with Monte Carlo stock)

MODEL 1100 TB
Trap Gun

Gas operation soaks up recoil . . . cushions and smooths. And less recoil means less fatigue . . . higher scores.

SPECIFICATIONS: Better grade wood, rubber recoil pad. Special stock dimensions: 14⅜" long including recoil pad, 1¾" drop at heel, 1⅜" drop at comb. Available in 28" and 30" full choke and 28" modified choke, ventilated rib barrels only. Ivory bead front sight, white metal rear sight. Also available with optional Monte Carlo stock at extra charge. *Weight:* about 8¼ lbs.

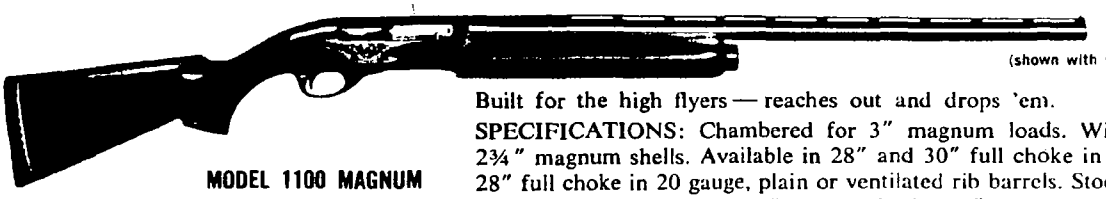


12, 20 GAUGE

MODEL 1100 SA
Skeet Gun

Perfect balance, excellent pointing and fast swinging qualities make this gun a target buster wherever it is used. Light recoil is easy on the shoulder, too.

SPECIFICATIONS: (SB grade has better walnut) 26" barrel. Remington special skeet boring, ventilated rib, ivory bead front sight and white metal rear sight. Stock dimensions are: 14" long, 2½" drop at heel, 1½" drop at comb. *Weight:* about 7½ lbs.



12, 20 GAUGE
(shown with ventilated rib barrel)

MODEL 1100 MAGNUM
Duck Gun

Built for the high flyers — reaches out and drops 'em.

SPECIFICATIONS: Chambered for 3" magnum loads. Will also handle 2¾" magnum shells. Available in 28" and 30" full choke in 12 gauge, and 28" full choke in 20 gauge, plain or ventilated rib barrels. Stock dimensions: 14" long including pad, 2½" drop at heel, 1½" drop at comb. Furnished with recoil pad. *Weight:* about 7¾ lbs.

AVERAGE WEIGHT	12 ga. - 7½ lbs.; 16 ga. - 7¼ lbs., 20 ga. - 7 lbs.

on stock and fore-end . . . fleur-de-lis design. Checkering is fine-lined, uniform, good looking.

with attractive white diamond inlay provides a natural, non-slip, comfortable grip.

has swept back, streamlined design. Fine checkering and fluting give secure gripping area.

on butt plate and grip cap add attractiveness.

looks better, wears better . . . because the metal is more highly polished.

— Easy to load. Four in magazine . . . one in chamber. Three-shot plug furnished.

— Performs perfectly for different loads; automatically — Shoots high base, low base, 2¾" magnum shells without adjustment.

— They're interchangeable in seconds; no factory fitting is required. Use one gun for all your shooting and get more game, targets, sport.

— Drop a shell in the breech; load another in the magazine in one motion. Load five shells in five seconds.

— Gas action tames recoil; it smooths and cushions . . . and with no loss of power.

— New DuPont wood finish is clear. Lets the wood grain show through. It's similar to that used on bowling pins; tough, hard, scratch-resistant . . . gives lasting protection against hard usage and bad weather.

is made from a solid block of steel for extra strength, ruggedness, dependability.

— Chambered for 3" magnum shells. Uses 2¾" magnums too. A rugged, dependable shotgun . . . reaches out and drops the high flyers.

on receiver and bolt adds real beauty and value to this gun.

— The gas operation of this gun is unusual. It blows dirt and grime away, keeps action bright and shining for long periods of time.

— Tests prove the shooting life of this new gun is up to seven times longer than any other automatic shotgun on the market.

are just right, only 7½ lbs. in 12 gauge. Can be carried comfortably all day. No sacrifice of steel in barrel or receiver . . . not a "featherweight floater" that's too light to point right.

REMINGTON

Model 11-48

AUTOMATIC SHOTGUN

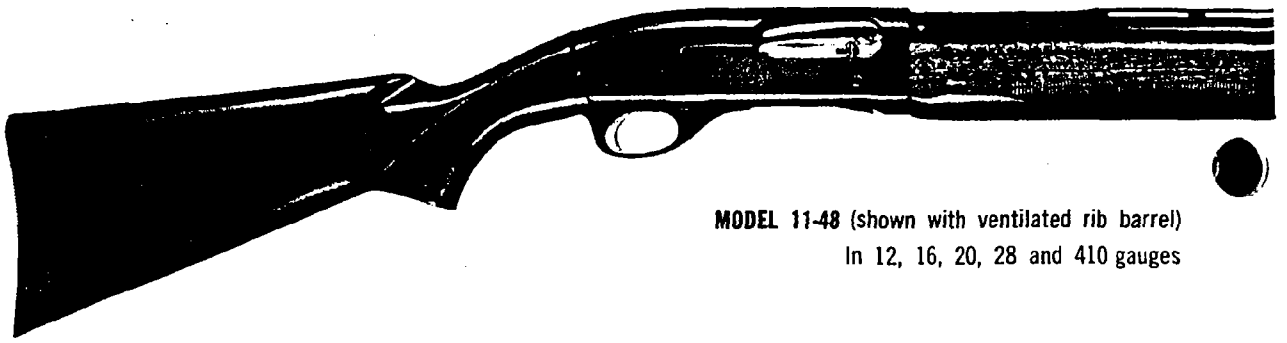
1965

The Remington Model 11-48 is an automatic shotgun with a fine reputation that has been earned in the field and wherever skeet targets are thrown. Over a half million proud owners are our best salesmen and they'll tell you the 11-48 is one of the finest automatics on the market. And it is!

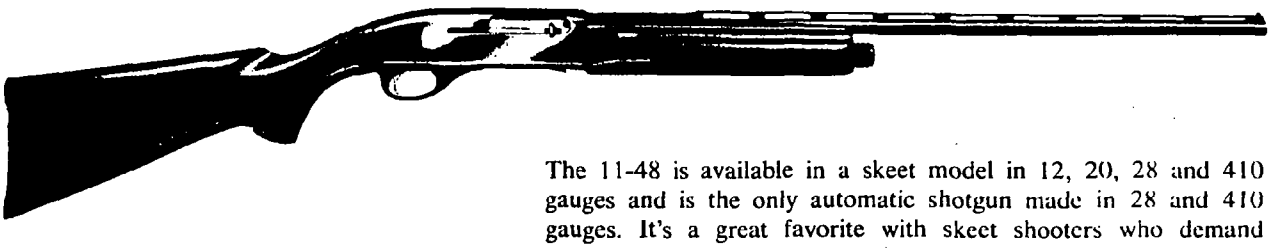
It's the only automatic made in 12, 16, 20, 28 and 410 gauges and in the 28 and 410 gauges it's a big favorite with skeet shooters, youngsters, women . . . and hunters who like a small bore shotgun. And speaking of Remington automatic shotguns, they have won more National Skeet Championships than all other brands put together. Here is where shot-after-shot dependability really counts.

Model 11-48 is an excellent value . . . you get a lot of gun for the money, such as: Custom fine-lined checkering, receiver milled from a solid block of steel, rich American Walnut stock and fore-end, 5-shot capacity (in 12, 16 and 20 ga.) and it shoots all brands of ammunition, high and low base, rifled slugs and standard length magnum shells . . . all without adjustment.

Barrels are interchangeable, too. Takes only a minute to change them and you can do it right in the field. No special tools or factory fittings are required. Dependability, ruggedness, lightweight, fine balance, good looks . . . that's the Remington Model 11-48, a gun that's built the "Remington Way" — to last!



MODEL 11-48 (shown with ventilated rib barrel)
In 12, 16, 20, 28 and 410 gauges



MODEL 11-48 SA
Skeet Gun
Available in 12, 20, 28 and 410 gauges
(410 gauge shown above)

The 11-48 is available in a skeet model in 12, 20, 28 and 410 gauges and is the only automatic shotgun made in 28 and 410 gauges. It's a great favorite with skeet shooters who demand supreme dependability in the guns they shoot. The Model 11-48 has everything the skeet shooter wants . . . fine balance, excellent pointing qualities, ruggedness . . . plus many other features that all add up to higher scores.

SPECIFICATIONS: 26″ barrel (25″ on 28 and 410 gauges) Remington special skeet boring, ventilated rib barrel, ivory bead front sight and white metal rear sight. Stock dimensions: 12 and 20 gauge, 14″ long, 2½″ drop at heel, 1⅝″ drop at comb. 28 and 410 gauges, 13⅞″ long, 2⅝″ drop at heel, 1⅝″ drop at comb. Weight: 12 ga. — 7¼ lbs., 20 ga. — 6½ lbs., 28 and 410 ga. — 6¼ lbs.

REMINGTON
Model 870
PUMP ACTION SHOTGUN

Receiver Machined from Solid Steel in 12, 16 and 20 Gauges

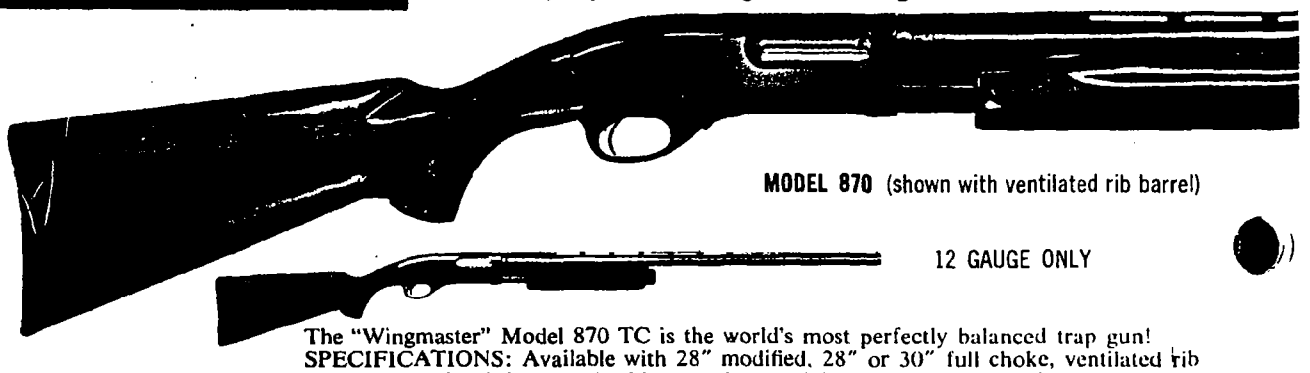
1965

Time for a new pump gun? If it is — and you're looking . . . we'd like to help. First of all you want a gun that shucks shells at the flick of your wrist — a gun that's got twin action bars and pumps like a ball-bearing action without twisting or binding. There is a gun like this. It's the slick Remington Model 870!

Want one that's going to last? Of course. Then pick a pump that has a receiver machined from a solid block of steel if you want strength and ruggedness. That's the way a Remington 870 is built . . . we don't make them any other way.

Chances are you'll want to use that gun on different kinds of game. That means interchangeable barrels you can change in seconds — right in the field and without any factory fitting or special tools. With a Remington 870 "Wingmaster" it's so easy — anyone can do it.

Everyone wants a good-looking gun. The 870 is a stand-out in any company and here's why: Custom fine-lined checkering with fleur-de-lis design, rich American Walnut stock and fore-end, and Du Pont-developed RK-W wood finish similar to that used on bowling pins. A Remington 870 pump is one of the best investments you can make in shooting enjoyment — for yourself — as a gift — or, some day, as a pass-along gun to that youngster of yours. So, for good hunting this season, why not take along a new Remington Model 870.



MODEL 870 (shown with ventilated rib barrel)

12 GAUGE ONLY

"WINGMASTER" MODEL 870 TC
Trap Gun

The "Wingmaster" Model 870 TC is the world's most perfectly balanced trap gun!
SPECIFICATIONS: Available with 28" modified, 28" or 30" full choke, ventilated rib barrel. Ivory bead front and white metal rear sight. Recoil pad. Special target grade sear, hammer and trigger assembly. Stock dimensions: 14⅜" long including recoil pad, 1⅞" drop at heel, 1½" drop at comb. Highly figured and finished American Walnut with finely checkered stock and fore-end. Hand fitted action and parts. Will furnish made to order stock lengths from 13½" to 14¾" on Model 870 TC only, without extra charge. *Weight:* about 8 lbs. This model also available in TB grade 14⅜" stock only, lower price. Both models available with optional Monte Carlo stock at extra charge.

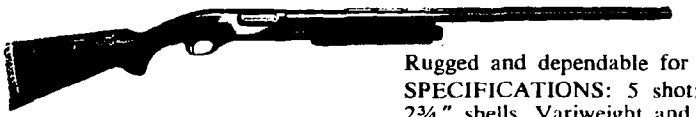
"WINGMASTER" MODEL 870 SA
Skeet Gun

The Model 870 SA, most perfectly balanced pump action shotgun, is ideal for fast second shots at skeet or upland game. Also available in SC grade with specially selected wood and hand checkering.
SPECIFICATIONS: (12 and 20 Gauges) *26" barrel. Remington Special Skeet Boring* Ventilated rib with ivory bead front and white metal rear sight. Stock dimensions: 14" long, 2½" drop at heel, 1⅝" drop at comb. *Weight*: 12 gauge about 7 lbs., 20 gauge about 6½ lbs.

12 GAUGE, WITH RIFLE SIGHT BARREL

"BRUSHMASTER" MODEL 870
Deer Gun

The Model 870 Deluxe "Brushmaster," made specially to handle rifled slugs and buck shot, is the latest in smashing power for those fast shots in brush country.
SPECIFICATIONS: The same as standard 870 except as follows: Lightning-fast 20" barrel with fully adjustable rifle-type sights. Stock fitted with rubber recoil pad and white line spacer. Also available in standard model with rifle sights.



12 AND 20 GAUGES

"WINGMASTER" MODEL 870 MAGNUM
Duck Gun
(shown with ventilated rib barrel)

Rugged and dependable for long range shooting! For geese and ducks.
SPECIFICATIONS: 5 shot; chambered for 3" Magnum shells — will also handle 2¾" shells. Variweight and wood 3 shot plug. 12 ga. with 28" and 30" full choke, plain or vent. rib barrel. Steel bead front sight, rubber recoil pad. Checkered stock and fore-end. Stock: 14" long including pad, 2½" drop at heel, 1⅝" drop at comb. 20 ga. furnished in 28" full choke vent. rib and plain barrels. *Weight*: 12 ga. about 8 lbs., 20 ga. about 7½ lbs., including variweight plug.

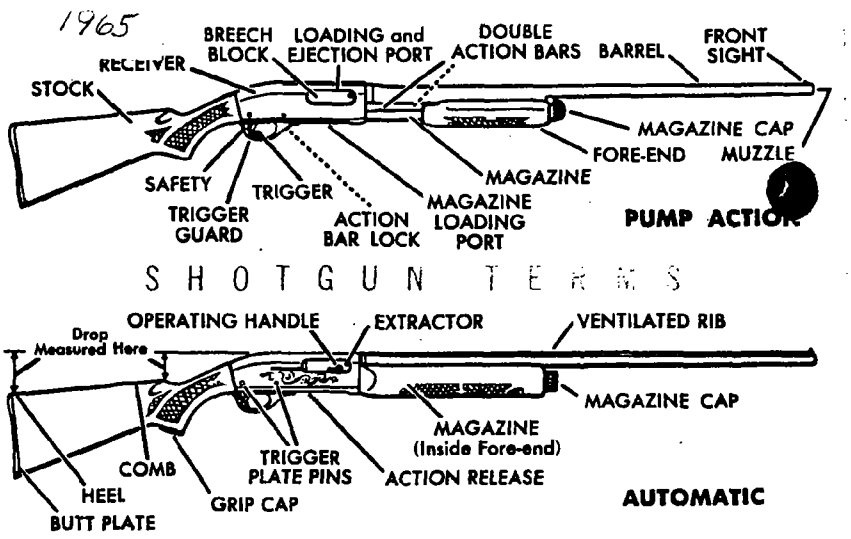
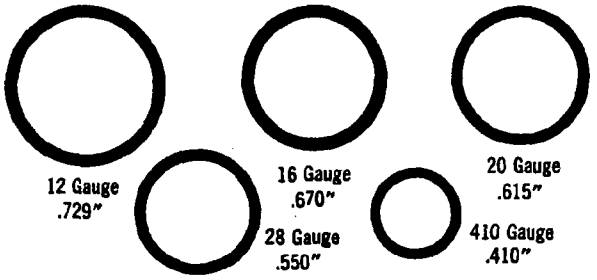
R2525134

GAUGES, CHOKES and BARRELS



GAUGES — Shotguns are made in several well-known gauges, 12, 16, 20, 28 and 410. Other gauges have been made in the past but are not at present in common use. These include 4, 8, 10, 14, 24 and 32 gauges.

The unit of gauge measurement is based on numbers of uniform lead balls weighing one pound. 12 gauge is approximately the diameter of a lead ball of which 12 weigh one pound, 16 gauge is the diameter of a lead ball of which 16 weigh one pound, etc. The one exception is 410 gauge, which is actually 410 caliber. In terms of gauge, it would be 67 gauge. Measurements of minimum bore diameters in thousandths of inches are as follows:



SHELL LENGTH is measured in inches, in terms of the overall length of fired shell, with the crimp open. A 2¾" shell measures about 2½" to 2⅝" before it is fired, but 2¾" overall after firing. This method of measuring has been adopted to conform to standard chamber lengths of shotguns. A gun with a 2¾" chamber will thus handle shells of the proper gauge up to 2¾" length.

PATTERN — Pattern is the spread of shot pellets at any given yardage. All loads with the exception of 410 and skeet are tested for pattern at 40 yards. 410 and skeet loads are tested at 25 yards. The percentage of the total shot charge registering within a 30" circle (20" for 410) at these distances determines the quality of a pattern. No two patterns will be exactly the same. Average results should be taken from at least 25 patterns.

CHOKE — Choke is partial constriction of the bore of a shotgun barrel at the muzzle end. Its purpose is to control patterns. By using different degrees of choke boring, it is possible to control the spread of the shot charge for the best distribution of pellets at various ranges. For example, the bore diameter of a 12 gauge gun is .729". If the diameter at the muzzle end is reduced to .694", the constriction of .035" (difference) will control the shot sufficiently to give patterns averaging about 70% of the shot in a 30" circle at 40 yards. This is known as full choke boring, and is intended for long range shooting. The following table shows the percentage of shot that can be expected in the various choke borings:

CHOKES	% at 40 yards in 30" circle
Full Choke	70
Modified Choke	60
Improved Cylinder	50
Cylinder	40

CHOKE USES — A shooter should select the degree of choke boring for his barrel according to the range at which most of his shots are taken. Some kinds of birds and small animals are usually shot at close range, others at long range. Also, some persons are inclined to shoot quickly, while others tend to "ride" their game or targets. Most hunters find the following borings give the best results, though much depends on shooting conditions and personal preferences.

Full Choke .....ducks, geese, pheasant, crows, turkey, fox, racoon, trap shooting.

Modified Choke .....rabbit, woodcock, doves, squirrels, also all-round usefulness including ducks, quail, etc.

Improved Cylinder, Special Skeet .....quail, grouse, partridge, rail, skeet shooting, guard duty, riot, rifled slugs.

BARREL LENGTH — Shotgun barrels are usually supplied in 26, 28, and 30 inch lengths; also 20 and 26 inch lengths with rifle sights. The longer barrels are often preferred for long range shooting because the greater length gives a longer sighting radius, permitting more accurate pointing. Long barrels also minimize discomfort of muzzle blast, and the added weight reduces recoil. Short barrels are often preferred for close range shooting because they are easier to handle for quick shots . . . especially in heavy brush.

It is not practical to cut off a shotgun barrel. To do so will change the shooting qualities of the gun because the choke constriction is within the last two inches at the muzzle end. It is also impractical to cut down the length of the barrel and then attempt to restore the original degree of choke boring because the metal necessary for this will already have been reamed out at the time of manufacture.

A barrel may be rebored from one degree of choke to a more open degree, full to modified, modified to improved cylinder, etc., as long as the barrel length is left unchanged.

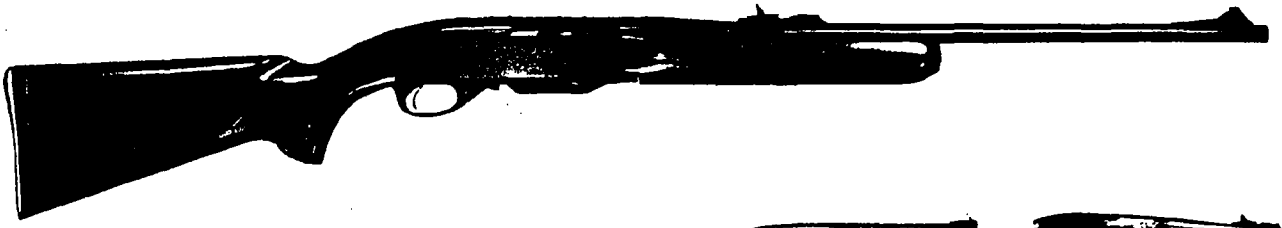
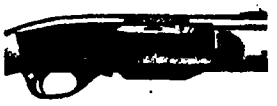
Model 742 "WOODSMASTER"

1965

...e Most Powerful Automatic Big Game Rifle

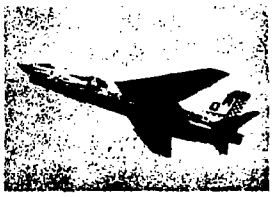


IF YOU'RE AN AUTOMATIC FAN . . . then the 742 "Woodsmaster" is your gun. There's meat in camp whenever you're shooting the Remington Model 742 Automatic . . . the modern rifle that's built for speed and power. You're packing a ton and a half of muzzle energy in the world's most powerful automatic hunting rifle — the only one that handles the pile-driving force of that All-American 30/06 Springfield cartridge (available in 9 bullet weights and styles for every kind of American game from woodchucks to grizzlies). Fast, gas-operated action soaks up recoil. No tooth-rattling "kick", no loss of power and almost no muzzle whip. That's why you're back on target before your trigger finger can squeeze off a second shot. The 742 Automatic lets you concentrate on aiming and not on working the action. In fact, this modern light weight Remington powerhouse actually reloads itself faster than you can shoot! Doubt it? Try it yourself the next time that big buck busts out of the brush. Model 742 "Woodsmaster" is available in 30/06 Springfield, 280 Remington, 308 and 6 m/m Remington. If you hunt in heavy brush country, you'll be interested in the short barrel carbine model, in 30/06 and 308 calibers. Both regular and carbine models have the new custom fine line checkering.

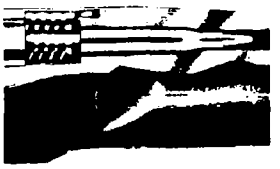


EXTRA STRONG, DEPENDABLE. Solid steel receiver, rotary multiple-lug breech lock, and high strength barrel breech ring make Model 742 extra strong, safe, dependable . . . allow it to be chambered for super powerful calibers like the 30-06.

FAST, EASY LOADING, Interchangeable — 4 cartridge magazine facilitates loading and unloading. Extra loaded magazines are easy to carry in pocket.



AMAZING "POWER-MATIC" ACTION — works on jet airplane principle. Gas moves rearward to operate action. "Jet" effect forces rifle forward—softens recoil with no power loss!



ROTARY MULTIPLE-LUG BREECH BOLT locks bolt and barrel together securely. Insures constant head space. Same exclusive design as on famous Remington Model 760 "Gamemaster."

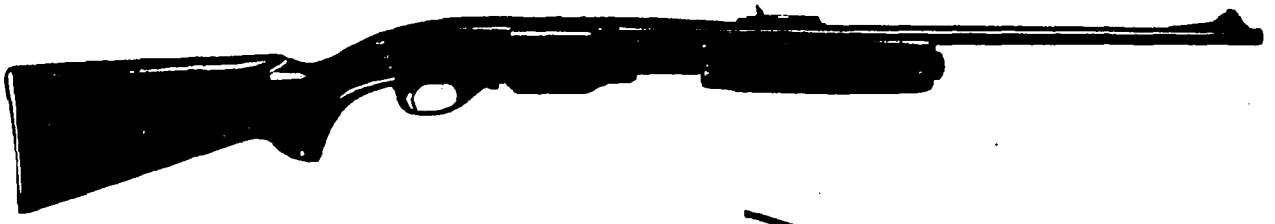
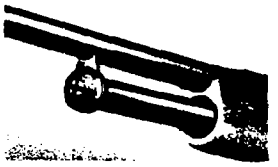
Fast Hand[illegible] 1965 Accurate Big Game Rifle

REMINGTON Model 760 "GAMEMASTER"

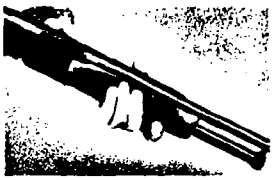


IF YOU'RE A PUMP GUN MAN . . . used to shooting a pump action shotgun, then the Remington Model 760 is the gun you'll want. You'll stop 'em and drop 'em if you're carrying a light weight, fast-handling Remington Model 760 "Gamemaster." It's the only pump action big game rifle made that's chambered for the popular and powerful 30/06 Springfield cartridge. Five lightning-fast shots are yours at the flick of your wrist . . . one more reason why this rifle has been a consistent winner in the International Running Deer Matches. Pump action is slick, smooth — so fast and effortless, shooters say it works like a "ball-bearing" action. An extra loaded clip magazine in your pocket means you can reload in seconds . . . you've reserve fire power at your fingertips. The Model 760 "Gamemaster" is another member of the Remington family of modern guns — rugged, dependable, trouble-free with the famous rotary multi-lug bolt for extra strength. Custom, fine line checkering make it a standout in any gun rack. Another modern Remington gun "that's better — because it's made better" . . . in six powerful calibers: 223 Remington, 280 Remington, 270, 30/06, 308, 35 Remington. Also made in a carbine model in 35 Remington, 30/06 and 308 calibers.

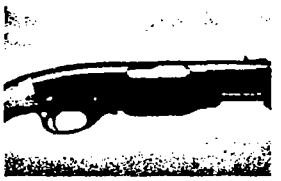


AMAZING ACCURACY—Free floating barrel gives the kind of accuracy that means meat on the table, more first-shot hits.

EXCEPTIONAL TRIGGER MECHANISM. No backlash, drag or creep. Convenient, positive cross-bolt safety.



LIGHTNING FAST ACTION — A flick of your forearm keeps you shooting; double action bars prevent twisting and binding. Pumping is effortless, like a ball-bearing action.



REMINGTON FIRE CONTROL trigger must be released and squeezed for each shot — can't fire unless action is completely closed. An important safety feature.

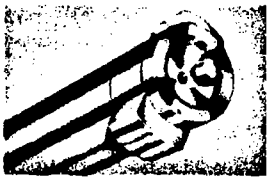
1965

Model 700

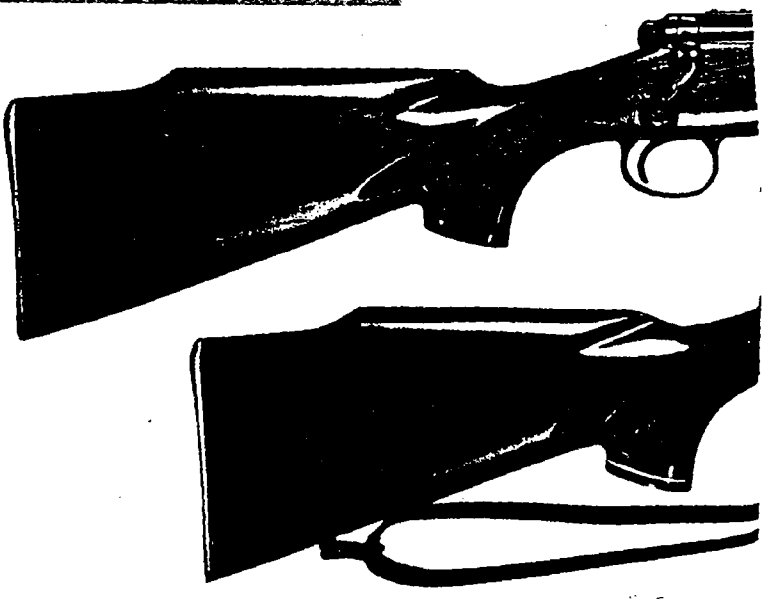
World's Most Wanted Bolt Action Rifle in 14 Calibers

WORLD'S STRONGEST BOLT ACTION. Cartridge head is encased and supported by ring of solid steel. When action is closed, three rings of steel support the cartridge head. It's super-strong.



BOLT KNOB is checkered, top and bottom. Grip is custom checkered. BDL Model has grip cap and white spacers.

MONTE CARLO STOCK and CHEEK PIECE make the model 700 good to look at . . . and good to shoot. There's a better cheek-to-stock fit with a Monte Carlo stock and cheek piece . . . which means quicker, surer sight alignment with either scope or iron sights.



NEW FEATURES FOR 1965

- **BEAUTIFUL, SUPER-TOUGH RK-W FINISH.** the most durable wood finish known, is now on all Model 700 Rifles. Du Pont-developed RK-W finish is similar to that used on bowling pins. No wonder it's good on guns.
- **LONG 22" BARRELS** are now standard on the following rifles: 6 m/m Rem., 243 Win., 270 Win., 280 Rem., 30-06 and 308 Win. Varmint and Magnum calibers are unchanged at 24" and Safari calibers at 26".
- **SIGHTS ARE NOW DETACHABLE.** If a shooter who uses a scope prefers to remove the iron sights, it's now an easy matter. A screwdriver is all that's needed and the filler screws supplied in the receiver will plug the sight fastening holes.
- **THE 700 ADL AND BDL MODELS** are now available in the new hot varmint caliber, the 22-250 Remington. Muzzle velocity is 3760 feet per second.

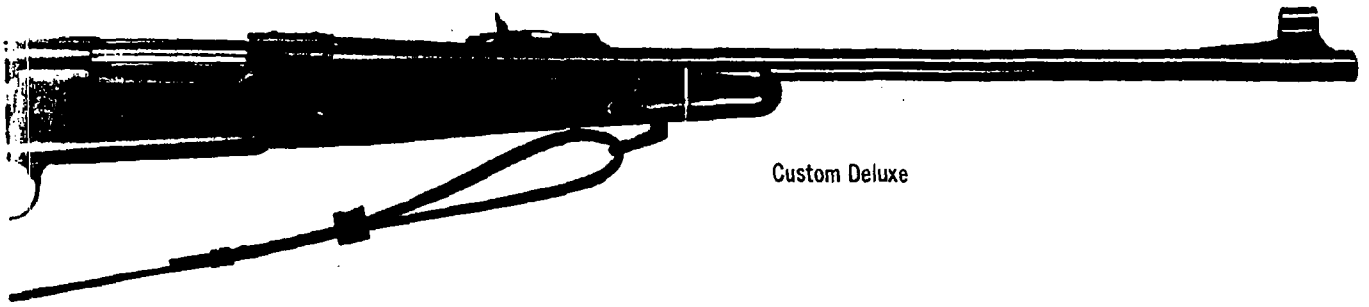
Deluxe



Custom Deluxe

When the Model 700 was first developed, our tests proved that we had produced the finest center fire bolt action rifle ever made. Now our sales records have proven it again. Since its introduction, hooters have bought more Remington Model 700's than any ther center fire bolt action rifle on the market in its price class. nd their reasons for buying make good sense. For example: he Remington 700 bolt action is designed for the real rifleman. *he shooter* who wants the accuracy bonus of Remington's mous precision rifling and short, crisp trigger pull. *The hunter* who appreciates the comfort of a cheek piece and Monte Carlo comb on an all-purpose stock that gives superb balance and perfect alignment with either 'scope or open sights. *The craftsman* who loves the traditional beauty of fine checkering. And it has a beautiful wood finish that is tough, hard, scratch-resistant — gives lasting protection against hard usage and bad weather. The 700 owner also gets the world's strongest bolt action. The bolt head completely encloses the cartridge case in a ring of steel. And the Model 700 is available in 14 popular calibers.

FEATURES • MODEL 600

CUSTOM CHECKERING on fore-end and grip is fine-lined, uniform, good looking. We suggest you do as other smart gun buyers do, compare this checkering with that found on other makes of guns. Then judge for yourself.

MONTE CARLO STOCK means a better cheek-to-stock fit for quicker, surer sight alignment. Rich American Walnut Stock has all-purpose dimensions which give perfect alignment with either a scope or open sights. Functional shape of fore-end provides a good reliable, non-slip grip for steady holding.

WORLD'S STRONGEST BOLT. Cartridge head is completely encased by a ring of solid steel. When bolt is closed, three rings of steel support the cartridge head. Strong? . . . there's none stronger.

A LIGHT WEIGHT POWERHOUSE — Only 5½ pounds but packs more power per pound than other carbines, from the brush-busting 35 Remington to the high velocity, flat trajectory 222 Remington coyote-walloping caliber.

VENTILATED RIB. It's the first time a domestic commercially produced sporting rifle has ever been designed with a ventilated rib. (Another first for Remington). It helps you aim, gives a definite sight-line so you get on running game faster.

FAST-HANDLING MODEL — Short over-all length (37¼") makes Model 600 just right for hunting in heavy brush country because you can handle it faster, easier. It's a great saddle gun, too — fits a scabbard neatly or tucks in the rack of a pick-up truck.

FINEST ACCURACY. Here's where Model 600 really shines. Free floating barrel of Remington proof steel is precision rifled to Remington's exact standards. Trigger pull is short, crisp and clean. At the factory and in the field we shot close groups — and so will you. It was designed to shoot this way.

FORWARD S BOLT HANDLE hugs the stock — doesn't stick out — slips in and out of scabbard with ease. Half knob is serrated on the bottom so you get a good secure grip.

ROTATING THUMB SAFETY is conveniently located at the rear of the receiver where you can get at it in a hurry. Rearward for "safe". Forward for "fire."

BLADE RAMP FRONT SIGHT has brass bead. Sturdy U notch rear sight is adjustable for elevation and windage. Receiver drilled and tapped for scope and receiver sights.

TRIGGER is extra wide and corrugated; finger fits securely. Trigger pull is crisp and clean — no creep, no spongy action.

MODEL 600 MAGNUM Same features as above, except:

STOCK. A handsome lamination of walnut and beech that provides tremendous strength, stability and beauty. It's warp-free and waterproof.

WOOD FINISH is famous Du Pont RK-W that's tough, scratch and water resistant, the most durable wood finish known. It's similar to that used on bowling pins.

RECOIL PAD cushions the recoil of the game-getting 350 Remington Mag. caliber. Black and white spacers add to good looks.

MAGNUM BARREL is designed to handle the powerful hot 350 Remington Magnum caliber. Free floating barrel provides extreme accuracy.

SCOPE BACK-UP. Strong bracket of steel forms scope mount back-up which takes vibration and recoil. Scope can also be mounted in forward position which provides long eye relief for instant sighting.

STRAP and QUICK RELEASE SWIVELS are standard equipment on Model 600 Magnum.

WEIGHT. Just 6½ well-balanced pounds . . . and short over-all length (37¼") make it a honey to handle in heavy cover.

REMINGTON RIM FIRE RIFLES

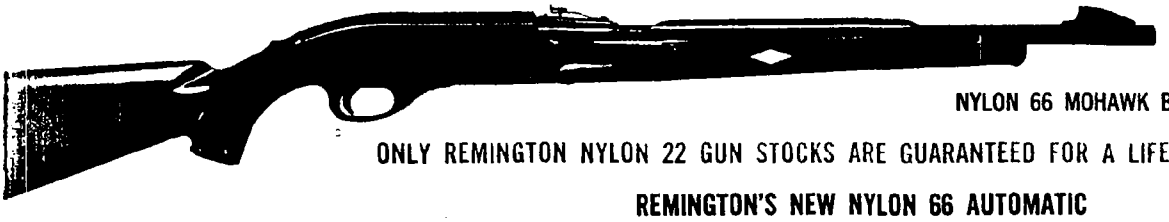
Remington

R2525142

NYLON 22s

1965

Made of DuPont Zytel® Nylon



NYLON 66 MOHAWK BROWN

ONLY REMINGTON NYLON 22 GUN STOCKS ARE GUARANTEED FOR A LIFETIME!

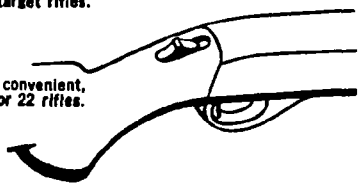
NYLON 66 APACHE BLACK

Nylon 66 is also made in an Apache Black deluxe l. The stock is Du Pont "Zytel" black nylon and both irrel and the receiver cover are chome plated. Inside, ie same reliable, trouble-free rifle as the standard wk brown model.

ylon 66 is the most rugged automatic 22 rim fire rifle Alaskan fishermen think so, too; they use it on their boats to keep marauding sea lions out of their nets. pray, foul weather, fish slime and mud knock out 22's. But not the Nylon 66. This is why these fisher- ook on the Remington Nylon 66 as almost a "tool-of- ade." Still further proof: Trappers in the humid is along the Gulf States swear by the "gun with the stock." Why? Same reasons; it's tough, it works under nditions, it stands up . . . and it's exceptionally ate.

our dealer to see the fabulous Nylon 66, in Apache or Mohawk Brown. They're both winners.

It's amazingly accurate . . . barrel and fore-end are precisely mated to give outstanding accuracy. Structural-nylon permits three-point bedding found only in costly target rifles.



grip thumb safety. The most convenient, to use safety ever designed for 22 rifles.

Loading is fast, easy — a twist of wrist and tubular magazine is removed or replaced through butt plate. Single loading for beginner is handled smoothly through port with automatic ejection of fired round.

REMINGTON'S NEW NYLON 66 AUTOMATIC

Remington's new Nylon 66 is setting an amazing record in sales and customer acclaim. Here's why!

Structural-nylon is many ways better than conventional material for the gun's stock and fore-end. Because this super-strong material doesn't warp, the same barrel bedding principle used on the world's most expensive target rifles is yours. The result is an automatic that nails targets, tin cans and small game with tremendous accuracy. This is the same model rifle used to establish an accuracy record on hand-thrown 2½" wood blocks. Only six misses out of over 100,000 blocks thrown . . . and without a malfunction.

Receiver parts, stock and barrel are a bold interlocking of steel and structural nylon that creates the most trouble-free automatic action ever known. There's no need for lubrication because friction-free parts glide on "greaseless bearings" of nylon. Perfect checkering makes for fast, sure holding, and the convenient top-of-grip thumb safety slips off "safe" in a wink for running game shots. The handsome Nylon 66 has white diamond inlays and white line spacers at grip cap, butt plate and fore-end tip. Available in Mohawk Brown and Apache Black with chrome plated barrel and receiver.

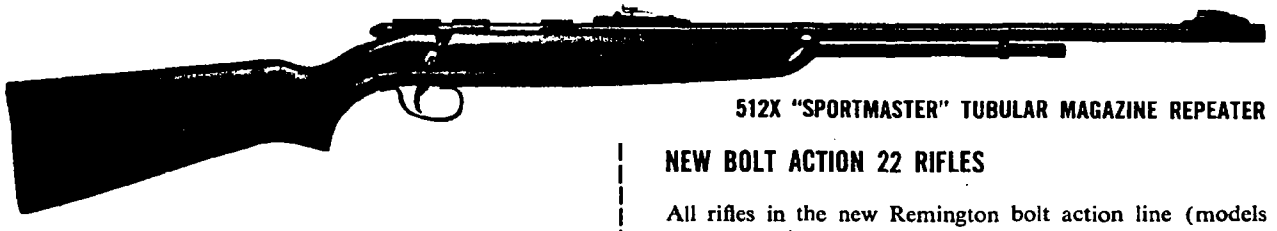
For Plinking, Target Shooting, or Hunting

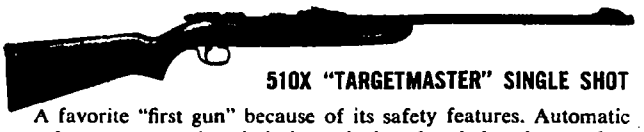
REMINGTON BOLT ACTION 22s



512X "SPORTMASTER" TUBULAR MAGAZINE REPEATER

NEW BOLT ACTION 22 RIFLES

All rifles in the new Remington bolt action line (models 510X, 511X, and 512X) have an American Walnut stock, new 24-inch precision barrel, fully adjustable rear sight and blade ramp front sight. In addition, the receiver is grooved for 'scope mounts and all rifles have a red dot firing indicator, side lever thumb safety, self cocking bolt, double cocking cams, double locking lugs, double extractors, bright steel bolt with swept back, sure-grip oval ball handle. Pick the one that suits you best; model 510X is a single shot, model 511X a 6-shot clip magazine repeater and 512X shown above is a big capacity tubular magazine repeater. All three have true Remington high quality throughout. See them at your dealer's. He'll be glad to point out their many exclusive features that make them excellent buys.



510X "TARGETMASTER" SINGLE SHOT

A favorite "first gun" because of its safety features. Automatic safety goes on when bolt is cocked and red dot shows when rifle is ready to fire. Also available in smooth bore model for shot cartridges.

511X "SCOREMASTER" CLIP MAGAZINE REPEATER

HOLDS 6 cartridges; short, long or long rifle.

MODEL 514

Here is an excellent 22 caliber rifle . . . at a popular price. It's a single-shot bolt action model with self-cocking bolt, rotary thumb safety and takes all 22 caliber cartridges — short, long or long rifle; standard velocity or high speed. For the young shooter, it's also available as Model 514 BR "Boy's Rifle" with cut down stock.

SPECIFICATIONS

	MODEL 514
ACTION	Bolt Action, Single Shot.
CALIBER	.22 short, long, long rifle rim fire.
CAPACITY	Single Shot.
BARREL	24-inch, precision rifled, Remington Proof Steel.
STOCK	Lacquer finished American Walnut, full sized, black butt plate.
SIGHTS	Bead front sight, open rear.
SAFETY	Rotary thumb safety.
RECEIVER	Made from solid steel.
OVER-ALL LENGTH	41 inches. Boy's rifle 40 inches.
WEIGHT	4¾ lbs.

MODEL 512X — Same as MODEL 510X except: CAPACITY — tubular magazine holds 21 short, 16 long, 14 long rifle cartridges. SAFETY — side lever thumb type. WEIGHT — 5¼ lbs.

MODEL 511X — Same as MODEL 510X except: CAPACITY — 6-shot clip magazine. SAFETY — side lever thumb type. WEIGHT — 5 lbs.

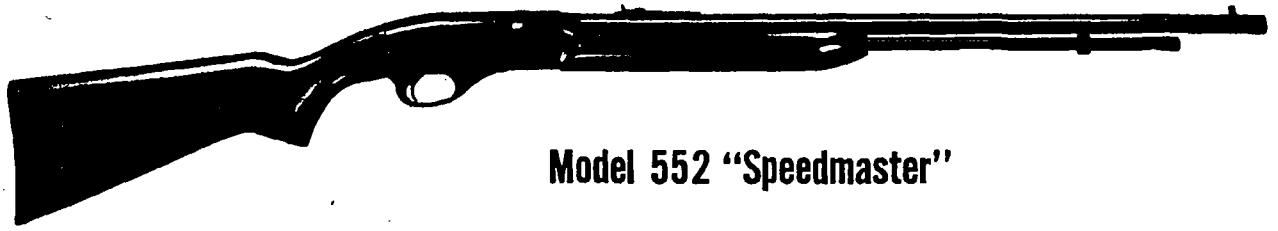
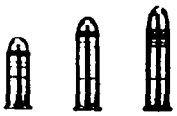
AUTOMATIC

1965 Fire
Extra Rugged
Dependable



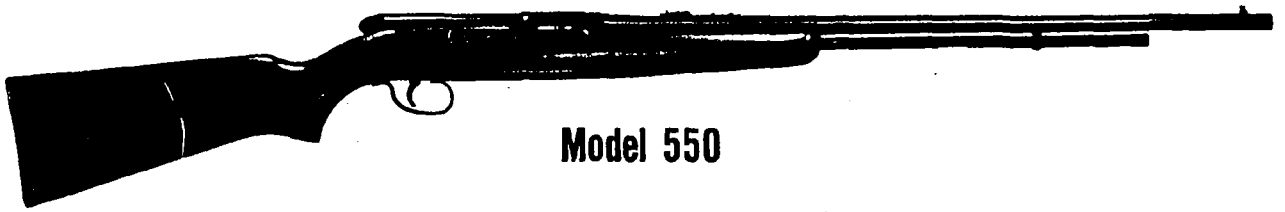
Model 552 "Speedmaster"



VERSATILE. Shoots 22 Short, Long and Long Rifle cartridges interchangeably without adjustment. Load 'em up in any order and start shooting. Your trigger finger does all the work.

SINGLE LOADING — AUTO EJECTION. For use as a single shot rifle, pull back bolt, drop cartridge into the ejection port, release bolt and you're ready to shoot. Empty cartridge case will be ejected automatically.

Here's the Remington 22 caliber automatic that's fast shooting, accurate, nicely balanced . . . the rifle you'll want for small game hunting, controlling crop-destroying and marauding pests, or for just plain fun-shooting. The Model 552 is another member of Remington's "family of guns"; looks, handles and shoots like its big brother, the Model 742 big game rifle. "Speedmaster" has every feature the shooter wants, such as: twenty shots as fast as you can squeeze the trigger, rich walnut stock, cross bolt safety, receiver grooved for "tip-off" 'scope mounts. Also available in the short barrel (21") carbine model and the Gallery Special. Pick a Model 552 off the rack at your dealer's — heft it — throw it to your shoulder. We think you'll agree, it's the rifle that "feels right" . . . because it's made right.



Model 550

Rapid fire, extra ruggedness and dependability are points shooters like about this Remington automatic. It's the famous 22 caliber rifle that shoots Short, Long and Long Rifle cartridges with no adjustment. Mix them up, drop them in the tubular magazine and fire away. Model 550 takes 'em as they come. Other fine features are: Large capacity, up to 22 Shorts, American walnut stock, fine accuracy, thumb safety, receiver grooved for "tip-off" 'scope mounts. The Model 550 is well-built, well-designed — an exceptionally fine all-around rifle for the hunter or plinker . . . and good for week-end family fun, too.

This rugged and dependable automatic will handle, interchangeably and without adjustment, Short, Long and Long Rifle cartridges.

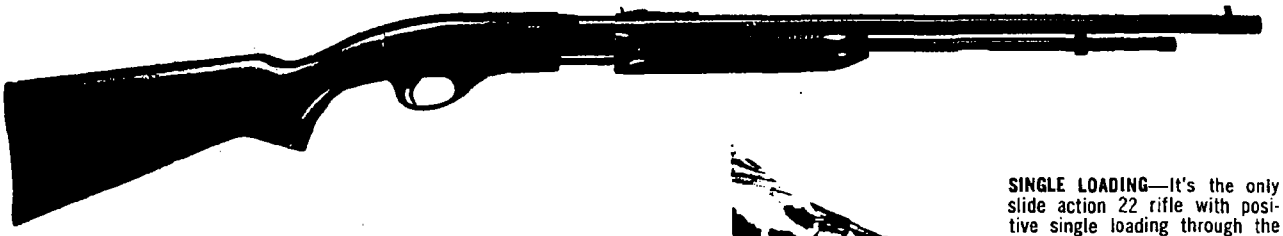
Smooth A 1965 Large Capacity All-'Round 22

REMINGTON

PUMP ACTION



Model 572 "Fieldmaster"

For the shooter who likes a pump action 22 caliber rifle, the "Fieldmaster" Model 572 is best . . . action is slick and smooth. Exclusive cartridge feeding design prevents jamming, permits easy single loading. By simply removing the inner magazine tube, parent or instructor can convert the "Fieldmaster" into a single shot rifle. Receiver has dovetail grooves for "tip-off" 'scope mounts. Capacity is large; tubular magazine holds 20 short, 17 long or 15 long rifle cartridges. It has a cross bolt safety conveniently located at the rear of the trigger guard where it can be snapped on or off with the index finger. The Model 572 is beautifully streamlined and balanced — rugged and dependable like Remington big game rifles and shotguns. Also available with a smooth bore barrel.

SINGLE LOADING—It's the only slide action 22 rifle with positive single loading through the ejection port — a feature especially important to parents and shooting instructors.

FAST, POSITIVE ACTION — short stroke operation is fast and smooth . . . ideal for plinking or for getting off quick shots at hard-to-hit game. The Model 572 "Fieldmaster" shoots as fast as you can flick the fore-end.

SHOOTERS FORGET—but a "Fieldmaster" won't. For extra safety it's designed not to fire if the trigger is pressed while the action is being closed. Trigger must be released and pressed for each shot.

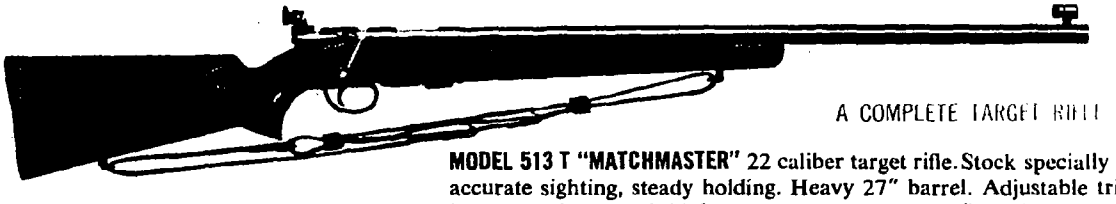
RIM FIRE-CENTER FIRE

Model 40XB World's Most Accurate Target Rifle

Here is the sensationally accurate Remington Model 40XB that is taking top honors in the United States and at International matches throughout the world. It reflects all that Remington is famous for . . . craftsmanship, precision design, quality materials, attention to details. The 40XB is truly a target rifle that only Remington — the nation's oldest gun maker could create. Features are:

Bolt action single-shot with loading platform: Specially selected long-wearing ordnance steel barrel, with new precision rifling. Choice of standard or heavy barrel. Custom-style stock with high comb giving same sighting plane for iron and telescope sights. Comb grooved for easy bolt removal. Mershon White Line non-slip rubber butt plate.

Built-in adjustable bedding device. Adjustable sling swivel. Extra-strong bolt with heavy, over-size locking lugs insuring constant headspace. Double extractors. Loading platform gives absolutely straight-line feed. Adjustable, crisp trigger with positive click adjustments for weight of pull. Thumb safety. Large, strong receiver drilled and tapped for standard sight mounts — telescope and iron. Redfield Olympic front and rear sights optional. Greatly increased distance between 'scope blocks gives improved sight adjustment. Barrel length 28". Stock length 33". Overall length 47". Weight without Redfield Olympic sights: heavy barrel rifle 12 lbs., standard barrel rifle 10 lbs. Weight with sights: add 12 oz.



A COMPLETE TARGET RIFLE READY TO SHOOT

MODEL 513 T "MATCHMASTER" 22 caliber target rifle. Stock specially proportioned for accurate sighting, steady holding. Heavy 27" barrel. Adjustable trigger pull. 6-shot box magazine. Redfield front and rear sights. 1¼" leather sling, adjustable front swivel. Length 45". Weight about 8¾ pounds.

A FINE COMBINATION HUNTING AND TARGET RIFLE

MODEL 521 T — Remington's lowest-priced target 22 — and it's convertible! Just remove target aperture from micrometer rear sight and you have a fine hunting rifle with peep sight. Patridge-type front sight. 6-shot box magazine, 1 shot in chamber gives 7-shot capacity. Complete with sling strap, adjustable swivel. Chambered for 22 long rifle only.

INTERNATIONAL FREE RIFLE—RIM FIRE • CENTER FIRE

Center Fire Calibers: 222 Rem., 222 Rem. Mag., 7.62 m/m, 30-06 and others on special order.

40XB type action, precision heavy barrel, rough-turned laminated stock, a Remington designed adjustable butt plate with interchangeable rubber plate and hook, adjustable palm rest, adjustable front sling swivel, 2-ounce trigger. Left-hand stock supplied at $25 extra cost.

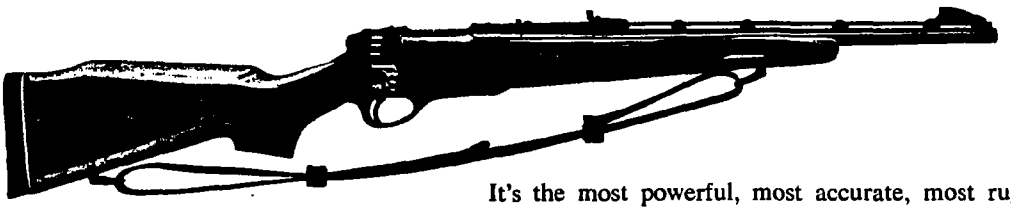
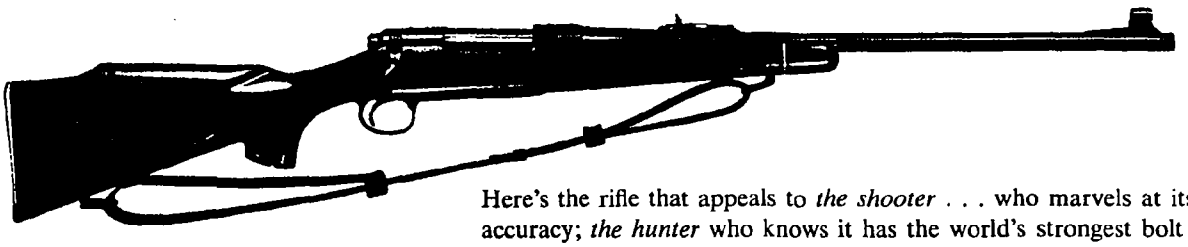
REMINGTON Presents.... NEW GUNS....



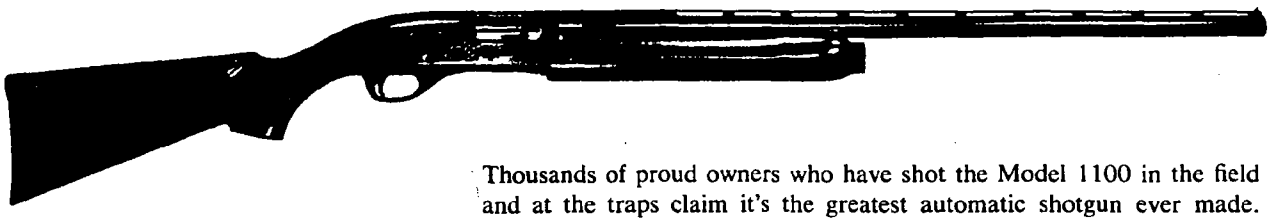
MODEL 600 MAGNUM
in 350 Remington Mag. Caliber

It's the most powerful, most accurate, most rugged big game carbine made. The new Model 600 Magnum carbine is the first production model hunting rifle ever made with a laminated stock (rich walnut and beech) and the only carbine in a high power belted magnum caliber. Chambered for the new powerful 350 Remington magnum caliber, it will take any big game in North America.



MODEL 700
Big Game Rifle

Here's the rifle that appeals to *the shooter* . . . who marvels at its great accuracy; *the hunter* who knows it has the world's strongest bolt action with power to take any North American game; and *the craftsman* who appreciates the traditional beauty and workmanship of this rifle. Available in 14 most wanted calibers.



MODEL 1100
Automatic Shotgun

Thousands of proud owners who have shot the Model 1100 in the field and at the traps claim it's the greatest automatic shotgun ever made. Their reasons: less recoil, longer life, good balance, high quality throughout. Made in 12, 16 and 20 gauges — in all popular barrel lengths, chokes and models.

R2525149

1965

HIGH GRADE GUNS

THE FINEST! As appreciative sportsmen and shooters well know, gunsmithing is both an art and a craft. Since 1816, succeeding generations of Remington master gunsmiths have contributed accuracy, reliability, handling ease and handsomeness to the unmatched reputation of Remington products.

Today's high grade Remington guns reflect this great tradition of the artisan-gunmaker: The "Woodsmaster" F Premier Grade automatic big game rifle is just one example of the extra quality available to shooters who enjoy owning the finest. Hand-engraved receiver and barrel, game scenes, custom hand checkering, matched American walnut stock and fore-end . . . all these superiorities make it obviously the finest, undeniably a Remington.

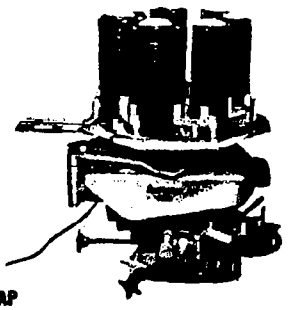
Trap & Skeet

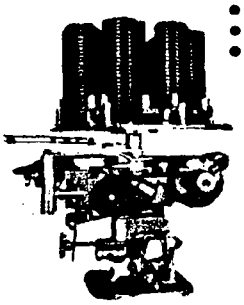
MODEL A100T FOR TRAP

1 Remington autoloading trap with ½ HP motor, 60 cycle, 115 volts, and special auto-angling base. 1 push button release unit with 100 feet of wire. 1 power control box.



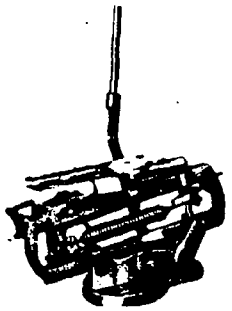
REMINGTON AUTOLOADING TRAP

- Labor-saving *(no trap boy needed)*
- Large capacity (203 targets)
- Easy loading, stack at a time
- Connects to 110 volt wiring system
- No tools required
- Makes commercial gun clubs profitable!



MODEL M200S FOR SKEET

2 Remington autoloading traps with ½ HP motors, 60 cycle, 115 volts. 1 walk around release unit and 80 feet of wire. 2 power control boxes. 1 connection box.



REMINGTON "WONDER" TRAP

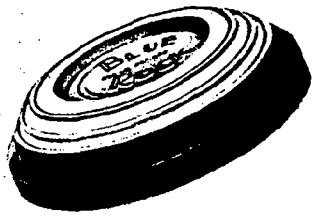
For straight trap and skeet. Tested in service . . . proved in practice. "Wonder" trap meets every requirement. Less vibration, automatically "sets" itself. Instant adjustment.

REMINGTON "WONDER" TRAPS FOR SKEET SHOOTING

Two Remington "Wonder" traps with Remington's exclusive Singlever manual control, all other accessories. Also Remington Electric release.

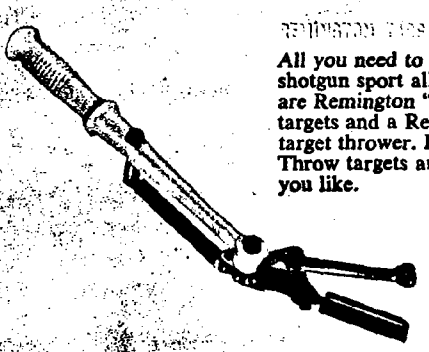
REMINGTON "BLUE ROCK" TARGETS

The new Remington square shoulder "Blue Rock" has weight where weight belongs! Dome of target is thin, rim is heavier, giving greater stability, more spin. More pronounced shot rings on dome catch shot — targets break easier when hit by only a few pellets. All adding up to higher scores!

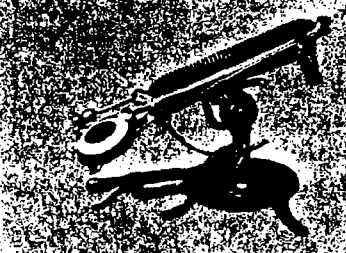


REMINGTON TARGET THROWER

All you need to enjoy shotgun sport all year round are Remington "Blue Rock" targets and a Remington target thrower. Easy to use. Throw targets any way you like.

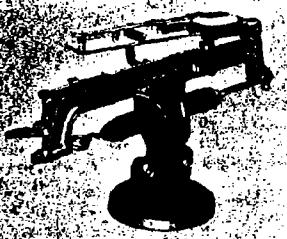


Remington, Wingmaster, Power-Matic, Woodsmaster, Gamemaster, Speedmaster, Rangemaster, Matchmaster, Fieldmaster, Scoremaster, Sportmaster, Targetmaster, Target, Power Piston, Express, Shur-Shot, Core-Lokt, Blue Rock, Expert, Wonder, Kleanbore, Brushmaster and Jet are trademarks registered in the United States Patent Office. XP-100, Fire Ball, Rib-Lokt, Nylon 66, Hi-Speed, Golden, H wad and Spatterless are trademarks of Remington Arms Company, Inc., Bridgeport 2, Conn. Zytel is a registered trademark of E. I. du Pont de Nemours & Co. for nylon resins.



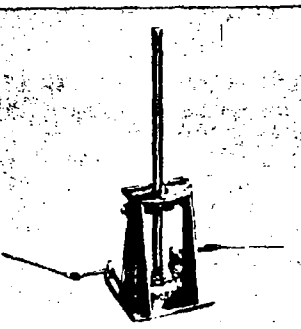
REMINGTON "EXPERT" TRAP

A strong, lightweight, sturdily built portable trap. Smooth operating. Just right for use at summer camps, cottages, aboard boats, or for trips into the country. Fine for "walk up" shooting games.



REMINGTON "BLUE ROCK" TRAP

For straight trap and skeet. Throws either doubles or singles. Ideal for small clubs or private estates. Available also as complete skeet outfit: 2 "Blue Rock" Traps and Remington's exclusive Singlever Pull for manual operation.



MANUAL RELEASE for "Wonder" or "Blue Rock" Outfits

Simple to attach and easy to use, the Remington Singlever Pull is especially designed for manual operation of the "Wonder" Skeet Outfit. Easily and quickly converted to electric operation.

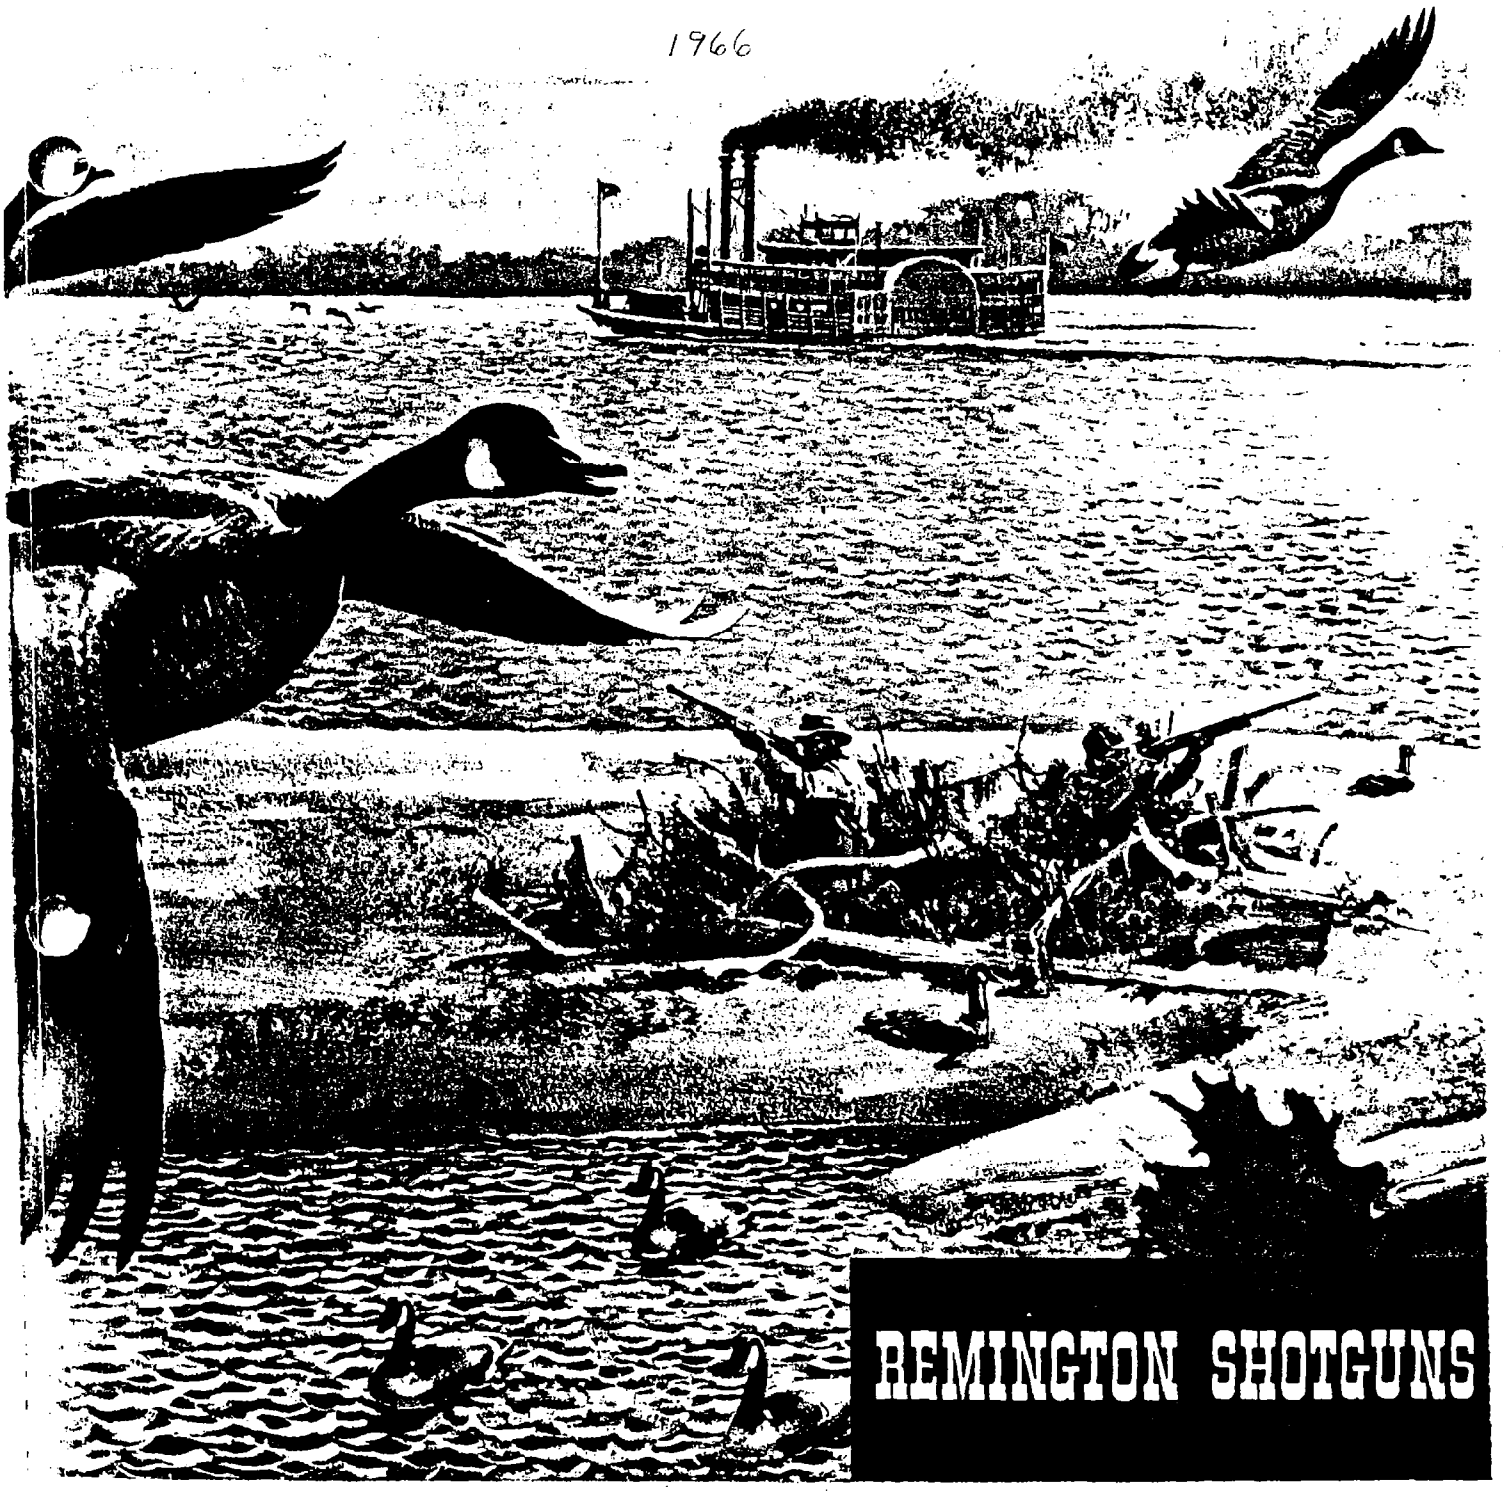
REMINGTON ARMS COMPANY, INC.
1816-1966
150th ANNIVERSARY

R2525153

1966



REMINGTON SHOTGUNS

This year Remington, the oldest gunmaker in America, marks its 150th Anniversary. From a humble beginning in 1816 in a small forge near Ilion, New York, the company founded by Eliphalet Remington has grown into a vast, diversified industrial organization.

In the early days, Remington firearms rode toward the Rockies in covered wagons and teamed with the plow and ax to help tame the wilds. When the land was being opened and hungry settlers waited the necessary months or years for their first crops to ripen, it was the firearm that provided them with food from nature's larder of game. It was this demand for firearms as a tool that made the growth of Remington Arms Company, Inc. possible. Since 1816 Remington guns have proudly contributed toward our nation's heritage and in doing so, acquired a reputation for excellence in design and dependability.

To our sportsmen-customers of today, and to those of years gone by . . . Remington Arms is grateful; for they are a part of our heritage, our growth, and our success.

WINGS ON THE MISSISSIPPI—1930's. The cry of the Canada goose has long been heard above our rivers and plains. Remote breeding areas in the Far North and wise conservation have sustained these magnificent flocks.

Remington

REMINGTON Model 1100 AUTOMATIC SHOTGUN

1966

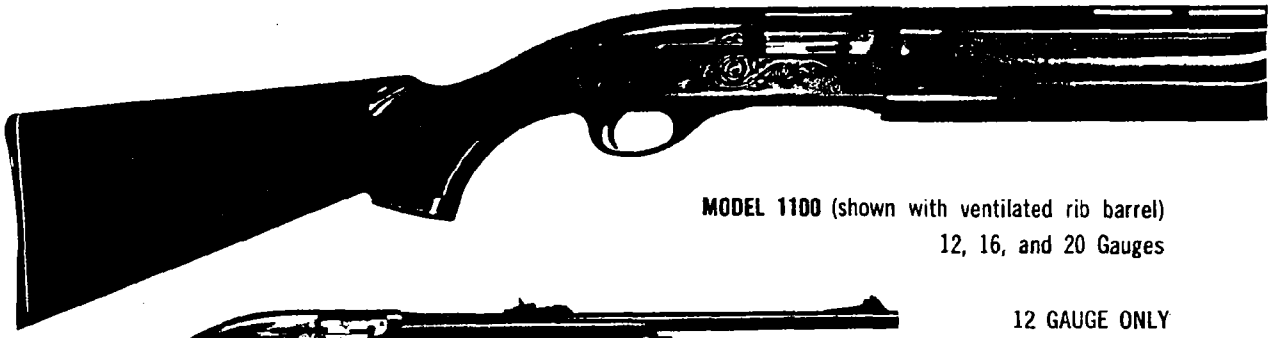
Shooters throughout the country have made the new Remington Model 1100 the "most popular" — "most wanted" automatic shotgun . . . and for good reasons, too. They tell us:

"It works, never jammed on me once, and I hunted every weekend."

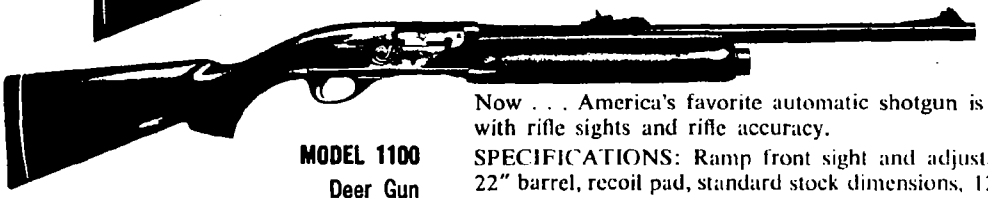
"Recoil is light" writes a trap shooter. "My boy says the kick doesn't bother him a bit . . . and it doesn't. He's shooting better than ever." Light recoil also pays off in doubles, too; for the trap shooter, skeet shooter and hunter.

"Finish is good — stands up" reports a West Coast duck and goose shooter who shot it throughout the season . . . "And we get some mighty wet weather out here . . . it's tough on almost everything."

"It's a beautiful gun" — is a typical comment. And no wonder — with its fine-lined checkering, DuPont RK-W wood finish, scroll work, steel receiver, white line spacers and tear drop pistol grip. Your dealer has 'em in 12, 16, and 20 gauges, with both plain and ventilated rib barrels.



MODEL 1100 (shown with ventilated rib barrel)
12, 16, and 20 Gauges

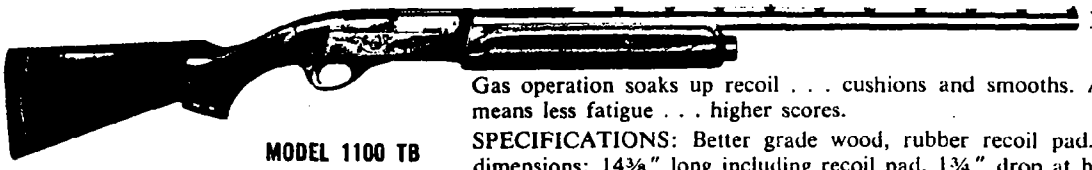


12 GAUGE ONLY

MODEL 1100
Deer Gun

Now . . . America's favorite automatic shotgun is available in a Deer Gun with rifle sights and rifle accuracy.

SPECIFICATIONS: Ramp front sight and adjustable rifle type rear sight, 22" barrel, recoil pad, standard stock dimensions, 12 gauge only, plain barrel. Choke gives optimum results with rifled slugs and buckshot. Weight: about 7¼ lbs.

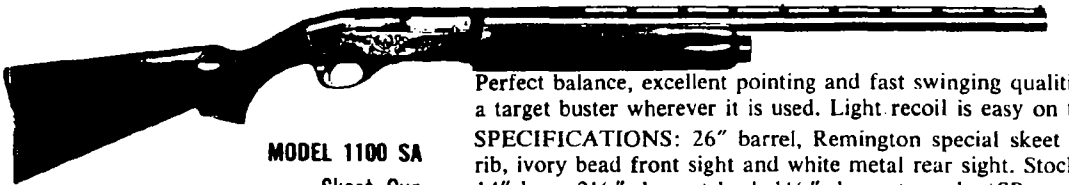


12 GAUGE ONLY

MODEL 1100 TB
Trap Gun

Gas operation soaks up recoil . . . cushions and smooths. And less recoil means less fatigue . . . higher scores.

SPECIFICATIONS: Better grade wood, rubber recoil pad. Special stock dimensions: 14⅜" long including recoil pad, 1¾" drop at heel, 1⅜" drop at comb. Available in 28" and 30" full choke and 28" modified choke, ventilated rib barrels only. Ivory bead front sight, white metal rear sight. Also available with optional Monte Carlo stock at extra charge. *Weight:* about 8¼ lbs.

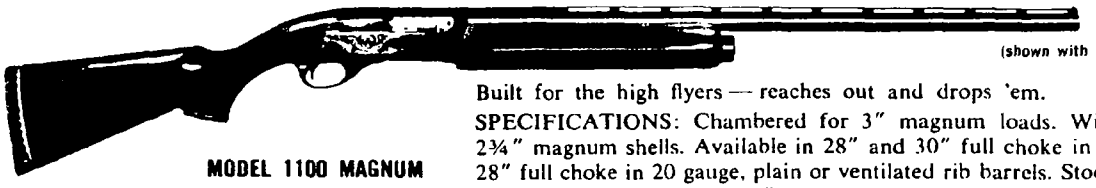


12, 20 GAUGE

MODEL 1100 SA
Skeet Gun

Perfect balance, excellent pointing and fast swinging qualities make this gun a target buster wherever it is used. Light recoil is easy on the shoulder, too.

SPECIFICATIONS: 26" barrel, Remington special skeet boring, ventilated rib, ivory bead front sight and white metal rear sight. Stock dimensions are: 14" long, 2½" drop at heel, 1½" drop at comb. (SB grade same specifications with better grade wood). *Weight:* about 7½ lbs.



12, 20 GAUGE
(shown with ventilated rib barrel)

MODEL 1100 MAGNUM
Duck Gun

Built for the high flyers — reaches out and drops 'em.

SPECIFICATIONS: Chambered for 3" magnum loads. Will also handle 2¾" magnum shells. Available in 28" and 30" full choke in 12 gauge, and 28" full choke in 20 gauge, plain or ventilated rib barrels. Stock dimensions: 14" long including pad, 2½" drop at heel, 1½" drop at comb. Furnished with recoil pad. *Weight:* about 7¾ lbs.

R2525155

FEATURES THAT MAKE THE MODEL 11.. 1966
NEW — DIFFERENT — BETTER

CUSTOM CHECKERING on stock and fore-end . . . fleur-de-lis design. Checkering is fine-lined, uniform, good looking.

TEAR DROP PISTOL GRIP with attractive white diamond inlay provides a natural, non-slip, comfortable grip.

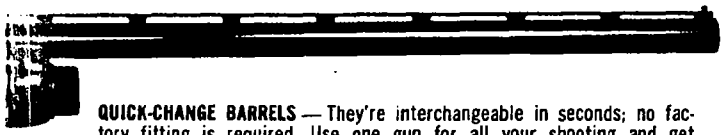
FORE-END has swept back, streamlined design. Fine checkering and fluting give secure gripping area.

DISTINCT WHITE SPACERS on butt plate and grip cap add attractiveness.

NEW METAL FINISH looks better, wears better . . . because the metal is more highly polished.

BIG 5-SHOT CAPACITY — Easy to load. Four in magazine . . . one in chamber. Three-shot plug furnished.

NEEDS NO ADJUSTMENT — Performs perfectly for different loads; automatically — Shoots high base, low base, 2¾" magnum shells without adjustment.



QUICK-CHANGE BARRELS — They're interchangeable in seconds; no factory fitting is required. Use one gun for all your shooting and get more game, targets, sport.

FASTEST LOADING — Drop a shell in the breech; load another in the magazine in one motion. Load five shells in five seconds.

LIGHTEST RECOIL — Gas action tames recoil; it smooths and cushions . . . and with no loss of power.

RK-W PROTECTIVE FINISH — New DuPont wood finish is clear. Lets the wood grain show through. It's similar to that used on bowling pins; tough, hard, scratch-resistant . . . gives lasting protection against hard usage and bad weather.

STEEL RECEIVER is made from a solid block of steel for extra strength, ruggedness, dependability.

AVAILABLE IN MAGNUM MODEL — Chambered for 3" magnum shells. Uses 2¾" magnums too. A rugged, dependable shotgun . . . reaches out and drops the high flyers.

DECORATIVE SCROLL WORK on receiver and bolt adds real beauty and value to this gun.

SELF CLEANING — The gas operation of this gun is unusual. It blows dirt and grime away, keeps action bright and shining for long periods of time.

SUPREME DEPENDABILITY — Tests prove the shooting life of this new gun is up to seven times longer than any other automatic shotgun on the market.

BALANCE AND WEIGHT are just right, only 7½ lbs. in 12 gauge. Can be carried comfortably all day. No sacrifice of steel in barrel or receiver . . . not a "featherweight floater" that's too light to point right.

NEW 20 GAUGE LIGHTWEIGHT MODEL 1100 WITH SPECIALLY SELECTED MAHOGANY STOCK AND FORE-END, AVAILABLE IN FIELD GRADE GUNS AND SA SKEET GRADE

REMINGTON Model 11-48 AUTOMATIC SHOTGUN

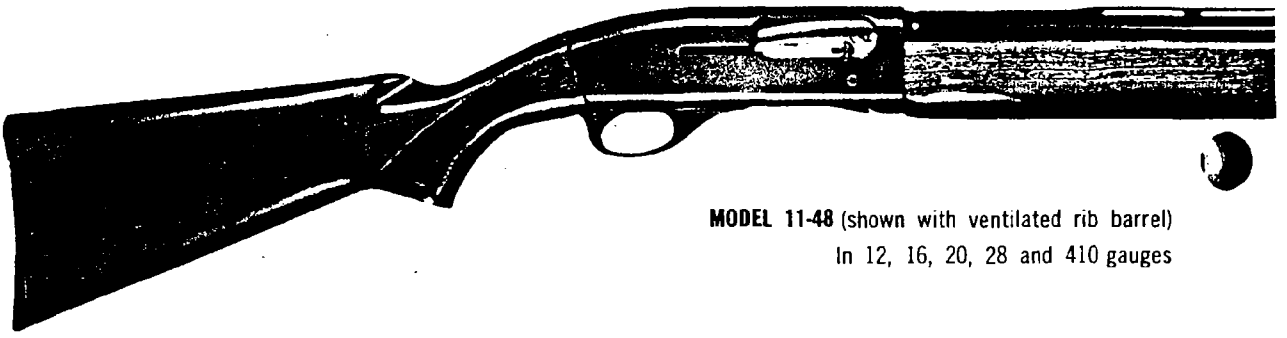
Only Automatic made in All 5 Gauges 12, 16, 20, 28 and 410

The Remington Model 11-48 is an automatic shotgun with a fine reputation that has been earned in the field and wherever skeet targets are thrown. Over a half million proud owners are our best salesmen and they'll tell you the 11-48 is one of the finest automatics on the market. And it is!

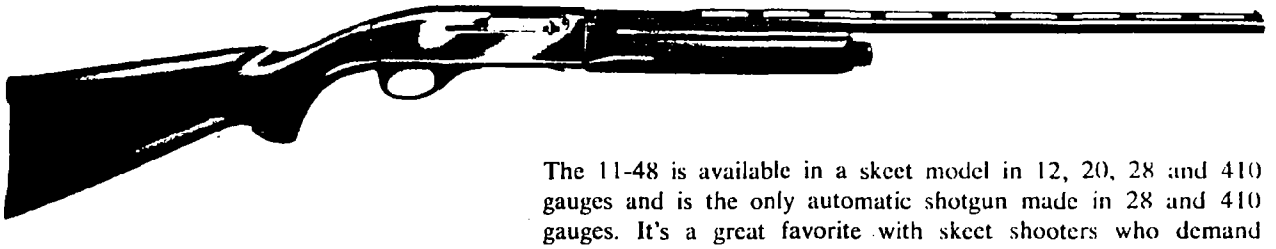
It's the only automatic made in 12, 16, 20, 28 and 410 gauges and in the 28 and 410 gauges it's a big favorite with skeet shooters, youngsters, women . . . and hunters who like a small bore shotgun. And speaking of Remington automatic shotguns, they have won more National Skeet Championships than all other brands put together. Here is where shot-after-shot dependability really counts.

Model 11-48 is an excellent value . . . you get a lot of gun for the money, such as: Custom fine-lined checkering, receiver milled from a solid block of steel, rich American Walnut stock and fore-end, 5-shot capacity (in 12, 16 and 20 ga.) and it shoots all brands of ammunition, high and low base, rifled slugs and standard length magnum shells . . . all without adjustment.

Barrels are interchangeable, too. Takes only a minute to change them and you can do it right in the field. No special tools or factory fittings are required. Dependability, ruggedness, lightweight, fine balance, good looks . . . that's the Remington Model 11-48, a gun that's built the "Remington Way" — to last!



MODEL 11-48 (shown with ventilated rib barrel)
In 12, 16, 20, 28 and 410 gauges



MODEL 11-48 SA
Skeet Gun
Available in 12, 20, 28 and 410 gauges
(410 gauge shown above)

The 11-48 is available in a skeet model in 12, 20, 28 and 410 gauges and is the only automatic shotgun made in 28 and 410 gauges. It's a great favorite with skeet shooters who demand supreme dependability in the guns they shoot. The Model 11-48 has everything the skeet shooter wants . . . fine balance, excellent pointing qualities, ruggedness . . . plus many other features that all add up to higher scores.

SPECIFICATIONS: 26" barrel (25" on 28 and 410 gauges) Remington special skeet boring, ventilated rib barrel, ivory bead front sight and white metal rear sight. Stock dimensions: 12 and 20 gauge, 14" long, 2½" drop at heel, 1⅝" drop at comb. 28 and 410 gauges, 13⅞" long, 2⅝" drop at heel, 1⅝" drop at comb. Weight: 12 ga. — 7¼ lbs., 20 ga. — 6½ lbs., 28 and 410 ga. — 6¼ lbs.

R2525157

1966

At the National Skeet Championships and at local shoots, the Remington Model 11-48 is a standout. It's the only automatic made in 28 and 410 gauges; skeet shooters like it because of its fine balance, excellent pointing qualities and dependability.

SPECIFICATIONS

STYLE	5 shot automatic shotgun — 4 shot in 28 and 410 gauges. 3 shot plug furnished.

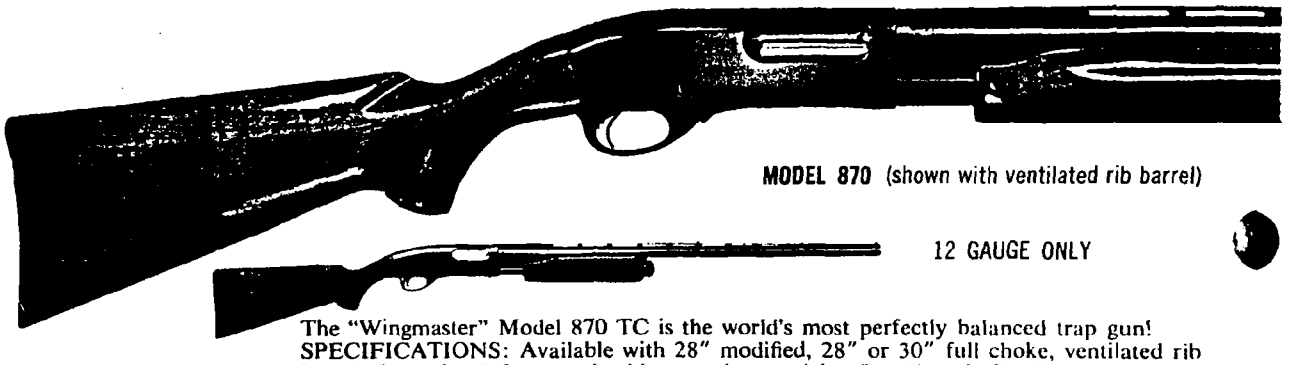
REMINGTON Model 870 PUMP ACTION SHOTGUN

Time for a new pump gun? If it is — and you're looking . . . we'd like to help. First of all you want a gun that shucks shells at the flick of your wrist — a gun that's got twin action bars and pumps like a ball-bearing action without twisting or binding. There is a gun like this. It's the slick Remington Model 870!

Want one that's going to last? Of course. Then pick a pump that has a receiver machined from a solid block of steel if you want strength and ruggedness. That's the way a Remington 870 is built . . . we don't make them any other way.

Chances are you'll want to use that gun on different kinds of game. That means interchangeable barrels you can change in seconds — right in the field and without any factory fitting or special tools. With a Remington 870 "Wingmaster" it's so easy — anyone can do it.

Everyone wants a good-looking gun. The 870 is a stand-out in any company and here's why: Custom fine-lined checkering with fleur-de-lis design, rich American Walnut stock and fore-end, and Du Pont-developed RK-W wood finish similar to that used on bowling pins. A Remington 870 pump is one of the best investments you can make in shooting enjoyment — for yourself — as a gift — or, some day, as a pass-along gun to that youngster of yours. So, for good hunting this season, why not take along a new Remington Model 870.



MODEL 870 (shown with ventilated rib barrel)

12 GAUGE ONLY

"WINGMASTER" MODEL 870 TC
Trap Gun

The "Wingmaster" Model 870 TC is the world's most perfectly balanced trap gun!
SPECIFICATIONS: Available with 28" modified, 28" or 30" full choke, ventilated rib barrel. Ivory bead front and white metal rear sight. Recoil pad. Special target grade sear, hammer and trigger assembly. Stock dimensions: 14⅜" long including recoil pad, 1⅞" drop at heel, 1½" drop at comb. Highly figured and finished American Walnut with finely checkered stock and fore-end. Hand fitted action and parts. Will furnish made to order stock lengths from 13½" to 14¾" on Model 870 TC only, without extra charge. *Weight:* about 8 lbs. This model also available in TB grade 14⅜" stock only, lower price. Both models available with optional Monte Carlo stock at extra charge.

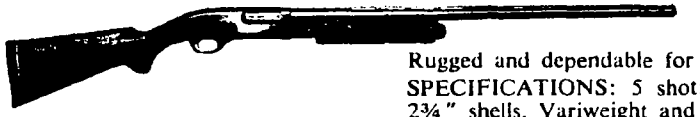
"WINGMASTER" MODEL 870 SA
Skeet Gun

The Model 870 SA, most perfectly balanced pump action shotgun, is ideal for fast second shots at skeet or upland game. Also available in SC grade with specially selected wood and hand checkering.
SPECIFICATIONS: (12 and 20 Gauges) *26" barrel. Remington Special Skeet Boring* Ventilated rib with ivory bead front and white metal rear sight. Stock dimensions: 14" long, 2½" drop at heel, 1⅝" drop at comb. *Weight:* 12 gauge about 7 lbs., 20 gauge about 6½ lbs.

12 GAUGE, WITH RIFLE SIGHT BARREL

"BRUSHMASTER" MODEL 870
Deer Gun

The Model 870 Deluxe "Brushmaster," made specially to handle rifled slugs and buck shot, is the latest in smashing power for those fast shots in brush country.
SPECIFICATIONS: The same as standard 870 except as follows: Lightning-fast 20" barrel with fully adjustable rifle-type sights. Stock fitted with rubber recoil pad and white line spacer. Also available in standard model with rifle sights.



12 AND 20 GAUGES

"WINGMASTER" MODEL 870 MAGNUM
Duck Gun
(shown with ventilated rib barrel)

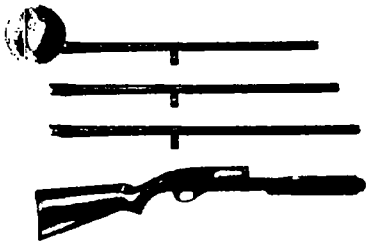
Rugged and dependable for long range shooting! For geese and ducks.
SPECIFICATIONS: 5 shot; chambered for 3" Magnum shells — will also handle 2¾" shells. Variweight and wood 3 shot plug. 12 ga. with 28" and 30" full choke, plain or vent. rib barrel. Steel bead front sight, rubber recoil pad. Checkered stock and fore-end. Stock: 14" long including pad, 2½" drop at heel, 1⅝" drop at comb. 20 ga. furnished in 28" full choke vent. rib and plain barrels. *Weight:* 12 ga. about 8 lbs., 20 ga. about 7½ lbs., including variweight plug.

R2525159

1966

SPECIFICATIONS

STYLE	5 shot pump action shotgun. Take down. 3 shot plug furnished.
GAUGES	12, 16 and 20.
BARREL	Special Remington proof steel. Extra barrel is interchangeable within gauge.
OVER-ALL LENGTH	48½" with 28" barrel.
SAFETY	Convenient cross-bolt type, positive.
RECEIVER	Made from solid steel, top matted.
STANDARD STOCK DIMENSIONS	Stock and fore-end: Rich American walnut. Beautiful checkering. 14" long, 2½" drop at heel, 1⅝" drop at comb. Trap reg., 14⅜" long, 1⅞" drop at heel, 1½" drop at comb. Monte Carlo; 14⅜" long, 1⅞" drop at heel, 1⅜" drop at comb, 1⅜" drop at M.C.
AVERAGE WEIGHT	12 ga. - 7 lbs.; 16 ga. - 6¾ lbs.; 20 ga. - 6½ lbs.



QUICK CHANGE BARRELS — Change them in seconds, right in the field. No factory fitting or special tools required. Use one gun for all your shotgun shooting and get more game, targets, sport.

GOOD DESIGN — Barrel is made with a hardened extension into which the breech block must lock before firing. Result . . . longer life, less wear, constant head space.

DOUBLE ACTION BARS prevent twisting and binding, give smooth gliding action for which Remington "Wingmaster" is famous. Many shooters say it works like a ball bearing action. And they're right!

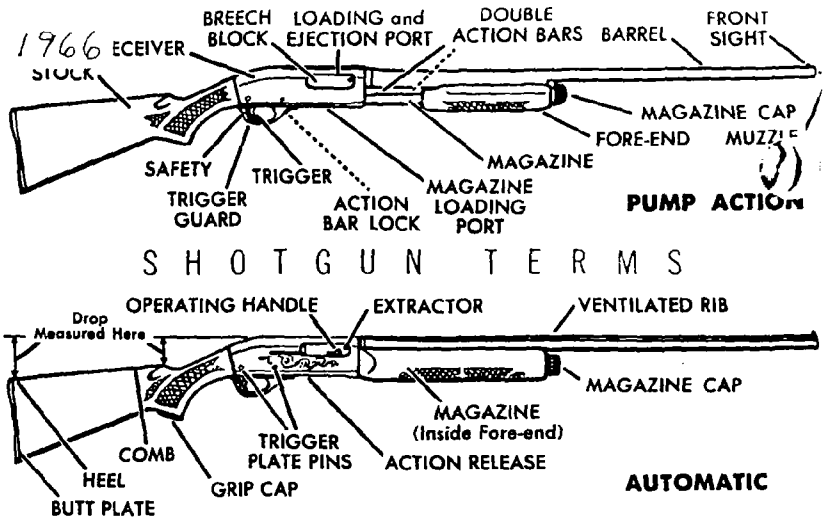
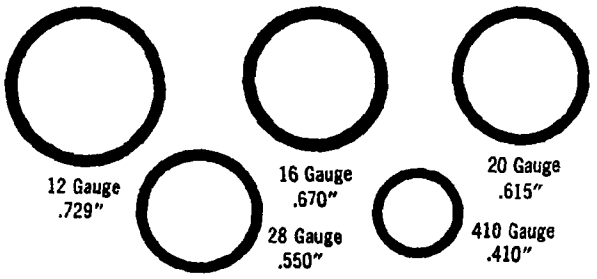
GAUGES, CHOKES and BARRELS



GAUGES — Shotguns are made in several well-known gauges, 12, 16, 20, 28 and 410. Other gauges have been made in the past but are not at present in common use. These include 4, 8, 10, 14, 24 and 32 gauges.

The unit of gauge measurement is based on numbers of uniform lead balls weighing one pound. 12 gauge is approximately the diameter of a lead ball of which 12 weigh one pound, 16 gauge is the diameter of a lead ball of which 16 weigh one pound, etc. The one exception is 410 gauge, which is actually 410 caliber. In terms of gauge, it would be 67 gauge. Measurements of minimum bore diameters in thousandths of inches are as follows:



SHELL LENGTH is measured in inches, in terms of the overall length of fired shell, with the crimp open. A 2¾" shell measures about 2½" to 2⅝" before it is fired, but 2¾" overall after firing. This method of measuring has been adopted to conform to standard chamber lengths of shotguns. A gun with a 2¾" chamber will thus handle shells of the proper gauge up to 2¾" length.

PATTERN — Pattern is the spread of shot pellets at any given yardage. All loads with the exception of 410 and skeet are tested for pattern at 40 yards. 410 and skeet loads are tested at 25 yards. The percentage of the total shot charge registering within a 30" circle (20" for 410) at these distances determines the quality of a pattern. No two patterns will be exactly the same. Average results should be taken from at least 25 patterns.

CHOKE — Choke is partial constriction of the bore of a shotgun barrel at the muzzle end. Its purpose is to control patterns. By using different degrees of choke boring, it is possible to control the spread of the shot charge for the best distribution of pellets at various ranges. For example, the bore diameter of a 12 gauge gun is .729". If the diameter at the muzzle end is reduced to .694", the constriction of .035" (difference) will control the shot sufficiently to give patterns averaging about 70% of the shot in a 30" circle at 40 yards. This is known as full choke boring, and is intended for long range shooting. The following table shows the percentage of shot that can be expected in the various choke borings:

CHOKES	% at 40 yards in 30" circle
Full Choke	70
Modified Choke	60
Improved Cylinder	50
Cylinder	40

CHOKE USES — A shooter should select the degree of choke boring for his barrel according to the range at which most of his shots are taken. Some kinds of birds and small animals are usually shot at close range, others at long range. Also, some persons are inclined to shoot quickly, while others tend to "ride" their game or targets. Most hunters find the following borings give the best results, though much depends on shooting conditions and personal preferences.

Full Choke .....ducks, geese, pheasant, crows, turkey, fox, racoon, trap shooting.

Modified Choke .....rabbit, woodcock, doves, squirrels, also all-round usefulness including ducks, quail, etc.

Improved Cylinder, Special Skeet .....quail, grouse, partridge, rail, skeet shooting, guard duty, riot, rifled slugs.

BARREL LENGTH — Shotgun barrels are usually supplied in 26, 28, and 30 inch lengths; also 20 and 22 inch lengths with rifle sights. The longer barrels are often preferred for long range shooting because the greater length gives a longer sighting radius, permitting more accurate pointing. Long barrels also minimize discomfort of muzzle blast, and the added weight reduces recoil. Short barrels are often preferred for close range shooting because they are easier to handle for quick shots . . . especially in heavy brush.

It is not practical to cut off a shotgun barrel. To do so will change the shooting qualities of the gun because the choke constriction is within the last two inches at the muzzle end. It is also impractical to cut down the length of the barrel and then attempt to restore the original degree of choke boring because the metal necessary for this will already have been reamed out at the time of manufacture.

A barrel may be rebored from one degree of choke to a more open degree, full to modified, modified to improved cylinder, etc., as long as the barrel length is left unchanged.

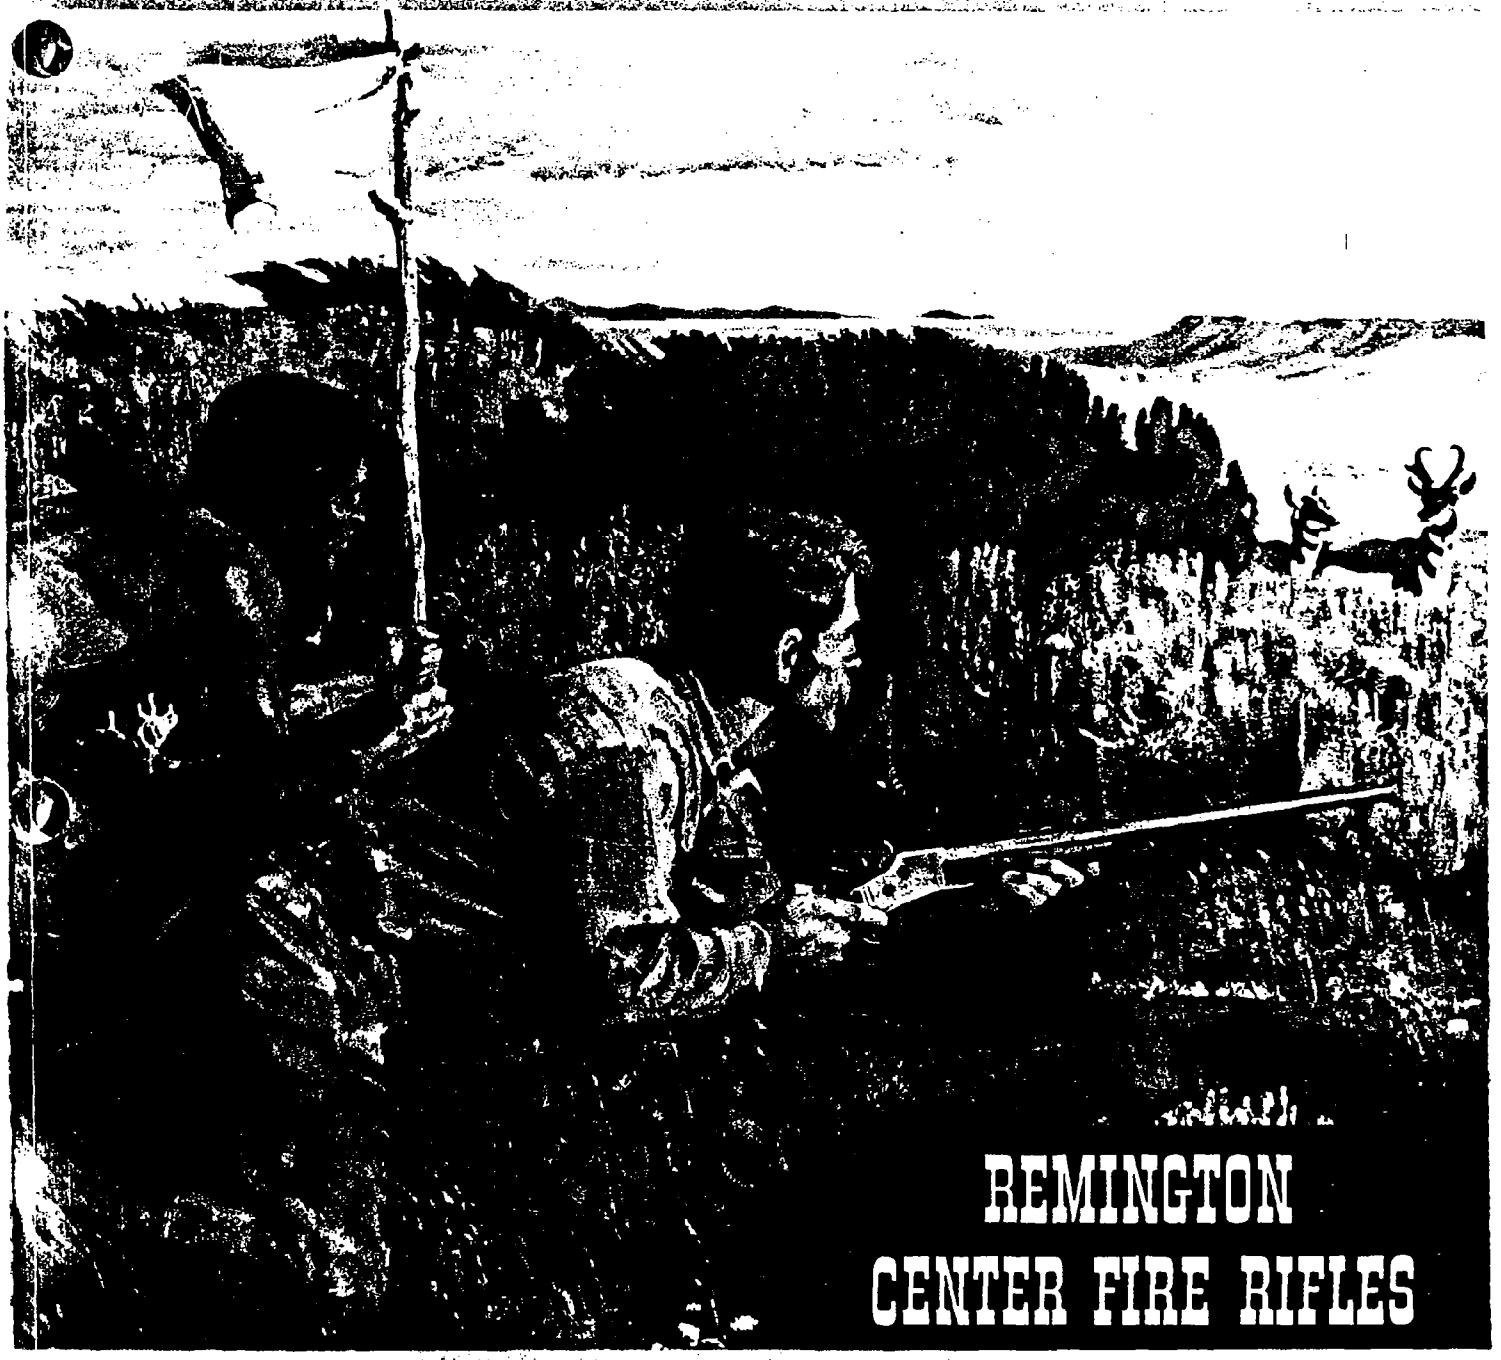
1966



TOLLING UP ANTELOPE—1870's. When early hunters needed meat the wary, prong-horned antelope was in large supply. Wise conservation halted a serious decline, and again large bands are hunted in 10 Western states.

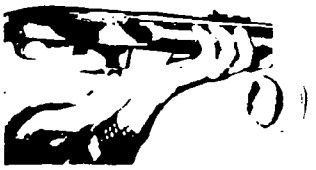
R2525162

REMINGTON

Model 742 "Woodsmaster"

AUTOMATIC BIG GAME RIFLE

1966

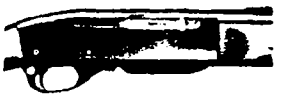


FAST, EASY LOADING, Interchangeable — 4 cartridge magazine facilitates loading and unloading. Extra loaded magazines are easy to carry in pocket.

NEW 742 BDL DELUXE RIFLE with RK-W Wood Finish, Basket Weave Checkering, Monte Carlo Stock and Cheek Piece, Step Receiver . . . in 30-06 and 308 Calibers

IF YOU'RE AN AUTOMATIC FAN . . . then the 742 "Woodsmaster" is your gun. There's meat in camp whenever you're shooting the Remington Model 742 Automatic . . . the modern rifle that's built for speed and power. You're packing a ton and a half of muzzle energy in the world's most powerful automatic hunting rifle — the only one that handles the pile-driving force of that All-American 30/06 Springfield cartridge (available in 9 bullet weights and styles for every kind of American game from woodchucks to grizzlies). Fast, gas-operated action soaks up recoil. No tooth-rattling "kick", no loss of power and almost no muzzle whip. That's why you're back on target before your trigger finger can squeeze off a second shot. The 742 Automatic lets you concentrate on aiming and not on working the action. In fact, this modern light weight Remington powerhouse actually reloads itself faster than you can shoot! Doubt it? Try it yourself the next time that big buck busts out of the brush. Model 742 "Woodsmaster" is available in 30/06 Springfield, 280 Remington, 308 and 6 m/m Remington. If you hunt in heavy brush country, you'll be interested in the short barrel carbine model, in 30/06 and 308 calibers. Both regular and carbine models have the new custom fine line checkering.

EXTRA STRONG, DEPENDABLE. Solid steel receiver, world's strongest bolt and rotary multiple-lug breech lock make Model 742 extra strong, safe, dependable . . . allow it to be chambered for super powerful calibers like the 30/06.



AMAZING "POWER-MATIC" ACTION — works on jet airplane principle. Gas moves rearward to operate action. "Jet" effect forces rifle forward—softens recoil with no power loss!

ROTARY MULTIPLE-LUG BREECH BOLT locks bolt and barrel together securely. Insures constant head space. Same exclusive design as on famous Remington Model 760 "Gamemaster."

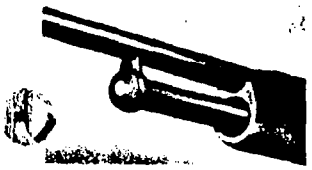
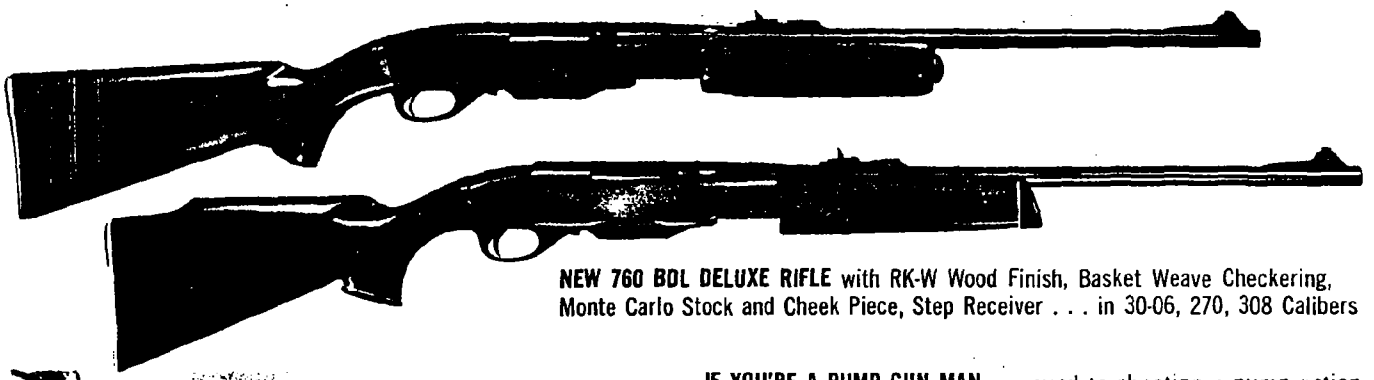
REMINGTON Model 760 "Gamemaster"

PUMP ACTION BIG GAME RIFLE

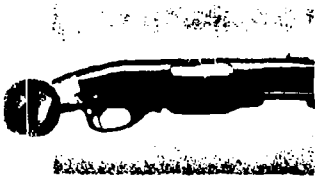


AMAZING ACCURACY—Free floating barrel gives the kind of accuracy that means meat on the table, more first-shot hits.



NEW 760 BDL DELUXE RIFLE with RK-W Wood Finish, Basket Weave Checkering, Monte Carlo Stock and Cheek Piece, Step Receiver . . . in 30-06, 270, 308 Calibers

LIGHTNING FAST ACTION — A flick of your forearm keeps you shooting; double action bars prevent twisting and binding. Pumping is effortless, like a ball-bearing action.



REMINGTON FIRE CONTROL trigger must be released and squeezed for each shot — can't fire unless action is completely closed. An important safety feature.

EXCEPTIONAL TRIGGER MECHANISM. No backlash, drag or creep. Convenient, positive cross-bolt safety.

IF YOU'RE A PUMP GUN MAN . . . used to shooting a pump action shotgun, then the Remington Model 760 is the gun you'll want. You'll stop 'em and drop 'em if you're carrying a light weight, fast-handling Remington Model 760 "Gamemaster." It's the only pump action big game rifle made that's chambered for the popular and powerful 30/06 Springfield cartridge. Five lightning-fast shots are yours at the flick of your wrist . . . one more reason why this rifle has been a consistent winner in the International Running Deer Matches. Pump action is slick, smooth — so fast and effortless, shooters say it works like a "ball-bearing" action. An extra loaded clip magazine in your pocket means you can reload in seconds . . . you've reserve fire power at your fingertips. The Model 760 "Gamemaster" is another member of the Remington family of modern guns — rugged, dependable, trouble-free with the famous rotary multi-lug bolt for extra strength. Custom, fine line checkering make it a standout in any gun rack. Another modern Remington gun "that's better — because *it's made better*" . . . in six powerful calibers: 223 Remington, 280 Remington, 270, 30/06, 308, 35 Remington. Made in regular, carbine and deluxe models.

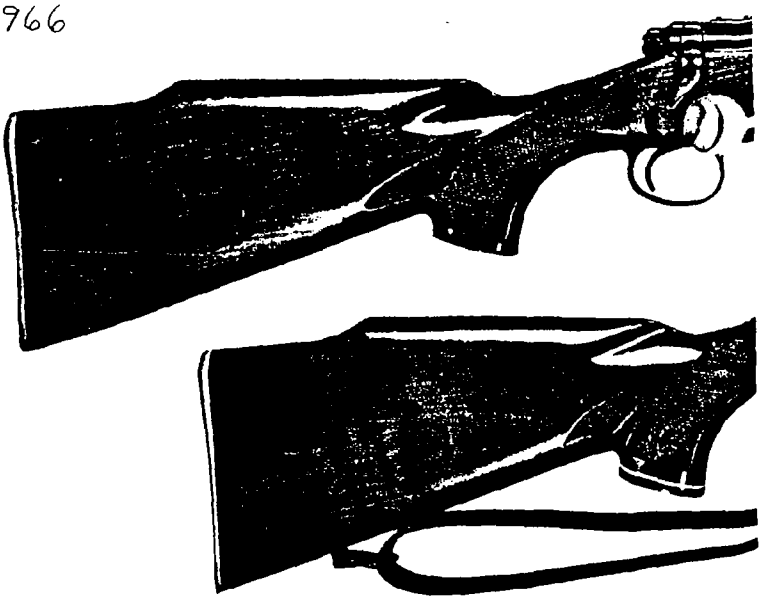
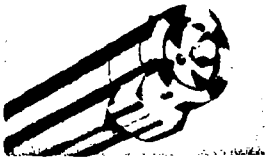
Model 700

1966



WORLD'S STRONGEST BOLT ACTION. Cartridge head is encased and supported by ring of solid steel. When action is closed, three rings of steel support the cartridge head. It's super-strong.



BOLT KNOB is checkered, top and bottom. Grip is custom checkered. BDL Model has grip cap and white spacers.

MONTE CARLO STOCK and CHEEK PIECE make the model 700 good to look at . . . and good to shoot. There's a better cheek-to-stock fit with a Monte Carlo stock and cheek piece . . . which means quicker, surer sight alignment with either scope or iron sights.

NEW FEATURES

- **BEAUTIFUL, SUPER-TOUGH RK-W FINISH,** the most durable wood finish known, is now on all Model 700 Rifles. Du Pont-developed RK-W finish is similar to that used on bowling pins. No wonder it's good on guns.
- **LONG 22" BARRELS** are now standard on the following rifles: 6 m m Rem., 243 Win., 270 Win., 280 Rem., 30-06 and 308 Win. Varmint and Magnum calibers are unchanged at 24" and Safari calibers at 26".
- **SIGHTS ARE NOW DETACHABLE.** If a shooter who uses a scope prefers to remove the iron sights, it's now an easy matter. Filler screws supplied in the receiver will plug the sight fastening holes.
- **THE 700 ADL AND BDL MODELS** are now available in the new hot varmint caliber, the 22-250 Remington. Muzzle velocity is 3760 feet per second.

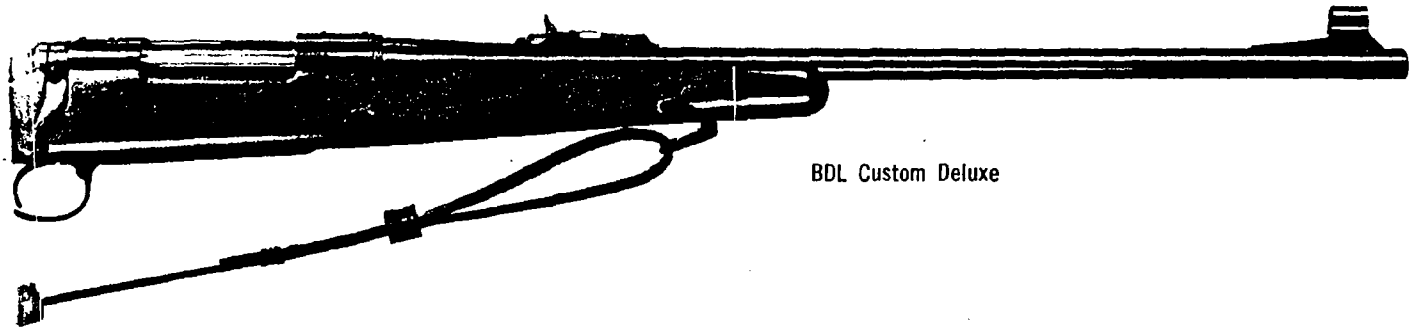
ADL Deluxe

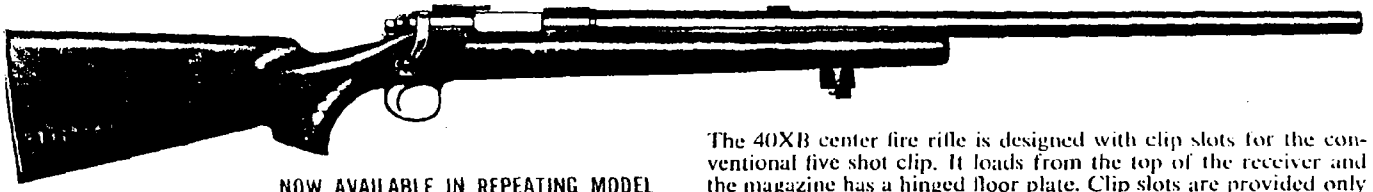


BDL Custom Deluxe

When the Model 700 was first developed, our tests proved that we had produced the finest center fire bolt action rifle ever made. Now our sales records have proven it again. Since its introduction, shooters have bought more Remington Model 700's than any other center fire bolt action rifle on the market in its price class. And their reasons for buying make good sense. For example:

The Remington 700 bolt action is designed for the real rifleman. *The shooter* who wants the accuracy bonus of Remington's famous precision rifling and short, crisp trigger pull. *The hunter* who appreciates the comfort of a cheek piece and Monte Carlo comb on an all-purpose stock that gives superb balance and perfect alignment with either 'scope or open sights. *The craftsman* who loves the traditional beauty of fine checkering. And it has a beautiful wood finish that is tough, hard, scratch-resistant — gives lasting protection against hard usage and bad weather. The 700 owner also gets the world's strongest bolt action. The bolt head completely encloses the cartridge case in a ring of steel. And the Model 700 is available in 14 popular calibers.

REMINGTON MODEL 40XB TARGET RIFLE IN CENTER FIRE MODEL



NOW AVAILABLE IN REPEATING MODEL
for use in National Match Course

SPECIFICATIONS

ACTION	Bolt, single Shot & Repeating
CALIBERS — SINGLE SHOT	222 Rem., 222 Rem. Mag., 223 Rem., 22-250, 6 mm x 47 mm (6 mm .222 Mag.), 6 mm International (6 mm on .250 Sav. case), 6 mm Rem. (.244 chamber), 6.5 x 55 (For International Match Shooting), 7 mm Rem. Mag., 7.62 mm Nato (308 Win.), 30-06, 30-338, (.30, 7 mm Mag.).
REPEATING	7.62 mm Nato (308 Win.), 222 Rem., 222 Rem. Mag., 223, 6 mm x 47 mm, 6 mm Rem., 6 mm Int., 22-250. Calibers whose over-all loaded length is equal to or shorter than the 308.
CAPACITY	Single loading and 5-shot clip repeater. (Loads from top of receiver).
SIGHTS	Redfield Olympic front & rear sights optional.
SAFETY	Thumb operated safety, positive.
RECEIVER	Drilled and tapped for metallic sights and telescope mount bases. Target type blocks furnished.
ARREL LENGTH	27¼" free floating. Overall Length of rifle 47".
GTH OF PULL	13½". Trigger adjustable 1 to 3½ lbs. ? ounce Trigger available at $40. extra.
STOCK	Selected American Walnut. Fore-end stop and sling swivel adjustable on base.
RAGE WEIGHT	Without Sights: Heavy Barrel 11¼ lbs., Standard Barrel 9¾ lbs.

The 40XB center fire rifle is designed with clip slots for the conventional five shot clip. It loads from the top of the receiver and the magazine has a hinged floor plate. Clip slots are provided only in calibers with 308 head diameter. Repeating model is available in 7.62 mm Nato (308), 222 Rem., 222 Rem. Magnum, 223, 6 mm x 47 mm, 6 mm Rem., 6 mm Int., 22-250. The 40XB center fire repeating rifle is ideal for the rapid fire events, especially in the 7.62 mm Nato (308) caliber, because of its shorter bolt throw and extreme accuracy, plus its optimum weight for "over the course" competition.

As a single shot model, the Remington Model 40XB center fire is offered in several center fire calibers as listed at left. The action is hand bedded and the barrel is free floating . . . for superior accuracy. The heavy barrel model meets the National Bench Rest Shooters Association rules for the Heavy Varmint Class with most target telescopes. (Max. weight 13½ lbs.) Standard barrel model can be made to fit the NBRSA Light Varmint Class rules by using a light scope and removal of wood from beneath the barrel and butt plate. (Max. weight 10½ lbs.) Stainless steel barrels are supplied as standard on 7 mm Rem. Magnum and 30-338 at extra charge. Stainless steel is also recommended for 22-250 and 6 mm Rem. (at extra charge.)

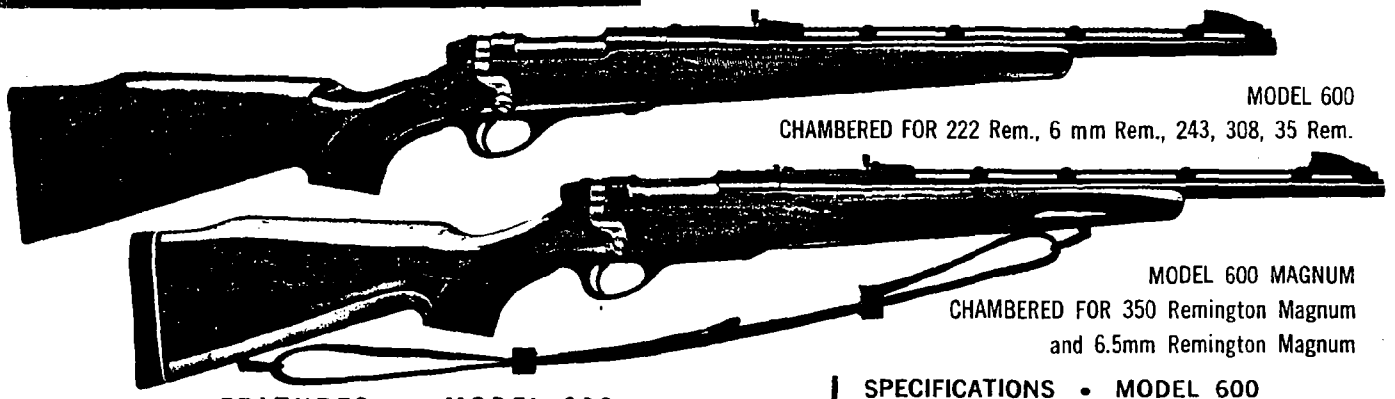
REMINGTON Model 600

1966



MODEL 600
CHAMBERED FOR 222 Rem., 6 mm Rem., 243, 308, 35 Rem.

MODEL 600 MAGNUM
CHAMBERED FOR 350 Remington Magnum
and 6.5mm Remington Magnum

FEATURES • MODEL 600

CUSTOM CHECKERING on fore-end and grip is fine-lined, uniform, good looking. We suggest you do as other smart gun buyers do, compare this checkering with that found on other makes of guns. Then judge for yourself.

MONTE CARLO STOCK means a better cheek-to-stock fit for quicker, surer sight alignment. *Rich American Walnut Stock has all-purpose dimensions* which give perfect alignment with either a scope or open sights. Functional shape of fore-end provides a good reliable, non-slip grip for steady holding.

WORLD'S STRONGEST BOLT. Cartridge head is completely encased by a ring of solid steel. When bolt is closed, three rings of steel support the cartridge head. Strong? . . . there's none stronger.

A LIGHT WEIGHT POWERHOUSE — Only 6 pounds but packs more power per pound than other carbines, from the brush-busting 35 Remington to the high velocity, flat trajectory 222 Remington coyote-walloping caliber.

VENTILATED RIB. *It's the first time a domestic commercially produced* sporting rifle has ever been designed with a ventilated rib. (Another first for Remington). It helps you aim, gives a definite sight-line so you get on running game faster.

FAST-HANDLING MODEL — Short over-all length (37¼") makes Model 600 just right for hunting in heavy brush country because you can handle it faster, easier. It's a great saddle gun, too — fits a scabbard neatly *or tucks in the rack of a pick-up truck.*

FINEST ACCURACY. Here's where Model 600 really shines. Free floating barrel of Remington proof steel is precision rifled to Remington's exact standards. Trigger pull is short, crisp and clean. At the factory and in the field we shot close groups — and so will you. It was designed to shoot this way.

FORWARD S BOLT HANDLE hugs the stock — doesn't stick out — slips in and out of scabbard with ease. Half knob is serrated on the bottom so you get a good secure grip.

ROTATING THUMB SAFETY is conveniently located at the rear of the receiver where you can get at it *in a hurry. Rearward for "safe". Forward* for "fire."

BLADE RAMP FRONT SIGHT has brass bead. Sturdy U notch rear sight is adjustable for elevation and windage. Receiver drilled and tapped for scope and receiver sights.

TRIGGER is extra wide and corrugated; finger fits securely. Trigger pull is crisp and clean — no creep, no spongy action.

MODEL 600 MAGNUM Same features as above, except:

STOCK. A handsome lamination of walnut and beech that provides *tremendous strength, stability and beauty. It's warp-free and waterproof.*

WOOD FINISH is famous Du Pont RK-W that's tough, scratch and water resistant, the most durable wood finish known. It's similar to that used on bowling pins.

RECOIL PAD cushions the recoil of the game-getting 350 Rem. Mag. and 6.5 mm Rem. Mag. calibers. Black and white spacers add to good looks.

MAGNUM BARREL is designed to handle both powerful hot Mag. calibers. Free floating barrel provides extreme accuracy.

SCOPE BACK-UP Strong bracket of steel forms scope mount back-up which takes vibration and recoil. Scope can also be mounted in forward *position which provides long eye relief for instant sighting.*

STRAP and QUICK RELEASE SWIVELS are standard equipment on Model 600 Magnum.

WEIGHT. *Just 6½ well-balanced pounds . . . and short over-all length* (37¼") make it a honey to handle in heavy cover

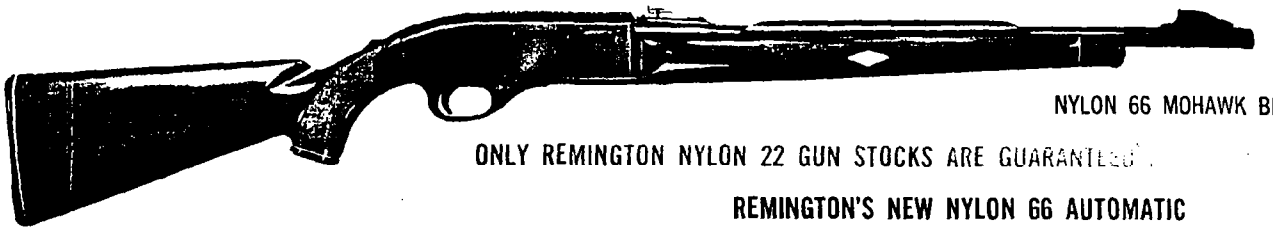
NYLON 22s



NYLON 66 MOHAWK BROWN

ONLY REMINGTON NYLON 22 GUN STOCKS ARE GUARANTEED*

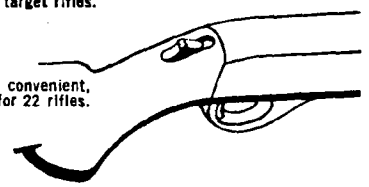
NYLON 66 APACHE BLACK

The Nylon 66 is also made in an Apache Black deluxe model. The stock is Du Pont "Zytel" black nylon and both the barrel and the receiver cover are chome plated. Inside, it's the same reliable, trouble-free rifle as the standard mohawk brown model.

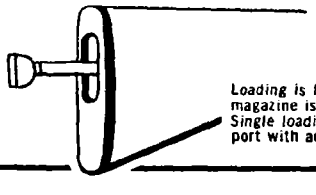
The Nylon 66 is the most rugged automatic 22 rim fire rifle made. Alaskan fishermen think so, too; they use it on their fishing boats to keep marauding sea lions out of their nets. Salt spray, foul weather, fish slime and mud knock out other 22's. But not the Nylon 66. This is why these fishermen look on the Remington Nylon 66 as almost a "tool-of-the-trade." Still further proof: Trappers in the humid bayous along the Gulf States swear by the "gun with the nylon stock." Why? Same reasons; it's tough, it works under all conditions, it stands up . . . and it's exceptionally accurate.

Ask your dealer to see the fabulous Nylon 66, in Apache Black or Mohawk Brown. They're both winners.

It's amazingly accurate . . . barrel and fore-end are precisely mated to give outstanding accuracy. Structural-nylon permits three-point bedding found only in costly target rifles.



Top-of-grip thumb safety. The most convenient, easiest to use safety ever designed for 22 rifles.



Loading is fast, easy — a twist of wrist and tubular magazine is removed or replaced through butt plate. *Single loading for beginner is handled smoothly through* port with automatic ejection of fired round.

REMINGTON'S NEW NYLON 66 AUTOMATIC

Remington's new Nylon 66 is setting an amazing record in sales and customer acclaim. Here's why!

Structural-nylon is many ways better than conventional material for the gun's stock and fore-end. Because this super-strong material doesn't warp, the same barrel bedding principle used on the world's most expensive target rifles is yours. The result is an automatic that nails targets, tin cans and small game with tremendous accuracy. This is the same model rifle used to establish an accuracy record on hand-thrown 2½" wood blocks. Only six misses out of over 100,000 blocks thrown . . . and without a malfunction.

Receiver parts, stock and barrel are a bold interlocking of steel and structural nylon that creates the most trouble-free automatic action ever known. There's no need for lubrication because friction-free parts glide on "greaseless bearings" of nylon. Perfect checkering makes for fast, sure holding, and the convenient top-of-grip thumb safety slips off "safe" in a wink for running game shots. The handsome Nylon 66 has white diamond inlays and white line spacers at grip cap, butt plate and fore-end tip. Available in Mohawk Brown and Apache Black with chrome plated barrel and receiver.

SPECIFICATIONS

	NYLON 66
ACTION	Automatic
CALIBER	22 long rifle Rim Fire.
CAPACITY	Tubular magazine thru butt stock. Holds 14 long rifle cartridges.
BARREL	19⅝ inch, precision rifled, Remington Proof Steel.

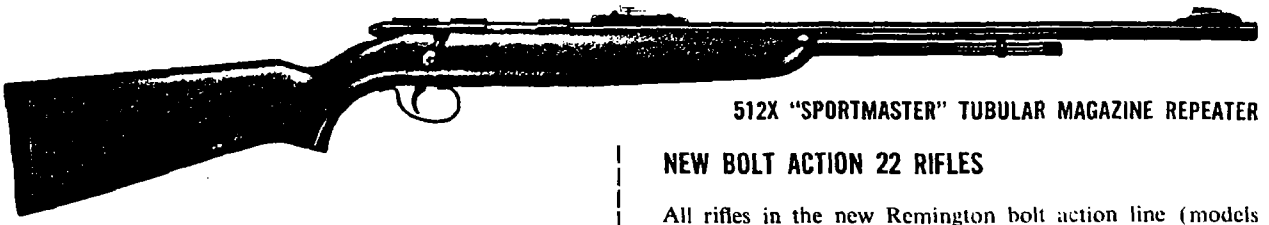
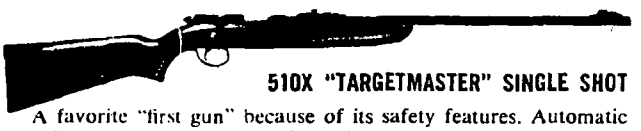
REMINGTON BOLT ACTION 22s
WITH AMERICAN WALNUT



512X "SPORTMASTER" TUBULAR MAGAZINE REPEATER

NEW BOLT ACTION 22 RIFLES

All rifles in the new Remington bolt action line (models 510X, 511X, and 512X) have an American Walnut stock, new 24-inch precision barrel, fully adjustable rear sight and blade ramp front sight. In addition, the receiver is grooved for 'scope mounts and all rifles have a red dot firing indicator, side lever thumb safety, self cocking bolt, double cocking cams, double locking lugs, double extractors, bright steel bolt with swept back, sure-grip oval ball handle. Pick the one that suits you best; model 510X is a single shot, model 511X a 6-shot clip magazine repeater and 512X shown above is a big capacity tubular magazine repeater. All three have true Remington high quality throughout. See them at your dealer's. He'll be glad to point out their many exclusive features that make them excellent buys.



510X "TARGETMASTER" SINGLE SHOT

A favorite "first gun" because of its safety features. Automatic safety goes on when bolt is cocked and red dot shows when rifle is ready to fire. Also available in smooth bore model for shot cartridges.

511X "SCOREMASTER" CLIP MAGAZINE REPEATER

HOLDS 6 cartridges; short, long or long rifle.

MODEL 514

Here is an excellent 22 caliber rifle . . . at a popular price. It's a single-shot bolt action model with self-cocking bolt, rotary thumb safety and takes all 22 caliber cartridges — short, long or long rifle; standard velocity or high speed. For the young shooter, it's also available as Model 514 BR "Boy's Rifle" with cut down stock.

SPECIFICATIONS

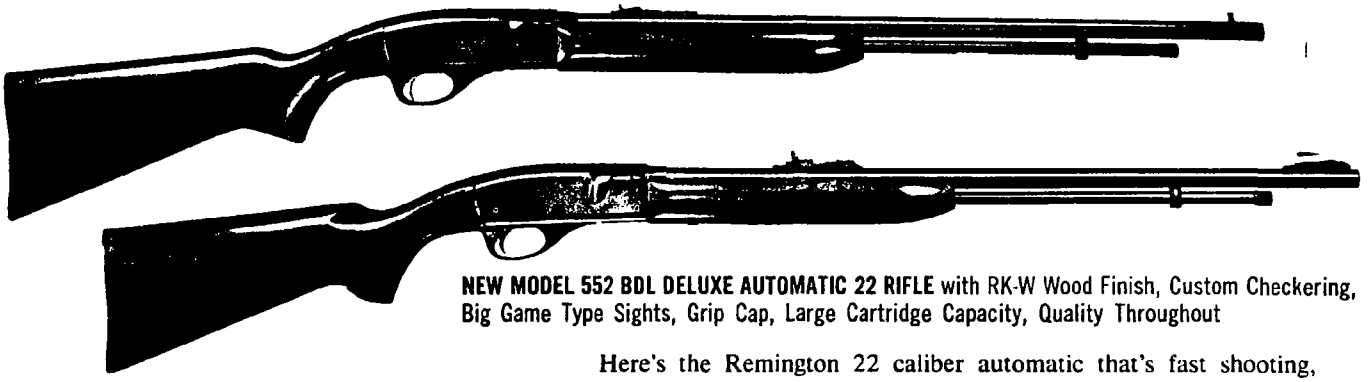
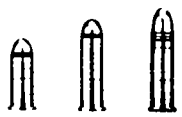
AUTOMATIC

1966

Model 552 "Speedmaster"



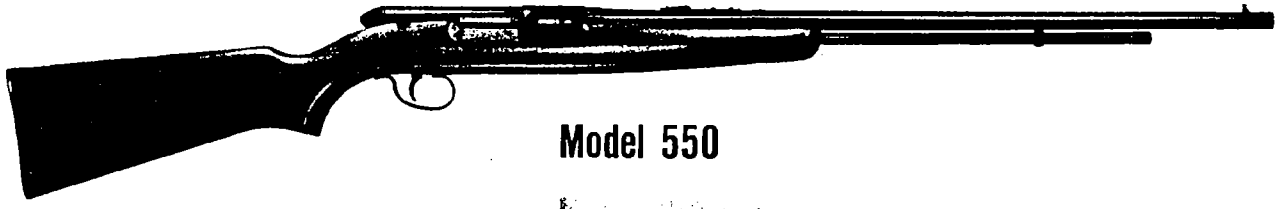
NEW MODEL 552 BDL DELUXE AUTOMATIC 22 RIFLE with RK-W Wood Finish, Custom Checkering, Big Game Type Sights, Grip Cap, Large Cartridge Capacity, Quality Throughout



VERSATILE. Shoots 22 Short, Long and Long Rifle cartridges interchangeably without adjustment. Load 'em up in any order and start shooting. Your trigger finger does all the work.

SINGLE LOADING — AUTO EJECTION. For use as a single shot rifle, pull back bolt, drop cartridge into the ejection port, release bolt and you're ready to shoot. Empty cartridge case will be ejected automatically.

Here's the Remington 22 caliber automatic that's fast shooting, accurate, nicely balanced . . . the rifle you'll want for small game hunting, controlling crop-destroying and marauding pests, or for just plain fun-shooting. The Model 552 is another member of Remington's "family of guns"; looks, handles and shoots like its big brother, the Model 742 big game rifle. "Speedmaster" has every feature the shooter wants, such as: twenty shots as fast as you can squeeze the trigger, rich walnut stock, cross bolt safety, receiver grooved for "tip-off" 'scope mounts. Also available in the short barrel (21") carbine model, the Gallery Special and the new deluxe model. Pick a 552 off the rack at your dealer's — heft it — throw it to your shoulder. We think you'll agree, it's the rifle that "feels right" . . . because it's made right.



Model 550

Rapid fire, extra ruggedness and dependability are points shooters like about this Remington automatic. It's the famous 22 caliber rifle that shoots Short, Long and Long Rifle cartridges with no adjustment. Mix them up, drop them in the tubular magazine and fire away. Model 550 takes 'em as they come. Other fine features are: Large capacity, up to 22 Shorts, American walnut stock, fine accuracy, thumb safety, receiver grooved for "tip-off" 'scope mounts. The Model 550 is well-built, well-designed — an exceptionally fine all-around rifle for the hunter or plinker . . . and good for week-end family fun, too.

This rugged and dependable automatic will handle, interchangeably and without adjustment, Short, Long and Long Rifle cartridges.

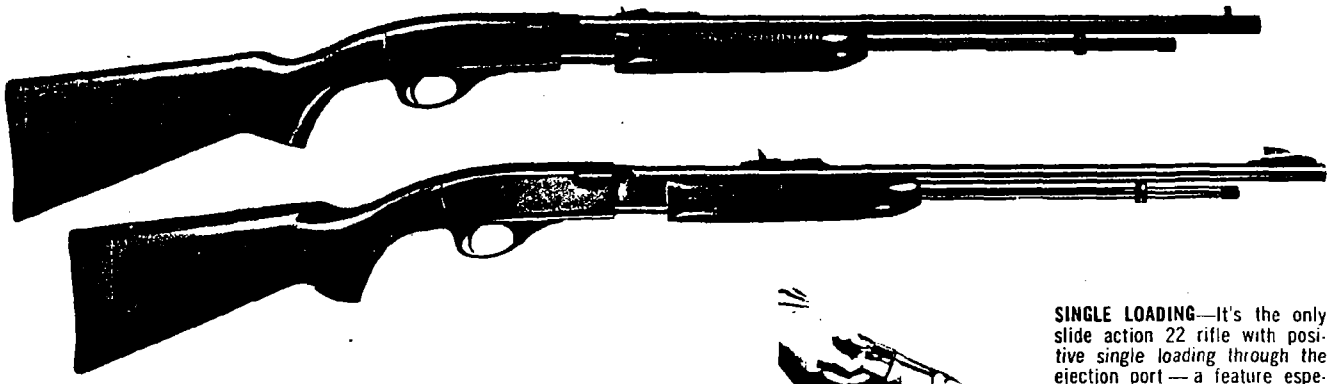
REMINGTON

PUMP ACTION

22 RIM FIRE RIFLE

Model 572 "Fieldmaster"



NEW MODEL 572 BDL DELUXE PUMP ACTION 22 RIFLE
with RK-W Wood Finish, Custom Checkering, Big Game Type Sights, Grip Cap, Large Cartridge Capacity, Fast Smooth Action

For the shooter who likes a pump action 22 cailber rifle, the "Fieldmaster" Model 572 is best . . . action is slick and smooth. Exclusive cartridge feeding design prevents jamming, permits easy single loading. By simply removing the inner magazine tube, parent or instructor can convert the "Fieldmaster" into a single shot rifle. Receiver has dovetail grooves for "tip-off" 'scope mounts. Capacity is large; tubular magazine holds 20 short, 17 long or 15 long rifle cartridges. It has a cross bolt safety conveniently located at the rear of the trigger guard where it can be snapped on or off with the index finger. The Model 572 is beautifully streamlined and balanced — rugged and dependable like Remington big game rifles and shotguns.

SINGLE LOADING—It's the only slide action 22 rifle with positive single loading through the ejection port — a feature especially important to parents and shooting instructors.

FAST, POSITIVE ACTION — short stroke operation is fast and smooth . . . ideal for plinking or for getting off quick shots at hard-to-hit game. The Model 572 "Fieldmaster" shoots as fast as you can flick the fore-end.

SHOOTERS FORGET—but a "Fieldmaster" won't. For extra safety it's designed not to fire if the trigger is pressed while the action is being closed. Trigger must be released and pressed for each shot.

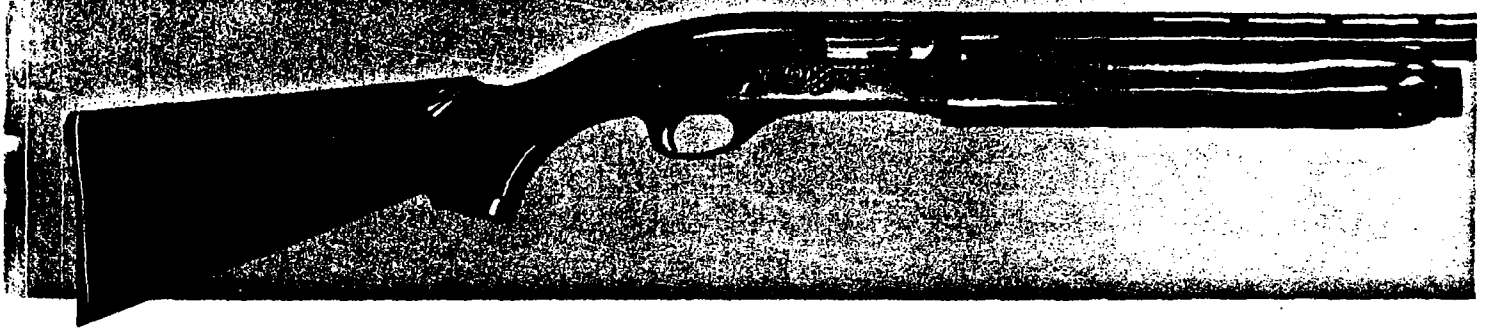
Remington Model 1100 Automatic Shotgun

1967



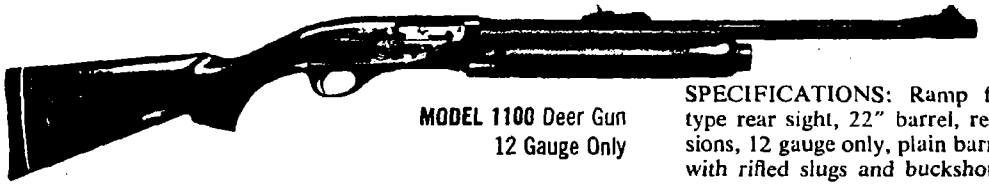
"Young Reliable" that's what they're calling the Remington Model 1100. In just a few years, shooters throughout the country have made it the "most popular" — "most wanted" automatic shotgun . . . and for good reasons, too. They tell us:

"It works, never jammed on me once, and I hunted every weekend."

"Recoil is light" writes a trap shooter. "My boy says the kick doesn't bother him a bit . . . and it doesn't. He's shooting better than ever." Light recoil also pays off in doubles, too; for the trap shooter, skeet shooter and hunter.

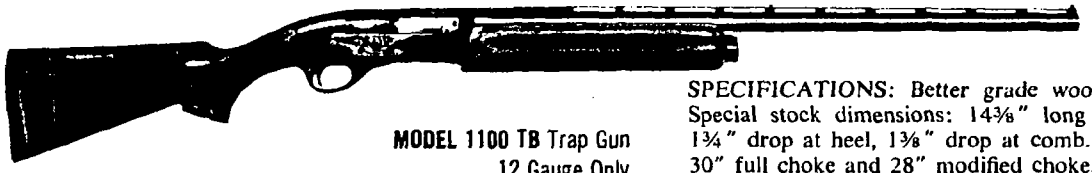
"Finish is good—stands up" reports a West Coast duck and goose shooter who shot it throughout the season . . . "And we get some mighty wet weather out here . . . it's tough on almost everything."

"It's a beautiful gun" — is a typical comment. And no wonder — with its fine-lined checkering, Du Pont RK-W wood finish, scroll work, steel receiver, white line spacers and tear drop pistol grip. Your dealer has 'em in 12, 16, and 20 gauges, with both plain and ventilated rib barrels.



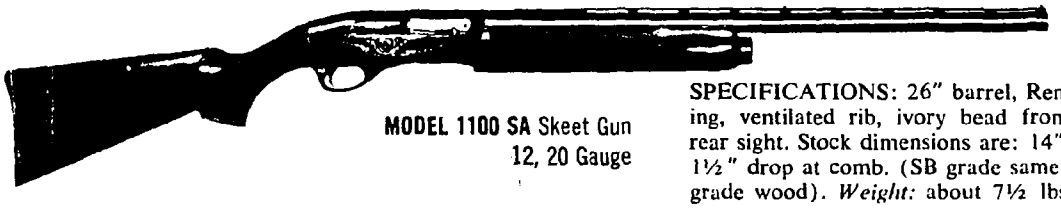
MODEL 1100 Deer Gun
12 Gauge Only

SPECIFICATIONS: Ramp front sight and adjustable rifle type rear sight, 22" barrel, recoil pad, standard stock dimensions, 12 gauge only, plain barrel. Choke gives optimum results with rifled slugs and buckshot. Weight: about 7¼ lbs.



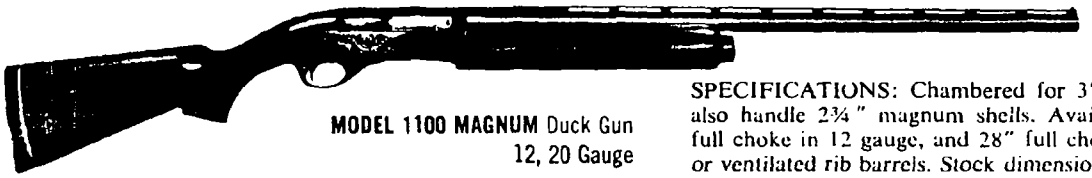
MODEL 1100 TB Trap Gun
12 Gauge Only

SPECIFICATIONS: Better grade wood, rubber recoil pad. Special stock dimensions: 14⅜" long including recoil pad, 1¾" drop at heel, 1⅜" drop at comb. Available in 28" and 30" full choke and 28" modified choke, ventilated rib barrels only. Ivory bead front sight, white metal rear sight. Available with optional Monte Carlo stock at extra charge. *Weight:* about 8¼ lbs.



MODEL 1100 SA Skeet Gun
12, 20 Gauge

SPECIFICATIONS: 26" barrel, Remington special skeet boring, ventilated rib, ivory bead front sight and white metal rear sight. Stock dimensions are: 14" long, 2½" drop at heel, 1½" drop at comb. (SB grade same specifications with better grade wood). *Weight:* about 7½ lbs.



MODEL 1100 MAGNUM Duck Gun
12, 20 Gauge
(shown with ventilated rib barrel)

SPECIFICATIONS: Chambered for 3" magnum loads. Will also handle 2¾" magnum shells. Available in 28" and 30" full choke in 12 gauge, and 28" full choke in 20 gauge, plain or ventilated rib barrels. Stock dimensions: 14" long including pad, 2½" drop at heel, 1½" drop at comb. Furnished with recoil pad. *Weight:* about 7¾ lbs.

*Fair Trade retail prices in states having Fair Trade laws. Prices subject to change without notice.

SPECIFICATIONS: STYLE — 5 shot gas operated shotgun. 3 shot plug furnished. **GAUGE** — Made in 12, 16 and 20 gauge. **BARREL** — Special Remington ordnance steel. Extra barrel is interchangeable within gauge. **OVER-ALL LENGTH** — 48" (with 28" Barrel). **SAFETY** — Convenient cross-bolt type. **RECEIVER** — Made from solid steel, top matted, scroll work on bolt and both sides of receiver. **STANDARD STOCK DIMENSIONS** — Stock and fore-end: Rich American walnut. 14" long, 2½" drop at heel, 1½" drop at comb. Trap reg., 14⅜" long, 1¾" drop at heel, 1⅜" drop at comb. Monte Carlo, 14⅜" long, 1¾" drop at heel, 1¼" drop at comb, 1¼" drop at M.C. **AVERAGE WEIGHT** — 12 ga. - 7½ lbs., 16 ga. - 7¼ lbs., 20 ga. - 7 lbs.

CUSTOM CHECKERING on stock and fore-end . . . fleur-de-lis design. Checkering is fine-lined, uniform, good looking.

TEAR DROP PISTOL GRIP with attractive white diamond inlay provides a natural, non-slip, comfortable grip.

FORE-END has swept back, streamlined design. Fine checkering and fluting give secure gripping area.

DISTINCT WHITE SPACERS on butt plate and grip cap add attractiveness.

NEW METAL FINISH looks better, wears better . . . because the metal is more highly polished.

BIG 5-SHOT CAPACITY — Easy to load. Four in magazine . . . one in chamber. Three-shot plug furnished.

NEEDS NO ADJUSTMENT — Performs perfectly for different loads; automatically. Shoots high base, low base, 2¾" magnum shells without adjustment.

QUICK-CHANGE BARRELS — They're interchangeable in seconds; no factory fitting is required. Use one gun for all your shooting and get more game, targets, sport.

FASTEST LOADING — Drop a shell in the breech; load another in the magazine in one motion. Load five shells in five seconds.

LIGHTEST RECOIL — Gas action tames recoil; it smooths and cushions . . . and with no loss of power.

RK-W PROTECTIVE FINISH — New Du Pont wood finish is clear. Lets the wood grain show through. It's similar to that used on bowling pins; tough, hard, scratch-resistant . . . gives lasting protection against hard usage and bad weather.

STEEL RECEIVER is made from a solid block of steel for extra strength, ruggedness, dependability.

AVAILABLE IN MAGNUM MODEL — Chambered for 3" magnum shells. Uses 2¾" magnums too. A rugged, dependable shotgun . . . reaches out and drops the high flyers.

DECORATIVE SCROLL WORK on receiver and bolt adds real beauty and value to this gun.

SELF CLEANING — The gas operation of this gun is unusual. It blows dirt and grime away, keeps action bright and shining for long periods of time.

SUPREME DEPENDABILITY — Tests prove the shooting life of this new gun is up to seven times longer than any other automatic shotgun on the market.

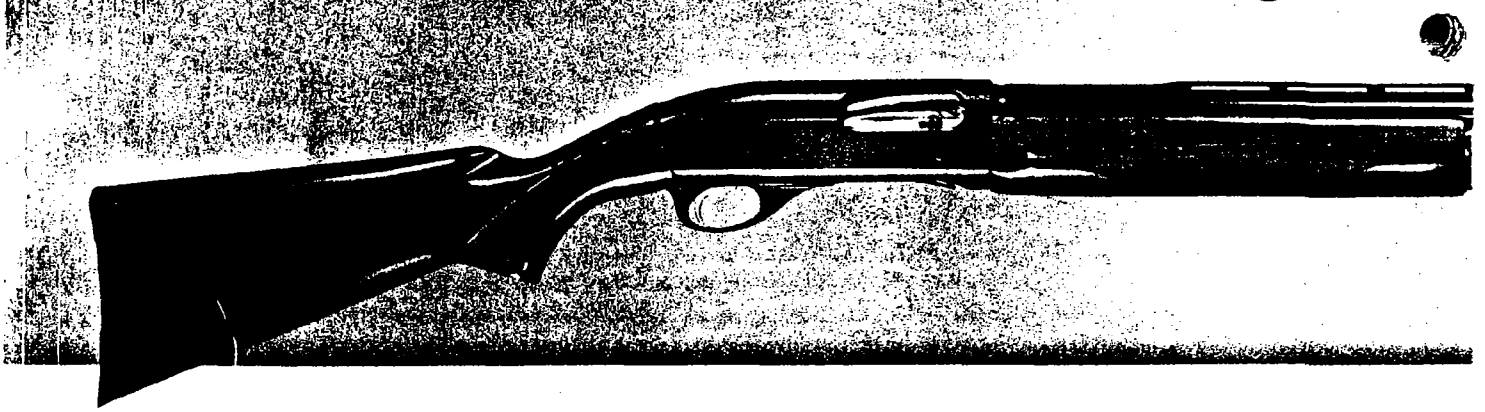
BALANCE AND WEIGHT are just right, only 7½ lbs. in 12 gauge. Can be carried comfortably all day. No sacrifice of steel in barrel or receiver . . . not a "featherweight floater" that's too light to point right.

NEW 20 gauge lightweight Model 1100 with specially selected mahogany stock and fore-end, available in Field Grade Guns and SA Skeet Grade.

R2525180

Remington Model 11-48 Automatic Shotgun

1967



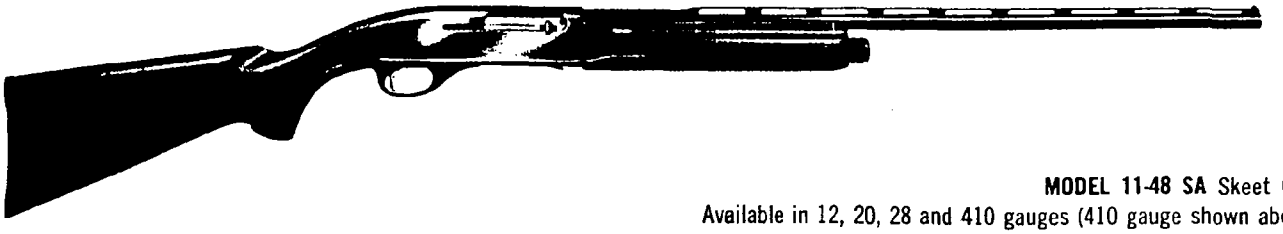
Only Automatic made in All 5 Gauges 12, 16, 20, 28 and 410

The Remington Model 11-48 is an automatic shotgun with a fine reputation that has been earned in the field and wherever skeet targets are thrown. Over a half million proud owners are our best salesmen and they'll tell you the 11-48 is one of the finest automatics on the market. And it is!

It's the only automatic made in 12, 16, 20, 28 and 410 gauges and in the 28 and 410 gauges it's a big favorite with skeet shooters, youngsters, women . . . and hunters who like a small bore shotgun. And speaking of Remington automatic shotguns, they have won more National Skeet Championships than all other brands put together. Here is where shot-after-shot dependability really counts.

Model 11-48 is an excellent value . . . you get a lot of gun for the money, such as: Custom fine-lined checkering on fore-end and stock, receiver milled from a solid block of ordnance steel, rich American Walnut stock and fore-end, 5-shot capacity (in 12, 16 and 20 ga.) and it shoots all brands of ammunition, high and low base plus rifled slugs . . . all without adjustment.

Barrels are interchangeable, too. Takes only a minute to change them and you can do it right in the field. No special tools or factory fittings are required. Dependability, ruggedness, lightweight, fine balance, good looks . . . that's the Remington Model 11-48, a gun that's built the "Remington Way" — to last!



MODEL 11-48 SA Skeet Gun
Available in 12, 20, 28 and 410 gauges (410 gauge shown above)

The 11-48 is available in a skeet model in 12, 20, 28 and 410 gauges and is the only automatic shotgun made in 28 and 410 gauges. It's a great favorite with skeet shooters who demand supreme dependability in the guns they shoot. The Model 11-48 has everything the skeet shooter wants; fine balance, excellent pointing qualities, ruggedness, plus many other features that all add up to higher scores.

SPECIFICATIONS: 26" barrel (25" on 28 and 410 gauges) Remington special skeet boring, ventilated rib barrel, ivory bead front sight and white metal rear sight. Stock dimensions: 12 and 20 gauge, 14" long, 2½" drop at heel, 1⅝" drop at comb. 28 and 410 gauges, 13⅜" long, 2⅝" drop at heel, 1⅝" drop at comb. Weight: 12 ga. — 7¼ lbs., 20 ga. — 6½ lbs., 28 and 410 ga. — 6¼ lbs.

Remington Model 870 Pump Action Shotgun

1967

Time for a new pump gun? If it is — and you're looking . . . we'd like to help. First of all you want a gun that shucks shells at the flick of your wrist — a gun that's got twin action bars and pumps like a ball-bearing action without twisting or binding. There is a gun like this. It's the slick Remington Model 870!

Want one that's going to last? Of course. Then pick a pump that has a receiver machined from a solid block of steel if you want strength and ruggedness. That's the way a Remington 870 is built . . . we don't make them any other way.

Chances are you'll want to use that gun on different kinds of game. That means interchangeable barrels you can change in seconds — right in the field and without any factory fitting or special tools. With a Remington 870 "Wingmaster" it's so easy — anyone can do it.

Everyone wants a good-looking gun. The 870 is a stand-out in any company and here's why: Custom fine-lined checkering with fleur-de-lis design, rich American Walnut stock and fore-end, and Du Pont-developed RK-W wood finish similar to that used on bowling pins. A Remington 870 pump is one of the best investments you can make in shooting enjoyment — for yourself — as a gift — or, some day, as a pass-along gun to that youngster of yours. So, for good hunting this season, why not take along a new Remington Model 870.

"WINGMASTER" MODEL 870 TC Trap Gun
12 Gauge Only

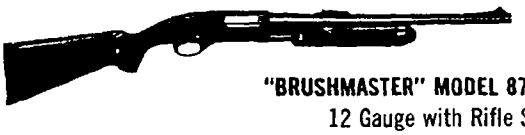
The "Wingmaster" Model 870 TC is the world's most perfectly balanced trap gun!

SPECIFICATIONS: Available with 28" modified, 28" or 30" full choke, ventilated rib barrel. Ivory bead front and white metal rear sight. Recoil pad. Special target grade sear, hammer and trigger assembly. Stock dimensions: 14⅜" long including recoil pad, 1⅞" drop at heel, 1½" drop at comb. Highly figured and finished American Walnut with finely checkered stock and fore-end. Hand fitted action and parts. *Weight:* about 8 lbs. This model also available in TB grade, lower price. Both models available with optional Monte Carlo stock at extra charge.

"WINGMASTER" MODEL 870 SA Skeet Gun

The Model 870 SA, most perfectly balanced pump action shotgun, is ideal for fast second shots at skeet or upland game. Also available in SC grade with specially selected wood and hand checkering.

SPECIFICATIONS: (12 and 20 Gauges) *26" barrel. Remington Special Skeet Boring* Ventilated rib with ivory bead front and white metal rear sight. Stock dimensions: 14" long, 2½" drop at heel, 1⅝" drop at comb. *Weight:* 12 gauge about 7 lbs., 20 gauge about 6½ lbs.



"BRUSHMASTER" MODEL 870 Deer Gun
12 Gauge with Rifle Sight Barrel

The Model 870 Deluxe "Brushmaster," made specially to handle rifled slugs and buckshot, is the latest in smashing power for those fast shots in brush country.

SPECIFICATIONS: The same as standard 870 except as follows: Lightning-fast 20" barrel with fully adjustable rifle-type sights. Stock fitted with rubber recoil pad and white line spacer. Also available in standard model with rifle sights.

"WINGMASTER" MODEL 870 MAGNUM Duck Gun
(shown with ventilated rib barrel) — 12, 20 Gauge

Rugged and dependable for long range shooting! For geese and ducks.

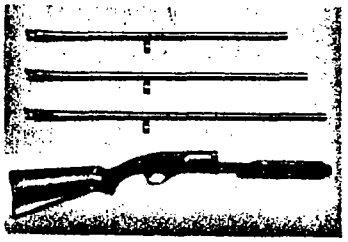
SPECIFICATIONS: 5 shot; chambered for 3" Magnum shells — will also handle 2¾" shells. Variweight and wood 3 shot plug. 12 ga. with 28" and 30" full choke, plain or vent. rib barrel. Steel bead front sight, rubber recoil pad. Checkered stock and fore-end. Stock: 14" long including pad, 2½" drop at heel, 1⅝" drop at comb. 20 ga. furnished in 28" full choke, vent. rib and plain barrels. *Weight:* 12 ga. about 8 lbs., 20 ga. about 7½ lbs., including variweight plug.

R2525183

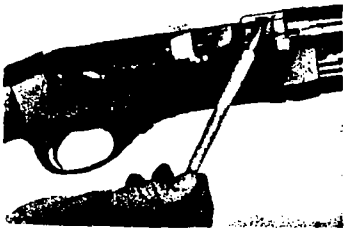
1967

MODEL 870 (shown with ventilated rib barrel)

SPECIFICATIONS: STYLE — 5 shot pump action shotgun. Take down. 3 shot plug furnished. **GAUGES** — 12, 16 and 20. **BARREL** — Special Remington ordnance steel. Extra barrel is interchangeable within gauge. **OVER-ALL LENGTH** — 48½" with 28" barrel. **SAFETY** — Convenient cross-bolt type, positive. **RECEIVER** — Made from solid steel, top matted. **STANDARD STOCK DIMENSIONS** — Stock and fore-end: Rich American walnut. Beautiful checkering. 14" long, 2½" drop at heel, 1⅝" drop at comb. Trap reg., 14⅜" long, 1⅞" drop at heel, 1½" drop at comb. Monte Carlo; 14⅜" long, 1⅞" drop at heel, 1⅜" drop at comb, 1⅜" drop at M.C. **AVERAGE WEIGHT** — 12 ga. - 7 lbs.; 16 ga. - 6¾ lbs.; 20 ga. - 6½ lbs.



QUICK CHANGE BARRELS — Change them in seconds, right in the field. No factory fitting or special tools required. Use one gun for all your shotgun shooting and get more game, targets, sport.



GOOD DESIGN — Barrel is made with a hardened extension into which the breech block must lock before firing. Result . . . longer life, less wear, constant head space.

DOUBLE ACTION BARS prevent twisting and binding, give smooth gliding action for which Remington "Wingmaster" is famous. Many shooters say it works like a ball bearing action. And they're right!

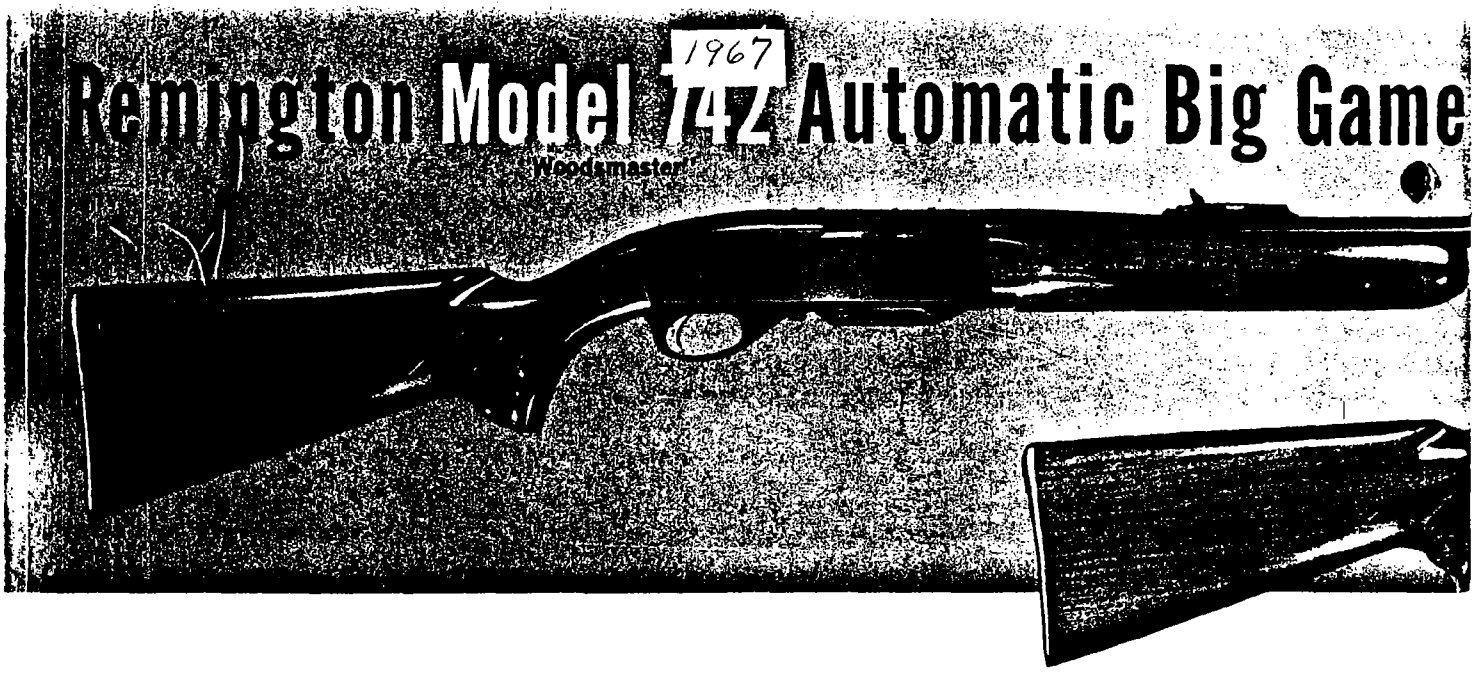
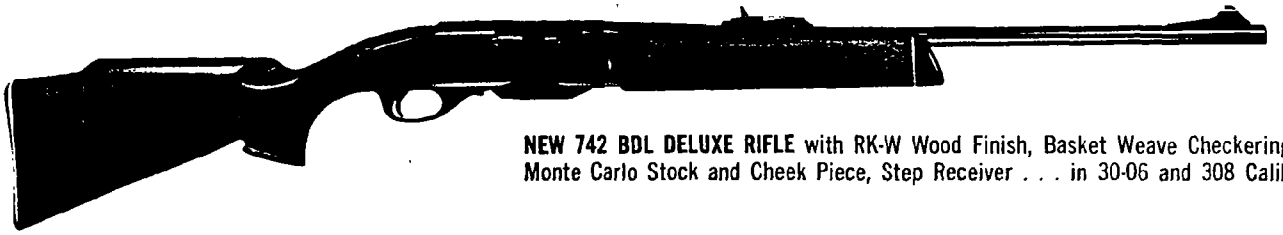
Remington Model 742 Automatic Big Game

1967

"Woodsmaster"

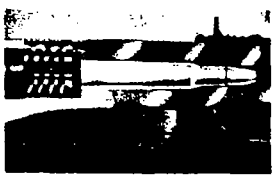




NEW 742 BDL DELUXE RIFLE with RK-W Wood Finish, Basket Weave Checkering, Monte Carlo Stock and Cheek Piece, Step Receiver . . . in 30-06 and 308 Calibers

IF YOU'RE AN AUTOMATIC FAN . . . then the 742 "Woodsmaster" is your gun. There's meat in camp whenever you're shooting the Remington Model 742 Automatic . . . the modern rifle that's built for speed and power. You're packing a ton and a half of muzzle energy in the world's most powerful automatic hunting rifle — the only one that handles the pile-driving force of that All-American 30/06 Springfield cartridge (available in 9 bullet weights and styles for every kind of American game from woodchucks to grizzlies). Fast, gas-operated action soaks up recoil. No tooth-rattling "kick", no loss of power and almost no muzzle whip. That's why you're back on target before your trigger finger can squeeze off a second shot. The 742 Automatic lets you concentrate on aiming and not on working the action. In fact, this modern light weight Remington powerhouse actually reloads itself faster than you can shoot! Doubt it? Try it yourself the next time that big buck busts out of the brush. Model 742 "Woodsmaster" is available in 30/06 Springfield, 280 Remington, 308 and 6 m/m Remington. If you hunt in heavy brush country, you'll be interested in the short barrel carbine model, in 30/06 and 308 calibers. All models, regular, carbine and deluxe have Du Pont RK-W wood finish.

FAST, EASY LOADING, Interchangeable — 4 cartridge magazine facilitates loading and unloading. Extra loaded magazines are easy to carry in pocket.



ROTARY MULTIPLE-LUG BREECH BOLT locks bolt and barrel together securely . . . artillery type. Insures constant head space. Model 760 has same exclusive design.

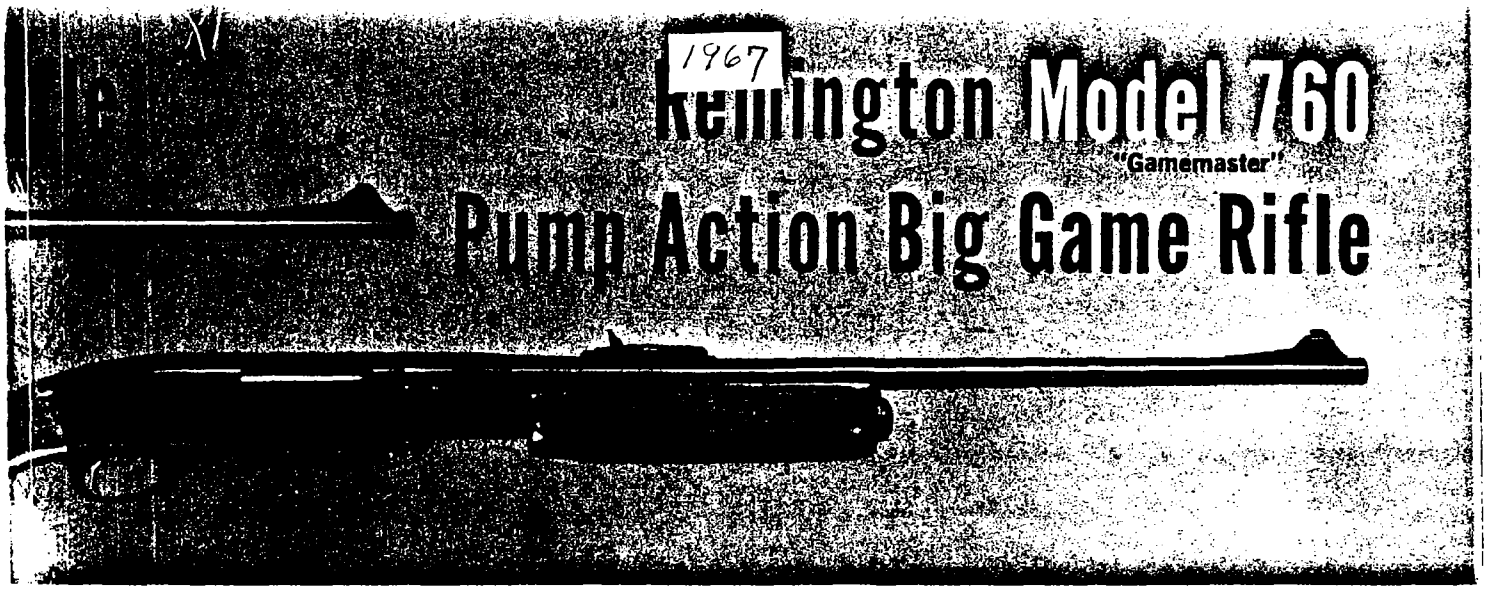
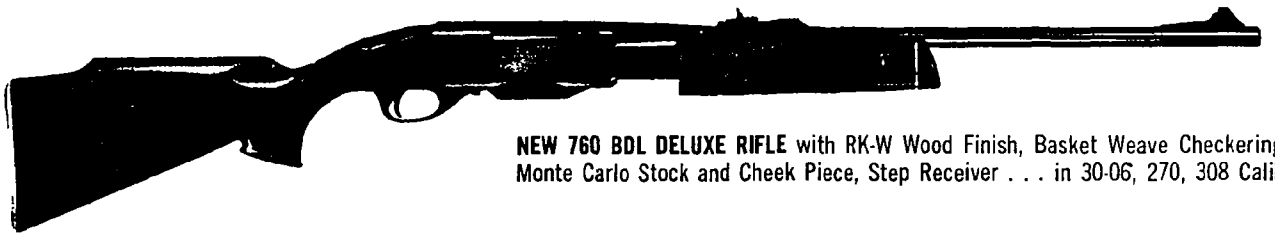
1967

Remington Model 760 "Gamemaster" Pump Action Big Game Rifle

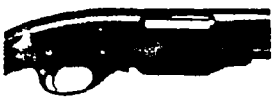




NEW 760 BDL DELUXE RIFLE with RK-W Wood Finish, Basket Weave Checkering, Monte Carlo Stock and Cheek Piece, Step Receiver . . . in 30-06, 270, 308 Calibers

IF YOU'RE A PUMP GUN MAN . . . used to shooting a pump action shotgun, then the Remington Model 760 is the gun you'll want. You'll stop 'em and drop 'em if you're carrying a light weight, fast-handling Remington Model 760 "Gamemaster." It's the only pump action big game rifle made that's chambered for the popular and powerful 30/06 Springfield cartridge. Five lightning-fast shots are yours at the flick of your wrist . . . one more reason why this rifle has been a consistent winner in the International Running Deer Matches. Pump action is slick, smooth — so fast and effortless, shooters say it works like a "ball-bearing" action. An extra loaded clip magazine in your pocket means you can reload in seconds . . . you've reserve fire power at your fingertips. Model 760 is the fastest hand-operated big game rifle made because your trigger hand never leaves the grip when you're pumping. And your eye never leaves the sights. Custom, fine line checkering make it a standout in any gun rack. Made in six powerful calibers: 223 Remington, 280 Remington, 270, 30/06, 308, 35 Remington. Made in regular, carbine and deluxe models. All have RK-W wood finish.

LIGHTNING FAST ACTION — A flick of your forearm keeps you shooting; double action bars prevent twisting and binding. Pumping is effortless, like a ball-bearing action.



REMINGTON FIRE CONTROL trigger must be released and squeezed for each shot — can't fire unless action is completely closed. An important safety feature.

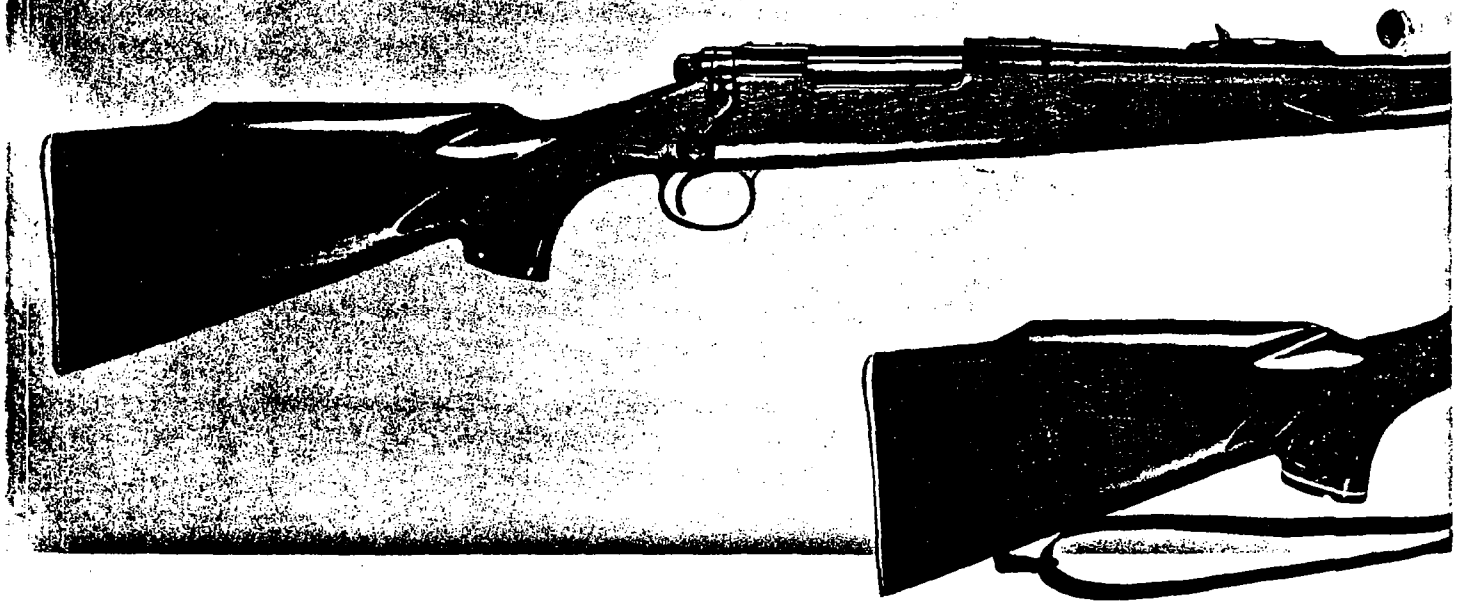
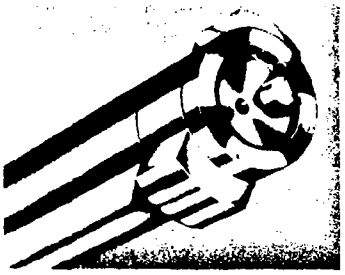
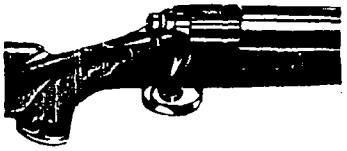
R2525186

Remington Model 700 1967 Bolt Action Center Fire

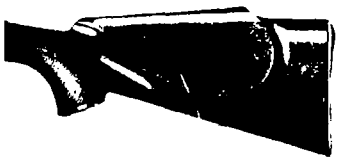




WORLD'S STRONGEST BOLT ACTION. Cartridge head is encased and supported by ring of solid steel. When action is closed, three rings of steel support the cartridge head. It's super-strong.



BOLT KNOB is checkered, top and bottom. Grip is custom checkered. BDL Model has grip cap and white spacers.



MONTE CARLO STOCK and CHEEK PIECE make the model 700 good to look at . . . and good to shoot. There's a better cheek-to-stock fit with a Monte Carlo stock and cheek piece . . . which means quicker, surer sight alignment with either scope or iron sights.

When the Model 700 was first developed, our tests proved that we had produced the finest center fire bolt action rifle ever made. Now our sales records have proven it again. Since its introduction, shooters have bought more Remington Model 700's than any other center fire bolt action rifle on the market in its price class. And their reasons for buying make good sense. For example:

The Remington 700 bolt action is designed for the real rifleman. *The shooter* who wants the accuracy bonus of Remington's famous precision rifling and short, crisp trigger pull. *The hunter* who appreciates the comfort of a cheek piece and Monte Carlo comb on an all-purpose stock that gives superb balance and perfect alignment with either 'scope or open sights. *The craftsman* who loves the traditional beauty of fine checkering. And it has a beautiful wood finish that is tough, hard, scratch-resistant — gives lasting protection against hard usage and bad weather. The 700 owner also gets the world's strongest bolt action. The bolt head completely encloses the cartridge case in a ring of steel. And the Model 700 is available in 15 popular calibers.

BEAUTIFUL, SUPER-TOUGH RK-W FINISH, the most durable wood finish known, is now on all Model 700 Rifles. Du Pont-developed RK-W finish is similar to that used on bowling pins. No wonder it's good on guns.

LONG 22" BARRELS are now standard on the following rifles: 6 m/m Rem., 243 Win., 270 Win., 280 Rem., 30-06 and 308 Win. Varmint and Magnum calibers are unchanged at 24" and Safari calibers at 26".

SIGHTS ARE NOW DETACHABLE. If a shooter who uses a scope prefers to remove the iron sights, it's now an easy matter. Filler screws supplied in the receiver will plug the sight fastening holes.

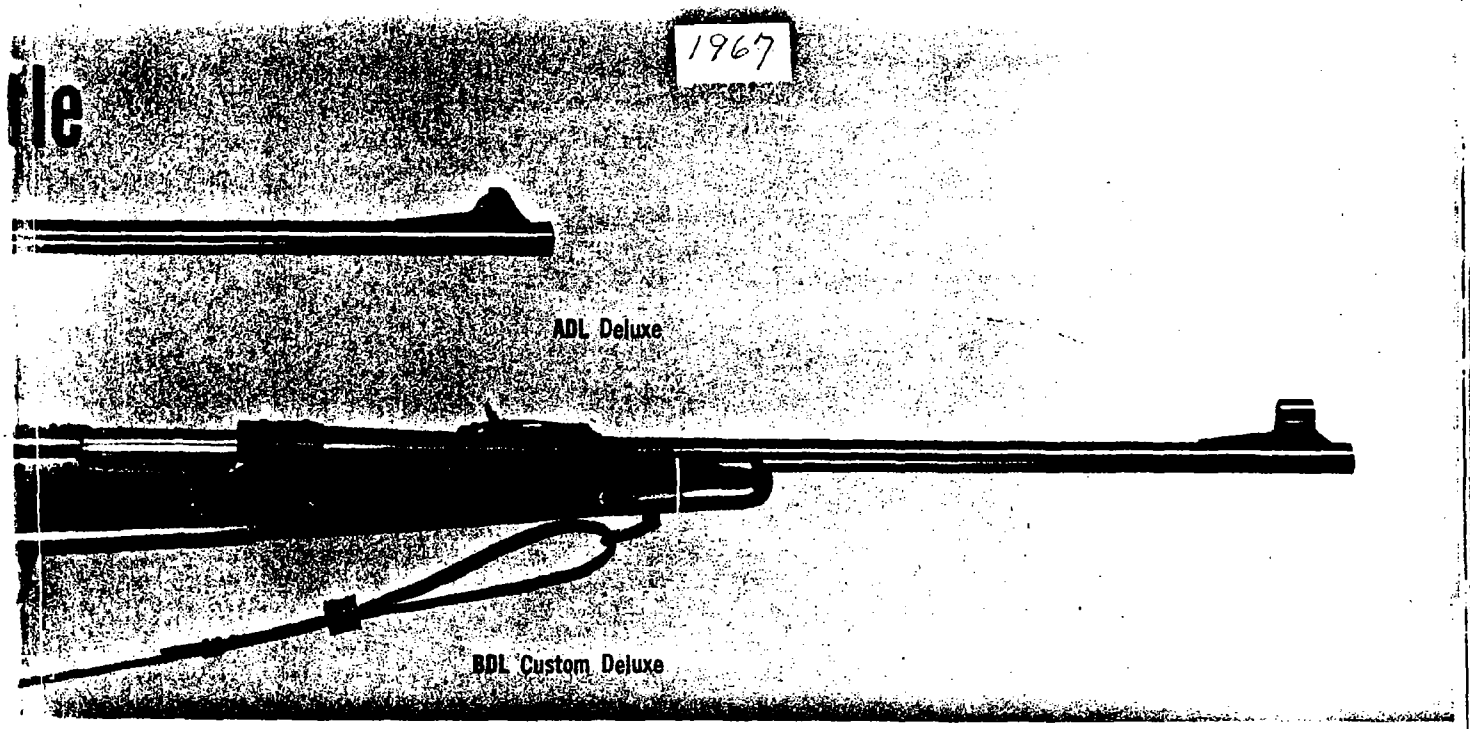
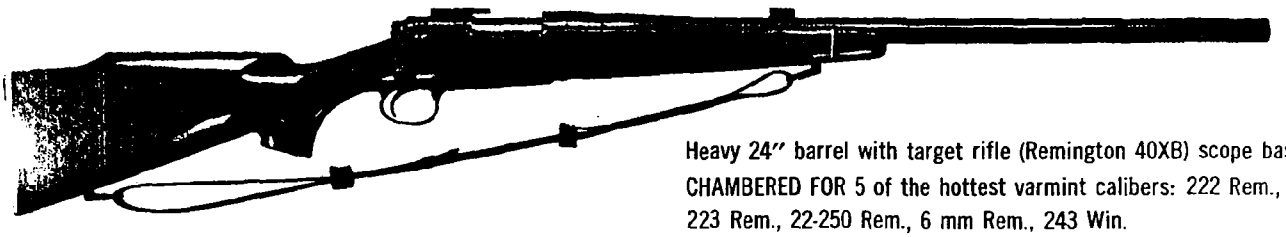
1967



NEW Model 700 BDL "VARMINT SPECIAL"



The Model 700 is one of the fastest selling bolt action center fire rifles. Now it's made in the new BDL "Varmint Special" version — designed for minimum-target, maximum-range precision shooting.

It's chambered for 5 of the hot ones — 5 fast-and-flat shooting cartridges that are sure medicine on chucks, 'cats, foxes and other pests — and its 24" heavy barrel places this rifle in a new accuracy class.

Heavy 24" barrel with target rifle (Remington 40XB) scope bases.

CHAMBERED FOR 5 of the hottest varmint calibers: 222 Rem., 223 Rem., 22-250 Rem., 6 mm Rem., 243 Win.

Target-rifle (Remington 40XB) scope bases — hinged floor plate — quick release swivels and strap — crisp, smooth trigger — Monte Carlo stock with check piece — Du Pont developed RK-W wood finish — custom quality checkering . . . they all add up to "something special in a varmint special" . . . the one you'd expect from Remington.

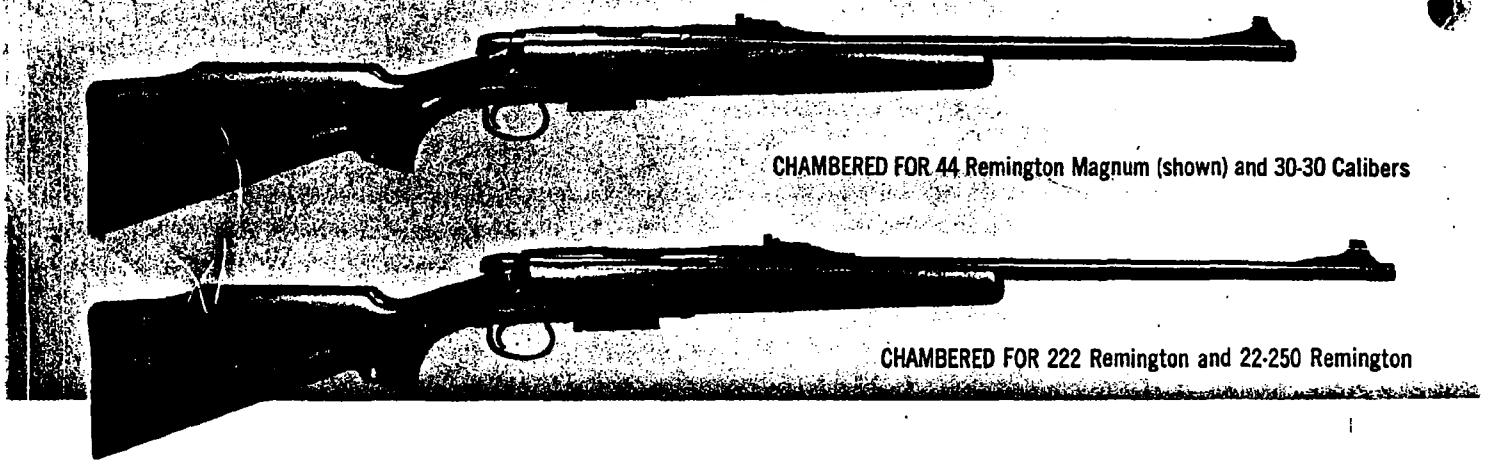
BDL and Varmint Models include sling strap and quick release swivels, and black fore-end tip. 13⅜" length of pull, 2⅝" drop at heel, 1 11/16" drop at comb (from open sight line) checkered. **SIGHTS** — Flat faced gold bead with ramp front sight (hooded ramp on BDL model). Step adjustable rear sight with windage adjustment screw. Varmint model has no sights. **RECEIVER** — Drilled and Tapped for scope mounts and receiver sights. BDL model has hinged floor plate. Varmint model has 40XB type scope mounts.

R2525188

NEW Remington Model 1967 788 Bolt Action Rifle



CHAMBERED FOR 44 Remington Magnum (shown) and 30-30 Calibers

CHAMBERED FOR 222 Remington and 22-250 Remington

In two favorite brush-busting big game calibers, 30-30 and 44 Rem. Magnum

and two super-accurate long range varmint calibers, 222 Rem. and 22-250 Rem.

Now you can get a moderately priced Remington bolt action rifle in one of the most famous deer calibers ever designed — the popular 30-30. Over the years, this caliber has probably taken more deer than any other single caliber. Or you can get this new rifle in still another game-getter, the 44 Remington Magnum, which is rapidly gaining in popularity because of its tremendous shocking and stopping power. This cartridge has a heavy bullet which plows through the thickest brush with little deflection. Now you can get bolt action accuracy in both of these calibers . . . with the new Remington Model 788.

And Model 788 offers still more. If you're a varmint shooter, you have a choice of two of the hottest varmint calibers —the sizzling 22-250 Remington or the super-accurate 222 Remington. Both calibers are rough on varmints and small game. This bolt action beauty does not carry a big price tag. It's priced right — so that every hunter can afford it. There are no fancy frills, just solid, rugged, long-lasting dependability . . . true Remington quality. The many outstanding features described below are your assurance that this new Remington rifle is built to last for many, many years.

Quality Features of the REMINGTON MODEL 788

ARTILLERY TYPE BOLT has nine extra heavy locking lugs that engage grooves in the solid steel receiver for a strong, secure lock-up . . . like a bank vault. Rear bolt cover provides extra protection and streamlining.

CLIP MAGAZINE slips in or out of the receiver in seconds with one hand; makes loading or unloading simple and safe. No working cartridges through the action. An extra pre-loaded magazine in your pocket speeds up loading.

TAPERED BARREL is finest ordnance steel — precision rifled for extreme accuracy at all hunting ranges. Barrel is crowned at muzzle. Elevated barrel bracket provides a solid, positive 'scope back-up.

ROUND RECEIVER permits perfect wood-to-metal bedding . . . which in turn contributes to fine accuracy. Receiver is also drilled and tapped for 'scope mounts and receiver sight at left rear.

BLADE FRONT SIGHT on serrated ramp is detachable and U notch rear sight is lock-screw adjustable for windage and elevation. Rear sight barrel holes are correct for target scope block.

BIG SERRATED SAFETY is convenient and well positioned at rear of receiver. Forward for fire; rearward for safe.

ALL-PURPOSE MONTE CARLO STOCK with pistol grip is designed for use with 'scope or open sights. Full size fore-end provides a sure grip for holding and aiming.

HUNTING TYPE TRIGGER. Sturdy trigger guard is big enough for use with gloves. Trigger pull is crisp and clean; you can feel the quality when you squeeze off shots in this new model. Exceptionally fast lock time contributes to fine accuracy.

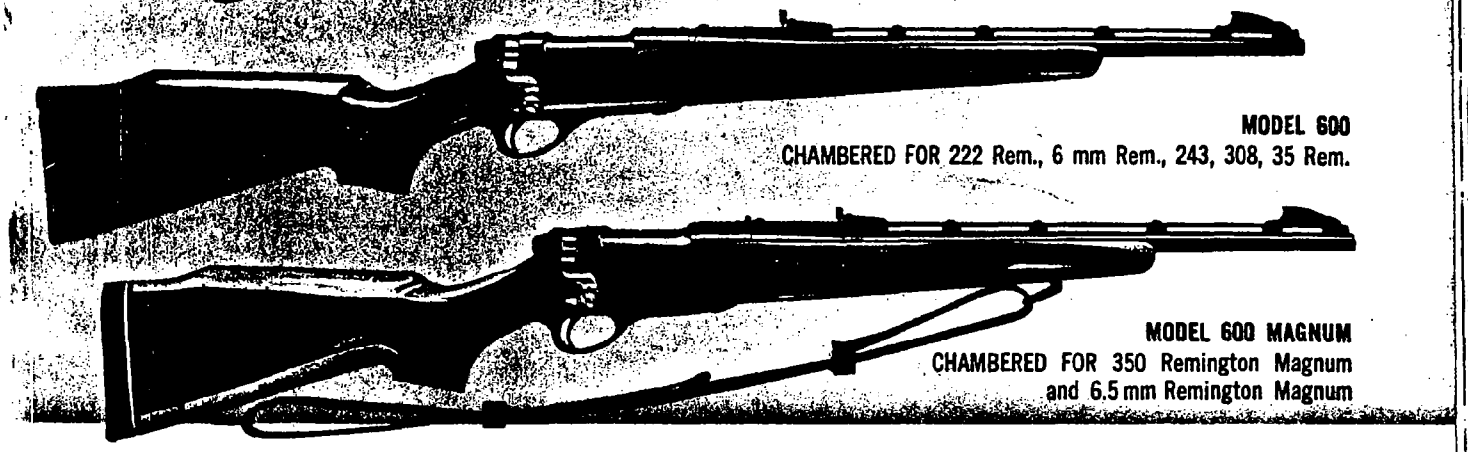
Remington Model 600 1967 Bolt Action Center Fire Carbine



MODEL 600
CHAMBERED FOR 222 Rem., 6 mm Rem., 243, 308, 35 Rem.

MODEL 600 MAGNUM
CHAMBERED FOR 350 Remington Magnum and 6.5 mm Remington Magnum

FEATURES • MODEL 600

CUSTOM CHECKERING on fore-end and grip is fine-lined, uniform, good looking. We suggest you do as other smart gun buyers do, compare this checkering with that found on other makes of guns. Then judge for yourself.

MONTE CARLO STOCK means a better cheek-to-stock fit for quicker, surer sight alignment. Rich American Walnut Stock has all-purpose dimensions which give perfect alignment with either a 'scope or open sights. Functional shape of fore-end provides a good reliable, non-slip grip for steady holding.

WORLD'S STRONGEST BOLT. Cartridge head is completely encased by a ring of solid steel. When bolt is closed, three rings of steel support the cartridge head. Strong? . . . there's none stronger.

A LIGHT WEIGHT POWERHOUSE — Only 6 pounds but packs more power per pound than other carbines, from the brush-busting 35 Remington to the high velocity, flat trajectory 222 Remington coyote-walloping caliber.

VENTILATED RIB. It's the first time a domestic commercially produced sporting rifle has ever been designed with a ventilated rib. (Another first for Remington.) It helps you aim, gives a definite sight-line so you get on running game faster.

FAST-HANDLING MODEL — Short over-all length (37¼") makes Model 600 just right for hunting in heavy brush country because you can handle it faster, easier. It's a great saddle gun, too — fits a scabbard neatly or tucks in the rack of a pick-up truck.

FINEST ACCURACY. Here's where Model 600 really shines. Free floating barrel of Remington proof steel is precision rifled to Remington's exact standards. Trigger pull is short, crisp and clean. At the factory and in the field we shot close groups — and so will you. It was designed to shoot this way.

FORWARD S BOLT HANDLE hugs the stock — doesn't stick out — slips in and out of scabbard with ease. Half knob is serrated on the bottom so you get a good secure grip.

ROTATING THUMB SAFETY is conveniently located at the rear of the receiver where you can get at it in a hurry. Rearward for "safe". Forward for "fire."

BLADE RAMP FRONT SIGHT has brass bead. Sturdy U notch rear sight is adjustable for elevation and windage. Receiver drilled and tapped for 'scope and receiver sights.

TRIGGER is extra wide and corrugated; finger fits securely. Trigger pull is crisp and clean — no creep, no spongy action.

MODEL 600 MAGNUM Same features as above, except:

STOCK. A handsome lamination of walnut and beech that provides tremendous strength, stability and beauty. It's warp-free and waterproof.

WOOD FINISH is famous Du Pont RK-W that's tough, scratch and water resistant, the most durable wood finish known. It's similar to that used on bowling pins.

RECOIL PAD cushions the recoil of the game-getting 350 Rem. Mag. and 6.5 mm Rem. Mag. calibers. Black and white spacers add to good looks.

MAGNUM BARREL is designed to handle both powerful hot Mag. calibers. Free floating barrel provides extreme accuracy.

'SCOPE BACK-UP. Strong bracket of steel forms 'scope mount back-up which takes vibration and recoil. 'Scope can also be mounted in forward position which provides long eye relief for instant sighting.

STRAP and QUICK RELEASE SWIVELS are standard equipment on Model 600 Magnum.

WEIGHT: Just 6½ well-balanced pounds . . . and short over-all length (37¼") make it a honey to handle in heavy cover.

SPECIFICATIONS: MODEL 600 AND 600 MAGNUM — CALIBERS — Model 600-222 Rem., 6 mm Rem., 243 Win. 308 Win. 35 Rem. Model 600 Magnum — 350 Rem. Mag., 6.5 mm Rem. Mag. **CAPACITY** — 4 Shot — 350 Rem. R2525190

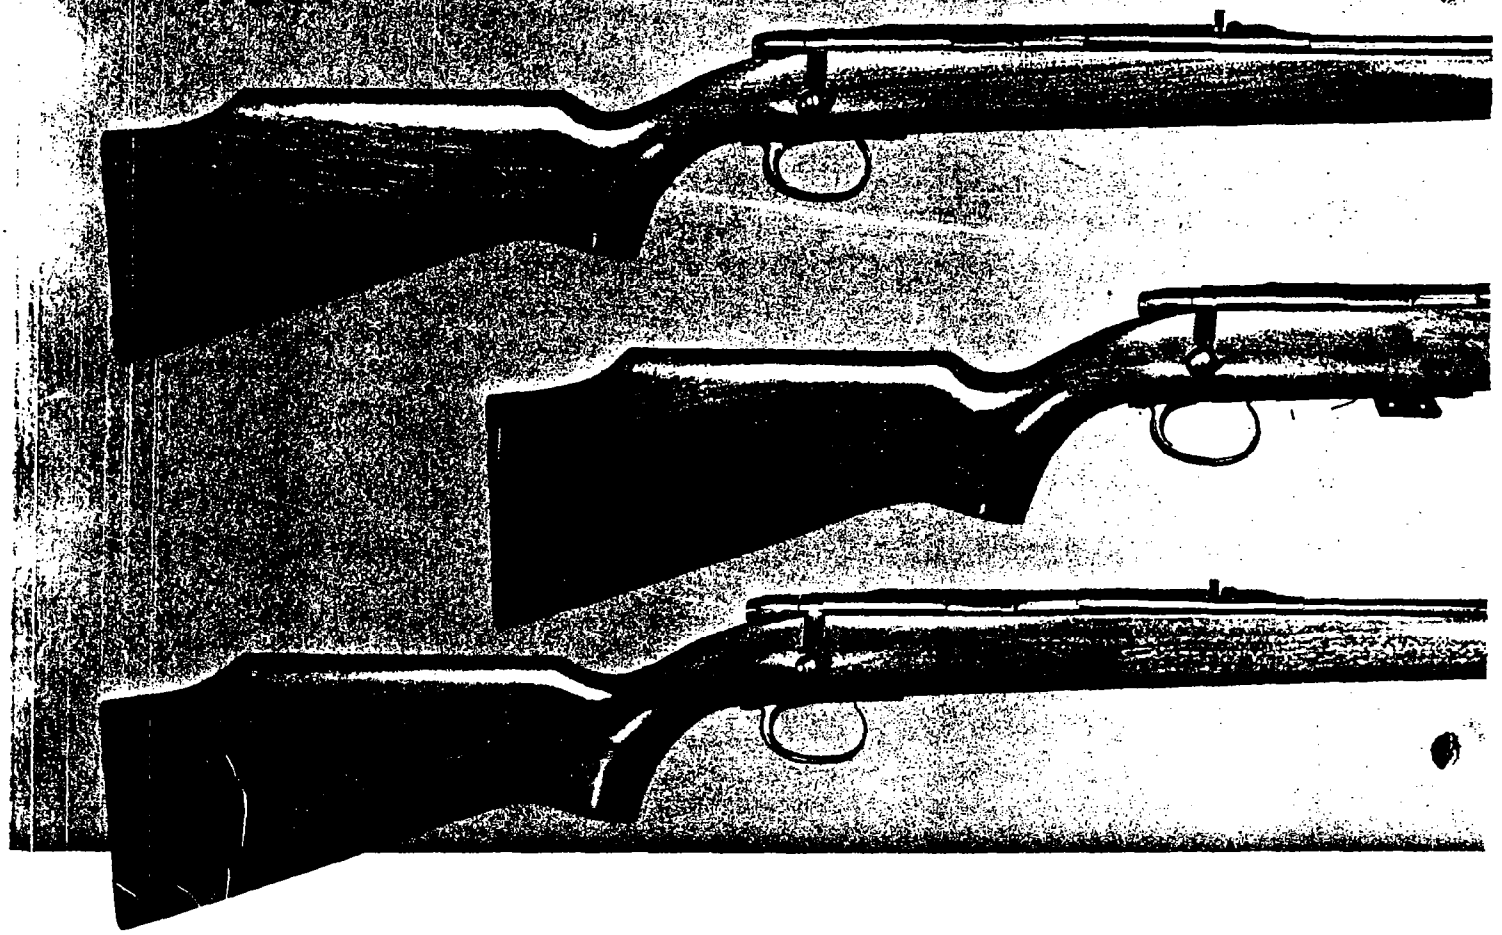
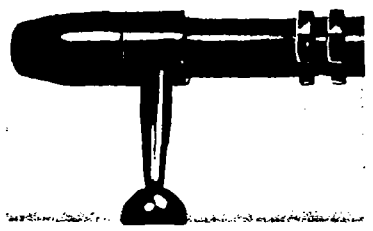
NEW Remington Models 580, 581 and 582 22

1967



SHOOTERS ASKED US: "Is there any reason why you can't make a 22 bolt action rifle that looks like a center fire rifle . . . with the strength of a center fire rifle?"

AND OUR ANSWER: No, there isn't any reason, and perhaps we should have done it sooner. But we're happy to bring it to you now. Our new series of bolt action rifles are what you asked for; 22 rim fire rifles with the look, feel and balance of big game center fire rifles — plus the strongest, most powerful bolt ever designed into a 22 caliber hunting rifle. How did we do it? Well, we started by redesigning the bolt, making it stronger, smoother, better. It's the artillery type with rear lock-up. The bolt has six extra-heavy, rotary locking lugs at the back that engage grooves in the solid steel receiver. Together they lock up tight, like a bank vault. Try it — work the action a few times. It's silky-smooth, solid and secure, made of ordnance steel.



Here is strength that has never been equalled in any 22 bolt action hunting rifle. Actually, there's more built-in strength here than you'll ever need, but it's nice to know your rifle is designed with this plus factor. Then we looked at all the other desirable features that make up a fine big game rifle . . . and we put many of them into this new rim fire line. Here they are:

BOLT COVER at rear keeps dirt and bad weather outside; smooth operation inside. Adds to streamlining of the rifle, too.

HUNTING-TYPE TRIGGER is wide and the trigger pull is crisp, sharp, clean — no drag. Big, sturdy trigger guard is roomy enough to accommodate a gloved finger. Everything about these new rifles is man-size. There's no corner cutting anywhere.

FULL SIZE Monte Carlo stock with pistol grip looks and feels like a center fire rifle. It assures a snug, comfortable cheek-to-stock fit that means more hits — with or without a scope. And there's no skimping on the fore-end, it's long, tapered, man-size to prevent canting and provide a good secure grip.

SIGHTS are rugged, similar to those on big game rifles. Bead front sight and U notch lock-screw adjustable rear. You'll hit what you aim at with these sights.

ROUND RECEIVER means bedding into the stock can be more precise, which in turn contributes to fine accuracy. The re-

R2525191

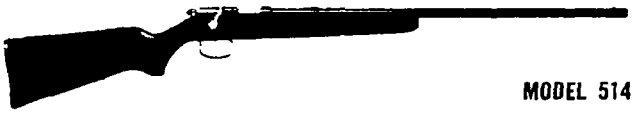
1967

lt Action Rifles LOOK LIKE

and are BUILT LIKE

BIG GAME RIFLES!

MODEL 514



Here is an excellent 22 caliber rifle . . . at a popular price. It's a single-shot bolt action model with self-cocking bolt, rotary thumb safety and takes all 22 caliber cartridges — short, long or long rifle; standard velocity or high speed. For the young shooter, it's also available as Model 514 BR "Boy's Rifle" with cut down stock.

eiver is also grooved for tip-off 'scope mounts. Actually, it's the strongest, most rigid receiver of any 22 bolt action hunting rifle because there are no slots or notches to weaken it; bolt handle isn't used as lock-up lugs. Here again, Remington designers made it like a center fire rifle. Costs the shooter no more; it's an extra bonus he gets because of good design.

ORDNANCE STEEL BARREL is precision rifled, crowned at the muzzle and polished and blued for good looks and long wear. Barrels of all models are super accurate (we made sure of that). Chances are you'll agree when you try one — for hunting, informal target shooting or just plain plinking.

TWO EXTRACTORS are standard on this new series of 22 rifles. Remington feels that two are better than one (so you get 2). Another extra at no charge.

NON-SLIP THUMB SAFETY is conveniently located at the right rear of the receiver. Positive safety — forward for fire; rearward for safe.

TRUE REMINGTON QUALITY and bulls-eye performance — that's what you get when you shoot these new rifles. Here's why: Strength and rigidity of bolt, adjustable sights, hunting type trigger, round receiver for snug bedding, and precision rifled barrel. Here's an accuracy combination that's hard to beat . . . in all three models; 580 single shot, 581 clip repeater and 582 tubular repeater.

SPECIFICATIONS: ACTION — All bolt action. M/580 single shot, M/581 clip repeater, M/582 tubular repeater. **CALIBER** — 22 rim fire; short, long, or long rifle cartridges. **CAPACITY** — M/580 single shot, M/581 5-shot, M/582 20 short, 15 long, 14 long rifle cartridges. **BARREL** — 24 inch ordnance steel, precision rifled, crowned at muzzle. **STOCK** — Monte Carlo type, full size, black butt plate. Single screw take-down. **SIGHTS** — Front; bead, dovetail adjustable. Rear; U Notch type, lock-screw adjustable. **BOLT** — Artillery style, lock-up at rear. 6 locking lugs, double extractors. **RECEIVER** — Round, ordnance steel, grooved for 'scope mounts. **SAFETY** — Positive, serrated thumb type, forward for fire, rearward for safe. **OVER-ALL LENGTH** — 42⅜". **WEIGHT** — M/580 5 lbs., M/581 5¼ lbs., M/582 5½ lbs.

SPECIFICATIONS: MODEL 514 — ACTION — Bolt action, single shot. **CALIBER** — 22 short, long, long rifle rim fire. **CAPACITY** — Single shot. **BARREL** — 24 inch, precision rifled, Remington ordnance steel. **STOCK** — Walnut finished hardwood, full sized, black butt plate. **SIGHTS** — Bead front sight, open rear. **SAFETY** — Rotary thumb safety. **RECEIVER** — Made from solid steel. **OVER-ALL-LENGTH** — 41 inches. Boy's rifle 40 inches. **WEIGHT** — 4¾ lbs.

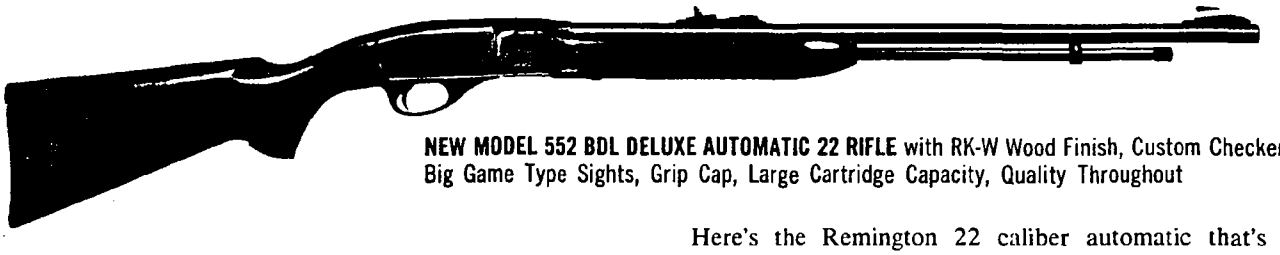
Remington Automatic 22 Rim Fire Rifles

1967

Model 552 "Speedmaster"

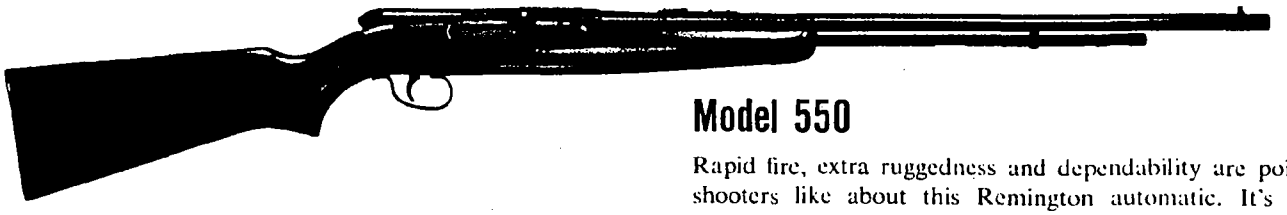


NEW MODEL 552 BDL DELUXE AUTOMATIC 22 RIFLE with RK-W Wood Finish, Custom Checkering, Big Game Type Sights, Grip Cap, Large Cartridge Capacity, Quality Throughout

VERSATILE. Shoots 22 Short, Long and Long Rifle cartridges interchangeably without adjustment. Load 'em up in any order and start shooting. Your trigger finger does all the work.

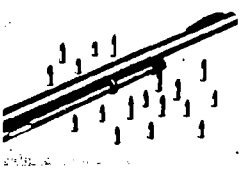
SINGLE LOADING — AUTO EJECTION. For use as a single shot rifle, pull back bolt, drop cartridge into the ejection port, release bolt and you're ready to shoot. Empty cartridge case will be ejected automatically.

Here's the Remington 22 caliber automatic that's fast shooting, accurate, nicely balanced . . . the rifle you'll want for small game hunting, controlling crop-destroying and marauding pests, or for just plain fun-shooting. The Model 552 is another member of Remington's "family of guns"; looks, handles and shoots like its big brother, the Model 742 big game rifle. "Speedmaster" has every feature the shooter wants, such as: twenty shots as fast as you can squeeze the trigger, rich walnut stock, cross bolt safety, receiver grooved for "tip-off" 'scope mounts. Also available in the short barrel (21") carbine model, the Gallery Special and the new deluxe model. Pick a 552 off the rack at your dealer's — heft it — throw it to your shoulder. We think you'll agree, it's the rifle that "feels right" . . . because it's made right.



Model 550

This rugged and dependable automatic will handle, interchangeably and without adjustment, Short, Long and Long Rifle cartridges.



Rapid fire, extra ruggedness and dependability are points shooters like about this Remington automatic. It's the famous 22 caliber rifle that shoots Short, Long and Long Rifle cartridges with no adjustment. Mix them up, drop them in the tubular magazine and fire away. Model 550 takes 'em as they come. Other fine features are: Large capacity, up to 20 Shorts, American walnut stock, fine accuracy, thumb safety, receiver grooved for "tip-off" 'scope mounts. The Model 550 is well-built, well-designed — an exceptionally fine all-around rifle for the hunter or plinker . . . and good for week-end family fun, too.

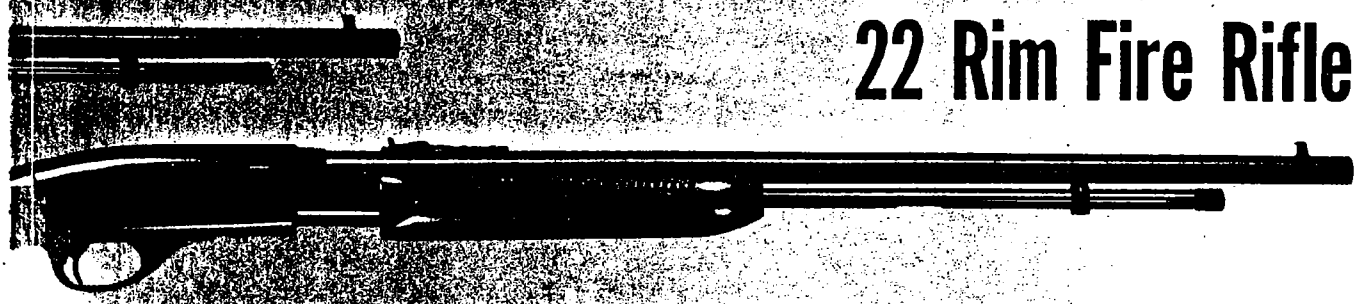
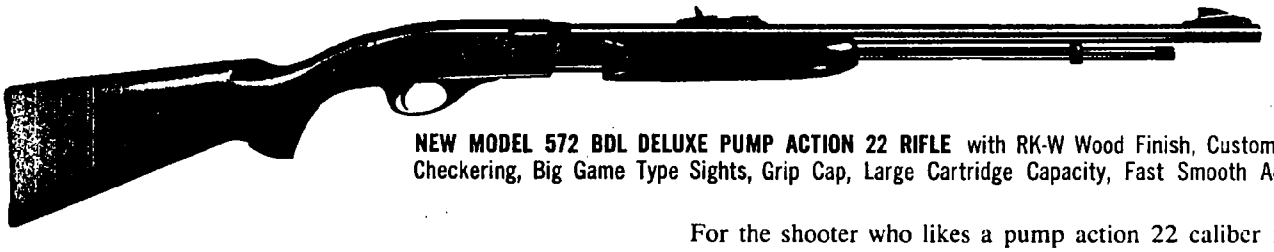
1967

Remington Pump Action 22 Rim Fire Rifle

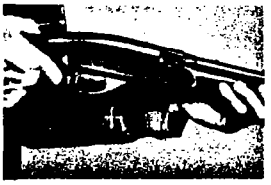


Model 572 "Fieldmaster"



NEW MODEL 572 BDL DELUXE PUMP ACTION 22 RIFLE with RK-W Wood Finish, Custom Checkering, Big Game Type Sights, Grip Cap, Large Cartridge Capacity, Fast Smooth Action

SINGLE LOADING — It's the only slide action 22 rifle with positive single loading through the ejection port — a feature especially important to parents and shooting instructors.



FAST, POSITIVE ACTION — short stroke operation is fast and smooth . . . ideal for plinking or for getting off quick shots at hard-to-hit game. The Model 572 "Fieldmaster" shoots as fast as you can flick the fore-end.

SHOOTERS FORGET—but a "Fieldmaster" won't. For extra safety it's designed not to fire if the trigger is pressed while the action is being closed. Trigger must be released and pressed for each shot.

SPECIFICATIONS: MODEL 552: ACTION — Automatic. **CALIBER** — 22 Rim Fire. **CAPACITY** — Tubular magazine holds 20 Short, 17 Long, 15 Long Rifle cartridges. **SIGHTS** — Adjustable rear sight, bead front. Deluxe Model: Blade ramp front sight. Step adjustable rear sight with windage adjustment screw. **STOCK** — Rich American walnut. **SAFETY** — Cross-bolt type. **RECEIVER** — Grooved for "tip-off" scope mounts. **OVER-ALL LENGTH** — 42"; 40" (Carbine). **WEIGHT** — 5½ lbs.

MODEL 550: Same as Model 552 except: **SAFETY** — Thumb style. **OVER-ALL LENGTH** — 43½". **WEIGHT** — 6¼ lbs.

MODEL 572: Same as Model 552 except: **ACTION** — Pump, repeater.

For the shooter who likes a pump action 22 caliber rifle, the "Fieldmaster" Model 572 is best . . . action is slick and smooth. Exclusive cartridge feeding design prevents jamming, permits easy single loading. By simply removing the inner magazine tube, parent or instructor can convert the "Fieldmaster" into a single shot rifle. Receiver has dovetail grooves for "tip-off" 'scope mounts. Capacity is large; tubular magazine holds 20 short, 17 long or 15 long rifle cartridges. It has a cross bolt safety conveniently located at the rear of the trigger guard where it can be snapped on or off with the index finger. The Model 572 is beautifully streamlined and balanced — rugged and dependable like Remington big game rifles and shotguns.

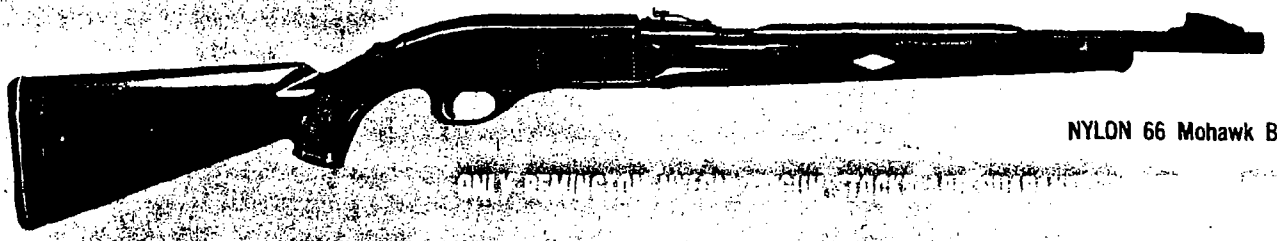
R2525194

Remington Automatic Nylon 22s

1967



NYLON 66 Mohawk Brown

Remington's new Nylon 66 is setting an amazing record in sales and customer acclaim. Here's why!

Structural-nylon is many ways better than conventional material for the gun's stock and fore-end. Because this super-strong material doesn't warp, the same barrel bedding principle used on the world's most expensive target rifles is yours. The result is an automatic that nails targets, tin cans and small game with tremendous accuracy. This is the same model rifle used to establish an accuracy record on hand-thrown 2½" wood blocks. Only six misses out of over 100,000 blocks thrown . . . and without a malfunction.

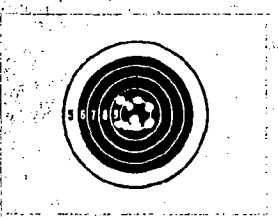
Receiver parts, stock and barrel are a bold interlocking of steel and structural nylon that creates the most trouble-free automatic action ever known. There's no need for lubrication because friction-free parts glide on "greaseless bearings" of nylon. Perfect checkering makes for fast, sure holding, and the convenient top-of-grip thumb safety slips off "safe" in a wink for running game shots. The handsome Nylon 66 has white diamond inlays and white line spacers at grip cap, butt plate and fore-end tip. Available in Mohawk Brown and Apache Black with chrome plated barrel and receiver.

NYLON 66 APACHE BLACK

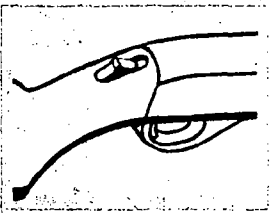
The Nylon 66 is also made in an Apache Black deluxe model. The stock is Du Pont "Zytel" black nylon and both the barrel and the receiver cover are chrome plated. Inside, it's the same reliable, trouble-free rifle as the standard mohawk brown model.

The Nylon 66 is the most rugged automatic 22 rim fire rifle made. Alaskan fishermen think so, too; they use it on their fishing boats to keep marauding sea lions out of their nets. Salt spray, foul weather, fish slime and mud knock out other 22's. But not the Nylon 66. This is why these fishermen look on the Remington Nylon 66 as almost a "tool-of-the-trade." Still further proof: Trappers in the humid bayous along the Gulf States swear by the "gun with the nylon stock." Why? Same reasons; it's tough, it works under all conditions, it stands up . . . and it's exceptionally accurate.

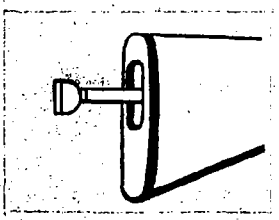
Ask your dealer to see the fabulous Nylon 66, in Apache Black or Mohawk Brown. They're both winners.



IT'S AMAZINGLY ACCURATE . . . barrel and fore-end are precisely mated to give outstanding accuracy. Structural-nylon permits three-point bedding found only in costly target rifles.



TOP-OF-GRIP THUMB SAFETY. The most convenient, easiest to use safety ever designed for 22 rifles.



LOADING IS FAST, EASY — a twist of wrist and tubular magazine is removed or replaced through butt plate. Single loading for beginner is handled smoothly through port with automatic ejection of fired round.

ACTION — Automatic. **CALIBER** — 22 long rifle Rim Fire. **CAPACITY** — Tubular magazine thru butt stock. Holds 14 long rifle cartridges. **BARREL** — 19⅛ inch, precision rifled, Remington Ordnance Steel. **STOCK** — One-piece structural nylon, checkered grip & fore-end with white diamond inlays, white line spacers on butt plate, grip cap & fore-end. **SIGHTS** — *Adjustable rear sight, blade front, common sight line for iron sights and* scope. **SAFETY** — Top-of-grip. **RECEIVER** — Grooved for "tip-off" 'scope mounts. **OVER-ALL LENGTH** — 38½". **COLOR** — Mohawk Brown with blued barrel and receiver. Apache Black with chrome plated barrel and receiver cover. **WEIGHT** — 4 lbs.

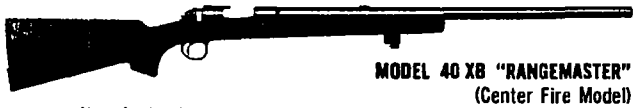
Remington Target Rifles 1967

MODEL 40 XB "RANGEMASTER"
(Rim Fire Model)

Exclusive loading platform provides straight line feeding; no shaved bullets. Specially selected ordnance steel barrel with the new Remington-process rifling. Choice of free floating standard or heavy barrels. High comb gives same sighting plane for iron and telescope sights. Comb is grooved for bolt removal. Mershon White Line non-slip rubber butt plate. Adjustable sling swivel and handstop. Extra strong bolt with double extractors. Crisp trigger with positive click adjustments for weight of pull. Wide trigger for more uniform pull and comfort. Thumb operated safety. Receiver drilled and tapped for all standard sight mounts — telescope and metallic. Redfield Olympic front and rear sights optional. New long rail for fore-end stop and palm rest.

SPECIFICATIONS: MODEL 40 XB (Rim Fire Rifle): ACTION — Bolt, Single Shot. **CALIBER** — 22 Rim Fire. Some Center Fire. **CAPACITY** — Single loading. Long Rifle only. **SIGHTS** — Redfield Olympic front & rear sights optional. **SAFETY** — Thumb Safety, positive. **RECEIVER** — Drilled & tapped for iron sights or 'scope mounts. **BARREL LENGTH** — 28". Over-all rifle length 47". **LENGTH OF PULL** — 13½". (Trigger adjustable 2 to 4 lbs.) **STOCK** — American walnut. Palm rest & front swivel block, adjustable on base. **WEIGHT** — With Redfield sights heavy barrel 12¾ lbs. Standard barrel, 10 lbs., 12 oz. Without sights, 12 oz. less.



MODEL 40 XB "RANGEMASTER"
(Center Fire Model)
Now Available in Repeating Model for use in National Match Course

The 40 XB center fire rifle is designed with clip slots for the conventional five shot clip. It loads from the top of the receiver and the magazine has a hinged floor plate. Clip slots are provided only in calibers with 308 head diameter. The 40 XB center fire repeating rifle is ideal for the rapid fire events, especially in the 7.62 mm Nato (308) caliber, because of its shorter bolt throw and extreme accuracy, plus its optimum weight for "over the course" competition.

As a single shot model, the Remington Model 40 XB center fire is offered in several center fire calibers as listed in specifications. The action is hand bedded and the barrel is free floating. Heavy barrel model meets the National Bench Rest Shooters Association rules for the Heavy Varmint Class with most target telescopes. (Max. weight 13½ lbs.) Standard barrel model can be made to fit the NBRSA Light Varmint Class rules by using a light scope and removal of wood from beneath the barrel and butt plate. (Max. weight 10½ lbs.) Stainless steel barrels are supplied as standard on 7 mm Rem. Magnum and 30-338 at extra charge. Stainless steel is also recommended for 22-250 and 6 mm Rem. (at extra charge.) Stainless 40 XB barrels are not blued.

SPECIFICATIONS: MODEL 40 XB (Center Fire Rifle): ACTION — Bolt, Single Shot & Repeating. **CALIBERS — Single Shot** — 222 Rem., 222 Rem. Mag., 223 Rem., 22-250, 6 mm x 47 mm (6 mm .222 Mag.), 6 mm international (6 mm on .250 Sav. case), 6 mm Rem. (.244 chamber), 243 Win., 6.5 mm Rem. Mag., 7 mm Rem. Mag., 7.62 mm Nato (308 Win.), 30-06, 30-338, (.30, 7 mm Mag.). **Repeating** — 7.62 mm Nato (308 Win.), 222 Rem., 222 Rem. Mag., 223, 6 mm x 47 mm, 6 mm Rem., 6 mm Int., 22-250. Calibers whose over-all loaded length is equal to or shorter than the 308. **CAPACITY** — Single loading and repeater. (Loads from top of receiver). **SIGHTS** — Redfield Olympic front & rear sights optional. **SAFETY** — Thumb operated safety, positive. **RECEIVER** — Drilled and tapped for metallic sights and telescope mount bases. Target type blocks furnished. **BARREL LENGTH** — 27¼" free floating. Overall Length of rifle 47". **LENGTH OF PULL** — 13½". Trigger adjustable to 3½ lbs. 2 ounce Trigger available at $40. extra. **STOCK** — Selected American Walnut. Fore-end stop and sling swivel adjustable on base. **AVERAGE WEIGHT** — Without Sights: Heavy Barrel 11¼ lbs., Standard Barrel 9¾ lbs.

MODEL 513 T "MATCHMASTER"

22 caliber target rifle. Stock specially proportioned for accurate sighting, steady holding. Heavy 27" barrel. Adjustable trigger pull, 6-shot box magazine. Redfield front and rear sights. 1¼" leather sling, adjustable front swivel.

SPECIFICATIONS: MODEL 513 T: ACTION — Bolt, Repeater. **CALIBER** — 22 Rim Fire. **CAPACITY** — 6-shot Clip magazine. 10-shot Clip available. Long Rifle only. **SIGHTS** — Redfield micrometer front & rear sights optional. **SAFETY** — Thumb Safety, positive. **RECEIVER** — Drilled & tapped for iron sights or 'scope mounts. **BARREL LENGTH** — 27". Over-all rifle length 45". **LENGTH OF PULL** — 13½". (Trigger to center of butt plate.) **STOCK** — American walnut. Sling Strap. **WEIGHT** — 8¾ lbs.

MODEL 521 T

Remington's lowest-priced target 22 — and it's convertible! Just remove target aperture from micrometer rear sight and you have a fine hunting rifle with peep sight. Patridge-type front sight. 6-shot box magazine, 1 shot in chamber gives 7-shot capacity. Complete with sling strap, adjustable swivel. Chambered for 22 long rifle only.

SPECIFICATIONS: MODEL 521 T — Same as Model 513 T except; **SIGHTS** — Micrometer rear, blade front. **RECEIVER** — Drilled & Tapped for Lyman 57 RS peep sight. **BARREL LENGTH** — 25". Over-all rifle length 42¾". **LENGTH OF PULL** — 13¼". (Trigger to center of butt plate). **WEIGHT** — 6½ lbs.

REMINGTON TRAP & SKEET EQUIPMENT

Among the items produced for the clay target sports are:

REMINGTON "BLUE ROCK" TARGETS

The Remington square shoulder "Blue Rock" has weight where weight belongs! Dome of target is thin, rim is heavier, giving greater stability, more spin. More pronounced shot rings on dome catch shot — targets break easier when hit by only a few pellets. All adding up to higher scores!

REMINGTON TARGET THROWER

All you need to enjoy shotgun sport all year round are Remington "Blue Rock" targets and a Remington target thrower. Easy to use. Throw targets any way you like.

REMINGTON "WONDER" TRAP

For straight trap and skeet. Tested in service . . . proved in practice. "Wonder" trap meets every requirement. Less vibration, automatically "sets" itself. Instant adjustment.

REMINGTON "WONDER" TRAPS for Skeet Shooting

Two Remington "Wonder" traps with Remington's exclusive Singlever manual control, all other accessories. Also Remington Electric release.

REMINGTON "BLUE ROCK" TRAP

For straight trap and skeet. Throws either doubles or singles. Ideal for small clubs or private estates. Available also as complete skeet outfit: 2 "Blue Rock" Traps and Remington's exclusive Singlever Pull for manual operation.

REMINGTON "EXPERT" TRAP

A strong, lightweight, sturdily built portable trap. Smooth operating. Just right for use at summer camps, cottages, aboard boats, or for trips into the country. Fine for "walk up" shooting games.

MODEL A100T FOR TRAP

1 Remington autoloading trap with ½ HP motor, 60 cycle, 115 volts, and special auto-angling base. 1 push button release unit with 100 feet of wire. 1 power control box.

MODEL M200S FOR SKEET

2 Remington autoloading traps with ½ HP motors, 60 cycle, 115 volts. 1 walk around release unit and 80 feet of wire. 2 power control boxes. 1 connection box.

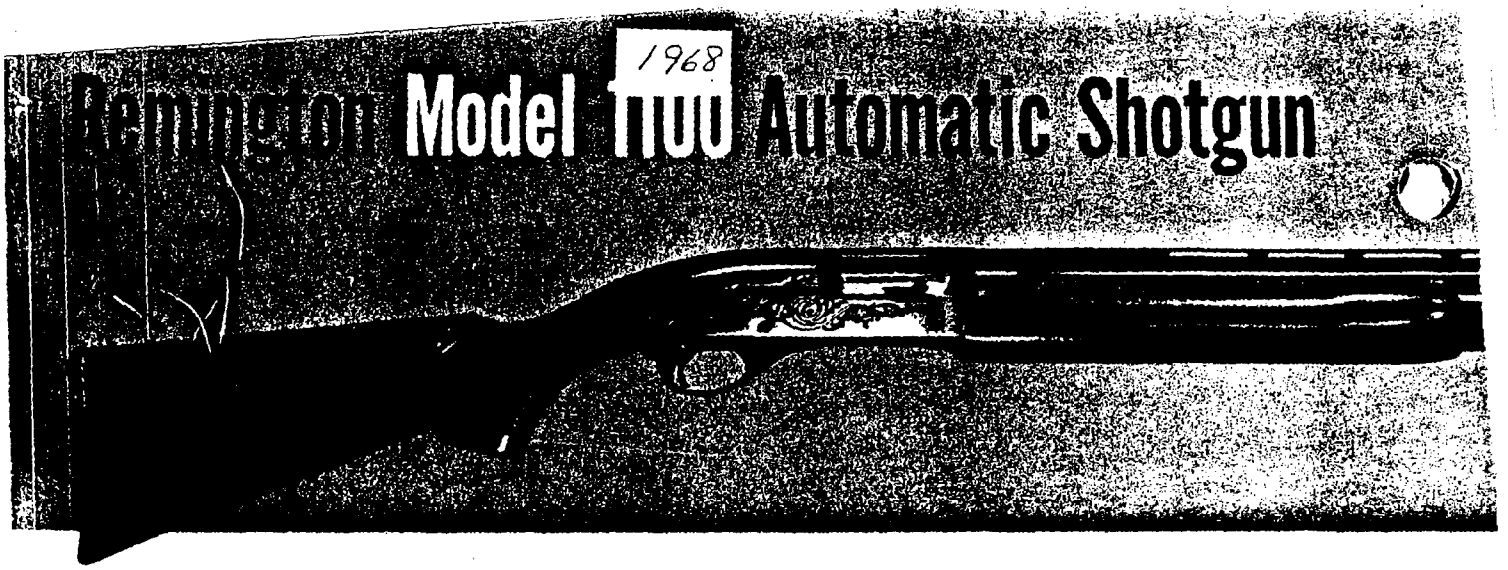
Remington Model 1100 Automatic Shotgun

1968



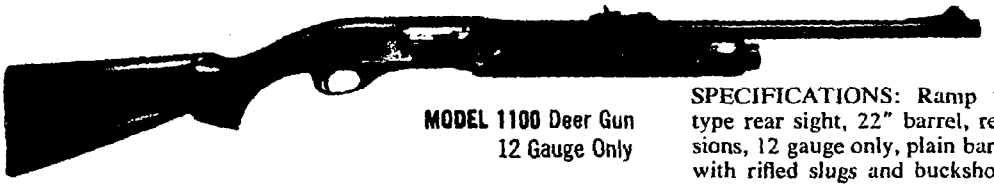
"Young Reliable" that's what they're calling the Remington Model 1100. In just a few years, shooters throughout the country have made it the "most popular" — "most wanted" automatic shotgun . . . and for good reasons, too. They tell us:

"It works, never jammed on me once, and I hunted every weekend."

"Recoil is light" writes a trap shooter. "My boy says the kick doesn't bother him a bit . . . and it doesn't. He's shooting better than ever." Light recoil also pays off in doubles, too; for the trap shooter, skeet shooter and hunter.

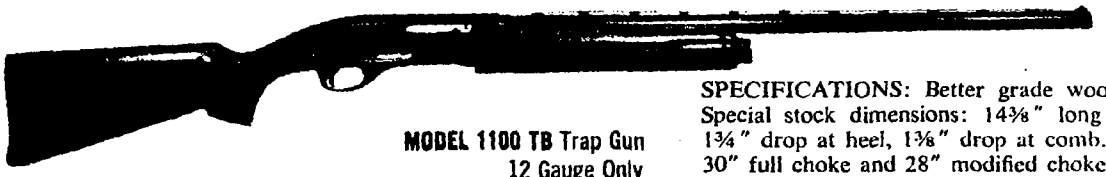
"Finish is good—stands up" reports a West Coast duck and goose shooter who shot it throughout the season . . . "And we get some mighty wet weather out here . . . it's tough on almost everything."

"It's a beautiful gun" — is a typical comment. And no wonder — with its fine-lined checkering, Du Pont RK-W wood finish, scroll work, steel receiver, white line spacers and tear drop pistol grip. Your dealer has 'em in 12, 16, and 20 gauges, with both plain and ventilated rib barrels.



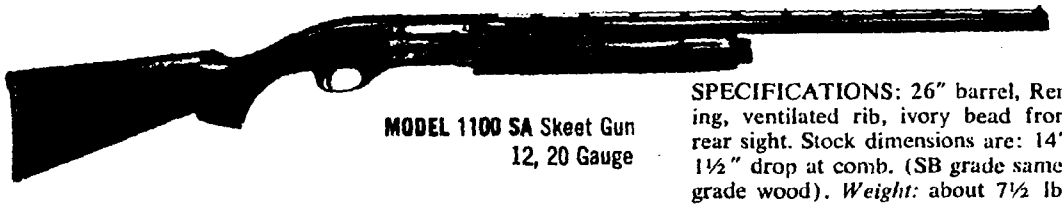
MODEL 1100 Deer Gun
12 Gauge Only

SPECIFICATIONS: Ramp front sight and adjustable rifle type rear sight, 22" barrel, recoil pad, standard stock dimensions, 12 gauge only, plain barrel. Choke gives optimum results with rifled slugs and buckshot. Weight: about 7¼ lbs.



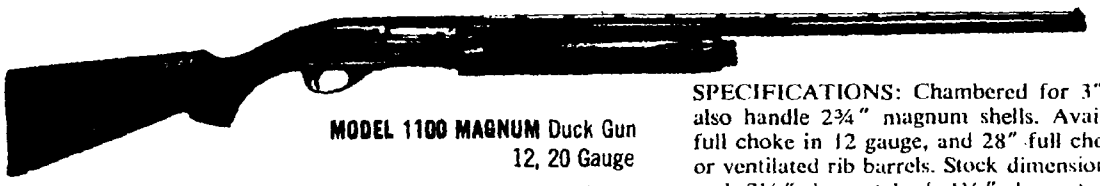
MODEL 1100 TB Trap Gun
12 Gauge Only

SPECIFICATIONS: Better grade wood, rubber recoil pad. Special stock dimensions: 14⅜" long including recoil pad, 1¾" drop at heel, 1⅜" drop at comb. Available in 28" and 30" full choke and 28" modified choke, ventilated rib barrels only. Ivory bead front sight, white metal rear sight. Available with optional Monte Carlo stock at extra charge. *Weight:* about 8¼ lbs.



MODEL 1100 SA Skeet Gun
12, 20 Gauge

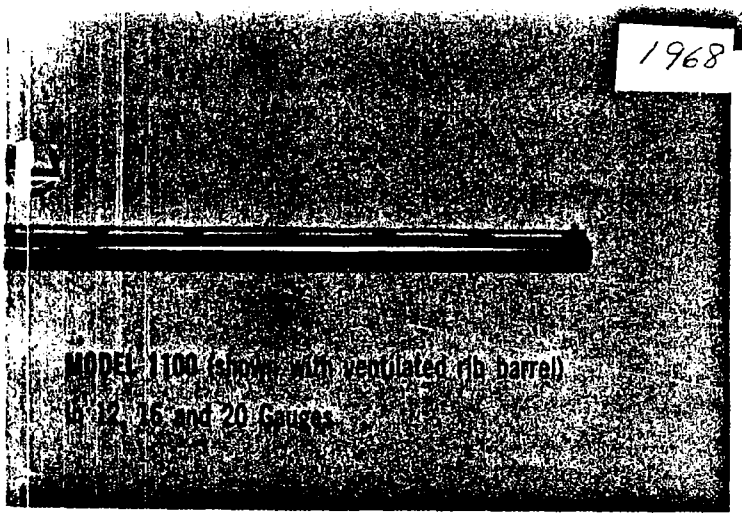
SPECIFICATIONS: 26" barrel, Remington special skeet boring, ventilated rib, ivory bead front sight and white metal rear sight. Stock dimensions are: 14" long, 2½" drop at heel, 1½" drop at comb. (SB grade same specifications with better grade wood). *Weight:* about 7½ lbs.



MODEL 1100 MAGNUM Duck Gun
12, 20 Gauge
(shown with ventilated rib barrel)

SPECIFICATIONS: Chambered for 3" magnum loads. Will also handle 2¾" magnum shells. Available in 28" and 30" full choke in 12 gauge, and 28" full choke in 20 gauge, plain or ventilated rib barrels. Stock dimensions: 14" long including pad, 2½" drop at heel, 1½" drop at comb. Furnished with recoil pad. *Weight:* about 7¾ lbs.

R2525200



SPECIFICATIONS: STYLE — 5 shot gas operated shotgun, 3 shot plug furnished. **GAUGE** — Made in 12, 16 and 20 gauge. **BARREL** — Special Remington ordnance steel. Extra barrel is interchangeable within gauge. **OVER-ALL LENGTH** — 48" (with 28" Barrel). **SAFETY** — Convenient cross-bolt type. **RECEIVER** — Made from solid steel, top matted, scroll work on bolt and both sides of receiver. **STANDARD STOCK DIMENSIONS** — Stock and fore-end: Rich American walnut. 14" long, 2½" drop at heel, 1½" drop at comb. Trap reg., 14⅜" long, 1¾" drop at heel, 1⅜" drop at comb. Monte Carlo, 14⅜" long, 1⅞" drop at heel, 1⅜" drop at comb, 1⅜" drop at M.C. **AVERAGE WEIGHT** — 12 ga. - 7½ lbs., 16 ga. - 7¼ lbs., 20 ga. - 7 lbs.

CUSTOM CHECKERING on stock and fore-end . . . fleur-de-lis design. Checkering is fine-lined, uniform, good looking.

TEAR DROP PISTOL GRIP with attractive white diamond inlay provides a natural, non-slip, comfortable grip.

FORE-END has swept back, streamlined design. Fine checkering and fluting give secure gripping area.

DISTINCT WHITE SPACERS on butt plate and grip cap add attractiveness.

NEW METAL FINISH looks better, wears better . . . because the metal is more highly polished.

BIG 5-SHOT CAPACITY — Easy to load. Four in magazine . . . one in chamber. Three-shot plug furnished.

NEEDS NO ADJUSTMENT — Performs perfectly for different loads; automatically — Shoots high base, low base, 2¾" magnum shells without adjustment.

QUICK-CHANGE BARRELS — They're interchangeable in seconds; no factory fitting is required. Use one gun for all your shooting and get more game, targets, sport.

FASTEST LOADING — Drop a shell in the breech; load another in the magazine in one motion. Load five shells in five seconds.

LIGHTEST RECOIL — Gas action tames recoil; it smooths and cushions . . . and with no loss of power.

RK-W PROTECTIVE FINISH — New Du Pont wood finish is clear. Lets the wood grain show through. It's similar to that used on bowling pins; tough, hard, scratch-resistant . . . gives lasting protection against hard usage and bad weather.

STEEL RECEIVER is made from a solid block of steel for extra strength, ruggedness, dependability.

AVAILABLE IN MAGNUM MODEL — Chambered for 3" magnum shells. Uses 2¾" magnums too. A rugged, dependable shotgun . . . reaches out and drops the high flyers.

DECORATIVE SCROLL WORK on receiver and bolt adds real beauty and value to this gun.

SELF CLEANING — The gas operation of this gun is unusual. It blows dirt and grime away, keeps action bright and shining for long periods of time.

SUPREME DEPENDABILITY — Tests prove the shooting life of this new gun is up to seven times longer than any other automatic shotgun on the market.

BALANCE AND WEIGHT are just right, only 7½ lbs. in 12 gauge. Can be carried comfortably all day. No sacrifice of steel in barrel or receiver . . . not a "featherweight floater" that's too light to point right.

NLW 20 gauge lightweight Model 1100 with specially selected mahogany stock and fore-end, available in Field Grade Guns and SA Skeet Grade.

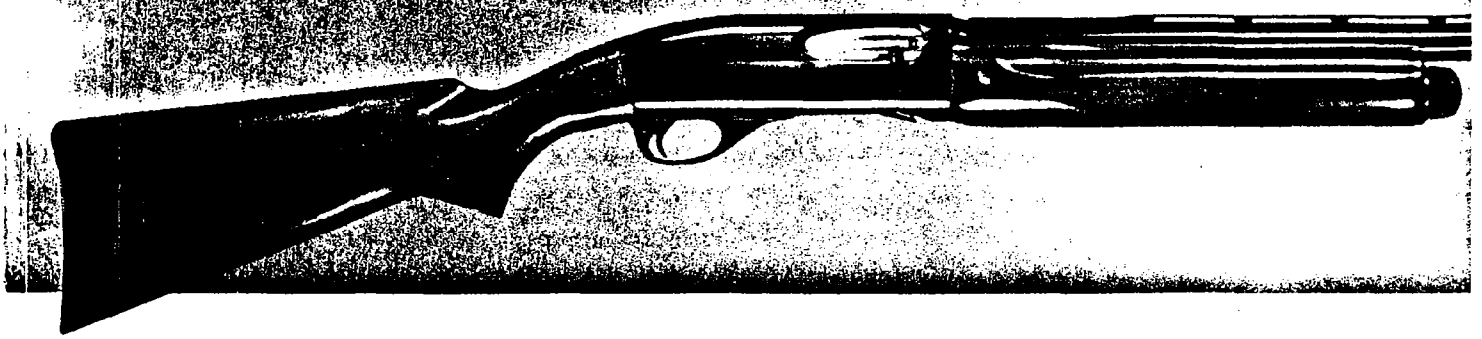
Remington Model 11-48 Automatic Shotgun

1968



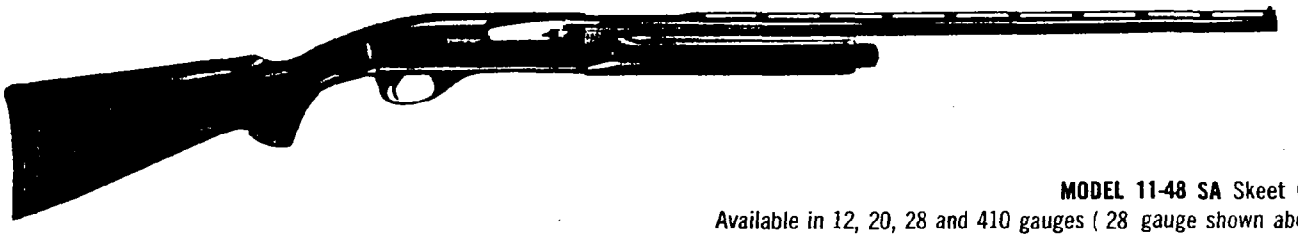
Only Automatic made in All 5 Gauges 12, 16, 20, 28 and 410

The Remington Model 11-48 is an automatic shotgun with a fine reputation that has been earned in the field and wherever skeet targets are thrown. Over a half million proud owners are our best salesmen and they'll tell you the 11-48 is one of the finest automatics on the market. And it is!

It's the only automatic made in 12, 16, 20, 28 and 410 gauges and in the 28 and 410 gauges it's a big favorite with skeet shooters, youngsters, women . . . and hunters who like a small bore shotgun. And speaking of Remington automatic shotguns, they have won more National Skeet Championships than all other brands put together. Here is where shot-after-shot dependability really counts.

Model 11-48 is an excellent value . . . you get a lot of gun for the money, such as: Custom fine-lined checkering on fore-end and stock, receiver milled from a solid block of ordnance steel, rich American Walnut stock and fore-end, 5-shot capacity (in 12, 16 and 20 ga.) and it shoots all brands of ammunition, high and low base plus rifled slugs . . . all without adjustment.

Barrels are interchangeable, too. Takes only a minute to change them and you can do it right in the field. No special tools or factory fittings are required. Dependability, ruggedness, lightweight, fine balance, good looks . . . that's the Remington Model 11-48, a gun that's built the "Remington Way" — to last!

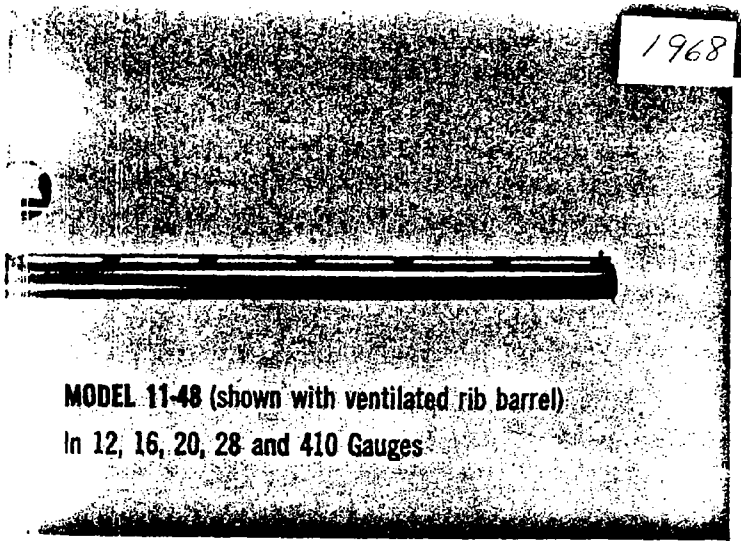


MODEL 11-48 SA Skeet Gun
Available in 12, 20, 28 and 410 gauges (28 gauge shown above)

The 11-48 is available in a skeet model in 12, 20, 28 and 410 gauges and is the only automatic shotgun made in 28 and 410 gauges. It's a great favorite with skeet shooters who demand supreme dependability in the guns they shoot. The Model 11-48 has everything the skeet shooter wants; fine balance, excellent pointing qualities, ruggedness, plus many other features that all add up to higher scores.

SPECIFICATIONS: 26″ barrel (25″ on 28 and 410 gauges) Remington special skeet boring, ventilated rib barrel, ivory bead front sight and white metal rear sight. Stock dimensions: 12 and 20 gauge, 14″ long, 2½″ drop at heel, 1⅝″ drop at comb. 28 and 410 gauges, 13⅜″ long, 2⅝″ drop at heel, 1⅝″ drop at comb. Weight: 12 ga. — 7¼ lbs., 20 ga. — 6½ lbs., 28 and 410 ga. — 6¼ lbs.

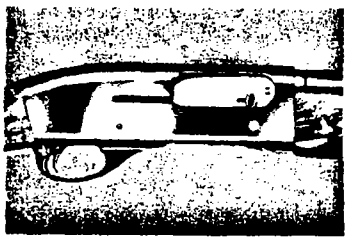
1968



MODEL 11-48 (shown with ventilated rib barrel)
In 12, 16, 20, 28 and 410 Gauges

At the National Skeet Championships and at local shoots, the Remington Model 11-48 is a standout. It's the only automatic made in 28 and 410 gauges; skeet shooters like it because of its fine balance, excellent pointing qualities and dependability.

SPECIFICATIONS: STYLE — 5 shot automatic shotgun — 4 shot in 28 and 410 gauges. 3 shot plug furnished. **GAUGES** — 12, 16, 20, 28 and 410. (3" chamber in 410 ga.) **BARREL** — Special Remington ordnance steel — extra barrel interchangeable within gauge. **OVER-ALL LENGTH** — 48½" with 28" barrel. **SAFETY** — Convenient cross-bolt type, positive. **RECEIVER** — Made from solid steel, top matted. **STANDARD STOCK DIMENSIONS** — Stock and fore-end: Rich American walnut. 12, 16, 20 ga. — 14" long, 2½" drop at heel, 1⅝" drop at comb. 28 and 410 ga. — 13⅞" long, 2⅜" drop at heel, 1⅝" drop at comb. **AVERAGE WEIGHT** — 12 ga. 7¼ lbs.; 16 ga. - 6¾ lbs.; 20 ga. - 6½ lbs.; 28 ga. - 6¼ lbs.; 410 ga. - 6¼ lbs.



SOLID STEEL RECEIVER is milled from a block of ordnance steel; it's super-strong. Every Model 11-48 is built this way for extra strength, durability and ruggedness.

CHOICE OF 5 GAUGES — It's the only automatic shotgun made in all 5 gauges; 12, 16, 20, 28 and 410. Pick the one for your type of shooting.

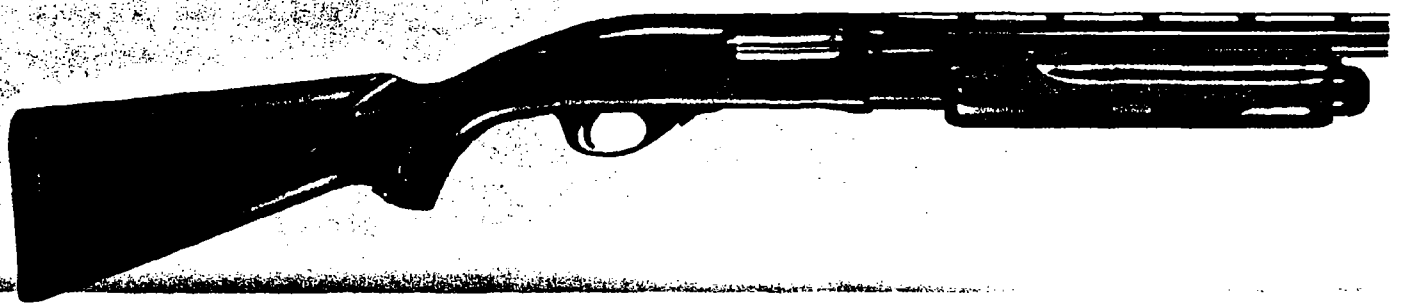
Remington Model 870 Pump Action Shotgun

1968



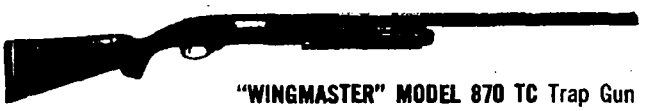
NOW–Recoil Pad is standard on all Model 870 shotguns

Time for a new pump gun? If it is — and you're looking . . . we'd like to help. First of all you want a gun that shucks shells at the flick of your wrist — a gun that's got twin action bars and pumps like a ball-bearing action without twisting or binding. There is a gun like this. It's the slick Remington Model 870!

Want one that's going to last? Of course. Then pick a pump that has a receiver machined from a solid block of steel if you want strength and ruggedness. That's the way a Remington 870 is built . . . we don't make them any other way.

Chances are you'll want to use that gun on different kinds of game. That means interchangeable barrels you can change in seconds — right in the field and without any factory fitting or special tools. With a Remington 870 "Wingmaster" it's so easy — anyone can do it.

Everyone wants a good-looking gun. The 870 is a stand-out in any company and here's why: Custom fine-lined checkering with fleur-de-lis design, rich American Walnut stock and fore-end, and Du Pont-developed RK-W wood finish similar to that used on bowling pins. A Remington 870 pump is one of the best investments you can make in shooting enjoyment — for yourself — as a gift — or, some day, as a pass-along gun to that youngster of yours. So, for good hunting this season, why not take along a new Remington Model 870.



"WINGMASTER" MODEL 870 TC Trap Gun
12 Gauge Only

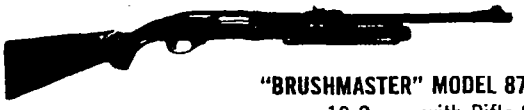
The "Wingmaster" Model 870 TC is the world's most perfectly balanced trap gun!

SPECIFICATIONS: Available with 28" modified, 28" or 30" full choke, ventilated rib barrel. Ivory bead front and white metal rear sight. Recoil pad. Special target grade sear, hammer and trigger assembly. Stock dimensions: 14⅜" long including recoil pad, 1⅞" drop at heel, 1½" drop at comb. Highly figured and finished American Walnut with finely checkered stock and fore-end. Hand fitted action and parts. *Weight:* about 8 lbs. This model also available in TB grade, lower price. Both models available with optional Monte Carlo stock at extra charge.

"WINGMASTER" MODEL 870 SA Skeet Gun

The Model 870 SA, most perfectly balanced pump action shotgun, is ideal for fast second shots at skeet or upland game. Also available in SC grade with specially selected wood and hand checkering.

SPECIFICATIONS: (12 and 20 Gauges) *26" barrel. Remington Special Skeet Boring* Ventilated rib with ivory bead front and white metal rear sight. Stock dimensions: 14" long, 2½" drop at heel, 1⅝" drop at comb. *Weight:* 12 gauge about 7 lbs., 20 gauge about 6½ lbs.



"BRUSHMASTER" MODEL 870 Deer Gun
12 Gauge with Rifle Sight Barrel

The Model 870 Deluxe "Brushmaster," made specially to handle rifled slugs and buckshot, is the latest in smashing power for those fast shots in brush country.

SPECIFICATIONS: The same as standard 870 except as follows: Lightning-fast 20" barrel with fully adjustable rifle-type sights. Stock fitted with rubber recoil pad and white line spacer. Also available in standard model with rifle sights.

"WINGMASTER" MODEL 870 MAGNUM Duck Gun
(shown with ventilated rib barrel) — 12, 20 Gauge

Rugged and dependable for long range shooting! For geese and ducks.

SPECIFICATIONS: 5 shot; chambered for 3" Magnum shells — will also handle 2¾" shells. Variweight and wood 3 shot plug. 12 ga. with 28" and 30" full choke, plain or vent. rib barrel. Steel bead front sight, rubber recoil pad. Checkered stock and fore-end. Stock: 14" long including pad, 2½" drop at heel, 1⅝" drop at comb. 20 ga. furnished in 28" full choke, vent. rib and plain barrels. *Weight:* 12 ga. about 8 lbs., 20 ga. about 7½ lbs., including variweight plug.

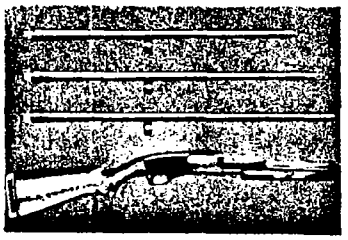
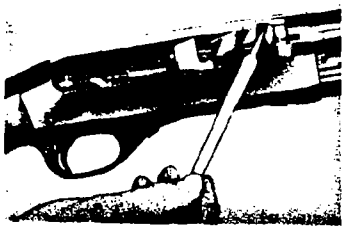
SPECIFICATIONS: STYLE — 5 shot pump action shotgun. Take down. 3 shot plug furnished. **GAUGES** — 12, 16 and 20. **BARREL** — Special Remington ordnance steel. Extra barrel is interchangeable within gauge. **OVER-ALL LENGTH** — 48½" with 28" barrel. **SAFETY** — Convenient cross-bolt type, positive. **RECEIVER** — Made from solid steel, top matted. **STANDARD STOCK DIMENSIONS** — Stock and fore-end: Rich American walnut. Beautiful checkering. 14" long, 2½" drop at heel, 1⅝" drop at comb. Trap reg., 14⅜" long, 1⅞" drop at heel, 1½" drop at comb. Monte Carlo; 14⅜" long, 1⅞" drop at heel, 1⅜" drop at comb, 1⅜" drop at M.C. **AVERAGE WEIGHT** — 12 ga. - 7 lbs.; 16 ga. - 6¾ lbs.; 20 ga. - 6½ lbs.



QUICK CHANGE BARRELS — Change them in seconds, right in the field. No factory fitting or special tools required. Use one gun for all your shotgun shooting and get more game, targets, sport.

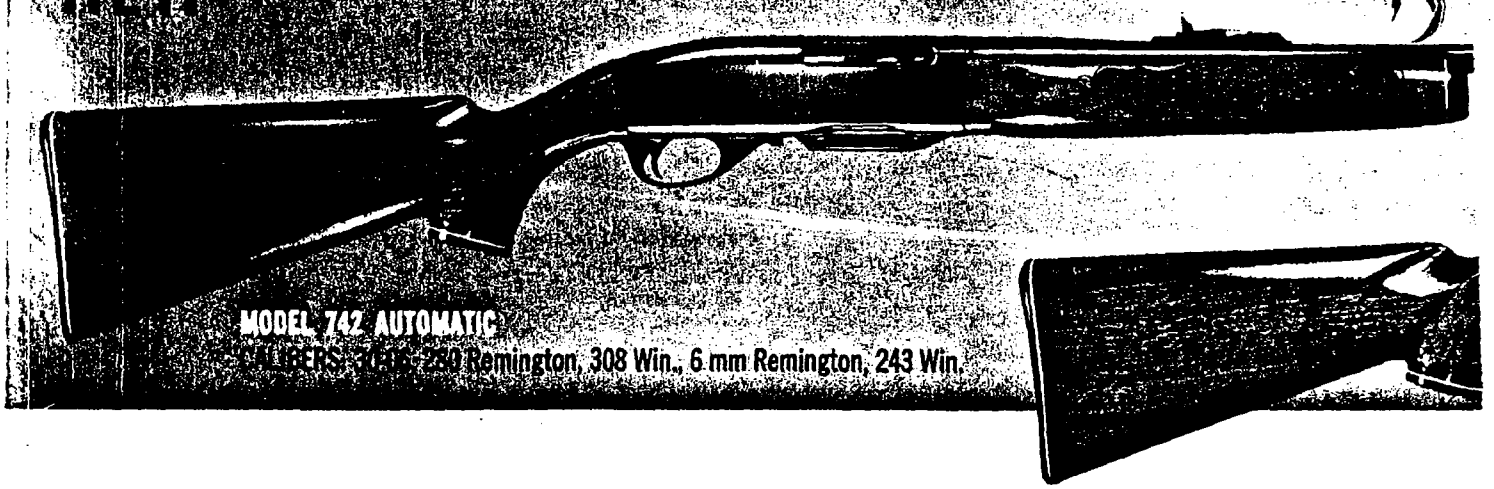


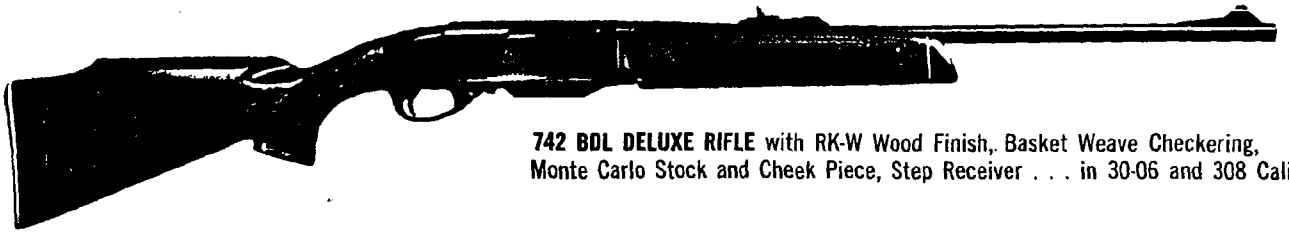
GOOD DESIGN — Barrel is made with a hardened extension into which the breech block must lock before firing. Result . . . longer life, less wear, constant head space.

DOUBLE ACTION BARS prevent twisting and binding, give smooth gliding action for which Remington "Wingmaster" is famous. Many shooters say it works like a ball bearing action. And they're right!

1968

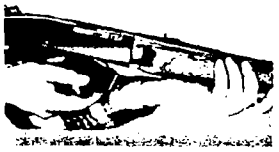
NEW Remington Models 742 Automatic . .



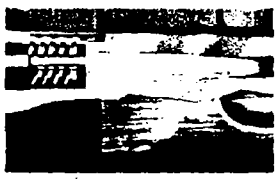


742 BDL DELUXE RIFLE with RK-W Wood Finish, Basket Weave Checkering, Monte Carlo Stock and Cheek Piece, Step Receiver . . . in 30-06 and 308 Calibers

IF YOU LIKE AUTOMATICS . . . you'll like the new Remington "Woodsmaster" Model 742 rifle. A new vibra-honing process makes metal surfaces of this new rifle mirror-smooth — parts work easier, smoother; last longer, too. "Woodsmaster" has many new features, such as: beautiful skip line checkering, restyled fore-end with black fore-end tip, white line spacers, plus a non-slip butt plate. The Model 742 is the strongest automatic big game rifle made. Artillery type bolt has multiple lugs that lock bolt and barrel together as tight as a bank vault. And when the bolt is closed, three rings of steel (bolt, barrel and receiver) enclose the cartridge head. The receiver is milled from a solid block of ordnance steel. Model 742 is so strong it can handle the All-American 30-06 Springfield cartridge. And about the automatic action. First of all, it's dependable — designed for trouble-free functioning. And the fast, gas-operated action soaks up recoil with no loss of power. You're back on target immediately for those extra shots just in case you need them. But chances are you won't, because Model 742 is one of the most accurate automatics ever made. Why not try the 742 "Woodsmaster" this hunting season. When that big buck busts out of the brush — he's yours.



FAST, EASY LOADING, Interchangeable — 4 cartridge magazine facilitates loading and unloading. Extra loaded magazines are easy to carry in pocket.



ROTARY MULTIPLE-LUG BREECH BOLT locks bolt and barrel together securely . . . artillery type. Insures constant head space. Model 760 has same exclusive design.

All Models have Du Pont RK-W Wood Finish.

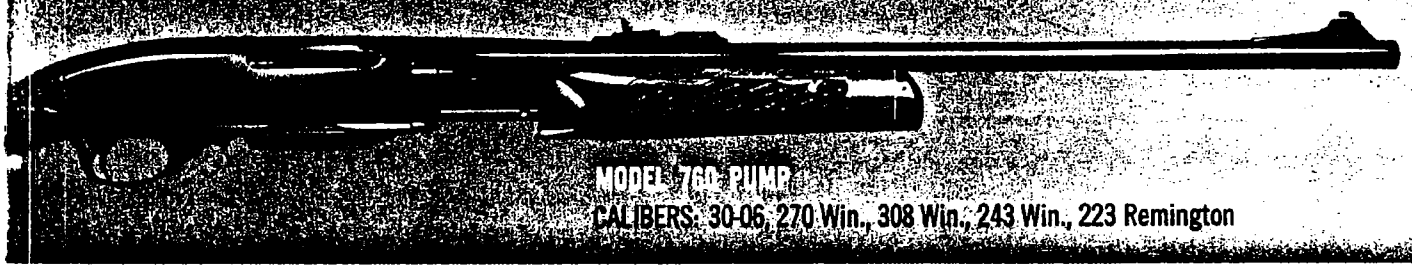
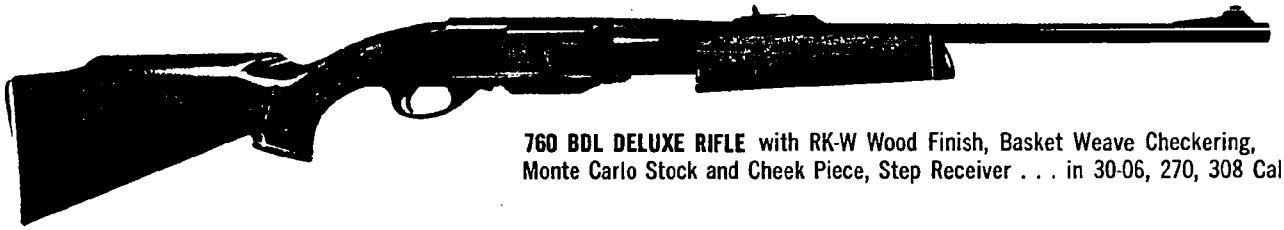
1968

. . . and 760 Pump Big Game Rifles

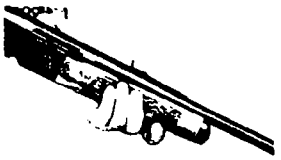
have been restyled for faster handling, smoother operation, improved appearance





760 BDL DELUXE RIFLE with RK-W Wood Finish, Basket Weave Checkering, Monte Carlo Stock and Cheek Piece, Step Receiver . . . in 30-06, 270, 308 Calibers

ARE "PUMPS" YOUR CHOICE? The new restyled "Gamemaster" Model 760 is the fastest hand operated big game rifle made. It has many features similar to the automatic, such as: New vibra-honing process — inside and out — makes metal surfaces silky smooth; parts work friction-free. New skip line checkering gives this rifle a distinctive look and the checkering assures a non-slip grip. Other new features are: Streamlined beavertail fore-end with black tip, white line spacers on butt plate, grip cap and fore-end and a newly designed non-slip butt plate. Pump it and your trigger finger never leaves the trigger. Aim it and your eye never leaves the sights. Double action bars prevent twisting and binding. Accuracy is there, too; crisp trigger, precision rifling and a free-floating barrel are working for you — helping you put that buck in the freezer. Because of its super strong artillery-type bolt, Model 760 is the only pump action big-game rifle that's chambered for the popular and powerful 30-06 Springfield cartridge. Why not take one on your next deer hunting trip. It's "buck insurance."



LIGHTNING FAST ACTION — A flick of your forearm keeps you shooting; double action bars prevent twisting and binding. Pumping is effortless, like a ball-bearing action.

REMINGTON FIRE CONTROL trigger must be released and squeezed for each shot — can't fire unless action is completely closed. An important safety feature.

All Models have DuPont RK-W Wood Finish.

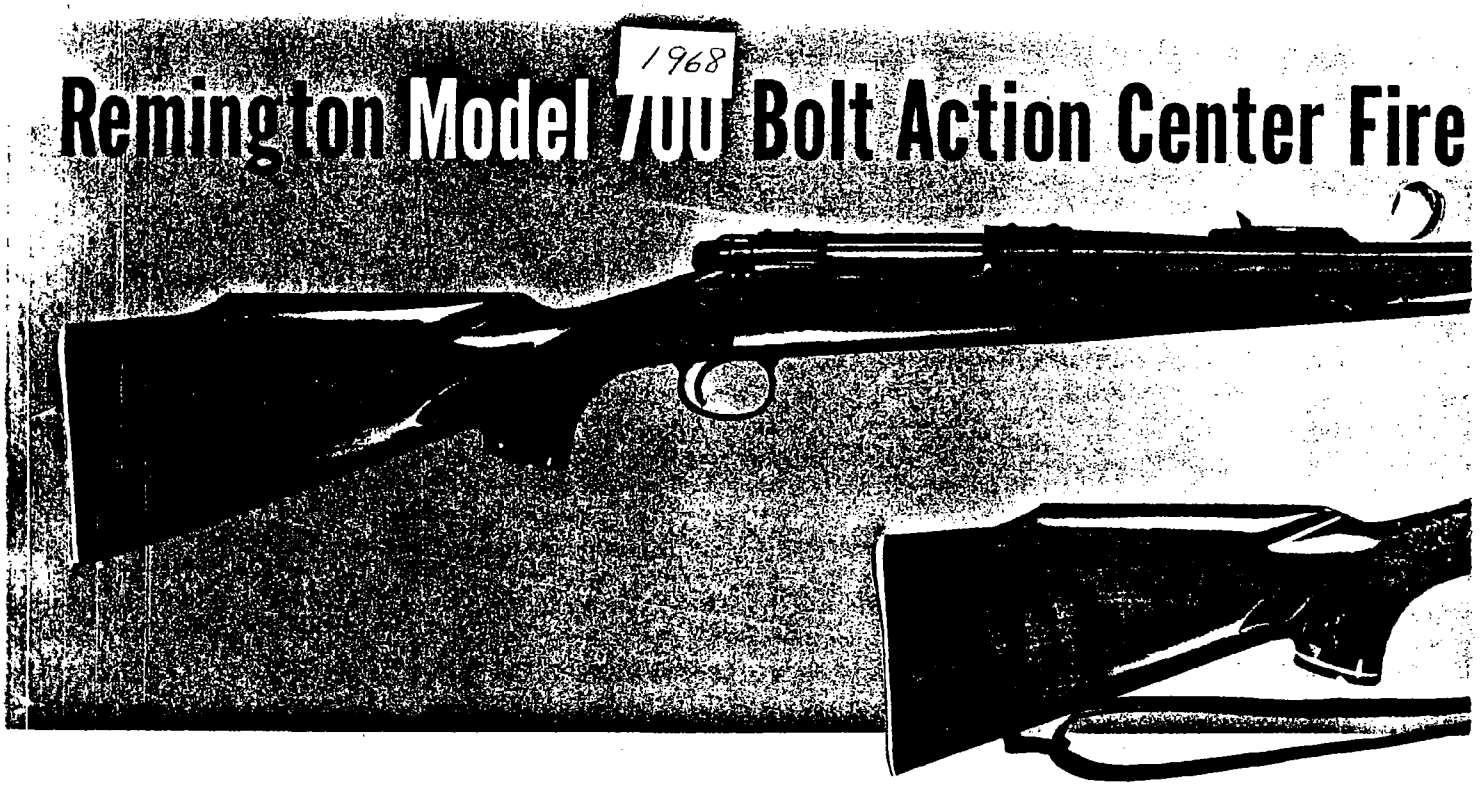
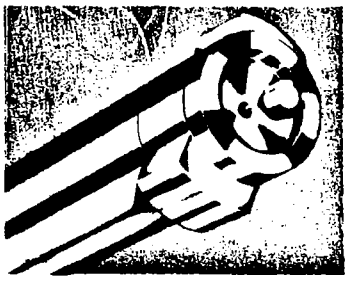
R2525207

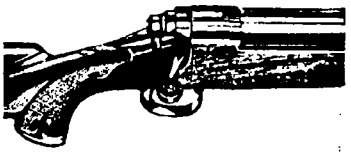
Remington Model 700 Bolt Action Center Fire

1968





WORLD'S STRONGEST BOLT ACTION. Cartridge head is encased and supported by ring of solid steel. When action is closed, three rings of steel support the cartridge head. It's super-strong.



BOLT KNOB is checkered, top and bottom. Grip is custom checkered. BDL Model has grip cap and white spacers.

MONTE CARLO STOCK and CHEEK PIECE make the model 700 good to look at . . . and good to shoot. There's a better cheek-to-stock fit with a Monte Carlo stock and cheek piece . . . which means quicker, surer sight alignment with either scope or iron sights.

When the Model 700 was first developed, our tests proved that we had produced the finest center fire bolt action rifle ever made. Now our sales records have proven it again. Since its introduction, shooters have bought more Remington Model 700's than any other center fire bolt action rifle on the market in its price class. And their reasons for buying make good sense. For example:

The Remington 700 bolt action is designed for the real rifleman. *The shooter* who wants the accuracy bonus of Remington's famous precision rifling and short, crisp trigger pull. *The hunter* who appreciates the comfort of a cheek piece and Monte Carlo comb on an all-purpose stock that gives superb balance and perfect alignment with either 'scope or open sights. *The craftsman* who loves the traditional beauty of fine checkering. And it has a beautiful wood finish that is tough, hard, scratch-resistant — gives lasting protection against hard usage and bad weather. The 700 owner also gets the world's strongest bolt action. The bolt head completely encloses the cartridge case in a ring of steel. And the Model 700 is available in 14 popular calibers.

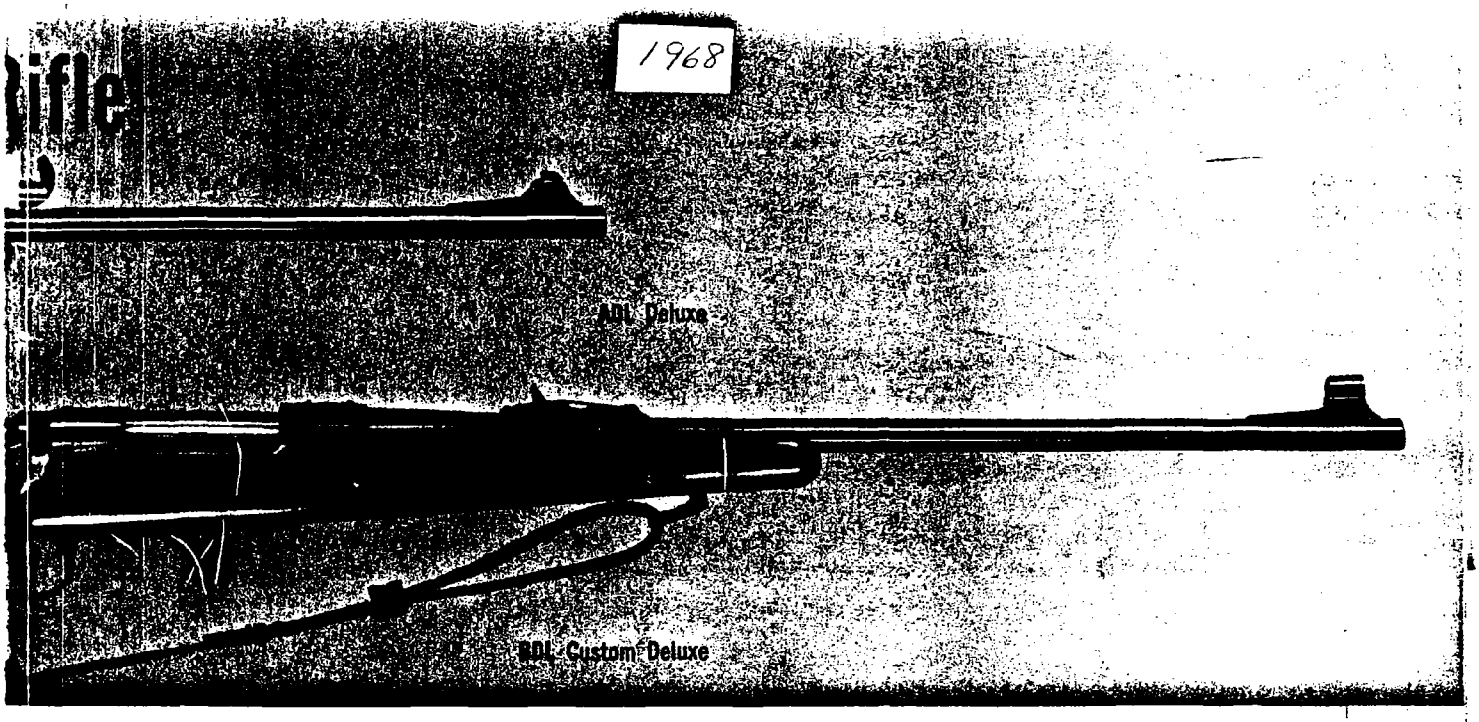
BEAUTIFUL, SUPER-TOUGH RK-W FINISH, the most durable wood finish known, is now on all Model 700 Rifles. Du Pont-developed RK-W finish is similar to that used on bowling pins. No wonder it's good on guns.

LONG 22" BARRELS are now standard on the following rifles: 6 m/m Rem., 243 Win., 270 Win., 30-06 and 308 Win. Varmint and Magnum calibers are unchanged at 24" and Safari calibers at 26".

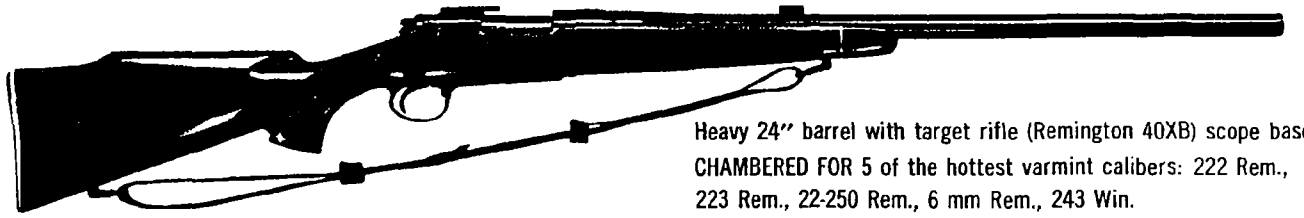
SIGHTS ARE NOW DETACHABLE. If a shooter who uses a scope prefers to remove the iron sights, it's now an easy matter. Filler screws supplied in the receiver will plug the sight fastening holes.

R2525208

1968



NEW Model 700 BDL "VARMINT SPECIAL"



Heavy 24" barrel with target rifle (Remington 40XB) scope bases.
CHAMBERED FOR 5 of the hottest varmint calibers: 222 Rem., 223 Rem., 22-250 Rem., 6 mm Rem., 243 Win.

The Model 700 is one of the fastest selling bolt action center fire rifles. Now it's made in the new BDL "Varmint Special" version — designed for minimum-target, maximum-range precision shooting.

It's chambered for 5 of the hot ones — 5 fast-and-flat shooting cartridges that are sure medicine on chucks, 'cats, foxes and other pests — and its 24" heavy barrel places this rifle in a new accuracy class.

Target-rifle (Remington 40XB) scope bases — hinged floor plate — quick release swivels and strap — crisp, smooth trigger — Monte Carlo stock with cheek piece — Du Pont developed RK-W wood finish — custom quality checkering . . . they all add up to "something special in a varmint special" . . . the one you'd expect from Remington.

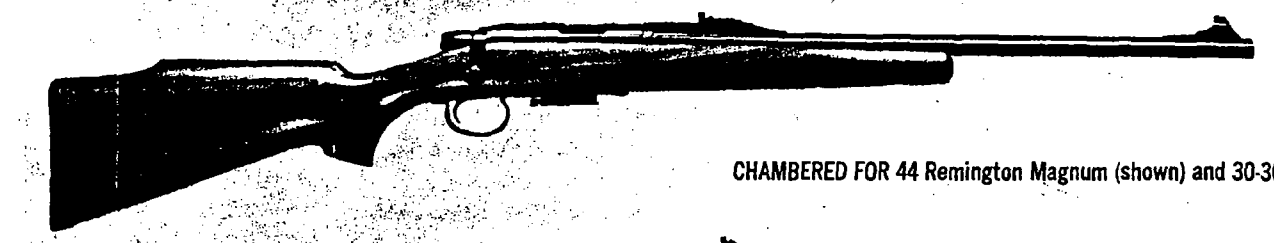
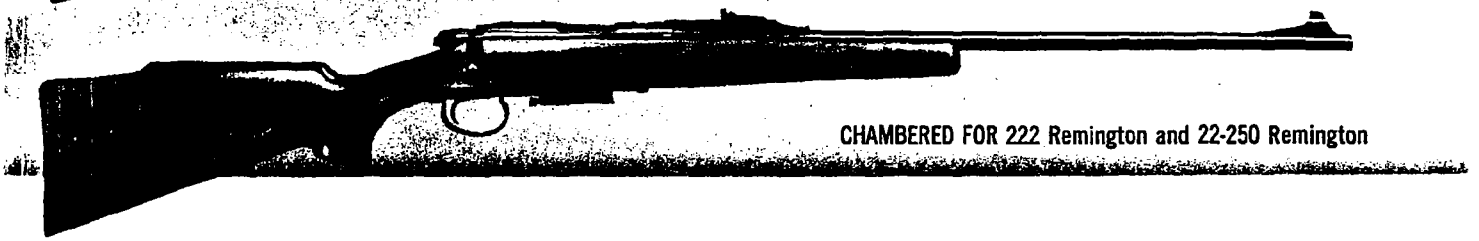
Remington Model 788 Bolt Action Rifle

1968



CHAMBERED FOR 44 Remington Magnum (shown) and 30-30 Calibers



CHAMBERED FOR 222 Remington and 22-250 Remington

In two favorite brush-busting big game calibers, 30-30 and 44 Rem. Magnum

and two super-accurate long range varmint calibers, 222 Rem. and 22-250 Rem.

Now you can get a moderately priced Remington bolt action rifle in one of the most famous deer calibers ever designed — the popular 30-30. Over the years, this caliber has probably taken more deer than any other single caliber. Or you can get this new rifle in still another game-getter, the 44 Remington Magnum, which is rapidly gaining in popularity because of its tremendous shocking and stopping power. This cartridge has a heavy bullet which plows through the thickest brush with little deflection. Now you can get bolt action accuracy in both of these calibers . . . with the new Remington Model 788.

And Model 788 offers still more. If you're a varmint shooter, you have a choice of two of the hottest varmint calibers —the sizzling 22-250 Remington or the super-accurate 222 Remington. Both calibers are rough on varmints and small game. This bolt action beauty does not carry a big price tag. It's priced right — so that every hunter can afford it. There are no fancy frills, just solid, rugged, long-lasting dependability . . . true Remington quality. The many outstanding features described below are your assurance that this new Remington rifle is built to last for many, many years.

Quality Features of the REMINGTON MODEL 788

ARTILLERY TYPE BOLT has nine extra heavy locking lugs that engage grooves in the solid steel receiver for a strong, secure lock-up . . . like a bank vault. Rear bolt cover provides extra protection and streamlining.

CLIP MAGAZINE slips in or out of the receiver in seconds with one hand; makes loading or unloading simple and safe. No working cartridges through the action. An extra pre-loaded magazine in your pocket speeds up loading.

TAPERED BARREL is finest ordnance steel — precision rifled for extreme accuracy at all hunting ranges. Barrel is crowned at muzzle. Elevated barrel bracket provides a solid, positive 'scope back-up.

ROUND RECEIVER permits perfect wood-to-metal bedding . . . which in turn contributes to fine accuracy. Receiver is also drilled and tapped for 'scope mounts and receiver sight at left rear.

BLADE FRONT SIGHT on serrated ramp is detachable and U notch rear sight is lock-screw adjustable for windage and elevation. Rear sight barrel holes are correct for target scope block.

BIG SERRATED SAFETY is convenient and well positioned at rear of receiver. Forward for fire; rearward for safe.

ALL-PURPOSE MONTE CARLO STOCK with pistol grip is designed for use with 'scope or open sights. Full size fore-end provides a sure grip for holding and aiming.

HUNTING TYPE TRIGGER. Sturdy trigger guard is big enough for use with gloves. Trigger pull is crisp and clean; you can feel the quality when you squeeze off shots in this new model. Exceptionally fast lock time contributes to fine accuracy.

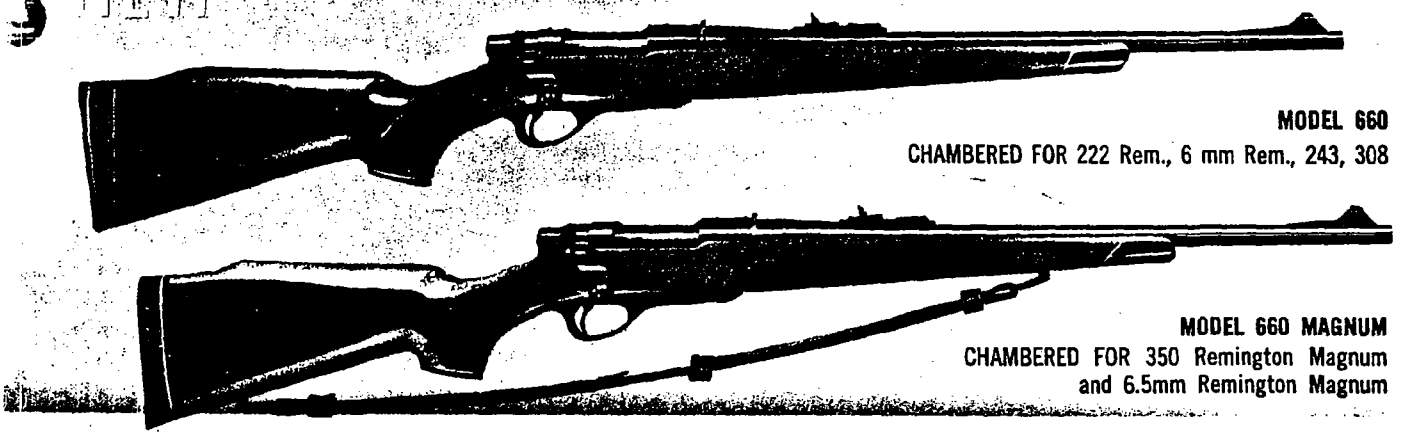
NEW Remington Model 660 Bolt Action Carbine

1968



MODEL 660
CHAMBERED FOR 222 Rem., 6 mm Rem., 243, 308

MODEL 660 MAGNUM
CHAMBERED FOR 350 Remington Magnum and 6.5mm Remington Magnum

Sleek New Remington Model 660 Carbine packs the power and punch to knock down any big game in North America

The new Model 660 bolt action center fire carbine has power . . . lots of it . . . all the way up to that powerhouse — the 350 Remington Magnum Caliber. But it has more than power. It's actually an improvement and a replacement for the Remington Model 600 carbine . . . which already has an excellent reputation. So it wasn't easy making changes . . . but the changes we did make give the shooter a better looking, better performing, more accurate rifle. For example:

New metal finishes, inside and out, are now silky-smooth for fast, friction-free operation; thanks to a new vibra-honing process. Receiver is already drilled and tapped; it's a simple matter to install a 'scope. New adjustable sights are the same dependable type that are on the Remington Model 700. The fore-end was redesigned and a good-looking black fore-end tip was added plus a black grip cap with diamond inlay. Three white line spacers on the fore-end, grip cap and butt plate give this carbine an attractive appearance — in the field or in a gun rack. New 20" magnum barrel (for greater accuracy and stability) is now standard on both the Model 660 regular and Model 660 magnum rifles. Over-all measurement is a comfortable, fast-handling carbine length (38¾"). Convenient length means this rifle goes anywhere — in a saddle scabbard, pick up truck or carrying in heavy brush country. The new bolt cover at rear keeps out dirt, grit and bad weather. And one of its best features is this: It has the world's strongest bolt action. Three rings of solid steel surround the cartridge head.

FEATURES MODELS 660 AND 660 MAGNUM

CUSTOM CHECKERING on fore-end and grip is fine-lined, uniform, good looking.

MONTE CARLO STOCK means a better cheek-to-stock fit for quicker, surer sight alignment with either a 'scope or open sights.

WORLD'S STRONGEST BOLT. When bolt is closed, three rings of steel surround and support the cartridge head.

FORWARD "S" BOLT HANDLE hugs the stock — doesn't stick out. Half knob is serrated on the bottom for a good secure grip. No bruised fingers from recoil.

ROTATING THUMB SAFETY is conveniently located at the rear of the receiver marked "F" for fire; "S" for safe.

ADJUSTABLE SIGHTS. Brass bead on front sight. Sturdy U notch rear sight is adjustabe for elevation and windage.

TRIGGER is extra wide and corrugated; crisp and clean — no creep, no spongy action.

STOCK. Model 660 has American walnut. Model 660 Magnum has lamination of walnut and beech that provides tremendous strength, stability and beauty.

WOOD FINISH is famous DuPont RK-W that's tough, scratch and water resistant, the most durable wood finish known.

RECOIL PAD on Model 660 Magnum cushions the recoil of the game-getting 350 Rem. Mag. and 6.5 mm Rem. Mag. calibers.

MAGNUM BARREL on both models. Free floating barrel provides extreme accuracy.

'SCOPE BACK-UP. Strong bracket of steel forms 'scope mount back-up which takes vibration and recoil; keeps scope "zeroed in."

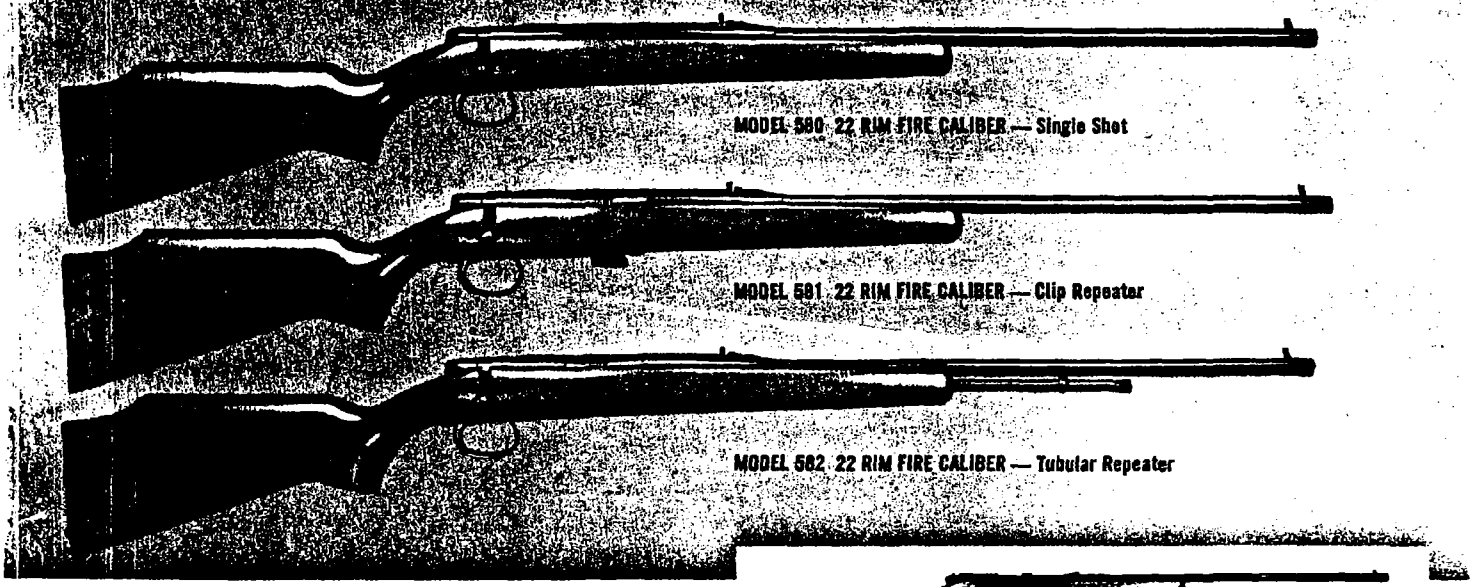
Remington Models 580, 581 and 582 Bolt Action Rifles

1968

LOOK LIKE and are BUILT LIKE BIG GAME RIFLES



MODEL 580 22 RIM FIRE CALIBER — Single Shot

MODEL 581 22 RIM FIRE CALIBER — Clip Repeater

MODEL 582 22 RIM FIRE CALIBER — Tubular Repeater

The 580 series of bolt action rifles are what you asked for; 22 rim fire rifles with the look, feel and balance of big game center fire rifles — plus the strongest, most powerful bolt ever designed into a 22 caliber hunting rifle. How did we do it? Well, we started by redesigning the bolt, making it stronger, smoother, better. It's the artillery type with rear lock-up. The bolt has six extra-heavy, rotary locking lugs at the back that engage grooves in the solid steel receiver. Together they lock up tight, like a bank vault. Try it — work the action a few times. It's silky-smooth, solid and secure, made of ordnance steel. Here is strength that has never been equalled in any 22 bolt action hunting rifle. Other features are:

HUNTING-TYPE TRIGGER is wide and the trigger pull is crisp, sharp, clean —no drag. Big, sturdy trigger guard is roomy enough to accommodate a gloved finger.

BOLT COVER at rear keeps out dirt, grit and bad weather.

FULL SIZE MONTE CARLO STOCK with pistol grip looks and feels like a center fire rifle. It assures a snug, comfortable cheek-to-stock fit that means more hits—with or without a 'scope.

SIGHTS are rugged, similar to those on big game rifles. Bead front sight and U notch lock-screw adjustable rear.

ROUND RECEIVER means bedding into the stock can be more precise, which in turn contributes to fine accuracy. The receiver is also grooved for tip-off 'scope mounts.

ORDNANCE STEEL BARREL is precision rifled, crowned at the muzzle and polished and blued for good looks and long wear.

TWO EXTRACTORS are standard on these rifles.

NON-SLIP THUMB SAFETY is conveniently located at the right rear of the receiver. Positive safety—forward for fire; rearward for safe. Marked "F" for fire; "S" for safe.

TRUE REMINGTON QUALITY and bulls-eye performance—that's what you get when you shoot these rifles. Here's why: Strength and rigidity of bolt, adjustable sights, hunting type trigger, round receiver for snug bedding, precision rifled barrel plus fastest lock-time; here's an accuracy combination that's hard to beat.

MODEL 514

Here is an excellent 22 caliber rifle . . . at a popular price. It's a single-shot bolt action model with self-cocking bolt, rotary thumb safety and takes all 22 caliber cartridges — short, long or long rifle; standard velocity or high speed. For the young shooter, it's also available as Model 514 BR "Boy's Rifle" with cut down stock.

SPECIFICATIONS: ACTION — All bolt action. M/580 single shot, M/581 clip repeater, M/582 tubular repeater. **CALIBER** — 22 rim fire; short, long, or long rifle cartridges. **CAPACITY** — M/580 single shot, M/581 5-shot, M/582 20 short, 15 long, 14 long rifle cartridges. **BARREL** — 24 inch ordnance steel, precision rifled, crowned at muzzle. **STOCK** — Monte Carlo type, full size, black butt plate. Single screw take-down. **SIGHTS** — Front; bead, dovetail adjustable. Rear; U Notch type, lock-screw adjustable. **BOLT** — Artillery style, lock-up at rear. 6 locking lugs, double extractors. **RECEIVER** — Round, ordnance steel, grooved for 'scope mounts. **SAFETY** — Positive, serrated thumb type, forward for fire, rearward for safe. **OVER-ALL LENGTH** — 42⅜". **WEIGHT** — M/580 5 lbs., M/581 5¼ lbs., M/582 5½ lbs.

SPECIFICATIONS: MODEL 514 — ACTION — Bolt action, single shot. **CALIBER** — 22 short, long, long rifle rim fire. **CAPACITY** — Single shot. **BARREL** — 24 inch, precision rifled, Remington ordnance steel. **STOCK** — Walnut finished hardwood, full sized, black butt plate. **SIGHTS** — Bead front sight, open rear. **SAFETY** — Rotary thumb safety. **RECEIVER** — Made from solid steel. **OVER-ALL-LENGTH** — 41 inches. Boy's rifle 40 inches. **WEIGHT** — 4¾ lbs.

1968

Remington Automatic Nylon 66 22 Rim Fire RIFLES

NYLON 66 Mohawk Brown

Remington's Nylon 66 is setting an amazing record in sales and customer acclaim. Here's why!

Structural-nylon is many ways better than conventional material for the gun's stock and fore-end. Because this super-strong material doesn't warp, the same barrel bedding principle used on the world's most expensive target rifles is yours. The result is an automatic that nails targets, tin cans and small game with tremendous accuracy. This is the same model rifle used to establish an accuracy record on hand-thrown 2½" wood blocks. Only six misses out of over 100,000 blocks thrown . . . and without a malfunction.

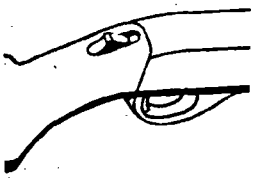
Receiver parts, stock and barrel are a bold interlocking of steel and structural nylon that creates the most trouble-free automatic action ever known. There's no need for lubrication because friction-free parts glide on "greaseless bearings" of nylon. Perfect checkering makes for fast, sure holding, and the convenient top-of-grip thumb safety slips off "safe" in a wink for running game shots. The handsome Nylon 66 has white diamond inlays and white line spacers at grip cap, butt plate and fore-end tip. Available in Mohawk Brown and Apache Black with chrome plated barrel and receiver.

The Nylon 66 is also made in an Apache Black deluxe model. The stock is Du Pont Zytel® black nylon and both the barrel and the receiver cover are chrome plated. Inside, it's the same reliable, trouble-free rifle as the standard mohawk brown model.

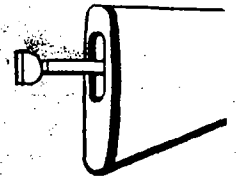
The Nylon 66 is the most rugged automatic 22 rim fire rifle made. Alaskan fishermen think so, too; they use it on their fishing boats to keep marauding sea lions out of their nets. Salt spray, foul weather, fish slime and mud knock out other 22's. But not the Nylon 66. This is why these fishermen look on the Remington Nylon 66 as almost a "tool-of-the-trade." Still further proof: Trappers in the humid bayous along the Gulf States swear by the "gun with the nylon stock." Why? Same reasons; it's tough, it works under all conditions, it stands up . . . and it's exceptionally accurate.

Ask your dealer to see the fabulous Nylon 66, in Apache Black or Mohawk Brown. They're both winners.

IT'S AMAZINGLY ACCURATE . . . barrel and fore-end are precisely mated to give outstanding accuracy. Structural-nylon permits three-point bedding found only in costly target rifles.



TOP-OF-GRIP THUMB SAFETY. The most convenient, easiest to use safety ever designed for 22 rifles.



LOADING IS FAST, EASY — a twist of wrist and tubular magazine is removed or replaced through butt plate. Single loading for beginner is handled smoothly through port with automatic ejection of fired round.

— Automatic. **CALIBER** — 22 long rifle Rim Fire. **CAPACITY** — Tubular magazine thru butt stock. Holds 14 long rifle cartridges. **BARREL** — 19¾ inch, precision rifled, Remington Ordnance Steel. **STOCK** — One-piece structural nylon, checkered grip & fore-end with white diamond inlays, white line spacers on butt plate, grip cap & fore-end. **SIGHTS** — Adjustable rear sight, blade front, common sight line for iron sights and scope. **SAFETY** — Top-of-grip. **RECEIVER** — Grooved for "tip-off" 'scope mounts. **OVER-ALL LENGTH** — 38½". **COLOR** — Mohawk Brown with blued barrel and receiver. Apache Black with chrome plated barrel and receiver cover. **WEIGHT** — 4 lbs.

R2525213

Remington Automatic 22 Rim Fire Rifles

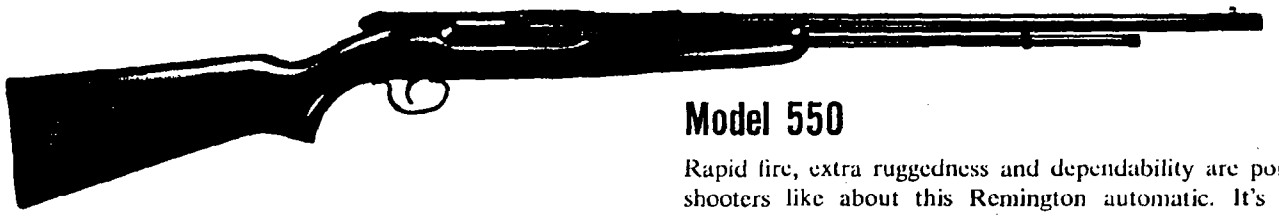
1968

MODEL 552 BDL DELUXE AUTOMATIC 22 RIFLE with RK-W Wood Finish, Custom Checkering, Big Game Type Sights, Grip Cap, Large Cartridge Capacity, Quality Throughout

VERSATILE. Shoots 22 Short, Long and Long Rifle cartridges interchangeably without adjustment. Load 'em up in any order and start shooting. Your trigger finger does all the work.

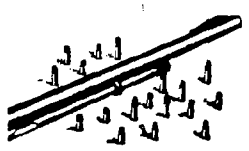
SINGLE LOADING — AUTO EJECTION. For use as a single shot rifle, pull back bolt, drop cartridge into the ejection port, release bolt and you're ready to shoot. Empty cartridge case will be ejected automatically.

Here's the Remington 22 caliber automatic that's fast shooting, accurate, nicely balanced . . . the rifle you'll want for small game hunting, controlling crop-destroying and marauding pests, or for just plain fun-shooting. The Model 552 is another member of Remington's "family of guns"; looks, handles and shoots like its big brother, the Model 742 big game rifle. "Speedmaster" has every feature the shooter wants, such as: twenty shots as fast as you can squeeze the trigger, rich walnut stock, cross bolt safety, receiver grooved for "tip-off" 'scope mounts. Also available in the short barrel (21") carbine model, the Gallery Special and the new deluxe model. Pick a 552 off the rack at your dealer's — heft it — throw it to your shoulder. We think you'll agree, it's the rifle that "feels right" . . . because it's made right.



Model 550

This rugged and dependable automatic will handle, interchangeably and without adjustment, Short, Long and Long Rifle cartridges.

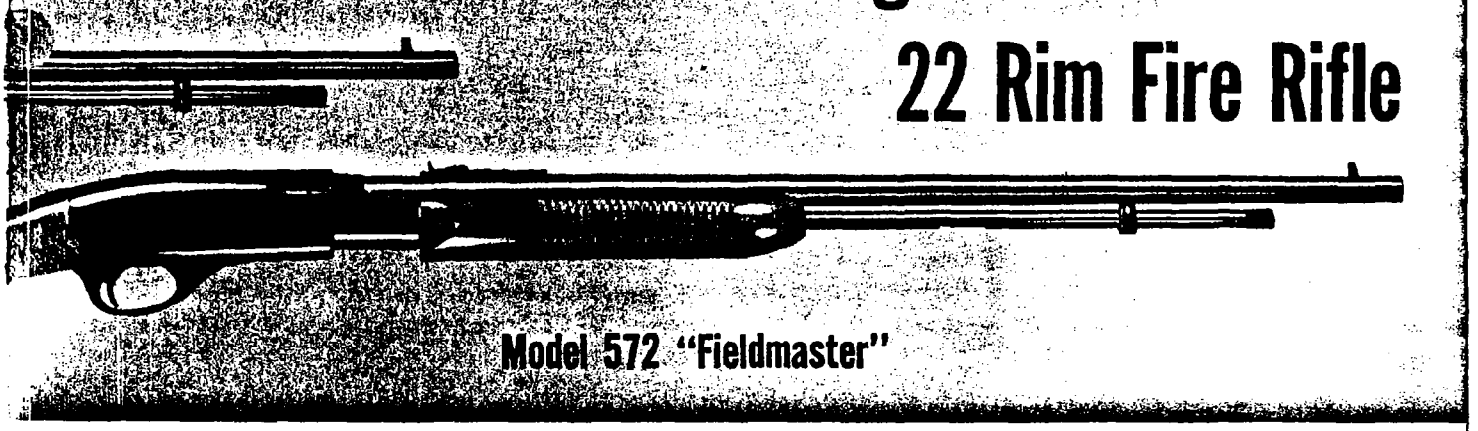


Rapid fire, extra ruggedness and dependability are points shooters like about this Remington automatic. It's the famous 22 caliber rifle that shoots Short, Long and Long Rifle cartridges with no adjustment. Mix them up, drop them in the tubular magazine and fire away. Model 550 takes 'em as they come. Other fine features are: Large capacity, up to 20 Shorts, American walnut stock, fine accuracy, thumb safety, receiver grooved for "tip-off" 'scope mounts. The Model 550 is well-built, well-designed — an exceptionally fine all-around rifle for the hunter or plinker . . . and good for week-end family fun, too.

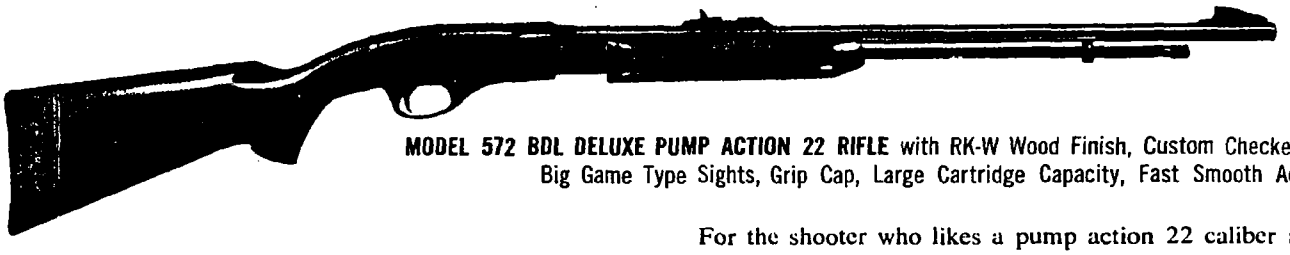
R2525214

1968

Remington Pump Action 22 Rim Fire Rifle



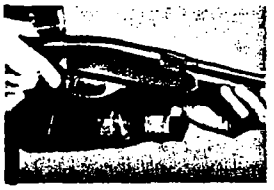
Model 572 "Fieldmaster"



MODEL 572 BDL DELUXE PUMP ACTION 22 RIFLE with RK-W Wood Finish, Custom Checkering, Big Game Type Sights, Grip Cap, Large Cartridge Capacity, Fast Smooth Action

For the shooter who likes a pump action 22 caliber rifle, the "Fieldmaster" Model 572 is best . . . action is slick and smooth. Exclusive cartridge feeding design prevents jamming, permits easy single loading. By simply removing the inner magazine tube, parent or instructor can convert the "Fieldmaster" into a single shot rifle. Receiver has dovetail grooves for "tip-off" 'scope mounts. Capacity is large; tubular magazine holds 20 short, 17 long or 15 long rifle cartridges. It has a cross bolt safety conveniently located at the rear of the trigger guard where it can be snapped on or off with the index finger. The Model 572 is beautifully streamlined and balanced — rugged and dependable like Remington big game rifles and shotguns.

SINGLE LOADING — It's the only slide action 22 rifle with positive single loading through the ejection port — a feature especially important to parents and shooting instructors.



FAST, POSITIVE ACTION — short stroke operation is fast and smooth . . . ideal for plinking or for getting off quick shots at hard-to-hit game. The Model 572 "Fieldmaster" shoots as fast as you can flick the fore-end.

SHOOTERS FORGET—but a "Fieldmaster" won't. For extra safety it's designed not to fire if the trigger is pressed while the action is being closed. Trigger must be released and pressed for each shot.

SPECIFICATIONS: MODEL 552: ACTION — Automatic. **CALIBER** — 22 Rim Fire. **CAPACITY** — Tubular magazine holds 20 Short, 17 Long, 15 Long Rifle cartridges. **SIGHTS** — Adjustable rear sight, bead front. Deluxe Model: Blade ramp front sight. Step adjustable rear sight with windage adjustment screw. **STOCK** — Rich American walnut. **SAFETY** — Cross-bolt type. **RECEIVER** — Grooved for "tip-off" scope mounts. **OVER-ALL LENGTH** — 42"; 40" (Carbine). **WEIGHT** — 5½ lbs.

MODEL 550: Same as Model 552 except: **SAFETY** — Thumb style. **OVER-ALL LENGTH** — 43½". **WEIGHT** — 6¼ lbs.

MODEL 572: Same as Model 552 except: **ACTION** — Pump, repeater.

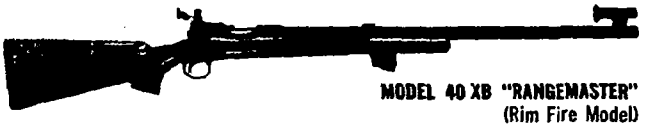
R2525215

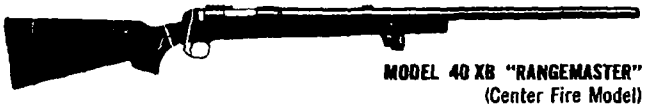
Remington Target Rifles 1968



MODEL 40 XB "RANGEMASTER"
(Rim Fire Model)

Exclusive loading platform provides straight line feeding; no shaved bullets. Specially selected ordnance steel barrel with the new Remington-process rifling. Choice of free floating standard or heavy barrels. High comb gives same sighting plane for iron and telescope sights. Comb is grooved for bolt removal. Mershon White Line non-slip rubber butt plate. Adjustable sling swivel and handstop. Extra strong bolt with double extractors. Crisp trigger with positive click adjustments for weight of pull. Wide trigger for more uniform pull and comfort. Thumb operated safety. Receiver drilled and tapped for all standard sight mounts — telescope and metallic. Redfield Olympic front and rear sights optional. New long rail for fore-end stop and palm rest.

SPECIFICATIONS: MODEL 40 XB (Rim Fire Rifle): ACTION — Bolt, Single Shot. **CALIBER** — 22 Rim Fire. Some Center Fire. **CAPACITY** — Single loading. Long Rifle only. **SIGHTS** — Redfield Olympic front & rear sights optional. **SAFETY** — Thumb Safety, positive. **RECEIVER** — Drilled & tapped for iron sights or 'scope mounts. **BARREL LENGTH** — 28". Over-all rifle length 47". **LENGTH OF PULL** — 13½". (Trigger adjustable 2 to 4 lbs.) **STOCK** — American walnut. Palm rest & front swivel block, adjustable on base. **WEIGHT** — With Redfield sights heavy barrel 12¾ lbs. Standard barrel, 10 lbs., 12 oz. Without sights, 12 oz. less.

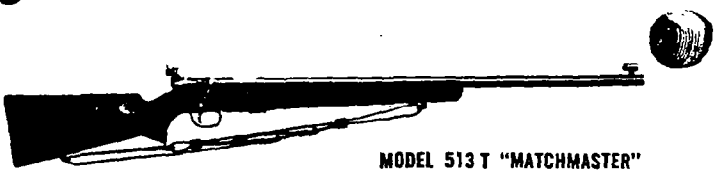


MODEL 40 XB "RANGEMASTER"
(Center Fire Model)
Now Available in Repeating Model for use in National Match Course

The 40 XB center fire rifle is designed with clip slots for the conventional five shot clip. It loads from the top of the receiver and the magazine has a hinged floor plate. Clip slots are provided only in calibers with 308 head diameter. The 40 XB center fire repeating rifle is ideal for the rapid fire events, especially in the 7.62 mm Nato (308) caliber, because of its shorter bolt throw and extreme accuracy, plus its optimum weight for "over the course" competition.

As a single shot model, the Remington Model 40 XB center fire is offered in several center fire calibers as listed in specifications. The action is hand bedded and the barrel is free floating. Heavy barrel model meets the National Bench Rest Shooters Association rules for the Heavy Varmint Class with most target telescopes. (Max. weight 13½ lbs.) Standard barrel model can be made to fit the NBRSA Light Varmint Class rules by using a light scope and removal of wood from beneath the barrel and butt plate. (Max. weight 10½ lbs.) Stainless steel barrels are supplied as standard on 7 mm Rem. Magnum and 30-338 at extra charge. Stainless steel is also recommended for 22-250 and 6 mm Rem. (at extra charge.) Stainless 40 XB barrels are not blued.

SPECIFICATIONS: MODEL 40 XB (Center Fire Rifle): ACTION — Bolt, Single Shot & Repeating. **CALIBERS — Single Shot** — 222 Rem., 222 Rem. Mag., 223 Rem., 22-250, 6 mm x 47 mm (6 mm .222 Mag.), 6 mm international (6 mm on .250 Sav. case), 6 mm Rem. (244 chamber), 243 Win., 6.5 mm Rem. Mag., 7 mm Rem. Mag., 7.62 mm Nato (308 Win.), 30-06, 30-338, (.30, 7 mm Mag.). **Repeating** — 7.62 mm Nato (308 Win.), 222 Rem., 222 Rem. Mag., 223, 243 Win., 6 mm x 47 mm, 6 mm Rem., 6 mm Int., 22-250. Calibers whose over-all loaded length is equal to or shorter than the 308. **CAPACITY**—Single loading and repeater. (Loads from top of receiver). **SIGHTS** — Redfield Olympic front & rear sights optional. **SAFETY** — Thumb operated safety, positive. **RECEIVER** — Drilled and tapped for metallic sights and telescope mount bases. Target type blocks furnished. **BARREL LENGTH** — 27¼" free floating. Overall Length of rifle 47". **LENGTH OF PULL** — 13½". Trigger adjustable 1 to 3½" lbs. 2 ounce Trigger available at $40. extra. **STOCK** — Selected American Walnut. Fore-end stop and sling swivel adjustable on base. **AVERAGE WEIGHT** — Without Sights: Heavy Barrel 11¼ lbs., Standard Barrel 9¾ lbs.



MODEL 513 T "MATCHMASTER"

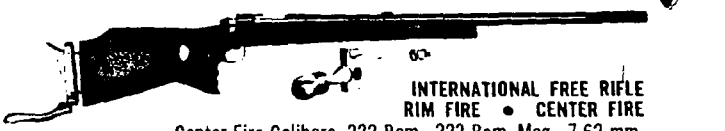
22 caliber target rifle. Stock specially proportioned for accurate sighting, steady holding. Heavy 27" barrel. Adjustable trigger pull, 6-shot box magazine. Redfield front and rear sights. 1¼" leather sling, adjustable front swivel.

SPECIFICATIONS: MODEL 513 T: ACTION — Bolt, Repeater. **CALIBER** — 22 Rim Fire. **CAPACITY** — 6-shot Clip magazine. 10-shot Clip available. Long Rifle only. **SIGHTS** — Redfield micrometer front & rear sights optional. **SAFETY** — Thumb Safety, positive. **RECEIVER** — Drilled & tapped for iron sights or 'scope mounts. **BARREL LENGTH** — 27". Over-all rifle length 45". **LENGTH OF PULL** — 13½". (Trigger to center of butt plate.) **STOCK** — American walnut. Sling Strap. **WEIGHT** — 8¾ lbs.

MODEL 521 T

Remington's lowest-priced target 22 — and it's convertible! Just remove target aperture from micrometer rear sight and you have a fine hunting rifle with peep sight. Patridge-type front sight. 6-shot box magazine, 1 shot in chamber gives 7-shot capacity. Complete with sling strap, adjustable swivel. Chambered for 22 long rifle only.

SPECIFICATIONS: MODEL 521 T — Same as Model 513 T except; **SIGHTS** — Micrometer rear, blade front. **RECEIVER** — Drilled & Tapped for Lyman 57 RS peep sight. **BARREL LENGTH** — 25". Over-all rifle length 42¾". **LENGTH OF PULL** — 13¼". (Trigger to center of butt plate). **WEIGHT** — 6½ lbs.



INTERNATIONAL FREE RIFLE
RIM FIRE • CENTER FIRE

28 and 410 Gauge Now Available in Remington Model 1100 Automatic Shotgun – Remington Model 870 "Wingmaster" Pump Action Shotgun

HERE, AT LAST, ARE THE TWO REMINGTON SHOTGUNS MOST REQUESTED BY SHOOTERS FROM ALL OVER THE WORLD. Built on its own receiver frame and copied after the famous 1100 automatic and 870 "Wingmaster" these light weight small gauge models with extra soft recoil are just the ticket for a light field gun, teaching a woman or youngster to shoot, or banging away on the skeet field. These new models will surely satisfy the keen desire of a true sportsman who enjoys the competitive challenge of shooting small gauge guns.

Model 1100 Automatic 28 and 410 Gauges
Priced from $174.95

The Model 1100 needs no introduction to sportsmen. For the past five years its dependability, light recoil, and attractive appearance has made it the top favorite with shooters.

Now, the world's most popular small gauges, the 28 and 410, are members of the 1100 line.

For the first time ever, Remington is offering a proven and dependable gas-operated automatic in all five gauges, 12, 16, 20, 28, and 410. The 410 gauge field grade will handle 3" shotgun shells only. With the addition of the 28 and 410 gauges, it is now possible to own five guns with the look, feel, and balance of one.

Model 1100 field grade 28 and 410 gauge guns will be supplied with mahogany stocks and fore-ends (for extra light weight), and plain or ventilated rib barrels.

Model 870 "Wingmaster" Pump Action 28 and 410 Gauges **Priced from $119.95**

1969 marks the 20th year the Model 870 pump has been in continuous production at the Remington Arms Co. While some changes have been made in the Model 870, over the years, our engineers have been unable to improve the basic design of this shotgun.

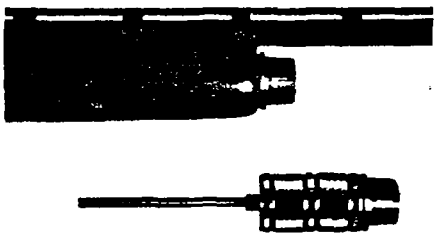
We're pretty proud that a "Wingmaster" is in the gun cabinets of well over a million sportsmen throughout the world. The addition of 28 and 410 gauges in the 870 pump line will enable current 12, 16, and 20 gauge "Wingmaster" owners to shoot a lighter gun built on its own receiver frame that has the same balance and pointing characteristics of their old favorite.

Designed to handle all 28 gauge and 2½" and 3" 410 gauge shotgun shells, the 870 field grade will be available with a plain or ventilated rib barrel and mahogany stock and fore-end for extra light weight. All the features of the old standard 870 "Wingmaster" in heavier gauges have gone into the production of the 28 and 410 gauges. They're fine counter parts of an already proven shotgun.

Models 870 and 1100 Matched Pair Skeet Guns, 28 and 410 Gauges
Priced at $395.00 and $495.00

A matched pair of either Model 1100 or 870 skeet guns in 28 and 410 gauges is now available for the skeet shooter who enjoys the challenge of shooting small gauge guns. Both guns will be supplied in a hard vinyl trunk-type gun case. These guns will be offered with identical matched pair numbers distinctively gilded in golden scroll on the receiver and sure to be collectors' items.

Models 1100 and 870 skeet guns have American walnut stocks and fore-ends and ventilated rib skeet bored barrels (Model 1100 410 ga. skeet guns have 2½" chambers for improved patterns on the skeet field). Due to the tremendous demand for these models and limited production, 28 & 410 ga. skeet guns will be available as matched pairs only in 1969.



A "Match-Weight Skeet Cap" designed to add between 10½ and 12 ounces to the weight of both the 1100 and 870 is supplied to give the 28 and 410 gauge models the exact feel and balance of the heavier gauges. The cap weighs approximately 10½ ounces, but filled with shot, will weigh approximately 12 ounces.

1 — MODEL 1100, 410 Ga., Full Choke, $199.95 2 — MODEL 1100, 28 Ga., Mod Choke, $199.95 3 — MODEL 870, 410 Ga., Full Choke, $144.95 4 — MODEL 870, 28 Ga., Mod Choke, $144.95 5, 6 — MODEL 1100 Matched Pair 410 Ga. and 28 Ga., Skeet, $495.00. (Price Includes Twin Gun Case and Match-Weight Skeet Caps.)

1969

1100 Automatic Shotgun—

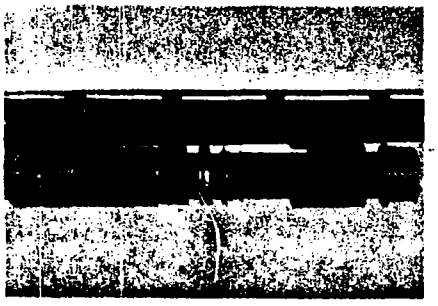
12, 16 and 20 Gauges—Priced from $164.95

THE MODEL 1100 IS THE MOST DEPENDABLE AUTOMATIC SHOTGUN MADE AND THE BIGGEST SELLER IN THE UNITED STATES.

What more can we say other than tell you what hundreds of thousands of 1100 owners already know. Remington automatic shotguns have been manufactured continually since 1905. And, when you've been making anything as long as we've been making automatic shotguns, you learn how to make them right. All the things we've learned down through the years, exist in the Model 1100. We're pretty proud of this model and the excellent reputation it has earned in six short years.

Here are some of the features that have made it the great gun it is:

DEPENDABILITY — In all kinds of weather with all kinds of loads, the 1100 will give you the performance you have come to expect from Remington.

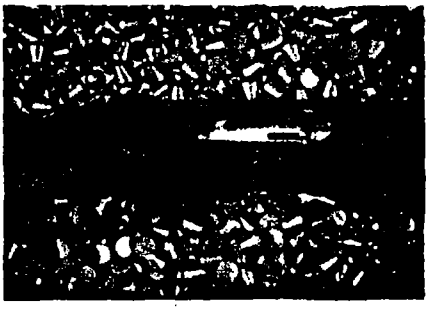


Its gas metering system is designed to operate with all types of shotgun shells making it possible for you to hunt a variety of game with the proper ammunition. This unique design enables the shooter to use all 2¾" standard velocity, "Express", and 2¾" magnum loads without any gun adjustments. For long range shots, the 1100 magnum duck gun is just the ticket. It was designed with the waterfowl hunter in mind and will function exclusively with 2¾" and 3" magnum shotgun shells.

At the 1968 World's Skeet Shooting Championships, there were more Model 1100s on the firing line than any other shotgun by a wide margin. Also, at last year's Grand American Trapshoot, more trophies were won in the Doubles Target Championship event with 1100 trap guns than any other shotgun. Proof enough competitive shooters put their confidence in the Model 1100. Barrels, within gauge and similar chamber lengths, are interchangeable in seconds, no factory fitting is required. There are 72 different chokes, barrel lengths, and gauge combinations to choose from, when selecting a 12, 16, or 20 gauge Model 1100.

RECOIL — There really isn't much. As a matter of fact, the correct word to use is "push." The 1100 gives up to 40% less "kick" than any other shotgun action. Your shoulder feels a "push" rather than a "punch." The secret is in Remington's system of gas metering which handles recoil slowly and evenly. The power is still there, but your shoulder doesn't feel it. This means more pleasureable shooting hours with less body fatigue, shot after shot.

If you're thinking about buying a new shotgun for your wife or youngster, it makes good sense to select a gun that's a pleasure to shoot. A gun like the 1100.



APPEARANCE — In order to have a best selling product, it must look the part. The 1100 does . . . and for many reasons. The solid steel receiver features decorative scroll work. Its deep rich blue (outside and in) is caused by our unique "vibra-honing" metal finish, an ultra-fine abrasive material resembling green gum drops. Parts operate smoother, glide easier. Fine line checkering in a fleur-de-lis design combined with American Walnut (Mahogany supplied in some light weight 20 gauge models) gives the 1100 the look of a far more expensive gun. The finish is tough and scratch-resistant. It was developed by Du Pont and called RK-W; it's the same finish used on bowling pins. All the wood grain shows through with a rich luster.

White line spacers and a tear drop pistol grip cap do not make the 1100 shoot any better but it gives you that pride of ownership feeling.

1 — MODEL 1100, 12 Ga., 30" Full Choke, $189.95 2 — MODEL 1100, Deer Gun, 12 Ga., $184.95 3 — MODEL 1100 SA, 12 Ga., Skeet, $194.95
4 — MODEL 1100 TB, 12 Ga., Trap, $229.95 5 — MODEL 1100 MAGNUM, Duck Gun, 12 Ga., 30" Full Choke, $204.95

1969

Remington Model 870 "Wingmaster" Pump Action Shotgun – 12, 16 and 20 Gauges

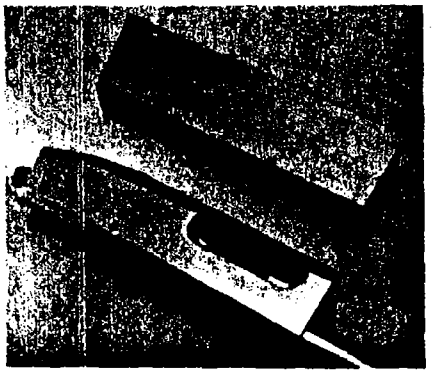
Priced from $109.95

IF YOU'RE IN THE MARKET FOR A NEW PUMP SHOTGUN, there are a few things you should keep in mind.

LOOK FOR a gun that has a dependable reputation and good lines. The Model 870 "Wingmaster" is such a gun.

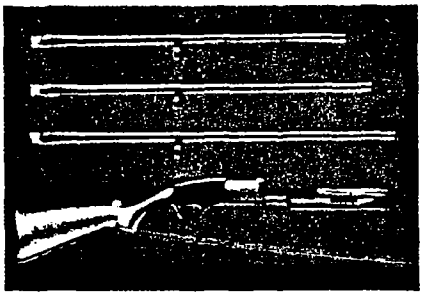
LOOK FOR one that's been in continuous production for a long length of time. After all, you know a product is good if it's been manufactured for 20 years and is still the most preferred product in its class.

Our engineers have been unable to improve its basic design. How can you make America's best selling pump shotgun better? We haven't found a way yet.



LOOK FOR a gun that has a receiver machined from a solid piece of steel. With magnum ammunition you need all the receiver strength you can get. Remington continues to use solid ordnance steel in the manufacture of 870 "Wingmaster" receivers and for that matter all other Remington shotgun receivers, to insure proper performance and utmost safety.

LOOK FOR double action bars (they're the two rails on each side of the fore-end). They permit you to pump the gun twice as smoothly, shot after shot, without the problem of twisting or binding. Double insurance that your gun will feed and eject properly under all shooting conditions.



LOOK FOR a gun that features interchangeable barrels without gunsmith or factory refitting. Chances are, you'll want to use your new gun on different types of game. These requirements are easily satisfied with the purchase of an extra barrel. If this is the case, you have in the Model 870 "Wingmaster" the choice of 17 distinctive barrel lengths and choke combinations in the 12 gauge alone.

LOOK FOR A GUN THAT WILL SHOOT ALL 2¾", standard velocity, "Express", and 2¾" magnum shotgun shells. The owner of an 870, 12 gauge magnum may shoot all 12 gauge shotgun shells without gun modifications — a total of 21 distinct shotgun shell loads with the largest selection of shot sizes. Dollar for dollar, the 870 "Wingmaster" is the most versatile shotgun you can buy.

All 870 "Wingmasters" in field, trap, skeet, deer, and magnum models feature a unique metal finish. We call it "vibra-honing". The result is almost a mirror-like finish on all metal surfaces (both inside and out). Inside, the smoother the action is, the easier it works. Outside, the smoother a base you start with, the deeper and richer the blueing.

LOOK FOR a gun that has a special wood finish. When Remington ships an 870 from its factory, we expect it to be subject to years of rugged use. Not only must the steel be of the highest quality but also the wood. That's why we protect the stock and fore-end with an exclusive Du Pont wood finish called RK-W. This clear finish, similar to that used on bowling pins, is tough, hard and scratch-resistant. It gives lasting protection against hard usage and bad weather.

LOOK FOR the Remington "Wingmaster" at your local dealer.

1 — MODEL 870, 12 Ga., 30" Full Choke, $134.95 2 — MODEL 870 TC, Monte Carlo, Trap, $259.95 3 — MODEL 870, 12 Ga., "Brushmaster", $129.95
4 — MODEL 870, 12 Ga., 26" Imp. Cyl. Choke, $134.95 5 — MODEL 870 MAGNUM, Duck Gun, 12 Ga., 30" Full Choke, $154.95

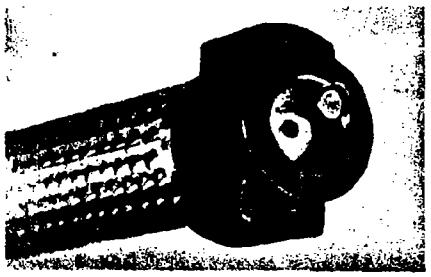
700 Bolt Action Center Fire Rifle Now Available in 15 Versatile Calibers — Priced from $134.95

Again, last year's sales records proved the famous Remington Model 700 bolt action center fire rifle continued to be America's best seller. One of the outstanding reasons for its success is the availability of a wide caliber selection, more than any other American manufacturer.

The Model 700 offers a caliber for every type of hunting from varmints to elephants — A TOTAL OF 15 DIFFERENT CARTRIDGES IN ALL. The 700 has seven magnum calibers to choose from (one more than our major competitor) and five varmint cartridges (two more than our biggest competitor). It's the ideal gun for a shooter looking for an "all-around" rifle.



STRENGTH — Tests have proven the Model 700 action is the strongest bolt action center fire ever made. Just the ticket for handloaders who want strength where strength belongs. The secret is in the three rings of solid steel that "surround the cartridge head."

There are no extractor cutaways to weaken this critical area.

The Model 700 has the appearance of a far more expensive rifle. New in 1969 on the ADL grades is a jeweled bolt with a shrouded bolt plug, a restyled stock that improves balance and pointing, a new butt plate, a unique low profile safety that brush will not accidentally move on or off, and a new checkering pattern.

The 700 BDL version has also been dressed up. Along with the ADL features, the BDL models have a sharp white spacer forward of the new butt plate, a new easier to adjust sling strap, and the addition of the hard hitting 350 Rem. Magnum and 6.5 Rem. Magnum calibers.

Along with these new features the Model 700 still offers the shooter the same list of extras that have made it the best seller it is. ACCURACY — a product of Remington's famous precision rifling and short, crisp trigger pull. CRAFTSMANSHIP — the traditional beauty of fine checkering and beautiful wood finish that is tough, hard, and scratch-resistant (we call it RK-W). ADDED FEATURES — Monte Carlo stock and cheek piece, receiver drilled and tapped for 'scope mounts, checkered bolt knob, detachable sights for the shooters using a 'scope. BDL models feature a hinged floor plate, hooded front sight, sling strap and swivels, black grip cap and fore-end tip with white spacers.

Model 700 BDL "VARMINT SPECIAL"

The tremendous acceptance of the 700 and constant shooter demand have brought about the availability of a special heavy barreled varmint rifle, the 700 BDL "Varmint Special." Designed for minimum-target, maximum-range precision shooting, it is chambered for five of the most popular varmint cartridges going — 222 Rem., 223 Rem., 22-250 Rem., 6mm Rem., and 243 Win. A heavy 24" barrel places this rifle in a new accuracy class. It's equipped with 'scope bases, hinged floor plate, quick release swivels and new easier to adjust sling strap, Monte Carlo stock and cheek plate, RK-W wood finish and new custom checkering.

Model 700 "CUSTOM" RIFLE

The 700 "Custom" is the finest bolt action rifle ever manufactured by the Remington Arms Company. Available on special order only, the 700 "Custom" offers the sportsman a choice of specifications. It is available in a variety of calibers and features a select American Walnut stock, hand checkering, and a highly polished barrel (with or without sights) and receiver for the finest blueing possible. It is truly the ultimate gun for the ultimate sportsman.

'88 Bolt Action Rifle—Priced from $89.95

Remington Model 660 Bolt Action Carbine—Priced from $119.95

Model 788

FEW NEW RIFLES HAVE EARNED, IN SUCH A SHORT PERIOD OF TIME, THE REPUTATION OUR MODEL 788 HAS ACQUIRED FOR ACCURACY AND DEPENDABILITY.

In the two years it has been manufactured, hunters and target shooters alike have found it to be the best all-around, economically priced bolt action rifle on the market.

This year the Model 788 IS AVAILABLE IN TWO NEW CALIBERS (6mm Rem. and 308) and with a LEFT HAND BOLT for southpaw shooters.

In order to chamber a rifle for a cartridge like the potent 22-250 Rem., you've got to have an action that will stand an unbelievable amount of pressure. Not many $89.95 bolt actions will. The nine extra-heavy locking lugs on the Model 788 bolt engage grooves in the solid steel receiver for a strong, secure lock-up.

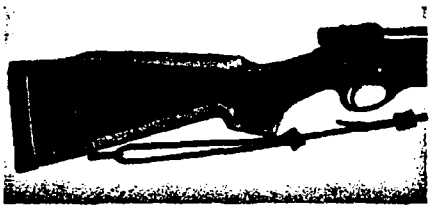
The secret of the Model 788's exceptional accuracy lies in its fast lock time (the interval between the time you pull the trigger and the rifle actually fires). The lock time is so fast the bullet has left the barrel of the Model 788 before a comparative bullet has left the cartridge case in competitive models.

Model 660

THE MODEL 660 IS THE MOST POWERFUL BOLT ACTION CARBINE ON THE MARKET TODAY! NO OTHER GUN IN ITS CLASS IS CHAMBERED FOR THE HARD HITTING 350 REM. MAGNUM AND 6.5 REM. MAGNUM.

The cartridge head is supported by three rings of steel to insure super strength where strength belongs.

The 660 is available in other popular calibers too: 243, 308, 222 Rem., and 6mm Rem. The Model 660 bolt action carbine is versatile enough to hunt all big game animals of North America. Its convenient carbine length 20" barrel means easy carrying in the field without loss of accuracy or velocity. A special barrel bracket adds support to the 'scope mount making it more rigid. The 'scope can't be easily knocked out of adjustment when the going gets rough. New "vibra-honing" metal finish, inside and out, are silky-smooth for fast, friction-free operation. The receiver is drilled and tapped. It's a simple matter to install a 'scope. Adjustable sights are the same dependable type that are on the Remington Model 700. A good-looking black fore-end tip, fine-line checkering, plus a black grip cap and butt plate (recoil pad on magnum models) help give this carbine the looks of a far more expensive gun. Magnum models feature a lamination of walnut and beech for extra strength, stability, and beauty. Sling straps and swivels are standard equipment on the 660 Magnum.



The Model 660's "S" shape bolt handle hugs the stock and won't interfere with brush or clothing. This bolt knob is serrated on the bottom for a good secure grip. RK-W wood finish, developed by Du Pont, protects the stock and brings out the lustrous beauty of the wood grain.

The Model 660 has many features of higher priced rifles. Standard equipment includes a Monte Carlo stock for a better cheek-to-stock fit for quicker, surer sight alignment with either a 'scope or open sights. The trigger is extra wide and serrated so your finger won't slip even when wearing a glove; it's extra crisp and clean, no creep or spongy action.

Economically priced in all calibers, the Model 660 is the most versatile carbine your money can buy.

Remington Model 742 "Woodsmaster" Automatic

Remington Model 760 "Gamemaster" Pump Action Rifles

Priced from $139.95

63 YEARS OF AUTOMATIC RIFLE EXPERIENCE HAS GONE INTO THE MANUFACTURE OF REMINGTON'S LATEST MODEL —

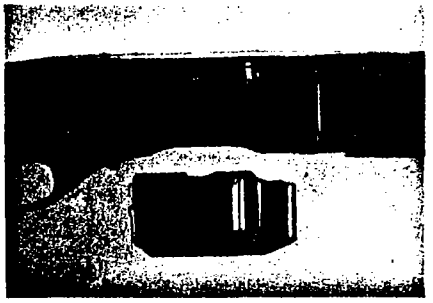
Model 742 "Woodsmaster"

Remington introduced America's first Automatic rifle back in 1906 and we've been making them ever since.

The Model 742 is the most dependable automatic on the market. It's proven itself time and time again, under all weather conditions. Prior to its introduction, the 742 withstood performance tests that included freezing the action, subjecting the action to dust and dirt and a deluge of water. It passed these tests with flying colors. Proof enough it will stand up under all hunting conditions.

It's extra strong too — strong enough to hold the pressures of the 30-06 Springfield cartridge. The artillery-type bolt has multiple lugs that lock bolt and barrel together as tight as a bank vault. When the bolt is closed, three rings of steel (bolt, barrel, and receiver) enclose the cartridge head.

Designed for trouble-free functioning, the fast gas-operated action soaks up recoil with no loss of power. You're back on target immediately for those extra shots (if you need them).. If you hunt in heavy brush, take a look at the 742 Carbine. Its 18½" barrel makes it a handy gun to have when the going is rough.



Extra clips are available for fast loading in the field. Sling strap and swivels are optional.

Both the Model 742 rifle and carbine feature a unique metal finish. We call it "vibra-honing." The result is a mirror-like finish on all metal surfaces (both inside and out). Parts operate smoother, glide easier. The blueing resembles that of far more expensive models. It has a rich lustrous finish.

Du Pont developed RK-W wood finish protects the stock and fore-end. This clear finish, similar to that used on bowling pins, is tough, hard and scratch-resistant. It gives lasting protection against hard usage and bad weather.

BDL grade "Custom Deluxe" models feature beautiful basket-weave checkering, Monte Carlo stock with full cheek piece either for right or left hand shooters (safety reversed for left hand shooters at no extra cost) and an attractive black fore-end tip and grip cap. All Model 742's are drilled and tapped for 'scope mounts.

Model 760 "Gamemaster"

The Model 760 pump action center fire rifle is the fastest hand-operated big game rifle made. It's faster than the fastest lever action. Double action bars guarantee dependability and prevent twisting and binding. All this means velvet-smooth pumping, shot after shot.

The Model 760 is the only pump action big game rifle that's chambered for the powerful 30-06 Springfield cartridge. The secret's in its solid steel receiver and extra-strong artillery type bolt.

All Model 760's are drilled and tapped for 'scope mounts. RK-W Du Pont developed wood finish is standard on all models as is a streamlined beaver-tail fore-end with black tip and white line spacers. Skip line checkering on standard grades gives the rifle a distinctive look.

New "vibra-honing" metal finish, inside and out, makes metal surfaces silky-smooth; parts work friction-free. BDL Deluxe grades feature basket weave checkering, Monte Carlo stock with cheek piece for right or left hand shooters (safety reversed on guns with left hand cheek piece at no extra cost).

The Model 760 "Gamemaster" carbine with an 18½" barrel is just the ticket when you're hunting in heavy brush. Dollar for dollar, you can't buy a better pump action big game rifle.

Action 22 Cal. Rifles

Models 580, 581, 582 — Priced from $34.95

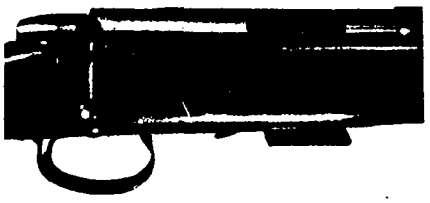
Model 514 — Priced at $26.95

581 Clip Repeater and
582 Tubular Repeater

They have the look, feel and balance of big game center fire rifles — plus the strongest, most powerful bolt ever designed into a 22 caliber hunting rifle.

A NEW LEFT HAND MODEL 581 WITH THE BOLT ON THE LEFT SIDE IS AVAILABLE THIS YEAR FOR SOUTHPAW SHOOTERS. IT IS THE ONLY LEFT HAND BOLT ACTION RIM FIRE RIFLE EVER MANUFACTURED IN AMERICA, ANOTHER FIRST FROM REMINGTON.

The 580 series feature an artillery type bolt with rear lock-up. Six extra-heavy rotary locking lugs at the back engage grooves in the solid steel receiver. Together they lock up tight, like a bank vault. Try it — work the action a few times. It's silky-smooth, solid and secure, made of ordnance steel.



Here is strength that has never been equaled in any 22 bolt action hunting rifle. Actually, there's more built-in strength here than you'll ever need, but it's nice to know your rifle is designed with this plus factor.

Remington looked at all the other desirable features that make up a fine big game rifle . . . and we put them into this new rim fire line. Here they are:

HUNTING-TYPE TRIGGER is wide and the trigger pull is crisp, sharp, clean — no drag. Big, sturdy trigger guard is roomy enough to accommodate a gloved finger. Everything about these new rifles is man-size. There's no corner cutting anywhere.

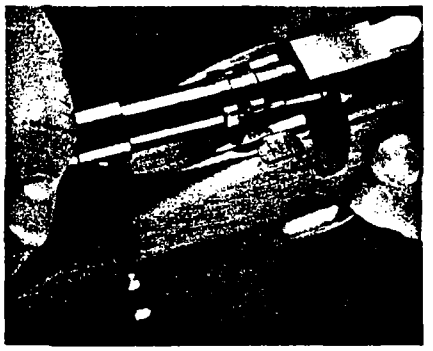
FULL SIZE Monte Carlo stock with pistol grip looks and feels like a center fire *rifle. It assures a snug, comfortable cheek*-to-stock fit that means more hits — with or without a 'scope. And there's no skimping on the fore-end, it's long, tapered, man-size to prevent canting and provides a good secure grip.

NON-SLIP THUMB SAFETY is conveniently located at the right rear of the receiver. Positive safety — forward for fire; rearward for safe.

TWO EXTRACTORS are standard on this series of 22 rifles. Remington feels that two are better than one (so you get 2). Another extra at no extra charge.

SIGHTS are rugged, similar to those on big game rifles. Bead front sight and U notch adjustable rear with lock screw. You'll hit what you aim at with these sights.

ROUND STEEL RECEIVER means bedding into the stock can be more precise, which in turn contributes to fine accuracy. The receiver is also grooved for tip-off 'scope mounts. Actually, it's the strongest, most rigid receiver of any 22 bolt action hunting rifle because there are no slots or notches to weaken it; bolt handle isn't used as a lock-up lug. Here again, Remington designers made it like a center fire rifle. Costs the shooter no more; it's an extra bonus he gets because of good design.



BOLT COVER keeps dirt and bad weather out. Assures smooth operation within. Adds to streamlining of the rifle, too. Here's an accuracy combination that's hard to beat . . . in all three models: 580 single shot, 581 clip repeater and 582 tubular repeater.

Model 514

Here is an excellent 22 caliber rifle . . . at a popular price. It's a single-shot bolt action model with a self-cocking bolt, rotary thumb safety, and takes all 22 caliber cartridges — short, long or long rifle; standard velocity or high speed. For the young shooter, it's also available as Model 514 BR, with shortened stock.

1 — MODEL 514 BR, Single Shot, Boy's Rifle, $26.95 2 — MODEL 514, Single Shot, $26.95 3 — MODEL 582, Tubular Repeater, $49.95
4 — MODEL 581, Clip Repeater, $44.95 5 — MODEL 580, Single Shot, $34.95 6 — MODEL 581, LEFT HAND, Clip Repeater, $49.95

1964

Models 552, 550 Automatic and 572 Pump Action 22 Cal. Rim Fire Rifles

Nylon 66 Automatic
Priced from $49.95

Remington's Nylon 66 is setting an amazing record in sales and customer acclaim. Here's why!

Structural-nylon is many ways better than conventional material for the gun's stock and fore-end. Because this super-strong material doesn't warp, the same barrel bedding principle used on the world's most expensive target rifles is yours. The result is an automatic that nails targets, tin cans and small game with tremendous accuracy. This is the same model rifle used to establish an accuracy record on hand-thrown 2½" wood blocks. Only six misses out of 100,000 blocks thrown . . . and without a malfunction.

Receiver parts, stock and barrel are interlocked with steel and structural nylon that creates the most trouble-free automatic action ever known. There's no need for lubrication because friction-free parts glide on "greaseless bearings" of nylon. Perfect checkering makes for fast, sure loading, and the convenient top-of-grip thumb safety slips off "safe" in a wink for running game shots. The handsome Nylon 66 has white diamond inlays and white line spacers at grip cap, butt plate and fore-end tip.

The Nylon 66 is also made in an Apache Black deluxe model. The stock is Du Pont Zytel® black nylon and both the barrel and the receiver cover are chrome plated. Inside, it's the same reliable, trouble-free rifle as the standard mohawk brown model.

The Nylon 66 is the most rugged automatic 22 rim fire rifle made. It will work when conditions get tough.

Model 552 "Speedmaster" Automatic
Priced from $64.95

Here's the Remington 22 caliber automatic that's fast shooting, accurate, nicely balanced and chambered for Short, Long and Long Rifle cartridges. The Model 552 is another member of Remington's "family of guns;" looks, handles and shoots like its big brother, the Model 742 big game rifle. The "Speedmaster" has every feature a shooter wants, such as: twenty shots as fast as you can squeeze the trigger, cross bolt safety, receiver grooved for "tip-off" 'scope mounts. Also available is the short barrel (21") carbine model, the Gallery Special and a deluxe model with custom checkering, RK-W wood finish and big game type sights. Pick a 552 off the rack at your dealer's — throw it to your shoulder. We think you'll agree, it's the rifle that "feels right" . . . because it's made right.

Model 550 Automatic
Priced at $59.95

Rapid fire, extra ruggedness and dependability are points shooters like about this Remington automatic. It's the famous 22 caliber rifle that shoots Short, Long and Long Rifle cartridges with no adjustment. Mix them up, drop them in the tubular magazine and fire away. Model 550 takes 'em as they come. Other fine features are: Large capacity, up to 20 Shorts, fine accuracy, thumb safety, receiver grooved for "tip-off" 'scope mounts. The Model 550 is well-built, well-designed — an exceptionally fine all-around rifle for the hunter or plinker . . . and good for week-end family fun, too.

Model 572 "Fieldmaster" Pump Action
Priced from $64.95

For the shooter who likes a pump action 22 caliber rifle, the "Fieldmaster" Model 572 is best . . . action is slick and smooth. Exclusive cartridge feeding design prevents jamming, permits easy single loading. By simply removing the inner magazine tube, parent or instructor can convert the "Fieldmaster" into a single shot rifle. Receiver has dovetail grooves for "tip-off" 'scope mounts. Capacity is large; tubular magazine holds 20 Short, 17 Long or 15 Long Rifle cartridges. It has a cross bolt safety conveniently located at the rear of the trigger guard where it can be snapped on or off with the index finger. The Model 572 is beautifully streamlined and balanced — rugged and dependable like Remington big game rifles and shotguns. BDL deluxe models feature extra tough RK-W wood finish, custom checkering, grip cap, and big game type sights.

1 — MODEL 552 BDL DELUXE, Automatic, $74.95 2 — MODEL 552 A, Automatic, $64.95 3 — MODEL 550 A, Automatic, $59.95
4 — MODEL 572 BDL DELUXE, "Fieldmaster", Pump Action, $74.95 5 — MODEL 572 A, "Fieldmaster", Pump Action, $64.95

1969

NEW Remington Model 540X 22 Cal.

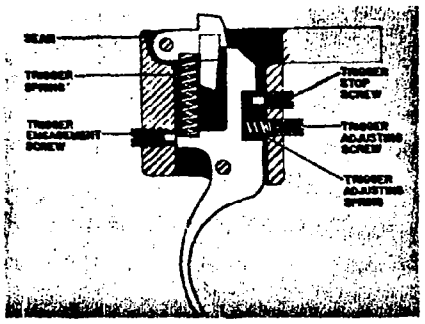
40XB "Rangemaster" Target Rifle

International Free Rifle

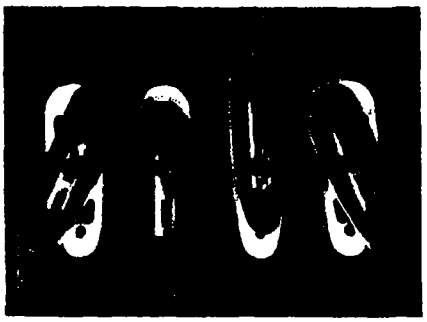
Rim Fire and Center Fire

The New Model 540X Match Target Rifle Priced from $89.95

The Model 540X has all the design features and special attachments to make it the most accurate target rifle in its class. Designed for the intermediate and junior shooter, the Model 540X is super accurate, well balanced, and loaded with extras, the extras needed to win.



To continually punch holes in the X ring with any rifle, you need a gun with a good crisp trigger pull, one that will fire when you want it to. The 540X has a fully adjustable trigger that does exactly that. The secret's in its fast lock time. Lock time is the interval between the time you pull the trigger and the rifle actually fires. The 540X trigger is the fastest of any target rifle now manufactured.



A unique feature of this rifle is its four-way adjustable butt plate. The stock can be adjusted with the same wrench for length of pull, vertical, pitch or cant (left or right).

A butt plate of this type eliminates the need for costly stock alterations and is designed to fit the needs of all rifle shooters regardless of their physical characteristics.

The stock was designed with the target shooter in mind. Thumb cuts give you that secure grip for top scores. A new stock design and special rear sight bracket gives common sight alignment for shooting with either a 'scope or iron sights.

A front swivel block, Redfield #63 front and Redfield #75 rear sights are optional. The receiver is drilled and tapped for popular 'scope mounts.

Model 40XB "Rangemaster" (Rim Fire Model) Priced from $169.95

Exclusive loading platform provides straight line feeding; no shaved bullets. Specially selected heavy ordnance steel barrel with new Remington rifling process assures utmost accuracy. High comb gives same sighting plane for iron and telescope sights. Comb is grooved for bolt removal. Mershon White Line non-slip rubber butt plate, adjustable sling swivel and hand-stop are standard equipment. Other features are: extra strong bolt with double extractors, crisp trigger with positive adjustments for weight of pull, wide trigger for more uniform pull and comfort, thumb operated safety. The receiver is drilled and tapped for all standard sight mounts, telescope and metallic Redfield Olympic front and rear sights optional. A new long rail for the adjustable fore-end stop and palm rest makes shooting good scores easier.

Model 40XB "Rangemaster" (Center Fire Model) Priced from $224.95

Now available in repeating models for use in National Match Courses, the 40XB is designed with clip slots for the conventional five shot clip. It loads from the top of the receiver and the magazine has a hinged floor plate. Repeating models are provided *only* in calibers equal to or shorter than the loaded length of the 308 cartridge.

The 40XB center fire repeating rifle is ideal for the rapid fire events, especially in the 7.62mm NATO (308) caliber, because of its shorter bolt throw and extreme accuracy, plus its optimum weight for "over the course" competition.

As a single shot model, the Remington Model 40XB center fire is offered in a variety of center fire calibers as listed in specifications. The action is hand bedded and the barrel is free floating. The 40XB meets the National Bench Rest Shooters Association rules for the Heavy Varmint Class with most target telescopes (max. weight 13½ lbs.). Stainless steel barrels are supplied as standard on 7mm Rem. Magnum, 30-338, and other magnum calibers. Stainless steel is also recommended for 22-250 and 6mm Rem. (at extra charge). Stainless 40XB barrels are not blued.

International Free Rifle (Rim Fire and Center Fire) Priced from $361.05

The International Free Rifle features the 40XB action, precision heavy barrel, a Remington designed adjustable butt plate and hook, adjustable palm rest, adjustable front sling swivel and 2-ounce trigger. Left-hand stock supplied at extra charge.

1 — MODEL 540X, 22 Cal. Match Target Rifle, $109.95 (Hand-Stop Extra). 2 — MODEL 40XB, 22 Cal. Rim Fire Target Rifle, $204.95
3 — MODEL 40XB, Center Fire, 7.62mm NATO Target Rifle, $224.95 (Target Sights Extra). 4 — MODEL 40XB Bench Rest, Center Fire, 222 Rem. Cal., Stainless Steel Barrel, Target Rifle, $259.95. (Target 'scope Extra). 5 — INTERNATIONAL FREE RIFLE. Center Fire, 222 Rem., $361.05

The bronze sculpture, opposite, created for the 100th anniversary of the Remington Arms Company, Inc. in 1916, depicts Eliphalet Remington II at the anvil on which he hammered out the first of his rifles. That was in 1816. Remington was 23 years of age, and while the somewhat primitive forge no longer exists, the spirit of the man continues to guide the Remington gunsmiths of the present. Remington built a better rifle more than 150 years ago and the world beat a path to his forge. Now, a century and a half later, the oldest gunmakers in America present the newest guns.

Remington Model 1100 Automatic Shotgun–12, 16, 20, 28 & 410 Gauges– Priced from $169.95

America's Most Popular Automatic Shotgun
Now Available in a NEW 20 ga. Lightweight

THE MODEL 1100 IS THE MOST DEPENDABLE AUTOMATIC SHOTGUN MADE AND THE BIGGEST SELLER IN THE UNITED STATES. It's the only automatic available in 5 gauges. What more can we say other than tell you what hundreds of thousands of 1100 owners already know. Remington automatic shotguns have been manufactured continually since 1905. And, when you've been making anything as long as we've been making automatic shotguns, you learn how to make them right. All the things we've learned down through the years, exist in the Model 1100. We're pretty proud of this model and the excellent reputation it has earned in seven short years.

A NEW MODEL 1100, 20 GA. LIGHTWEIGHT IS AVAILABLE THIS YEAR. Designed for the hunter who wants a fast pointing, easy handling 20 ga. automatic, this versatile model will handle all 2¾" standard and magnum shot shells. A new specially designed lightweight steel receiver and mahogany stock and fore-end promises to make this new 20 ga. a favorite upland gun for years to come.

Here are some of the features that make the model 1100 America's most popular automatic.

DEPENDABILITY — In all kinds of weather with all kinds of loads, the 1100 will give you the performance you have come to expect from Remington. Its gas metering system is designed to operate with all types of shotgun shells making it possible for you to hunt a variety of game with the proper ammunition. This unique design enables the shooter to use all 2¾" standard velocity, "Express", and 2¾" magnum loads without any gun adjustments. Barrels, within gauge and similar chamber lengths, are interchangeable in seconds, no factory fitting is required. This beefed up, self-cleaning gas operated shotgun has a greatly extended shooting life. It'll still be shooting long after less rugged automatics have worn out.

RECOIL — There really isn't much. As a matter of fact, the correct word to use is "push." The 1100 gives less "kick" than any other shotgun action. Your shoulder feels a "push" rather than a "punch."

APPEARANCE — In order to have a best selling product, it must look the part. The 1100 does . . . and for many reasons. The solid steel receiver features decorative scroll work. Its deep rich blue (outside and in) is caused by our unique "vibra-honing" metal finish. Du Pont developed RK-W wood finish is tough and scratch-resistant. White line spacers and a tear drop pistol grip cap do not make the 1100 shoot any better but it gives you that pride of ownership feeling.

1 — MODEL 1100, 12 Ga., Magnum Duck Gun, 30" Full Choke, $209.95 2 — MODEL 1100, 12 Ga., 28" Mod. Choke, $194.95
3 — NEW MODEL 1100, 20 Ga., (Lightweight), 26" Imp. Cyl. Choke, $204.95 4 — MODEL 1100, 410 Ga., 25" Mod. Choke, $204.95

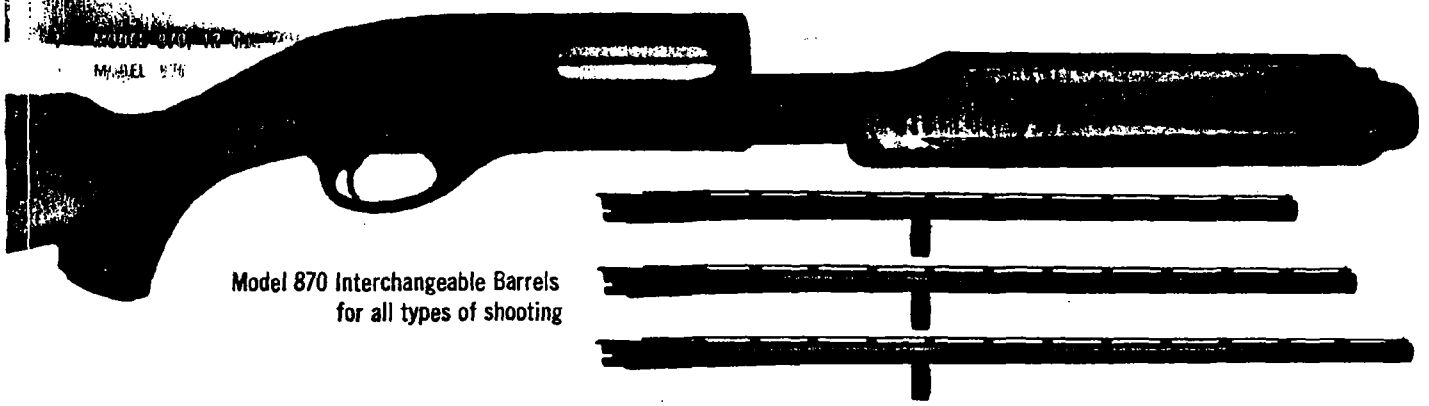
Remington Model 870 "Wingmaster" Pump Action Shotgun–12, 16, 20, 28 & 410 Gauges— Priced from $119.95



Model 870 Interchangeable Barrels for all types of shooting

IF YOU'RE IN THE MARKET FOR A NEW PUMP SHOTGUN, there are a few things you should keep in mind.

LOOK FOR a gun that has a dependable reputation and good lines. The Model 870 "Wingmaster" is such a gun.

LOOK FOR one that's been in continuous production for a long length of time. After all, you know a product is good if it's been manufactured for 20 years and is still the most preferred product in its class.

Our engineers have been unable to improve its basic design. How can you make America's best selling pump shotgun better? We haven't found a way yet.

LOOK FOR a gun that has a receiver machined from a solid piece of steel. With magnum ammunition you need all the receiver strength you can get. Remington continues to use solid ordnance steel in the manufacture of 870 "Wingmaster" receivers and for that matter all other Remington shotgun receivers, to insure proper performance and utmost safety.

LOOK FOR double action bars (they're the two rails on each side of the fore-end). They permit you to pump the gun twice as smoothly, shot after shot, without the problem of twisting or binding. Double insurance that your gun will feed and eject properly under all shooting conditions.

LOOK FOR a gun that features interchangeable barrels without gunsmith or factory refitting. Chances are, you'll want to use your new gun on different types of game. These requirements are easily satisfied with the purchase of an extra barrel. If this is the case, you have in the Model 870 "Wingmaster" the choice of 17 distinctive barrel lengths and choke combinations in the 12 gauge alone.

LOOK FOR A GUN THAT WILL SHOOT ALL 2¾", standard velocity, "Express", and 2¾" magnum shotgun shells. The owner of an 870, 12 gauge magnum may shoot all 12 gauge shotgun shells without gun modifications — a total of 21 distinct shotgun shell loads with the largest selection of shot sizes. Dollar for dollar, the 870 "Wingmaster" is the most versatile shotgun you can buy.

LOOK FOR a gun that has modern style (this year's 870's have fancy white line spacers at the butt plate and grip cap). All 870 "Wingmasters" in field, trap, skeet, deer, and magnum models feature a unique metal finish. We call it "vibra-honing". The result is almost a mirror-like finish on all metal surfaces (both inside and out). Inside, the smoother the action is, the easier it works. Outside, the smoother a base you start with, the deeper and richer the blueing.

LOOK FOR a gun that has a special wood finish. When Remington ships an 870 from its factory, we expect it to be subject to years of rugged use. Not only must the steel be of the highest quality but also the wood. That's why we protect the stock and fore-end with an exclusive Du Pont wood finish called RK-W. This clear finish, similar to that used on bowling pins, is tough, hard and scratch-resistant. It gives lasting protection against hard usage and bad weather.

LOOK FOR the Remington "Wingmaster" at your local dealer.

1 — MODEL 870, 12 Ga., 28" Mod. Choke, $144.95 2 — MODEL 870 MAGNUM, Duck Gun, 12 Ga., 30" Full Choke, $164.95
3 — MODEL 870, 20 Ga., 28" Mod. Choke, $144.95 4 — MODEL 870, 28 Ga., 25" Full Choke, $154.95

Remington TRAP and SKEET Model 1100 Automatic and Model 870 "Wingmaster" Pump Action Shotguns — Priced from $149.95

Proven The Best by World Record Performance

TRAP — This game's changed considerably since Remington introduced America's first "reasonably" priced double barrel trap gun 'way back in 1874. So have our trap guns. America's favorite trap model isn't a rabbit-eared double anymore, it's a slick, solid steel receiver pump gun. Remington calls it the Model 870. Our customers call it "Old Reliable."

It's not uncommon for a trapshooter to shoot four or five thousand shells a year through one gun. Clay target busters are quick to recognize that the 870 is built to withstand this type of use. Double action bars prevent twisting and binding and a solid steel receiver insures utmost safety and dependability. The 870 is available in a variety of barrel lengths, both full and modified chokes. The TB grade (our economy model) offers all of the features of our more expensive TC grade with the exception of fancy wood and hand checkering. Monte Carlo stocks are optional on both models.

The Model 1100 TB trap grade is our gas operated automatic you've heard so much about. In a little over seven years this gun has become the predominate favorite among trapshooters who prefer an automatic. Why do some prefer our automatic over other types of actions? RECOIL is one big reason. Actually the Model 1100 has less kick than any other shotgun action and, when you're shooting at 300 or so targets a day, body fatigue could mean the difference between winning or losing. DEPENDABILITY is another big reason why so many shooters use and prefer the Model 1100. It works. And not only with factory loads either, many reloaders have won major championships with the Model 1100 shooting their "home brewed" loads. Full and modified chokes are available in a variety of barrel lengths. Monte Carlo stocks are optional.

SKEET — It would be hard trying to talk about skeet guns without getting the Remington Model 1100 into the sentence somewhere. Actually, skeet sort of grew up with Remington. We set up one of the country's first skeet fields (Lordship, Conn.) and conducted the first national tournament of any importance (The Great Eastern). So, it's safe to assume Remington is just a little ahead of the field when it comes to knowing how to build a good skeet gun. We were quite a bit ahead of the field at the 1969 World's Skeet Championships. Four out of the five perfect scores in the All-Bore event were shot with Model 1100's (the fifth was a discontinued Remington model).

Our Model 1100 SA is the big skeet favorite. It doesn't have the fancy wood our Deluxe SB grade has, but it's not as expensive either and shoots just as well. This year it's available in 410, 28, 20, and 12 gauges, all with special "Skeet" bored barrels, solid steel receivers and built-in dependability. The Model 870 "Wingmaster" SA and SC skeet is just the ticket if you enjoy the heft of a pump action. The SA version is chambered for 410, 28, 20 and 12 gauge shotshells.

1 — MODEL 1100 SA, 12 Ga., Skeet, $199.95 2 — MODEL 1100 SA, 410 Ga., Skeet, $209.95 3 — MODEL 1100 TB, 12 Ga., Trap, $234.95
4 — MODEL 870 TB, 12 Ga., Trap, $184.95 5 — MODEL 870 TC, 12 Ga., Trap, $259.95

Remington Model 700 Bolt Action Center Fire Rifle...Available in 16 Calibers Including the NEW 25-06 Remington– Priced from $139.95

...an, last year's sales records proved ... famous Remington Model 700 bolt ...on center fire rifle continued to be ...merica's best seller. One of the outstand...ng reasons for its success is the avail...bility of a wide caliber selection, more ...an any other American manufacturer.

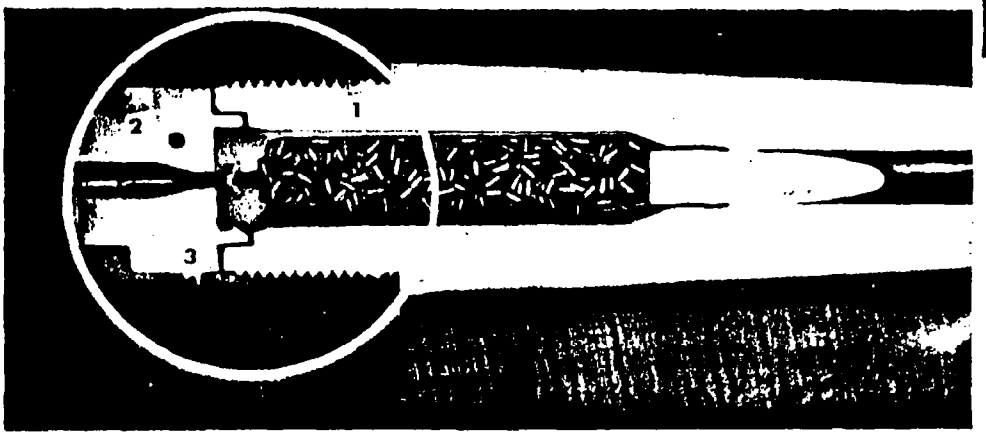
ADDED, THIS YEAR, TO THE LIST OF CALIBER FAVORITES IS THE POPULAR 25-06. NOW VARMINT AND SMALL GAME HUNTERS ALIKE CAN BUY COMMERCIALLY THE CARTRIDGE AND GUN COMBINATION RELOADERS HAVE BEEN PRAISING FOR YEARS. The Model 700 offers a caliber for every type of hunting from varmints to elephants — A TOTAL OF 16 DIFFERENT CARTRIDGES IN ALL. The 700 has seven magnum calibers to choose from (one more than our major competitor) and six varmint cartridges (three more than our largest competitor). It's the ideal gun for the shooter looking for an "all-around" rifle.

STRENGTH — Tests have proven the Model 700 action is the strongest bolt action center fire ever made. Just the jacket for handloaders who want strength where strength belongs. The secret is in the three rings of solid steel that "surround the cartridge head."

There are no extractor cutaways to weaken this critical area.

The Model 700 has the appearance of a far more expensive rifle. The ADL grade has a jeweled bolt with a shrouded bolt plug, a restyled stock that improves balance and pointing and a unique low profile safety that brush will not accidentally move on or off. BDL models have a sharp cut spacer forward of the butt plate for easier to adjust sling strap.

Along with these features the Model 700 ADL offers the shooter the same list of extras that have made it the best seller it is. ACCURACY — a product of Remington's famous precision rifling and short, crisp trigger pull. CRAFTSMANSHIP — the traditional beauty of fine checkering and beautiful wood finish that is tough, hard, and scratch-resistant (we call it RK-W). ADDED FEATURES — Monte Carlo stock and cheek piece, receiver drilled and tapped for scope mounts, checkered bolt knob, detachable sights for the shooters using a scope. BDL models feature a hinged floor plate, hooded front sight, sling strap and swivels, black grip cap and fore-end tip with white spacers.



Three reasons why the Model 700 is the Strongest Bolt Action ever made

Model 700 BDL "VARMINT SPECIAL"

The tremendous acceptance of the 700 and constant shooter demand have brought about the availability of a special heavy barreled varmint rifle, the 700 BDL "Varmint Special." Designed for minimum-target, maximum-range precision shooting, it is chambered for five of the most popular varmint cartridges going — 222 Rem., 223 Rem., 22-250 Rem., 6mm Rem., and 243 Win. A heavy 24" barrel places this rifle in a new accuracy class. It's equipped with scope bases, hinged floor plate, quick release swivels and an easier to adjust sling strap. Monte Carlo stock and cheek plate, RK-W wood finish and custom checkering.

Model 700 "Custom" Rifle

The 700 "Custom" is the finest bolt action rifle ever manufactured by the Remington Arms Company. Available on special order only, the 700 "Custom" offers the sportsman a choice of specifications. It is available in a variety of calibers and features a select American Walnut stock, hand checkering, and a highly polished barrel (with or without sights) and receiver for the finest blueing possible. It is truly the ultimate gun for the ultimate sportsman.

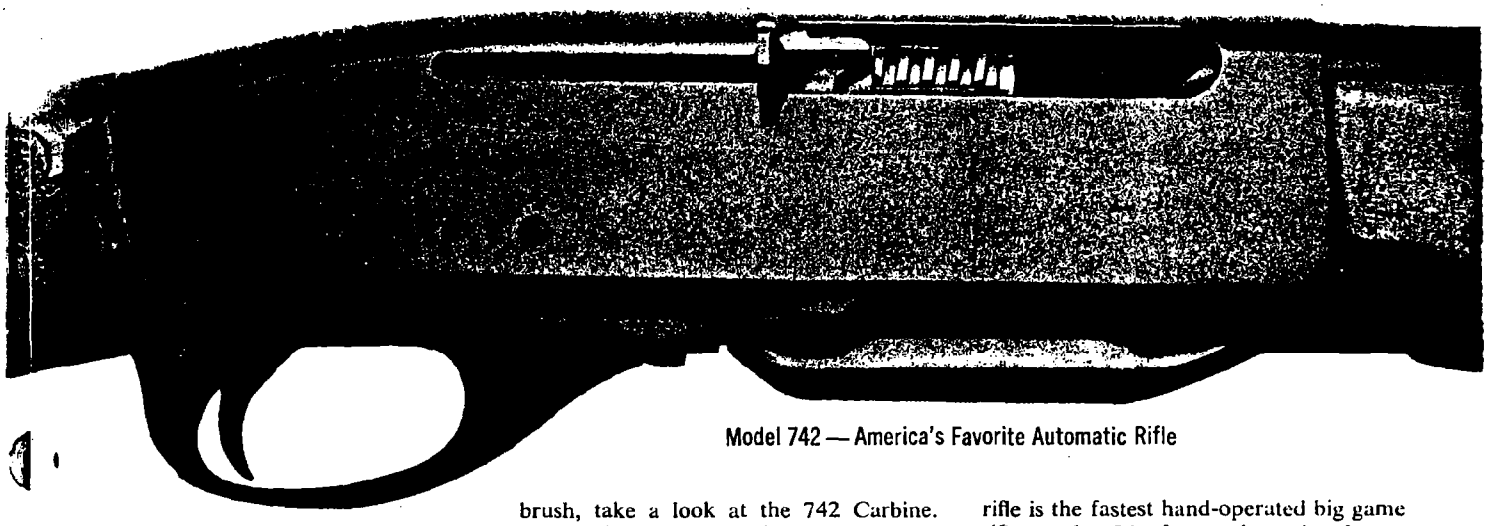
Remington Model 742 "Woodsmaster" Automatic—Priced from $164.95

Model 760 "Gamemaster" Pump Action Rifles—Priced from $139.95



Model 742 — America's Favorite Automatic Rifle

64 YEARS OF AUTOMATIC RIFLE EXPERIENCE HAS GONE INTO THE MANUFACTURE OF REMINGTON'S LATEST MODEL —

Model 742 "Woodsmaster"

Remington introduced America's first Automatic rifle back in 1906 and we've been making them ever since.

The Model 742 is the most dependable automatic on the market. It's proven itself time and time again, under all weather conditions. Prior to its introduction, the 742 withstood performance tests that included freezing the action, subjecting the action to dust and dirt and a deluge of water. It passed these tests with flying colors. Proof enough it will stand up under all hunting conditions.

It's extra strong too. The artillery-type bolt has multiple lugs that lock bolt and barrel together as tight as a bank vault. When the bolt is closed, three rings of steel (bolt, barrel, and receiver) enclose the cartridge head.

Designed for trouble-free functioning, the fast gas-operated action soaks up recoil with no loss of power. You're back on target immediately for those extra shots (if you need them). If you hunt in heavy brush, take a look at the 742 Carbine. Its 18½" barrel makes it a handy gun to have when the going is rough.

Extra clips are available for fast loading in the field. Sling strap and swivels are optional.

Both the Model 742 rifle and carbine feature a unique metal finish. We call it "vibra-honing." The result is a mirror-like finish on all metal surfaces (both inside and out). Parts operate smoother, glide easier. The blueing resembles that of far more expensive models. It has a rich lustrous finish.

Du Pont developed RK-W wood finish protects the stock and fore-end. This clear finish, similar to that used on bowling pins, is tough, hard and scratch-resistant. It gives lasting protection against hard usage and bad weather.

BDL grade "Custom Deluxe" models feature beautiful basket-weave checkering, Monte Carlo stock with full cheek piece either for right or left hand shooters (safety reversed for left hand shooters at no extra cost) and an attractive black fore-end tip and grip cap. All Model 742's are drilled and tapped for 'scope mounts.

Model 760 "Gamemaster"

The Model 760 pump action center fire rifle is the fastest hand-operated big game rifle made. It's faster than the fastest lever action. Double action bars guarantee dependability and prevent twisting and binding. All this means velvet-smooth pumping, shot after shot.

The Model 760 is the only pump action big game rifle that's chambered for the powerful 30-06 Springfield cartridge. The secret's in its solid steel receiver and extra-strong artillery type bolt.

All Model 760's are drilled and tapped for 'scope mounts. RK-W Du Pont developed wood finish is standard on all models as is a streamlined beaver-tail fore-end with black tip and white line spacers. Skip line checkering on standard grades gives the rifle a distinctive look.

New "vibra-honing" metal finish, inside and out, makes metal surfaces silky-smooth; parts work friction-free. BDL Deluxe grades feature basket weave checkering, Monte Carlo stock with cheek piece for right or left hand shooters (safety reversed on guns with left hand cheek piece at no extra cost).

The Model 760 "Gamemaster" carbine with an 18½" barrel is just the ticket when you're hunting in heavy brush. Dollar for dollar, you can't buy a better pump action big game rifle.

1 — MODEL 742, 6mm Rem., $164.95 2 — MODEL 742 BDL DELUXE, 30-06 Spfd., $184.95 3 — MODEL 760, 308 Win., $139.95
4 — MODEL 760 BDL DELUXE, 30-06 Spfd., $159.95

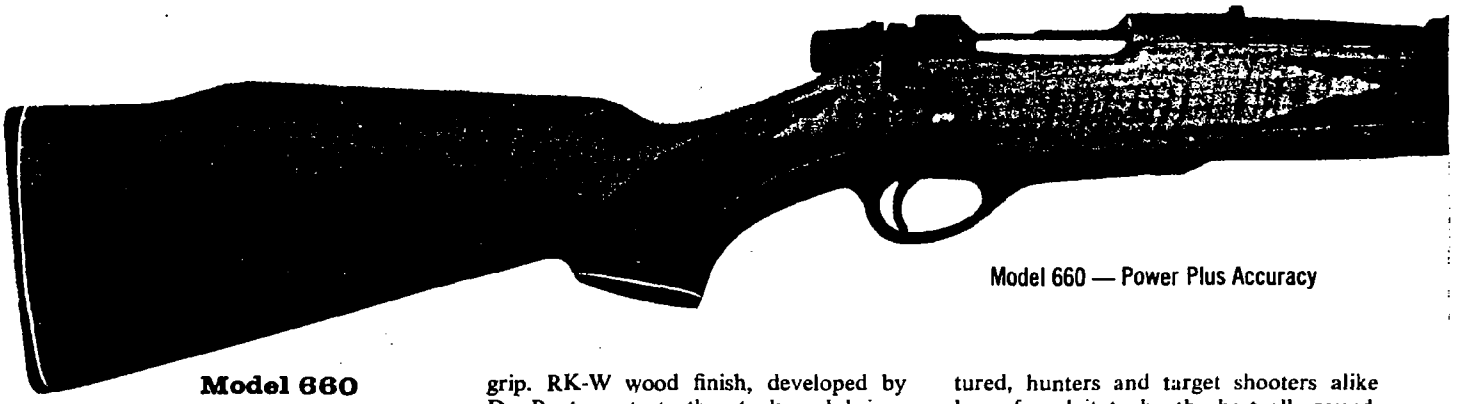
Remington Model 788 Bolt Action Rifle – Priced from $89.95 Model 660 Bolt Action Carbine – Priced from $124.95



Model 660 — Power Plus Accuracy

Model 660

THE MODEL 660 IS THE MOST POWERFUL BOLT ACTION CARBINE ON THE MARKET TODAY! NO OTHER GUN IN ITS CLASS IS CHAMBERED FOR THE HARD HITTING 350 REM. MAGNUM AND 6.5 REM. MAGNUM. The 660 is available in other popular calibers too: 243, 308, 222 Rem., and 6mm Rem. The Model 660 bolt action carbine is versatile enough to hunt all big game animals of North America. Its convenient carbine length 20" barrel means easy carrying in the field without loss of accuracy or velocity. A special barrel bracket adds support to the 'scope mount making it more rigid. The 'scope can't be easily knocked out of adjustment when the going gets rough. New "vibra-honing" metal finish, inside and out, are silky-smooth for fast, friction-free operation. The receiver is drilled and tapped. It's a simple matter to install a 'scope. Adjustable sights are the same dependable type that are on the Remington Model 700. A good-looking black fore-end tip, fine-line checkering, plus a black grip cap and butt plate (recoil pad on magnum models) help give this carbine the looks of a far more expensive gun. Magnum models feature a lamination of walnut and beech for extra strength, stability, and beauty. Sling straps and swivels are standard equipment on the 660 Magnum.

The Model 660's "S" shape bolt handle hugs the stock and won't interfere with brush or clothing. This bolt knob is serrated on the bottom for a good secure grip. RK-W wood finish, developed by Du Pont, protects the stock and brings out the lustrous beauty of the wood grain.

The Model 660 has many features of higher priced rifles. Standard equipment includes a Monte Carlo stock for a better cheek-to-stock fit for quicker, surer sight alignment with either a 'scope or open sights. The trigger is extra wide and serrated so your finger won't slip even when wearing a glove; it's extra crisp and clean, no creep or spongy action.

Economically priced in all calibers, the Model 660 is the most versatile carbine your money can buy.

Model 788

FEW NEW RIFLES HAVE EARNED, IN SUCH A SHORT PERIOD OF TIME, THE REPUTATION OUR MODEL 788 HAS ACQUIRED FOR ACCURACY AND DEPENDABILITY. In the three years it has been manufactured, hunters and target shooters alike have found it to be the best all-around, economically priced bolt action rifle on the market.

The Model 788 is also available for southpaw shooters. A left hand bolt is furnished in 6mm Rem. and 308 Win. calibers.

In order to chamber a rifle for a cartridge like the potent 22-250 Rem., you've got to have an action that will stand an unbelievable amount of pressure. Not many $89.95 bolt actions will. The nine extra-heavy locking lugs on the Model 788 bolt engage grooves in the solid steel receiver for a strong, secure lock-up.

The secret of the Model 788's exceptional accuracy lies in its fast lock time (the interval between the time you pull the trigger and the rifle actually fires). The lock time is so fast the bullet has left the barrel of the Model 788 before a comparative bullet has left the cartridge case in competitive models.

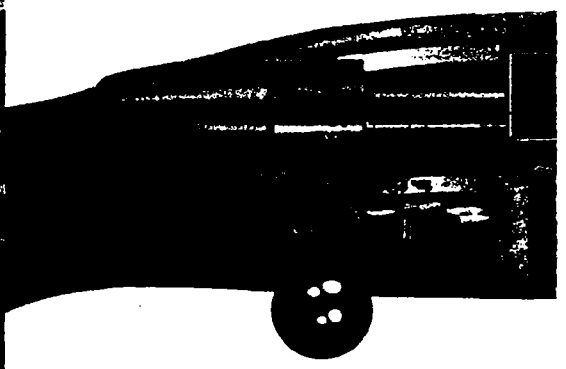
NEW

Remington the 5mm and the

Models 591 and 592
Priced from $64.95

The new Remington Models 591 clip repeater and 592 tubular repeater bolt action rifles are chambered for the new sensational 5mm Remington rim fire magnum cartridge. Why sensational? For these reasons. It's the fastest rim fire cartridge ever made (muzzle velocity 2100 feet per second) — the most accurate rim fire hunting cartridge and the only rim fire cartridge made with the super accurate "Power-Lokt" bullet. It looks like a center fire cartridge and it has the accuracy of a center fire cartridge — great for small game, varmint hunting, and informal target shooting. Other outstanding features of the Models 591 and 592 are:



1 — MODEL 592, Tubular Repeater, 5mm Rim Fire Magnum, $69.95

2 — MODEL 591, Clip Repeater, 5mm Rim Fire Magnum, $64.95

3 — NYLON 77, Clip Repeater, $49.95

(Complete Specifications on Pages 28 and 29)

R2525262

1970

For 1970

Models 591 and 592 Chambered for Remington Rim Fire Magnum Nylon 77 Clip 22 Caliber Automatic

SIX EXTRA HEAVY ROTARY LUGS on the bolt engage grooves in the solid steel receiver. Together they lock up tight, like a bank vault. Here is extra strength to handle the powerful 5mm Remington rim fire magnum cartridge. BOLT COVER at rear keeps out dirt and grit. UNIQUE TWO STAGE EXTRACTORS permit the bolt to completely enclose the cartridge head — assures utmost safety. FULL SIZE Monte Carlo stock with pistol grip looks and feels like a center fire rifle. SIGHTS are rugged, similar to those on big game rifles. Bead front sight and U notch lock-screw rear. ROUND RECEIVER means bedding into the stock can be more precise which, in turn, contributes to fine accuracy. The receiver is also grooved for tip-off 'scope mounts. ORDNANCE STEEL BARREL is precision rifled, crowned at the muzzle, polished and blued for good looks and long wear. NON-SLIP THUMB SAFETY is conveniently located at the right rear of the receiver. Positive safety — forward for fire, rearward for safe. Marked "F" for fire; "S" for safe. MATCH TRIGGER QUALITY — A good trigger pull is an important asset to any rifle. The lock time of the Models 591 and 592 is the fastest of any rim fire made today. What's lock time? It's the length of time, measured in a millisecond, between the release of the trigger sear and instant ignition. This means better accuracy, no trigger movement to pull the gun off target.

Nylon 77 Clip Automatic
Priced at $49.95

The unprecedented popularity of the Nylon 66 is directly responsible for the innovation of another new 22 cal. autoloader, the Nylon 77. This sleek little 4 lb. beauty has the looks, feel, and balance of the Nylon 66 but features a removable clip magazine for fast loading and unloading.

Designed with rugged handling in mind, the stock of the Nylon 77 is guaranteed not to warp, crack, chip, fade, or peel for the life of the rifle — or we will replace it free. No other manufacturer makes this claim. Remington's quite proud of the Nylon 77 and we have every reason to believe our customers will be too.

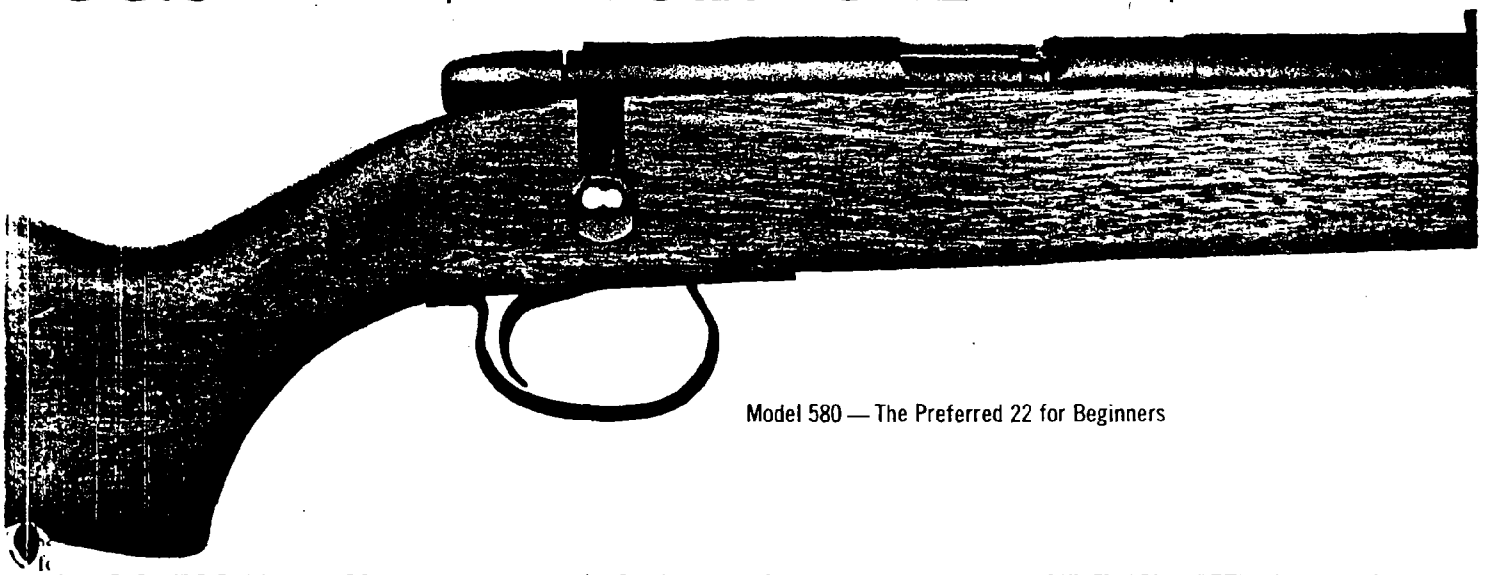
R2525264

Remington Bolt Action 22 Caliber Rifles...Models 580, 581 and 582—Priced from $39.95 Model 514—Priced at $26.95



Model 580 — The Preferred 22 for Beginners

Models 580 Single Shot, 581 Clip Repeater and 582 Tubular Repeater

They have the look, feel and balance of big game center fire rifles — plus the strongest, most powerful bolt ever designed into a 22 caliber hunting rifle.

A left hand model 581 with the bolt on the left side is available for southpaw shooters. It is the only left hand bolt action rim fire rifle ever manufactured in America, another first from Remington.

The 580 series feature an artillery type bolt with rear lock-up. Six extra-heavy rotary locking lugs at the back engage grooves in the solid steel receiver. Together they lock up tight, like a bank vault. Try it — work the action a few times. It's silky-smooth, solid and secure, made of ordnance steel.

Here is strength that has never been equaled in any 22 bolt action hunting rifle. Actually, there's more built-in strength here than you'll ever need, but it's nice to know your rifle is designed with this plus factor.

Remington looked at all the other desirable features that make up a fine big game rifle . . . and we put them into this new rim fire line. Here they are:

HUNTING-TYPE TRIGGER is wide and the trigger pull is crisp, sharp, clean — no drag. Big, sturdy trigger guard is roomy enough to accommodate a gloved finger. Everything about these new rifles is man-size. There's no corner cutting anywhere.

FULL SIZE Monte Carlo stock with pistol grip looks and feels like a center fire rifle. It assures a snug, comfortable cheek-to-stock fit that means more hits — with or without a 'scope. And there's no skimping on the fore-end, it's long, tapered, man-size to prevent canting and provides a good secure grip.

NON-SLIP THUMB SAFETY is conveniently located at the right rear of the receiver. Positive safety — forward for fire; rearward for safe.

TWO EXTRACTORS are standard on this series of 22 rifles. Remington feels that two are better than one (so you get 2). Another extra at no extra charge.

SIGHTS are rugged, similar to those on big game rifles. Bead front sight and U notch adjustable rear with lock screw. You'll hit what you aim at with these sights.

ROUND STEEL RECEIVER means bedding into the stock can be more precise, which in turn contributes to fine accuracy. The receiver is also grooved for tip-off 'scope mounts. Actually, it's the strongest, most rigid receiver of any 22 bolt action hunting rifle because there are no slots or notches to weaken it; bolt handle isn't used as a lock-up lug. Here again, Remington designers made it like a center fire rifle. Costs the shooter no more; its an extra bonus he gets because of good design.

BOLT COVER keeps dirt and bad weather out. Assures smooth operation within. Adds to streamlining of the rifle, too. Here's an accuracy combination that's hard to beat . . . in all three models: 580 single shot, 581 clip repeater and 582 tubular repeater.

Model 514

Here is an excellent 22 caliber rifle . . . at a popular price. It's a single-shot bolt action model with a self-cocking bolt, rotary thumb safety, and takes all 22 caliber cartridges — short, long or long rifle; standard velocity or high speed. For the young shooter, it's also available as Model 514 BR, with shortened stock.

1 — MODEL 514, Single Shot, $26.95 2 — MODEL 580, Single Shot, $39.95 3 — MODEL 581, Clip Repeater, $49.95
4 — MODEL 582, Tubular Repeater, $54.95

Priced from $54.95

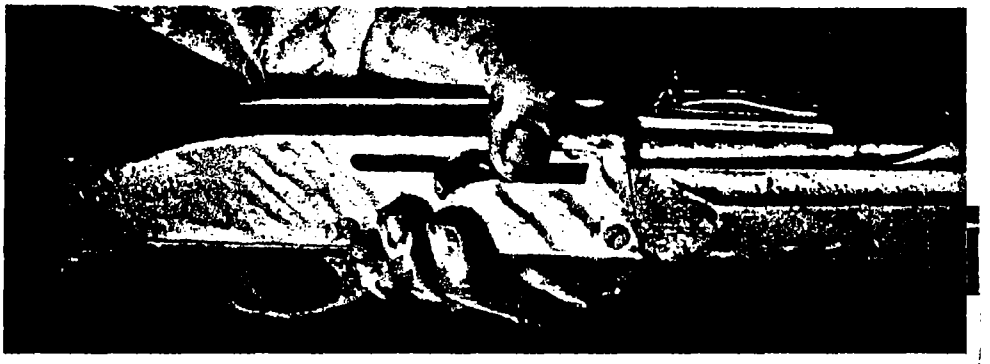
Remington's Nylon 66 is setting an amazing record in sales and customer acclaim. Here's why!

Structural-nylon is many ways better than conventional material for the gun's stock and fore-end. Because this super-strong material doesn't warp, the same barrel bedding principle used on the world's most expensive target rifles is yours. The result is an automatic that nails targets, tin cans and small game with tremendous accuracy. This is the same model rifle used to establish an accuracy record on hand-thrown 2½" wood blocks. Only six misses out of 100,000 blocks thrown . . . and without a malfunction.

Receiver parts, stock and barrel are interlocked with steel and structural nylon that creates the most trouble-free automatic action ever known. There's no need for lubrication because friction-free parts glide on "greaseless bearings" of nylon. Perfect checkering makes for fast, sure loading, and the convenient top-of-grip thumb safety slips off "safe" in a wink for running game shots. The handsome Nylon 66 has white diamond inlays and white line spacers at grip cap, butt plate and fore-end tip.

The Nylon 66 is also made in an Apache Black deluxe model. The stock is Du Pont Zytel® black nylon and both the barrel and the receiver cover are chrome plated. Inside, it's the same reliable, trouble-free rifle as the standard Mohawk Brown model.

The Nylon 66 is the most rugged automatic 22 rim fire rifle made. It will work when conditions get tough.



Nylon 66 — The Rim Fire Rifle with the Fully Guaranteed All-Weather Stock

Model 552 "Speedmaster" Automatic
Priced from $64.95

Here's the Remington 22 caliber automatic that's fast shooting, accurate, nicely balanced and chambered for Short, Long and Long Rifle cartridges. The Model 552 is another member of Remington's "family of guns;" looks, handles and shoots like its big brother, the Model 742 big game rifle. The "Speedmaster" has every feature a shooter wants, such as: twenty shots as fast as you can squeeze the trigger, cross bolt safety, receiver grooved for "tip-off" 'scope mounts. Also available is the short barrel (21") carbine model, the Gallery Special and a deluxe model with custom checkering, RK-W wood finish and big game type sights. Pick a 552 off the rack at your dealer's — throw it to your shoulder. We think you'll agree, it's the rifle that "feels right" . . . because it's made right.

Model 550 Automatic
Priced at $59.95

Rapid fire, extra ruggedness and dependability are points shooters like about this Remington automatic. It's the famous 22 caliber rifle that shoots Short, Long and Long Rifle cartridges with no adjustment. Mix them up, drop them in the tubular magazine and fire away. Model 550 takes 'em as they come. Other fine features are: Large capacity, up to 20 Shorts, fine accuracy, thumb safety, receiver grooved for "tip-off" 'scope mounts. The Model 550 is well-built, well-designed — an exceptionally fine all-around rifle for the hunter or plinker . . . and good for weekend family fun, too.

Model 572 "Fieldmaster" Pump Action
Priced from $64.95

For the shooter who likes a pump action 22 caliber rifle, the "Fieldmaster" Model 572 is best . . . action is slick and smooth. Exclusive cartridge feeding design prevents jamming, permits easy single loading. By simply removing the inner magazine tube, parent or instructor can convert the "Fieldmaster" into a single shot rifle. Receiver has dovetail grooves for "tip-off" 'scope mounts. Capacity is large; tubular magazine holds 20 Short, 17 Long or 15 Long Rifle cartridges. It has a cross bolt safety conveniently located at the rear of the trigger guard where it can be snapped on or off with the index finger. The Model 572 is beautifully streamlined and balanced — rugged and dependable like Remington big game rifles and shotguns. BDL deluxe models feature extra tough RK-W wood finish, custom checkering, grip cap, and big game type sights.

1 — MODEL 552 BDL DELUXE, Automatic, $74.95 **2 — MODEL 550 A, Automatic, $59.95**
3 — MODEL 572 BDL DELUXE, "Fieldmaster", Pump Action, $74.95 **4 — MODEL 572A, "Fieldmaster", Pump Action, $64.95**
5 — MODEL 66 AB, "Apache Black", Automatic, $59.95 **6 — MODEL 66 MB, "Mohawk Brown", Automatic $54.95**

Remington Models 40XB "Rangemaster", 40XB-BR Bench Rest Target Rifles...Model 540X 22 Caliber Match Target Rifle... International Free Rifle

Model 40XB "Rangemaster"
(Rim Fire Model) Priced from $184.95

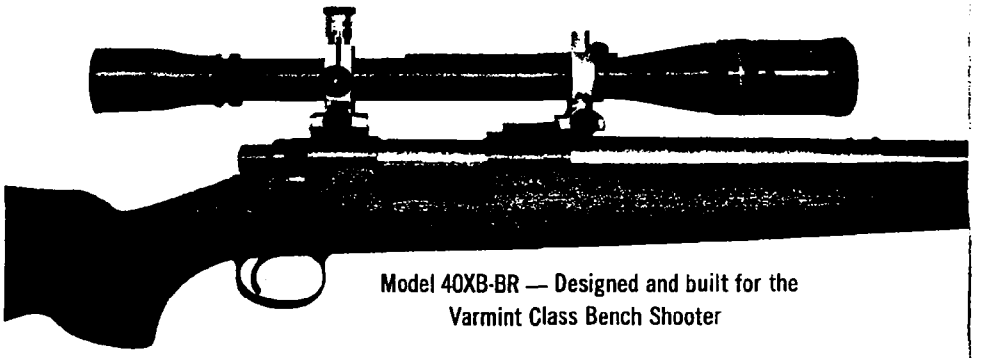
Exclusive loading platform provides straight line feeding; no shaved bullets. High comb gives same sighting plane for iron and telescope sights. Comb is grooved for bolt removal. Mershon White Line non-slip rubber butt plate, adjustable sling swivel and hand-stop are standard equipment. Other features are: extra strong bolt with double extractors, crisp trigger with positive adjustments for weight of pull, wide trigger for more uniform pull and comfort, thumb operated safety. The receiver is drilled and tapped for all standard sight mounts, telescope and metallic Redfield Olympic front and rear sights optional. A new long rail for the adjustable fore-end stop and palm rest makes shooting good scores easier.

Model 40XB "Rangemaster"
(Center Fire Model) Priced from $235.00

Now available in repeating models for use in National Match Courses, the 40XB is designed with clip slots for the conventional five shot clip. (Available in heavy barrel models only). It loads from the top of the receiver and the magazine has a hinged floor plate. Repeating models are provided only in calibers equal to or shorter than the loaded length of the 308 cartridge.

The 40XB center fire repeating rifle is ideal for the rapid fire events, especially in the 7.62mm NATO (308) caliber, because of its shorter bolt throw and extreme accuracy, plus its optimum weight for "over the course" competition.

As a single shot model, the Remington Model 40XB center fire is offered in a variety of center fire calibers as listed in specifications. The action is hand bedded and the barrel is free floating. The 40XB meets the National Bench Rest Association rules for the Heavy Varmint Class with most target telescopes (Max. weight 13½ lbs.) Stainless steel barrels are supplied as standard on all magnum and varmint calibers except 222 Rem., 222 Rem. Mag., 223 Rem., 308 Win. and 30-06 Spfd. Stainless 40XB barrels are not blued. 40XB "Sporter" (22 long rifle version of Model 700 "Custom") available on special order.



Model 40XB-BR — Designed and built for the Varmint Class Bench Shooter

Model 40XB-BR–Bench Rest
(Center Fire) Priced at $275.00

Built with all the features of the extremely accurate Model 40XB-CF but modified to give the competitive bench rest shooter a standardized rifle that provides the inherent accuracy advantages of a short (20") heavy, extremely stiff barrel. Wider, squared off fore-end gives a more stable rest on sand bags or other supports. In combination with the new Remington target 'scope, the resulting package weighs just under 10½ lbs. and meets weight limitations for the sporter and light varmint classes of National Bench Rest Shooters Association competition. For shooters competing in the heavy varmint class, a 13½ lb. 26" barrel version is available.

Remington 20 Power Target 'Scope Priced at $159.95

Remington's new 20 power rifle 'scope is designed primarily for accuracy in critical bench rest shooting. Its relatively short length permits fore and aft receiver mounting, and eliminates the need of a forward mounting on the barrel. Produced in 20 power only, the target 'scope contains optics of the highest quality. Because of its lighter weight, shooters have greater flexibility in assembling rifle and 'scope combinations to meet National Bench Rest Shooters Association weight limitations.

Model 540X Match Target Rifle Priced from $99.95

The Model 540X has all the design features and special attachments to make it the most accurate target rifle in its class. Designed for the intermediate and junior shooter, the Model 540X is super accurate, well balanced, and loaded with extras. To continually punch holes in the X ring with any rifle, you need a gun with a good crisp trigger pull. The 540X has a fully adjustable trigger that does exactly that. The secret's in its fast lock time.

A unique feature of this rifle is its five-way adjustable butt plate. The stock can be adjusted with the same wrench for length of pull, vertical, pitch or cant (left or right).

International Free Rifle
(Rim Fire and Center Fire)
Priced from $365.00

The International Free Rifle features the 40XB action, precision heavy barrel, a Remington designed adjustable butt plate and hook, adjustable palm rest, adjustable front sling swivel and 2-ounce trigger. Left-hand stock supplied at extra charge.

1 — MODEL 40XB, 22 Cal. Rim Fire Target Rifle, $184.95 (Target Sights Extra) 2 — MODEL 540X, 22 Cal. Match Target Rifle, $119.95
3 — MODEL 40XB BENCH REST, Center Fire, 222 Rem., Stainless Steel Barrel, Target Rifle, $275.00 (Target 'Scope Extra)
4 — INTERNATIONAL FREE RIFLE, Center Fire, 222 Rem. $365.00

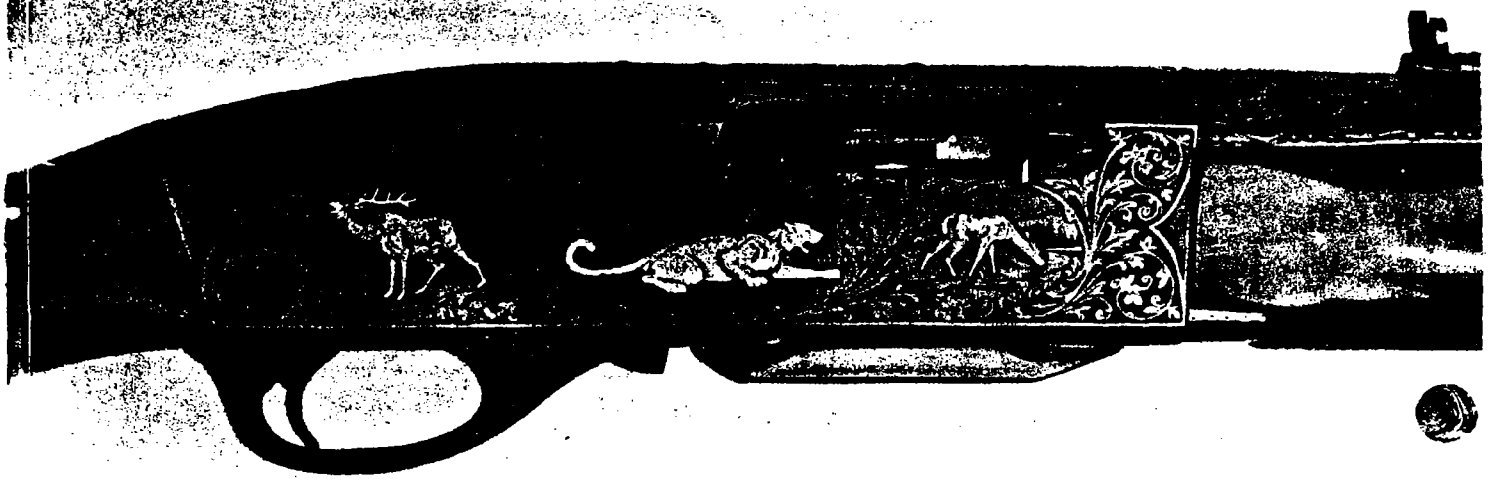
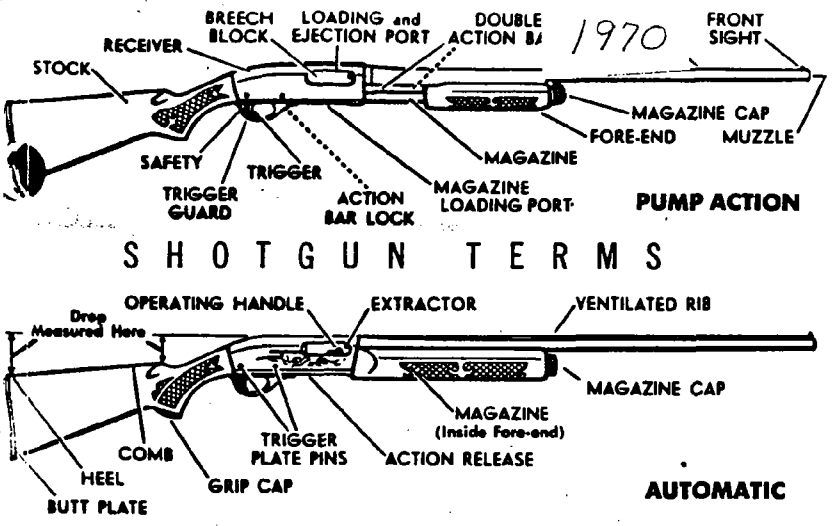
Remington

"Premier" Grade Guns

"Premier" grade rifles and shotguns are the finest guns available from America's oldest gunmaker. Select American Walnut stocks and fore-ends are hand finished and beautifully checkered. The stock is fitted with a gold nameplate on which the owner's initials can be engraved. The receiver is extensively engraved with games scenes and scroll of the customer's choice. Gold inlays are available in premier grade guns at $2000.00.



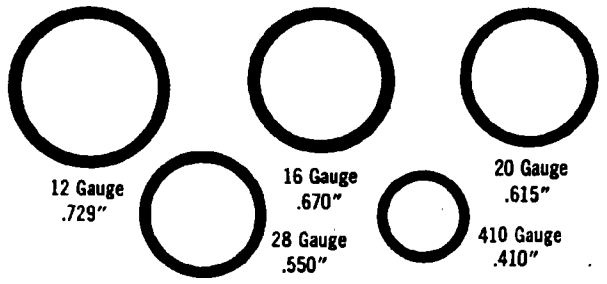
R2525272



Gauges, Chokes and Barrels

GAUGES — Shotguns are made in several well-known gauges, 12, 16, 20, 28 and 410. Other gauges have been made in the past but are not at present in common use. These include 4, 8, 10, 14, 24 and 32 gauges.

The unit of gauge measurement is based on numbers of uniform lead balls weighing one pound. 12 gauge is approximately the diameter of a lead ball of which 12 weigh one pound, 16 gauge is the diameter of a lead ball of which 16 weigh one pound, etc. The one exception is 410 gauge, which is actually 410 caliber. In terms of gauge, it would be 67 gauge. Measurements of minimum bore diameters in thousandths of inches are as follows:



SHELL LENGTH is measured in inches, in terms of the overall length of fired shell, with the crimp open. A 2¾" shell measures about 2½" to 2⅝" before it is fired, but 2¾" overall after firing. This method of measuring has been adopted to conform to standard chamber lengths of shotguns. A gun with a 2¾" chamber will thus handle shells of the proper gauge up to 2¾" length.

PATTERN — Pattern is the spread of shot pellets at any given yardage. All loads with the exception of 410 and skeet are tested for pattern at 40 yards. 410 and skeet loads are tested at 25 yards. The percentage of the total shot charge registering within a 30" circle (20" for 410) at these distances determines the quality of a pattern. No two patterns will be exactly the same. Average results should be taken from at least 25 patterns.

CHOKE — Choke is partial constriction of the bore of a shotgun barrel at the muzzle end. Its purpose is to control patterns. By using different degrees of choke boring, it is possible to control the spread of the shot charge for the best distribution of pellets at various ranges. For example, the bore diameter of a 12 gauge gun is .729". If the diameter at the muzzle end is reduced to .694", the constriction of .035" (difference) will control the shot sufficiently to give patterns averaging about 70% of the shot in a 30" circle at 40 yards. This is known as full choke boring, and is intended for long range shooting. The following table shows the percentage of shot that can be expected in the various choke borings:

CHOKES	% at 40 yards in 30" circle
Full Choke	70
Modified Choke	60
Improved Cylinder	50
Cylinder	40

CHOKE USES — A shooter should select the degree of choke boring for his barrel according to the range at which most of his shots are taken. Some kinds of birds and small animals are usually shot at close range, others at long range. Also, some persons are inclined to shoot quickly, while others tend to "ride" their game or targets. Most hunters find the following borings give the best results, though much depends on shooting conditions and personal preferences.

Full Choke ..... ducks, geese, pheasant, crows, turkey, fox, racoon, trap shooting.

Modified Choke ..... rabbit, woodcock, doves, squirrels, also all-round usefulness including ducks, quail, etc.

Improved Cylinder, Special Skeet ..... quail, grouse, partridge, rail, skeet shooting.

BARREL LENGTH — Shotgun barrels are usually supplied in 26, 28, and 30 inch lengths; also 20 and 26 inch lengths with rifle sights. The longer barrels are often preferred for long range shooting because the greater length gives a longer sighting radius, permitting more accurate pointing. Long barrels also minimize discomfort of muzzle blast, and the added weight reduces recoil. Short barrels are often preferred for close range shooting because they are easier to handle for quick shots . . . especially in heavy brush.

It is not practical to cut off a shotgun barrel. To do so will change the shooting qualities of the gun because the choke constriction is within the last two inches at the muzzle end. It is also impractical to cut down the length of the barrel and then attempt to restore the original degree of choke boring because the metal necessary for this will already have been reamed out at the time of manufacture.

A barrel may be rebored from one degree of choke to a more open degree, full to modified, modified to improved cylinder, etc., as long as the barrel length is left unchanged.

"Premier" grade rifles and shotguns are the finest guns available from America's oldest gunmaker. Select American Walnut stocks and fore-ends are hand finished and beautifully checkered. The stock is fitted with a gold nameplate on which the owner's initials can be engraved. The receiver is extensively engraved with game scenes and scroll of the customer's choice. Gold inlays are available in premier grade guns at $2000.00.

Remington Model 1100 1971 Automatic Shotgun... 12, 16, 20, 28 & 410 Gauges

The Remington Model 1100 Automatic Shotgun is the largest seller in the United States.

Remington has been making automatic shotguns since 1905. That makes Remington the oldest and most experienced automatic shotgun manufacturer in America. In 66 years, one thing stands out in the Remington Automatic shotgun line—each gun was built for an individual shooter. It fit his needs and did what he wanted it to do. Those needs have been watched and studied since 1905 and today, the shooter can choose from 46 variations and 71 specifications. When you buy a Remington Model 1100, you don't have to settle for something close to what you want, you get exactly what you want. And, after all, when you're shooting an automatic that is exactly what you want; you'll perform better.

A NEW LIGHTWEIGHT MODEL 1100, 20 GA. 3 INCH MAGNUM IS AVAILABLE THIS YEAR

If you're a hunter, and are looking for a lightweight automatic shotgun with enough power to handle fast-flying game birds and small game, here is your answer.

This new lightweight Model 1100, 20 gauge 3 inch magnum is designed for the sportsman who does a lot of walking when he goes out to hunt. He's also the type of man who shoots a lot on these long hunts so he knows how recoil and weight can affect his performance.

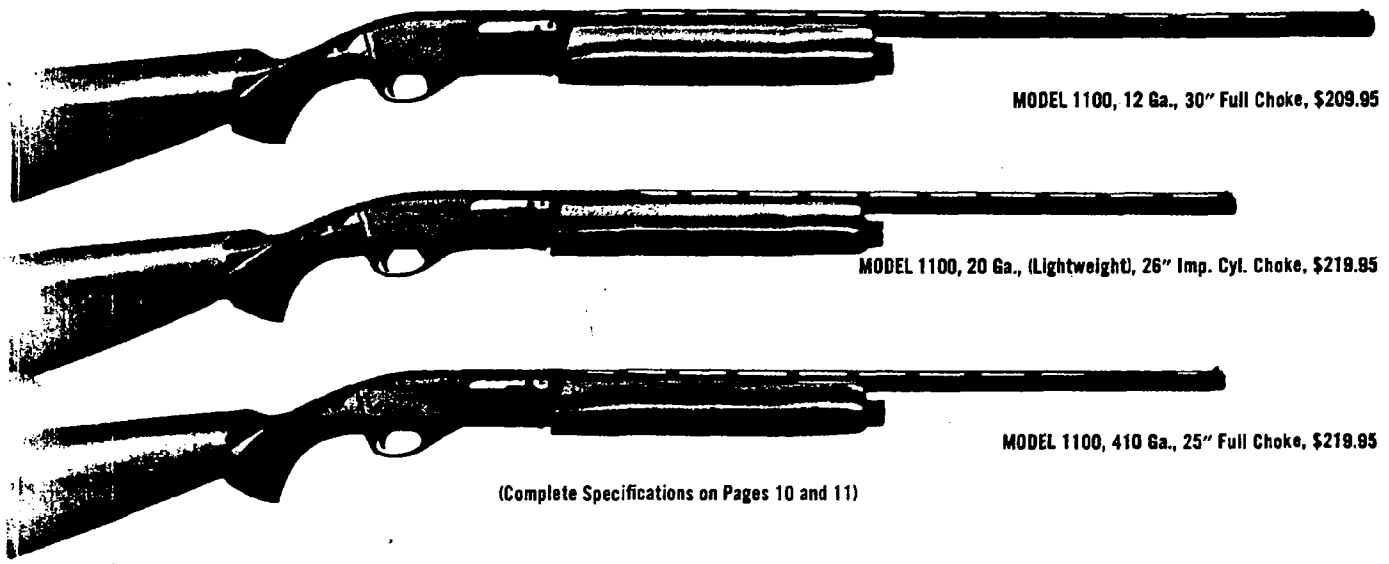
The lightweight 3 inch magnum handles both of these problems beautifully. The recoil of this 6¾ lb. gun is nothing more than a gentle push so he can shoot all day and not be bothered with the "punch" found in other automatic shotguns. And even though this gun is light on recoil and weight, it's not light on power. It handles Remington-Peters 2¾ and 3 inch magnums and will give the same power and performance as 12 gauge standard field loads.

So if you're looking for a combination of light weight, light recoil, and extra power in an automatic shotgun, take the new lightweight Model 1100, 20 gauge 3 inch magnum along and see how enjoyable an all-day hunt can be.

DEPENDABILITY—In all kinds of weather with all kinds of loads, the standard 1100 will give you the performance you have come to expect from Remington. Its gas metering system is designed to operate with all types of shotgun shells making it possible for you to hunt a variety of game with the proper ammunition. This unique design enables the shooter to use all 2¾" standard velocity, "Express," and 2¾" magnum loads without any gun adjustments. Barrels, within gauge and similar chamber lengths, are interchangeable in seconds, no factory fitting is required. This beefed up, self-cleaning gas operated shotgun has a greatly extended shooting life. It'll still be shooting long after less rugged automatics have worn out. For extra dependability, be sure to use Remington or Peters shotgun shells—the same ammunition used in developing and testing all Model 1100's at the factory.

RECOIL—There really isn't much. As a matter of fact, the correct word to use is "push." The 1100 gives less "kick" than any other shotgun action. Your shoulder feels a "push" rather than a "punch."

APPEARANCE—In order to have a best selling product, it must look the part. The 1100 does...and for many reasons. The solid steel receiver features decorative scroll work. Its deep rich blue (outside and in) is caused by our unique "vibra-honing" metal finish. Du Pont developed RK-W wood finish is tough and scratch resistant. White line spacers and a teardrop pistol grip cap do not make the 1100 shoot any better but it gives you that pride of ownership feeling.



MODEL 1100, 12 Ga., 30" Full Choke, $209.95

MODEL 1100, 20 Ga., (Lightweight), 26" Imp. Cyl. Choke, $219.95

Remington Model 8 1971 ingmaster" Pump ction Shotgun...12, 16, 20, 28 & 410 Gauges. New Left-Hand Models...12 & 20 Gauges

For over 20 years, the Remington Model 870 "Wingmaster" has been the leader in the pump action shotgun field. This year, it's available for left-handers too.

For 1971, Remington has added two models to the long list of Model 870 specifications. The new 12 and 20 gauge left-hand Model 870's are true mirror-image left-hand guns. They're the perfect answer for the left-handed or left ter-eyed shooter who is now using a right-hand pump action gun and is bothered by ejecting hulls. Regardless of what shoulder you shoot from, the Model 870 "Wingmaster" is the finest pump action shotgun you can buy.

The Model 870 is presently being used by over a million sportsmen. It's built to take the rough use that often comes with hunting and shooting. The receiver is machined from a solid piece of ordnance steel to give the 870 extra strength—the strength to handle powerful magnum ammunition.

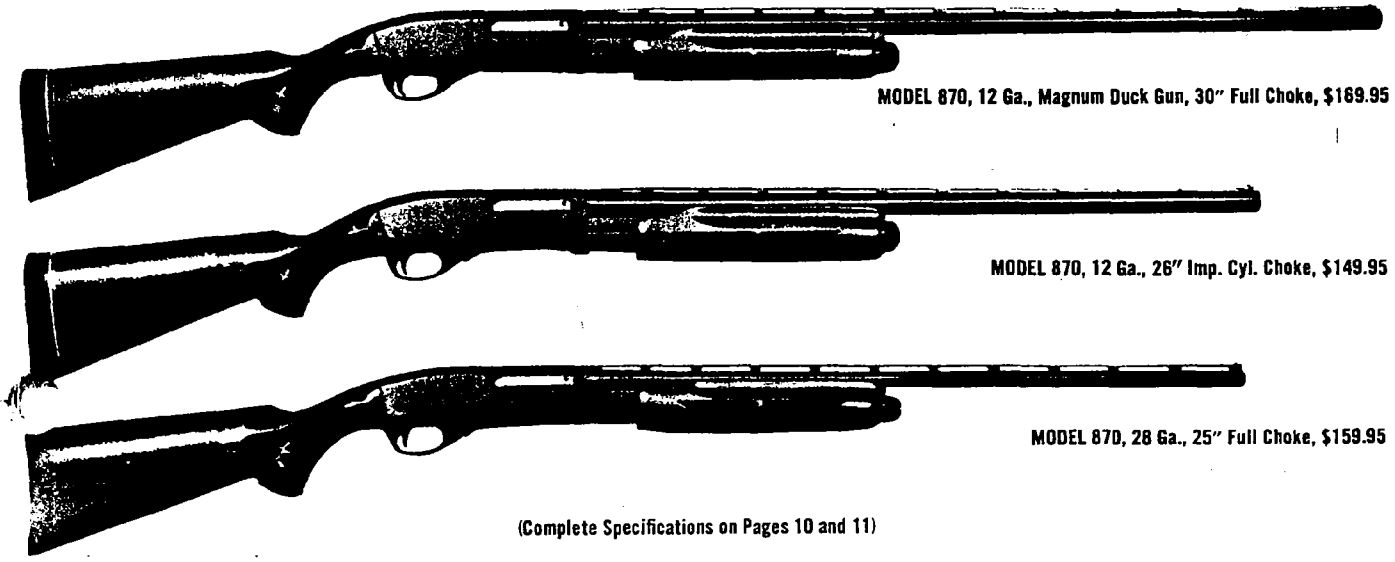
The Model 870 has double action bars (they're the two rails—one on each side of the fore-end). These double action bars let you pump the Model 870 twice as smoothly, shot after shot, without twisting or binding. That's double insurance that the 870 will feed and eject properly under all shooting conditions.

The Model 870 will also shoot all 2¾" standard velocity, "Express," and 2¾" magnum shells without adjustments. The 12 gauge, 3 inch magnum owner can shoot all 12 gauge ammunition without problems, giving you a selection of 21 different loads and the largest selection of shot sizes.

If you are planning to hunt different types of game, the Model 870 makes barrel changing fast and easy with instantly interchangeable barrels within gauge and chamber length. No factory or gunsmith fitting is necessary. In the 12 gauge alone, you can choose from 17 different choke and barrel length combinations.

The Remington Model 870 has a modern look too. Remington uses a unique metal finishing treatment called "vibra-honing" which gives a mirror-like finish to all metal parts both inside and out. The inside parts glide smooth and easy and the blueing bonds to the outside with a deep rich luster. The quality of the metal finish is also carried to the wood with a unique Du Pont wood finish called RK-W. This finish, similar to the finish used on bowling pins, is tough, hard and scratch resistant and will hold up for years of hard outdoor use. The shine of the wood and the luster of the metal are accented by white line spacers on the recoil pad or butt plate and pistol grip making the 870 one of the most attractive guns on the firearms market today.

Right or left, full choke to improved cylinder, the Remington Model 870 "Wingmaster" gives you a greater selection, more for your dollar, and a better chance in any shooting sport you want to try.



MODEL 870, 12 Ga., Magnum Duck Gun, 30" Full Choke, $169.95

MODEL 870, 12 Ga., 26" Imp. Cyl. Choke, $149.95

MODEL 870, 28 Ga., 25" Full Choke, $159.95

(Complete Specifications on Pages 10 and 11)

MODEL 870, 20 Ga., (Left-Hand), 28" Mod. Choke, $154.95

Remington Trap And Skeet Guns... Model 1100 Automatic And Model 870 Wingmaster" Pump Action Shotguns New Left-Hand 870 Trap Guns

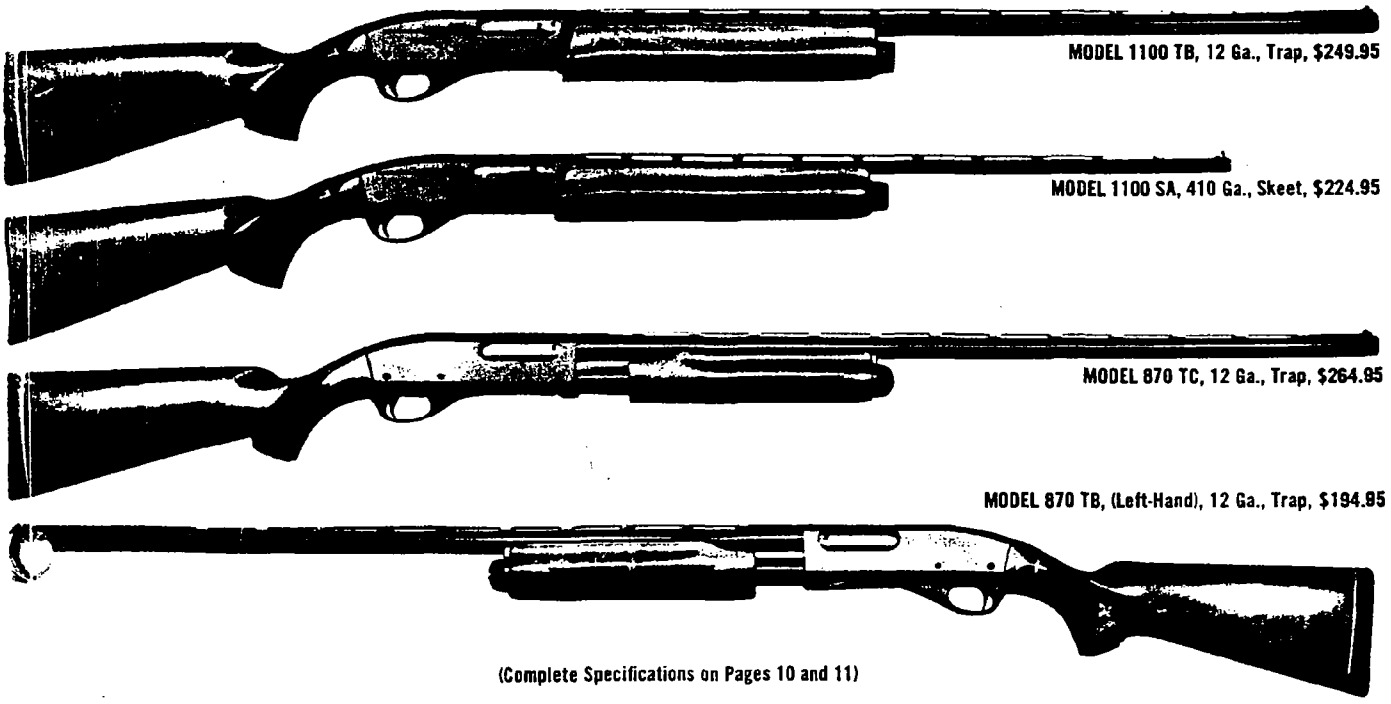
SKEET—It would be hard trying to talk about skeet guns without getting the Remington Model 1100 into the sentence somewhere. Actually, skeet sort of grew up with Remington. We set up one of the country's first skeet fields (Lordship, Conn.) and conducted the first national tournament of any importance (The Great Eastern). So, it's safe to assume Remington is just a little ahead of the field when it comes to knowing how to build a good skeet gun. We were quite a bit ahead of the field at the 1970 World's Skeet Championships. Five of the top six shooters in the All-Gauge event shot on Remingtons. Our Model 1100 SA is a big skeet favorite. It doesn't have the fancy wood our Deluxe SB grade has, but it's not as expensive either and shoots just as well. This gun it's available in 410, 28, 20, and 12 gauges, all with special "Skeet" bored barrels, solid steel receivers and built-in dependability. The Model 870 "Wingmaster" SA and SC skeet is just the ticket if you enjoy the feel of a pump action. The SA version is chambered for 410, 28, 20 and 12 gauge shotshells.

TRAP—This game's changed considerably since Remington introduced America's first "reasonably" priced double barrel trap gun 'way back in 1874. So have our trap guns. America's favorite trap model isn't a rabbit-eared double anymore, it's a slick, solid steel receiver pump gun. Remington calls it the Model 870. Our customers call it "Old Reliable."

NEW FOR 1971 is a true mirror-image left-hand Model 870 trap gun. This model was designed and engineered for the left-hander or left master-eyed clay target shooter who previously shot a standard pump gun and was bothered by ejecting hulls. We've eliminated this problem with our new left-hand 870's.

It's not uncommon for a trapshooter to shoot four or five thousand shells a year through one gun. Clay target busters are quick to recognize that the 870 is built to withstand this type of use. Double action bars prevent twisting and binding and a solid steel receiver insures utmost safety and dependability. The 870 is available in a variety of barrel lengths, both full and modified chokes. The TB grade (our economy model) offers all of the features of our more expensive TC grade with the exception of fancy wood and hand checkering. Monte Carlo stocks are optional on both models. The Model 1100 TB trap grade is our gas operated automatic you've heard so much about. In a little over seven years this gun has become the predominate favorite among trapshooters who prefer an automatic. Why do some prefer our automatic over other types of actions? RECOIL is one big reason. Actually the Model 1100 has less "kick" than any other shotgun action and, when you're shooting at 300 or so targets a day, body fatigue could mean the difference between winning or losing. DEPENDABILITY is another big reason why so many shooters use and prefer the Model 1100. It works. And not only with factory loads either, many reloaders have won major championships with the Model 1100 shooting their "home brewed" loads. Full and modified chokes are available in a variety of barrel lengths. Monte Carlo stocks are optional.

All Remington Model 1100 and 870 trap and skeet guns are tested and patterned at the factory with Remington-Peters target load ammunition. For championship performances in clay target events, we recommend their use regardless of what make gun you shoot.



MODEL 1100 TB, 12 Ga., Trap, $249.95

MODEL 1100 SA, 410 Ga., Skeet, $224.95

MODEL 870 TC, 12 Ga., Trap, $264.95

MODEL 870 TB, (Left-Hand), 12 Ga., Trap, $194.95

(Complete Specifications on Pages 10 and 11)

MODEL 1100 SA, 12 Ga., Skeet, $214.95

Remington Model 742 "Woodsmaster" Automatic, Left* And Right Hand Models

Add up all the things you want in an automatic big game rifle. The result will be a Remington Model 742.

REMINGTON 742 "WOODSMASTER"

We introduced the first automatic rifle in 1906 and Remington engineering is still giving sportsmen the ultimate in automatic shooting.

The Model 742 is engineered for the ultimate in dependability. Subject it to excessive dirt—it performs. Submerge it in water—it performs. The Model 742 is built for the outdoors and every weather condition nature offers.

THE MODEL 742 IS ENGINEERED FOR THE ULTIMATE IN STRENGTH. When the action is closed, you get a lock-up as tight and strong as a bank vault. This strength comes from an artillery-type bolt with multiple locking lugs that locks bolt to barrel as tight as engineering knowledge can make it.

We carry this strength even further. When the bolt is locked on the cartridge head, it gives you three rings of steel strength—the bolt, the barrel, and the receiver. The result is a cartridge head that's locked in tight and surrounded by triple steel strength.

THE MODEL 742 ALSO GIVES YOU THE ULTIMATE IN TROUBLE-FREE FUNCTIONING. Its fast, gas operated action soaks up recoil and keeps you on target for extra shots (if you need them). The interior working parts are coated with friction-freeing Du Pont Teflon "S" to give longer wear, self lubrication, and dirt and oil resistance to make cleaning easier. For reliable functioning, be sure to use Remington-Peters "Power-Lokt" or "Core-Lokt" ammunition—the same ammunition used to develop and test all Model 742's.

THE MODEL 742 GIVES YOU THE ULTIMATE IN LOOKS AND SELECTION TOO. Remington's unique "vibra-honing" metal finishing process assures a mirror-like finish on all metal surfaces both inside and out, parts glide smooth and easy. The blueing bonds with a rich luster only found on far more expensive firearms.

The gleam of a 742 stock and fore-end is unmatched in the industry for beauty and quality. It comes from Du Pont RK-W finish which is similar to the finish used on bowling pins. It's tough, hard, and scratch resistant and holds up in rough weather and hard usage.

For selection, the Model 742 offers you five great hunting calibers, a distinctive ADL standard grade, BDL "Custom Deluxe" grade with beautiful basket weave checkering and Monte Carlo stock with full cheek piece, BDL "Custom Deluxe" left-hand version, with reversed safety, 18½" barrel carbine version for hunting in brush and rough country are all available at popular prices. Special D "Peerless" and F "Premier" grades are available on special order. All models have distinctive black fore-end and grip caps, fast loading clip magazines, a convenient bolt release, and are drilled and tapped for scope mounts.

Put all of these features together and you'll know why its name is "Woodsmaster."

*Has left hand cheek piece and safety. BDL grades only.

R2525287

Remington Model 7(1971
Bolt Action Center Fire Rifle... Available in 17 Calibers Including The New 17 Remington

f you want a rifle that's rugged, dependable, ighly accurate, distinctive, the world's strongst, available in a dozen or more calibers, and uilt like a Rolls...you want a Remington Model 700.

This year, you can choose from 17 differnt calibers, including the latest, hottest, and he smallest commercially loaded center fire artridge—the 17 Remington. This 4,000 plus oot-per-second cartridge is just what the varmint-small-game-accuracy shooter has been oking and waiting for. And only Remington ngineering and the Model 700 can deliver this nique cartridge with the accuracy and power t deserves.

With this latest addition, the Model 700 ffers a caliber selection unmatched in the industry. The Model 700 has a caliber for every ype of hunting from varmints to elephants—even magnum calibers and seven varmint alibers. It's the ideal gun for the shooter looking for the finest design and largest selection of bolt action rifle.

STRENGTH—Tests have proven the Model 700 action is the strongest bolt action center fire ever made. It's just the ticket for handloaders who want strength where strength belongs. The secret is in the three rings of solid steel that surround the cartridge head. There are no extractor cuts to weaken this critical area.

APPEARANCE—The Model 700 has the appearance of a far more expensive rifle. The distinctive ADL grade has a jeweled bolt that retains lubrication, a shrouded bolt cover to keep out dirt and grit, a restyled stock with attractive checkering to improve pointing, balance, and grip, and a unique low profile safety that will not accidentally move on or off. Whiteline spacers at the butt plate, fore-end tip, and pistol grip, and "quick-adjust" sling strap with swivels are standard on BDL models.

Along with these features, the Model 700 offers the shooter the same list of extras that have made it the best selling bolt action rifle.

ACCURACY—Like all Remington firearms, the Model 700 is built one at a time by the world's finest gunsmiths. This care assures snug bedding, precision working parts, and a short crisp trigger pull. When you fire a Model 700, you hit what you aim at.

CRAFTSMANSHIP—The traditional beauty of fine checkering is accented with an exclusive, tough, hard, scratch-resistant Du Pont wood finish called RK-W.

EXTRA FEATURES—All Model 700 rifles have Monte Carlo stocks with cheek piece, checkered bolt knobs and detachable sights for scope users. The 700 receiver is drilled and tapped for scope mounts.

To make sure you get the most from this highly accurate and well built rifle, be sure to use Remington-Peters "Core-Lokt" or "Power-Lokt" center fire ammunition. It's the ammunition used to sight-in and test all Model 700 rifles.

MODEL 700 BDL "VARMINT SPECIAL"

For 1971, this heavy barreled varmint rifle is available in six great varmint calibers including the new 25-06 Remington. The Model 700 "Varmint Special" is designed for small target-long range precision shooting. Additional calibers include the 222 Remington, 223 Remington, 22-250 Remington, 6mm Remington and 243 Win. Its heavy barrel eliminates whipping and the result is superb accuracy—enough to put the Model 700 "Varmint Special" in a new accuracy class. It's equipped with scope bases, hinged floor plate, quick release swivels and "quick-adjust" sling strap, Monte Carlo stock with cheek piece, RK-W wood finish and custom checkering.

MODEL 700 "CUSTOM" RIFLE

If you're interested in an "extra special" Model 700, the Model 700 "Custom" is the rifle for you. Available on special order only, the Model 700 "Custom" offers you a choice of tailored specifications. It's available in a variety of calibers and features a select American Walnut stock, hand checkering, a highly polished barrel (with or without sights) and highly polished receiver for the finest blueing possible. The Model 700 "Custom" is the finest in Remington gunmaking.

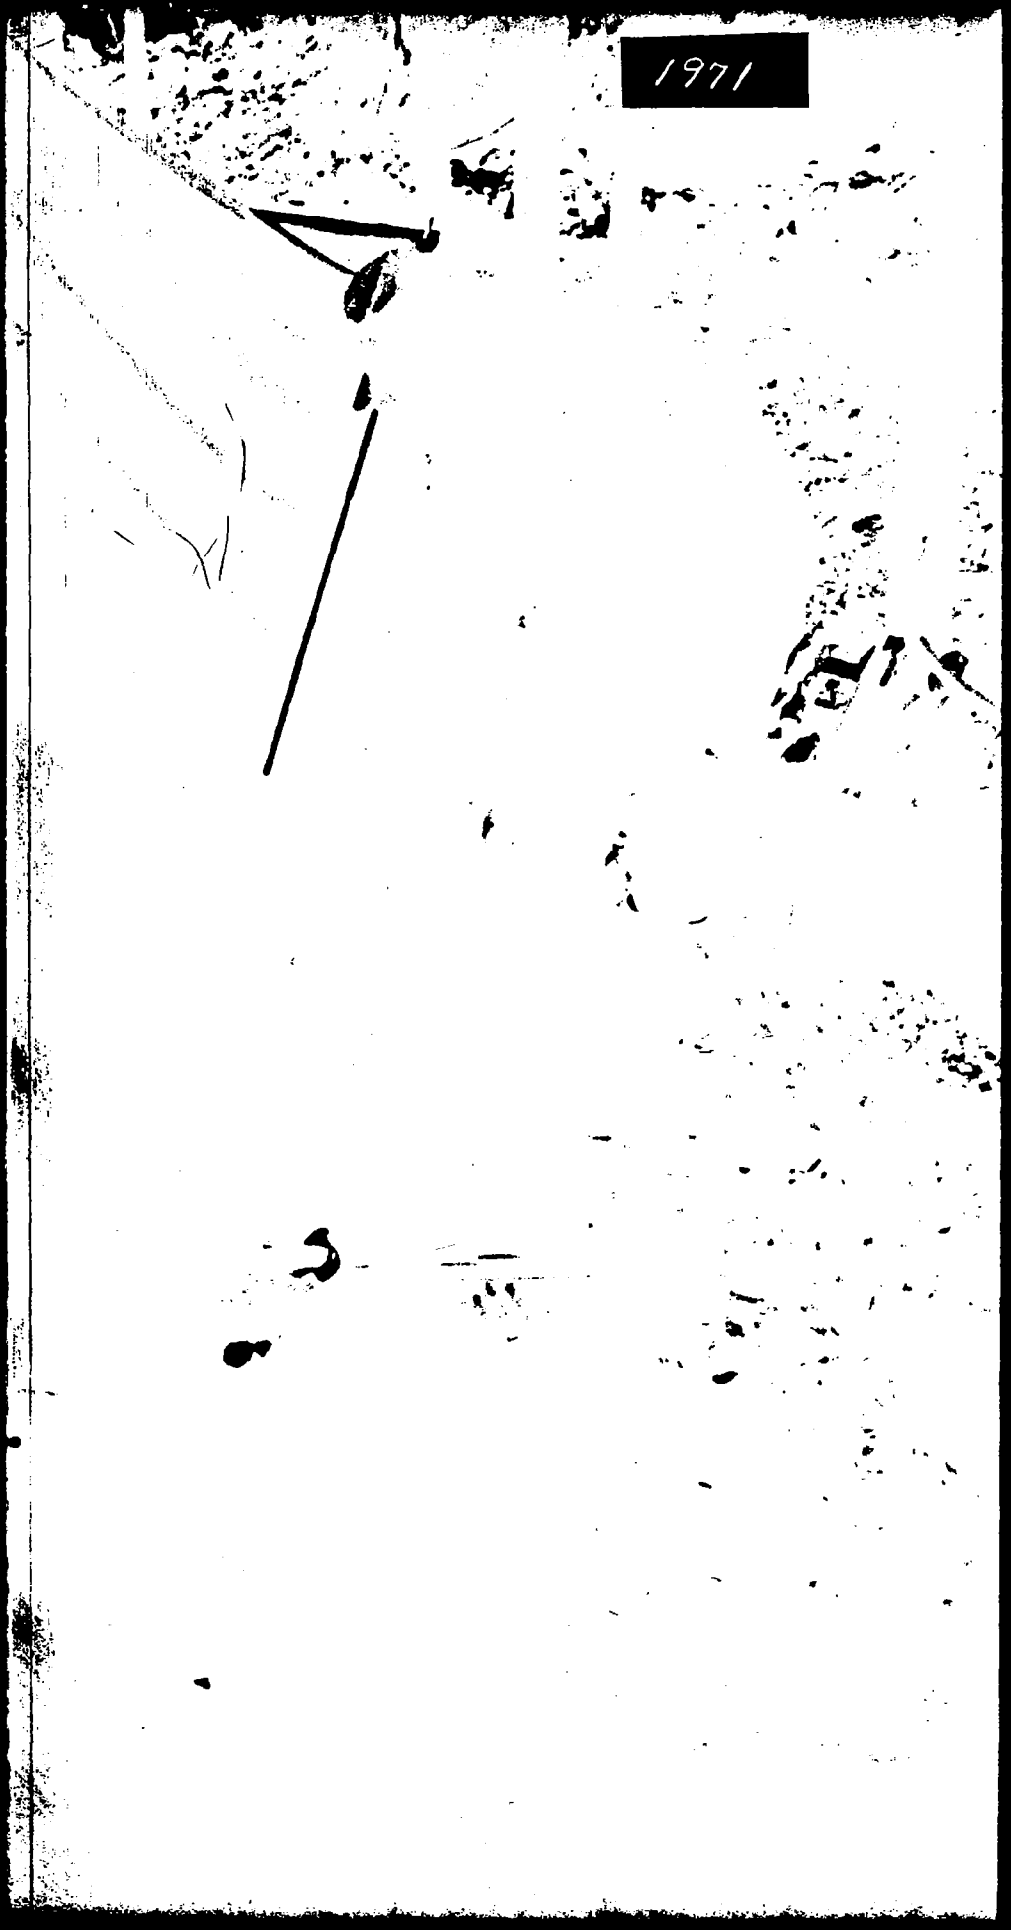
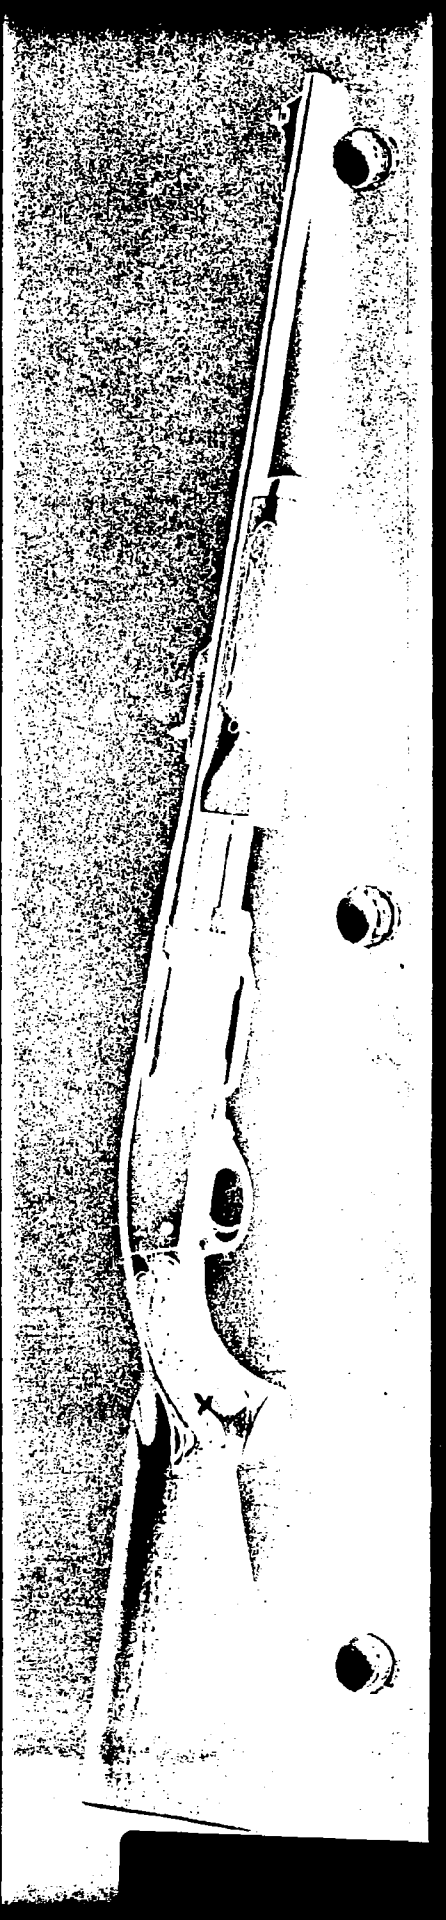
R2525288





R2525289

Model 760 "Gamema[1971]ump Action Rifle, Left* And Right Hand Models- Model 788 Bolt Action Rifle, Left And Right Hand Models-

MODEL 760 "GAMEMASTER"

If you already own a pump shotgun, the Remington Model 760 will feel right the moment you pick it up.

Why? Let's start with the action bars. Model 760 has two of them. When you pump the action, the fore-end doesn't twist or cant. It comes back straight and fast in a comfortable natural movement. Your finger never leaves the trigger as it does in a lever action letting you stay on target for fast additional shots, if they're needed.

Point two. The receiver and interior working parts are put through our exclusive "vibra-finishing" process. They come out mirror smooth and shiny—free from metal burrs that cause sluggish operation. The friction-free parts operate with silky-smooth ease.

Point three. It looks distinctive. All Model 760's have the exclusive gleam that comes from Du Pont RK-W wood finish. They also have distinctive black fore-end tips and grip caps, white line spacers, and streamlined beavertail fore-ends. Standard grades have skip line checkering and the BDL Deluxe grade features basket weave checkering and Monte Carlo stock with cheek piece (available in left hand versions, too). An 18½" barrel carbine version for hunting in heavy brush is also available.

Point four. It's strong. The Model 760 is the only pump action rifle strong enough to handle the powerful 30-06 Springfield cartridge. The secret is in the 760's solid steel receiver and super-strong artillery type bolt.

Add up these four points plus fast, removable magazine clips and receivers that are drilled and tapped for scope mounts, optional left hand BDL models with reversed safety and cheek piece on left side for southpaw shooters, and you'll know why the Remington Model 760 is the quality leader in the center fire pump action field.

THE REMINGTON MODEL 788 BOLT ACTION RIFLE— EXTREMELY ACCURATE, EXTRA STRONG, AND UNBELIEVABLY INEXPENSIVE.

These statements are all true. In just four years, the Model 788 has built up a tremendous reputation among hunters and shooters.

It was built for the sportsman who wanted a low price big game rifle in popular, modern cartridges. The 788 gave him that in both left and right hand models.

The Model 788 was also designed to give good accuracy. It delivered that plus. Take the outdated 30-30 for example. The 788 shot groups with this cartridge that could have put it in the far more expensive target rifle class. Try the Model 788 in 22-250 or 6mm Remington and you'll see what pin-point accuracy is like.

The unusual accuracy of the Model 788 comes from its extremely fast lock time (the interval between pulling the trigger and primer ignition). The lock time is so fast that the bullet has left the 788's barrel before a comparative bullet in a competitive gun has left the cartridge case.

In short, the trigger pull is crisp, with no drag, and that means you'll hit what you aim at.

To handle the potent 22-250 Remington, the Model 788 had to be strong. The secret of the 788's strength is in the nine locking lugs on the bolt and the grooved receiver. Together, they lock up tight and secure.

With terrific accuracy, extra strength, and a low price going for it, the Model 788 is a tough rifle to beat.

You can't beat Remington-Peters big game cartridges either. They're the cartridges used to test and sight in all 788's and 760's at the factory. These rifles, combined with Remington-Peters big game cartridges are "Partners in Power and Accuracy."

1971

R2525293

Remington Models 5[illegible] 1971 592 Chambered [illegible]or The 5mm Rem. Rim Fire Magnum. Model 572 Pump Action 22 Caliber Rim Fire.

[illegible]ODELS 591 and 592 [illegible]riced from $69.95

[illegible] Remington Models 591 clip repeater and [illegible] tubular repeater bolt action rifles are [illegible]hambered for the sensational 5mm Remington [illegible]m fire magnum cartridge. Why sensational? [illegible]n these reasons. It's the fastest rim fire [illegible]artridge ever made (muzzle velocity 2100 [illegible] per second)—the most accurate rim fire [illegible]ting cartridge and the only rim fire cart- [illegible] made with the super accurate "Power- [illegible]" bullet. It looks like a center fire cartridge [illegible]t has the accuracy of a center fire cartridge [illegible]reat for small game, varmint hunting, and [illegible]ormal target shooting. Other outstanding [illegible]ures of the Models 591 and 592 are:

SIX EXTRA HEAVY ROTARY LUGS on bolt engage grooves in the solid steel re- [illegible]er. Together they lock up tight, like a bank [illegible]lt. Here is extra strength to handle the [illegible]werful 5mm Remington rim fire magnum [illegible]rtridge. BOLT COVER at rear keeps out [illegible]t and grit. UNIQUE TWO STAGE EX- [illegible]RACTOR permits the bolt to completely enclose the cartridge head—assures utmost safety. FULL SIZE Monte Carlo stock with pistol grip looks and feels like a center fire rifle. SIGHTS are rugged, similar to those on big game rifles. Bead front sight and U notch—lock screw rear. ROUND RECEIVER means bedding into the stock can be more precise which, in turn, contributes to fine accuracy. The receiver is also grooved for tip-off scope mounts. ORDNANCE STEEL BARREL is precision rifled, crowned at the muzzle, polished and blued for good looks and long wear. NON-SLIP THUMB SAFETY is conveniently located at the right rear of the receiver. Positive safety—forward for fire, rearward for safe. Marked "F" for fire; "S" for safe. MATCH TRIGGER QUALITY—A good trigger pull is an important asset to any rifle. The lock time of the Models 591 and 592 is the fastest of any rim fire made today. What's lock time? It's the length of time, measured in milliseconds, between the release of the trigger sear and instant ignition. This means better accuracy, no trigger movement to pull the gun off target.

MODEL 572 "FIELDMASTER" PUMP ACTION Priced from $69.95

For the shooter who likes a pump action 22 caliber rifle, the "Fieldmaster" Model 572 is best...action is slick and smooth. Exclusive cartridge feeding design prevents jamming, permits easy single loading. By simply removing the inner magazine tube, parent or instructor can convert the "Fieldmaster" into a single shot rifle. Receiver has dovetail grooves for "tip-off" scope mounts. Capacity is large; tubular magazine holds 20 Short, 17 Long or 15 Long Rifle cartridges. It has a cross bolt safety conveniently located at the rear of the trigger guard where it can be snapped on or off with the index finger. The Model 572 is beautifully streamlined and balanced—rugged and dependable like Remington big game rifles and shotguns. BDL deluxe models feature extra tough RK-W wood finish, custom checkering, grip cap, and big game type sights.

[illegible] REMINGTON MAGNUM

[illegible]able in both Remington and Peters brands, the 5mm Remington Magnum has a 38 grain [illegible]ower-Lokt" hollow point bullet. Needle point accuracy with perfect expansion goes hand in [illegible]and. The fastest rim fire cartridge ever and the hardest hitting with more energy, less drift, [illegible]reater accuracy, superior mushrooming.

R2525295

Remington Bolt Act 1971 Caliber Rifles... Models 580, 581, And 582, Left Hand Model 581, New Model 580 "Boys' Rifle"-

Models 580 Single Shot, 581 Clip Repeater and 582 Tubular Repeater.

ese 22s have the look, feel and balance of game center fire rifles—plus the strongest, st powerful bolt ever designed into a 22 iber hunting rifle.

The 580 series features an artillery type lt with rear lock-up. What does that mean ean? It means brute strength. When the closed on the cartridge, six rotary lock- gs are engaged in a grooved receiver. hen, they lock up tight—bank vault That's more strength than you'll ever The pressure is on ordnance steel locked ordnance steel not on a bolt handle locked o a wooden stock. Try the action. It's silky- ooth, solid, secure and extra strong.

The new 580 "Boys' Rifle" has all the fea- es of the standard model 580 but the stock " shorter for the young shooter.

A left hand Model 581, with the bolt olle on the left side is available for south- shooters. It's the only left hand bolt action rim fire rifle made in America and it's another first from Remington.

Other great features of this super strong rim fire series include:

HUNTING-TYPE TRIGGER that's wide and has a crisp, sharp, clean trigger pull without drag. That means when you pull the trigger, you hit what you aim at. Another plus feature is a big, sturdy trigger guard that's roomy enough to handle a gloved finger.

FULL SIZE MONTE CARLO STOCK with pistol grip looks and feels like a center fire rifle. It assures a snug, comfortable cheek-to-stock fit and that means more hits with or without a scope. The fore-end is long, tapered and man-size to prevent canting giving you a good secure grip.

NON-SLIP THUMB SAFETY is conveniently located at the right rear of the receiver. It gives you positive safety—forward for fire; rear-ward for safe.

DUAL EXTRACTORS give a two-handed grip on the cartridge to make sure ejection is fast and smooth without jamming.

SIGHTS are rugged, similar to those on big game rifles. Bead front sight and U notch adjustable rear sight with lock screw.

ROUND STEEL RECEIVER makes stock bedding more precise and, in turn, contributes to fine accuracy. It's also grooved for "tip-off" scope mounts.

BOLT COVER keeps dirt, grit and bad weather out assuring smooth operation inside. It also gives the gun the streamlined look of a center fire big game rifle.

FOR THE BEST in accuracy and dependability, use Remington-Peters 22 caliber cartridges...the same cartridges used to test these rifles at the factory.

Put all of the 580 series features together and you will know what competition is shooting for.

R2525297

Remington Nylon 66, Nylon 77 and Model 552 Automatic 22 Caliber Rim Fire Rifles.

1971

LON 66 AUTOMATIC
ced from $59.95

he "Lightweight" 2 Caliber Automatic hat Set World's Record.

ese are facts! In 12 years, this 22 automatic s built an outstanding record for consumer ceptance. It's tough because it's made of per strong structural nylon that won't warp, k, fade, chip or peel, and that's backed up guarantee for the life of the rifle.

The Nylon 66 is an endurance and ac- champion too. It was used to establish orld's record on hand thrown 2¾" wood cks — 100,000 of 'em and only six misses hout a malfunction. With a record like that mind it, hitting targets, tin cans, and small me will be easy.

The unique interior design of this 4 lb. tomatic combines steel and nylon for ction-free operation. Lubrication is elimi- ted because parts glide on greaseless nylon rings.

Distinctive functional checkering assures ure handling even in the roughest of conditions and the convenient top-of-grip safety gives instant control for any type of quick shot.

The Nylon 66 also comes in a deluxe Apache Black model. The stock is made of DuPont Zytel black nylon and the receiver and barrel are chrome plated to give a striking appearance. In performance and reliability, it's the same as the Mohawk Brown model.

If you're looking for a 22 automatic that's accurate, tough, and dependable, the Nylon 66 is just the ticket.

NYLON 77 CLIP AUTOMATIC
Priced at $54.95

In direct response to the success of the Nylon 66, Remington introduced the clip-fed Nylon 77 automatic 22 rifle. It's designed for fast action shooting and is the perfect answer for a shooter who wants a gun that loads and unloads fast and easy.

Fast shooting and rugged handling was the basic idea, it had to be tough. The 77 has a tough nylon stock that won't crack, warp, chip, fade, or peel and that statement is backed by a "replacement free guarantee" for the life of the rifle.

With a weight of only 4 lbs. and removable clip magazine, the Nylon 77 is the perfect answer for looks, feel, balance, and fast accurate shooting.

MODEL 552 "SPEEDMASTER" AUTOMATIC
Priced from $69.95

The Model 552 is the "all around gun" in the Remington line of automatic 22 rifles. This fast shooting, well balanced, highly accurate 22 automatic handles shorts, longs, and long rifles with no trouble or adjustments. It's one of the Remington "family" of guns because it's designed like another superior performer — the Model 742 big game automatic rifle. Special features on the Model 552 include twenty shots as fast as you can squeeze the trigger, cross bolt safety, and grooved receiver for "tip-off" scope mounts. A short 21" barrel carbine version and a Gallery Special are also available. The BDL Deluxe version has custom checkering, RK-W wood finish, and big game type sights.

Ask your dealer to show you a Remington Model 552. It's the rifle that feels right because it's made right.

To make sure these trouble-free automatics remain that way, use the ammunition they were built and tested with — Remington-Peters 22's.

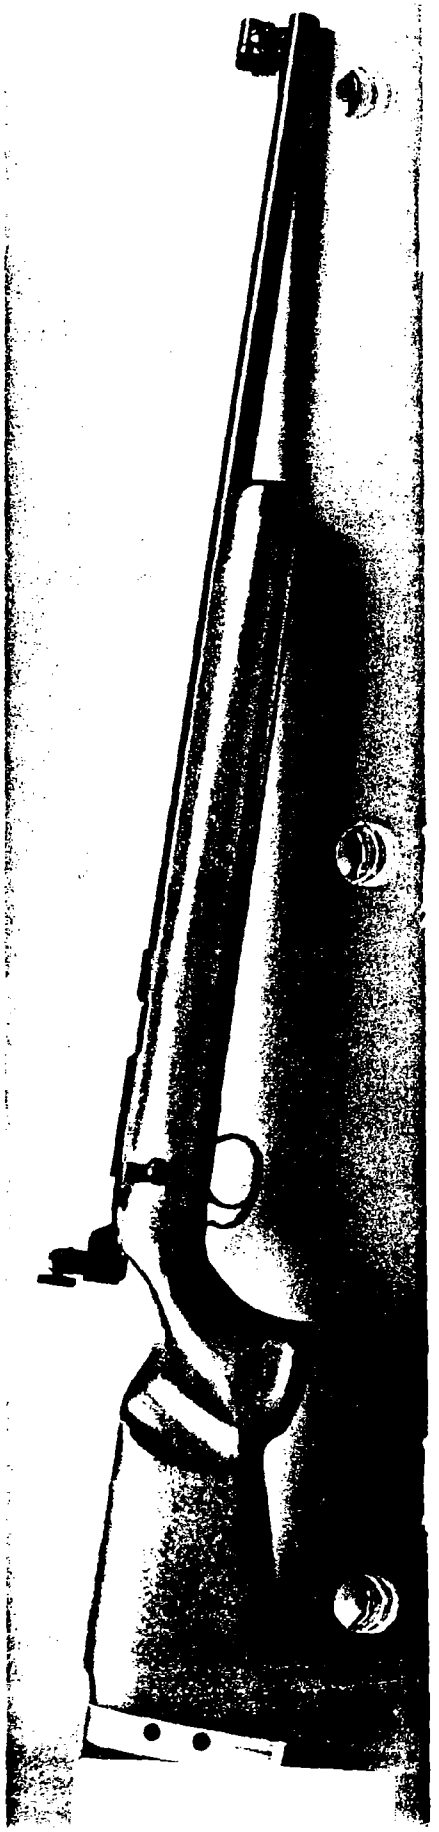
1971



Remington Models 40XB "Rangemaster," 40XB-BR Bench Rest Target Rifles... Model 540X 22 Caliber Match Target Rifle... International Free Rifle.

1971

MODEL 40XB "RANGEMASTER" (RIM FIRE MODEL)
Priced from $199.95

Exclusive loading platform provides straight line feeding; no shaved bullets. High comb gives same sighting plane for iron and telescope sights. Comb is grooved for bolt removal. Mershon White Line non-slip rubber butt plate, adjustable sling swivel and handstop are standard equipment. Other features include extra strong bolt with double extractors, adjustable trigger with positive adjustments for weight of pull, wide trigger for more uniform control and comfort, thumb operated safety. The receiver is drilled and tapped for all standard rifle mounts, telescope and metallic Redfield Olympic front and rear sights optional. A low long rail for the adjustable fore-end stop and palm rest makes shooting good scores easier.

MODEL 40XB "RANGEMASTER" (CENTER FIRE MODEL)
Priced from $249.95

Available in repeating models for use in National Match Courses, the 40XB is designed with clip slots for the conventional five shot clip. (Available in heavy barrel models only). It loads from the top of the receiver and the magazine has a hinged floor plate. Repeating models are provided only in calibers equal to or shorter than the loaded length of the .308 cartridge.

The 40XB center fire repeating rifle is ideal for the rapid fire events, especially in the 7.62mm NATO (308) caliber, because of its shorter bolt throw and extreme accuracy. This is its optimum weight for "over the course" competition.

As a single shot model, the Remington Model 40XB center fire is offered in a variety of center fire calibers as listed in specifications. The action is hand bedded and the barrel is free floating. The 40XB meets the National Bench Rest Association rules for the Heavy Varmint Class with most target telescopes. (Max. weight 13½ lbs.) Stainless steel barrels are supplied as standard on all magnum and varmint calibers except 222 Rem., 222 Rem. Mag., 223 Rem., 308 Win. and 30-06 Spfd. Stainless 40XB barrels are not blued. 40XB "Sporter" (22 long rifle version of Model 700 "Custom") available on special order.

MODEL 40XB-BR BENCH REST (CENTER FIRE)
Priced at $289.95

Built with all the features of the extremely accurate Model 40XB-CF but modified to give the competitive bench rest shooter a standardized rifle that provides the inherent accuracy advantages of a short (20") heavy, extremely stiff barrel. Wider, squared off fore-end gives a more stable rest on sand bags or other supports. In combination with the new Remington target scope, the resulting package weighs just under 10½ lbs. and meets weight limitations for the sporter and light varmint classes of National Bench Rest Shooters Association competition. For shooters competing in the heavy varmint class, a 13½ lb. 26" barrel version is available.

REMINGTON 20 POWER TARGET SCOPE
Priced at $169.95

Remington's new 20 power rifle scope is designed primarily for accuracy in critical bench rest shooting. Its relatively short length permits fore and aft receiver mounting, and eliminates the need of a forward mounting on the barrel. Produced in 20 power only, the target scope contains optics of the highest quality. Because of its lighter weight, shooters have greater flexibility in assembling rifle and scope combinations to meet National Bench Rest Shooters Association weight limitations.

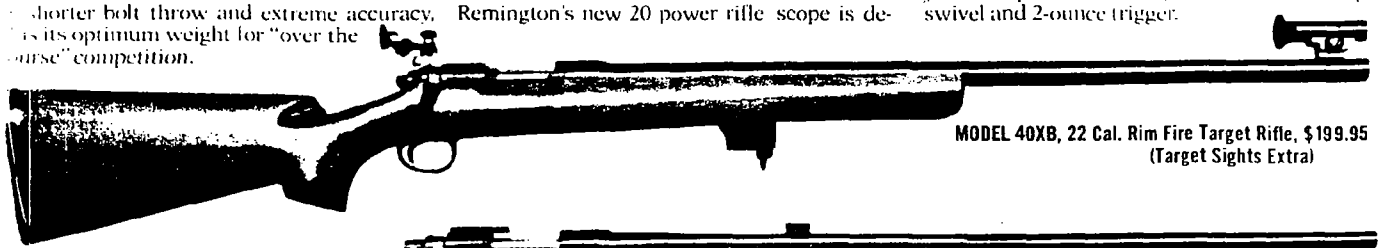
MODEL 540X MATCH TARGET RIFLE
Priced from $99.95

The Model 540X has all the design features and special attachments to make it the most accurate target rifle in its class. Designed for the intermediate and junior shooter, the Model 540X is super accurate, well balanced, and loaded with extras. To continually punch holes in the X ring with any rifle, you need a gun with a good crisp trigger pull. The 540X has a fully adjustable trigger that does exactly that. The secret's in its fast lock time.

A unique feature of this rifle is its five-way adjustable butt plate. The stock can be adjusted with the same wrench for length of pull, vertical, pitch or cant (left or right).

INTERNATIONAL FREE RIFLE (RIM FIRE AND CENTER FIRE)
Priced at $395.00

The International Free Rifle features the 40XB action, precision heavy barrel, a Remington designed adjustable butt plate and hook, adjustable palm rest, adjustable front sling swivel and 2-ounce trigger.



MODEL 40XB, 22 Cal. Rim Fire Target Rifle, $199.95

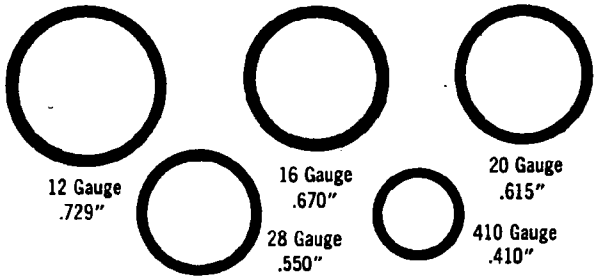
0	.32	145
00	.33	130

GAUGES—Shotguns are made in several well-known gauges, 12, 16, 20, 28 and 410. Other gauges have been made in the past but are not at present in common use. These include 4, 8, 10, 14, 24 and 32 gauges.

The unit of gauge measurement is based on numbers of uniform lead balls weighing one pound. 12 gauge is approximately the diameter of a lead ball of which 12 weigh one pound, 16 gauge is the diameter of a lead ball of which 16 weigh one pound, etc. The one exception is 410 gauge, which is actually 410 caliber. In terms of gauge, it would be 67 gauge. Measurements of minimum bore diameters in thousandths of inches are as follows:



SHELL LENGTH is measured in inches, in terms of the overall length of fired shell, with the crimp open. A 2¾" shell measures about 2 1/2" to 2-5/8" before it is fired, but 2¾" overall after firing. This method of measuring has been adopted to conform to standard chamber lengths of shotguns. A gun with a 2¾" chamber will thus handle shells of the proper gauge up to 2¾" length.

PATTERN—Pattern is the spread of shot pellets at any given yardage. All loads with the exception of 410 and skeet are tested for pattern at 40 yards. 410 and skeet loads are tested at 25 yards. The percentage of the total shot charge registering within a 30" circle (20" for 410) at these distances determines the quality of a pattern. No two patterns will be exactly the same. Average results should be taken from at least 25 patterns.

CHOKE—Choke is partial constriction of the bore of a shotgun barrel at the muzzle end. Its purpose is to control patterns. By using different degrees of choke boring, it is possible to control the spread of the shot charge for the best distribution of pellets at various ranges. For example, the bore diameter of a 12-gauge gun is .729". If the diameter at the muzzle end is reduced to .694", the constriction of .035" (difference) will control the shot sufficiently to give patterns averaging about 70% of the shot in a 30" circle at 40 yards. This is known as full choke boring, and is intended for long range shooting. The following table shows the percentage of shot that can be expected in the various choke borings:

CHOKES	% at 40 yards in 30" circle
Full Choke	70
Modified Choke	60
Improved Cylinder	50
Cylinder	40

CHOKE USES—A shooter should select the degree of choke boring for his barrel according to the range at which most of his shots are taken. Some kinds of birds and small animals are usually shot at close range, others at long range. Also, some persons are inclined to shoot quickly, while others tend to "ride" their game or targets. Most hunters find the following borings give the best results, though much depends on shooting conditions and personal preferences.

Full Choke.....ducks, geese, pheasant, crows, turkey, fox, racoon, trap shooting.

Modified Choke.....rabbit, woodcock, doves, squirrels, also all-round usefulness including ducks, quail, etc.

Improved Cylinder, Special Skeet.....quail, grouse, partridge, rail, skeet shooting.

BARREL LENGTH—Shotgun barrels are usually supplied in 26, 28, and 30 inch lengths; also 20 and 26 inch lengths with rifle sights. The longer barrels are often preferred for long range shooting because the greater length gives a longer sighting radius, permitting more accurate pointing. Long barrels also minimize discomfort of muzzle blast, and the added weight reduces recoil. Short barrels are often preferred for close range shooting because they are easier to handle for quick shots, especially in heavy brush.

It is not practical to cut off a shotgun barrel. To do so will change the shooting qualities of the gun because the choke constriction is within the last two inches at the muzzle end. It is also impractical to cut down the length of the barrel and then attempt to restore the original degree of choke boring because the metal necessary for this will already have been reamed out at the time of manufacture.

A barrel may be rebored from one degree of choke to a more open degree, full to modified, modified to improved cylinder, etc., as long as the barrel length is left unchanged.

Remington Model 1100 Automatic Shotgun...
12, 16, 20, 28 & 410 Gauges.
New Left-Hand Models...12 & 20 Gauges.

Remington has been making automatic shotguns since 1905. This makes us the oldest and most experienced automatic shotgun manufacturer in America. In 67 years, one thing stands out in the Remington automatic shotgun line—each gun was built for an individual shooter. It fit his needs and did what he wanted it to do. Those needs have been watched and studied since 1905, and today a shooter can choose from many variations and specifications. When you buy a Remington Model 1100, you don't have to settle for something close to what you need, you get exactly what you want.

NEW LEFT-HAND MODELS IN 12 AND 20 GAUGES

For 1972, Remington has added two new models to the long list of Model 1100 specifications. The new 12 and 20 gauge left-hand Model 1100's are true mirror-image guns. They're the perfect answer to the southpaw or left-master-eyed shooter who is bothered by ejecting hulls from right-hand automatic models. Regardless of what shoulder you shoot from, the Model 1100 will give you the dependability shooters have come to expect from Remington.

VERSATILITY—There's a Model 1100 made for all types of shotgun shooting. Whatever you hunt or shoot, an 1100 will "fill the bill". Models include: a 20 gauge lightweight, a 20 gauge lightweight magnum, 3-inch 12 and 20 gauge magnums, field grade models in 12, 20, 28 and 410 gauge, deer guns with rifled sights, trap and skeet, and new left-hand models.

DEPENDABILITY—In all kinds of weather, with all kinds of loads, the standard 1100 will give you superior performance. Its gas metering system is designed to operate with all types of shotgun shells making it possible for you to hunt a variety of game with the proper ammunition. This unique design enables the shooter to use all 2¾" standard velocity, "Express" and 2¾" magnum loads without any gun adjustments. Barrels, within gauge and similar chamber lengths, are interchangeable in seconds. No factory fitting is required. (Left-hand interchangeable barrels are not presently available.) This beefed-up, gas-operated shotgun has a greatly extended shooting life. It'll still be shooting long after less rugged automatics have worn out. For extra dependability, be sure to use Remington or Peters shotgun shells—the same ammunition used in developing and testing all Model 1100's at the factory.

RECOIL—There really isn't much. As a matter of fact, the correct word to use is "push." The 1100 gives less "kick" than any other shotgun action. Your shoulder feels a "push" rather than a "punch."

APPEARANCE—In order to be a best-selling product, it must look the part. The 1100 does ...and for many reasons. The solid steel ceiver features decorative scrollwork. Its d rich blueing (outside and in) is improved our metal-smoothing "vibra-honed" finishing process. DuPont-developed RK-W wood finish gives a gleam that is tough and scratch-resistant. White line spacers and a teardrop pistol-grip cap do not make the 1100 shoot any better, but they give you that "pride of ownership" feeling.

R2525308

1972

The new Model 870 "Wingmaster" 20 gauge lightweight is Remington's answer to hunters who have continually asked for a solid steel receiver in a 20 gauge lightweight pump. This streamline beauty is built on a small s[illegible] receiver and is furnished with a lightwei[illegible] mahogany fore-end and stock with rubber re[illegible] coil pad.

The 870, 20 gauge lightweight magnum model has all the above features plus a 3-inch chamber which enables the shooter to interchangeably use 3" and 2¾" magnums, *plus* regular high and low base 2¾" shotgun shells.

The Model 870 "Wingmaster" 20 gauge lightweight is designed for the sportsman who does a lot of walking when he goes afield. He's also the type who shoots a lot on these long hunts and he knows how weight can affect his performance. We've cut down on the weight, but not the performance. The 26" plain barrel model weighs only 5¾ lbs.

The Model 870 is presently being used by over a million sportsmen. It's built to take the rough use that often comes with hunting and shooting. The receiver is machined from a solid piece of ordnance steel to give the 870 extra strength – the strength to handle powerful magnum ammunition.

The Model 870 has double action bars (they're the two rails – one on each side of the fore-end). These double action bars let you pump the Model 870 smoothly, shot after shot, without twisting or binding. That's double insurance that the 870 will feed and eject properly under all shooting conditions.

The Model 870 will also shoot all 2¾" standard velocity, "Express," and 2¾" magnum shells without adjustments. The 12 gauge 3-inch magnum can shoot all 12 gauge ammunition without problems, giving you a selection of different loads and a large selection of shot sizes.

If you are planning to hunt different types of game, the Model 870 makes barrel changing fast and easy with instantly interchangeable barrels within gauge and chamber length. No factory or gunsmith fitting is necessary. In the 12 gauge alone, you can choose from 17 different choke and barrel length combinations.

The Remington Model 870 has a modern look, too. Remington uses a metal finishing treatment called "vibra-honing," which gives a deep, rich blue to all metal parts both inside and out. The inside parts glide smooth and easy, and the blueing bonds to the outside with a deep, rich luster. The quality of the metal finish is also carried to the wood with a Du Pont wood finish called RK-W. This finish, similar to the finish used on bowling pins, is tough, hard and scratch-resistant and will hold up for years of hard outdoor use. The shine of the wood and the luster of the metal are accented by white line spacers on the recoil pad, butt plate and pistol grip, making the 870 one of the most attractive guns on the firearms market today.

No matter what type game you hunt, the Model 870 has the right grade and specifications to suit your needs. Models include Field grades in 12, 16, 20, 28 and 410 gauge, deer models, trap and skeet, left-hand models, 12 and 20 gauge magnums and 20 gauge light weights (magnum and regular).

Remington Model 870 "Wingmaster" Pump Action Shotgun... 12, 16, 20, 28 & 410 Gauges. New 20 Gauge Lightweight.

NEW 870 "ALL-AMERICAN" TRAP GUN

America's oldest gunmaker is pleased to introduce what we believe to be the finest pump action shotgun we've ever manufactured.

The 870 "All-American" trap gun includes many of the features found on $1,000 and higher Remington "Premier" models. The receiver is engraved with a scroll design and accented by an elegant color medallion. The engraving is carried still further to the trigger guard, bolt and a portion of the barrel. A rich American walnut stock and fore-end features fine checkering in a unique high grade pattern. The gold oval grip can easily be engraved with the owner's name or initials. A Protecto" hard trunk-type carrying case is "standard equipment" with the 870 "All-American" and furnished with this model.

NEW LEFT-HAND MODEL 1100 TRAP AND SKEET GUNS

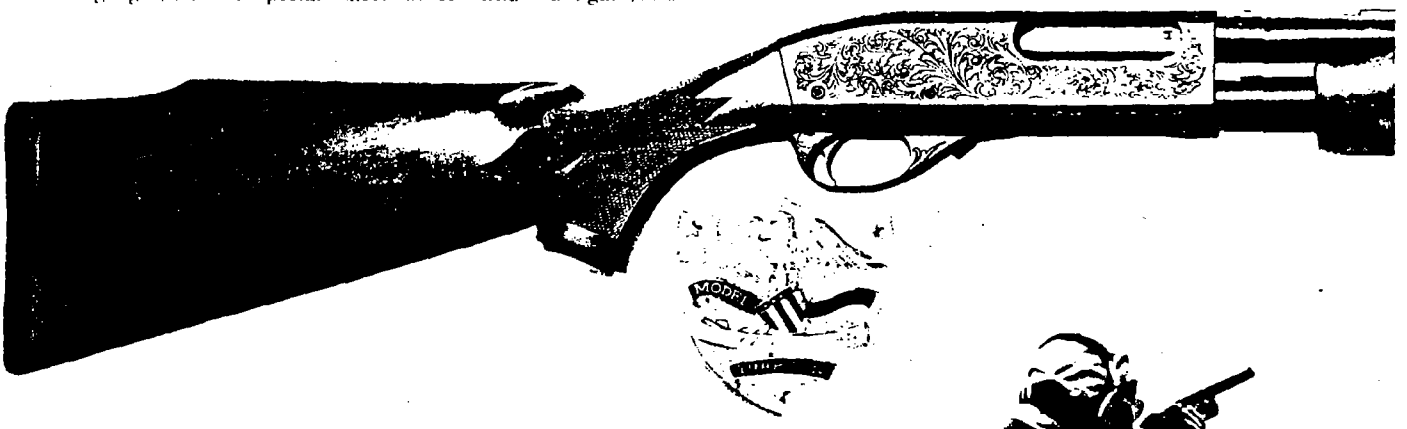
New for 1972 are true mirror-image left-hand Model 1100 trap and skeet guns. These models were designed and engineered for the left-hander or left-master-eyed clay target shooter who previously had shot a standard automatic and was bothered by ejecting hulls. We've eliminated this problem with our new left-hand 1100's.

SKEET—The Remington Model 1100 skeet gun was used by more competitors than any other model in the 1971 World Skeet Championships.

In fact, Remington automatics were used by three of the four open champions in the 410, 28, 20 and 12 gauge events, *plus* the High Overall Championships. Our Model 1100 SA is the big skeet favorite. It doesn't have the fancy wood our Deluxe SB grade has, but it's not as expensive, either, and shoots just as well. The SA grade is available in 410, 28, 20 and 12 gauges, all with special "skeet"-bored bar 1972 ceivers and built-in dependability. The Model 870 "Wingmaster" SA and SC skeet is just the ticket if you enjoy the feel of a pump action. The SA version is chambered for 410, 28, 20 and 12 gauge shotgun shells.

TRAP—It's not uncommon for a trapshooter to shoot four or five thousand shells a year through one gun. Clay target busters are quick to recognize that the 870 is built to withstand this type of use. Double action bars prevent twisting and binding and a solid steel receiver insures utmost safety and dependability. The 870 is available in a variety of barrel lengths, both full and modified chokes. The TB grade (our economy model) offers all of the features of our most expensive TC grade with the exception of fancy wood and hand checkering. Monte Carlo stocks are optional on both models. The Model 1100 TB trap grade is our gas-operated automatic you've heard so much about. In a little over eight years this gun has become the predominant favorite among trapshooters who prefer an automatic. Why do some prefer our automatic over other types of actions? RECOIL is one big reason. Actually the Model 1100 has less "kick" than any other shotgun action, and when you're shooting at 300 or so targets a day, body fatigue could mean the difference between winning or losing. DEPENDABILITY is another big reason why so many shooters use and prefer the Model 1100. It works. And not only with factory loads, either. Many reloaders have won major championships with the Model 1100 shooting their "home-brewed" loads. Full and modified chokes are available in a variety of barrel lengths. Monte Carlo stocks are optional.

All Remington Model 1100 and 870 trap and skeet guns are tested at the factory with Remington-Peters target load ammunition. For championship performances in clay target events, we recommend their use regardless of what make gun you shoot.



Remington Trap and Skeet Guns... Models 870 and 1100. New 870 "All-American" Trap Gun.

REMINGTON 742 "WOODSMASTER"

We introduced the first automatic rifle in 1906, and Remington engineering is still giving sportsmen the ultimate in automatic shooting.

The Model 742 is engineered for the ultimate in dependability. It's built for the outdoors and weather conditions nature offers.

THE MODEL 742 IS ENGINEERED FOR STRENGTH. When the action is closed, you get a lock-up as tight and strong as a bank vault. Its strength comes from an artillery-type bolt with multiple locking lugs that lock bolt to barrel as tight as Remington engineering knowledge can make them.

We carry this strength even further. When the bolt is locked on the cartridge head, it gives you three rings of steel strength—the bolt, the barrel and the receiver. The result is a cartridge head that's locked in tight and surrounded by triple steel strength.

THE MODEL 742 ALSO GIVES YOU DEPENDABILITY AND TROUBLE-FREE FUNCTIONING. Its fast, gas-operated action soaks up recoil and keeps you on target for extra shots (if you need them). The interior working parts are coated with friction-reducing Du Pont TEFLON "S" to give longer wear, self-lubrication, and rust and oil resistance to make cleaning easier. For reliable functioning, we recommend you use Remington-Peters "Power-Lokt" or "Core-Lokt" ammunition—the same ammunition used to develop and test all Model 742's.

THE MODEL 742 GIVES YOU DISTINCTIVE LOOKS AND VERSATILITY, TOO. Remington's "vibra-honing" metal-finishing process assures a deep, rich blue on all metal surfaces both inside and out; parts have smooth and easy. The blueing bonds with a rich luster found only on far more expensive firearms.

The gleam of a 742 stock and fore-end comes from Du Pont RK-W finish, which is similar to the finish used on bowling pins. It's tough, rust and scratch-resistant and holds up in rough weather and hard usage.

For selection, the Model 742 offers you five great hunting calibers. The distinctive ADL standard grade, BDL "Custom Deluxe" grade with beautiful basket weave checkering and Monte Carlo stock with full cheekpiece, BDL "Custom Deluxe" left-hand version with reversed safety, 18½" barrel carbine version for hunting in brush and rough country are all available at popular prices. Special D "Peerless" and F "Premier" grades are available on special order. All models have distinctive black fore-end and grip caps, fast-loading clip magazines, a convenient bolt release and are drilled and tapped for scope mounts. Add all of these features together and you'll know why its name is "Woodsmaster."

Model 742

SPECIFICATIONS: CAPACITY—4 in clip magazine plus one in chamber. **STANDARD STOCK DIMENSIONS**—Stock and fore-end: American walnut. 13⅜" length of pull, 2⅛" drop at heel, 1⅝" drop at comb. R2525316

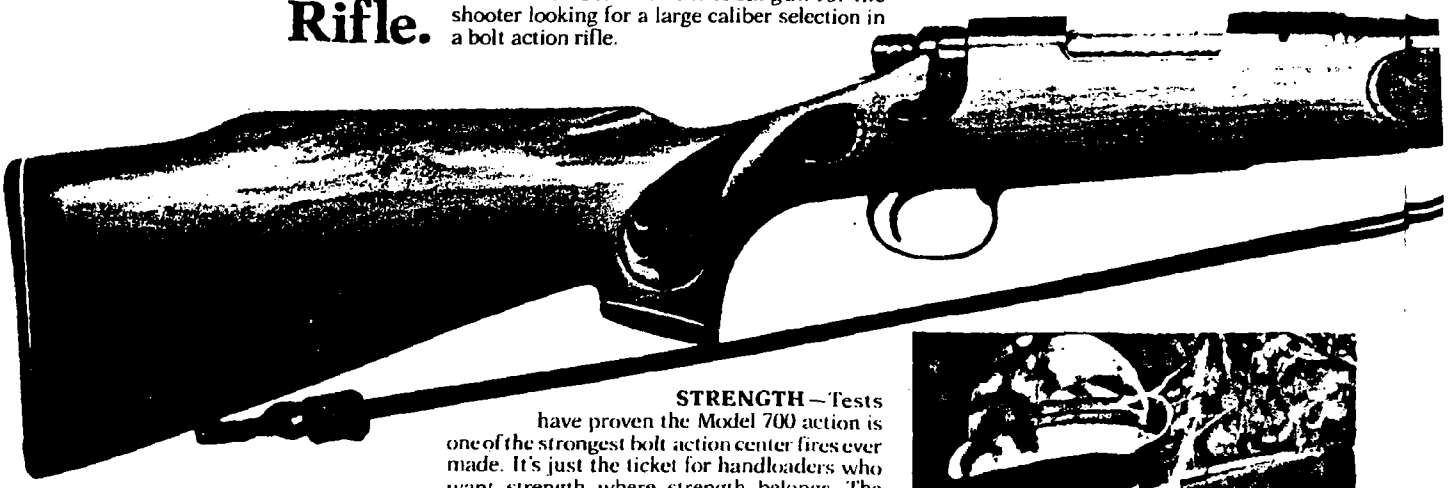
Remington Model 700 Center Fire Bolt Action Rifle.

If you 1972 n rifle that's rugged, depend[illegible] accurate, distinctive and available in a dozen or more calibers...you want a Remington Model 700.

You can choose from 17 different calibers, including the hottest, and the smallest commercially loaded center fire cartridge—the 17 Remington. This 4,000-plus-feet-per-second cartridge is just what the varmint-small-game-accuracy shooter has been looking and waiting for.

The Model 700 offers a caliber selection unmatched in the industry. It has a caliber for every type of hunting from varmints to elephants—seven magnum calibers and seven varmint calibers. It's the ideal gun for the shooter looking for a large caliber selection in a bolt action rifle.



STRENGTH—Tests have proven the Model 700 action is one of the strongest bolt action center fires ever made. It's just the ticket for handloaders who want strength where strength belongs. The secret is in the three rings of solid steel that surround the cartridge head. There are no extractor cuts to weaken this critical area.

APPEARANCE—The Model 700 has the appearance of a far more expensive rifle. The distinctive ADL grade has a jeweled bolt and a shrouded bolt cover to help keep out dirt and grit, a restyled stock with attractive checkering to improve pointing, balance and grip, and a unique low profile safety that will not accidentally move on or off. White-line spacers at the butt plate, fore-end tip and pistol grip, and "quick-adjust" sling strap with swivels and a hooded front sight are standard on BDL models.

Along with these features, the Model 700 offers the shooter the same list of extras that have made it the best-selling bolt action rifle.

ACCURACY—Like all Remington firearms, the Model 700 is built one at a time by the world's finest gunsmiths. Its design was used as the basis of our 40-XB Bench Rest competition model.

CRAFTSMANSHIP—The traditional beauty of fine checkering is accented with a tough, hard, scratch-resistant Du Pont wood finish called RK-W.

EXTRA FEATURES—All Model 700 rifles have Monte Carlo stocks with cheekpiece, checkered bolt knobs and detachable sights for 'scope users. The 700 receiver is drilled and tapped for 'scope mounts.

To make sure you get the most from this highly accurate and well-built rifle, be sure to use Remington-Peters "Core-Lokt" or "Power-Lokt" center fire ammunition. It's the ammunition used to test all Model 700 rifles.

MODEL 700 BDL "VARMINT SPECIAL"

This heavy-barreled varmint rifle is available in six great varmint calibers including the 25-06 Remington. The Model 700 "Varmint Special" is designed for small-target, long-range precision shooting. Additional calibers include the 222 Remington, 223 Remington, 22-250 Remington, 6mm Remington and 243 Win. Its heavy barrel eliminates whipping and the result is superb accuracy—enough to put the Model 700 "Varmint Special" in a new accuracy class. It's equipped with 'scope bases, hinged floor plate, quick release swivels and "quick-adjust" sling strap. Monte Carlo stock with cheekpiece, RK-W wood finish, and custom checkering.

MODEL 700 "CUSTOM" RIFLE

If you're interested in an "extra special" Model 700, the Model 700 "Custom" is the rifle for you. Available on special order only, the Model 700 "Custom" offers you a choice of barrel specifications. It's available in a variety of calibers and features a select American walnut stock, hand checkering, a freshly polished bolt (rebowled or without sights) and highly polished receiver for the finest blueing possible.

R2525318

1972

Remington Model 760 "Gamemaster" Center Fire Pump Action Rifle.

Remington Model 788 Center Fire Bolt Action Rifle.

MODEL 760 "GAMEMASTER"

If you already own a pump shotgun, the Remington Model 760 will feel right the moment you pick it up.

Why? Let's start with the action bars. The Model 760 has two of them. When you pump the action, the fore-end doesn't twist or bind. It comes back straight and fast in a comfortable natural movement. Your finger never leaves the trigger as it does in a lever action letting you stay on target for fast additional shots, if they're needed.

Point two. The receiver and interior working parts are put through our exclusive "vibrahoning" process. They come out mirror smooth and shiny—free from metal burrs that cause sluggish operation. The friction-free parts operate with silky-smooth ease.

Point three. It looks distinctive. All Model 760 stocks and fore-ends have the gleam that comes from Du Pont RK-W wood finish. They also have distinctive black fore-end tips and grip caps, white line spacers, and streamlined beavertail fore-ends. Standard grades have skip line checkering and the BDL. Deluxe grade features basket weave checkering and Monte Carlo stock with cheek piece (available in left hand version, too). An 18½" barrel carbine version for hunting in heavy brush is also available.

Point four. It's strong. The Model 760 is strong enough to handle the powerful 30-06 Springfield cartridge. The secret is in the 760's solid steel receiver and super-strong artillery type bolt.

Add up these four points plus fast, removable magazine clip and receivers that are drilled and tapped for 'scope mounts, optional left hand BDL models with reversed safety and cheek piece on left side for southpaw shooters, and you'll know why the Remington Model 760 is a favorite with big game hunters everywhere.

You can't beat Remington-Peters big game cartridges either. They're the cartridges used to test our guns at the factory. These rifles, combined with Remington-Peters big game cartridges are "Partners in Power and Accuracy."

THE REMINGTON MODEL 788 BOLT ACTION RIFLE— EXTREMELY ACCURATE, EXTRA STRONG, AND UNBELIEVABLY INEXPENSIVE.

These statements are all true. In just four years, the Model 788 has built up a tremendous reputation among hunters and shooters.

It was built for the sportsman who wanted a low price big game rifle in popular, modern cartridges. The 788 gave him that in both left and right hand models.

The Model 788 was also designed to give good accuracy. It delivered that plus. Take the outdated 30-30 for example. The 788 shot groups with this cartridge that could have put it in the far more expensive target rifle class. Try the Model 788 in 22-250 or 6mm Remington and you'll see what pin-point accuracy is like.

The unusual accuracy of the Model 788 comes from its extremely fast lock time (the interval between pulling the tripper and primer ignition). The lock time is so fast that the bullet has left the 788's barrel before a comparative bullet in any one of ten competitive guns tested left the cartridge case.

To handle the potent 22-250 Remington, the Model 788 had to be strong. The secret of the 788's strength is in the nine lockup lugs on the bolt and the grooved receiver. Together they lock up tight and secure.

With terrific accuracy, extra strength, and a low price going for it, the Model 788 is a tough rifle to beat.

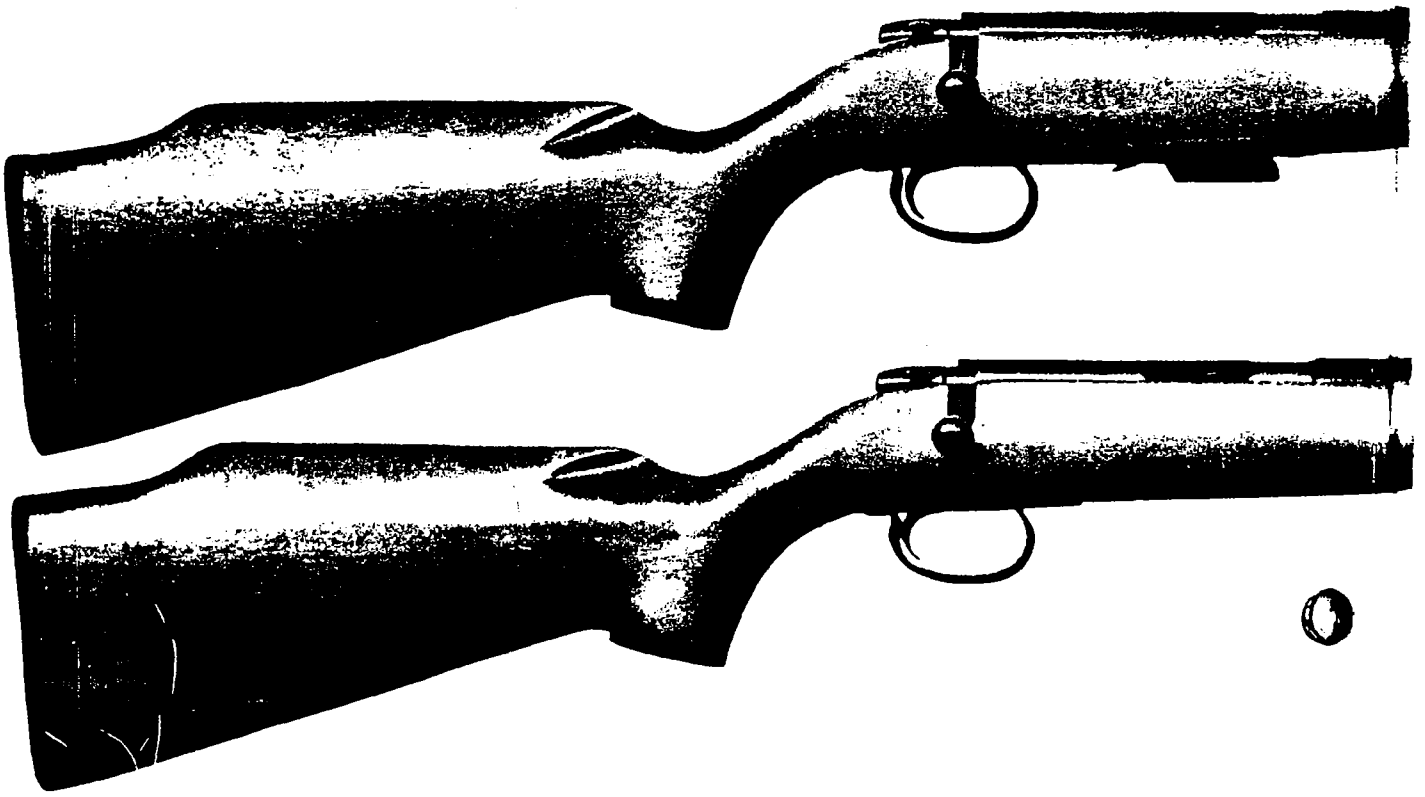
R2525320

The Remington Models 591 clip repeater and 592 tubular repeater bolt action rifles are chambered for the sensational 5mm Remington Rim Fire Magnum cartridge. Why sensational? For these reasons. It's the fastest rim fire cartridge ever made (muzzle velocity [illegible] feet per second) — the most accurate rim fire hunting cartridge and the only rim fire cartridge made with the super accurate "Power-Lokt" bullet. It looks like a center fire cartridge and it has the accuracy of a center fire cartridge —great for small game, varmint hunting, and informal target shooting. Other outstanding features of the Models 591 and 592 are:

SIX EXTRA HEAVY ROTARY LUGS on the bolt engage grooves in the solid steel receiver. Together they lock up tight, like a bank vault. Here is extra strength to handle the powerful 5mm Remington rim fire magnum cartridge. BOLT COVER at rear helps keep out dirt and grit. UNIQUE TWO STAGE EXTRACTOR permits the bolt to completely enclose the cartridge head assures utmost safety. FULL SIZE Monte Carlo stock with pistol grip looks and feels like a center fire rifle. SIGHTS are rugged, similar to those on big game rifles. Bead front sight and U notch — lock screw rear. ROUND RECEIVER means bedding into the stock can be more precise which, in turn, contributes to fine accuracy. The receiver is also grooved for "tip-off" scope mounts. ORDNANCE STEEL BARREL is precision rifled, crowned at the muzzle, polished and blued for good looks and long wear. NON-SLIP THUMB SAFETY is conveniently located at the right rear of the re-



R2525321

er. Positive safety – forward for fire, rear-ward for safe. Marked "F" for fire, "S" for safe. MATCH TRIGGER QUALITY - A good trigger pull is an important asset to any rifle. The lock time of the Models 591 and 592 is the fastest of any 17 models tested which include substantially all of the significant competitive rim fire rifles available in the United States market. What's lock time? It's the length of time, measured in milliseconds, between the release of the trigger sear and instant ignition. This means better accuracy, no trigger movement to pull the gun off target.

In experienced hands, a 22 rim fire rifle is an efficient small game and varmint getter. But the effective range of a 22 rim fire cartridge is just about 100 yards. Beyond that, bullet drop is so severe that long-range hits are more a matter of luck than skill. (A 22 long rifle cartridge, for example, zeroed in at 100 yds. can drop 10.7 inches at 150 yards!)

Remember, a varmint's range of vision is never than 100 yards, especially in open or country. So, unless you want to stay with long-range situations, you have to pack more power into the field.

Traditionally, varmint hunters looking for better accuracy have turned to specialized center fire rifles and cartridges. But not every-one wants or can afford to give up the low cost and economies of rim fire shooting. So Remington-Peters developed a completely new rim fire cartridge - the 5mm Remington Rim Fire Magnum – and built the Models 591 and 592 to handle it.

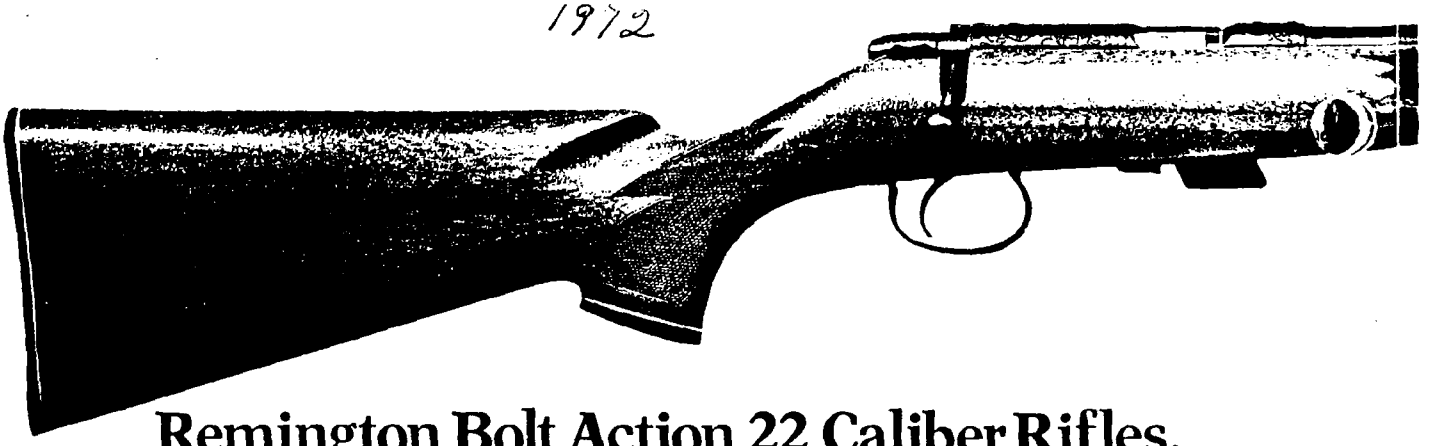
1972



Remington Bolt Action 22 Caliber Rifles. Models 580, 581, and 582. New Model 541-S "Custom Sporter."

Through the years of Remington gunmaking, steel and blanks of walnut have taken many unique and creative forms, but few end results have been so creative and distinctive as the all new Model 541-S "Custom Sporter."

This new .22 caliber clip repeater bolt-action rifle represents Remington in the "fine grade" of 22 caliber sporting rifles. From butt plate to muzzle, you'll find features usually found on far more expensive rifles.

The rich figuration of the stock comes from American walnut covered with durable, luster-building Du Pont RK-W wood finish.

Examine the rosewood-finished fore-end tip, grip cap and butt plate. Notice the look and feel of finely cut checkering, the distinctively engraved receiver and trigger guard.

Beyond its eye-attracting features, the Model 541-S gives many extras you have come to expect from Remington: a match-type adjustable trigger, swept-back bolt handle, barrel and receiver drilled and tapped for 'scope mounts or iron sights, a grooved low-profile safety, steel trigger guard and a highly polished bolt are all standard equipment.

The striking appearance of the Model 541-S is highlighted by a specially blued receiver and tapered barrel.

For the man who appreciates fine craftsmanship and dependability, the Model 541-S "Custom Sporter" is his kind of gun.

Model 580 Single Shot, 581 Clip Repeater, 582 Tubular Repeater

These 22's have the look, feel and balance of big game center fire rifles—plus a strong powerful bolt.

The 580 series features an artillery-type bolt with rear lock-up. What does that mean to you? It means extra strength. When the bolt is closed on the cartridge, six rotary locking lugs are engaged in a grooved receiver. Together, they lock up tight—bank-vault-tight. The pressure is on ordnance steel locked into ordnance steel. Try the action. It's silky-smooth, solid, secure and extra strong.

The 580 "Boys' Rifle" has all the features of the standard Model 580, but the stock is 1" shorter for the young shooter and a left-hand Model 581, with the bolt handle on the left side, is available for southpaw shooters.

Other great features of this super-strong rim fire series include:

HUNTING-TYPE TRIGGER that's wide and has a crisp, sharp, clean trigger pull. Another plus feature is a big, sturdy trigger guard that's roomy enough to handle a gloved finger.

NON-SLIP THUMB SAFETY is conveniently located at the right rear of the receiver. It gives you positive safety—forward for fire, rearward for safe.

DUAL EXTRACTORS give a two-handed grip on the cartridge to make sure ejection is fast and smooth without jamming.

SIGHTS are rugged, similar to those on big-game rifles. Bead front sight and U notch adjustable rear sight with lock screw.

ROUND STEEL RECEIVER makes stock bedding more precise and, in turn, contributes to fine accuracy. It's also grooved for "tip-off" 'scope mounts.

BOLT COVER helps keep dirt, grit and bad weather out, assuring smooth operation inside. It also gives the gun the streamlined look of a center fire big game rifle.

FOR FINE accuracy and dependability, use Remington-Peters 22 caliber cartridges—the same cartridges used to test these rifles at the factory.

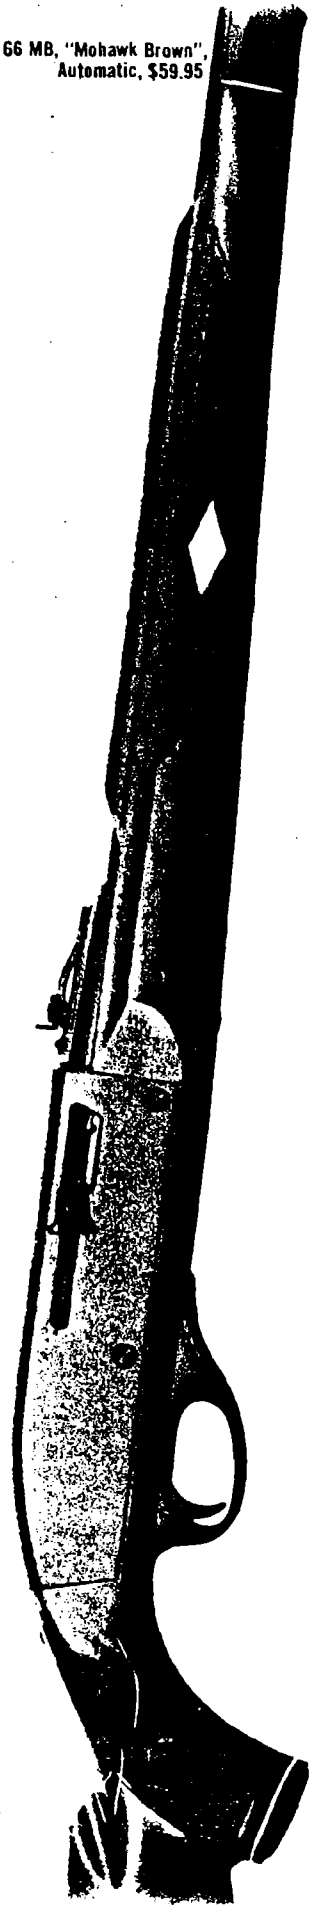
R2525324



NYLON 66 MB, "Mohawk Brown", Automatic, $59.95

Automatic and Pump Action 22 Caliber Rifles.

NYLON 66 AUTOMATIC

The "Lightweight" 22 Caliber Automatic That Set a World's Record.

These are facts! In 13 years, this 22 automatic has built an outstanding record for consumer acceptance. It's tough because it's made of super-strong structural nylon that won't warp, crack, fade, chip or peel.

The Nylon 66 is an endurance and accuracy champion, too. It was used to establish a world's record on hand-thrown 2¾" wood blocks – 100,000 of 'em and only six misses, not a single malfunction in 100,000 rounds. With a record like that behind it, hitting targets, tin cans and small game will be easy.

The unique interior design of this 4-lb. automatic combines steel and nylon for friction-free operation. Lubrication is eliminated because parts glide on greaseless nylon bearings.

Distinctive functional checkering assures secure handling even in the roughest of conditions, and the convenient top-of-grip safety gives instant control for any type of quick shot.

The Nylon 66 also comes in a deluxe "Apache Black" model. The stock is made of Du Pont "Zytel" black nylon, and the receiver and barrel are chrome-plated to give a striking appearance. In performance and reliability, it's the same as the "Mohawk Brown" model.

If you're looking for a 22 automatic that's accurate, tough and dependable, the Nylon 66 is just the ticket.

MODEL 552 "SPEEDMASTER" AUTOMATIC

The Model 552 is the "all-around gun" in the Remington line of automatic 22 rifles. This fast-shooting, well-balanced, highly accurate 22 automatic handles shorts, longs and long rifles with no trouble or adjustments. It's one of the Remington family of guns because it's designed like another superior performer – the Model 742 big game automatic rifle. Special features on the Model 552 include twenty shots as fast as you can squeeze the trigger, cross-bolt safety and grooved receiver for "tip-off" scope mounts. A short 21" barrel carbine version and a "Gallery Special" are also available. The BDL Deluxe version has custom checkering, RK-W wood finish and big game type sights.

To make sure these trouble-free automatics remain that way, use the ammunition they were built and tested with – Remington-Peters 22's.

MODEL 572 "FIELDMASTER" PUMP ACTION

For the shooter who likes a pump action 22 caliber rifle, the "Fieldmaster" Model 572 is best...action is slick and smooth. Exclusive cartridge-feeding design prevents jamming, permits easy single loading. By simply removing the inner-magazine tube, parent or instructor can convert the "Fieldmaster" into a single-shot rifle. Receiver has dovetail grooves for "tip-off" scope mounts. Capacity is large: tubular magazine holds 20 short, 17 long, or 15 long rifle cartridges. It has a cross-bolt safety conveniently located at the rear of the trigger guard where it can be snapped on or off with the index finger. The Model 572 is beautifully streamlined and balanced – rugged and dependable like Remington big game rifles and shotguns. BDL deluxe models feature extra-tough RK-W wood finish, custom checkering, grip cap and big game type sights.

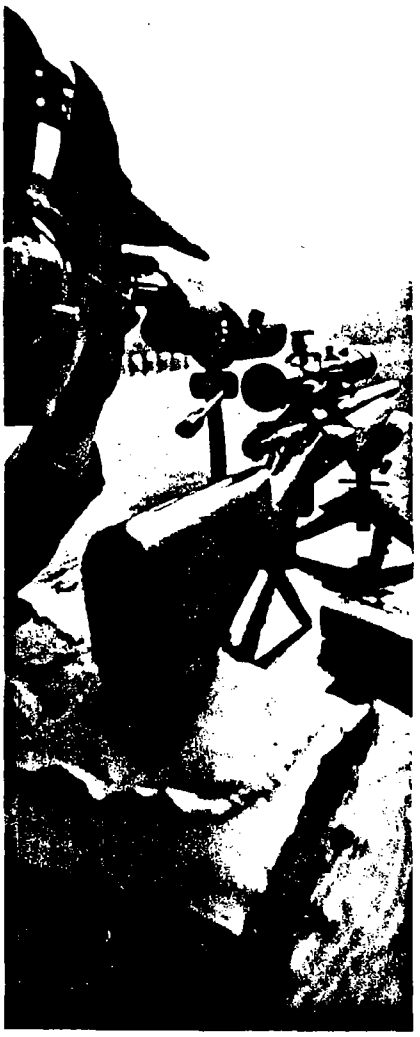
R2525326

1972



MODEL 40-XB "RANGEMASTER" (RIM FIRE MODEL)

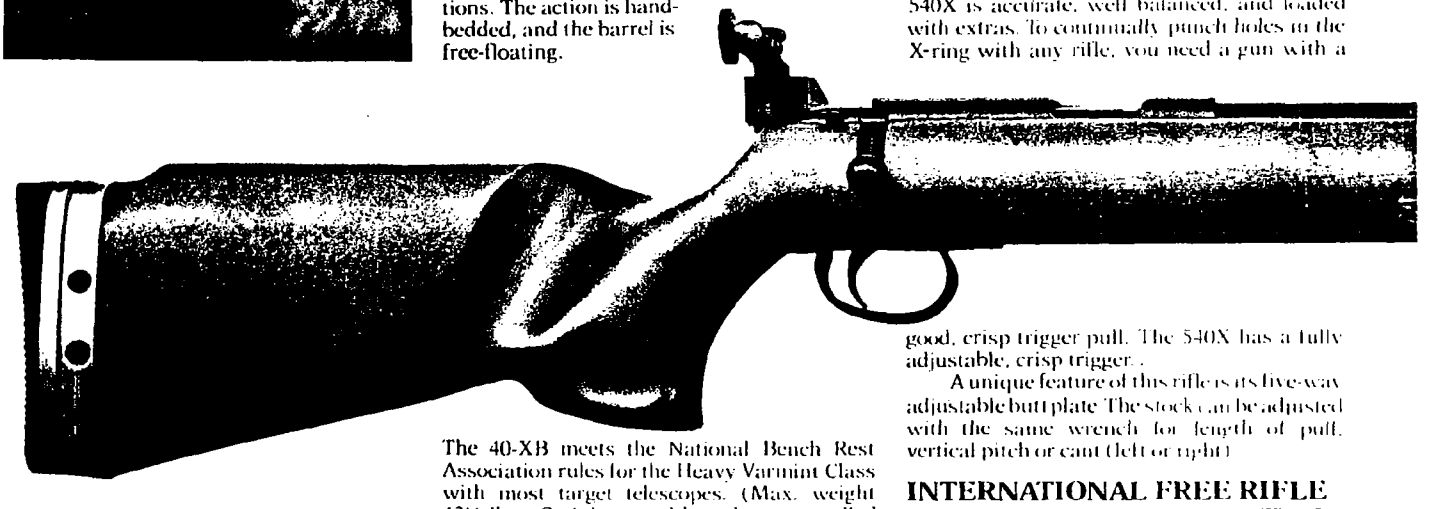
The loading platform of the 40-XB provides straight-line feeding, no shaved bullets. High comb gives same sighting plane for iron and telescope sights. Comb is grooved for bolt removal. Mershon white-line, non-slip rubber butt plate, adjustable sling swivel and hand stop are standard equipment. Other features are: extra strong bolt with double extractors, crisp trigger with positive adjustments for weight of pull, wide trigger for more uniform pull and comfort, thumb-operated safety. The receiver is drilled and tapped for all standard sight mounts, telescope and metallic. Redfield Olympic front and rear sights optional. A new long rail for the adjustable fore-end stop makes shooting good scores easier.

MODEL 40-XB "RANGEMASTER" (CENTER FIRE MODEL)

Now available in repeating models for use in National Match Courses, the 40-XB is designed with clip slots for the conventional five-shot clip. (Available in heavy-barrel models only.) It loads from the top of the receiver, and the magazine has a hinged floor plate. Repeating models are provided only in calibers equal to or shorter than the loaded length of the 308 cartridge.

The 40-XB center fire repeating rifle is ideal for the rapid-fire events, especially in the 7.62mm NATO (308) caliber, because of its shorter bolt throw and extreme accuracy, plus its optimum weight for over-the-course competition.

As a single shot model, the Remington Model 40-XB center fire is offered in a variety of center fire calibers as listed in specifications. The action is hand-bedded, and the barrel is free-floating.



The 40-XB meets the National Bench Rest Association rules for the Heavy Varmint Class with most target telescopes. (Max. weight 13½ lbs.) Stainless steel barrels are supplied as standard on all magnum and varmint calibers except 222 Rem., 222 Rem. Mag., 223 Rem., 308 Win. and 30-06 Spfd. Stainless 40-XB barrels are not blued. 40-XB "Sporter" (22 long rifle version of Model 700 "Custom") available on special order.

MODEL 40XB-BR BENCH REST (CENTER FIRE)

Built with all the features of the extreme accurate Model 40XB-CF, but modified to give the competitive bench rest shooters a standardized rifle that provides the inherent accuracy advantages of a short (20") heavy, extremely stiff barrel. Wider, squared off fore-end gives a more stable rest on sandbags or other supports. In combination with the new Remington target scope, the resulting package weighs just under 10½ lbs. and meets weight limitations for the sporter and light-varmint classes of National Bench Rest Shooters Association competition. For shooters competing in the heavy-varmint class, a 13½-lb 26"-barrel version is available.

REMINGTON 20-POWER TARGET SCOPE

Remington's 20-power rifle scope is designed primarily for accuracy in critical bench rest shooting. Its relatively short length permits fore and aft receiver mounting and eliminates the need of a forward mounting on the barrel. Produced in 20 power only, the target scope contains optics of the highest quality. Because of its lighter weight, shooters have greater flexibility in assembling rifle and scope combinations to meet National Bench Rest Shooters Association weight limitations.

MODEL 540X MATCH RIM FIRE TARGET RIFLE

The Model 540X has all the design features and special attachments to make it the most accurate target rifle in its class. Designed for the intermediate and junior shooter, the Model 540X is accurate, well balanced, and loaded with extras. To continually punch holes in the X-ring with any rifle, you need a gun with a good, crisp trigger pull. The 540X has a fully adjustable, crisp trigger.

A unique feature of this rifle is its five-way adjustable butt plate. The stock can be adjusted with the same wrench for length of pull, vertical pitch or cant (left or right).

INTERNATIONAL FREE RIFLE (RIM FIRE AND CENTER FIRE)

The International Free Rifle features the 40XB action, precision heavy barrel, a Remington-designed adjustable butt plate and hook, adjustable palm rest, adjustable front sling swivel and 2-ounce trigger.

Remington Target Rifles.

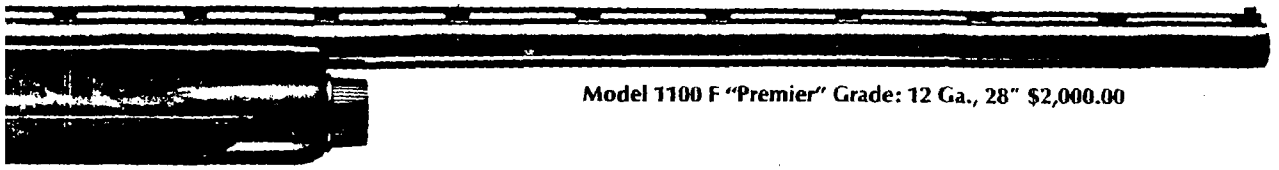
Remington High Grade Guns



Model 1100 F "Premier" Grade: 12 Ga., 28" $2,000.00

ters and hunters everywhere know Remington ing firearms and ammunition as superior ting systems. These sportsmen recognize and ct Remington performance, dependability, nical advancement, and craftsmanship.

nier" Grade rifles and shotguns are the finest ples of Remington's gunmaking skill. Select rican Walnut stocks and fore-ends are hand ed and beautifully checkered. Custom-en- d game scenes and scrollwork decorate re- rs. Gold inlays are available at the customer's n. Stocks are fitted with gold nameplates.

rnament" Grade shotguns and "Peerless" e rifles feature scroll engraving on receivers, , and trigger guards. Rich American Walnut s and fore-ends bear fine checkering in a ue high grade pattern. The Model 870 "All- rican" Trap Gun includes these features and a distinctive color medallion to the receiver.

e exceptional High Grade guns set the stand- or the continuing tradition of excellence by ngton in 1973.

Model 1100 Automatic Shotguns
12, 16, 20, 28 & 410 Gauges

Unified Shooting Systems for Optimum Performance

e Model 1100 Automatic Shotgun ıds the field for dependability and rsatility. Experienced hunters oose the 1100 for its superior permance in any weather with all ıds. The unique gas metering sysn is designed to operate with all " standard velocity, "Express," 2¾" Magnum loads without adstment. This "all-around" capaity permits the hunter to use the oper loads for a wide variety of me, all in one shotgun. For added rsatility, extra barrels are interangeable within gauge and chamr length. Special tools are not needto change pre-fitted barrels in the d in seconds.

ngton makes the right Model for your game, gauge, and perl preference: field grade autos in 12, 16, 20, 28, and 410 es; 20 gauge lightweight models standard or Magnum; 12 and 20 uge 3" Magnums; trap and skeet ns; left hand models in 12 and 20 uge; and a deer gun with rifle hts. All but the deer gun in a vari- of barrel lengths and chokes to et any hunter's requirements.

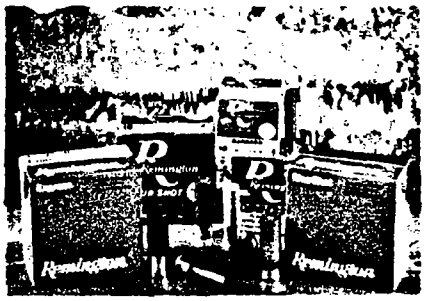
Model 1100 strength and dependability have become a tradition. These gas-operated automatics are designed for greatly extended shooting life. You'll still be hunting with your 1100 long after less solidly-built automatics are shot out.

The effect of recoil is milder with an 1100 than any other shotgun action. This lessening of recoil feels more like a push than a punch . . . taking the "kick" out of shotgunning.

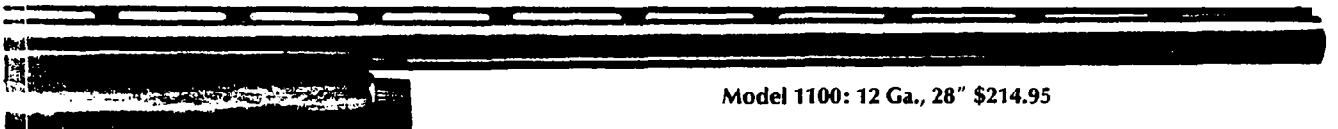
The appearance of America's best-selling shotgun matches its performance. Scrollwork decorates the solid steel receiver and chrome-plated bolt. Deep, rich blueing is enhanced by an exclusive "vibra-honed" finishing process. The DuPont RK-W wood finish is lustrous, tough, and scratch-resistant. White line spacers and teardrop pistol grip cap . . . all add up to a good-looking gun.

Remington is the oldest, most experienced manufacturer of automatic shotguns in America. Each Model 1100 is designed to help fit personalized needs and specifications . . . to make the gun fit the individual.

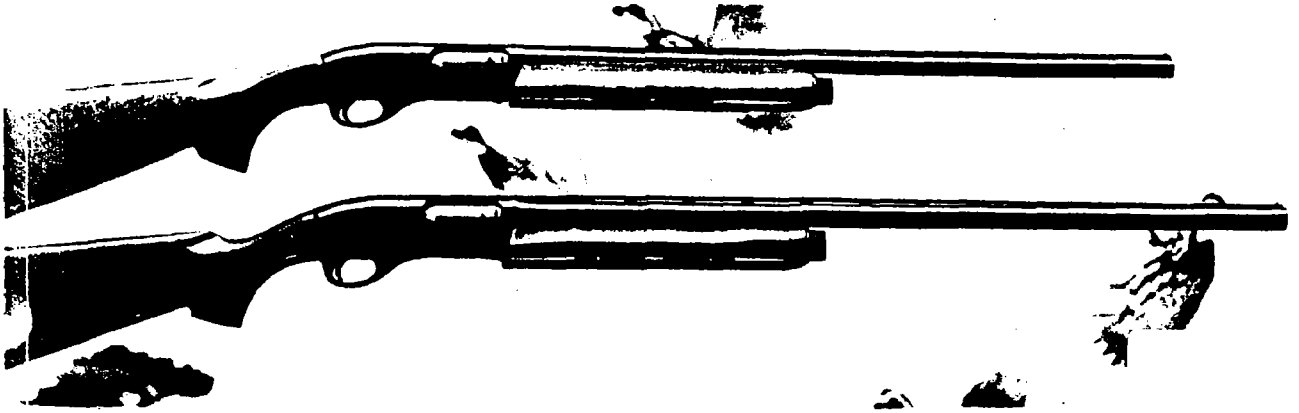
Remington Shotgun Shells are used in factory development and testing of Model 1100 shotguns. This testing and the resulting performance match-up pay off in truly unified, dependable shooting systems. "Express" and "Shur Shot" loads with "Power Piston" one-piece wads give hunters more than a sporting chance. The "Power Piston" one-piece wad puts



more shot in a pattern than old-style wads without shot protective sleeves. It cushions the shot and keeps it round . . . for truer flight and denser patterns. These plastic shells have a special lubricant coating to help prevent chamber corrosion. And they chamber smoothly and consistently.



Model 1100: 12 Ga., 28" $214.95



del 1100: 20 Ga. Lightweight, 26" $224.95 Light carrying at pounds. Functions with all 2¾" loads. Also available in ht Magnum model with 3" chamber. Ventilated rib or

Model 1100: 12 Ga. Magnum, 30" $234.95 Magnum power with smooth-shooting Model 1100 performance. Left or right hand models. Handles 3" Magnum and all 2¾" Magnum shell

Model 1100 Trap & Skeet Guns
12, 20, 28, & 410 Gauges

Automatic Shooting Systems for Better Scores in Clay Target Competition

Proven in competition and by sales, Remington Model 1100s stand alone as the most popular automatics for skeet and trap. In the 1971 and 1972 World Skeet Championships, Model 1100s were used to win the All-Gauge Championships and successive High Over-all Championships.

Specially selected wood on the Model 1100 Deluxe SB Skeet grade distinguishes it from the 1100 SA grade. Both deliver exceptional balance, feel, and dependable performance. The SA grade comes in 12, 20, 28, and 410 gauges; SB grade in 12 and 20 gauges. All with special skeet-bored barrels.

The Model 1100 TB trap grade has won more titles and won over more trap-shooters in the past nine years than any other automatic. Its minimum recoil sensation reduces fatigue . . . an advantage during lengthy shoots. And competitors know they can count on it for reliability. Available in full or modified trap choke.

Also available for southpaw shooters are left hand versions of the Model 1100 SA skeet grade in 12 and 20 gauges and TB trap gun with full choke. These mirror-image automatic shotguns feature left hand ejection and safeties.

"RXP" Trap and Skeet Loads in 12 gauge team up perfectly with Model 1100 trap and skeet guns for top scores. "RXP" shells give the best practical balance in all factors.

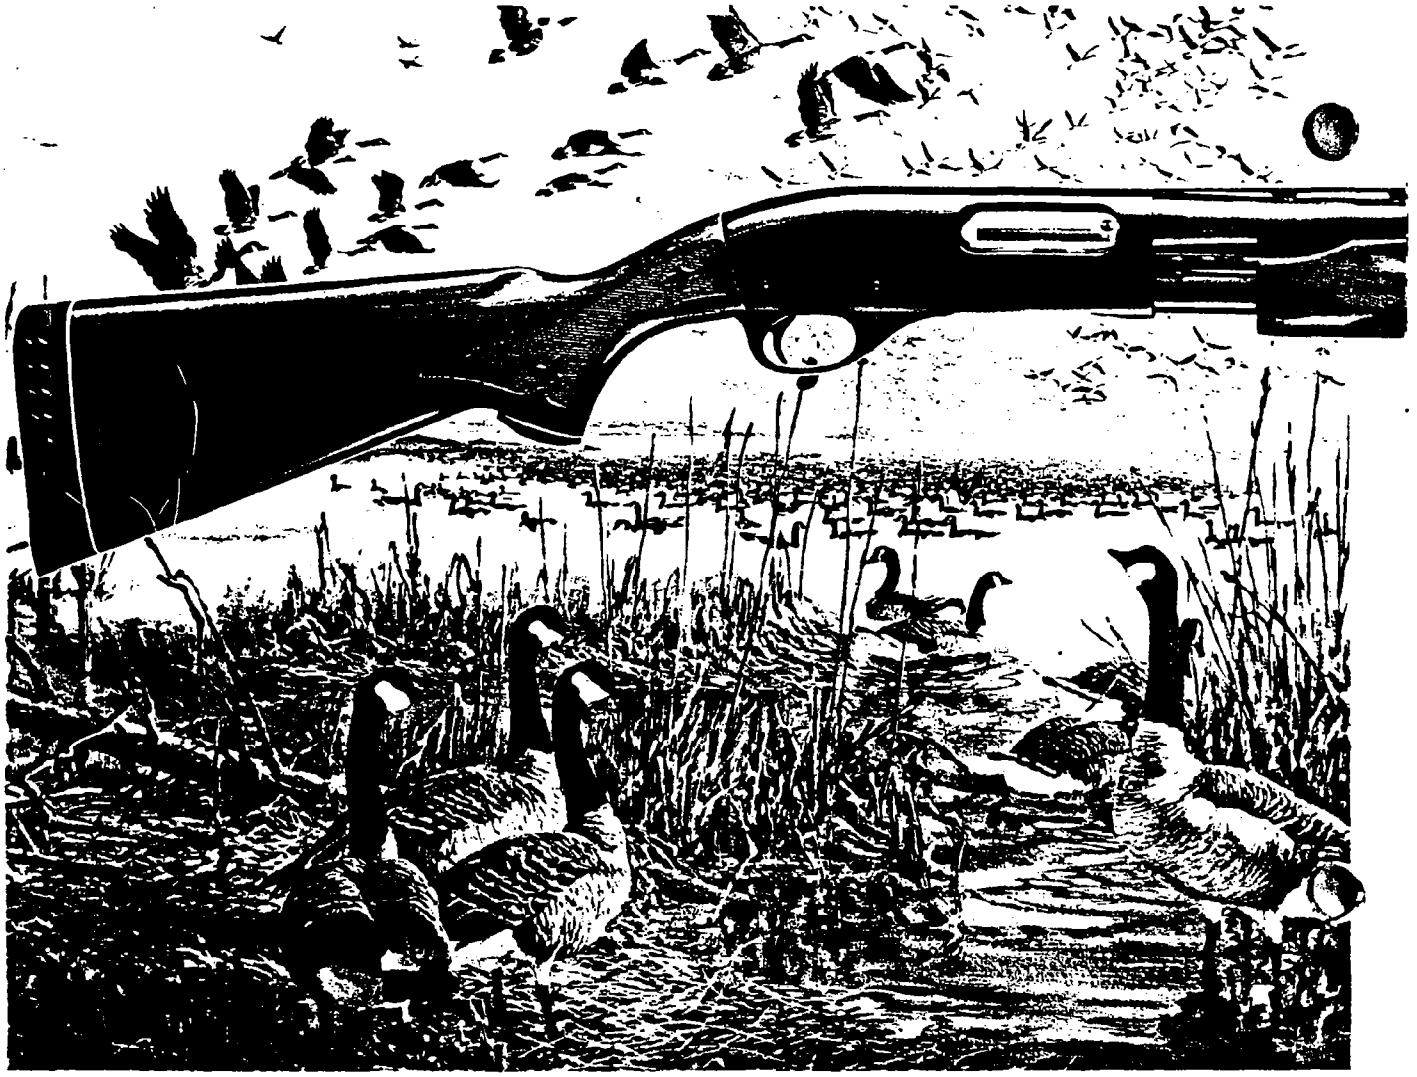
Model 1100 SA Skeet: 12 Ga., 26" $224.95
The stand-out skeet gun in any competition. Shooters throughout the world recognize that high skeet scores and the 1100 go hand in hand. Gas-operated automatic action reduces recoil sensation. Easy-swinging balance

R2525336

1973



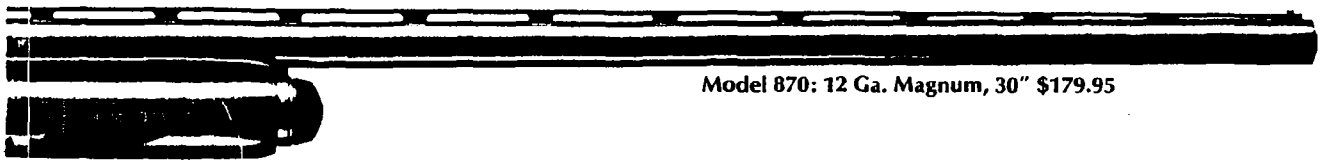
Model 870: 12 Ga., 28" $159.95 The pump shotgunner's best buy. This 12 gauge 870 uses all 2¾" Magnum, "Express," and standard velocity shells without adjustment. Double action bars for smooth, sure ejection. Variety of interchangeable barrels for different game.

Model 870: 20 Ga. Lightweight, 28" $169.95 Ready for a long day in the field. Built on a small steel receiver, this lightweight "Wingmaster" shotgun weighs only about six pounds. Ventilated rib or plain barrel. Rubber recoil pad. Also available in Magnum model.

Model 870: 28 Ga., 25" $169.95 Balanced pump action perfection. Mirror-like "vibra-honed" metal finish and gleaming, scratch-resistant RK-W wood finish. Plain barrel or ventilated rib, interchangeable barrels for increased versatility.

R2525337

Model 870 "Wi[1973]r" Pump Action Shotguns
12, 16, 20, 28 & 410 Gauges



Model 870: 12 Ga. Magnum, 30" $179.95

Smooth Shooting Systems with Built-in Strength

More than a million Model 870 owners know the fine points of this proud pump action shotgun. It's built strong to take rough handling in the field. Receivers are machined from solid steel for extra strength. Double action bars . . . one on each side of the fore-end . . . assure smooth pumping without twisting or binding. Shot after shot, the Model 870 "Wingmaster" feeds and ejects positively under all shooting conditions.

Another advantage of the 870 is variety of selection. There are correct gauges, grades, and specifications for every game: field grades in 12, 16, 20, and 410 gauges, Magnums in 12 and 20 gauges, deer guns, 20 gauge lightweight models in Magnum and regular, and 12 or 20 gauge left hand models. Interchangeable barrels allow many choke and barrel length combinations for specific hunting situations. In 12 gauge, there are 21 different combinations. And no factory or gunsmith fitting is necessary.

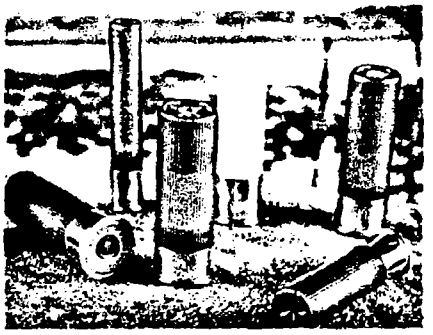
For long cornfield or waterfowl hunting, choose the Model 870 in 20 or 12 gauge Magnum models. They shoot all 3" Magnum, 2¾" Magnum and high or low-base shells.

The "Wingmaster" 20 gauge Magnum lightweight offers this same capability. The 26" plain barrel lightweight model weighs only 5¾ pounds. All lightweight 20 gauge models are designed for hunters who do a lot of walking and shooting.

Smooth looks complement the 870's smooth performance. Remington "vibra-honing" gives a lustrous blue to all metal parts . . . inside and outside. Inside parts glide smoothly and easily. The exclusive DuPont RK-W wood finish brings out the beauty of the wood and protects it for years of tough, outdoor use. White line spacers at grip and butt add dash.

The Model 870 puts it all together . . . looks, fast handling, and dependable pump action.

Remington "Express" and "Shur Shot" loads insure top performance from Model 870 field grade shotguns. Since "Express" and "Shur Shot" loads are used extensively in testing and development of Remington shotguns, they are "made for each other." Together, they give the hunter a truly mated shooting system.

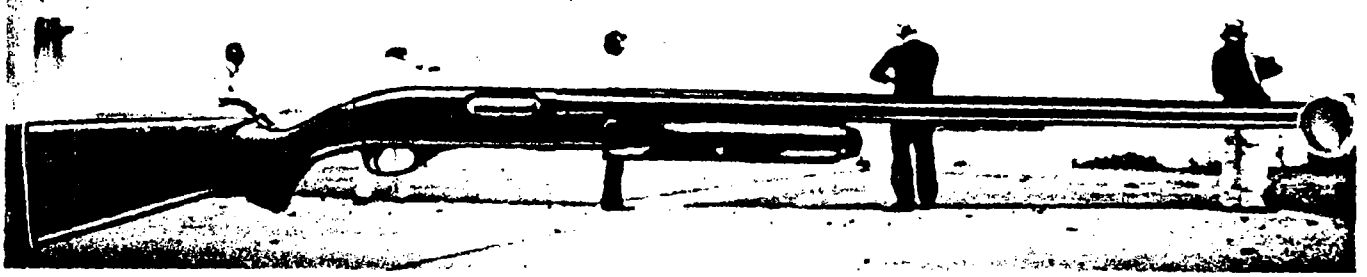


Remington shotgun shells can stand all weather conditions. Remington experience and know-how . . . gained from manufacturing literally billions of shotgun shells . . . make "Express" and "Shur Shot" as good or better than any in the field. Constant research and improvement promise a hunter a field load he can use to assure many successful hunts.

Long-range "Express" loads are available in 12, 16, 20, 28, and 410 gauges . . . "Shur Shot" loads in 12, 16, and 20 gauges.

Model 870 Left Hand: 12 Ga., 26" $164.95 A mirror-image version of this dependable, fast-handling pump action for left handed hunters. Also available in 20 gauge or Magnum 12 gauge, all with ventilated rib barrels. Left hand safety and ejection.

R2525338



Model 870 TB Trap: 12 Ga., 30" $199.95 Top gun among trapshooting pumps for value and fine features. Crisp trigger pull and smooth, natural pump action. Right and left hand models. 1973

Model 870 Trap & Skeet Guns
12, 20, 28 & 410 Gauges

Model 870 "All-American" Trap: 12 Ga., $50.00 Exceptional scroll-design engraving decorates receiver, trigger guard, and portion of barrel breech. Finely-checkered stock and fore-end of fancy American Walnut. Gold oval pistol grip cap. Special carrying case.

Superior Shooting Systems for Higher Scores

Reliability in competition continues to be the 870's hallmark. Clay target shooters know they can trust the double action bars for faultless ejection. The solid steel receiver assures them of maximum strength. Balance and superb feel have made the Model 870 a championship performer for trap and skeet shooters for more than 20 years.

New last year, the 870 "All-American" trap gun has many "Premier" Grade features. Its distinctive color medallion and stylish appearance highlight superb 870 trapshooting qualities.

The TC grade features fancy wood and hand checkering. TB grade models cost a little less and provide the same flawless dependability. All come with ventilated rib barrels and rubber recoil pads. Monte Carlo stocks are optional. TB and TC grades are available in full or modified trap chokes. Left hand TB models with full chokes eject on the southpaw side of the receiver, helping left handers shoot more comfortably.

Pump action skeet shooters can pick a Model 870 SA skeet gun in all four gauges . . . or a deluxe SC grade with fancy hand-checkered wood in 12 or 20 gauges. Barrels for these guns are specially skeet-bored.

All Model 870 trap and skeet guns are finished to perfection . . . with exclusive "vibra-honed" metal finish inside and out . . . with the tough, gleaming DuPont RK-W wood finish. Each of these championship performers points at clay targets with ventilated rib barrel, metal rear bead, and ivory bead front sight. All make clay target shooting a positive, pump action pleasure.

Remington target loads for all gauges put high-performance features in your Model 870. These target loads take over where the 12 gauge "RXP" leaves off . . . in 16, 20, 28, and 410 gauge events. All score high with trap and skeet shooters.

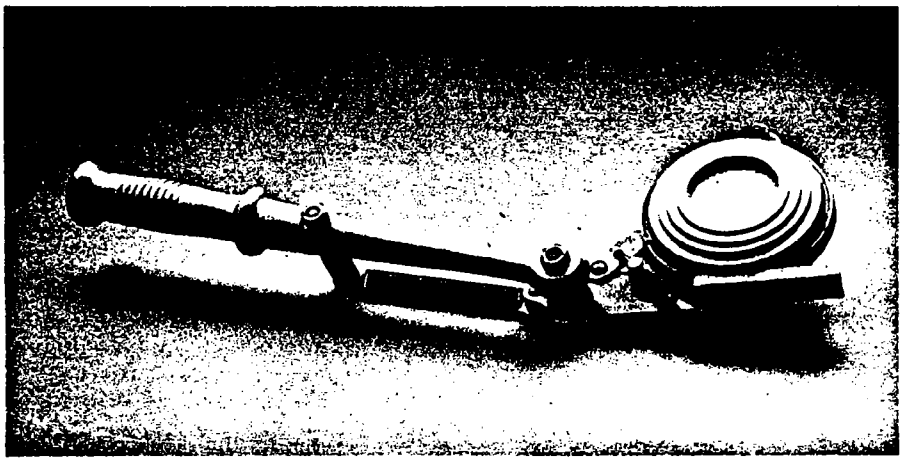
"Blue Rock" Clay Targets

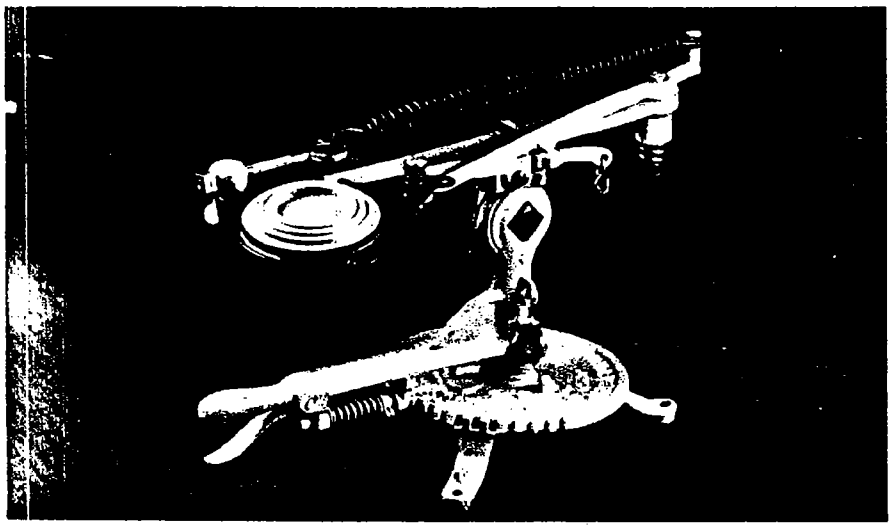
The streamlined design of famous Remington "Blue Rock" targets increases flight distance. Weight is balance-fixed. The dome is thin and the rim heavy for stability and spin. Strong rims also make "Blue Rock" targets easier to stack.

New luminous orange and standard bright yellow colors make these claybirds easy to pick up under all conditions. And they break readily when hit by only a few pellets. All of these features add up to greater shooting pleasure and higher scores. "Blue Rock" targets are packed 135 per carton.

Remington Target Thrower

This quality-made hand thrower lets you enjoy shotgunning practice any time and anywhere. The Remington target thrower easy to use. All that are needed are ue Rock" targets, a willing arm, and safe location. A few practice throws permit beginners to establish distance and direction. Simulate game, trap, or et situations to improve your shoot- for the hunting season. Great fun for family . . . and an excellent way to teach a youngster.





"Expert" Trap

al for summer camp, hunting lodge, age, or boat. Strong, lightweight, and mpact enough for weekend trips in boat or car. This "Expert" trap is easy to d and operate. It adjusts for throwing ets at various elevations and dis- es to suit the shooter.

the "Expert" trap is inexpensive and o operate, many shooters utilize it for walk-around shooting courses and covey-rise trapshooting layouts. It gives perfect simulation of actual game shooting when used correctly in such instances. Shooting instructors find the "Expert" trap a valuable teaching aid.

Write for a free brochure on Remington Gun Club Traps.

"Blue Rock" Trap

This manually-operated trap is designed for straight trap or skeet shooting. It is especially well-suited for small clubs and private estates. The shovel-type carrier, similar to those used on more expensive traps, insures fast rotation, uniform direction and distance.

The trap is cocked manually by pulling the carrier back to the "ready" position. Releases high, low, and doubles by moving a simple control lever.

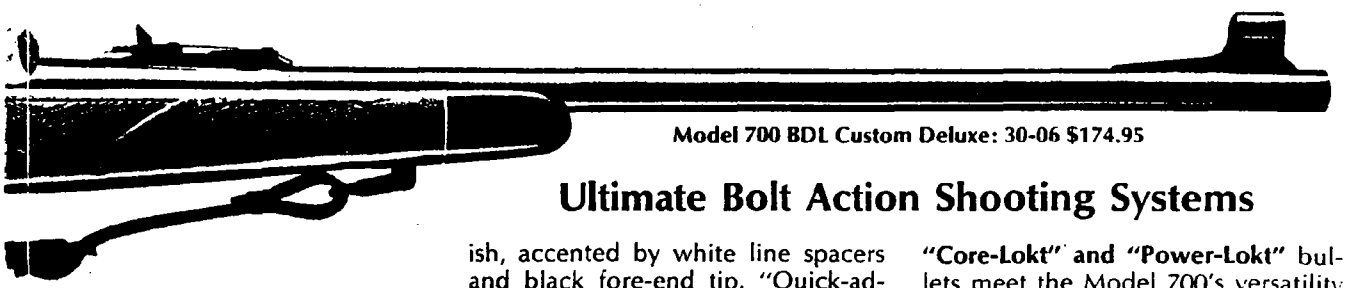
Model 1973 ...ter Fire Bolt Action Rifles



Model 700 BDL Custom Deluxe: 30-06 $174.95

Ultimate Bolt Action Shooting Systems

...nequalled variety of caliber selec...ion sets the Model 700 apart from ...y other bolt action rifle. It comes ...o 17 calibers for every type of hunt...ng . . . from varmints to elephants.

The Model 700 is a wise choice for ...ng-range work. It's designed and ...ilt for strength and accuracy. The ...sons for its strength are the three ...gs of solid steel . . . bolt head, ...rrel, and receiver . . . that surround ...e cartridge head. No extractor cuts ...aken this critical area. This con...uction forms one of the strongest ...ter fire bolt actions made.

...e handsome appearance of the ...del 700 BDL Custom Deluxe out...oes many custom-made rifles. The ...ne American Walnut stock is de...gned to improve balance, grip, and ...ghting . . . with deep, traditional ...eckering. The DuPont RK-W finish ...oughens and highlights its wood fin...ish, accented by white line spacers and black fore-end tip. "Quick-adjust" sling strap with swivels and hooded front sight are standard on BDL models. Both BDL and ADL Deluxe 700s are equipped with jeweled bolts and shrouded bolt covers to keep out grit. Unique low profile safeties will not accidentally move on or off. All have Monte Carlo stocks with cheekpiece, checkered bolt knobs, and detachable sights for scope mounting. Receivers are drilled and tapped for scope mounts.

The heavy-barreled Model 700 BDL "Varmint Special" is made in seven varmint calibers for small-target, long-range precision shooting. Available on special order only, the Model 700 "Custom" offers a choice of personalized specifications in a variety of calibers and features. Select American Walnut stocks are hand checkered. Highly polished receiver and barrel . . . with or without sights. The 700 "Custom" is personalized for the discriminating shooter.

"Core-Lokt" and "Power-Lokt" bullets meet the Model 700's versatility challenge. Used to test each 700, these center fire cartridges perform best in Remington rifles.

"Core-Lokt" bullets are loaded in 26 big game calibers. Broad selection in bullet weight and types let hunters totally coordinate their shooting system for highest efficiency. Most "Core-Lokt" bullets have built-in applications for specific game or situations. "Power-Lokt" bullets are super accurate for target shooters and varmint hunters.

1973.

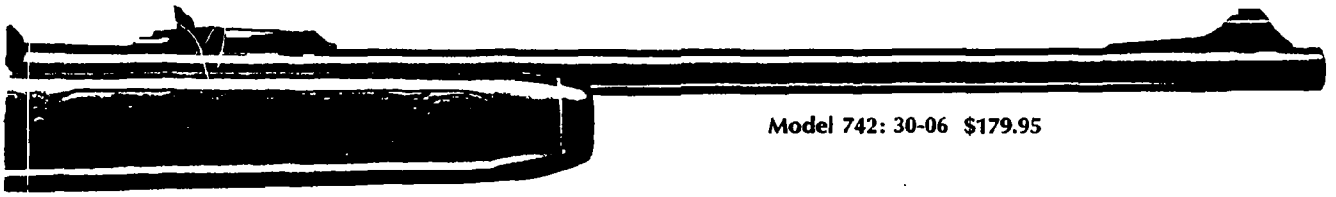
Model 742 BDL Custom Deluxe: 30-06 $199.95 The modern automatic for today's hunters. Basket weave checkering and Monte Carlo stock with full cheekpiece. Fast-loading clip magazine. In 30-06 and 308 Win. calibers.

Model 742 BDL Custom Deluxe Left Hand: 30-06 $199.95 Reversed left hand cheekpiece and left hand safety. Same accuracy and tight, safe lock-up. Receiver drilled and tapped for scope mounts. Available only in 30-06 and 308 Win.

Model 742 Carbine: 30-06 $179.95 perfect brush gun. Short 18½" barrel fo quick pointing. Ramp front sight and step adjustable rear sight. Tapered foreend with black tip. 30-06 and 308 Win. calibers only.

R2525344

Model 742 "Woodsma 1973 nter Fire Automatic Rifles



Model 742: 30-06 $179.95

rouble-free Shooting Systems Engineered for Accuracy and Dependability

utomatic rifle accuracy depends eatly on its speed of operation. So emington designed the 742 for the ɔt mum rate of operation . . . fast ough to maintain the advantage of sing an automatic . . . yet slow ough to let the hunter recover ɔm recoil. These truly modern auto- ics permit a hunter to make the t of the accuracy built into the . Less recoil means greater con- ol, giving the hunter a better chance keeping his sight picture from ot to shot.

ll-weather dependability is another odel 742 feature. It's built to meet e outdoors head-on . . . to function ectly under most temperature adverse weather conditions. odel 742 automatics are engineered r great strength. This strength origi- ates from an artillery-type bolt with ultiple locking lugs. When the ac- n is closed, the lugs lock bolt to rrel as tightly and securely as ad- nced Remington engineering can vise. Remington doubly insures 742 ength inside the action. When the l locks, the cartridge head is sur- nded tightly by three rings of steel bolt, barrel, and receiver.

bove all, you want trouble-free op- ation from an automatic . . . and e 742 "Woodsmaster" functions re- bly to make every shot count. In- ior working parts are coated with uPont "TEFLON S." This friction-reducing substance gives longer wear, self-lubricates, resists dirt and oil, and makes cleaning easier.

The Model 742 rifle offers a choice of five popular hunting calibers. Easy-handling 742 carbines in 30-06 and 308 Win. calibers make great guns for brush or rough-country hunting. BDL Custom Deluxe left hand versions with reverse cheekpieces and safeties provide left handers the opportunity to hunt automatically in comfort. Special D "Peerless" and F "Premier" Grades are available on special order.

Shoulder the regular grade with its standard stock and gently tapered fore-end. Notice the fine cheek-to-wood feel. The BDL Custom Deluxe grade goes two better with its distinctive basket weave checkering and Monte Carlo stock with full cheekpiece. All models show off distinctive black fore-ends and grip caps, white line spacers, and fine wood. Every 742 has its own fast-loading removable clip magazine, convenient bolt release, ramp front sight and adjustable rear sight. Receivers are drilled and tapped for scope mounts. Safeties are positive cross-bolt type. Exclusive Remington wood and metal finishes maintain the 742's outer strength and give it a rich appearance. Remington introduced the first automatic rifle in 1906, and Remington is still the best in automatic action.

Remington center fire cartridges are favorites . . . because of Remington ballistics know-how and top-quality components. Advanced "Core-Lokt" and "Power-Lokt" bullet designs bond core and jacket. Highest-quality brass, selected progressive burning powder, and "Kleanbore" primers go into each.

Constant Remington testing and quality control assure the hunter of controlled expansion. For big game, "Core-Lokt" bullets in a wide variety of weights and types make their mark. "Power-Lokt" bullets are super-accurate for target shooters and varmint hunters. For best results, use Remington center fire ammunition in your Model 742 automatic.

MODEL 742 SPECIFICATIONS

STOCK & FORE-END: American Walnut. **STANDARD STOCK DIMENSIONS:** 13¼" length of pull, 2¼" drop at heel, 1⅝" drop at comb. Deluxe Model: 13¼" length of pull, 2½" drop at heel, 1⅝" drop at comb, 1⅝" drop at Monte Carlo. **RECEIVER:** Drilled and tapped for scope mounts. Removable clip magazine. **CAPACITY:** 4 in clip magazine plus one in chamber. **SIGHTS:** Flat faced gold bead with ramp front sight. Step adjustable rear sight, for elevation, with windage adjustment screw. **SAFETY:** Positive cross-bolt. Deluxe models with left hand cheekpiece have left hand safety, right side ejection — at no extra charge. **WEIGHT:** Approx. 7½ lbs. Carbine weighs approx. 6¾ lbs.

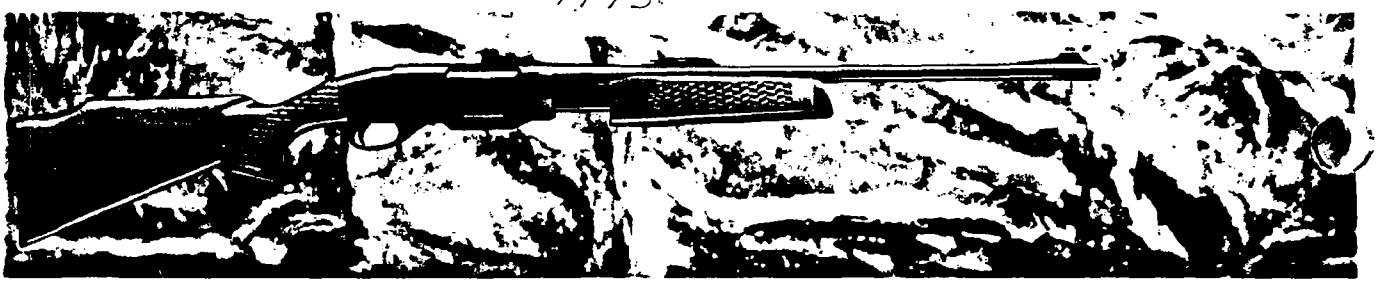
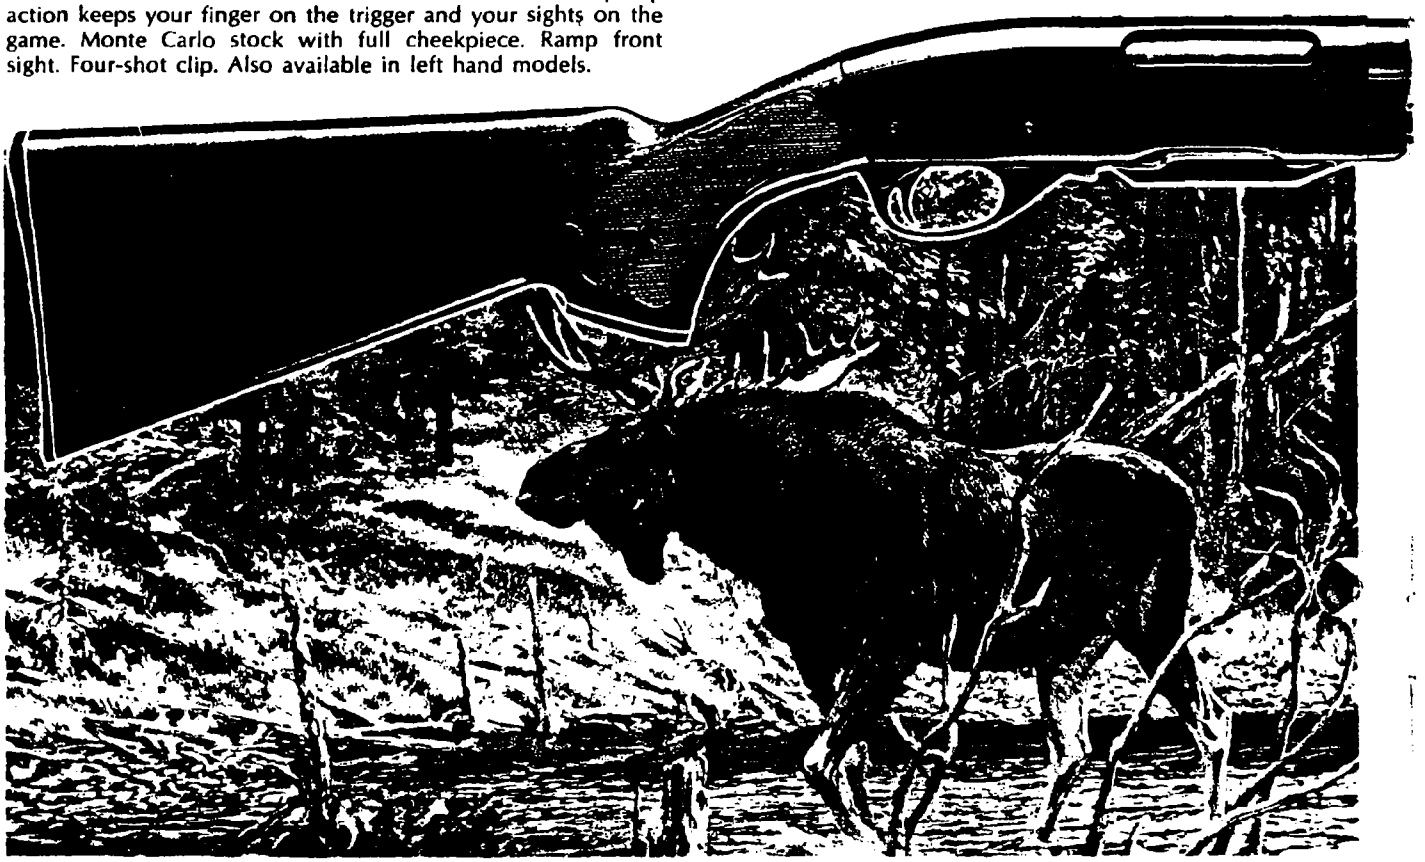
1973



Model 760 BDL Custom Deluxe: 308 Win. $174.95 Natural pump action keeps your finger on the trigger and your sights on the game. Monte Carlo stock with full cheekpiece. Ramp front sight. Four-shot clip. Also available in left hand models.



Model 788: 22-250 Rem. $99.95 Astonishing for its high accuracy, strength, and low price. Monte Carlo stock. Ramped blade front sight and U-notch rear sight. Receiver drilled and tapped for scope mounts.

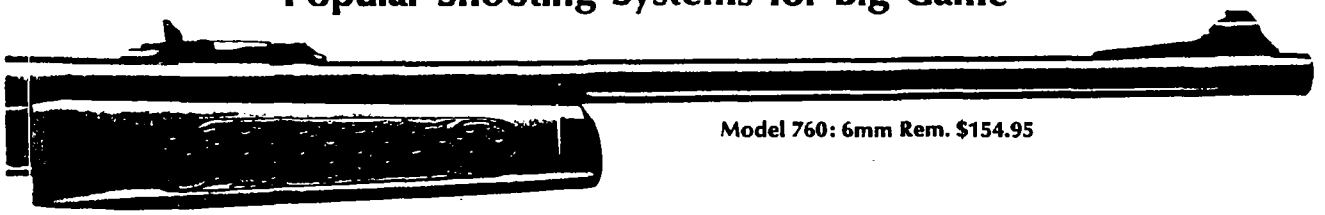
Model 788 Left Hand: 6mm Rem. $104.95 The bolt handle and safety are reversed for left handed shooting ease. Super-fast lock time for unusual accuracy. Detachable clip magazine. Available in 6mm Rem. and 308 Win. calibers.

R2525346

Model 760 "Gamemaster" 1973 Fire Pump Action Rifles

Model 788 Center Fire Bolt Action Rifles

Popular Shooting Systems for Big Game



Model 760: 6mm Rem. $154.95

Model 760 "Gamemaster" pump ...n in 30-06 is a fine deer rifle. ...act, Remington experts recom-...nd it for deer hunting ahead of ... popular 30-30 lever actions. In ...perienced hands, it's faster than a ...er action. Twin action bars elim-...te fore-end twisting or binding. ...e fore-end comes back straight and ... in a natural movement. Your ...ger stays on the trigger while you ...k the action for fast additional ...ts, if necessary.

...ther important design feature is ... fire-control mechanism. Unlike ...st lever actions, the entire 760 ...ger assembly stays in the rifle dur-... operation . . . eliminating possible ...alignment, grit in the assembly, ... pinched fingers.

... 760 action is strong because of ...solid steel receiver, artillery-type bolt, and multiple-lug locking system. It's the only pump action rifle available in 30-06. And it also comes in 6mm Rem., 308 Win., 270 Win., and 243 Win. The receiver and interior parts are "vibra-honed" to make them mirror smooth and shiny . . . burr-free for smooth-as-silk operating ease. Deep blueing and DuPont RK-W wood finish insure the 760's ability to handle the rough outdoors.

All 760 rifles and carbines feature black fore-end tips and grip caps and white line spacers. Standard grades favor skip-line checkering. BDL Custom Deluxe models have basket weave checkering and Monte Carlo stocks with full cheekpiece; left hand BDL grades with reversed cheekpiece and safety. A 760 carbine with 18½" barrel is also available. Removable four-shot clips. Receiver drilled and tapped for scope mounts.

Model 788 Center Fire Bolt Action Rifles have achieved an enviable reputation for pinpoint accuracy, strength, and low cost. Built in left or right hand models to give hunters a low-priced center fire rifle in popular, modern calibers.

The unusual accuracy of the 788 stems from its extremely fast lock time. This interval between trigger-pull and primer ignition is so fast that the bullet leaves the barrel before any of the other ten competitive models tested. Model 788 strength is in the nine locking lugs on the bolt and their fit to the grooved receiver. They lock up tight and secure to handle the potent 22-250 Remington cartridge. The 788 is also available in 222 and 6mm Rem., 243 and 308 Win. calibers. With its clean lines, superb accuracy, and strength, the Model 788 is a fine economy rifle.

MODEL 760 SPECIFICATIONS

...CK & FORE-END: American Walnut. **STANDARD STOCK DIMENSIONS:** 13¼" length pull, 2⅛" drop at heel, 1⅝" drop at comb. Deluxe Model: 13¾" length of pull, ...⅛" drop at heel, 1⅝" drop at comb, 1⅝" drop at Monte Carlo. **RECEIVER:** Drilled ...tapped for scope mounts. Removable clip magazine. **CAPACITY:** 4 in clip magazine ...one in chamber. **SIGHTS:** Flat faced gold bead with ramp front sight. Step ...justable rear sight with windage adjustment screw. **SAFETY:** Positive cross-bolt type. ...luxe models with left hand cheekpiece have left hand safety, right side ejection — ...no extra charge. **WEIGHT:** Approx. 7½ lbs. Carbine weighs approx. 6¾ lbs.

R2525347

Forty years ago, we made the best over-and-under shotgun in the world. Now, we're making it again. Only better.

EL61

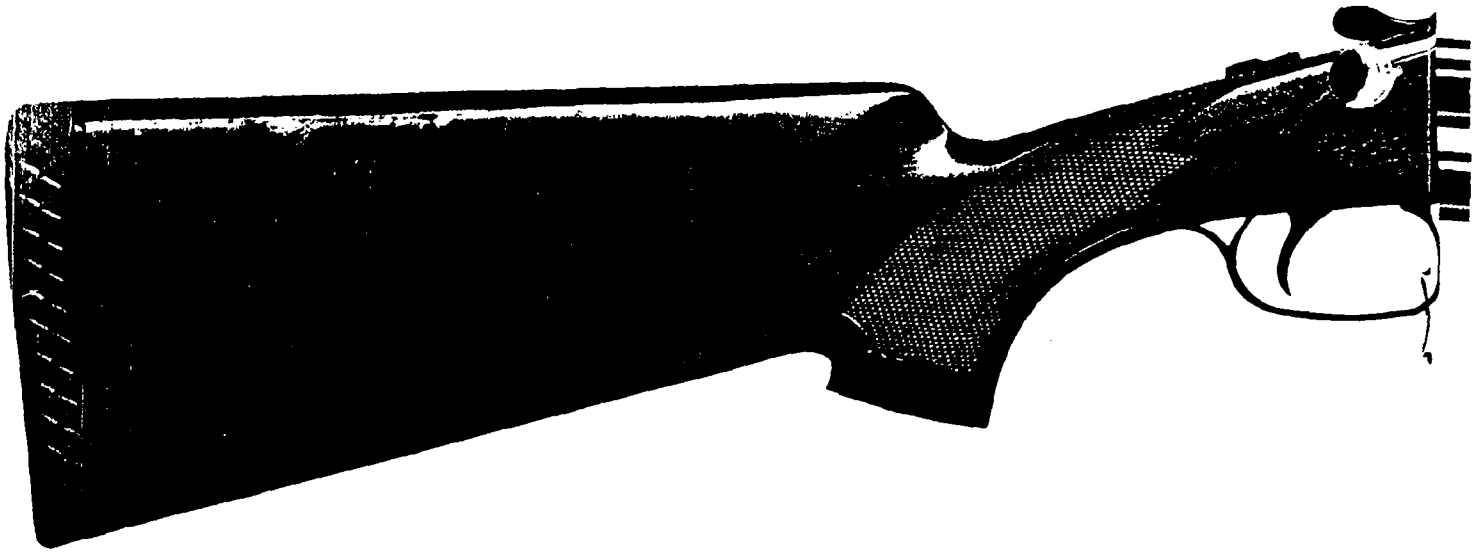
R2525348

1973

Introducing the Remington 3200.

R2525349

1973.

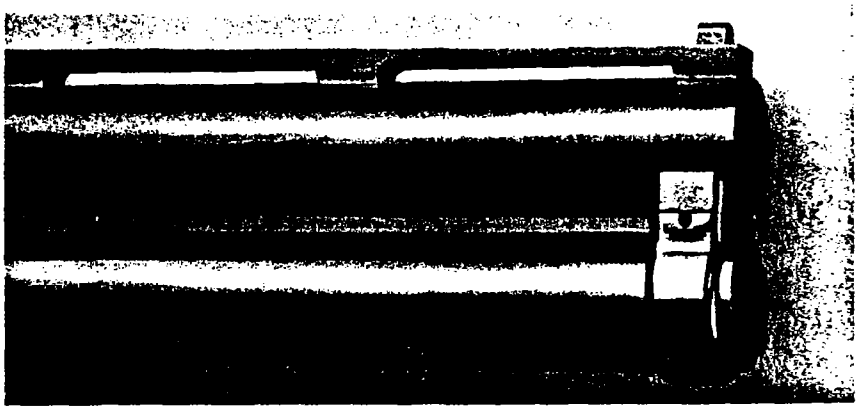


Straight-line recoil—it reduces recoil sensation and helps keep you on target for the second shot. The 3200 was designed with a lower center of gravity in the bottom barrel. So recoil is straight back and is absorbed by your shoulder rather than your cheek. A shooter's face is more sensitive to recoil than his shoulder; therefore, a gun with less muzzle jump produces less recoil sensation and allows for faster recovery with the second shot.

In most shotguns, the line of recoil is above the top of the stock. This causes the muzzle to jump up after firing, and more recoil is felt in your cheek than your shoulder. This upward muzzle movement slows your swing and interferes with quick pointing for the next shot.

Separated barrels—the advantages are many, but primarily they help you shoot straighter, shot after shot. All over-and-under shotguns are subject to great heat and pressure. And as the heat builds up, the metal expands. So if one barrel gets hotter than the other—as often happens—it will expand and elongate. If the barrels are solidly attached to one another, the elongation of one barrel will act directly on the alignment of the second. When this occurs, the barrels' point of impact can change.

In the 3200, this problem is eliminated through the use of separated barrels. There's an air space between barrels. And where the barrels are joined at the muzzle, a barrel band spacer allows each barrel to elongate independently. So it doesn't matter how much hotter one barrel gets than the other—the point of impact won't drastically change.



This independent elongation of the barrels allows us to scientifically pre-set the optimum point of impact for each barrel, so that the shooter will always get the best possible point of impact.

The separated barrel construction also allows us to use more steel in the barrels at the breech and to provide stronger, more uniformly durable chambers.

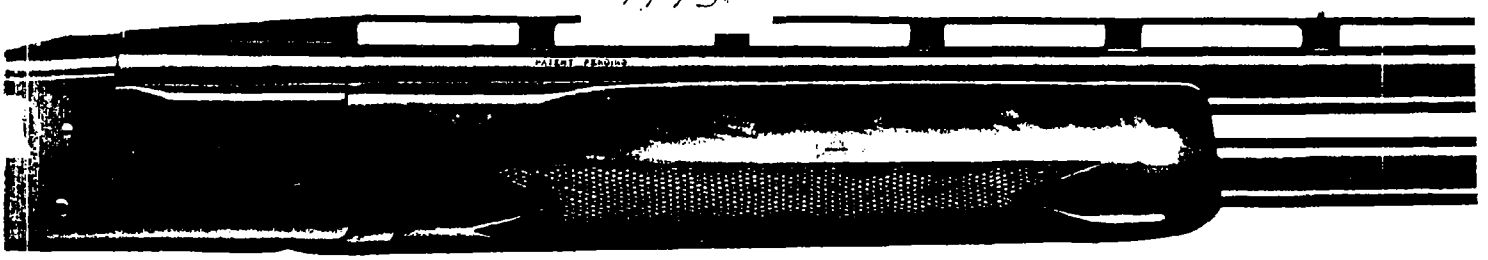
We have also eliminated the problem of popping ribs (the breaking loose of a soft solder bond due to recoil). The rib on the Remington 3200 is silver brazed, rather than soft soldered, and that's a real tough bond.

The space between the barrels also helps keep them cooler by allowing air to circulate around them. This gives you other advantages, too. For example, you don't get interfering heat waves which can blur your sight picture, there's less wind resistance when you're swinging your gun, and there's no chance for moisture to collect between the barrels. In short, we think it's the best possible design you can have in an over-and-under shotgun.

Super-fast lock time. The lock time in the 3200 is 1.4 to 1.8 milliseconds. We think it's the fastest lock time of any shotgun available

R2525350

1973



For years, shooters have been asking us, "When are you going to make the old Model 32 again?" Now we are. With extra features that make it an even better gun. Here's the story on the NEW REMINGTON 3200:

anywhere. We've tested a wide variety of models and haven't found anything faster. In fact, in the 3200, the shot is out of the barrel before it leaves the shell in most guns. Target shooters and hunters know what this can do to increase performance.

Unique, new barrel selector. The 3200 has a combination safety

and barrel selector. With one "fast" motion, you can select either the top or bottom barrel, and it's possible to lock trap and skeet guns in position for as long as you like. It can't be tampered with or "accidentally" switched.

Positive action mechanical fire control. Many over-and-under shotguns have an inertia fire control system which requires recoil to cock the gun for the second shot. If, for some reason, the first barrel doesn't fire, the second won't, either.

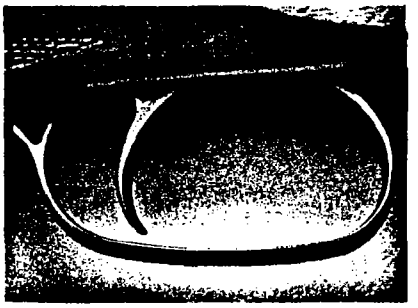
The design of our 3200 mechanical fire control assembly allows the second barrel to shoot regardless of what happened in the first barrel. It's a more positive and reliable system.

Firing pins—an improvement. Although it's a problem for all other over-and-under shotguns, the firing pins on the 3200 will *not* break when dry firing. And, quite frankly, we'll be surprised if any break under actual use.

Remington engineers designed them so that the hammers never hit the firing pins in an empty chamber. It's a minor point—until you have to put in a new one.

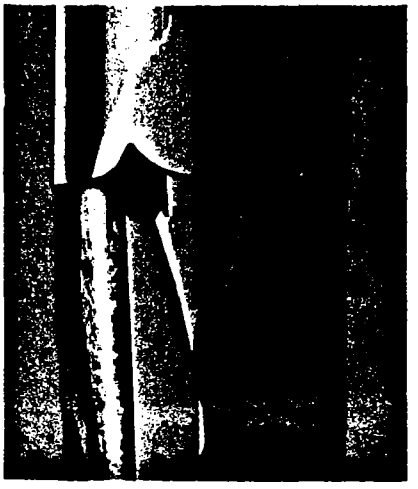
In some over-and-unders, the firing pins are struck by unequal hammer blows, causing misfires. In the 3200, these light firing pin blows are eliminated through the use of special coil springs. These extremely durable springs deliver equal, positive hammer blows every time.

Balance and handling—by design, an easy, pleasurable gun to handle. Mechanically, the Remington 3200 is a fine-tuned shotgun. And it feels that way, too. Its balance is just right, directly over the barrel hinge points. So it's comfortable and easy to handle. Our



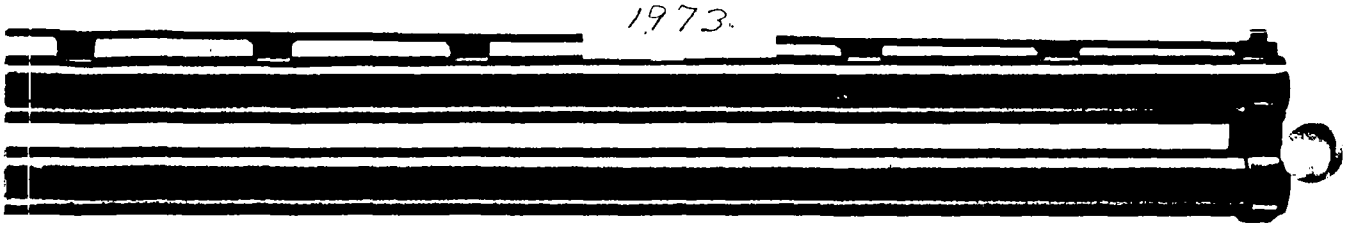
trigger is wide (5/16") and gives you a better feel.

Our lock-up design permits a thinner profile and better balance, thus making the gun easier to carry and easier to handle.



R2525351

1973.



Remington 3200 "Special" Trap

Durability—on top of everything else, this gun is made to last. The Remington 3200 is extremely rugged. The barrels are locked to the frame by extra strong side lugs. Adding to this increased metal-to-metal strength and durability is a sliding top lock, which also provides a shield-covered breech. This design gives the gun a trim, graceful profile.

Thicker, more uniform chamber walls eliminate potentially weak

areas. And our machined-steel frame also adds to the overall durability.

The American walnut stock and fore-end are distinctively checkered, 20 lines to the inch. And, as in all Remington shotguns, the wood is protected by our RK-W finish. It's tough, hard and scratch-resistant—and will hold up through years of rough outdoor use.

Designed and made in U.S.A. This is another unique feature of the 3200. It's made in America by many of the gunsmiths whose fathers and grandfathers produced our famous old Model 32 over-and-under. So you're assured of top American workmanship and service.

The Remington 3200: it's come a long way in 40 years.

Remington 3200 "Special" Trap. The 3200 "Special" Trap has all the features of our regular trap gun, but offers a selected American walnut stock and fore-end. It will satisfy the discriminating shooter who prefers choice walnut and distinctive cut checkering.

"One of 1,000" Trap. To commemorate Remington's reentry into the over-and-under shotgun field, we will build, in 1973 only, 1,000 high grade Remington 3200 trap guns.

These elaborately engrave models will bear the "one of 1,000" designation on the frame side, and the guns will be serial numbered from one to 1,000.

A special high grade American walnut stock and fore-end features a distinctive checkering pattern. A gold inlay grip cap accents the finely figured regular or optional Monte Carlo stock.

The frame, trigger guard and fore-end latch are engraved in an ornate floral design similar to guns in the thousands-of-dollars price range.

Model 3200 "one of 1,000" trap guns will be supplied in a quality luggage-type carrying case. Shipments of this model will begin in mid-1973.

Remington. DU PONT

Great guns deserve great ammunition.
We make both.

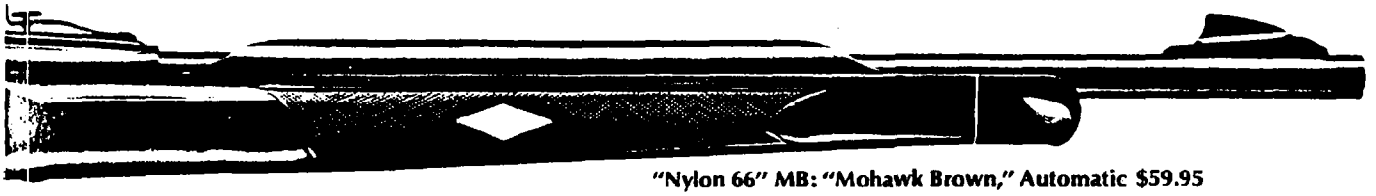
R2525355

"N[illegible] 1973 [illegible]" Automatic Rim Fire Rifles

Model 552 "Speedmaster" Automatic Rim Fire Rifles



"Nylon 66" MB: "Mohawk Brown," Automatic $59.95

Action-Designed Shooting Systems

The "Nylon 66" automatic is a record-setter for endurance, consistent performance, and accuracy. Remington test engineers fired 75,000 rounds from the same "Nylon 66" without malfunction . . . and it remained in good firing condition. The "Nylon 66" was used to establish a world's record on hand-thrown 2¾" wooden blocks . . . with only 6 misses in 100,010 and not a single malfunction. That's proof positive of this remarkable 22 caliber automatic's toughness and performance.

It's durable because of its extra-tough structural nylon stock and fore-end . . . and lightweight at four pounds. The stock's distinctive, functional checkering assures secure handling. The DuPont "Zytel" material will not warp, crack, chip, peel, or fade for the life of the gun. The action never needs lubrication because metal parts glide on greaseless nylon bearings. "Nylon 66" accuracy lies in the same barrel-bedding principle used on the most expensive target rifles. The "Nylon 66" is available in "Apache Black" with chrome-plated barrel and receiver or "Mohawk Brown" with blued barrel and receiver. Both are tube fed and have a capacity of 14 Long Rifle 22 cartridges.

The Model 552 "Speedmaster" offers rim fire shooters an all-around automatic. These 22s are well-balanced for fast, accurate firing. The tube-fed Model 552 handles Shorts, Longs, and Long Rifles with no trouble or adjustment . . . and it shoots as fast as you can pull the trigger.

Styled after Remington's big-game 742, the 552 BDL Deluxe attracts attention with an American Walnut stock, custom checkering, RK-W wood finish, and black grip cap. Crisp looks go together with fast-shooting and fine features. Blade ramp front sight and step adjustable rear sight with windage screw.

The Model 552 A "Speedmaster" has a smooth American Walnut stock, tapered fore-end, adjustable rear sights, and bead front sights. Model 552 automatics are also available in carbine version with short 21" barrel and in a "Gallery Special" version. All of these Model 552 "Speedmaster" rifles have convenient, positive cross-bolt safeties. Receivers are grooved for tip-off scope mounts.

Fast, trouble-free action makes them hunting and plinking favorites. Remington experience makes them automatically a top value.

Hard-hitting Remington "Hi-Speed" 22s with "golden" bullets mesh perfectly with barrel rifling of "Nylon 66" and 552 "Speedmaster" rifles. Each bullet is coated with a special lubricant to stay clean in pockets or under dirty conditions . . . and to prevent leading or fouling in barrels "Hi-Speed" 22 cartridges come in specific sizes for specific ranges. Short, Long, or Long Rifle 22s and hollow point or solid bullets.

The best way to buy Long Rifle "Hi-Speed" 22s is in convenient "Power-Pak" plastic boxes. The re-usable plastic case holds 100 cartridges. It keeps moisture and dust out and cartridges securely in place. The "Power-Pak" package dispenses bullets quickly and easily in the field. Fits readily in a shooter's pocket.

1973.

Model 572 "Fieldmaster" Pump Action Rim Fire Rifles

Slick Pump Action 22 Shooting Systems

Pump action preferences carry all the way through the Remington line to this 22 caliber "Fieldmaster." Its exclusive cartridge-feeding design prevents jamming and permits easy single loading. Simply remove the inner-magazine tube to convert this 572 pump into a single-shot rifle. This makes the "Fieldmaster" a fine choice for a boy to learn and stay with.

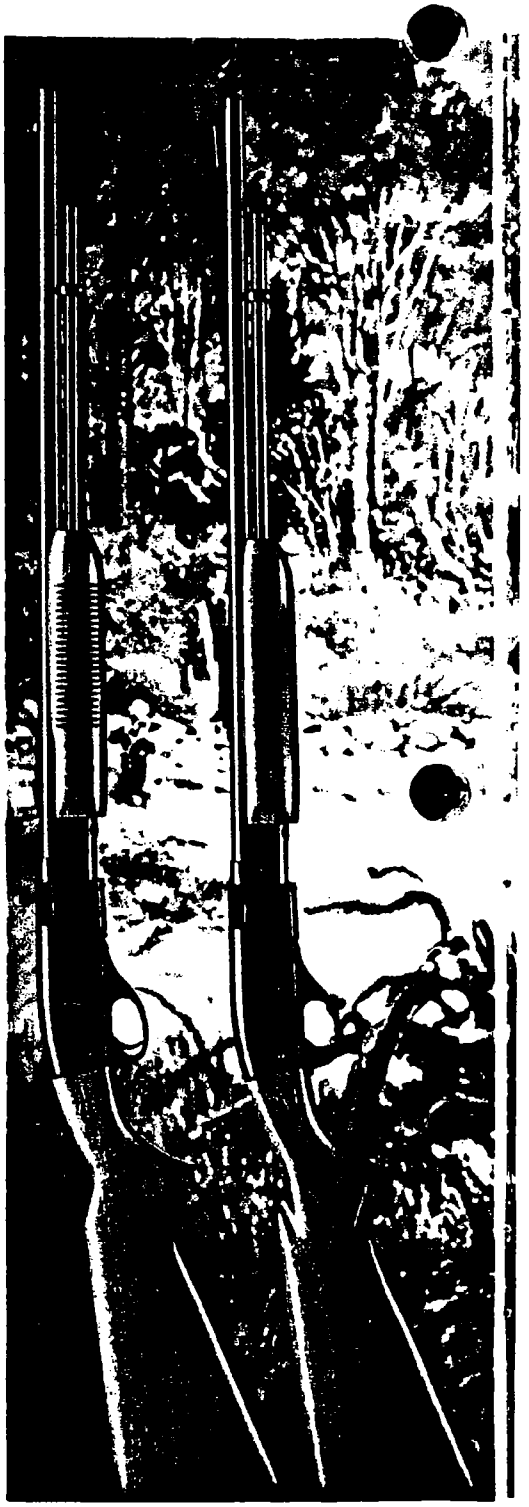
The Model 572 "Fieldmaster" is rugged and dependable. Streamlined design and fine balance make it good-looking and easy-handling. The action is slick and smooth. The receiver has dovetail grooves for tip-off scope mounts. Cross-bolt safety at rear of trigger guard snaps on or off with the index finger. The tubular magazine holds 20 Short, 17 Long, or 14 Long Rifle cartridges.

It comes in three versions: 572 A with sure-grip ribbed fore-end, 22 caliber smooth bore, and BDL Deluxe. The BDL adds custom checkering and RK-W wood finish, big-game type sights, and black grip cap. All make 22 pump shooting a pleasure.

Remington Standard Velocity 22s are made for shorter-range hunting, informal target shooting, or plinking. Though not as powerful as "Hi-Speed" cartridges, they're extremely accurate within their range. Standard Velocity is available in 22 Long Rifle or Short sizes with solid lead bullets. The short-range accuracy of Standard Velocity "Target" Long Rifle cartridges makes them favorites for target-shooting practice. Rifle tournament competitors use these "Target" Long Rifle cartridges in practice sessions . . . to try to equal scores they achieved with Remington Rifle Match ammunition in actual tournaments.

Standard Velocity Short and "Target" Long Rifle 22 cartridges are available in new 100 Paks. Remington Standard

Velocity cartridges and "Hi-Speed" 22s with "golden" bullets provide the rim fire shooter a complete and versatile ammunition selection. Both utilize "Kleanbore" priming for fast ignition without causing rust or corrosion in the barrel. "Hi-Speed" or Standard Velocity 22s get the most out of your Remington rim fire rifle.



Model 572 A "Fieldmaster": Pump Action $74.95 Tubular magazine holds 2[illegible] Shorts, 17 Longs, 14 Long Rifles.

Model 572 BDL Deluxe "Fieldmaster": Pump Action $84.95 Extra-tough RK-W finish, custom checkering, ramped blade front sight.

MODEL 572 SPECIFICATIONS

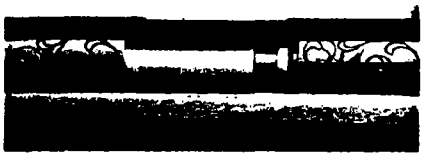
Model 541-S "Custom" Sporter Bolt Action Rim Fire Rifle

del 541-S "Custom" Sporter: Bolt Ac- $134.95 Fires Short, Long, or Long e cartridges from a five-shot clip. kered clip release. Artillery style with six locking lugs, double extrac- Positive, serrated thumb-type safety.

Distinctive 22 Caliber Shooting System

The Model 541-S "Custom" Sporter is the gun you can't afford not to own. Created by Remington gunmakers for two purposes: to give the shooter a high-grade 22 sporting rifle with the precision accuracy and rugged dependability of the 540X

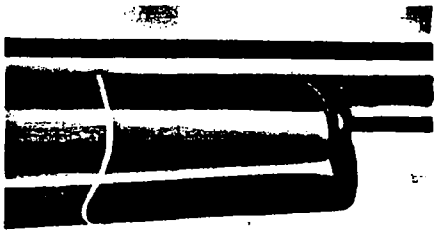


target rifle . . . and to sell at a price anyone can afford.

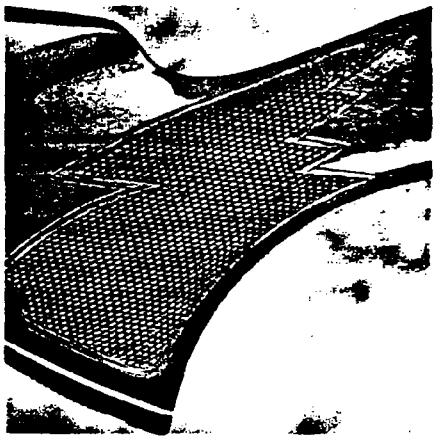
This clip repeater bolt action "Custom" Sporter is Remington's most recent entry into the fine grade of 22 caliber sporting rifles. The one-piece stock configuration is gracefully shaped with a thin pistol grip and streamlined fore-end. Finely cut checkering feels as good as it looks. The American Walnut stock is protected by a durable, shining DuPont RK-W wood finish. Rosewood-finished fore-end tip, grip cap, and butt plate are accented by contoured white line spacers. Receiver and trigger guard bear distinctive engraving.

The striking appearance of the 541-S is further enhanced by its specially blued receiver and tapered barrel. This all-American-made 22 caliber rifle achieves the look of elegance every gunmaker seeks.

Remington takes the "Custom" Sporter's features beyond good looks. The Model 541-S has a match-type adjustable trigger, swept-back bolt handle, highly polished bolt. Additional features include the low profile safety, steel trigger guard and floor plate. Receiver and barrel drilled and tapped for scope mounts, open iron sights, or grooved for tip-offs. All are standard equipment.



An artillery-style bolt and rear lock-up give the Model 541-S "Custom" Sporter extra strength. Six locking lugs engage in the grooved receiver when the bolt is closed on the cartridge. Double extractors assure fast, positive ejection.



The 541-S "Custom" Sporter has it all . . . handsome appearance, exceptional features, strength, dependability, and target rifle accuracy. Anyone who appreciates fine guns will recognize the "Custom" Sporter as a magnificent example of Remington craftsmanship.

MODEL 541-S SPECIFICATIONS

ACTION: Bolt, clip repeater. **CALIBER:** 22 rim fire, Short, Long, or Long Rifle cartridges. **CAPACITY:** 5 shot clip (10 shot clip available as accessory), checkered clip release. **BARREL:** 24", tapered, deep rich blueing, ordnance steel, drilled and tapped for front and rear sights, crowned at muzzle. **STOCK:** American Walnut, Monte Carlo, checkered, RK-W wood finish, checkered rosewood finished butt plate and grip cap, rosewood finished fore-end tip. White line spacers at butt plate, grip cap and fore-end tip. **SIGHTS:** None supplied, barrel and receiver drilled and tapped for scope mounts or receiver sights; receiver grooved for scope mounts. **SAFETY:** Positive, serrated thumb type, safety indicator markings, forward for fire, rearward for safe. **BOLT:** Artillery style rear lock-up, six locking lugs, double extractors, highly polished. **RECEIVER:** Round ordnance steel, grooved, drilled and tapped for scope mounts or receiver sights, deep rich blueing, engraving. **TRIGGER:** Adjustable match type, steel trigger guard engraved. **OVERALL LENGTH:** 42⅝". **WEIGHT:** 5½ lbs.

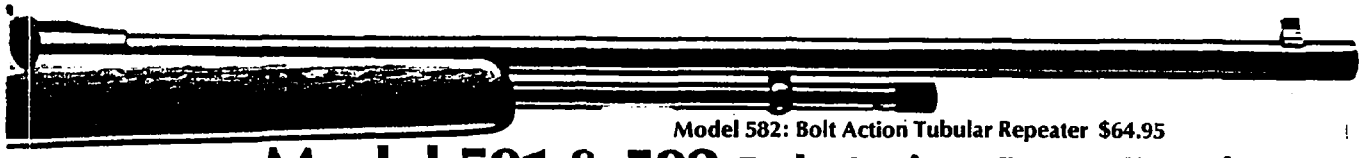
R2525359

Model 580, 581 & 582 Bolt Action Rim Fire Rifles

1973



Model 582: Bolt Action Tubular Repeater $64.95

Model 591 & 592 Bolt Action 5mm Remington Rim Fire Magnum Rifles

Versatile Rim Fire Shooting Systems

Remington's Model 580 Series help develop good shooting habits. All feature artillery-type bolts with rear lock-up for incredible strength. Close the bolt on a cartridge and six rotary locking bolts engage in the grooved steel receiver. This lock-up design makes the actions solid, secure, and extra strong. For all their strength, these bolt actions are silky smooth and easy to operate. Trigger pull is crisp and clean.

Features fit a young shooter's needs: extra-large trigger guards, non-slip thumb safeties, dual extractors, bolt covers, bead front and U-notch adjustable rear sights. Round steel receivers permit more precise stock bedding . . . which contributes to greater accuracy. Receivers are grooved for tip-off scope mounts.

The 580 "Boys' Rifle" has a shorter stock for better fit. It and the 580 are both single-shot models. As a beginner matures, he can choose the 581 clip repeater in right or left hand versions . . . or the 582 tubular repeater. A youngster's first 22 should be a rifle he can be proud of. The Remington 580 Series have the proud look and feel of big game rifles.

Model 591 and 592 Magnums have the fastest lock time of any present rim fire rifles tested by Remington. Both are chambered for the powerful and accurate 5mm Remington Rim Fire Magnum cartridge. The 591 clip repeater and 592 tubular repeater bolt action rifles deliver center fire power and performance in the fastest rim fire hunting caliber made.

The 5mm Remington Rim Fire Magnum cartridge proved so powerful that Remington engineered these new bolt actions specifically to handle it. Six extra heavy rotary lugs on the bolt form a tight lock-up with grooves in the one-piece steel receiver . . . the same as the most powerful center fire rifles. Unique two-stage extractors assure safety by completely enclosing the cartridge head.

Fast lock time, match trigger quality, and precision-bored barrel assure accuracy. Features speak for themselves: full-size Monte Carlo stocks, positive thumb safeties, round receivers grooved for scope mounts. Precision-rifled 24" ordnance steel barrels are crowned at the muzzle and finely blued. Bead front sight and U-notch lock screw rear sight.

5mm Remington Rim Fire Magnums with "Power-Lokt" bullets are capable of accurate, clean varmint wallop at 150 yards. They are the fastest rim fire cartridges made (muzzle velocity of 2,100 feet per second), the most accurate long range rim fires for hunting, and the only rim fires made with super-accurate "Power-Lokt" bullets. Larger than a Long Rifle cartridge (comparison illustrated in photo below). Great for long-range varmint and small game or informal target shooting.

...mington Target Rifles

Superbly Accurate Shooting Systems for Championship Performance

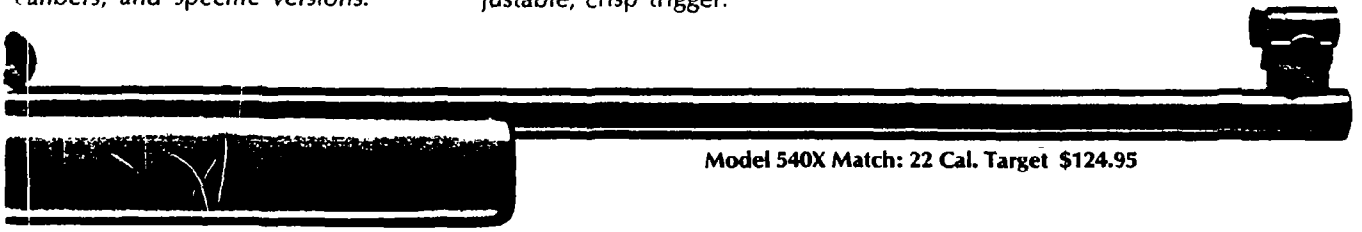
Model 40-XB "Rangemaster" Center ire is available as a repeater for use National Match Courses or as a ngle shot. Heavy-barrel models are lip-slotted for conventional five-shot clips. Repeating models come only in calibers equal to or shorter than the loaded length of the 308 artridge. They load from the top of the receiver. Magazine has a hinged floor plate. Extreme accuracy, short bolt throw, and optimum weight make the 40-XB center fire repeating rifle ideal for rapid-fire events.

The action is hand-bedded, and the stainless steel barrel is free-floating. The single shot model is offered in a variety of center fire calibers. See center fire target rifle specifications for a complete listing of features, calibers, and specific versions.

Model 40-XB "Rangemaster" Rim Fire features a loading platform that provides straight-line feeding. The high comb is grooved for bolt removal. Mershon non-slip rubber butt plate, adjustable sling swivel, and hand stop are standard equipment. Crisp, wide trigger is adjustable. Thumb operated safety. Extra-strong bolt with double extractors. Receiver drilled and tapped for all standard sight mounts. Long rail for adjustable fore-end stop. Redfield Olympic sights are optional.

Model 540X Match Rim Fire is designed for Intermediate and Junior shooters. This target rifle has a unique five-way adjustable butt plate. The stock can be adjusted with the same wrench for length of pull and vertical pitch or cant (left or right). Fully adjustable, crisp trigger.

Remington Match Long Rifle 22s and Match-Quality Center Fire Components make the finest scores when used in these target rifles.



Model 540X Match: 22 Cal. Target $124.95

Model 40XB-BR Bench Rest Center Fire provides the inherent accuracy advantages of a short 20", heavy, stiff barrel. Built with all the features of the 40-XB center fire model, but modified for competitive bench rest shooting. Wide, squared fore-end for extra stability. With the Remington target scope, this rifle weighs just under 10½ pounds and meets weight limitations for sporter and light-varmint classes of NBRSA competition. A 13½ pound, 26" barrel version is available for heavy-varmint class.

International Free Rifles, center fire or rim fire, feature a 40-XB action, precision heavy barrel, two-ounce trigger, adjustable palm rest, front sling swivel, butt plate and hook.

Remington 24-Power Target Scope contains optics of the highest quality. Relatively short length permits fore and aft receiver mounting. Light weight permits greater flexibility in assembling rifle and scope combinations to meet NBRSA requirements. Designed for bench rest accuracy.

Nowhere is the qualitative matching of gun and ammunition more critical than in target shooting. Improved ballistics and precision production make Remington bullets exceptionally accurate. Uniform primers and brass cases help assure high accuracy.

Remington Match ammunition and target rifles work together to help the target shooter get as close as possible to a one-hole group. Count on Remington quality, consistency, and system compatibility for superior results.

RIM FIRE TARGET RIFLE SPECIFICATIONS

Remington sporting firearms and ammunition for 1974 continue a tradition of excellence that has endured for 158 years. These modern shooting systems are known and respected throughout the world of shooting and hunting.

Remington Model 1100 Automatic Shotguns meet the many challenges of the outdoors with proven dependability and exceptional versatility. The 1100 is designed for superior performance in any weather with all types of loads. Its unique gas metering system requires no adjustment to operate with all 2¾" standard velocity, "Express", and 2¾" Magnum shotgun shells. This capability allows the hunter to use the proper loads for a wide variety of game, all in the same shotgun.

For even greater all-around capability, extra barrels, interchangeable within gauge and chamber length, are available. To handle different shooting conditions, hunters simply change pre-fitted barrels in the field in seconds without special tools.

Barrels chambered for 2¾" sh should not be interchanged with 3 Magnum-chambered barrels. Magnum barrels should not be interchanged on standard receivers. 20 gauge lightweight barrels interchange only on 20 gauge lightweight receivers. Left hand barrels interchange only on left hand receivers.

Remington shotgun shells and Remington shotguns combine to fo unified shooting systems. "Expres and "Shur Shot" field loads now come in new packages color-coded by load and shell type for convenient identification . . . yellow for "Express" and red for "Shur Shot".

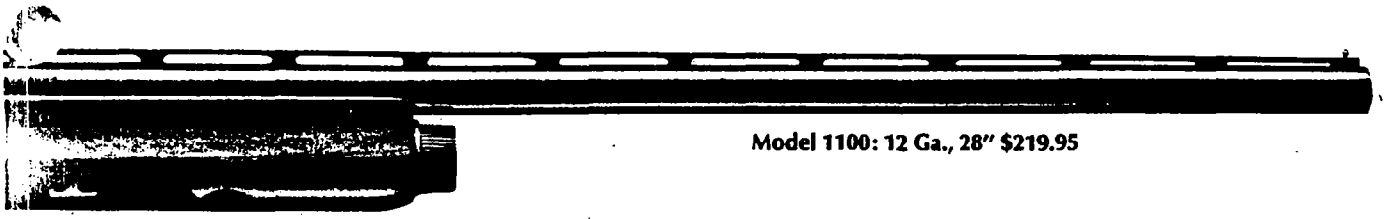
1974

Model 1100 Automatic Shotguns
12, 16, 20, 28 & 410 Gauges



Model 1100: 12 Ga., 28" $219.95

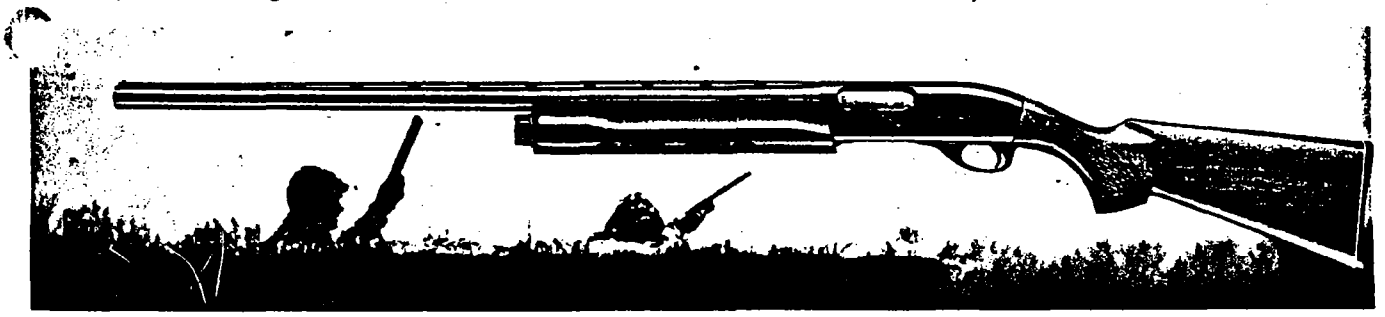
Remington automatic shotguns are available in a wide range of specifications to fit individual requirements. There's a Model 1100 to match any hunter's game, gauge, and personal preference. Field grade models are available in 12, 16, 20, 28, and 410 gauges. 20 gauge lightweight models in standard or Magnum are easy-carrying, but have a high-strength receiver machined from a single steel unit. There are 12 and 20 gauge 3" Magnums; left hand models in 12 and 20 gauges; trap and skeet guns; and a deer gun with rifle sights. All models except the deer gun come in a variety of barrel lengths and chokes.

The Model 1100 is America's best-selling shotgun because it has everything experienced hunters look for in an automatic . . . shooting ease, great performance, dependability, strength, and handsome appearance.

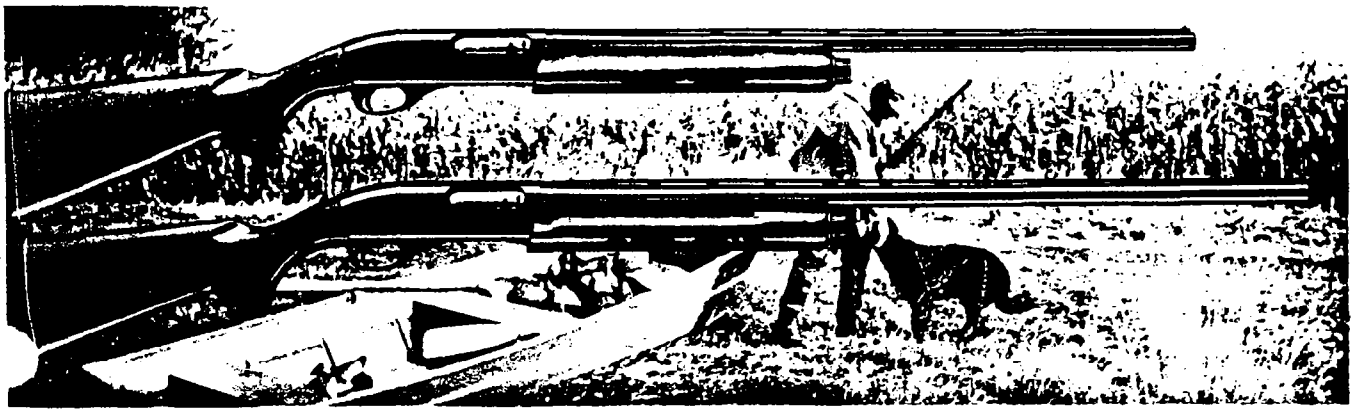
Effect of recoil is less with the 1100 than any other shotgun. The unique gas-operated action reduces recoil to a push instead of the kick usually associated with shotgunning. Remington design strength and craftsmanship pay off in greatly extended shooting life. The Model 1100 remains ready for use long after many other automatics are shot out.

Model 1100 appearance makes this shotgun a pleasure to own and display. Decorative scrollwork enhances the solid steel receiver and chrome-plated bolt. Exclusive vibra-honed finishing results in deep, rich blueing. The DuPont RK-W wood finish is lustrous, tough, and scratch-resistant. Deep, sure checkering, white line spacers, and tear-drop pistol grip cap add the right style touches.

All of these features plus Remington know-how and experience . . . as the oldest manufacturer of shotguns in America . . . keep the 1100 in a class by itself.



Model 1100 Left Hand: 12 Ga., 28" $224.95 Reversed ejection port and safety for left-handed shotgunning comfort and efficiency. Left hand Model 1100s are also available in a 12 gauge 3" Magnum. All with ventilated rib barrels.

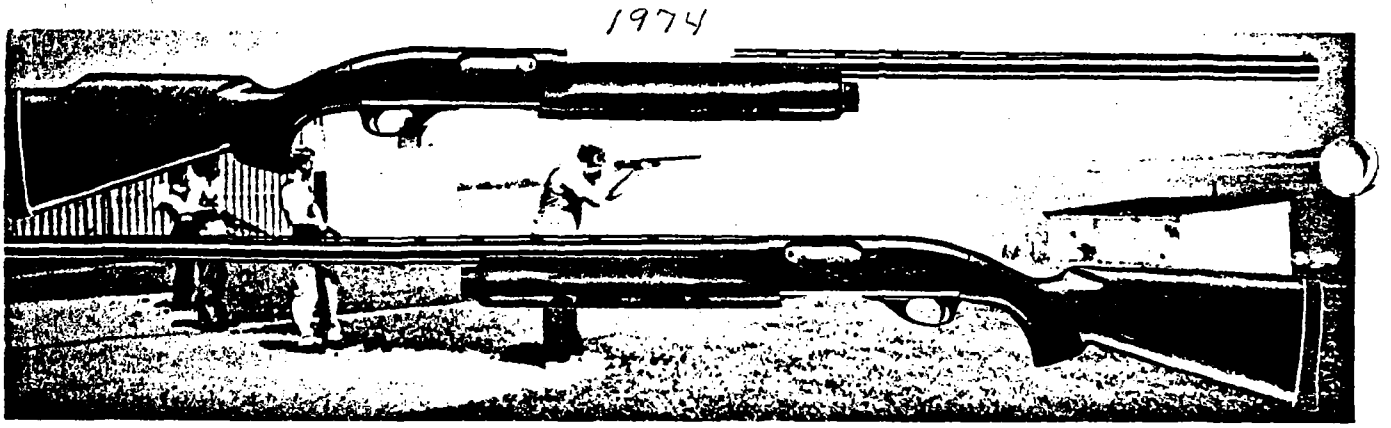


Model 1100: 20 Ga. Lightweight, 26" $229.95 Carries light during a full day's hunting. 6½ pounds. Handles all 2¾" loads. Also available in lightweight Magnum model with 3" chamber. Ventilated rib or plain barrel. Mahogany stock and fore-end.

Model 1100: 12 Ga. Magnum, 30" $239.95 Available in left or right hand models. Handles 3" Magnum and all 2¾" Magnum shells only. Ventilated rib or plain barrel. Magnum models also in 20 gauge.

R2525365

1974



Model 1100 TBMC Trap: 12 Ga., 30" $274.95 Competition-proven reliability. Minimum recoil sensation. Rubber recoil pad. Available in full or modified trap chokes. Ventilated rib barrel. Monte Carlo stock optional.

Model 1100 Left Hand TB Trap: 12 Ga., 30" $269.95 Eliminates "wrong-side ejection" for southpaw trapshooters. Ivory front and metal rear sights. Full trap choke only. Optional Monte Carlo stock.

MODEL 1100 SPECIFICATIONS

For all Remington Model 1100 Automatic Shotguns: **STYLE:** Gas-operated. **BARREL:** Special Remington Ordnance Steel. Extra barrels interchangeable within gauge. 20 ga. lightweight barrels interchangeable only within lightweight models. **RECEIVER:** Made from solid steel, top matted, scrollwork on chrome-plated bolt and both sides of receiver. **STANDARD STOCK DIMENSIONS:** 14" long, 2½" drop at heel, 1½" drop at comb. **SAFETY:** Convenient cross-bolt type. **SIGHTS:** Metal bead front.

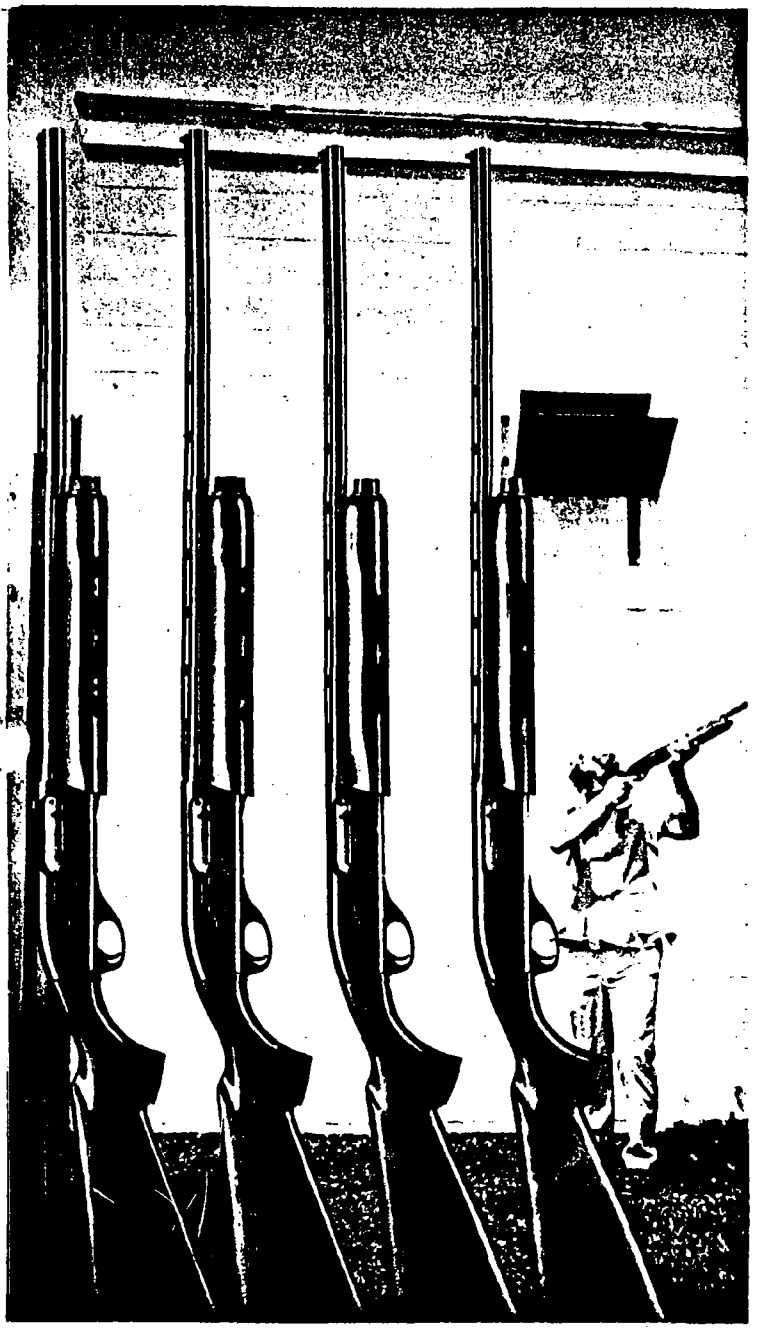
(adjustable weight will add up to 12 oz. in Skeet guns).

R2525366

1974

Model 1100 Trap & Skeet Guns
12, 20, 28, & 410 Gauges



The Model 1100 stands alone as the most popular automatic shotgun for trap and skeet. At the 1973 World Skeet Championships, there were more Model 1100s on the line than all other brands and models combined. Model 1100 SA grade skeet guns come in 12, 20, 28, and 410 gauges with left hand versions in 12 and 20 gauge. SB grade skeet guns with specially selected wood are available in 12 and 20 gauge. All have special skeet-bored barrels.

Model 1100 TB trap grade guns have won more championships at the Grand American, state, and zone shoots in the last ten years than any other automatic. Their minimum recoil sensation reduces fatigue during long shoots, and their reliability makes every shot count. TB grade 1100s are available with regular or Monte Carlo stocks in full or modified trap chokes. Left hand models in full choke only.

Model 1100 SA Skeet: 12 Ga., 26" $229.95 A smooth-swinging competitor. Ivory front, metal rear sights. Checkered composition butt plate. Also available in ft hand model or with Cutts ompensator.

Model 1100 SA Skeet: 20 Ga., 26" $229.95 "The class" of 20 gauge skeet events. Ventilated rib barrel is specially skeet-bored. Left or right hand models.

Model 1100 SA Skeet: 28 Ga., 25" $239.95 All of the same 1100 features and performance in a smaller gauge. Perfect balance at 6¾ pounds.

Model 1100 SA Skeet: 410 Ga., 25" $239.95 Reliable gas-operated action. Weighs in at 7¼ pounds. Match-weight skeet caps, optional for 28 and 410 gauge guns, will add up to 12 ounces.

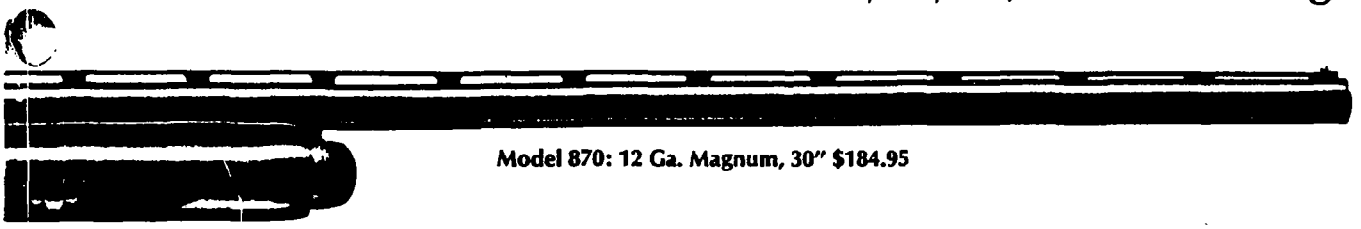
Model 870 Left Hand: 12 Ga., 26" $169.95 Pump-action shooting comfort for left-handed hunters. This mirror-image 870 has the safety and ejection port on the left side. Also available in 20 gauge or Magnum 12 gauge, all with ventilated rib barrels. Metal front bead and convenient cross-bolt safety.

R2525368

Model 870 "W 1974 er" Pump Action Shotguns
12, 16, 20, 28 & 410 Gauges



Model 870: 12 Ga. Magnum, 30" $184.95

Remington makes pump action shotgunning a pleasure with the smooth-handling Model 870. Double action bars prevent twisting or binding. The 870 feeds and ejects positively under all hunting conditions.

Variety of selection in gauge, grade, and specifications permit the hunter to match the correct model to his personal preferences. Field grade 870s go after game in 12, 16, 20, 28, and 410 gauges. Left-handers can select 12 or 20 gauge left hand models with reversed ejection ports and safeties. Pump action deer guns with rifle sights come in 12 or 20 gauge.

For the long shots necessary in waterfowl or western cornfield hunting, Remington offers the Model 870 Magnum in 12 or 20 gauge.

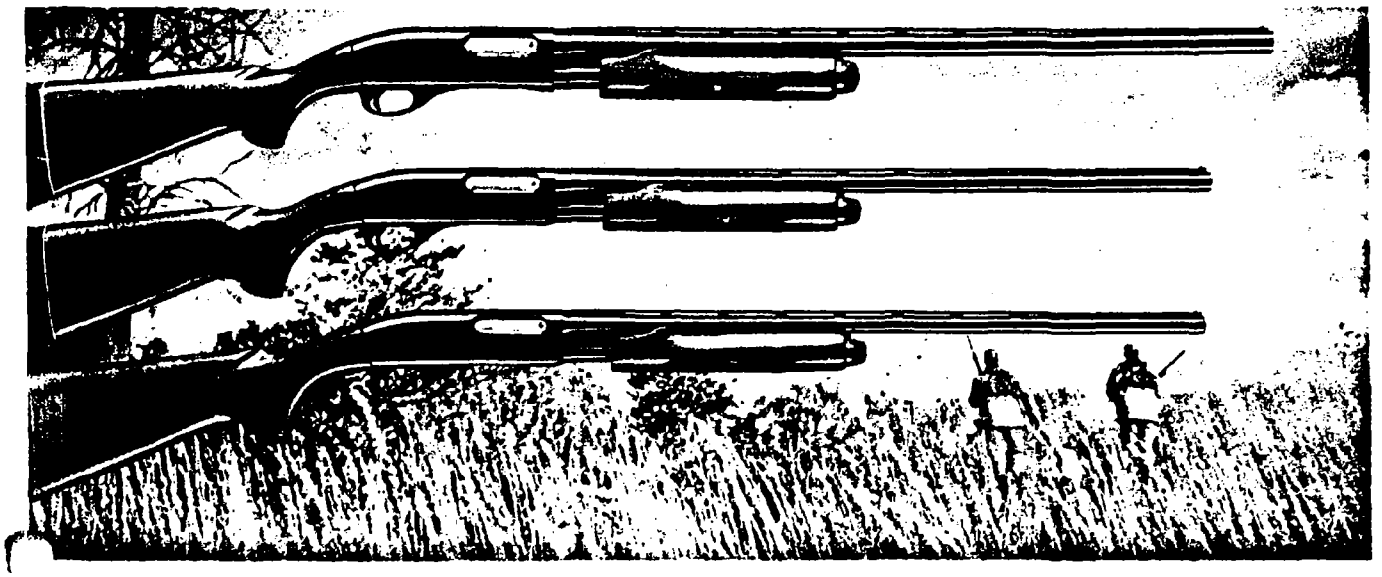
"Wingmaster" 20 gauge lightweight shotguns are designed for hunters who spend a full day walking and shooting. Lightweight steel receivers provide super-strength and secure lock-up, yet help reduce over-all weight. The 26" plain barrel lightweight weighs only 5¾ pounds. All 870 Magnum and lightweight Magnum models are chambered for 3" Magnum, 2¾" Magnum and high or low-base shells.

Interchangeable barrels give the hunter different choke and barrel length combinations for the same receiver. In 12 gauge, the 870 offers 21 barrel combinations. Remington interchangeable barrels require no factory or gunsmith fitting. **Magnum and lightweight barrels should only be interchanged on matching Magnum and lightweight receivers.**

Model 870 appearance matches its smooth performance. Fine wood is enriched and protected by the DuPont RK-W wood finish. All metal parts . . . inside and out . . . are "vibra-honed" for a lustrous blue finish and a smooth, gliding action.

Fast, dependable perfomance, shooting ease, and top-gun appearance are the reasons why more than two million sportsmen own Model 870 shotguns.

"Express" and "Shur Shot" shells have the "Power Piston" one-piece wad that cushions shot and keeps it round for true flight and denser patterns.



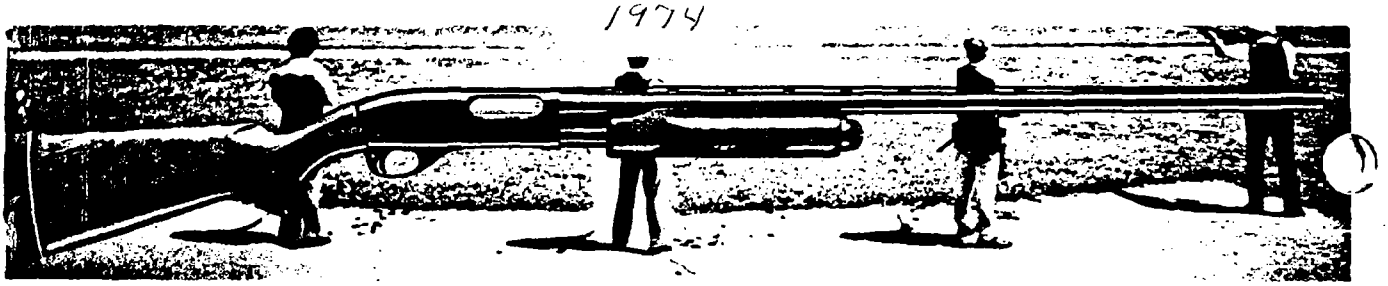
Model 870: 12 Ga., 28" $164.95 Uses all 2¾" Magnum, "Express", and standard velocity shells without adjustment. Double action bars for smooth, sure ejection. Interchangeable barrels for different game are available at additional cost.

Model 870: 20 Ga. Lightweight, 26" $174.95 Light weight makes this gun a welcome hunting companion. Small, extra-strong steel receiver. Weighs only about six pounds. Ventilated rib or plain barrel. Also available in Magnum model.

Model 870: 28 Ga., 25" $174.95 The right gun for the hunter who seeks the challenge of a smaller gauge. Plain barrel or ventilated rib, interchangeable barrels for increased versatility. Proven 870 dependability.

R2525369

1974



Model 870 TB Trap: 12 Ga., 30" $204.95 Still trapshooting's proudest pump-action performer after many years and many championship titles. Right and left hand models. Ventilated rib barrel. American Walnut stock with fleur-de-lis checkering pattern. Monte Carlo stock optional. Rubber recoil pad.

MODEL 870 SPECIFICATIONS

For all Remington Model 870 Pump Action Shotguns: **STYLE:** Manual pump action. **BARREL:** Special Remington Ordnance Steel. Extra barrels interchangeable within gauge. 20 ga. lightweight barrels interchangeable only within lightweight models. **RECEIVER:** Made from solid steel, top matted, chrome-plated bolt. **STANDARD STOCK DIMENSIONS:** 14" long, 2½" drop at heel, 1⅝" drop at comb. **SAFETY:** Convenient cross-bolt type. **SIGHTS:** Metal bead front.

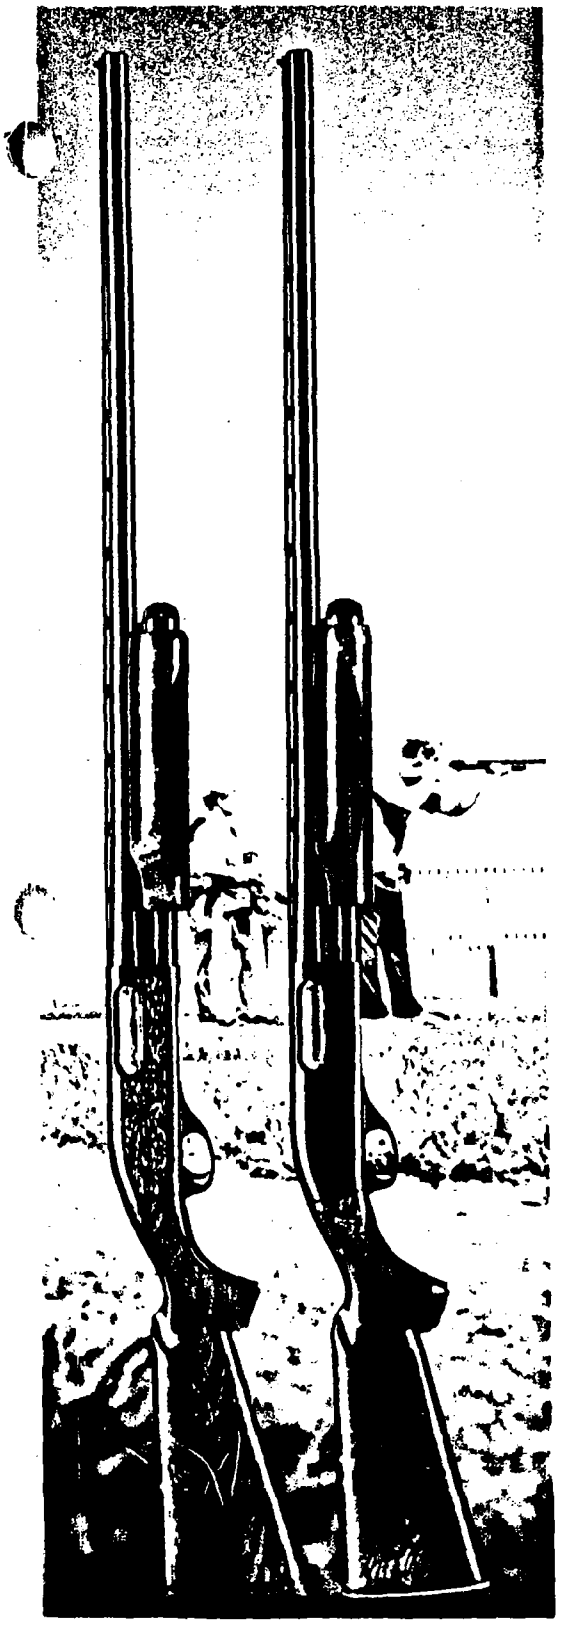
Model 870 Trap & Skeet Guns
12, 20, 28 & 410 Gauges



Dependable performance has made the Model 870 a favorite in trap and skeet competition. Clay target shooters trust these pump action guns for fine balance, feel, and trouble-free operation.

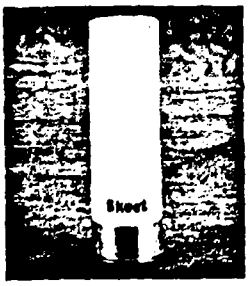
The 870 "All-American" trap gun leads the team with Premier Grade features, distinctive medallion, and championship appearance to match its shooting abilities. TC grade guns carry select fancy wood and hand checkering. TB grade trap models give trapshooters an option for the same superb performance at slightly lower costs. Both TB and TC grades are available in full or modified trap chokes. Left hand TB grade models offer left-side ejection to southpaw shooters in full choke only. All give the option of regular or Monte Carlo stocks.

Skeet shooters who prefer pump actions can select the deluxe SC grade Model 870 with fancy hand-checkered wood in 12 or 20 gauges. SA grade skeet guns come in all four gauges.

Every one of these trap and skeet 870s features a ventilated rib barrel with metal rear bead and ivory front sight. All are sure-handling, smooth-shooting, reliable competitors.

odel 870 "All-American" Trap: 12 Ga., 30" $55.00 Rich, selected American Walnut stock and fore-end with deep, fine checkering. Decorative scrollwork engraving. Gold oval pistol grip, distinctive medallion, and special carrying case. **Model 870 TC Trap: 12 Ga., 30" $279.95** Select American Walnut stock and fore-end are hand checkered, Monte Carlo stock optional.

"RXP" shotgun shells in 12 gauge loads for trap and skeet and 20 gauge loads for skeet deliver superior performance and reloadability. In new green and blue boxes.



New 20 gauge "RXP" shotgun shells give skeet shooters advanced shell construction and great patterning performance.

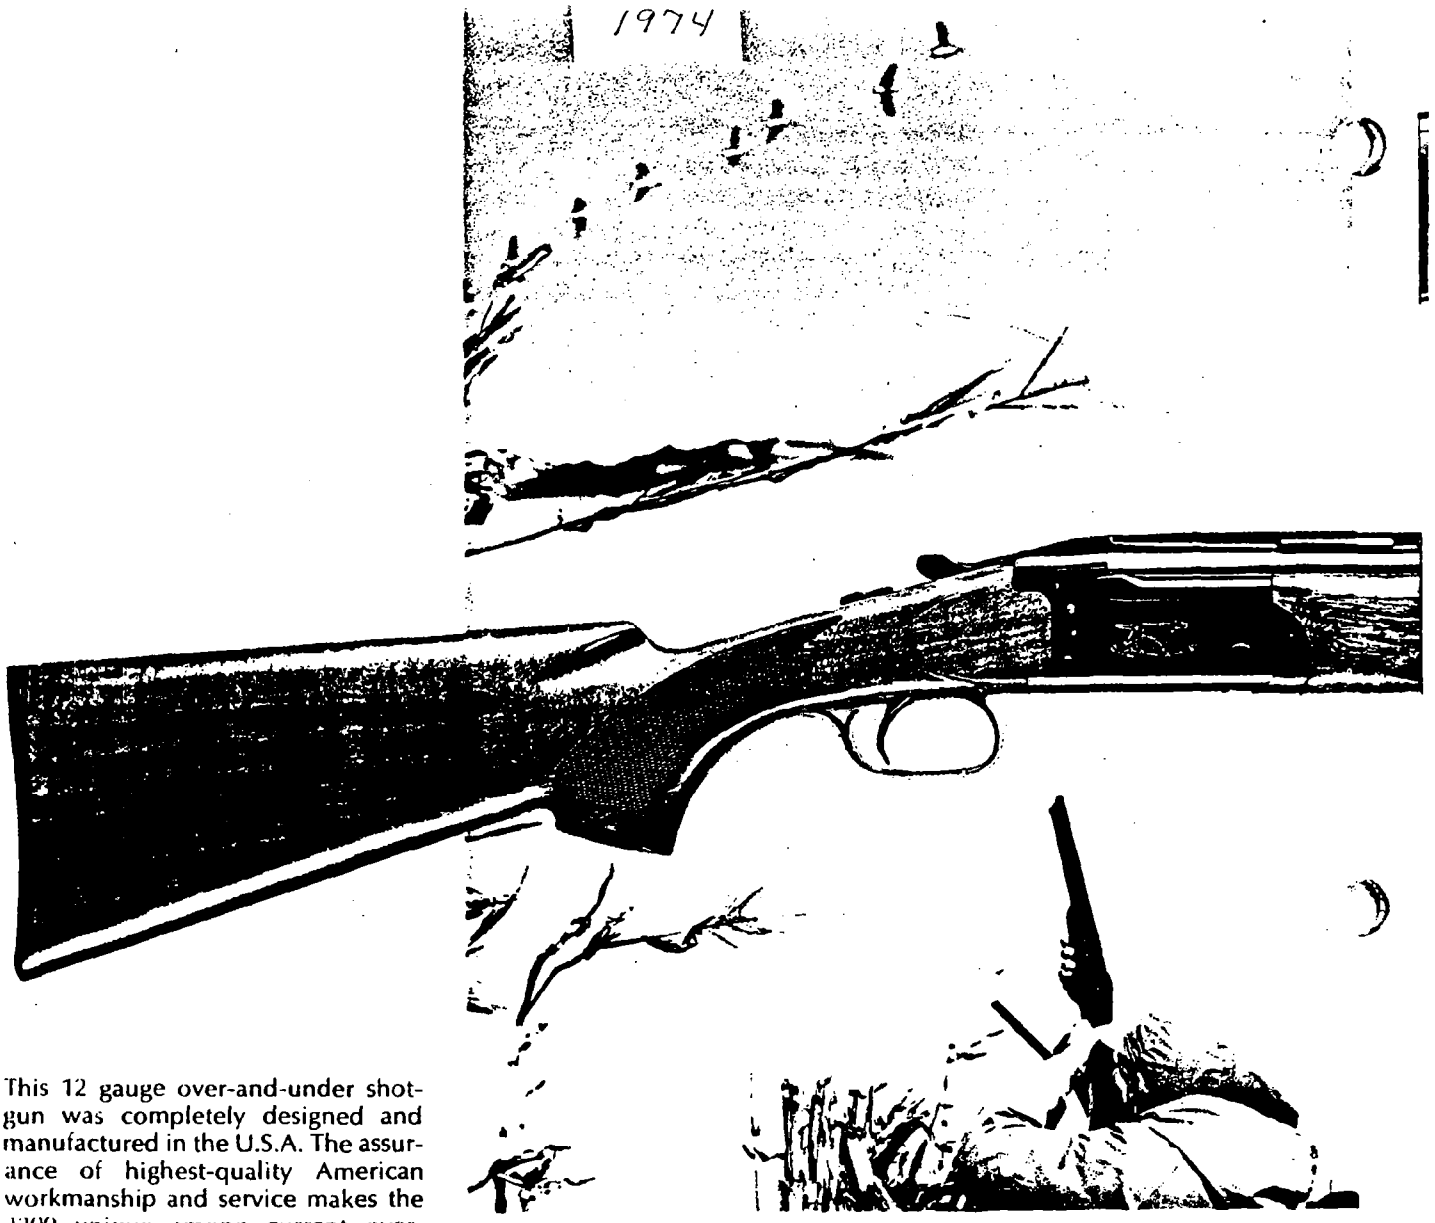
R2525371

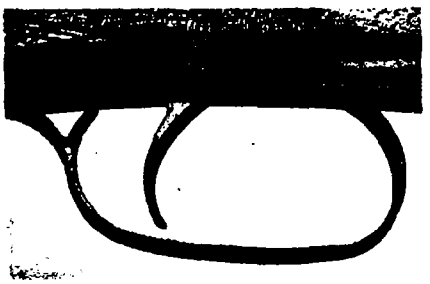
1974



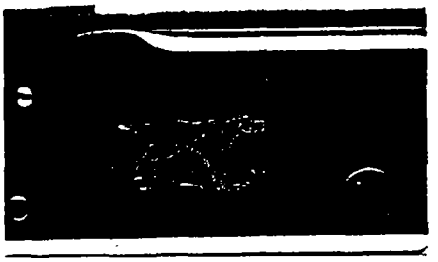
This 12 gauge over-and-under shotgun was completely designed and manufactured in the U.S.A. The assurance of highest-quality American workmanship and service makes the 3200 unique among current over-and-unders.

Remington virtually redesigned the over-and-under shotgun to incorporate every desirable feature in the 3200. These guns are super-strong and extremely rugged . . . made to last for generations. Design strengths are evident throughout the entire gun. Barrels lock to the frame by extra-strong side lugs. The sliding top lock increases metal-to-metal strength and provides a shield-covered breech. This design also results in a trim, graceful profile. Thicker, more uniform chamber walls eliminate potentially weak areas . . . and the machined steel frame adds to overall strength and durability.

Wood-to-metal fit is an outstanding display of gunmaking craftsmanship. American walnut stocks and forends are checkered at 20 lines to the inch. And the wood is protected by DuPont RK-W finish . . . tough and scratch-resistant against years of rough handling.



Super-fast lock time is another advantage of the 3200. At 1.4 to 1.8 milliseconds, the shot leaves the



3200's barrel before it leaves the shell in most guns.

Straight-line recoil reduces recoil sensation and helps keep the shooter on-target for the second shot. The 3200 has a lower center of gravity in the bottom barrel. This design permits the shoulder to absorb recoil, reduces upward muzzle jump, and allows faster recovery for the second shot.

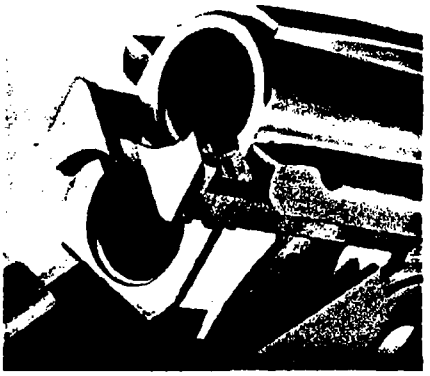
R2525372

1974

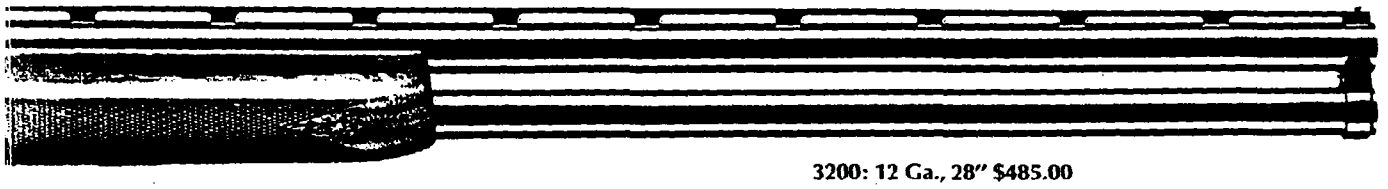
3200 Over-and-Under Shotguns

12 Gauge

Improved firing pin design means firing pins will not break when dry firing. Remington engineers positioned them so that the hammers never hit a firing pin in an empty chamber. And light firing pin blows are eliminated with the use of special coil springs. These durable springs deliver equal, positive hammer blows every time . . . eliminating a major cause of misfires in many other over-and-under shotguns.



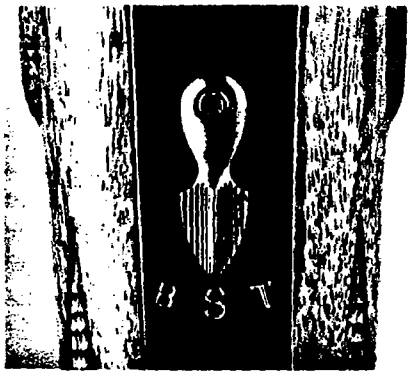
The positive-action mechanical fire control assembly insures that the second barrel will shoot, even if the first barrel fails to fire for any reason. This reliable system solves the failure problems of many over-and-under shotguns which require recoil to cock the gun for the second shot. The 3200's second barrel is designed to fire independently.



3200: 12 Ga., 28" $485.00

Separated barrels. After prolonged firing, heat can cause barrel expansion and a subsequent change in barrel alignment. Separated barrels eliminate this problem by the air space between them. The barrel band spacer at the muzzle allows each barrel to expand or elongate independently so point of impact will not be drastically affected. This permits scientific pre-setting of each barrel for optimum point of impact and helps maintain proper barrel alignment.

The separated barrel design also allows the use of more steel in the barrels at the breech to provide stronger and more uniformly durable chambers. The space between barrels cools by allowing air to circulate . . . eliminating heat waves that can blur sight picture. There's less wind resistance when swinging the 3200 and no chance for moisture collection between barrels. The ventilated rib is silver brazed, rather than soft soldered, for the strongest possible bond.

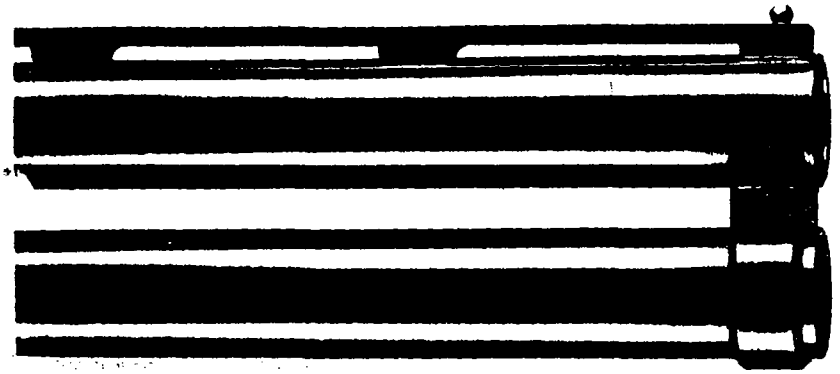


The unique barrel selector is combined with the safety on the 3200. A single, fast motion selects top or bottom barrel. Trap and skeet models can be locked in position . . . tamper-proof for as long as the shooter wishes. Automatic ejectors eject empty hulls on breech opening; unfired shells raise above chamber level for easy extraction.

Mechanically, the Remington 3200 is a finely-tuned shotgun. Designed for great balance and easy shooting comfort. Its balance point is directly over the barrel hinge points. Thinner-profile from improved lock-up design makes the 3200 easier to carry and handle. Unique design strongpoints make it one of the best all-around and most modern over-and-unders ever manufactured.

Remington 3200 field guns are available with 26", 28", and 30" barrels in 12 gauge only. All have decorative scrollwork on receivers, wide triggers and modified beavertail fore-ends. The 3200 is Remington's modern version of a classic over-and-under.

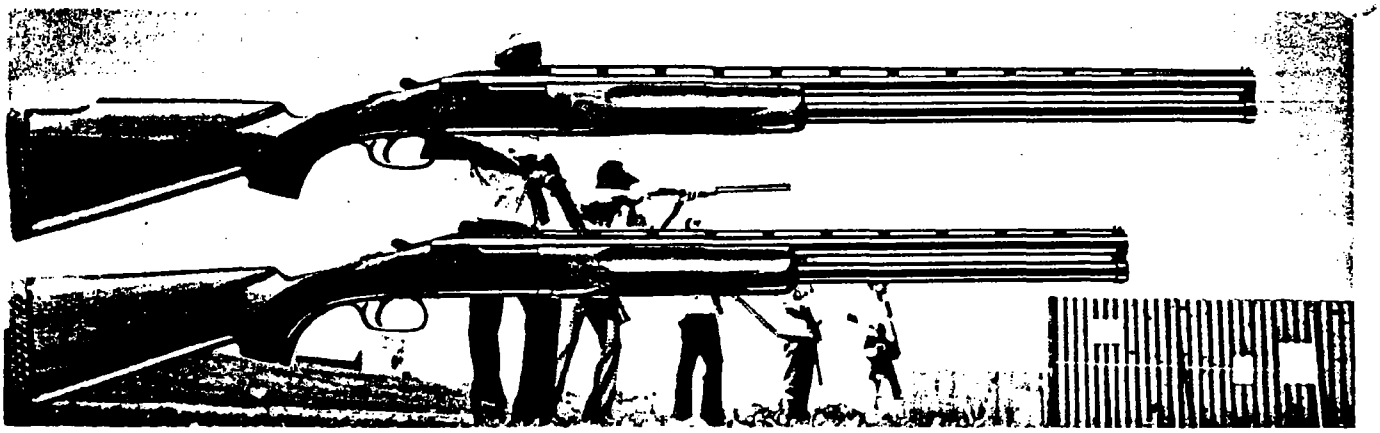
A special "One of 1,000" Remington 3200 Skeet Gun will be available on a limited basis during 1974. The designation "One of 1,000" appears on the frame side, and these guns are serial numbered to 1,000. Frame, trigger guard, and fore-end latch are engraved in an elaborate floral design. The special high grade American walnut stock and fore-end carries distinctive checkering. Gold inlay grip cap. Option of 26" or 28" skeet bored barrels. Supplied in a luggage-type carrying case.



1974

3200 Trap & Skeet Guns

12 Gauge



3200 Monte Carlo Trap: 12 Ga., 30" $550.00 The new over-and-under favorite of trapshooters. With rear metal bead and ivory front bead. Full beavertail fore-end. Recoil pad. Ventilated rib barrels in Full and Full or Improved Modified and Full chokes.

3200 Skeet: 12 Ga., 26" $530.00 Available with 26" or 28" Skeet and Skeet barrels. Metal rear and ivory front sights. Automatic ejectors. Fine American Walnut and tough DuPont RK-W wood finish. Recoil pad. This 3200 hits doubles with easy confidence.

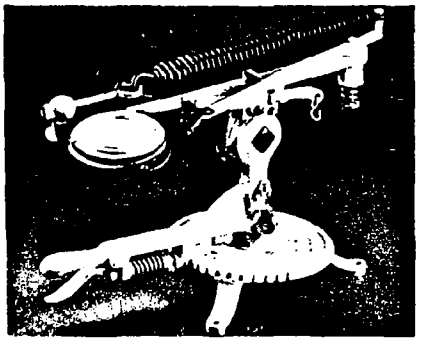
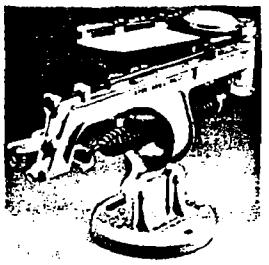
pecial trap grade for the trapshooter
ho wants a special shotgun.

New Model 4100 Trap autoloading, autoangling

Remington's new electrically-operated target-throwing system throws clay targets with improved spin, consistent flight angle, and greater in-flight stability under all wind conditions. Adjustable carrier clears platform on every release. Horizontal autoloading magazine controls trap breakage of targets under one per cent, loads 154 targets in less than one minute, handles all target brands. Random autoangling makes this trap non-readable. Angle settings up to 90° spread. Safer manual feeding features. Throws stable, consistent doubles. (not illustrated)





"Blue Rock" Clay Targets

Fluorescent orange and standard bright yellow colors give these clay targets excellent visibility under all conditions. "Blue Rock" targets feature a streamlined design to increase flight distance. Weight is balance-fixed . . . with thin dome and heavy rim for optimum stability and spin. And they break readily by a hit from only a few pellets. "Blue Rock" targets are packed 135 per carton.

Remington Target Thrower

This easy-to-use hand thrower puts shotgunning practice within reach . . . anywhere at any time. "Blue Rock" targets, a safe place, and a willing arm are all that is necessary. Simulate game, trap, or skeet situations to improve your shooting. Beginners need only a few practice throws to gauge distance and direction. A quality American-made Remington hand thrower provides hours of family fun . . . and an excellent teaching device.

"Expert" Trap

Take this manual "Expert" trap along on vacations or weekend trips. It's strong, lightweight, and compact enough to transport easily in boat or car. Easy to load and operate. Adjustable for elevation and distance. Ideal for walk-around shooting courses and covey-rise trapshooting layouts . . . and a valuable shooting instruction aid.

"Blue Rock" Trap

The manually-operated "Blue-Rock" trap releases high, low, or doubles by a simple control lever. The shovel-type carrier, similar to types used on more expensive traps, assures fast spin, consistent direction and distance. Designed for straight trap or skeet shooting, this trap is appropriate for small clubs and private estates.

Remington Shotgun Shells
with "Power Piston" Wads

Remington shotgun shells contain advanced features and technology that pay off in high performance:

Plastic hulls are tough and smooth-chambering. They lock out moisture and completely seal in gases for fullest power. The inner hull wall is designed for best practical wad sealing and seating to keep power behind the shot. Hulls will not scuff, swell, or split under normal conditions. Remington hulls have a special coating to help prevent chamber corrosion.

Powder is specifically blended to match the load . . . for clean burning, light recoil, and best pattern performance.

"Kleanbore" priming provides fast, sure ignition and freedom from worry over barrel rust. Primers match the individual load and provide ballistics uniformity in all weather. **Shot** is truly round . . . hardened to prevent deformation. Made in Remington shot towers.

Reloadability stems from the strength of the special plastic formula used to make Remington hulls. They give as many or more reloads than any shell . . . and they reload on any standard press.

Reloadability, reliability, and the right components make Remington shotgun shells a shooter's first choice. In a versatile range of loads and shell types for any game.

12 Gauge "Express" Shell: 2¾", 1¼ ounce, high base with "Power Piston" wad.

16 Gauge "Express" Shell: 2¾", 1⅛ ounce, high base with "Power Piston" wad.

20 Gauge "Express" Shell: 2¾", 1 ounce, high base in four different loads.

28 Gauge "Express" Shell: 2¾", ¾ ounce, high base with "Power Piston" wad.

410 Gauge "Express" Shell: 2½" or 3" maximum power with special shot container.

"Power Piston" One-Piece Wads give "Express" and "Shur Shot" shotgun shells an extra effective advantage. This exclusive plastic shot container cushions the shot throughout firing and down the barrel. The specially-designed shock absorber section reduces initial shock and minimizes shot-to-shot deformation. The base acts as a seal to help prevent gas from pushing past the shot column. The one-piece plastic wad protects the shot from the inside of the barrel. It all adds up to rounder shot shape, truer flight, and more perfect patterns without barrel leading . . . v up to 10% more effective and eve distributed shot in a uniform pattern.

R2525376

1974

"Express" Shotgun Shells in 10, 12, 16, 20, 28 & 410 Gauges
"Shur Shot" Shotgun Shells in 12, 16 & 20 Gauges
2 3/4" Magnum Shotgun Shells in 12, 16 & 20 Gauges

Standard Length 2 3/4" Magnum Loads in 12, 16 & 20 Gauges

Remington 2¾" Magnum shotgun shells hold approximately 20% more shot than comparable standard 2¾" shells. Fire a 2¾" Magnum load and you put more pellets in denser patterns at longer ranges. Magnum performance increases effective range by at least 10 yards . . . and the denser pattern delivers more knockdown power. These 2¾" Magnums contain a maximum charge of special powder to drive their heavier loads.

Most Baby Magnum shells feature one-piece "Power Piston" wads. For maximum pellet weight and count, a special plastic shot protector is used in 16 and 20 gauge Baby Magnum shells. High-strength plastic hulls are specially coated . . . for extra protection against wet conditions and for smooth feeding and chambering. Give Remington Standard Length 2¾" Magnums a shot for extra-power hunting action.

This comparison chart shows approximate pellet counts and weights for standard 2¾" and 2¾" Magnum loads. Remington Baby Magnum shells contain approximately 20% more pellets.

12 Ga. Shot Size	No. Pellets per Ounce	Standard 2¾" 1¼ Ounces	Baby Magnum 2¾" 1½ Ounces	Pellet Increase
#2	87	109	130	21
#4	134	168	201	33
#6	221	276	331	55

Any modern shotgun in good condition will shoot these 2¾" Standard Length Magnum shotgun shells. They're recommended for waterfowl, pheasant, grouse, and wild turkey . . . and are excellent for shooting in heavy foliage. Available in 12, 16, and 20 gauges, in a variety of shot sizes.

SHOTGUNNING SUGGESTIONS

SUGGESTED SHOT SIZE GAME	SHELL	SHOT SIZE	SUGGESTED CHOKES	WHAT EXPERIENCED HUNTERS SAY . . .
DUCKS	"Express"	4, 5, 6	Full — For Pass Shooting Modified — Over Decoys	Use No. 4 shot for long range and pass shooting. For normal range — No. 5 or No. 6 shot while some hunters use No. 7½ shot for closer range shooting over decoys.
GEESE	"Express"	BB, 2, 4	Full	Goose hunters need wallop to fold up their birds so they use the big loads with large shot. Many hunters prefer No. 4 shot for a denser pattern at shorter ranges over decoys.
PHEASANTS	"Express"	5, 6	Improved Cylinder — Close Cover Modified or Full — For Long Cornfield Shots	For cornfield shooting where long shots are usual — better use No. 5. On a normal rise over dogs and for all around use, No. 6 is the favorite. Bigger shot may be dangerous when hunting in large groups.
GROUSE OR PARTRIDGE	"Express" or "Shur Shot"	5, 6, 7½, 8	Improved Cylinder or Modified — For Brush Work Full — For Open Ranges	On the smaller birds such as ruffed grouse or Hungarian Partridge use the smaller shot. The big western grouse (sage, sooty, and blue) call for heavier loads and larger shot.
QUAIL	"Shur Shot"	7½, 8, 9	Improved Cylinder or Modified	For early season shooting on bob-whites when feathers are light some hunters use No. 9 shot. Later they switch to No. 7½ or No. 8. On the running and wild flushing type of quail, such as the Gambel's, larger shot is sometimes used.
DOVES & PIGEONS	"Express" or "Shur Shot"	6, 7½, 8	Modified	You can do a good job on mourning doves at normal ranges with the lighter loads and No. 7½ or No. 8 shot — but for longer ranges use the heavy loads and No. 6 or No. 7½. Use the same load on band-tailed pigeons and white wings.
WOODCOCK	"Shur Shot"	7½, 8, 9	Improved Cylinder or Modified	Your choice of shot size here will depend on ranges at which your game is shot. For fast shooting in the alder thickets, No. 8 shot is a good choice.
RABBITS	"Express" or "Shur Shot"	4, 5, 6	Improved Cylinder or Modified — For Brush Full — For Long Open Shots	For cottontail rabbits at normal range, the lighter loads are suitable, but for larger game such as jack rabbits and snow shoe rabbits use heavy loads.
SQUIRRELS	"Express"	5, 6	Modified	Most hunters use 5s or 6s and prefer the heavy loads particularly in the tall timber.
RAIL	"Shur Shot"	7½, 8, 9	Improved Cylinder	For the little sora rail No. 8 or No. 9 does the job while many hunters use No. 7½ on the marsh hen or clapper rail.
TURKEY	"Express"	BB, 2, 4, 5, 6, 7½	Full	Choice of shot size depends on your range. If you're a good caller, No. 6 or No. 7½ shot makes a clean kill. BBs, No. 2s, 4s, and 5s are best for long shots.
FOX	"Express"	BB, 2	Full	It's a toss-up between BBs and No. 2 shot. But remember — the smaller the shot, the denser the pattern.
DEER & BLACK BEAR	"Express"	Rifled Slug and Buckshot	For rifled slugs and buckshot any choke may be used. Best results are obtained with Improved Cylinder	For deer and black bear 12 and 16 gauge slugs are the best. 0 and 00 Buckshot are the most popular sizes for deer hunters who use buckshot.

"RXP" Shotgun Shells in 12 Gauge for Trap & Skeet Loads and 20 Gauge for Skeet Loads

Remington "RXP" shotgun shells have made a name for themselves among trap and skeet shooters. These competitors look for the new green and blue box for superior patterning performance and exceptional reloadability. "RXP" shotgun shells are designed for ideal component balance . . . and consistent championship results. Available in 12 gauge trap or skeet loads . . . and in a brand new 20 gauge skeet load . . . all with winning ways.

Super-strong uni-body design makes the "RXP" shotgun shell tough and extremely reloadable. One-piece body and base-wad construction are made of high-density polyethylene . . . strength-proven in special lab tests. The exclusive plastic forging process adds dimensional stability, reducing resizing requirements in reloading.

Reliable "Kleanbore" priming pays off in consistently excellent ignition. Dimensional stability permits extra-tight primer seal. "Kleanbore" 97* or 209 Target primers fit precisely to pocket and head, optimizing ignition reliability.

Remington target loads in 16, 28, and 410 gauges . . . and 12 gauge International Target Loads . . . are also available. All score high for quality, reliability, and performance on the field of competition.

One-piece "Power Piston" wad protects shot and helps keep it round. The light green wad also acts as a gas seal in the barrel for greater power. "RXP" shotgun shells are the only one-piece target shells factory loaded with "Power Piston" wads.

No. 8½ trap loads for 16-yards and doubles hold approximately 80 more pellets than No. 8s. These exclusive Remington 8½ loads put more hard shot in the pattern. Light or heavy loads are available for trap in No. 7½ or No. 8. Skeet shooters prefer No. 9 loads . . . now in the new 20 gauge skeet "RXP" shotgun shell.

Remington Shotgun Shell Components

The complete line for the handloader.

Reload "RXP" shotgun shells with all the Remington components that make these factory loads outstanding. Trap and skeet shooters look for two things from a shotgun shell . . . top reliability and lots of easy reloads. These 12 and new 20 gauge hulls and components for "RXP" shotgun shells give reloaders everything they seek in a shell . . . and more.

Uni-body construction provides the basic strength for continuing reloads. The one-piece body and base section form a hull that remains intact and usable again and again. A rugged high-density polyethylene and Remington's exclusive body-forging process make an extremely tough and dimensionally stable shell. Reloaders get many reloads with little need for resizing. Wads insert easily and fit precisely. The mouth and crimp are specially formed in the factory load to make later recrimping easier and more secure with many loads in any standard reloading press. No shell presently available can beat its reloadability.

"Kleanbore" 97* and 209 Target primers in plastic bodies of "RXP" shotgun shells form an extra-tight primer seal. The hull's dimensional stability and the precise primer-to-base fit means excellent reliability, particularly in guns with off-center or weak-spring firing pins. In addition, "Kleanbore" priming won't attack brass or leave corrosive residues in barrels.

"Power Piston" wads help protect shot against deformation through the entire firing process and down the barrel. They also act as a gas seal behind the shot in the barrel for greater power. The bridge-section design of the "Power Piston" wad compensates for compression. This permits the handloader to vary powder-charge weights and still obtain a perfect crimp. The RXP12 "Power Piston" wad is specially designed for "RXP" shotgun shells; its distinguishing light green color identifies it for reloaders.

Special hard shot is available to reloaders in a premium hardness grade . . . the hardest Remington has ever sold as a component. New 8½ shot gives you 80 more pellets in a 12 gauge target load than No. 8 size. This new load gets more hard shot in the 16-yard pattern to give shooters a better chance of breaking targets. Remington shot also comes in 7½ and 8 for trap and No. 9 for skeet.

Top-quality Remington components are available in all gauges. Plastic hulls provide slick operation. "Kleanbore" primers are non-corrosive and give fast ignition. "Power Piston" one-piece wads pay off in rounder shot and improved patterns. Remington makes a primer (97-4) specially designed for 410 gauge shells. The unique 410 plastic wad doesn't collapse in the reloading process. The flared wad helps prevent folded petals and keeps shot within the wad cup. There's a complete line of Remington shot for the handloader . . . from 00 buck to dust.

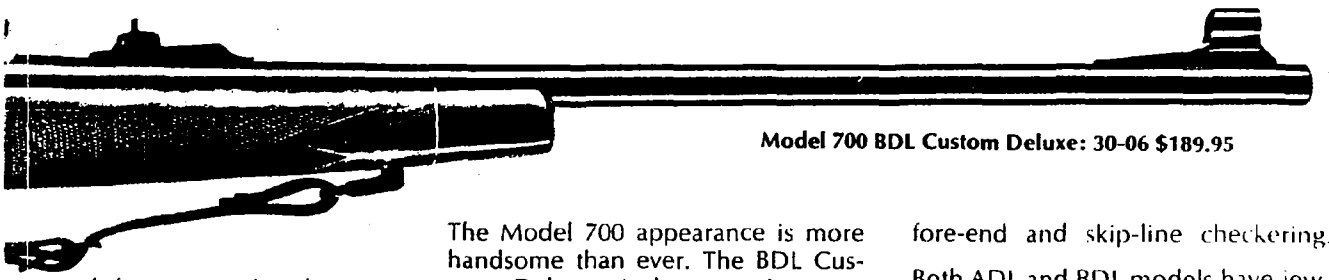
Model 700 Center Fire Bolt Action Rifles



Model 700 BDL Custom Deluxe: 30-06 $189.95

nproved features and styling give ie Model 700 a striking new look id better-handling performance in great variety of caliber selections. art with new BDL checkering . . . eep and sharp — cut 20 lines to the ich . . . wraps around the fore-end or a firmer grip and better hold.

our new anti-bind bolt assures noother operation. A section of ie bolt lug is slotted and rides on matching receiver rail. The bolt lides easily . . . without any bind r drag. A new stainless steel magane follower adds to strong, smooth peration. The redesigned bolt hanle puts 1/8" more clearance between igger finger and trigger . . . to help event banged fingers on recoil. The ew rear sight is easier to set and sier to remove for scope installaon. BDL versions feature a hinged oor plate, a hooded front sight, sling ap and swivels.

The Model 700 appearance is more handsome than ever. The BDL Custom Deluxe rivals expensive custom-made rifles. The design of the American Walnut stock improves appearance, balance, grip, and handling. The tough DuPont RK-W finish protects and highlights the wood.

The new fore-end is squared-off and fuller for a better palm-sized fit. The new pistol grip is slimmer for greater comfort and control . . . with a swept-back grip cap.

The Model 700 has one of the strongest bolt actions ever designed. Three rings of solid steel surround the cartridge head. The steel bolt face, barrel, and receiver prevent rupturing of center fire cases. No extractor cuts weaken this critical area.

Mirror-image left hand Model 700 BDL rifles put cheekpiece, safety, bolt, and ejection on the correct side for lefties. The new ADL Deluxe 700s have solid styling with sawed-off fore-end and skip-line checkering.

Both ADL and BDL models have jeweled bolts, shrouded bolt covers, and low-profile safeties. All Model 700 rifles have Monte Carlo stocks with cheekpiece, checkered bolt knobs, and detachable sights. Receivers are drilled and tapped for scope mounts.

For small-target, long-range precision work, there's the new heavy-barreled 700 BDL "Varmint Special" with all the features incorporated in the standard BDL version. The Model 700 Custom is available with personalized specifications . . . by special order only. The 700 Custom sports a handsome checkered select American Walnut stock, highly polished receiver and barrel.

The new Model 700 stands out as another example of Remington's constant effort to improve and update shooting systems . . . through research, testing, and continuing shooter interviews.

MODEL 700 SPECIFICATIONS

CK: American Walnut. BDL cut checkering 20 lines per inch. ADL has skip-line checkering. Solid rubber presentation-type recoil pads on Magnum models. BDL and "Varmint ial" Models include sling strap and quick release swivels, black fore-end tip and white line spacers. **STANDARD STOCK DIMENSIONS:** 13⅜" length of pull, 2⅜" drop at , 1⅝" drop at comb (from open sight line). "Varmint Special" stock: 13⅜" length of pull, 1⅝" drop at heel, ½" drop at comb (from center line of bore). **RECEIVER:** One- e ordnance steel with jeweled anti-bind bolt. Drilled and tapped for scope mounts and receiver sights. BDL has hinged floor plate. Stainless steel magazine follower. "Varmint Special" has 40XB type scope mounts. **SIGHTS:** Flat faced gold bead with ramp front sight. Hooded ramp on BDL. Step adjustable rear sight with windage adjustment screw. Rear sight removable for addition of scope block without drilling or tapping. "Varmint Special" without sights. **SAFETY:** Positive thumb type. BDL Models with left hand cheekpiece have left hand safety, bolt, and ejection. Model 700 ADL — Sling Strap & Quick Release Swivels (Installed) Order No. 6382 — $9.10 extra. **CUSTOM MODEL 700** — Manufactured to customer specifications. 20", 22", or 24" barrel; with or without floor plate; with hunting sights, or plain barrel with receiver drilled and tapped for scope mounts; length of pull from 13⅜" up to 14" with recoil pad. Extra charge for recoil pad, oil-finished stock, left hand cheekpiece. Only ordnance steel barrels supplied. Orders noncancellable; allow up to four months for delivery.

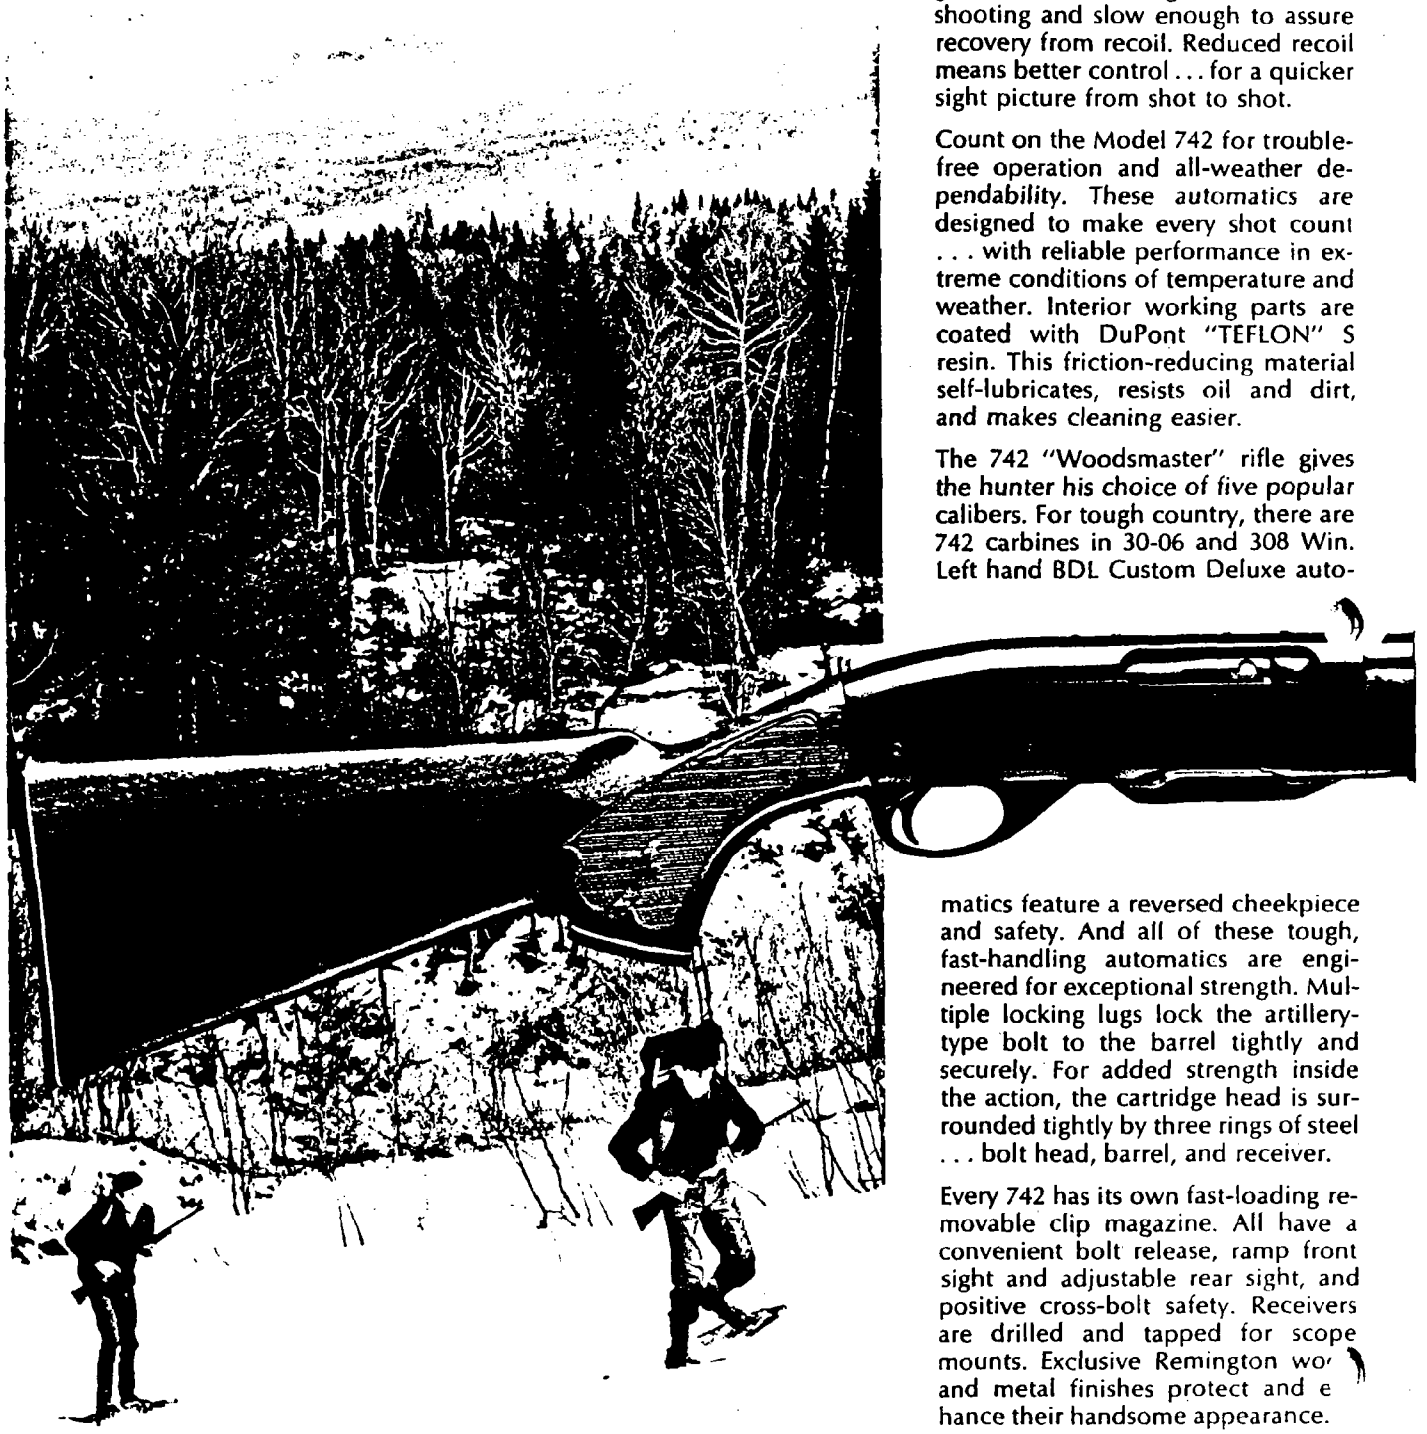
1974



Accuracy, speed of operation, and reliability combine to make the Model 742 "Woodsmaster" the ideal automatic rifle. Its action is fast enough to gain the full advantages of automatic shooting and slow enough to assure recovery from recoil. Reduced recoil means better control . . . for a quicker sight picture from shot to shot.

Count on the Model 742 for trouble-free operation and all-weather dependability. These automatics are designed to make every shot count . . . with reliable performance in extreme conditions of temperature and weather. Interior working parts are coated with DuPont "TEFLON" S resin. This friction-reducing material self-lubricates, resists oil and dirt, and makes cleaning easier.

The 742 "Woodsmaster" rifle gives the hunter his choice of five popular calibers. For tough country, there are 742 carbines in 30-06 and 308 Win. Left hand BDL Custom Deluxe automatics feature a reversed cheekpiece and safety. And all of these tough, fast-handling automatics are engineered for exceptional strength. Multiple locking lugs lock the artillery-type bolt to the barrel tightly and securely. For added strength inside the action, the cartridge head is surrounded tightly by three rings of steel . . . bolt head, barrel, and receiver.

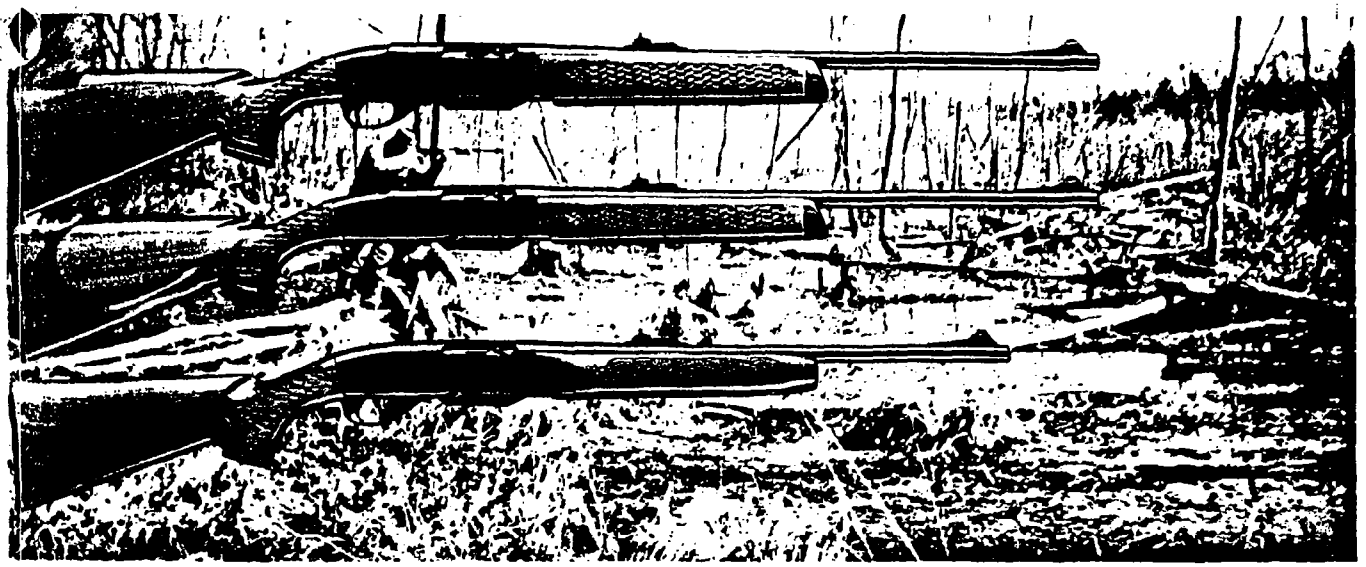
Every 742 has its own fast-loading removable clip magazine. All have a convenient bolt release, ramp front sight and adjustable rear sight, and positive cross-bolt safety. Receivers are drilled and tapped for scope mounts. Exclusive Remington wo and metal finishes protect and e hance their handsome appearance.

The Model 742 is a modern, performance-proven automatic rifle . . . the result of Remington's long experience in making automatics since 1906.

R2525382

1974

Model 742 "Woodsmaster" Center Fire Automatic Rifles

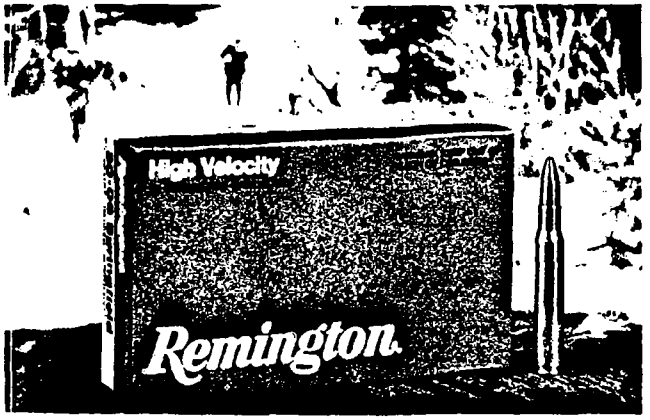


Model 742 BDL Custom Deluxe: 30-06 $209.95 An exceptionally popular automatic rifle. Fast and accurate. Basket weave checkering and Monte Carlo stock with full cheekpiece. Cross-bolt safety. Quick-loading clip holds four cartridges. In 30-06 and 308 Win. calibers.

Model 742 BDL Custom Deluxe Left Hand: 30-06 $209.95 Reversed left hand cheekpiece and left hand safety. Less recoil for greater control on the second shot. Tough DuPont RK-W wood finish. Automatic dependability. Available in 30-06 and 308 Win.

Model 742 Carbine: 30-06 $189.95 The short 18½" barrel pays off in brush country. Ramp front sight and step adjustable rear sight. Convenient bolt release. 30-06 and 308 Win. calibers. Built to take rough handling.

Model 742: 30-06 $189.95



Remington "High Velocity" center fire cartridges in a wide selection of bullet types and weights help shooters coordinate ammunition and rifle to form the complete shooting system. Used exclusively in factory testing of Remington center fire rifles, "High Velocity" ammunition delivers optimum efficiency and performance. Advanced "Core-Lokt" and "Power-Lokt" bullet designs bond core and jacket. Constant Remington testing and quality control assure controlled expansion. New green and yellow color-coded packaging sets Remington center fire cartridges apart.

MODEL 742 SPECIFICATIONS

1974

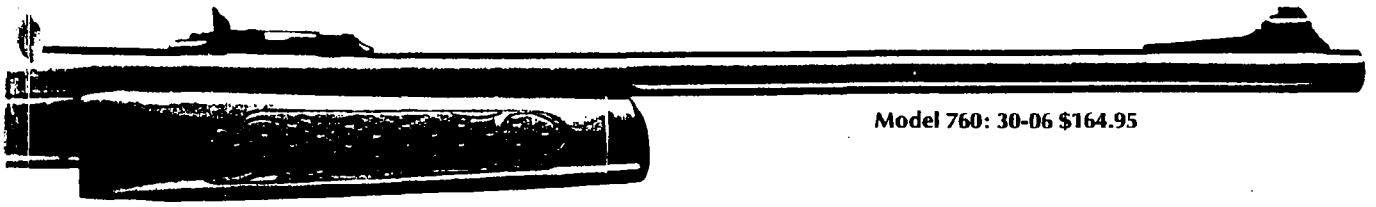
Model 760 "Gamemaster" Center Fire Pump Action Rifles



Model 760: 30-06 $164.95

When it comes to deer, the Model 760 "Gamemaster" rifle comes into its own. This is the only pump action rifle available in 30-06 . . . and many hunting experts rate it ahead of the popular 30-30 lever actions as a superb deer rifle. In the hands of an experienced pump action shooter, the 760 is faster to operate, surer, and more natural than a lever action.

Twin action bars . . . one on each side of the fore-end . . . eliminate twisting or binding. The fore-end pumps straight back in a fast natural movement. The hunter's finger stays on the trigger as he works the action for additional shots. The entire 760 trigger assembly stays in the rifle during operation . . . unlike the more cumbersome lever actions. This eliminates the possibilities of misalignment, grit in the mechanism, and painful pinched fingers.

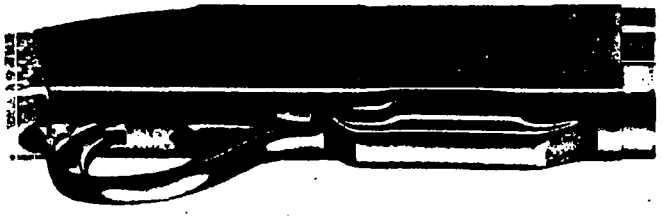
Along with the 30-06 version, caliber selection includes 6mm Rem., 308 Win., 270 Win., and 243 Win. The Model 760 carbine comes with 18½" barrel in 30-06 or 308 Win. . . . for fast, sure handling in brush or rough country.

Strength in action stems from the solid steel receiver and an artillery-style bolt with multiple locking lugs. When the action is closed, these lugs lock bolt to barrel as securely as advanced engineering techniques have been able to devise. And, as in all Remington center fire rifles, the closed action surrounds the cartridge head with a triple ring of steel.

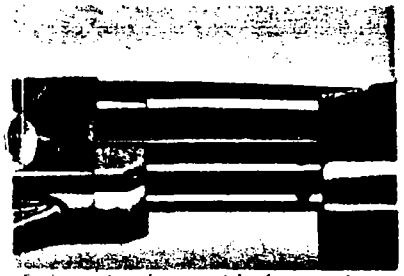
Every Model 760 rifle and carbine matches smooth pumping action with smooth styling. All have black fore-end tips and grip caps, white line spacers, and rich American Walnut stocks and fore-ends. BDL Custom Deluxe models stand out with decorative basketweave checkering and Monte Carlo stocks with full cheekpiece. Left hand BDL grades feature a reversed cheekpiece and safety. Standard 760s hold their own in appearance . . . with a regular stock and skip-line checkering.

Receivers and internal parts are vibra-honed to give them a mirror-smooth, shiny finish . . . burr-free for super smooth operation. Every 760 "Gamemaster" rifle is handsomely finished in the Remington grand manner with deep blueing and Du-Pont RK-W wood finish. Inside and out, the Model 760 is built to take the toughest weather and handling. Each rifle is furnished with its own removable four-shot clip. Receivers are drilled and tapped for scope mounts. Step-adjustable rear sight and ramped front sight supplied.

If you're a pump action shooter, you'll go for the Remington 760 for its outstanding performance as an all-around hunting rifle.



Model 760 receivers are vibra-honed for mirror-smooth finish. Cross-bolt safety. Easily-removable four-shot clip.



Twin action bars guide fore-end to eliminate twisting or binding.

Ramp front sight with flat-faced gold bead.

MODEL 760 SPECIFICATIONS

R2525385

1974

Remington seeks to give every hunter highest quality and performance at a price he can afford. The Model 788 bolt action rifle more than meets this goal. Originally designed and built for sportsmen who wanted a lower-priced big game rifle in popular, modern calibers . . . the 788 has achieved a fine reputation for accuracy and strength.

The 788 delivers pinpoint accuracy . . . with performance worthy of a much more expensive target rifle.

This exceptional accuracy is a direct result of the Model 788's extremely fast lock time . . . the interval between trigger-pull and primer ignition. Lock time is so fast that the bullet leaves the barrel of the 788 before a comparative bullet in any of ten competitive rifles tested leaves the cartridge case.

A proof of 788 strength is its ability to handle the powerful 22-250 Remington cartridge. The reason for its strength is the nine locking lugs on the bolt. These lugs fit into the grooved receiver with bank-vault security and tightness.

Standard models are available in 222 Rem., 22-250 Rem., 6mm Rem., 243 Win., and 308 Win. With left hand versions in 6mm Rem. and 308 Win. All are equipped with Monte Carlo stocks, positive thumb-type safeties, blade front sights and U-notch rear sights. Receivers are drilled and tapped for scope mounts. Rear sight barrel holes are correct for target scope block. Each rifle comes with detachable clip magazine. Optional accessories include sling strap with quick-release swivels and extra clip.

The Model 788 affords the hunter extreme accuracy and strength at a price he can afford.

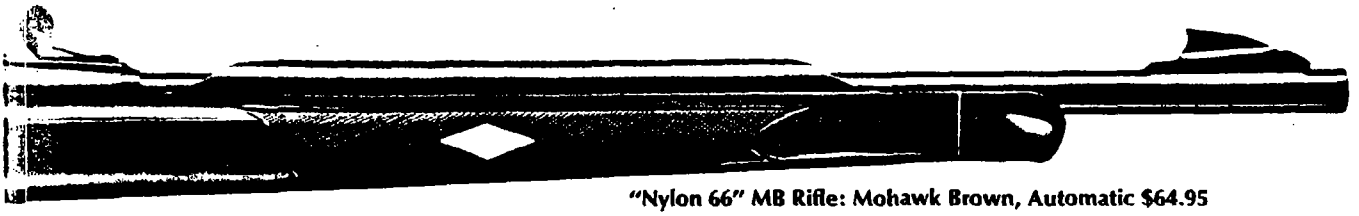
Remington Rim Fire Rifles & [illegible]

"Nylon 66" AB Rifle: Apache Black, Automatic $69.95 Extra-tough and lightweight 22 fun. Chrome-plated barrel and receiver. Lustrous, durable black DuPont "Zytel" nylon stock and forearm with white diamond inlays and white spacers. Convenient top-of-grip safety. Tubular magazine holds 14 Long Rifle cartridges.

R2525389

1974

"Nylon 66" Automatic Rim Fire Rifles



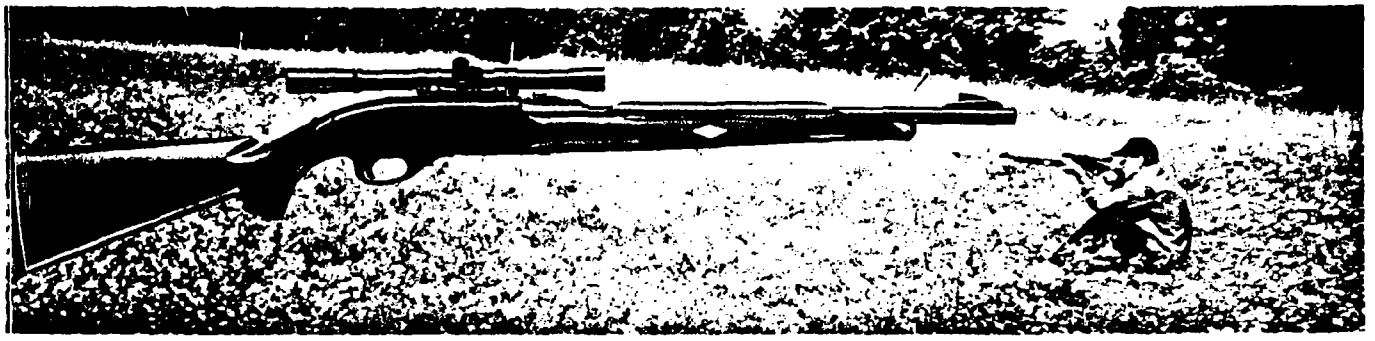
"Nylon 66" MB Rifle: Mohawk Brown, Automatic $64.95

"Nylon 66" automatic rim fire rifles increase the fun of owning and shooting a 22. These tough, lightweight automatics set the standards for consistent performance, accuracy, and endurance. The "Nylon 66" rifle is more than just a 22 plinker. Remarkable performance records prove its superior reliability and accuracy. A "Nylon 66" rifle was used to set the world's record on hand-thrown 2¾" wooden blocks . . . 100,004 hits out of 100,010 shots . . . without a malfunction. In addition, Remington test engineers fired 75,000 rounds from a single "Nylon 66" rifle without a single malfunction.

The durability of this 22 caliber automatic stems from superior Remington design and construction. The extra-tough stock and fore-end are made of DuPont "Zytel" structural nylon. Besides keeping the "Nylon 66" rifle's total weight at four pounds, this material will not warp, crack, chip, or fade. The automatic action never requires lubrication . . . metal parts glide on greaseless nylon bearings. To assure accuracy, the "Nylon 66" rifle employs the same barrel-bedding technique used on the most expensive target rifles.

All of these 22 automatics have blade front and adjustable rear sights, top-of-grip safety, and receiver grooved for tip-off scope mounts. The "Nylon 66" rifle is available in Apache Black with chrome-plated barrel and receiver or in Mohawk Brown with blued barrel and receiver. Both models have tubular magazines with a capacity of 14 Long Rifle cartridges. A Gallery Special model handles 22 Shorts only. The "Nylon 66" MB rifle is also available with a four-power Universal Model UA scope . . . a compatible, accuracy-tested shooting system to make 22 caliber automatic shooting even more enjoyable.

Convenient "Power-Pak" plastic boxes hold 100 Long Rifle "High Velocity" 22s. The re-usable case dispenses cartridges quickly and easily, keeps moisture and grit out.



"Nylon 66" MB Rifle with 4X Scope: $69.95 Special combination value with the Mohawk Brown model. Rifle supplied with four-power Universal UA scope, complete with mounts. Forms an accurate, modernistic shooting system.

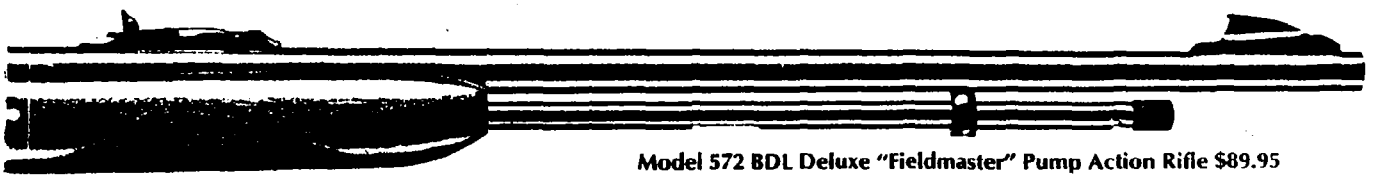
Model 572 "Fieldmaster" Pump Action Rim Fire Rifles



Model 572 BDL Deluxe "Fieldmaster" Pump Action Rifle $89.95

Pick one of these pump action "Fieldmaster" rifles to start a boy off right . . . and give him a 22 he can treasure for years to come. The 572's exclusive cartridge-feeding design permits easy single loading and helps prevent jamming. Removal of the magazine tube converts it into a single-shot rifle. Fine balance means easy handling. The pump action is slick, quick, and smooth. The cross-bolt safety is located at the rear of the trigger guard. The tubular magazine holds 20 Short, 17 Long, or 14 Long Rifle cartridges. Three versions make pump action shooting a father-and-son sport: the 572 A with ribbed fore-end, a 22 caliber smooth bore, and the 572 BDL Deluxe with custom checkering, RK-W wood finish, and big-game type sights. The rugged, dependable 572 is the perfect 22 to pump up a boy's pride.

MODEL 572 SPECIFICATIONS

ACTION: Pump, repeater. **CALIBER:** 22 rim fire. **CAPACITY:** Tubular magazine holds 20 Short, 17 Long, 14 Long Rifle cartridges. **BARREL:** 23", precision rifled, Remington Ordnance Steel. **STOCK:** American Walnut, BDL has RK-W finish. **SIGHTS:** Adjustable rear sight, bead front. Deluxe Model: Blade ramp front sight. Model 541-S "Custom" Sporter Bolt Action Rim Fire Rifle

Admirers of fine firearms will find everything they're looking for in the Model 541-S Custom Sporter . . . graceful handsomeness, strength, dependability, every desirable feature . . . and target rifle accuracy. This exceptional bolt action 22 was designed by Remington to give sportsmen a high-grade 22 sporting rifle at a popular price.

The striking appearance of this completely American made 22 sets it off as a singular firearm. Gracefully-shaped, one-piece stock of American Walnut. Deep, fine checkering. Thin pistol grip and streamlined fore-end. Durable, gleaming RK-W wood finish. Rosewood-finished fore-end tip, grip cap, and butt plate. Contoured white line spacers. Decorative scroll-work engraving on specially-blued receiver and trigger guard. Tapered barrel. 541-S features and appearance add up to great gunmaking style.

The 541-S shows off features to match its appearance: match-type adjustable trigger, swept-back bolt handle, polished bolt, steel trigger guard and floor plate, low profile safety. Receiver and barrel are drilled and tapped for scope mounts, open iron sights, or grooved for tip-offs; sights are not supplied. The artillery-style bolt and rear lock-up provide extra strength. Bolt closure engages six locking lugs in the grooved receiver. Double extractors make sure of fast, positive ejection.

Remington offers the 541-S Custom Sporter proudly . . . to those who recognize outstanding examples of the gunmaker's art.

Model 541-S Custom Sporter: Bolt Action $144.95

Remington "High Velocity" 22 cartridges with "golden" bullets come in Short, Long, or Long Rifle . . . in new green and yellow packages.

MODEL 541-S SPECIFICATIONS

ACTION: Bolt, clip repeater. **CALIBER:** 22 rim fire, Short, Long, or Long Rifle cartridges. **CAPACITY:** 5 shot clip (10 shot clip available as accessory), checkered clip release. **BARREL:** 24", tapered, deep rich blueing, ordnance steel, drilled and tapped for front and rear sights, crowned at muzzle. **STOCK:** American Walnut, Monte Carlo, checkered, RK-W wood finish, checkered rosewood finished butt plate and grip cap, rosewood finished fore-end tip. White line spacers at butt plate, grip cap and fore-end tip. **SIGHTS:** None supplied, barrel and receiver drilled and tapped for scope mounts or receiver sights; receiver grooved for scope mounts. **SAFETY:** Positive, serrated thumb type, safety indicator markings, forward for fire, rearward for safe. **BOLT:** Artillery style rear lock-up, six locking lugs, double extractors, highly polished. **RECEIVER:** Round ordnance steel, grooved, drilled and tapped for scope mounts or receiver sights, deep rich blueing, engraving. **TRIGGER:** Adjustable match type, steel trigger guard engraved. **OVER-ALL LENGTH:** 42⅜". **WEIGHT:** 5½ lbs.

Model 580, 581 & 582 Bolt Action Rim Fire Rifles

Here are bolt action 22s for young shooters to start and grow with. Easy-operating . . . incredibly strong . . . with fit and features for youngsters. Actions are artillery-type bolt with rear lock-up of six rotary locking lugs in a grooved steel receiver. Extra-large trigger guards, non-slip thumb safeties, dual extractors, bolt covers, bead front and adjustable U-notch rear sights. Round steel receivers for precise stock bedding and great accuracy. Take the 580 or the 580 Boys' Rifle . . . both single-shot models. There's a 581 clip repeater in right or left hand version . . . and the 582 tubular repeater. Each is designed to match a young shooter's stage of development.

MODELS 580, 581 & 582 SPECIFICATIONS

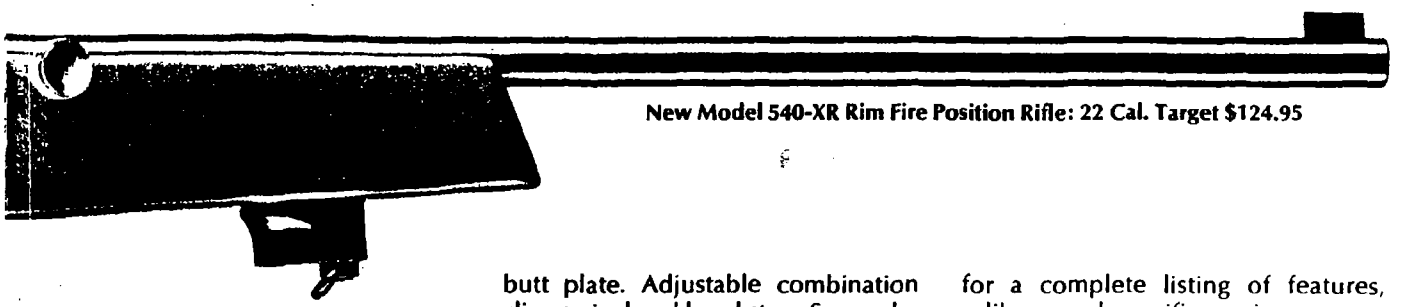
Remington Target Rifles



New Model 540-XR Rim Fire Position Rifle: 22 Cal. Target $124.95

New Model 540-XR and 540-XRJR Rim Fire Position Rifles
For Intermediates and Junior shooters. A completely redesigned stock gives greater fore-end depth. The new pistol grip eliminates wrist-twisting and allows the rifle to be easily pulled back to the shoulder for added comfort and control; also permits nearly straight-back trigger pull. Five-way adjustable butt plate. A new bolt detent pin eliminates bolt-rotation, permits bolt insertion into rifle without adjustment. Fully adjustable, crisp trigger. Same 540-X [illegible]n, accuracy, and fast lock time. Also available in a Junior model with 1¾" shorter stock.

New Model 40-XR Rim Fire Position Rifle
Boasts the same improved stock and pistol grip as the 540-XR. Features a loading platform for straight-line feeding. Front swivel block is adjustable on guide rail. Crisp, wide trigger adjustable from two to four pounds. Extra-strong bolt with double extractors. Two-way vertically adjustable butt plate. Adjustable combination sling swivel and hand stop. Same, dependable. 40-XR action. Redfield Olympic sights optional. Meets International Shooting Union requirements for standard rifle.

Model 40-XB Rangemaster Center Fire Rifle
For use as a repeater or as a single shot. Heavy-barrel models are clip-slotted for conventional five-shot clips. Repeating models come only in calibers equal to or shorter than the loaded length of the 308 cartridge. They load from the top of the receiver. Magazine has a hinged floor plate. Extreme accuracy, short bolt throw, and optimum weight make the 40-XB center fire repeating rifle ideal for over-course firing. Target scope block installed. Receiver is drilled and tapped for metallic sights and scope mount bases. Target type blocks furnished. Trigger is fully adjustable from two to four pounds. Two-ounce trigger is optional on single shot for extra charge.

The action is hand-bedded, and the stainless steel barrel is free-floating. The single shot model is offered in a variety of center fire calibers. See center fire target rifle specifications for a complete listing of features, calibers, and specific versions.

New Model 40-XC National Match Course Rifle — 308 Win. (7.62 NATO)
For use in National Match Courses. New stock configuration has greater fore-end depth for improved position shooting comfort. Redesigned pistol grip provides better gripping and trigger control. Receiver clip-slotted for five-shot clips. Loads from top of receiver. Anti-bind, short-throw bolt for rapid-fire events. Hand-bedded action and free-floating stainless steel barrel. Trigger pull is adjustable from two to four pounds. Adjustable combination hand stop and sling swivel. Two-way adjustable butt plate. Meets International Shooting Union rules for the Army rifle.

Model 40-XBBR Bench Rest Center Fire Rifle
Designed with all the features of the 40-XB, but modified for competitive bench rest shooting. Wide, squared fore-end for stability. For sporter and light-varmint classes' competition, there's a 40-XBBR with 20" heavy stainless steel barrel; for heavy-varmint class, Remington offers a 13½ pound, 26" version. Both meet NBRSA specifications.

CENTER FIRE TARGET RIFLE SPECIFICATIONS

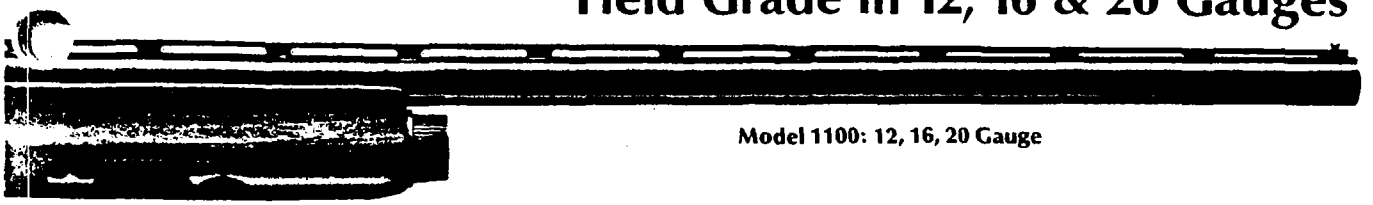
Remington sporting firearms ar. ammunition for 1975 combine to form superior shooting systems . . . and continue to give sportsmen ultimate performance, dependability, and value.

R2525398

Mc 1975 1100 Automatic Shotguns
Field Grade in 12, 16 & 20 Gauges



Model 1100: 12, 16, 20 Gauge

Proven dependability and all-around versatility make Remington Model 1100 Automatic Shotguns an automatic first choice in the field. These factors combined with shooting ease, great performance, strength, and graceful appearance have made the Model 1100 America's best-selling automatic shotgun.

Your Model 1100 will give you top performance under any weather conditions with all types of loads. Its unique gas metering system is designed to operate with all 2¾" standard velocity, "Express", and 2¾" Magnum shotgun shells. This permits the hunter to use different loads in the same shotgun for a wide variety of game.

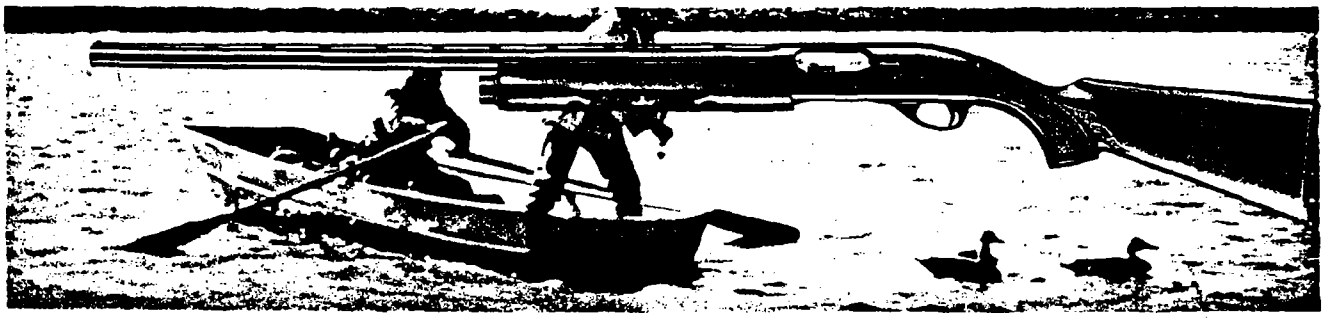
The 1100 operates with less effect of recoil than any other shotgun. The gas-operated action reduces recoil to a push, not a kick.

Field grade Model 1100s in 12, 16 and 20 gauges offer a wide range of specifications to fit the individual hunter's requirements. Left hand 12 and 20 gauge models offer reversed ejection and safety for shooting comfort. There are deer guns with rifle sights and 3" Magnum models in 12 and 20 gauges. Availability in plain or ventilated rib barrels and a wide selection of barrel lengths and chokes add variety of choice for the 1100 owner.

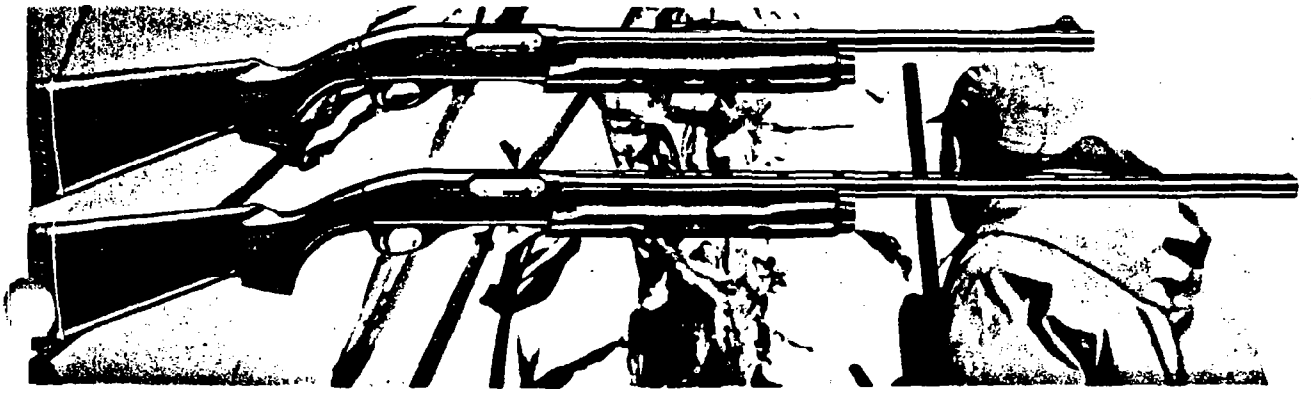
Extra barrels, interchangeable within gauge and chamber length, make the Model 1100 more versatile. Simply change prefitted barrels in the field in seconds without special tools.

Barrels chambered for 2¾" shells should not be interchanged with barrels chambered for 3" Magnum. 3" Magnum barrels should not be interchanged on standard receivers. Left hand barrels interchange only on left hand receivers.

Model 1100 good looks match performance. The DuPont RK-W wood finish is tough, scratch-resistant, and lustrous. The exclusive vibra-honed finish gives receiver and metal parts a custom look and aids in smoother functioning. Deep, sure checkering, decorative scrollwork on receiver and chrome-plated bolt, fluted comb cuts, white line spacers.



Model 1100 Left Hand: 12, 20 Gauge This mirror-image 1100 features left-side ejection port and safety for comfortable, more efficient left-handed shotgunning. A left hand version is also available in 3" Magnum, 12 gauge. All with ventilated rib barrel.



Model 1100 Deer Gun: 12, 20 Gauge Short 22" barrel for easy carrying. Rifle sights are adjustable for windage and elevation. Improved Cylinder choke for rifled slugs and buck shot. Recoil pad with white line spacer.

Model 1100 3" Magnum: 12, 20 Gauge Designed to get high flyers. Chambers 3" Magnum and 2¾" Magnum shells only. Ventilated rib or plain barrel. Recoil pad. Left hand version in 12 gauge only.

R2525399

Model 1100 Automatic S 1975 uns
Field Grade in 20 Gauge Lightweight, 28 & 410 Gauges

Remington makes smaller gauge Model 1100s to match any hunter's game and personal preferences. All hold the dependability, handsome appearance, and performance features you expect from America's oldest, most experienced manufacturer of automatic shotguns.

Model 1100 field grade guns in 20 gauge Lightweight versions give hunters less weight to carry. Built on a special weight-saving design with high-strength receiver, they point fast and smooth. A 3" Magnum model handles 20 gauge 2¾" or 3" Magnum loads only . . . as effective as a 12 gauge gun shooting standard field loads. At 6½ pounds, these lightweights really pay off in all-day carrying ease in the field.

The 28 and 410 gauge 1100s are available in a wide selection of chokes with plain or ventilated rib barrels. Exceptionally fine handling and pointing qualities put these Model 1100 automatics in a class by themselves. Remington extra barrels give all of these 1100s extra versatility. 20 gauge Lightweight barrels interchange only on 20 gauge Lightweight receivers.

Model 1100: 20 Gauge Lightweight Special weight-saving design with maximum strength and dependability. Handles all 2¾" loads. Ventilated rib or plain barrel. Mahogany stock and fore-end.

Model 1100 3" Magnum: 20 Gauge Lightweight At 6¾ pounds, this 1100 weighs less, but delivers maximum power and performance. Chambered for 2¾" or 3" 20 gauge Magnum loads only. Rubber recoil pad.

Model 1100: 28 Gauge Classic 1100 styling and performance on a smaller frame and receiver. Plain or ventilated rib barrel is 25" long. A sporting gun for smaller, faster gamebirds . . . and fine first shotgun for younger hunters.

Model 1100: 410 Gauge The automatic that all other 410s are gauged by. Full, Modified, or Improved Cylinder choke. Chambers 2½" or 3" shells.

1975

MODEL 1100 SPECIFICATIONS — FIELD GRADE

R2525401

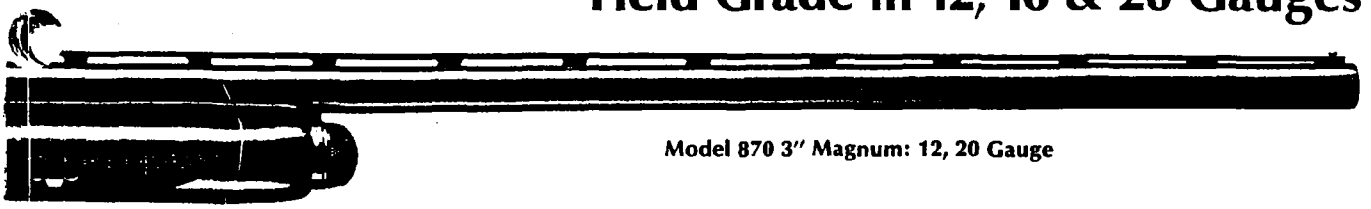
Smooth, fast, dependable pump action makes the Model 870 "Wingmaster" a favorite for all kinds of hunting. More than two million sportsmen own Model 870 shotguns, an overwhelming indication of popularity and proven performance.

Double action bars . . . one on each side of the receiver . . . assure pumping without twisting or binding. The speed and smoothness of the 870 action make it easy to get off those second and third shots. The Model 870 feeds and ejects positively on every shot under all hunting conditions and in any weather.

Field grade Model 870 shotguns in 12, 16, and 20 gauge offer hunters a wide variety of specifications to meet any hunting situation. All are available with plain or ventilated rib barrels in a complete selection of chokes and barrel lengths. Left hand versions in 12 and 20 gauge give southpaw shotgunners the convenience of left hand safety, feeding, and ejection. These Model 870s shoot all 2¾" standard velocity, "Express", and 2¾" Magnum shells without adjustment. Model 870 Magnums in 12 and 20 gauge give duck and goose hunters extra range and knockdown power. And there's a left hand Magnum in 12 gauge with ventilated rib barrel. Magnum models are chambered for 3" Magnum, 2¾" Magnum, and all 2¾" high or low-base shells. For deer hunters, the Model 870 "Brushmaster" Deer Gun delivers smashing power and accurate shooting with rifled slugs or buckshot loads in 12 and 20 gauge.

R2525402

Model 870 "Wing 1975 er" Pump Action Shotguns
Field Grade in 12, 16 & 20 Gauges

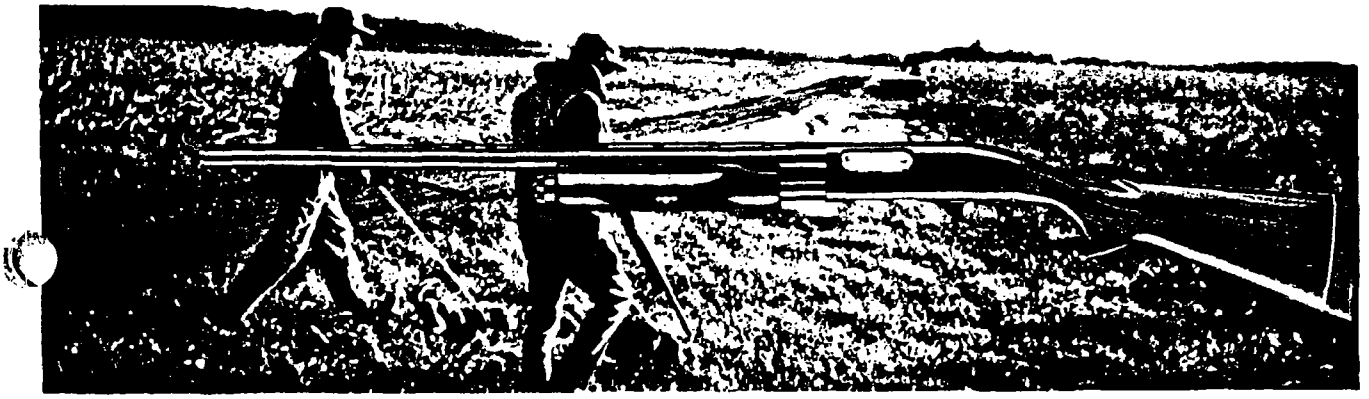


Model 870 3" Magnum: 12, 20 Gauge

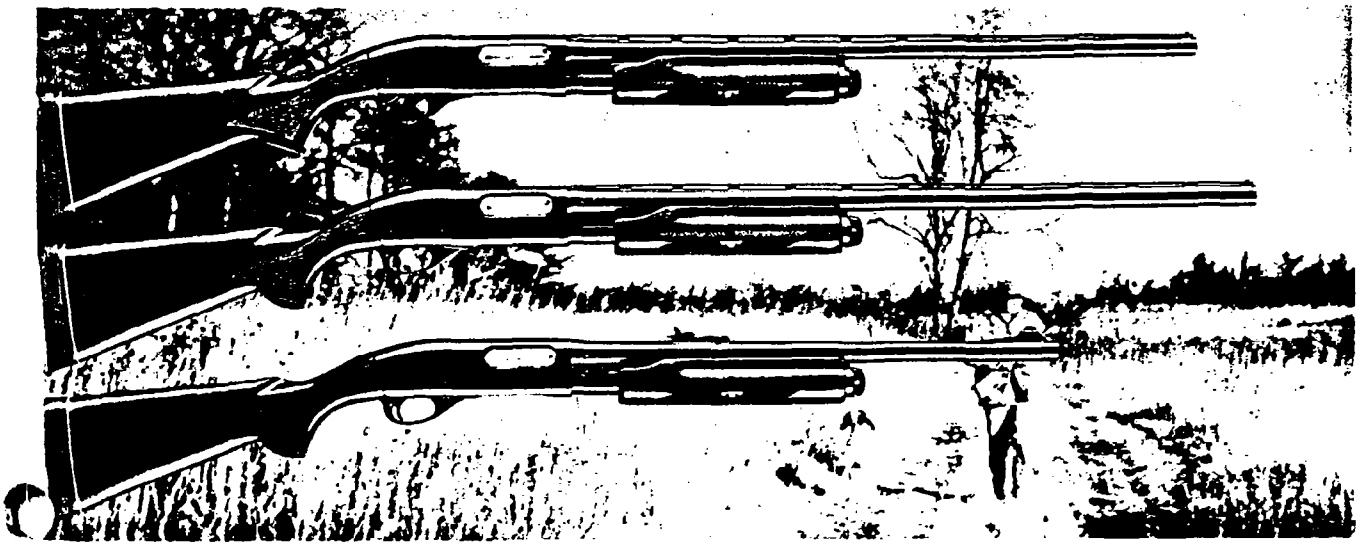
Interchangeable extra barrels make the Model 870 "Wingmaster" one of the most versatile, all-purpose shotguns in the hunting world. Barrels with different lengths and chokes are instantly interchangeable on the same receiver within gauge and chamber length. In 12, 16, and 20 gauge, over 30 different Model 870 extra barrel choices are available.

Remington interchangeable barrels do not require factory or gunsmith fitting . . . or special tools. 3" Magnum barrels should not be interchanged on standard receivers. Left hand barrels interchange only on left hand receivers.

Model 870 stocks and fore-ends are enriched and protected by the scratch-resistant DuPont RK-W wood finish. All metal parts inside and out are vibra-honed to achieve a lustrous finish and a silk-smooth action. Functional checkering, full beavertail fore-end, chrome-plated bolt, and white line spacers . . . every feature contributes to stand-out styling.



Model 870 Left Hand: 12, 20 Gauge A mirror-image 870 with left-side safety, feeding, and ejection. Also available in 12 gauge Magnum. All with ventilated rib barrel only. Ultimate pump action shooting comfort for lefties.



Model 870: 20 Gauge Wide selection of barrel lengths and chokes. Ventilated rib or plain barrel. Metal front bead and convenient cross-bolt safety. Available in left hand and Magnum versions.

Model 870: 12, 16 Gauge Handles all 2¾" Magnum, "Express", and standard velocity shells without adjustment. Double action bars prevent binding. Wide selection of extra barrels, including 12 gauge 34" duck and goose barrels.

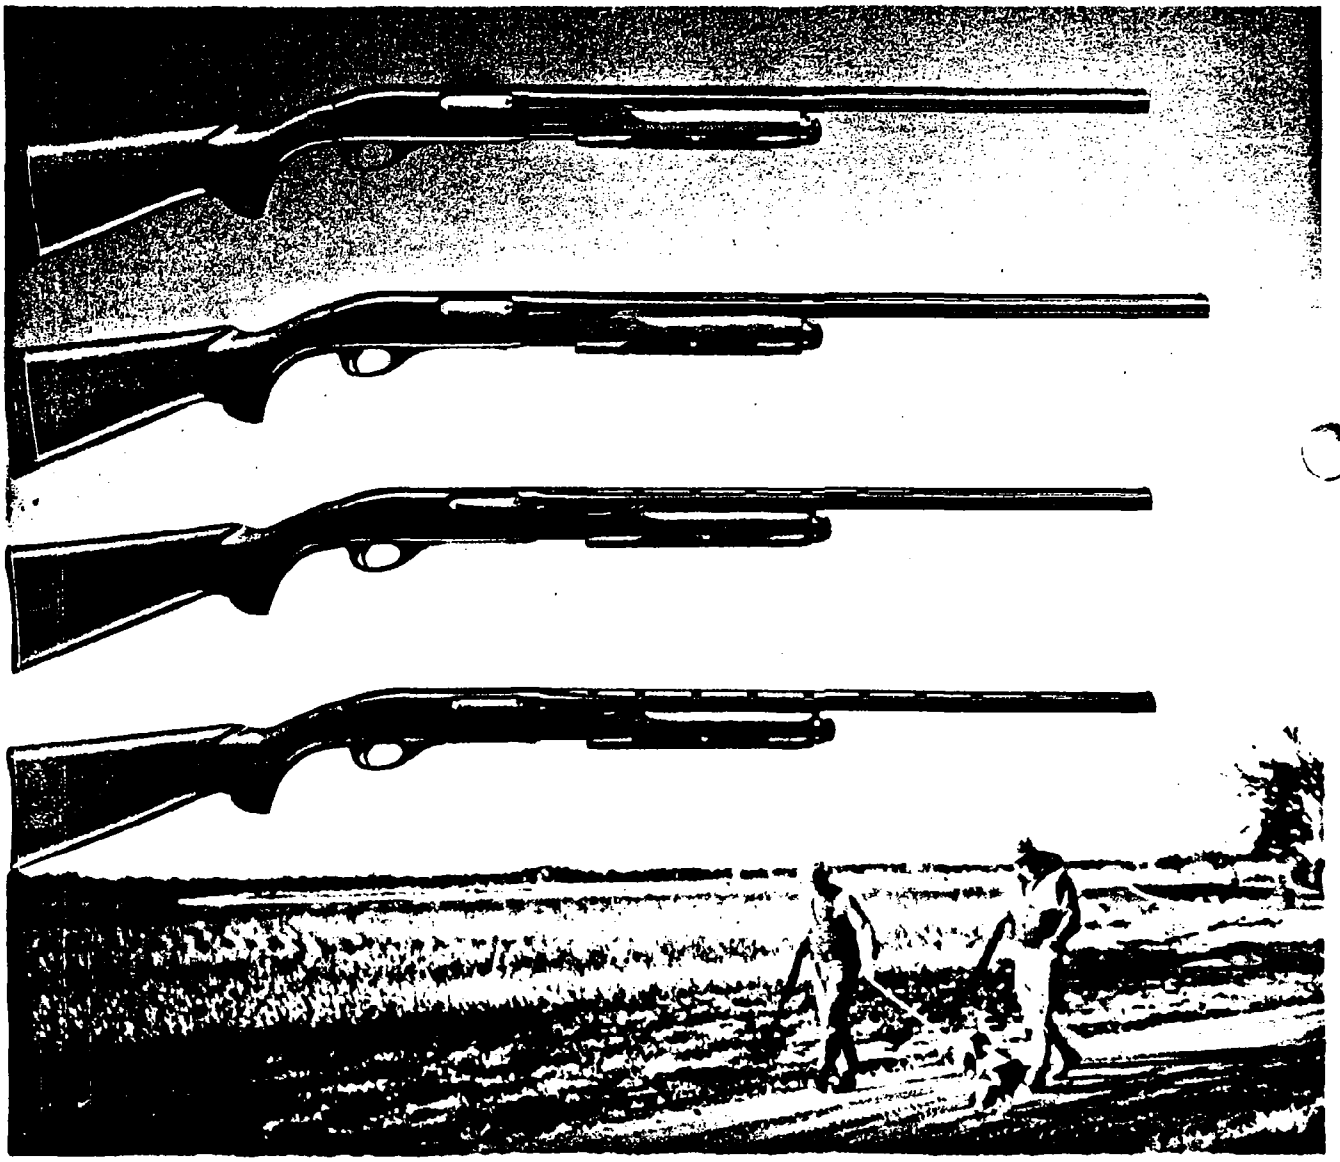
Model 870 "Brushmaster" Deluxe Deer Gun: 12, 20 Gauge Available in Deluxe and Standard models. Rifle-type sights and 20" barrel. Standard model in 12 gauge only has plain stock, grooved fore-end.

Model 870 "Wingmaste[1975] ump Action Shotguns
Field Grade in 20 Gauge Lightweight, 28 & 410 Gauges

Fast-handling Model 870 shotguns in 28 and 410 gauges make pump action shotgunning a real pleasure. These smaller gauge 870s have all the features of their larger relatives . . . and the same dependability and strength.

Easy-carrying "Wingmaster" 20 gauge Lightweight field guns are ideal for a full day in the field. Weighing only 5¾ pounds in the plain barrel version, they feature a solid steel receiver. 20 gauge Lightweight 3" Magnums handle all 20 gauge loads . . . and deliver 12 gauge standard load performance. Remington Model 870s in 20 gauge Lightweight handle and point effortlessly. Their reduced weight means reduction of fatigue during a long day's hunting.

Remington interchangeable barrels for all of these 870s provide a whole new dimension in all-around utility. Lightweight and Magnum lightweight barrels should only be interchanged on matching lightweight and Magnum lightweight receivers.



Model 870: 20 Gauge Lightweight This 870 swings and carries easily. Small, extra-strong steel receiver. Ventilated rib or plain barrel. Weighs about six pounds and handles 2¾" Magnum, standard velocity, and "Express" loads.

Model 870 3" Magnum: 20 Gauge Lightweight Combines Magnum power and light weight. Plain or ventilated rib 28" barrel with Full choke. Shoots 3" Magnum and all 2¾" shells. Rubber recoil pad.

Model 870: 28 Gauge Quick-shucking, quick-pointing pump action. Plain or ventilated rib 25" barrel and choice of Full, Modified, or Improved Cylinder chokes. Interchange extra barrels in the field in seconds.

Model 870: 410 Gauge The pump gun for the hunter who seeks the challenge of small gauge shotgunning. Plain barrel or ventilated rib. Five-shot capacity with 2½" shells and four-shot capacity with 3" shells.

1975

Remington 3200 3" Magnum: 12 Gauge The over-and-under for ducks and geese. Chambers 3" Magnum and all 2¾" shells. Available with 30" barrels only. Designed to handle lead or steel shot. Comes with rubber recoil pad installed.

R2525406

Remington 3 1975 Over-and-Under Shotguns
Field Grade in 12 Gauge

Advanced design and technology make the Remington 3200 the most modern over-and-under shotgun manufactured today. The 3200 is the only over-and-under completely designed and manufactured in the United States. Remington's totally American craftsmanship and service assure the 3200's unique quality and reliability.

The Remington 3200 is a "finely-tuned" shotgun, superbly engineered for great balance and shooting ease. Its point of balance is directly over the barrel hinge locations.

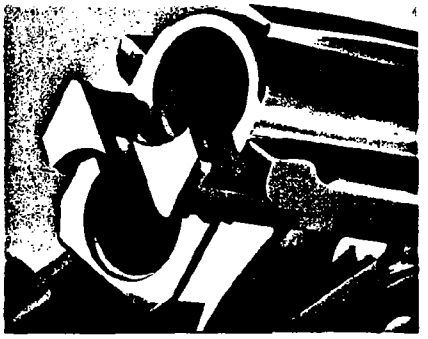
The unique design strongpoints of the 3200 result in exceptional strength and rugged durability . . . for generations of shooting use. Barrels lock to the machined steel frame with super-strong side lugs. The sliding top lock improves lock-up strength and permits the thinner profile. Chamber walls are thicker and more uniform to eliminate any potentially weak area.

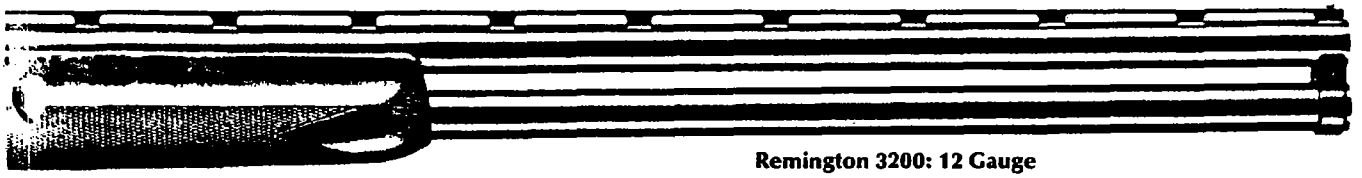
Refined and innovative mechanical features add up to superior performance and reliability. Separated barrels virtually eliminate heat-caused barrel expansion and subsequent change of alignment. Barrels are scientifically pre-set for optimum point of impact. Space between barrels cuts wind resistance when swinging, prevents moisture from collecting, and eliminates heat waves that distort sight picture. The ventilated rib is silver brazed to the barrel for the strongest possible bond.

Remington engineers have improved firing pin design so that hammers never strike a firing pin in an empty chamber . . . preventing breakage due to dry firing. Special coil springs deliver sure, equal hammer blows every time . . . eliminating a major cause of misfires in many other over-and-unders.

The 3200's positive-action fire control assembly assures second barrel firing independently of the first barrel. The 3200 system does not require recoil to cock the gun for the second shot. Straight-line recoil reduces sensation of recoil and helps keep the 3200 shooter on-target for that second shot.

Barrel selector and safety are combined in a simple, fast, easy-to-operate indicator on upper tang: left (B) for bottom barrel; middle (S) for safety on; right (T) for top barrel. After firing, empty hulls are automatically ejected on opening of the breech. Unfired shells are raised above chamber level for easy manual extraction. Super-fast lock time . . . at 1.4 to 1.8 milliseconds . . . means that the shot leaves the 3200's barrel before it leaves the shell in many other guns.





Remington 3200: 12 Gauge

Remington 3200 field guns are available in 12 gauge only with 26", 28", and 30" barrels. New 3200 3" Magnum models come with 30" barrels . . . perfect for waterfowl hunters who prefer an over-and-under. Remington 3200 Magnums offer duck and goose hunters an important bonus . . . these are the only current over-and-under shotguns designed to accommodate steel shot. This is another example of Remington's constant ability to meet new hunting requirements.

The 3200 has the finely-crafted look of a superb sporting firearm. All show off decorative receiver scroll-work, graceful trigger guard, and modified beavertail fore-end. Wide, crisp trigger and metal bead front sight. American walnut stock and fore-end are deep-checkered 20 lines to the inch. The DuPont RK-W wood finish affords lustrous protection against scratches and marring over years of rough use. All-American craftsmanship results in a beautifully tailored wood-to-metal fit.

REMINGTON 3200 SPECIFICATIONS — FIELD GRADE

STYLE: Over-and-Under Shotgun. **GAUGE:** 12. **CHAMBER:** 2¾" standard velocity, "Express", and 2¾" Magnum shells. 3" Magnum model chambers 3" Magnum and all 2¾" shells. **CAPACITY:** 2-shot. **BARRELS:** Ventilated rib. Special Remington proof steel. Separated design. Tapered barrels on Magnum models. Extra barrel sets not available. **FRAME:** Machined steel with sliding top lock. Shield-covered breech. Hammers cock on breech opening. Sides embellished with pointing dogs. **EJECTORS:** Automatic. Fired shells eject on opening. Unfired shells remain in chamber but are raised above chamber level for easy manual extraction. **SAFETY & BARREL SELECTOR:** Combination manual safety and barrel selector mounted on top tang. Left for bottom barrel; right for top barrel; middle position for safety on. **TRIGGER:** Single selective, 4/16" wide. Crisp with extra fast lock time. **SIGHTS:** Metal bead front. **STOCK & FORE-END:** American Walnut with DuPont RK-W wood finish. Checkering cut 20 lines to the inch. R2525408

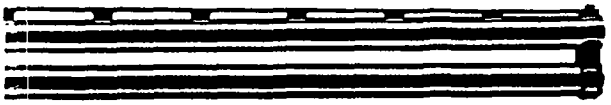
Remington 3200 Over-and-Under Trap Guns in 12 Gau 1975

Trapshooters who prefer over-and-unders have estal lished the 3200 as a favorite because of its design strengths and performance advantages. Remington 3200 Trap models are available with standard or Monte Carlo stocks, 30" barrels, and Full/Full or Improved Modified Trap/Full chokes. A brand new 3200 with 32" barrels adds to shooters' options this year. Barrel selectors can be locked in position for tamper-proof protection. Every 3200 trap gun features full beavertail fore-end, recoil pad, ivory bead front and metal bead middle sights. Remington 3200 Special Trap guns are fitted with specially selected American walnut stocks and fore-ends.



Remington 3200 Special Trap: 12 Gauge

Model 1100 Automatic Trap Guns in 12 Gauge

More Grand American, state, and zone championships have been won with Model 1100 TB Trap guns in the past decade than with any other automatic. TB grade 1100s are available with regular or Monte Carlo stocks and 30" ventilated rib barrels in Full or Modified Trap chokes. Mirror-image left hand models . . . with left-side feeding and ejection . . . come in Full choke only. Each 1100 TB trap gun features an ivory bead front sight, white metal middle sight, and recoil pad. Extra trap barrels in 28", 30", and 34" lengths are interchangeable.

Model 870 Pump Action Trap Guns in 12 Gauge

Three trap grades offer the 870 trapshooter unsurpassed selection and sure shooting performance. The 870 "All-American" trap gun captains the squad with Premier grade features and appearance. TB grade 870 trap guns provide the same top-gun performance and functional features at lower cost. Left hand 870 TB grade guns are designed for southpaw shooting convenience with left-hand feeding and ejection. Rich, highly figured, hand-rubbed walnut stocks and fore-ends with hand-checkering and special hand-polished parts for ultra-smooth operation are 870 TC grade extras. All of these 870s are equipped with ivory bead front and metal middle bead sights; recoil pad; special target grade hammer, sear, and trigger assembly; 30" ventilated rib barrels; regular or Monte Carlo stocks. Remington interchangeable barrels come in 28", 30", and 34" lengths.

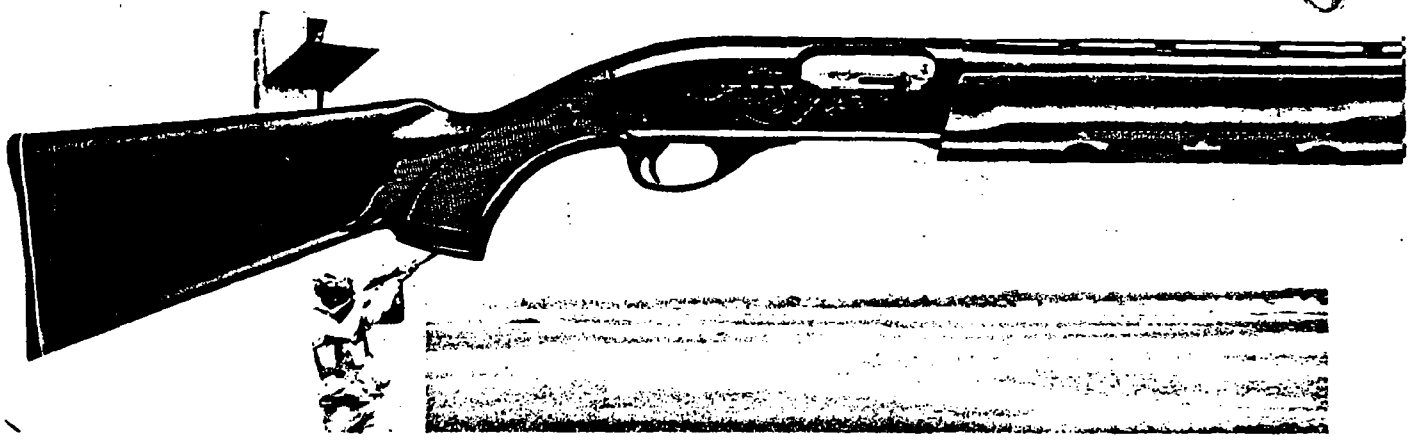
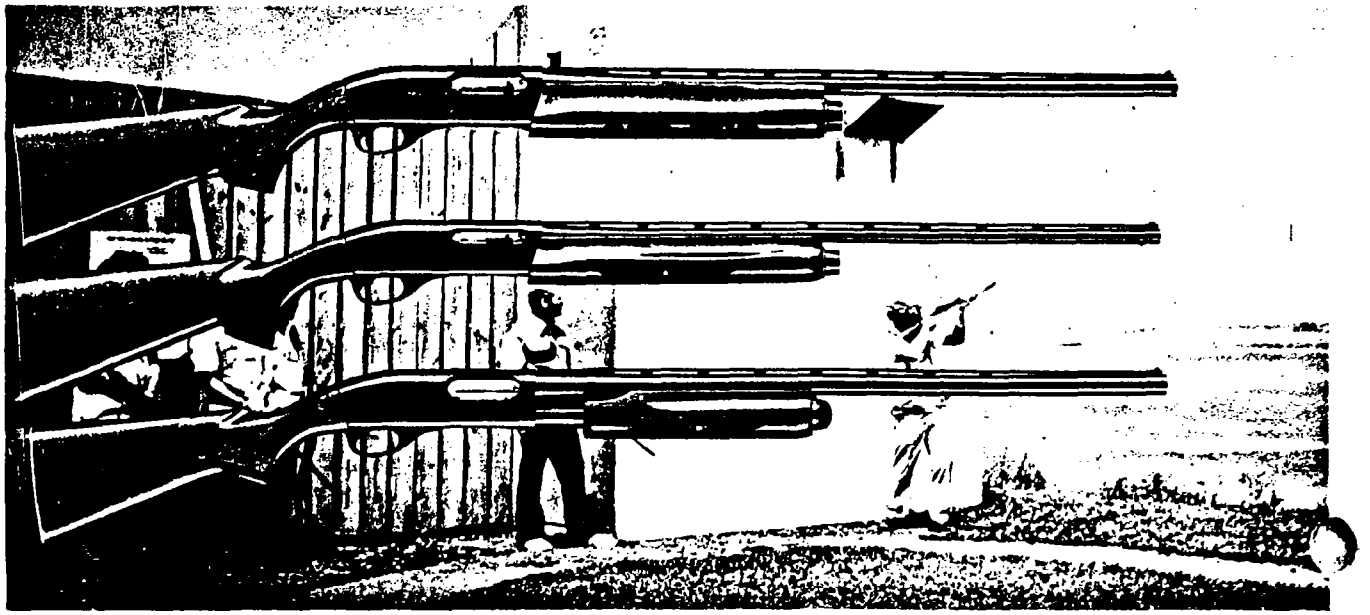
Remington Skeet Gu 1975

Remington 3200, Model 1100 & Model 870



Remington 3200 Skeet: 12 Gauge The most advanced over-and-under skeet gun on the field. Fitted with comfortable full beavertail fore-end. Rubber recoil pad. Automatic ejectors. Choice of 26" or 28" barrels. Barrel selector can be locked on desired barrel.



Model 1100 SA Skeet: 20 Gauge Smooth-swinging automatic skeet preference. Checkered butt plate. Also available in left hand model or SB grade (right hand only).

Model 1100 SA Skeet: 28, 410 Gauges Perfect balance and reliable gas-operated action on a smaller frame. 410 gauge skeet guns are chambered exclusively for 2½" plastic shells.

Model 870 SA Skeet: 12, 20, 28, 410 Gauges The pump gun for any gauge competition. SC grade with select fancy wood in 12 and 20 gauges only. Ivory bead front sight.

R2525410

Whether you compete with over-and-under, automat / 775
or pump . . . these Remington skeet guns live up to t
toughest demands of serious skeet shooting. Fail-safe performance during constant prolonged competition is one of their most important traits. Easy handling and

Model 1100 SA Skeet: 12, 20, 28, 410 Gauges

smooth swinging balance mark them as the guns to beat in any event and any gauge. All of these guns have several features in common: ventilated rib barrels with Remington Skeet choke, ivory bead front sights, and white metal middle bead sights.

Remington 3200 Over-and-Under Skeet Guns in 12 Gauge

Skeet shooters everywhere are realizing the advantages of the 3200's advanced over-and-under design strongpoints. Positive-action fire control ensures second barrel reliability. Low profile and low center of gravity of the bottom barrel minimize recoil sensation and muzzle jump . . . help keep you on that important second bird in doubles. The unique barrel selector can be locked on desired barrel. 3200 skeet guns handle and carry with exceptional balance. Separated barrel design pays off in easier swinging and elimination of sight picture distortion due to heat waves.

Model 1100 Automatic Skeet Guns in 12, 20, 28, and 410 Gauges

When it comes to skeet shooting popularity with an automatic, the Model 1100 is in a class by itself. World Skeet Championships in recent years have seen more 1100s competing than all other brands and models combined. Great balance, excellent pointing, and fast-swinging qualities add up to bird-powdering performance. Minimal effect of recoil means less fatigue and increased personal efficiency over long periods. Model 1100 SA Skeet guns enter all events in 12, 20, 28, and 410 gauges. Left hand versions in 12 and 20 gauge are mirror-image with left-side feeding and ejection. SB grade 1100s with specially selected American walnut stocks and fore-ends come in 12 and 20 gauge models. All 12 and 20 gauge Model 1100 Skeet guns have 26" barrels, some with Cutts Compensator. 28 and 410 gauge 1100s have 25" barrels. Remington extra barrel interchangeability gives every one of these 1100s extra utility and versatility.

Model 870 Pump Action Skeet Guns in 12, 20, 28, and 410 Gauges

The skeet shooter who prefers dependable pump action can choose a Model 870 in any gauge. SA grades in 12 and 20 gauge feature 26" barrels and the option of a Cutts Compensator. Model 870 SA 28 and 410 gauge skeet guns go after clay birds with 25" ventilated rib barrels. SC grade 870 skeet guns hold the handsome advantage of select American walnut and hand-checkering. All 12 and 20 gauge SA and SC grade skeet Model 870s are equipped with soft rubber recoil pads. Left hand SA versions accommodate southpaws with mirror-image ejection and feeding in 12 and 20 gauges. Extra barrels are available for all of these guns within gauge and original chamber length.

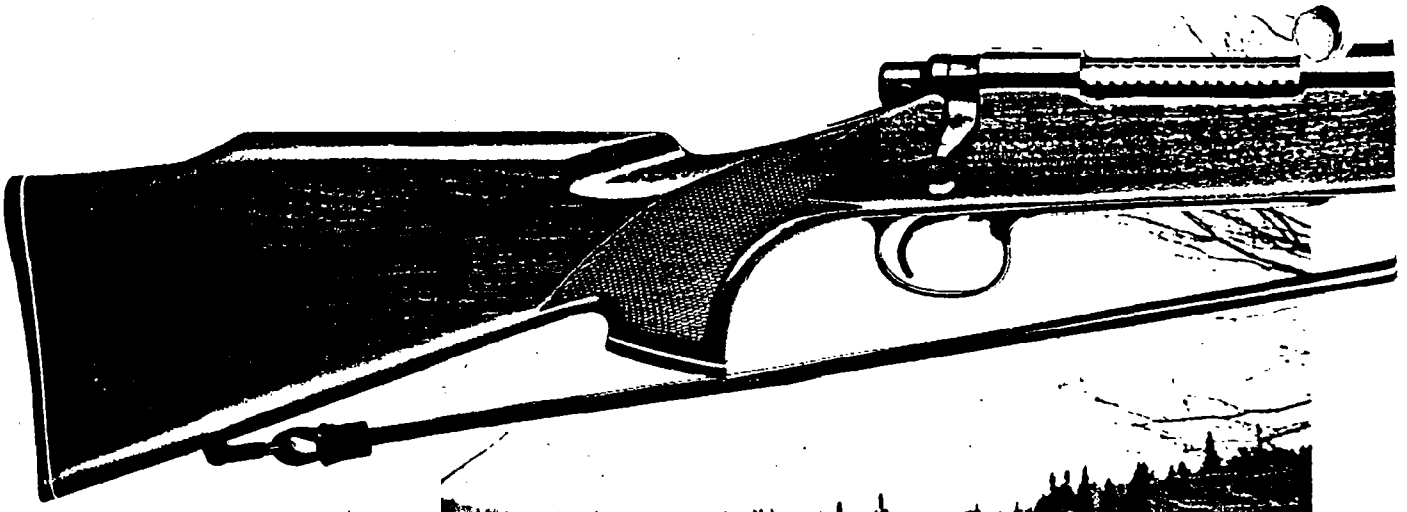
Remington Centerfire Rifles

1975



The Model 700 has become the standard of excellence by which other big game bolt action rifles are measured. The 700 combines accuracy and sleek, graceful styling with optimized handling and performance features in an exceptional variety of caliber selections.

In big game hunting, dependable performance is of primary importance. The 700's anti-bind bolt and stainless steel magazine follower assure smooth operation without bind or drag. The action is one of the strongest ever designed. Bolt face, barrel, and receiver surround the cartridge head with three rings of solid steel to prevent any rupturing of the center fire case. The bolt handle was redesigned to put plenty of clearance between it and your hand, helping prevent hit fingers on recoil. The rear sight has a sliding ramp for precise elevation or adjustment and is easily removed for scope mounting.

Model 700 BDL Custom Deluxe rifles compete with more expensive custom-made rifles in every aspect. The graceful, tapered stock of rich American walnut is designed for improved appearance, handling, balance, and grip. The fore-end is fuller and squared-off; the pistol grip is slimmer and has a swept-back grip cap. White line spacers. Deep, sure checkering is cut 20 lines per inch. BDL versions have a jeweled anti-bind bolt, hinged floor plate, hooded front sight, sling strap and quick release swivels.

Mirror-image Model 700 left hand BDL rifles reverse the cheekpiece with safety, bolt, and ejection on the left side for left-handed shooters.

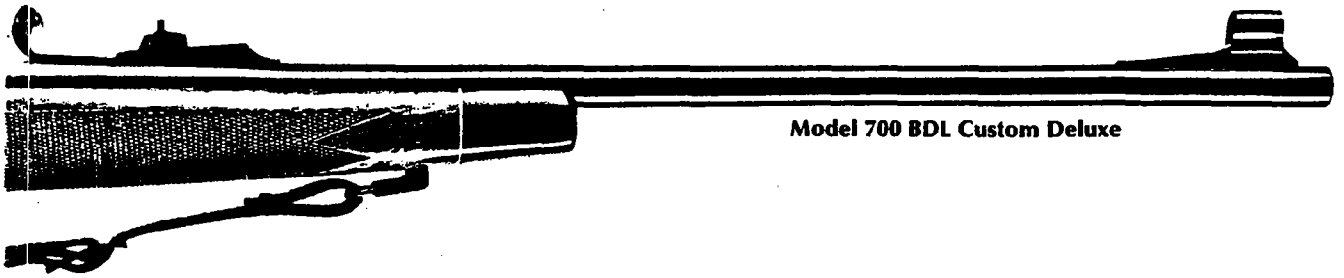
Model 700 ADL Deluxe rifles deliver high accuracy and reliability at lower cost. ADL models present a handsome, functional appearance with skip-line checkering. Both ADL and BDL versions have a jeweled anti-bind bolt, shrouded bolt cover, and low-profile positive thumb-type safety. All Model 700s include Monte Carlo stock with cheekpiece, checkered bolt knob, detachable sights, and receiver drilled and tapped for scope mounts.

The 700 BDL "Varmint Special" is designed specifically for long-range, small-target accuracy. It has a heavy barrel without sights and carries all the features of other BDL rifles. Safari grade BDL 700s in 375 Holland & Holland Magnum and 458 Win. Magnum calibers meet the biggest game hunting requirements.

Model 700 C Custom, D Peerless, and F Premier rifles offer three grades of custom-made, highly personalized specifications to discriminating sportsmer

R2525412

Model 700 1975 ...ter Fire Bolt Action Rifles



Model 700 BDL Custom Deluxe

Model 700 ADL Deluxe In 22-250 Rem., 222 Rem., 25-06 Rem., 6mm Rem., 243 Win., 270 Win., 30-06, 308 Win., and 7mm Rem. Mag. calibers. Monte Carlo stock with cheekpiece. Scratch-resistant RK-W wood finish.

Model 700 BDL "Varmint Special" In 22-250 Rem., 222 Rem., 223 Rem., 25-06 Rem., 6mm Rem., and 243 Win. calibers. Heavy-barreled accuracy. Equipped for scope bases. Hinged floor plate. Sling and quick-release swivels.

MODEL 700 SPECIFICATIONS

STOCK: American Walnut. BDL and "Varmint Special" models have cut checkering 20 lines to the inch that extends around entire fore-end. Safari and C Custom models are hand-checkered. ADL has skip-line checkering. Solid rubber presentation-type recoil pads on Magnum models. BDL and "Varmint Special" models include sling strap and quick release swivels installed, black fore-end tip and white line spacers. **STANDARD STOCK DIMENSIONS:** 13⅜" length of pull, 2⅜" drop at heel, 1⅝" drop at comb (measured from open sight line). "Varmint Special" stock: 13⅜" length of pull, 1⅜" drop at heel, ½" drop at comb. (measured from center line of bore). **RECEIVER:** One-piece ordnance steel with anti-bind bolt. Drilled and tapped for scope mounts and receiver sights. Fixed magazine with stainless steel magazine follower. BDL, "Varmint Special", and Safari grade have hinged floor plate. **SIGHTS:** Ramp front sight with flat-faced gold bead. BDL and Safari grade front sights are hooded. Rear sight has sliding ramp for precise elevation adjustment, also adjustable for windage. Both sights are removable for scope block mounting without drilling or tapping. "Varmint Special" is furnished without sights, but with front and rear 40-XB type scope bases installed. **SAFETY:** Fast positive thumb type. Left hand models have left hand safety, bolt, and ejection.

CUSTOM MODEL 700 C — Manufactured to customer specifications. Left hand C Custom models available in 25-06 Rem., 270 Win., 30-06, 7 mm. Rem. Mag., 264 Win. Mag., and 300 Win. Mag. Choice of 20", 22", or 24" barrel in high proof ordnance steel only. With or without hinged floor plate. With hunting sights or plain barrel. Sling strap and quick release swivels installed. Length of pull from 13⅜" to 14" without recoil pad. Extra charge for recoil pad (on all except Magnum models), oil-finished stock, left hand cheekpiece. Orders non-cancellable. Allow up to four months for delivery.

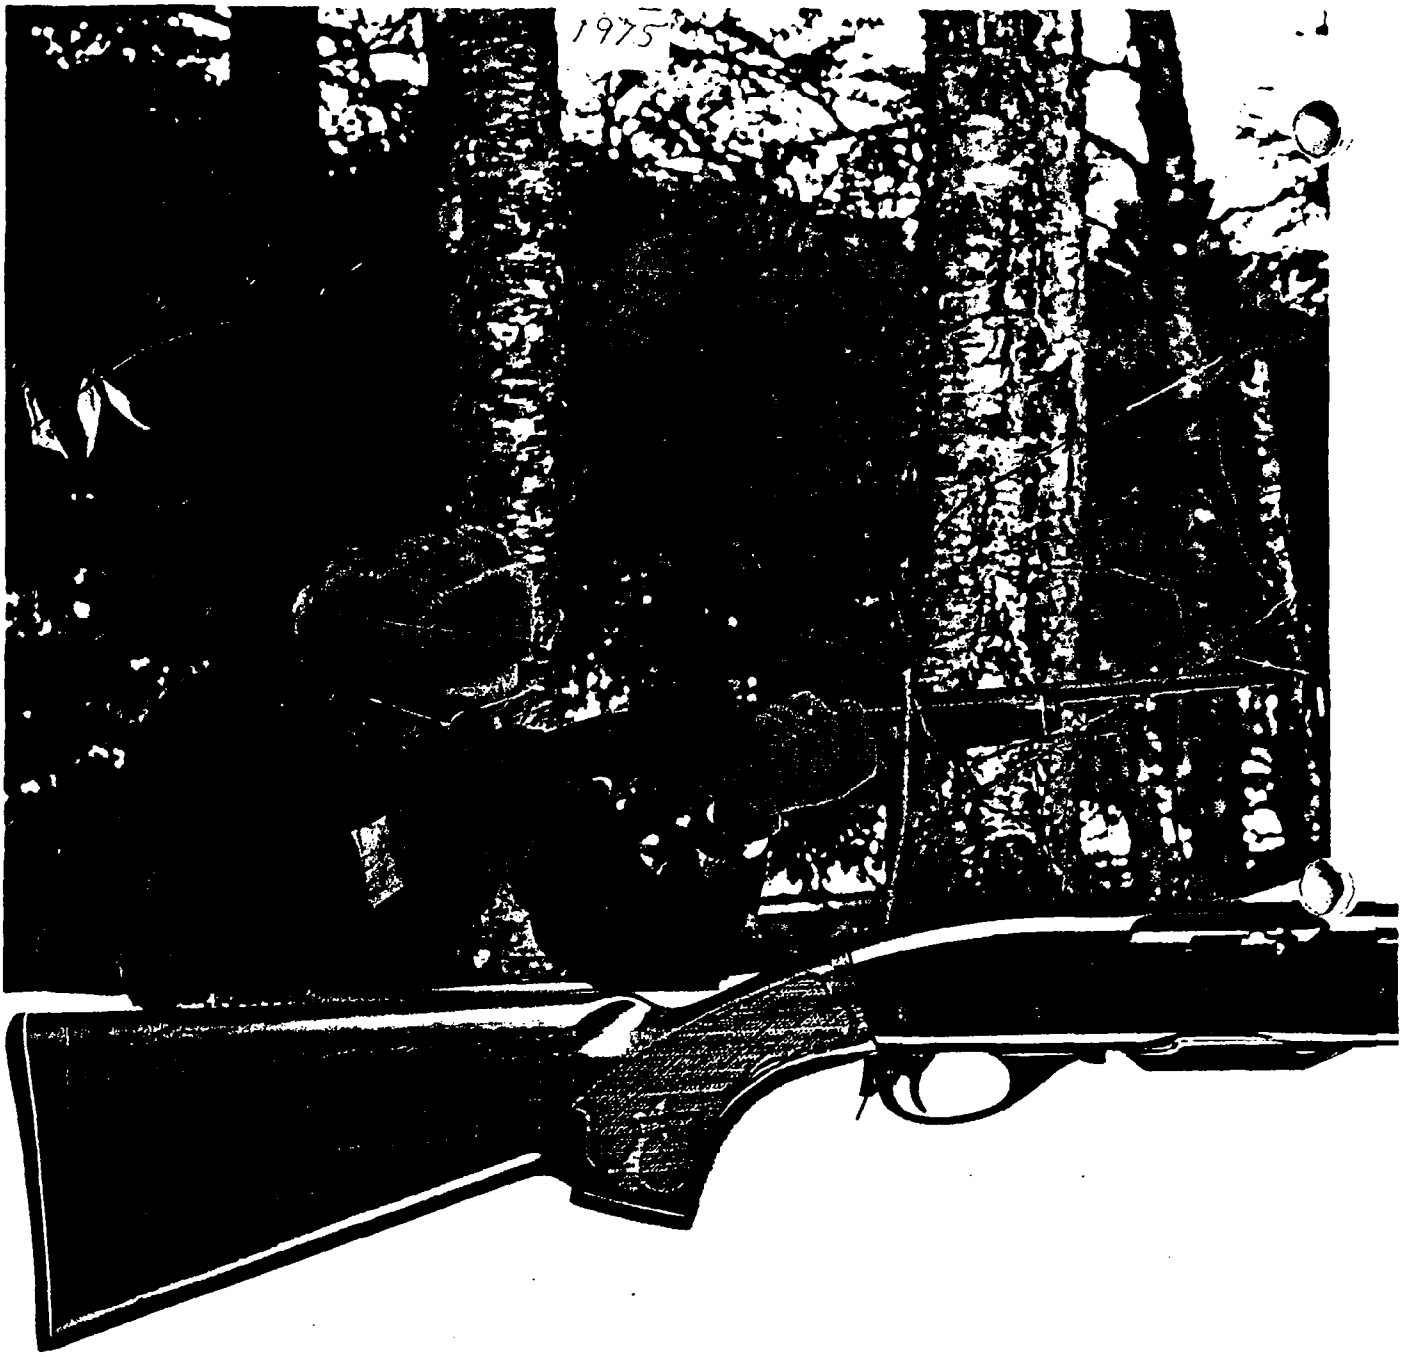
R2525413



Here is the hunting world's most popular automatic big game rifle. The Model 742 "Woodsmaster" combines accuracy, speed, and reliability for ideal automatic performance.

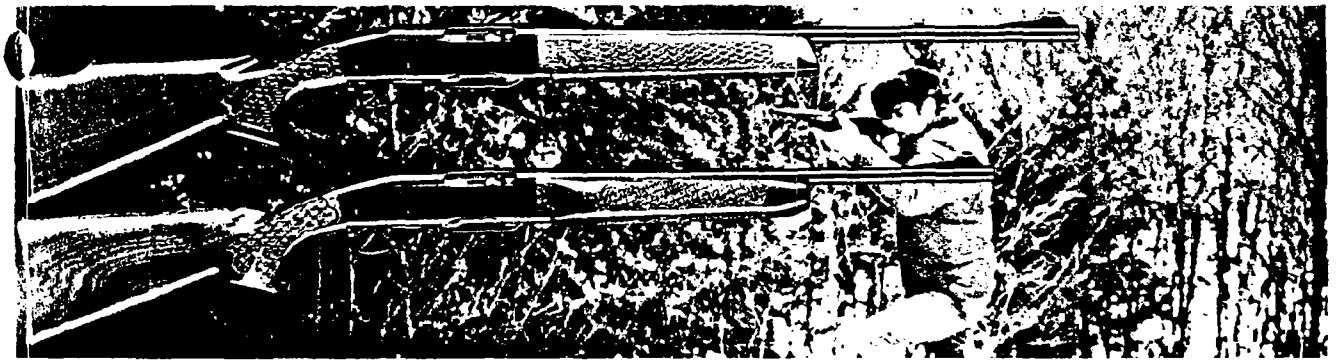
Remington designed the 742 for optimum speed of operation . . . fast enough to realize all the advantages of automatic shooting, but at a rate slow enough to assure recovery from recoil. Reduction in the effect of recoil pays off in improved control and ability to maintain sight picture during fast, successive shots.

These truly modern automatics not only help the hunter make the most of built-in accuracy . . . they also function reliably to make every shot count. Trouble-free performance is a hallmark of the 742. All-weather dependability is another important characteristic of these automatics. They're built and tested to withstand the most adverse conditions of weather and temperature. Interior working parts are coated with DuPont "TEFLON" S resin. This friction-reducing coating self-lubricates, resists dirt and oil, makes cleaning easier, and provides longer wear.

Model 742 BDL Custom Deluxe rifles carry automatic styling to perfection with luxurious basketweave checkering and Monte Carlo stock with full cheekpiece. BDL left hand versions put cheekpiece and safety on the left hander's side for automatic shooting comfort. All 742s have a fast-loading removable clip magazine, convenient bolt release, and positive cross-bolt safety. Receivers are drilled and tapped for scope mounts. Ramp front sight with flat-faced gold bead and adjustable rear sight. All models have black forend tips and white line spacers.

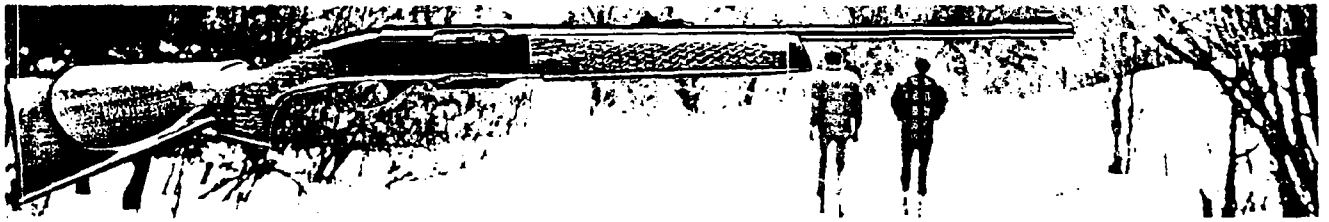
R2525414

Model 742 "Woodsmaster nter Fire Automatic Rifles

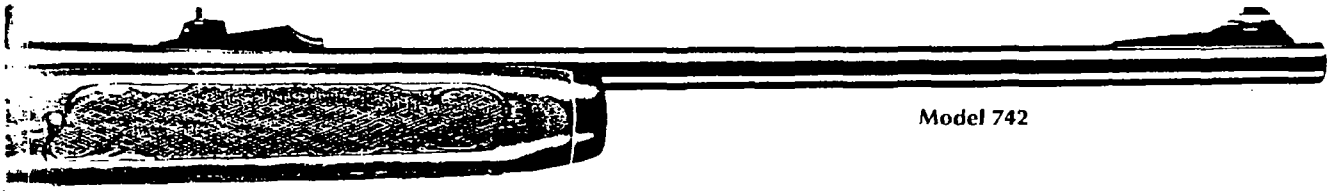


Model 742 BDL Custom Deluxe In 30-06 or 308 Win. Quick loading removable clip magazine holds four cartridges. Basketweave checkering and Monte Carlo stock with full cheekpiece. Fast operation and high accuracy.

Model 742 Carbine In 30-06 and 308 Win. The 18½" barrel and shorter overall length mean easy handling in tough country. Ramp front sight with flat-faced gold bead. Available in standard version only.



Model 742 BDL Custom Deluxe Left Hand For southpaw shooters in 30-06 and 308 Win. calibers only in BDL models. Reversed left-hand safety and cheekpiece. Right side ejection. Less recoil for greater control shot after shot.



Model 742

the standard version, the Model 42 rifle offers a choice of five popular hunting calibers. Straight stock and tapered fore-end are distinctively checkered. The tough, enriching RK-W wood finish protects against the effects of rough handling and long outdoor exposure. Remington's exclusive vibra-honed finish enhances blueing and protects metal. Model 742 carbines hold the fast-handling qualities needed in dense brush or rough-country hunting.

Model 742 "Woodsmaster" rifles are Remington-engineered for maximum strength. Their strength originates from an artillery-type bolt with multiple locking lugs. When the action is closed, these lugs lock bolt to barrel tightly and securely. Inside the action, the cartridge head is encircled tightly by bolt, barrel and receiver . . . three rings of solid steel with no extractor cuts to weaken this critical area.

MODEL 742 SPECIFICATIONS

STOCK & FORE-END: American Walnut. **STANDARD STOCK DIMENSIONS:** 13¼" length of pull, 2¼" drop at heel, 1⅝" drop at comb. BDL Monte Carlo stock: 13¼" length of pull, 2½" drop at heel, 1⅝" drop at comb, 1⅝" drop at Monte Carlo. **RECEIVER:** Drilled and tapped for scope mounts. Removable clip magazine. **CAPACITY:** 4 in clip magazine plus one in chamber. **SIGHTS:** Ramp front sight with flat-faced gold bead. Rear sight has sliding ramp for precise elevation adjustment; also adjustable for windage. Both sights removable for scope mounting without drilling or tapping. **SAFETY:** Positive cross-bolt type. BDL models with left hand cheekpiece have left hand safety, right side ejection. **WEIGHT:** Approx. 7½ lbs. Carbine weighs approx. 6¾ lbs.

Model 760 Carbine In 30-06 or 308 Win. calibers. Shorter, easier handling with 18½" barrel and 38½" overall length. Positive cross-bolt safety. Removable four-shot clip magazine. Composition checkered butt plate. Available in standard version only.

Model 760 BDL Custom Deluxe In 270 Win., 30-06, or 308 Win. Basketweave checkering, Monte Carlo stock with full cheekpiece. Also available in left hand models with reversed safety and cheekpiece as shown. Holds every pump action feature and advantage.

R2525416

Model 760 "Gamemaster" 1975 ter Fire Pump Action Rifles

For hunters who prefer the dependability and feel of a pump action, the Model 760 "Gamemaster" is a superb big game rifle. In the hands of a practiced pump action shooter, the 760 is faster, surer, and more natural to operate than a lever action. Because of these qualities . . . and because it is the only pump action rifle available in 30-06 caliber . . . many hunting authorities prefer the 760 as a deer rifle over the popular 30-30 lever actions. In addition, the natural pumping motion of the "Gamemaster" actually aids the shooter in staying on-target during second and third-shot situations.

Twin action bars eliminate twisting or binding. The shooter pumps the fore-end straight back in a fast, comfortable move. His finger stays on the trigger as he works the pump action for additional shots. Unlike the more cumbersome lever actions, the Model 760's entire trigger assembly stays in the rifle during operation. Fixed positioning of the fire control mechanism eliminates the possibilities of misalignment, grit in the assembly, and painful pinched fingers.

The Model 760 handles high-powered center fire cartridges with great strength and security. The strength of its action comes from the solid steel receiver and an artillery-style bolt with multiple locking lugs. When the action is closed, the lugs lock bolt to barrel tightly and surely. The closed action surrounds the cartridge head with a triple ring of steel . . . bolt, receiver, and barrel.

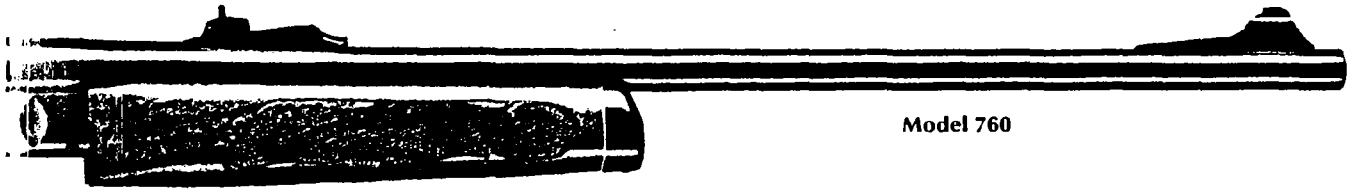
These proud pump actions are designed to take tough use for many years. Moreover, there's a style and popular hunting caliber to meet most situations or preferences. Standard Model 760 rifles come in five calibers, including the 30-06 version ideal for deer. The 760 carbine goes after game in tough terrain. The carbine has standard styling features, a shorter 18½" barrel and comes in 30-06 or 308 Win. Both standard rifle and carbine display a functional, trim look with regular stock, streamlined beavertail fore-end, and skip-line checkering.

Model 760 BDL Custom Deluxe rifles add decorative basketweave checkering and Monte Carlo stock with full cheekpiece. Left hand BDL versions give southpaws the convenience of a left-side safety and reversed cheekpiece. Both right and left hand BDL grades are available in 270 Win., 30-06, and 308 Win. Model 760 high grade custom rifles complete the picture for pump action owners who desire totally individualized specifications and Remington customized decorative work. 760 D Peerless or F Premier grades can accommodate the most discriminating gun tastes.

All of these Model 760s show off handsome appearance accents. All have black fore-end tips and grip caps, white line spacers, exclusive Remington wood and metal finishes. Receivers and internal parts are vibra-honed to a mirror-smooth, highly-blued finish . . . burr-free to assure smooth operation. The DuPont RK-W wood finish brings out wood quality and provides long-lasting protection against scratches and weather. Receivers are drilled and tapped for scope mounts.

Every 760 rifle and carbine is equipped with ramp front sight with flat-faced gold bead and rear sight adjustable for precise windage and elevation settings. Each is furnished with its own removable four-shot clip magazine. Extra clips, sling strap and quick release swivels are available as accessories at additional cost.

The accuracy of the Model 760 matches its superior performance and design.



Model 760

1975

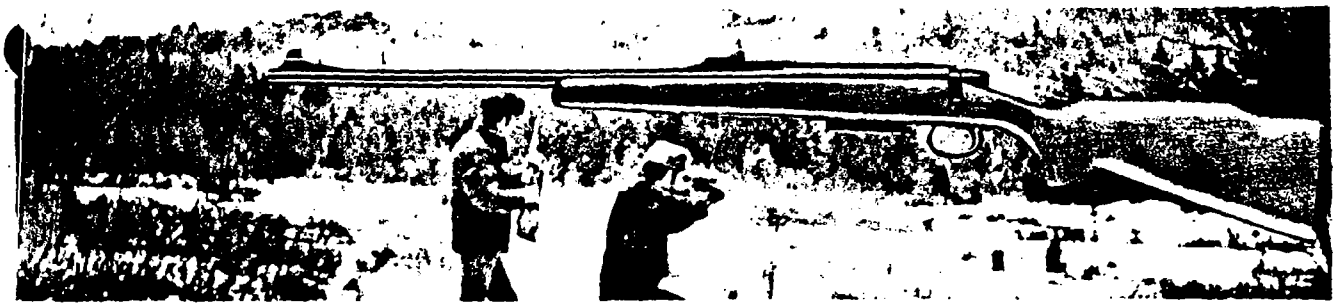
If you're hunting for great rifle value, take aim on the Model 788. Remington designed and built this bolt action to fill the need for a lower-priced big game rifle in popular, modern calibers. The 788 has come to represent highest quality and performance at a price every hunter can afford. At the same time, it has gained a proven reputation for utmost strength and pinpoint accuracy.

The supreme accuracy of the 788 results from extremely fast lock time. The interval between trigger pull and primer ignition is so fast that the bullet leaves the 788's barrel before comparative bullets in ten competitive rifles tested leave their cartridge cases. Unique trigger design provides fast lock time and a crisp, sharp pull on every shot. This rifle's strength stems from the nine locking lugs on the bolt . . . and the super-tight, secure engagement of these lugs into matching grooves in the receiver.

Right-handed models are available in six popular hunting and varmint calibers: 222 Rem., 223 Rem., 22-250 Rem., 6mm Rem., 243 Win., and 308 Win. Left hand 788 versions are chambered for 6mm Rem. or 308 Win. Every Model 788 is equipped with Monte Carlo stock, serrated thumb-type safety, and detachable clip magazine. Blade front sight and adjustable U-notch rear sight. Receivers are drilled and tapped for scope mounts; rear sight barrel holes are correct for target scope blocks. Right-handed 788s furnished with four-power scopes are available in all six calibers. Optional accessories include sling strap with quick release swivels and extra clip magazines in specified calibers.

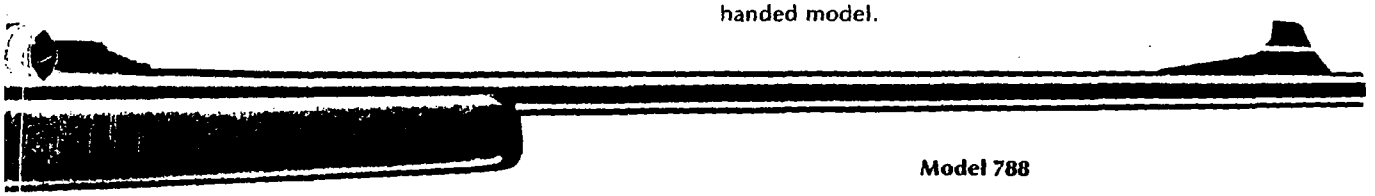
R2525418

Model 788 1973 ter Fire Bolt Action Rifles



Model 788 Left Hand In 6mm. Rem. and 308 Win. Bolt handle and safety are reversed for left-handed shooters. Right side ejection. Composition butt plate. Removable sights. Exceptional accuracy, dependability, and price consciousness.

Model 788 with 4X Scope A combination value for the inflation-conscious sportsman. Supplied with four-power scope, mount, rings, and instructions. Rifle comes with open sights installed. Available in same six calibers as regular right-handed model.



Model 788

"Nylon 1975 Automatic Rim Fire Rifles

Whether you're an experienced shooter or just learning, the "Nylon 66" automatic rim fire rifle promises accurate, reliable shooting enjoyment. While perfect for plinking or training purposes, "Nylon 66" rifles are designed for the highest standards of performance, accuracy, and endurance. Amazing performance records reinforce the superiority of this 22. It was used to set the world's record for shooting hand-thrown 2¾" wooden blocks . . . 100,004 hits out of 100,010 shots without a malfunction. In verified testing by Remington engineers, a single "Nylon 66" fired 75,000 rounds, also without any malfunction.

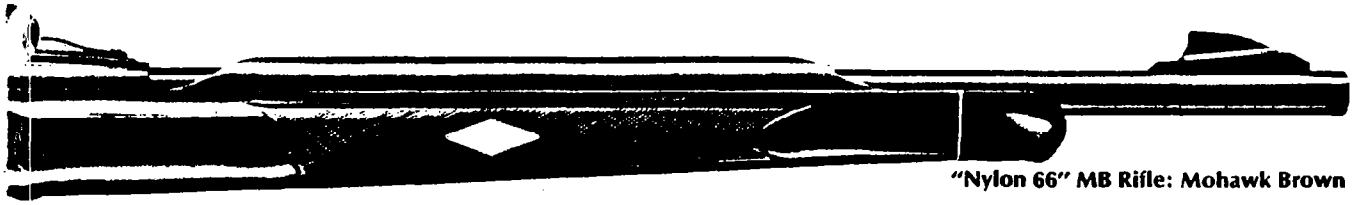
Choose from two models . . . the "Nylon 66" MB in Mohawk Brown with blued barrel and receiver or the presentation grade AB in Apache Black with chrome-plated barrel and receiver. Both have stocks and fore-ends made from super-tough DuPont "ZYTEL" structural nylon. This fantastic gunstock material approximates the feel of wood, but weighs less and outwears wood. This advanced material keeps the "Nylon 66" rifle's total weight at four pounds. Also, it will not fade, chip, warp, or crack for the life of the gun. Fine-line checkering on stock and fore-end provides a functional, non-slip gripping surface. White diamond inlays and white line spacers on butt plate, grip cap, and fore-end tip complement appearance.

The "Nylon 66" automatic action never requires lubrication. Metal parts glide smoothly on long-lasting nylon bearings. The result of this innovative design concept is fast, trouble-free operation with minimal maintenance. The exceptional accuracy of this rifle originates from the bedding of its Remington Proof-Steel barrel, on the same principle used in the most expensive target rifles.

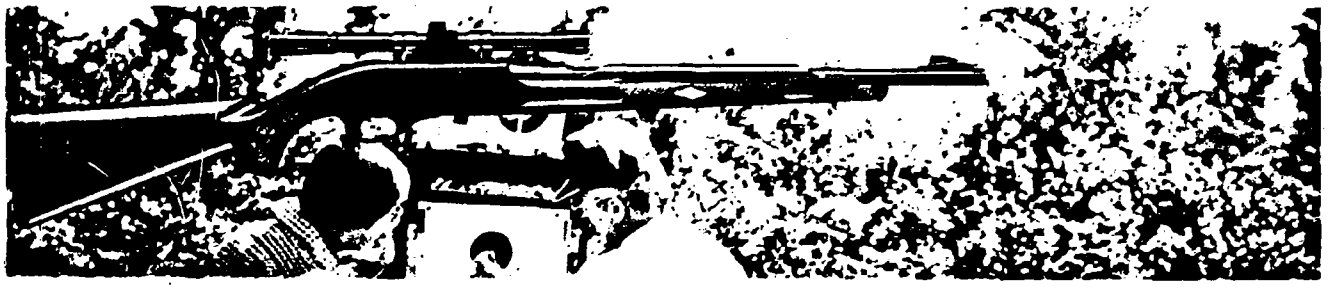
Both MB and AB models have tubular magazines with a capacity of 14 Long Rifle cartridges. The Gallery Special version fires 22 Shorts only. The MB Mohawk Brown rifle is available with four-power scope.

All "Nylon 66" automatics feature top-of-grip positive safeties, blade front and adjustable rear sights. Receivers are grooved for tip-off scope mounts. Loading is accomplished through the buttstock.

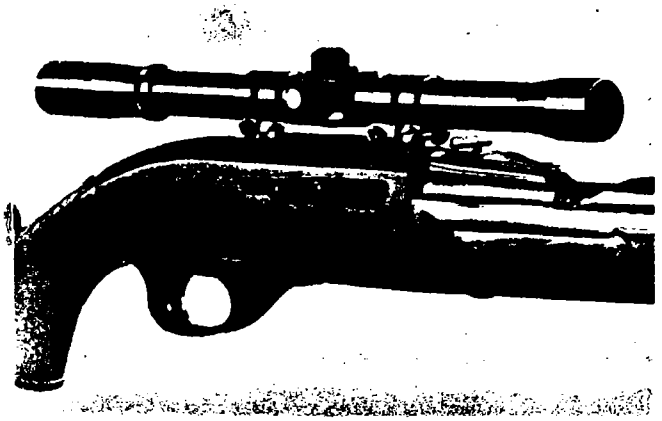
The "Nylon 66" is the most advanced automatic rim fire rifle made today. It is also the 22 caliber shooting system to own for long-term use and enjoyment in the future.



"Nylon 66" MB Rifle: Mohawk Brown



"Nylon 66" MB Rifle with 4X Scope Mohawk Brown automatic supplied with four-power scope and mounts. This combination value forms a modernistic, accurate shooting system.



"NYLON 66" RIFLE SPECIFICATIONS

ACTION: Automatic. **CALIBER:** 22 Long Rifle rim fire. **CAPACITY:** Tubular magazine thru buttstock. Holds 14 Long Rifle cartridges. **BARREL:** 19⅝", precision rifled, ordnance steel. **STOCK:** One piece DuPont "ZYTEL" nylon, checkered grip and fore-end with white diamond inlays, white line spacers on butt plate, grip cap, and fore-end. Black fore-end tip. **COLORS:** Mohawk Brown with blued barrel and receiver. Apache Black with chrome-plated barrel and receiver cover. **SIGHTS:** Adjustable rear sight, blade front, common sight line for iron sights and scope. **SAFETY:** Top-of-grip, positive. **RECEIVER:** Grooved for tip-off scope mounts. Model 552 "Speedmast[1975]utomatic Rim Fire Rifles

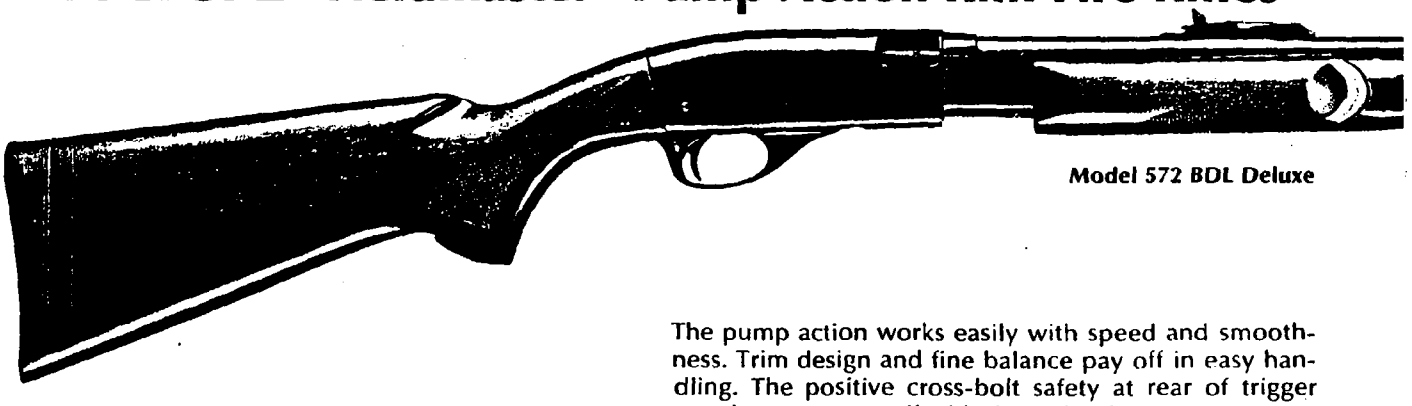
Model 552 BDL Deluxe

Model 552A Tubular magazine holds 20 Short, 17 Long, or 15 Long Rifle cartridges. Styled for shooters of all ages and abilities. Rifle has 23" barrel. Also available in carbine version with 21" barrel.

Model 572 "Fieldmaster" Pump Action Rim Fire Rifles

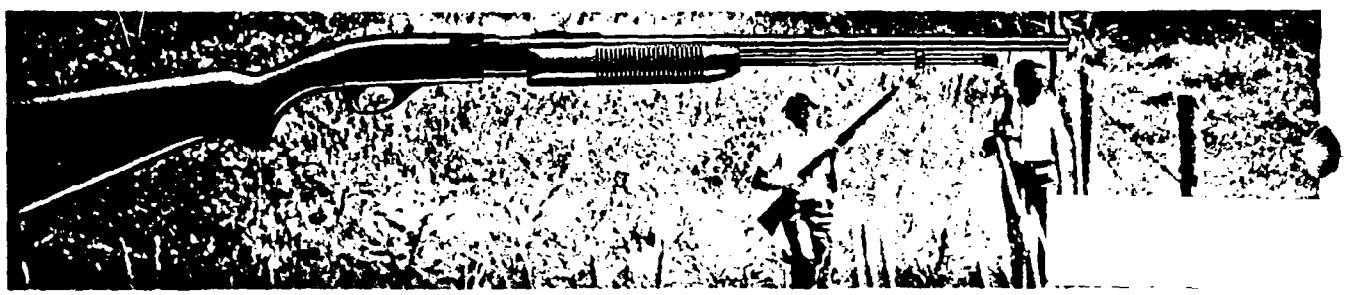


Model 572 BDL Deluxe

The Model 572's exclusive cartridge-feeding design prevents jamming and allows easy single loading. By removing the inner magazine tube, parent or instructor can convert this pump action 22 into a single shot rifle for the beginning shooter. Simply replacing the inner tube makes it a repeater again. This factor makes the "Fieldmaster" ideal as a first rifle for youngsters and gives it lasting value as they become more expert.

The pump action works easily with speed and smoothness. Trim design and fine balance pay off in easy handling. The positive cross-bolt safety at rear of trigger guard snaps on or off with the index finger.

Model 572 "Fieldmaster" pumps give fathers a choice of three versions. The 572A has a ribbed fore-end, plain stock, bead front and adjustable rear sights. The BDL Deluxe gives him custom checkering, DuPont RK-W wood finish, and big game type sights. And the 572 SB offers BDL features with a smooth bore barrel for shooting shot cartridges.



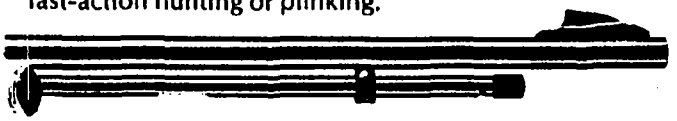
Model 572A Tubular magazine holds 20 Shorts, 17 Longs, 14 Long Rifle cartridges. Receiver grooved for tip-off scope mounts.

1975

Fast automatic action and big-game styling come together in the Model 552 "Speedmaster". This rim fire automatic has everything a 22 shooter looks for . . . accuracy, balance, trouble-free operation, and more. The 552 fires 20 Shorts as fast as you can pull the trigger. It handles Short, Long, and Long Rifle cartridges without adjustment, loading through the tubular magazine.

Four different Model 552 versions cover most automatic rim fire requirements. The 552A rifle presents a smooth stock and tapered fore-end, bead front and adjustable rear sights. The 552C carbine offers the same features with a shorter 21" barrel. The BDL Deluxe version includes custom impressed checkering on stock and fore-end, protective DuPont RK-W wood finish, black grip cap, blade ramp front sight, and big game type step-adjustable rear sight with windage screw. A Gallery Special model fires 22 caliber Short cartridges only. All have cross-bolt safeties, receivers grooved for tip-off scope mounts, and shielded actions.

The Model 552 is an ideal 22 for the whole family . . . for fast-action hunting or plinking.



MODEL 552 SPECIFICATIONS

ACTION: Automatic. **CALIBER:** 22 Short, Long, and Long Rifle rim fire. **CAPACITY:** Tubular magazine holds 20 Short, 17 Long, 15 Long Rifle cartridges. **BARREL:** 23", Carbine 21", precision rifled, ordnance steel. **STOCK:** American Walnut. Model 541-S "Custom" Sporter Bolt Action Rim Fire Rifle

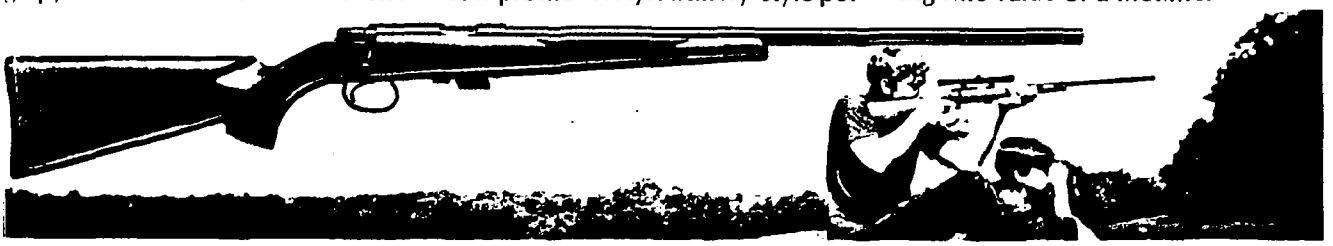
An outstanding example of Remington gunmaking craftsmanship and value. The 541-S "Custom" Sporter combines match rifle accuracy with custom features. The graceful, one-piece stock of American walnut bears fine-line cut checkering, thin pistol grip, and streamlined fore-end. Matching rosewood-colored fore-end tip, grip cap, and checkered butt plate. Gleaming DuPont RK-W wood finish. Decorative scrollwork engraving on specially-blued receiver and bowed trigger guard. Tapered barrel. Crisp, adjustable match-type trigger, low profile safety. Artillery-style polished bolt with six locking lugs. Double extractors. Receiver and barrel drilled and tapped for scope mounts or open sights; receiver grooved for tip-off scopes. Every feature is designed to make this superb bolt action 22 the high-grade sporting rifle value of a lifetime.



Model 541-S "Custom" Sporter Five-shot removable clip magazine handles Short, Long, or Long Rifle cartridges. Swept-back bolt handle. Contoured white line spacers. Sights not furnished.

MODEL 541-S SPECIFICATIONS

ACTION: Bolt, clip magazine repeater. **CALIBER:** 22 Short, Long, and Long Rifle rim fire. **CAPACITY:** 6-shot with 5-shot clip (10-shot clip available as accessory), checkered clip release. **BARREL:** 24", tapered, deep rich blueing, ordnance steel, drilled and tapped for front and rear sights. Countersunk at muzzle. **STOCK:** American Walnut, Monte Carlo, DuPont RK-W wood finish, fine-line cut checkering at pistol grip and fore-end. Checkered rosewood finished butt plate and grip cap, rosewood finished fore-end tip. White line spacers at butt plate, grip cap, and fore-end tip. **SIGHTS:** None supplied, barrel and receiver drilled and tapped for scope mounts or receiver sights; receiver grooved for scope mounts. **SAFETY:** Positive, serrated thumb type, safety indicator markings, forward for fire, rearward for safe. **BOLT:** Artillery style rear lock-up, six locking lugs, double extractors, highly polished. **RECEIVER:** Round, ordnance steel; grooved, drilled and tapped for scope mounts or receiver sights. Deep rich blueing, engraved in scroll pattern. **TRIGGER:** Adjustable match type, steel trigger guard engraved. **OVERALL LENGTH:** 42⅝". **WEIGHT:** 5½ lbs.

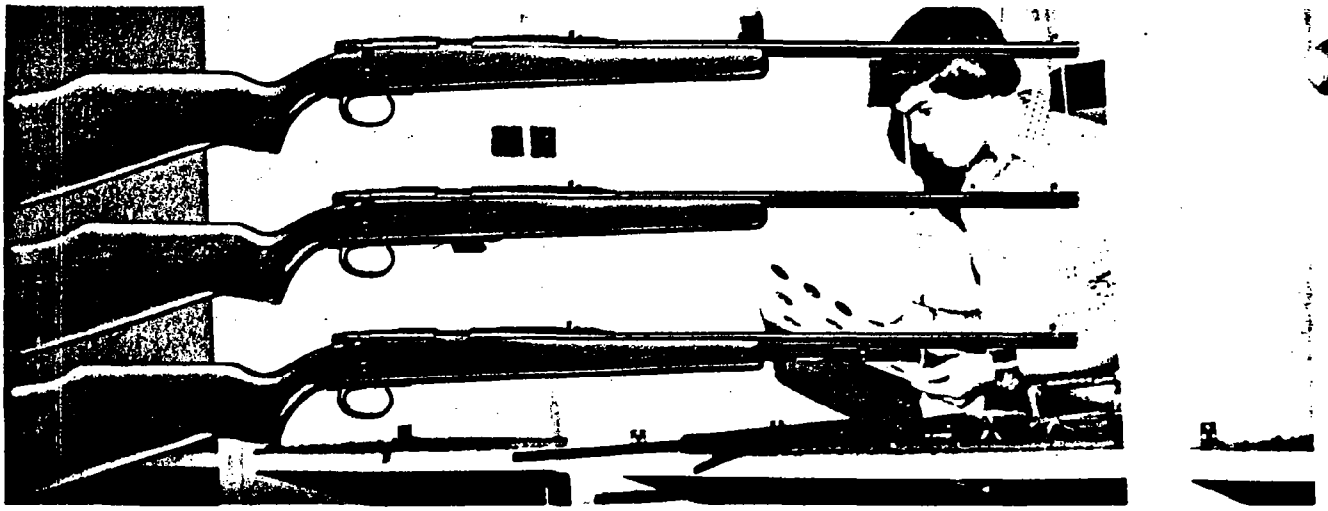
Model 580, 581 & 582 1975 Action Rim Fire Rifles



Model 580: Single Shot Handles Short, Long, or Long Rifle cartridges. Boys' model has one-inch shorter stock. Also available in smooth bore version.

Model 581: Clip Repeater Fires Shorts, Longs, or Long Rifles. Five-shot removable clip magazine. Available with left hand bolt for lefties.

Model 582: Tubular Repeater Holds 20 Short, 15 Long, or 14 Long Rifle cartridges. Precision-rifled 24" barrel of ordnance steel, crowned at muzzle.

These easy-to-handle bolt action 22s are youth-oriented. Incredible strength of action comes from the artillery-type bolt with rear lock-up of its six rotary locking lugs in the grooved steel receiver. Precision accuracy is derived from extra-fast lock time and precise stock bedding of round steel receivers. Wide, crisp triggers. Monte Carlo stocks with pistol grip. Extra-large trigger guards, non-slip thumb safeties, dual extractors, bolt covers, bead front and adjustable U-notch rear sights . . . all are features in common for each model. Choose the 580 Single Shot in regular, smooth bore, or Boys' Rifle. Get the 581 clip repeater in right or left hand version. Or take the 582 tubular repeater.

MODELS 580, 581 & 582 SPECIFICATIONS

ACTION: All bolt action. Remington Target Rifles

Model 540-XR and 540-XRJR Rim Fire Position Rifles The single-shot rim fire match rifle for Intermediates and Junior shooters. Specially designed stock has deep fore-end and five-way adjustable butt plate. Pistol grip design eliminates wrist-twisting and assures straight-back trigger pull. Junior model 540-XRJR has same features with 1¾" shorter stock.

Model 40-XR Rim Fire Position Rifle Same improved stock and pistol grip as the 540-XR. Two-way vertically adjustable butt plate. Exclusive loading platform provides straight-line feeding with no shaved bullets. Meets International Shooting Union requirement for standard rifle.

Model 40-XB "Rangemaster" Center Fire Rifle Favorite of many top shooters for its unsurpassed accuracy. Single shot in standard or heavy barrel versions; repeater in heavy barrel only. Hand-bedded action and free-floating stainless steel barrel. Repeater heavy-barrel models are clip-slotted for conventional five-shot clips and load from top of receiver.

Model 40-XC National Match Course Center Fire Rifle Chambered for 308 Win. (7.62mm NATO) cartridge only. For use in National Match Course Competition. Improved position-style stock. Receiver clip-slotted for five-shot clips. Anti-bind short-throw bolt for rapid fire events. Hand-bedded action and free-floating stainless steel barrel. Meets all International Shooting Union Army Rifle specifications.

Model 40-XBBR Bench Rest Center Fire Rifle Wide, squared fore-end for stability. Available with 20" or 26" stainless steel barrel to meet I.B.S. and N.B.R.S.A. 10½ pound and 13½ pound class specifications.

BEST QUALITY AND VALUE... "RIGHT OUT OF THE BOX"

The kind of quality you expect from the leader in sporting firearms is yours from the moment you take any Remington firearm out of the box . . . dollar for dollar, the best value you can get today.

America's Oldest Gunmaker . . . and Still Made in the U.S.A.

It all started back in 1816. From his first handmade flintlock, Eliphalet Remington started a gunmaking heritage that still lives, 160 years later, on the site of his first forge. Every Remington firearm is still totally American made and assembled. With the same ingenuity and craftsmanship that made Remington America's premier gunmaker.

Today there are machine operations, of course. Many using the latest numerically controlled equipment. There is computer verification before and after the manufacturing process as a means of double checking everything. But there is nothing to replace the careful eyes and hands of the Remington people as they test fire and inspect each gun before it's shipped.

What this means to you is that when you buy Remington, you can be confident that the product will do what you expect, and more. Just as it comes from the box.

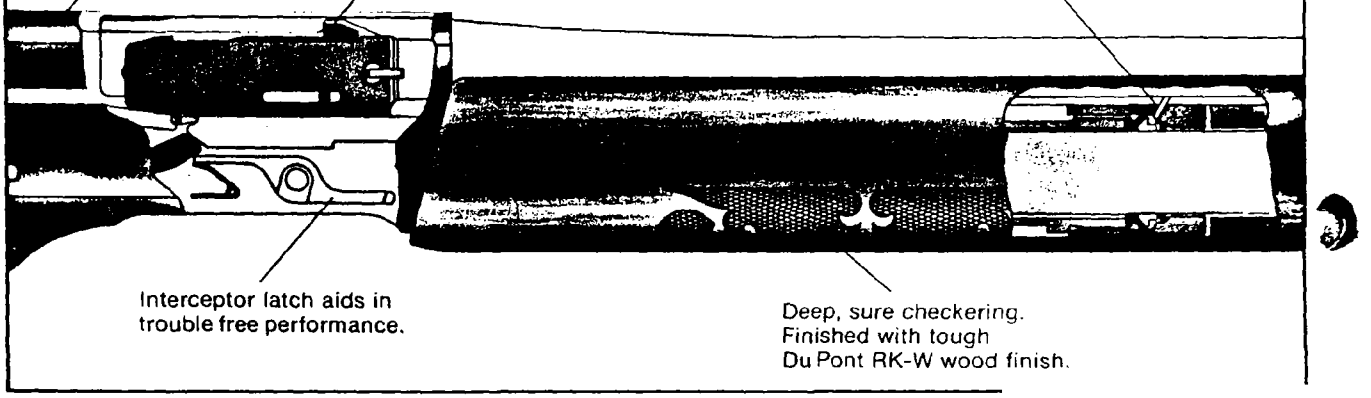
MODEL 1100 AUTOMATIC SHOTGUNS®



R2525433

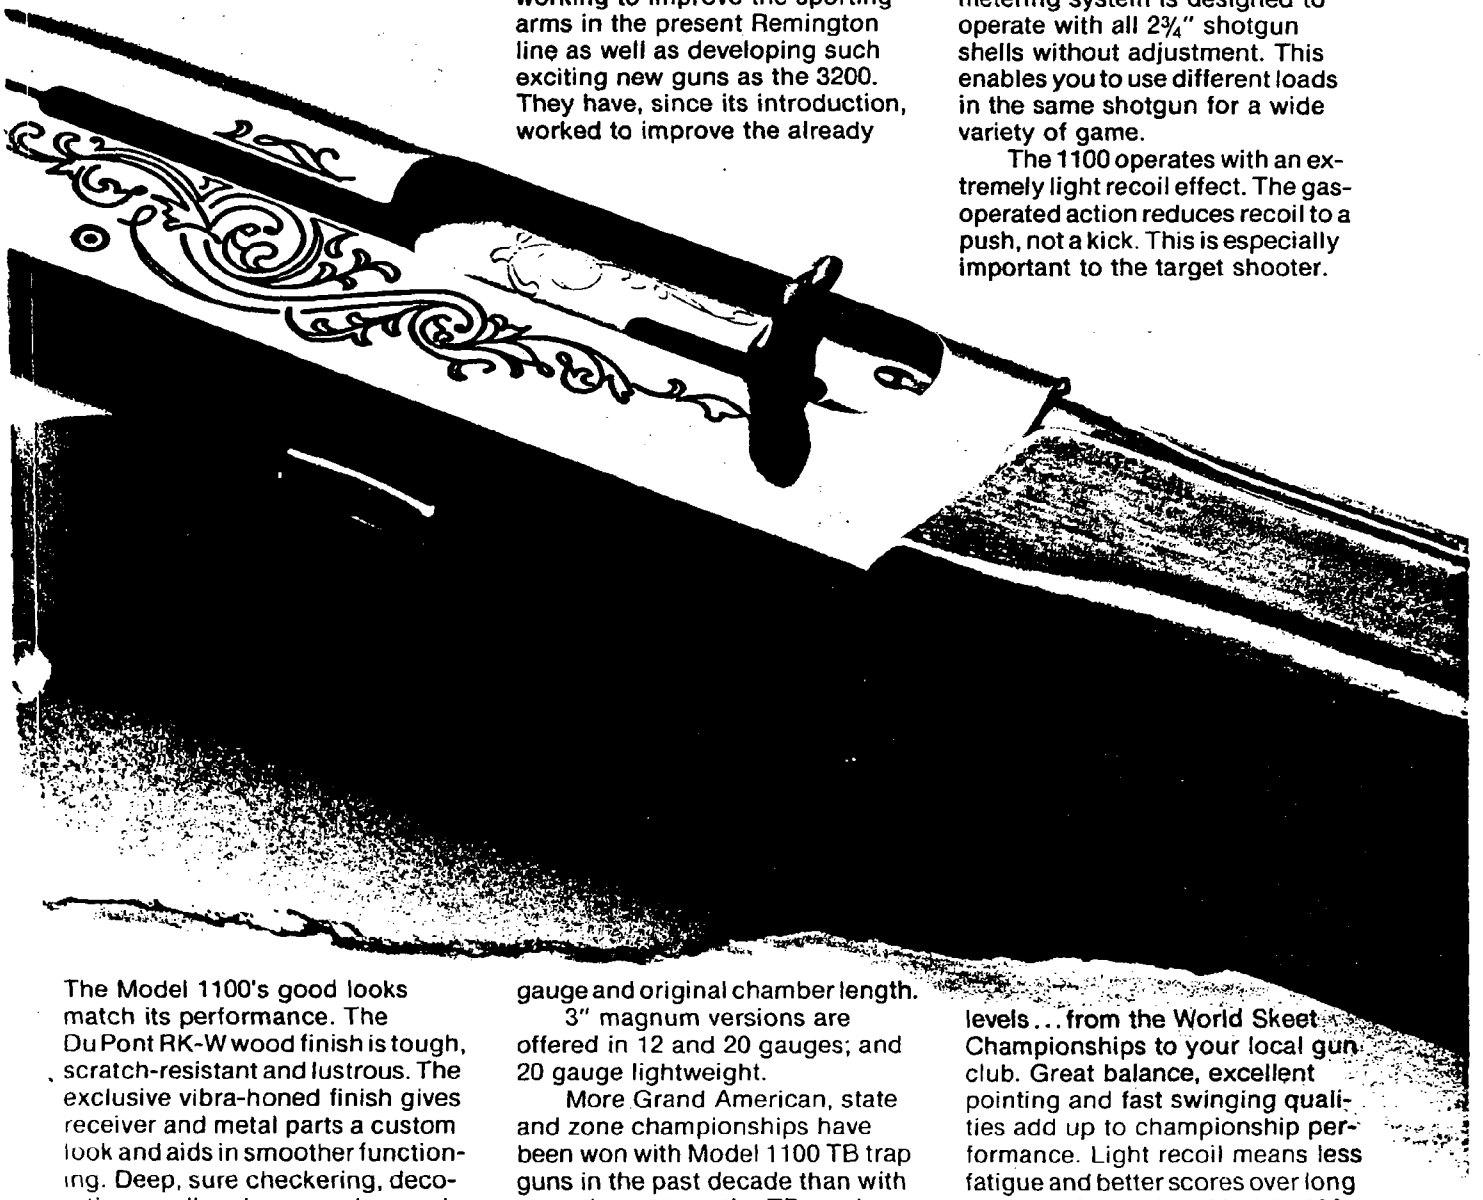
1976

Proven dependability, quality and value have made Remington Model 1100 automatic shotguns an automatic first choice with almost two million shotgun shooters. These factors, combined with shooting ease, superb performance, g... ...igth and graceful appearance, make the Model 1100 America's best selling automatic shotgun.

However, Remington engineers are not content to rest on their laurels. They are constantly working to improve the sporting arms in the present Remington line as well as developing such exciting new guns as the 3200. They have, since its introduction, worked to improve the already dependable Model 1100. As a result, the Model 1100 for 1976 is the same on the outside, but better on the inside.

Your Model 1100 will deliver top performance under any weather conditions. Its unique gas metering system is designed to operate with all 2¾" shotgun shells without adjustment. This enables you to use different loads in the same shotgun for a wide variety of game.

The 1100 operates with an extremely light recoil effect. The gas-operated action reduces recoil to a push, not a kick. This is especially important to the target shooter.



The Model 1100's good looks match its performance. The Du Pont RK-W wood finish is tough, scratch-resistant and lustrous. The exclusive vibra-honed finish gives receiver and metal parts a custom look and aids in smoother functioning. Deep, sure checkering, decorative scrollwork on receiver and chrome plated bolt, fluted comb cuts, white line spacers also enhance overall appearance.

Field grade Model 1100s are offered as follows: 12, 16 and 20 gauges; left hand 12 and 20 gauges; deer guns with rifle sights; 20 gauge lightweight; 28 gauge and 410 gauge. A wide selection of barrel lengths and chokes, and a choice of plain or ventilated rib 2¾" chambered barrels add variety. These barrels are also easily interchangeable within gauge and original chamber length.

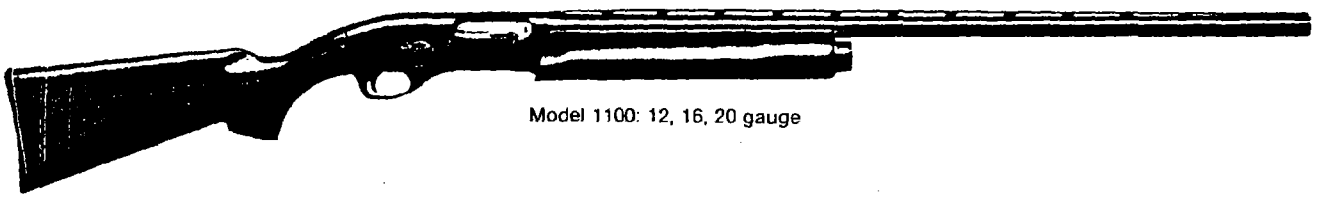
3" magnum versions are offered in 12 and 20 gauges; and 20 gauge lightweight.

More Grand American, state and zone championships have been won with Model 1100 TB trap guns in the past decade than with any other automatic. TB grade 1100s are available with regular or Monte Carlo stocks and 30" ventilated rib barrels in Full or Modified Trap chokes. Mirror-image left hand models come in Full choke only. All have ivory bead front sights, white metal middle sight and recoil pad. Extra trap barrels in 28", 30" and 34" are interchangeable.

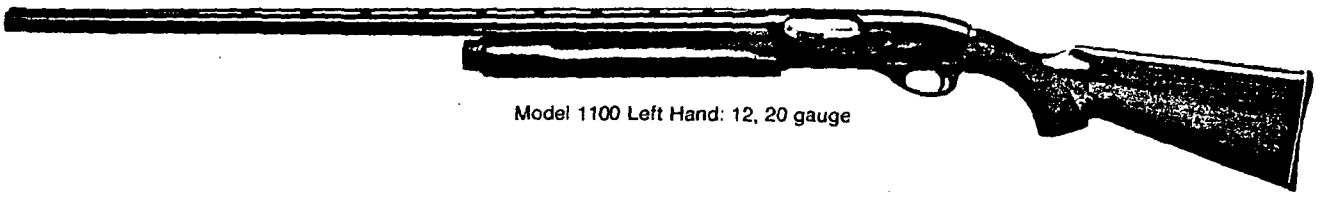
For the skeet shooter, the Model 1100 automatic is in a class by itself as evidenced by its dominance at all skeet shooting levels... from the World Skeet Championships to your local gun club. Great balance, excellent pointing and fast swinging qualities add up to championship performance. Light recoil means less fatigue and better scores over long periods of shooting. Model 1100 SA skeet guns enter all events in 12, 20, 28 and 410 gauges. Left hand mirror-image 12 and 20 gauges available. SB grade 1100s, in 12 and 20 gauges, are fitted with specially selected American walnut stocks and fore-ends. All 12 and 20 gauge Model 1100 skeet guns have 26" barrels, 28 and 410 gauge 1100s have 25" barrels. Extra barrels, interchangeable within gauge and chamber length, easily convert the Model 1100 skeet gun to a hunting gun.

R2525434

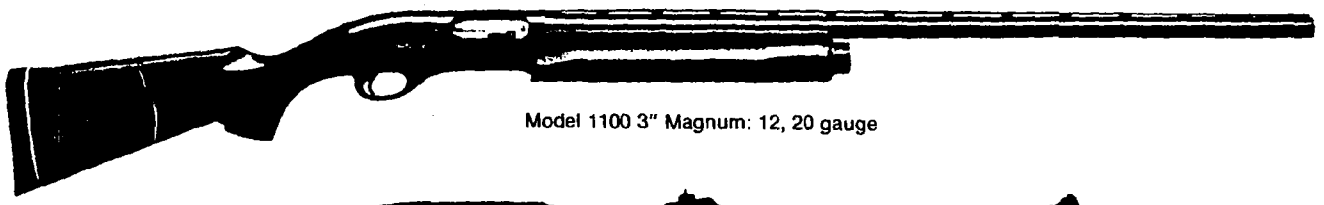
1976



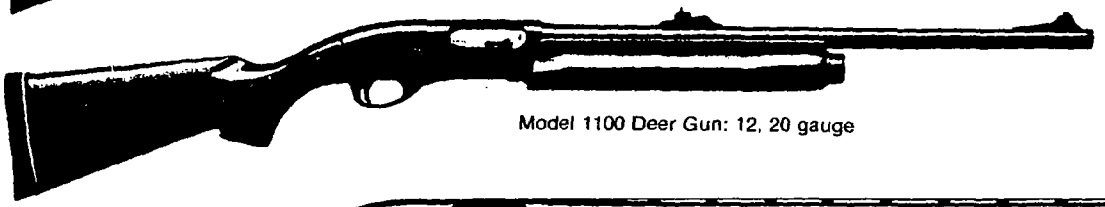
Model 1100: 12, 16, 20 gauge



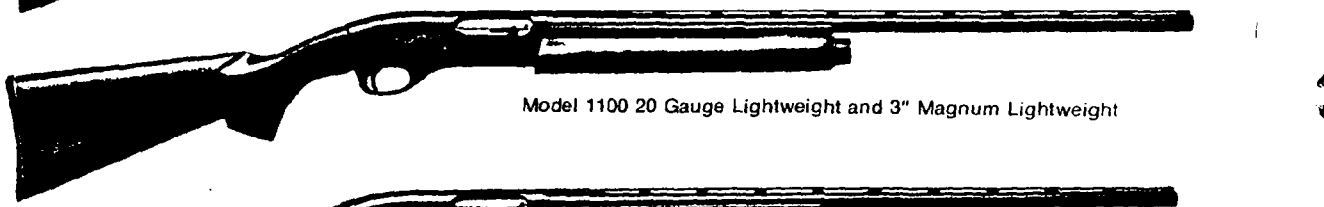
Model 1100 Left Hand: 12, 20 gauge



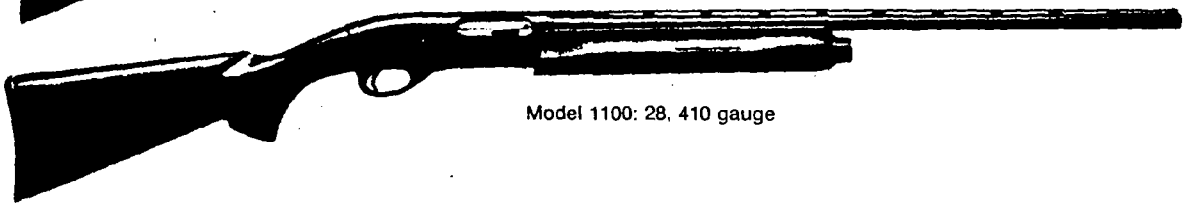
Model 1100 3" Magnum: 12, 20 gauge



Model 1100 Deer Gun: 12, 20 gauge



Model 1100 20 Gauge Lightweight and 3" Magnum Lightweight



Model 1100: 28, 410 gauge

MODEL 1100 FIELD GRADE

Remington Model 1100—The only automatic shotgun offered in all five popular gauges for all types of shotgun shooting.

Model 1100: 12, 16, 20 gauge. America's most popular automatic.

Model 1100 Left Hand: 12, 20 gauge. Features left-side loading, ejection, and safety for comfortable, more efficient left-handed shotgunning. Also available in 3" magnum, 12 gauge. All with ventilated rib barrel.

Model 1100 3" Magnum: 12, 20 gauge. Specially designed for maximum performance with 3" magnum and 2¾" magnum shells only. Ventilated rib or plain barrel. Recoil pad. Left hand version in 12 gauge ventilated rib barrel only.

Model 1100 Deer Gun: 12, 20 gauge. Shorter 22-inch barrel for easy carrying. Rifle sights. Rear sight adjustable for windage and elevation. Improved Cylinder choke for rifled slugs and buckshot. Recoil pad and white line spacer.

Model 1100 20 gauge Lightweight and 3" Magnum Lightweight. Special weight-saving design with steel receivers for maximum strength. Handles all 2¾" loads. The 3" magnum model is designed to function with 2¾" and 3" magnum loads only. These lightweights pay off in carrying ease.

Model 1100: 28 and 410 gauge. 1100 styling, value and performance in small gauge receivers. Available in a wide selection of chokes in plain or ventilated rib barrels.

Note: Barrels chambered for 2¾" shells should not be interchanged with barrels for 3" magnum. 3" magnum barrels should not be interchanged on standard receivers. Left hand barrels interchange only on left hand receivers.

...twisting and binding, guarantee straight line pumping. And the Model 870 features smooth feeding and positive ejection in any weather, under any hunting conditions.

The rich appearance helped them select the Model 870, too. Stocks and fore-ends are enriched and protected by the scratch resistant DuPont RK-W wood finish. Metal parts vibra-honed to achieve a more lustrous finish and smoother action. Functional checkering, full beavertail fore-end, chrome plated bolt and white line spacers enhance the overall styling.

Field grade Model 870s are offered as follows: 12, 16 and 20 gauges; left hand 12 and 20 gauges; deer guns with rifle sights; 20 gauge lightweight; 28 and 410 gauge. A wide selection of barrel lengths, chokes, and a choice of plain or ventilated rib 2¾" chambered barrels add variety. These barrels are also easily interchangeable within gauge and original chamber length.

3" magnum versions are offered in 12 and 20 gauges; and 20 gauge lightweight.

Model 870:
12, 16 and 20 gauge.
Handles all 2¾" shotgun shells. Wide selection of extra barrels, including a long-range 12 gauge 34-inch duck/goose barrel.

Model 870, Left Hand:
12, 20 gauge.
Ventilated rib barrel. Left-side feeding and ejection. Also available in 12 gauge magnum. Really comfortable shooting for southpaws.

Model 870 "Brushmaster" Deluxe Deer Gun:
12, 20 gauge.
Rifle sights and 20-inch barrel. Deluxe and standard models. Standard model in 12 gauge only has plain stock, grooved fore-end.

Model 870 3" Magnum:
12, 20 gauge.
Handles all 3" and 2¾" shotgun shells. Plain or ventilated rib barrel.

MODEL 870 SPECIFICATIONS—FIELD GRADE

STYLE: Pump action shotgun. **GAUGES:** Right hand versions in 12, 16, 20, 28, and 410. Left hand versions in 12 and 20. **BARREL:** Special Remington proof steel. NEW FOR 1976!

Remington 3200 Competition Trap and Skeet: 12 gauge.
Classics in their own time. The Remington Competition guns have all the performance features of the standard 3200 plus superlative appearance features that make them a standout. The wood is selected for figure and grain and is offered in a choice of a subdued satin finish or Du Pont RK-W high gloss wood finish. Stock, side panels, grip, and fore-end are cut-checkered in a distinctive design. Contoured pistol grip and presentation-style recoil pad. Gilded "Competition" scroll on frame. The trigger guard and fore-end latch are engraved. Trap Monte Carlo or regular stocks are offered with 30" or 32" barrels. Skeet guns are offered with 26" or 28" barrels.

Remington 3200 Field: 12 gauge.
Standard 2¾" chambers in field grade, with choice of barrel lengths and chokes. Also available with 3" magnum chambers, and 30" barrels designed to handle lead or steel shot. Magnum version fitted with recoil pad.

Remington 3200 Trap: 12 gauge.
Fast becoming a favorite with trapshooters who prefer over-and-unders. Standard or Monte Carlo stocks, 30" and 32" barrels. Ivory bead front and metal bead middle sights.

Remington 3200 Skeet: 12 gauge.
Exceptional balance gives the 3200 the easy handling characteristics demanded by the skeet shooter. Minimum recoil sensation and muzzle jump help get you onto that second bird in doubles.

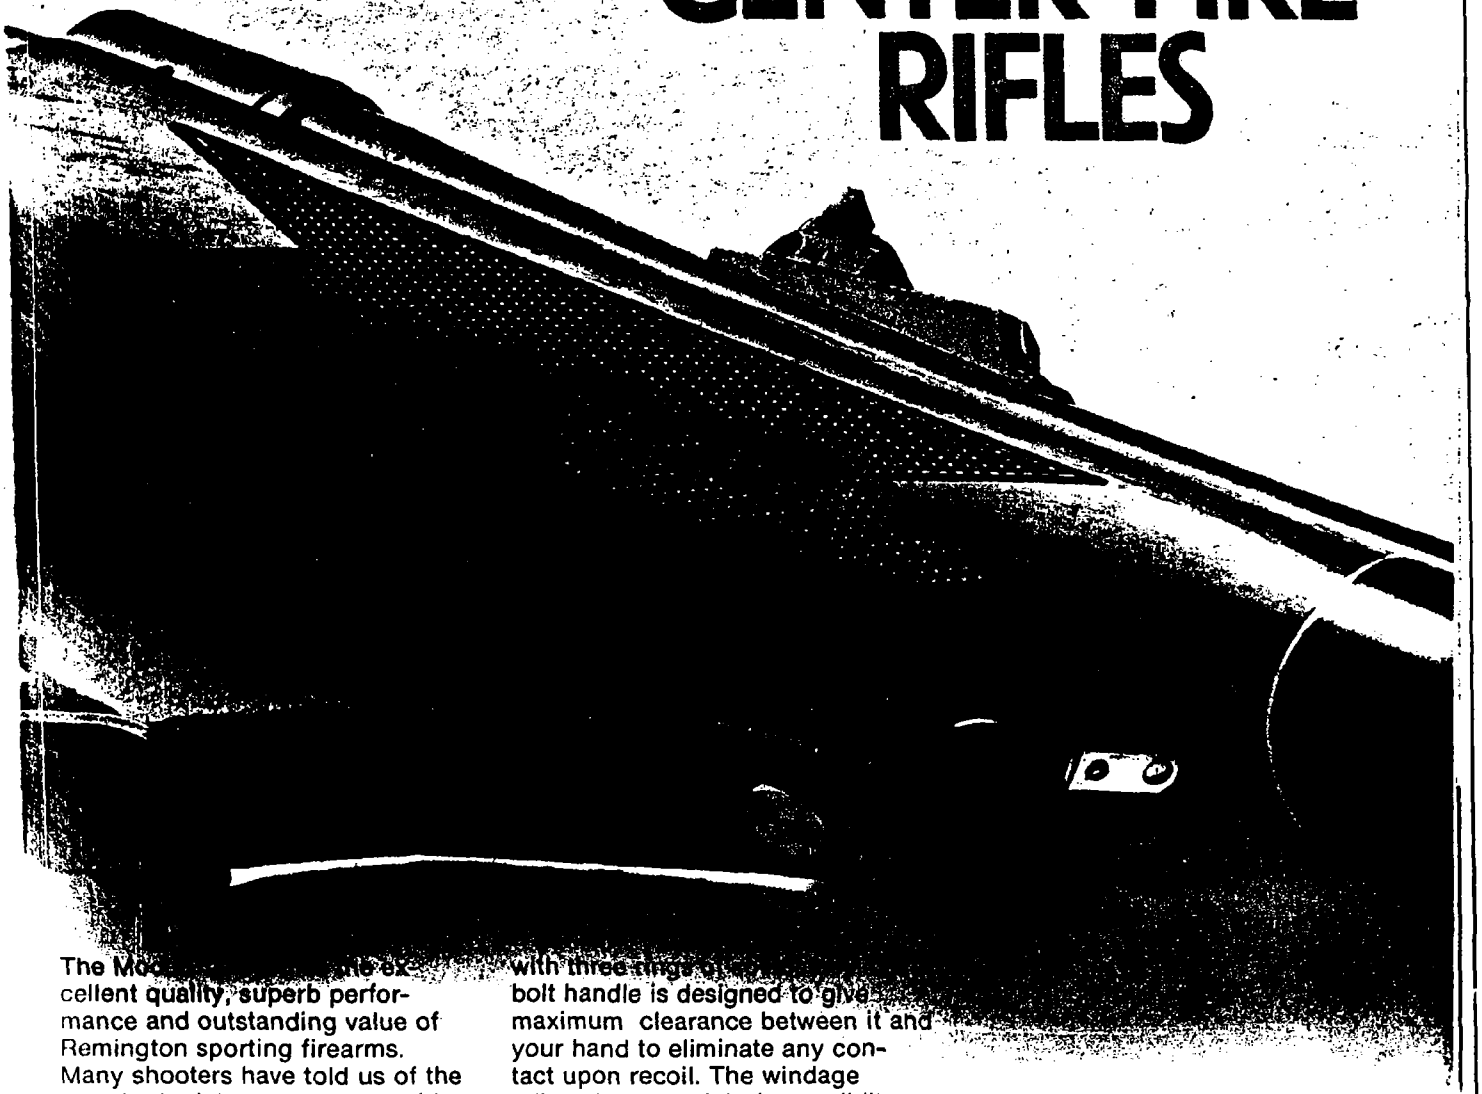
MODEL 700 CENTER FIRE RIFLES



The Mo[illegible] ex-cellent quality, superb performance and outstanding value of Remington sporting firearms. Many shooters have told us of the amazingly tight groups shot with these rifles... "right out of the box." The design and workmanship of the Model 700 have become the standard of excellence by which other big-game rifles are measured. Available in fifteen calibers... it is America's best selling bolt action center fire rifle.

In big game hunting, dependable performance is of primary importance. The 700's antibind bolt and stainless steel magazine follower assure smooth operation without bind or drag. The action is one of the strongest ever designed. Bolt face, barrel and receiver surround the cartridge head with three rings [illegible] bolt handle is designed to give maximum clearance between it and your hand to eliminate any contact upon recoil. The windage adjustable rear sight has a sliding ramp for precise elevation adjustment. Both sights are easily removed for scope mounting.

The Model 700 combines accuracy and sleek, graceful styling with optimum handling and performance features in a wide variety of caliber selections.

del 700 BDL Custom Deluxe

l 700 BDL "Varmint Special"

MODEL 700 SPECIFICATIONS

STOCK: American walnut BDL and "Varmint Special" models have cut checkering 20 lines to the inch that extends around entire fore-end. Safari and C Custom models are hand-checkered. ADL has skip-line checkering. Solid rubber presentation-type recoil pads on Magnum models. BDL and "Varmint Special" models include sling strap and quick release swivels installed, black fore-end tip and white line spacers. **STANDARD STOCK DIMENSIONS:** 13⅜" length of pull, 2⅜" drop at heel, 1⅝" drop at comb (measured from open sight line). "Varmint Special" stock: 13⅜" length of pull, 1⅜" drop at heel, ½" drop at comb (measured from center line of bore). **RECEIVER:** One-piece ordnance steel with antibind bolt. Drilled and tapped for scope mounts and receiver sights. Fixed magazine with stainless steel magazine follower. BDL, "Varmint Special", and Safari grade have hinged floor plate. **SIGHTS:** Ramp front sight with flat-faced gold bead. BDL and Safari grade front sights are hooded. Rear sight has sliding ramp for precise elevation adjustment, also adjustable for windage. Both sights are removable for scope block mounting without drilling or tapping. "Varmint Special" is furnished without sights, but with front and rear 40-XB type scope bases installed. **SAFETY:** Fast positive thumb type. Left hand models have left hand safety, bolt, and ejection.

MODEL 700 C CUSTOM—Manufactured to customer specifications. Left hand C Custom models available in 25-06 Rem., 270 Win., 30-06, 7mm. Rem. Mag., 264 Win. Mag., and 300 Win. Mag. Choice of 20", 22", or 24" barrel in high proof ordnance steel only. With or without hinged floor plate. With hunting sights or plain barrel. Sling strap and quick release swivels installed. Length of pull from 13⅜" to 14" without recoil pad. Extra charge for recoil pad (on all except Magnum models), oil-finished stock, left hand cheekpiece. Orders non-cancellable. Allow at least six months for delivery of these custom guns.

clip in your pocket), convenient bolt release and positive cross-bolt safety. Receivers are drilled and tapped for scope mounts. Ramp front sight with flat-faced gold bead and adjustable rear sight. All models have black fore-end tips and white-line spacers.

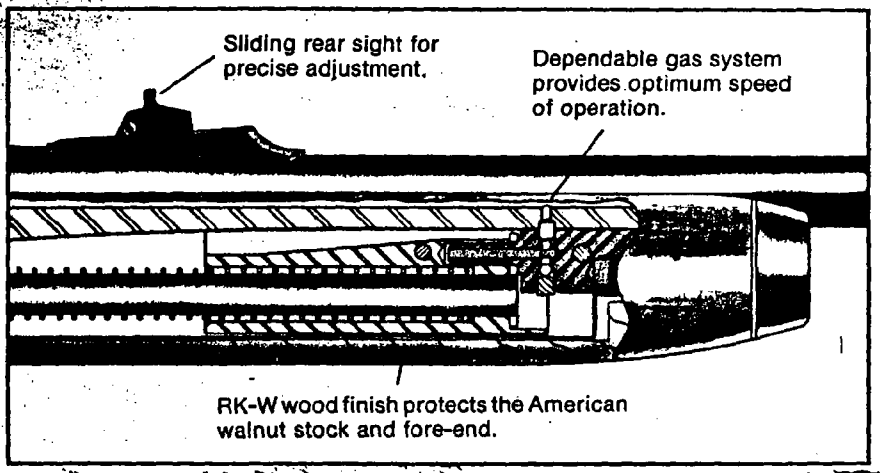
Stock and tapered fore-end are distinctively checkered. The tough DuPont RK-W finish protects and enriches the wood. Remington's exclusive vibra-honed finish enhances blueing and smooths out the action.

Add it up—styling, fast handling, superb accuracy and reliability, moderate price—and you have the best value in an automatic rifle "right out of the box."

[illegible] these features for value in [illegible] automatic: all 742s have a fast [illegible] 4-shot removable clip magazine (easy to carry an extra [illegible] during fast suc- [illegible]

[illegible] bead is on- [illegible] barrel and [illegible] lugs of solid steel [illegible] extractor cuts to weaken [illegible] critical area.

All-weather dependability is another characteristic of these automatics. They're built and tested to withstand the most adverse conditions of weather and temperature. Interior working parts are coated with DuPont "Teflon-S" resin. This friction-reducing coating lubricates, resists dirt and oil, makes cleaning easier and adds to the life of your gun.



Model 742.
The Model 742 "Woodsmaster" standard version is available in five popular hunting calibers. Sights are removable. Receiver drilled and tapped for scope mounting.

Model 742 Carbine.
All of the features of the standard 742 in this shorter version. An 18½-inch barrel and shorter overall length make for the fast handling qualities needed in dense brush or rough country hunting. In 30-06 and 308 Win. calibers.

Model 742 BDL Custom Deluxe.
Deluxe basketweave checkering and Monte Carlo stock with full cheekpiece. Available in a left hand version with cheekpiece on the right side of the stock and left hand safety. In 30-06 and 308 Win. calibers.

MODEL 742 SPECIFICATIONS

STOCK & FORE-END: American walnut. **STANDARD STOCK DIMENSIONS:** 13¼" length of pull, 2¼" drop at heel, 1⅝" drop at comb. BDL Monte Carlo stock: 13¼" length of pull, 2⅛" drop at heel, 1⅝" drop at comb, 1⅝" drop at Monte Carlo. **RECEIVER:** Drilled and tapped for scope mounts. Removable clip magazine. **CAPACITY:** 4 in clip magazine plus one in chamber. **SIGHTS:** Ramp front sight with flat-faced gold bead. Rear sight has sliding ramp for precise elevation adjustment, also adjustable for windage. Both sights removable for scope mounting without drilling or tapping. **SAFETY:** Positive cross-bolt type. BDL models with left hand cheekpiece have left hand safety, right side ejection. **WEIGHT:** Approx. 7 lbs. Carbine weighs approx. 6¼ lbs.

Model 760

Model 760 Carbine

Model 760 BDL Custom Deluxe

MODEL 760 "GAMEMASTER" CENTER FIRE PUMP ACTION RIFLES

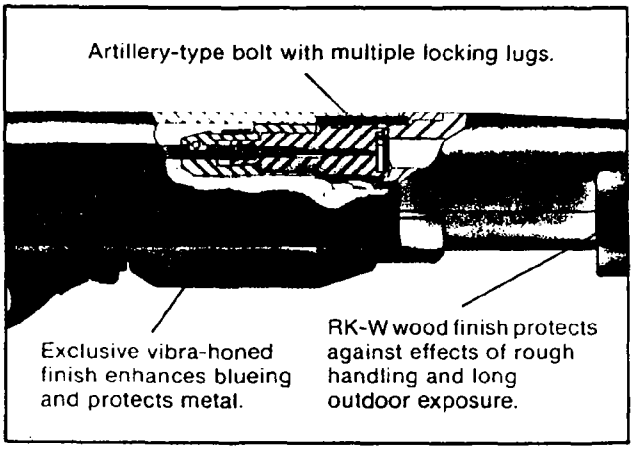
The smooth, dependable pump action of the 760 "Gamemaster" allows you to keep the rifle in a natural shooting position while operating the action. Styled for fast handling, the 760 operates more surely and naturally than a lever action.

The strength of the "Gamemaster" action comes from the solid steel receiver and an artillery-style bolt with multiple locking lugs. The smoothness is the result of twin action bars which eliminate twisting or binding. The fixed trigger assembly means that your finger never leaves the trigger as you work the pump action. No awkward motions, no pinched fingers.

Receivers and internal parts are vibra-honed to a mirror smooth, highly blued finish . . . burr-free to assure smooth operation. The Du Pont RK-W wood finish brings out wood quality and provides long-lasting protection against scratches and weather.

Model 760.
The only pump action rifle available in 30-06. Also in 6mm Rem., 243 Win., 270 Win. and 308 Win. calibers.

Model 760 Carbine.
A good rifle for brush country. Has an 18½-inch barrel and the features of the standard Model 760. In 30-06 and 308 Win. calibers.



Model 760 BDL Custom Deluxe.
Special basketweave checkering and Monte Carlo stock with full cheekpiece, plus all of the performance features of the standard 760. Chambered for 270 Win., 30-06 and 308 Win. calibers. In right and left hand versions.

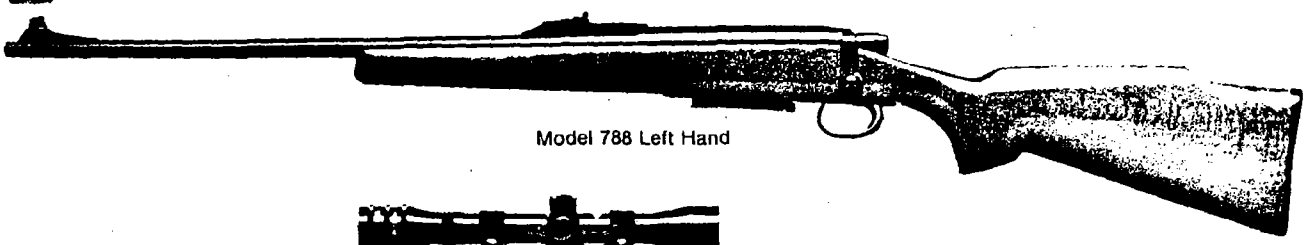
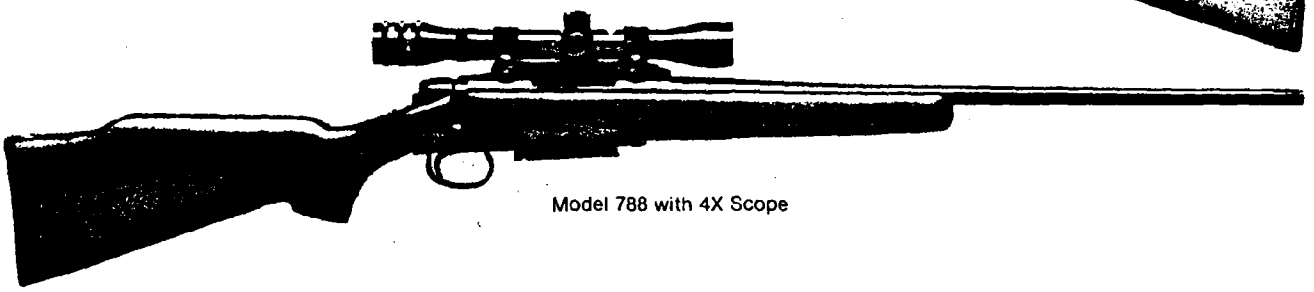
Model 788



Model 788 Left Hand



Model 788 with 4X Scope

MODEL 788 CENTER FIRE BOLT ACTION RIFLES

The Model 788 center fire, bolt action rifle is priced to put a top-performance big-game rifle within the range of any hunter's wallet. The high quality and superb accuracy built into the Model 788 make it an excellent value.

An incredibly fast lock time is one reason for the accuracy. In tests against ten competitive rifles, the bullet left the barrel of the 788 before it had left the cartridge case of the others. Nine locking lugs on the bolt lock into matching grooves in the receiver, for a supertight fit.

The Model 788 is equipped with Monte Carlo stock, serrated thumb-type safety and detachable clip magazine, blade front sight and fully adjustable U-notch rear sight. Receiver drilled and tapped for scope mounts. Left hand versions available in 6mm Rem or 308 Win. Right hand 788s are offered with four-power scopes, available in all six calibers in which the Model 788 is made—a great combination for the value conscious hunter... "right out of the box."

MODEL 788 SPECIFICATIONS

STOCK: Walnut finished hardwood, Monte Carlo. **STANDARD STOCK DIMENSIONS:** 13⅜" length of pull, 2⅝" drop at heel, 1⅝" drop at comb (measured from open sight line) **RECEIVER:** Drilled and tapped for scope mounts and receiver sight. Furnished with zippered carrying case. Rem Order No. 5470 Suggested Retail Price $169.95

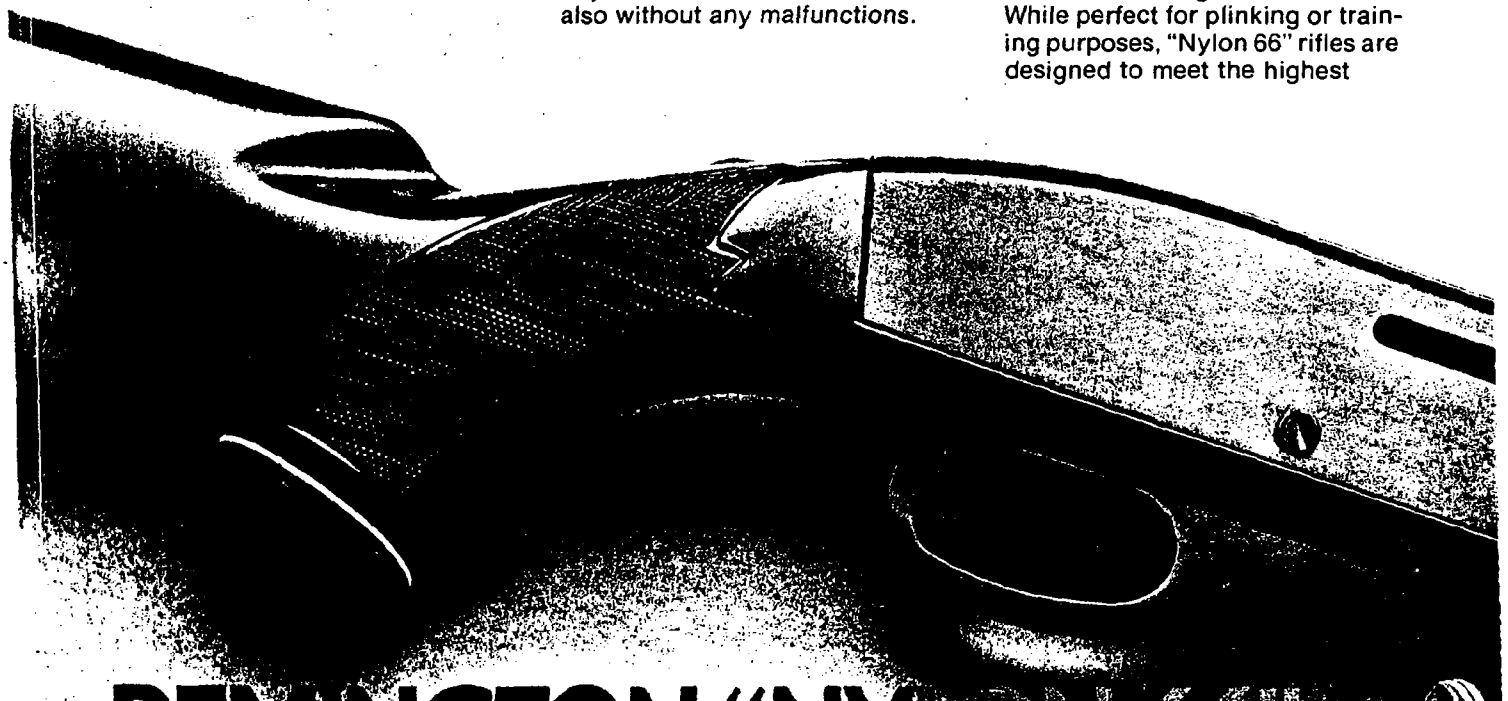
R2525452

The "Nylon 66" is another perfect example of Remington reliability "right out of the box." Amazing performance records have established the superiority of this 22. It was used to set the world record for 1176 end-thrown 2¾-inch wooden blocks—100,004 hits out of 100,010 shots without a malfunction. In verified testing by Remington engineers, a *single* "Nylon 66" fired 75,000 rounds, also without any *malfunctions*.

All "Nylon 66" rifles have a tubular magazine which feeds *through* the buttstock for easy loading.

This is the 22 for experienced shooters and beginners alike. While perfect for plinking or training purposes, "Nylon 66" rifles are designed to meet the highest



REMINGTON "NYLON 66" AUTOMATIC RIM FIRE RIFLES

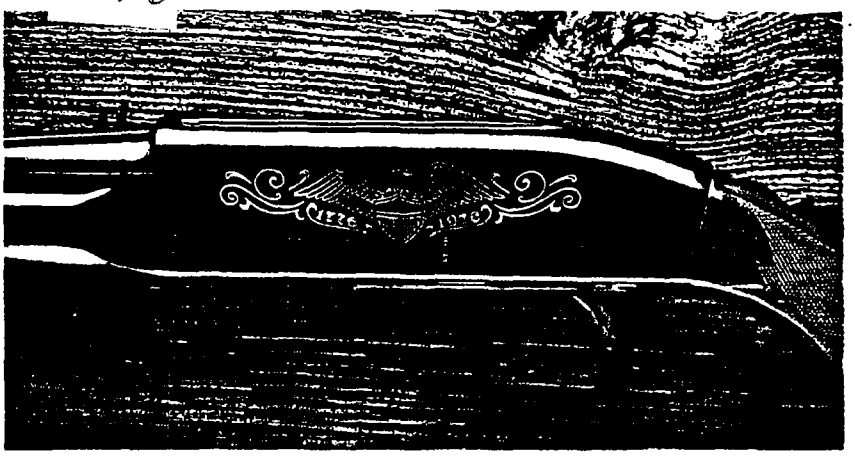
R2525453

1776

standards of performance, accuracy and endurance.

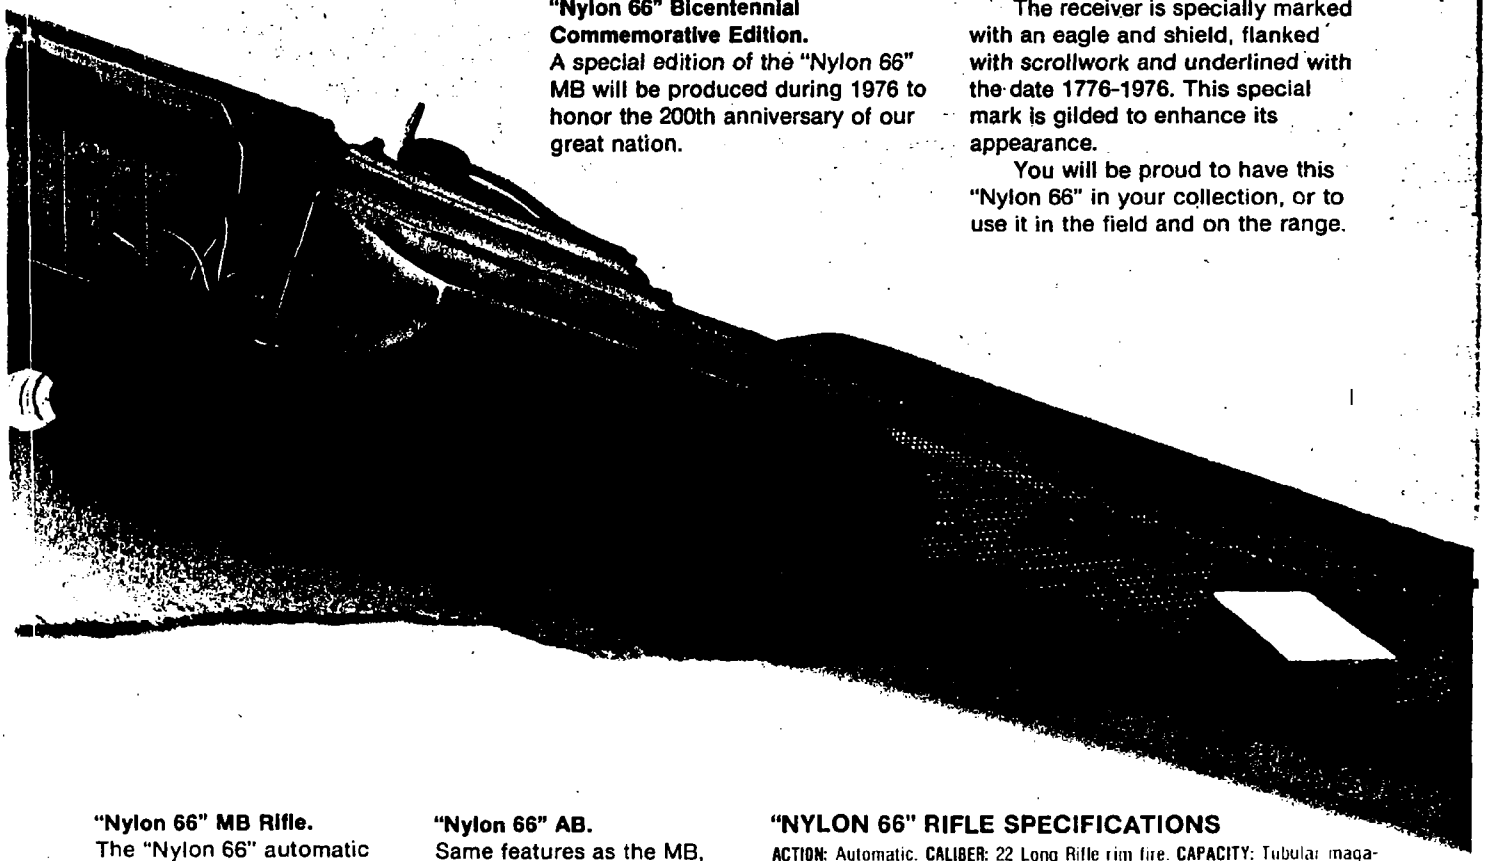
Choose from two models—the "Nylon 66" MB, in Mohawk Brown with blued barrel and receiver, or the AB, in Apache Black with all-weather chrome-plated barrel and receiver. Both have stocks and fore-ends made of extremely durable, supertough Du Pont "Zytel" structural nylon.



"Nylon 66" Bicentennial Commemorative Edition.
A special edition of the "Nylon 66" MB will be produced during 1976 to honor the 200th anniversary of our great nation.

The receiver is specially marked with an eagle and shield, flanked with scrollwork and underlined with the date 1776-1976. This special mark is gilded to enhance its appearance.

You will be proud to have this "Nylon 66" in your collection, or to use it in the field and on the range.



"Nylon 66" MB Rifle.
The "Nylon 66" automatic action never needs lubrication. Metal parts glide smoothly on greaseless nylon bearing surfaces. The exceptional accuracy of this rifle originates from the bedding of its Remington proof steel barrel, and is based on the same principle used in the most expensive target rifles. Tubular magazine feeds through buttstock and has a capacity of 14 long rifle cartridges. Lightweight 22 fun at a mere four pounds.

"Nylon 66" AB.
Same features as the MB, but with all-weather chrome-plated barrel and receiver, and jet black "Zytel" nylon stock.

"Nylon 66" MB with 4X Scope
in Mohawk Brown. Supplied with four-power scope and mount. This extra-value combination gives you a durable, accurate shooting system.

"NYLON 66" RIFLE SPECIFICATIONS

MODEL 541-S "CUSTOM" SPORTER BOLT ACTION 22 RIM FIRE RIFLE

An outstanding example of Remington gunmaking craftsmanship and value. Check these features: Classic American walnut stock; thin pistol grip; fine-line cut checkering; matching rosewood-colored fore-end tip, grip cap and checkered butt plate; Du Pont RK-W wood finish. Decorative scroll-work engraving on specially blued receiver and bowed trigger guard. Adjustable match type trigger; low-profile safety; artillery-style bolt with six locking lugs; double extractors. Receiver and barrel drilled and tapped for scope mounts or open sights; receiver grooved for tip-off scopes.

MODEL 580, 581 & 582 BOLT ACTION RIM FIRE RIFLES

The popular choice for the 22 rim fire shooter who prefers a bolt action. Practical and economical, these rifles have strong, safe, dependable actions. Extra-fast lock time increases accuracy. Full-size Monte Carlo stocks, 24-inch precision rifled steel barrels.

Model 580 (Single Shot): Handles short, long or long rifle cartridges. Also available in smooth-bore version. Boy's Rifle has one-inch shorter stock.

Model 581 (Clip Repeater): Shoots shorts, longs or long rifles. Five-shot removable clip magazine. Extra five and ten shot clip magazines available. Optional left hand version.

Model 582 (Tubular Repeater): Holds 20 short, 15 long or 14 long rifle cartridges.

MODEL 541-S SPECIFICATIONS

"I remember my first shotgun very well.

"That's because I still have it, and I even use it now and then. It's a Remington Model 11 and my grandfather gave it to me. He bought it back in the twenties. He used it a lot, but he took good care of it, so it doesn't show too much wear. Oh, there are a couple of nicks in it, but each one had a story connected with it that granddad loved to tell.

"Then came that great day when he handed me that old shotgun and said, 'It's yours now, son. If you take care of it like I did, it'll last you a lifetime.' I got so choked up, I could hardly say thanks.

"That was a few years back, and I own more Remington guns now. My latest is a Model 1100 20 gauge Lightweight. It delivers . . . just like granddad's. What I like about it most is the easy way it handles. Because it's so light . . . only weighs 6¼ pounds . . . it swings smooth and points quick. It's a great shotgun for carrying all day long. It's also a great shotgun to start off a youngster with; has all the feel and features of a grown-up's shotgun without the extra weight and recoil. My wife likes it, too.

"I take good care of my guns, but my Remington guns just seem to have the kind of quality built right in that makes them a better value. Right out of the box. And granddad's old Remington Model 11 proves that it's a lasting value, too.

"You know, I'm looking forward to the day when I hand this 1100 Lightweight down to my grandson and say, 'It's yours now, son.'"

1977

Model 1100 Field Grade

The Model 1100 is the choice of more shooters than any other autoloading shotgun.

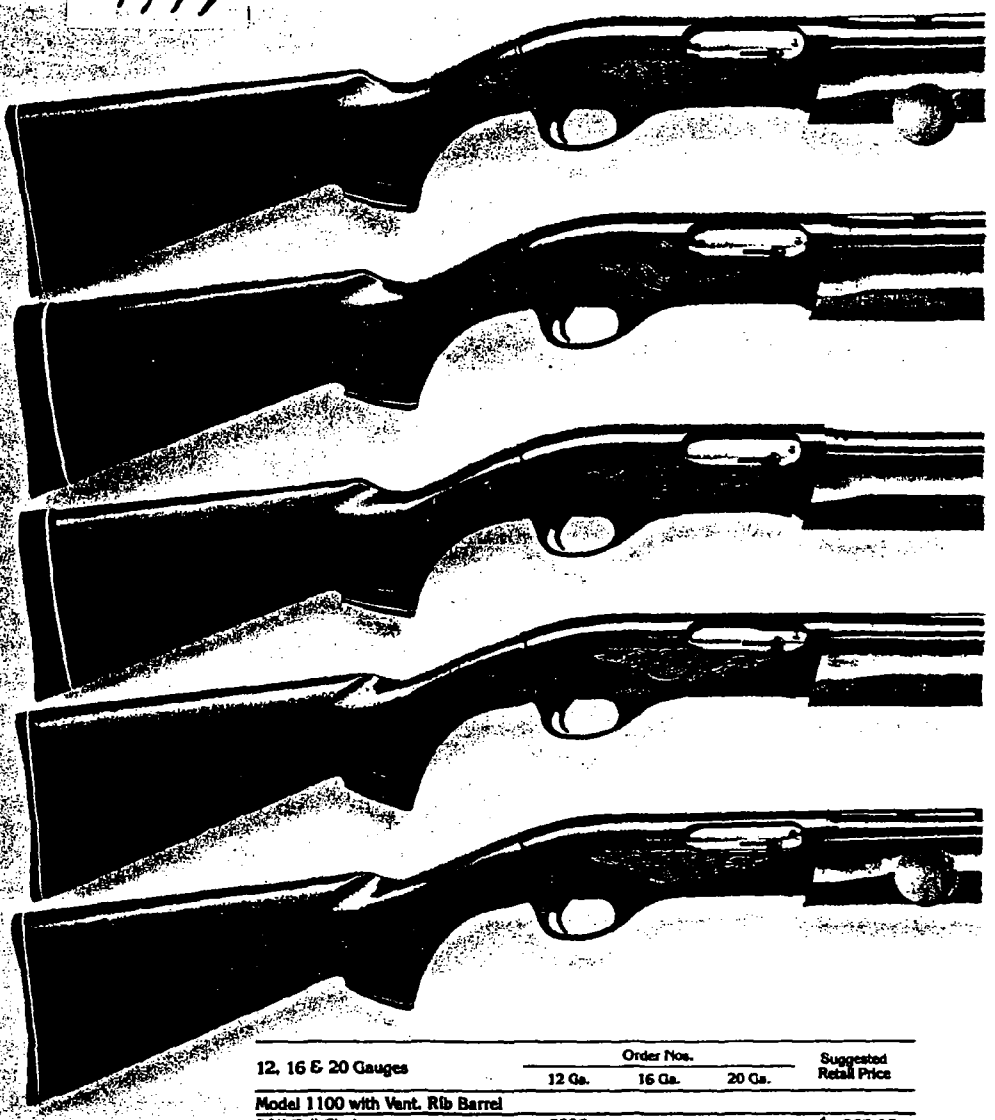
Your Model 1100 will deliver top performance year after year, under any weather conditions. Its unique gas-metering system is designed to operate with all 2¾" shotgun shells without adjustment. This enables you to use different loads, including the 2¾" magnum, for a wide variety of game.

The only autoloading shotgun offered in all five popular gauges for all types of shotgun shooting.

Model 1100:
12, 16, 20 gauge.
Extremely light recoil effect for shooting ease. A wide selection of barrel lengths and chokes in plain and ventilated rib styles add variety. And 2¾" chambered barrels are interchangeable within gauge. Left-hand 12 and 20 gauge models are available in 2¾" chamber, ventilated rib barrel.

Model 1100
3" Magnum: 12, 20 gauge.
Specially designed for 3" magnum and 2¾" magnum shells only. Ventilated rib or plain barrel. Recoil pad. Left-hand version available in 12 gauge; ventilated rib barrel only.

Model 1100 Deer Gun:
12, 20 gauge.
Shorter 22-inch barrel for easy carrying, especially in brushy areas. Improved Cylinder choke for rifled slugs and buckshot. Rifle sights. Rear sight adjustable for windage and elevation. Recoil pad.



MODEL 1100 SPECIFICATIONS—FIELD GRADE

STYLE: Gas-operated low-recoil autoloading shotgun. **GAUGES:** Right-hand versions in 12, 16, 20, 28, and .410. Left-hand versions in 12 and 20. **BARREL:** Special Remington proof steel. Extra barrels are interchangeable within gauge and chamber length without fitting. 20 ga. right- or left-hand barrels fit only right- or left-hand receivers. Lightweight extra barrels are interchangeable within chamber lengths only within Lightweight models. **RECEIVER:** Made from solid steel, top matted. Scrollwork on chrome-plated bolt and both sides of receiver. **SAFETY:** Convenient positive cross-bolt type. Reversed on left-hand models. **SIGHTS:** Metal bead front. **STANDARD STOCK DIMENSIONS:** 14" long, 2½" drop at heel, 1½" drop at comb.

12, 16 & 20 GAUGES—CHAMBER: 2¾" standard velocity, "Express," and 2¾" Magnum shells, 3" Magnum and 2¾" Magnum shells only for 12 and 20 ga. Magnum models. 3" Magnum extra barrels not available. **CAPACITY:** 5-shot, 3-shot plug furnished. **STOCK & FORE-END:** Rich American walnut. Mahogany for 20 ga. Lightweight. **OVERALL LENGTH:** 48" with 28" barrel. 20 ga. Lightweight is 48½" with 28" barrel. **AVERAGE WEIGHT:** 12 ga.—7½ lbs., 16 ga.—7⅜ lbs., 20 ga.—7¼ lbs., 20 ga. Lightweight—6¼ lbs., 20 ga. Lightweight Magnum—6½ lbs.

28 GAUGE & .410—CHAMBER: 2¾" standard velocity and "Express" shells for 28 ga. 3" and 2½" shells for .410. **CAPACITY:** 5-shot with 28 ga. and 2½" .410 shells. 4-shot with 3" .410 shells. 3-shot plug furnished. **STOCK DIMENSIONS:** 13⅞" long. 2½" drop at heel, 1½" drop at comb. **STOCK & FORE-END:** Mahogany. **OVERALL LENGTH:** 45½". **AVERAGE WEIGHT:** 28 ga. plain barrel—6¼ lbs., 28 ga. vent rib—6½ lbs., .410 plain barrel—6¾ lbs., .410 vent rib—7 lbs.

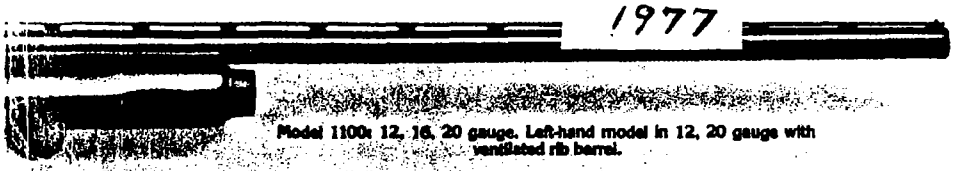
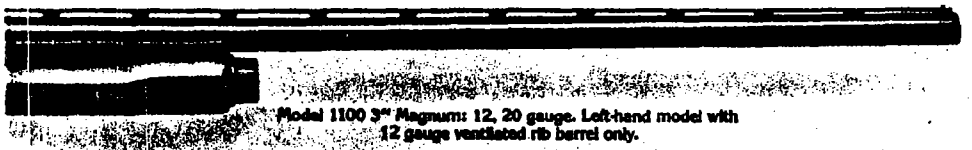
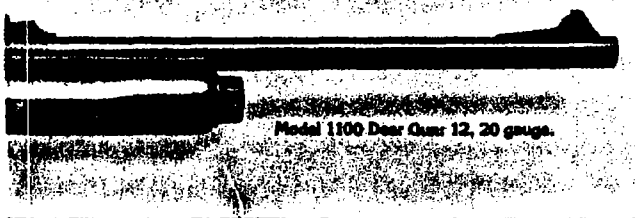
1977



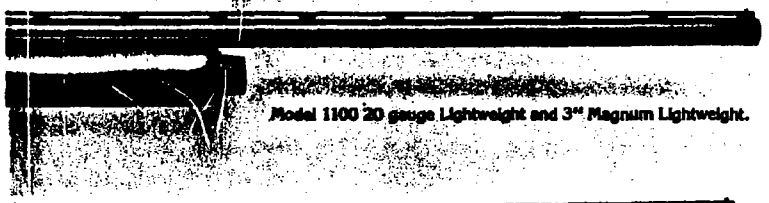
Model 1100: 12, 16, 20 gauge. Left-hand model in 12, 20 gauge with ventilated rib barrel.



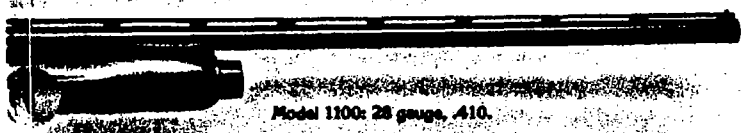
Model 1100 3" Magnum: 12, 20 gauge. Left-hand model with 12 gauge ventilated rib barrel only.



Model 1100 Deer Gun: 12, 20 gauge.



Model 1100 20 gauge Lightweight and 3" Magnum Lightweight.



Model 1100: 28 gauge, .410.

Model 1100 Lightweights & Small Gauges.

IMPROVED for 1977!
The Model 1100 20 gauge Lightweight and 3" Magnum 20 gauge Lightweight. Take the quality, reliability and proven performance of the Model 1100 shotgun, scale down its size, pare down its weight, and you have the Model 1100 20 gauge Lightweight shotgun. It's 20 gauge-sized throughout. And at 6¼ lbs., or 6½ lbs. in the Magnum model, it's the sweetest, fastest-handling 20 gauge shotgun around.

Choose from two. One chambered for 2¾" loads . . . great for dove, quail and small game; or the 3" chamber Magnum model, which handles 2¾" and 3" magnum loads for longer range shooting. Either way, the Model 1100 20 gauge Lightweight shotgun is a great value . . . a great shotgun!

Model 1100:
28 gauge and .410.
Model 1100 autoloading action and long-lasting performance in small-gauge shotguns. Available in a wide selection of chokes in plain or ventilated rib barrels.

Note: barrels chambered for 2¾" shells are interchangeable within gauge on standard receivers only. 3" magnum barrels should only be interchanged on magnum receivers. Left-hand barrels interchange only on left-hand receivers, within gauge. See page 28 for description of 2¾" and 3" magnum shotgun shells.

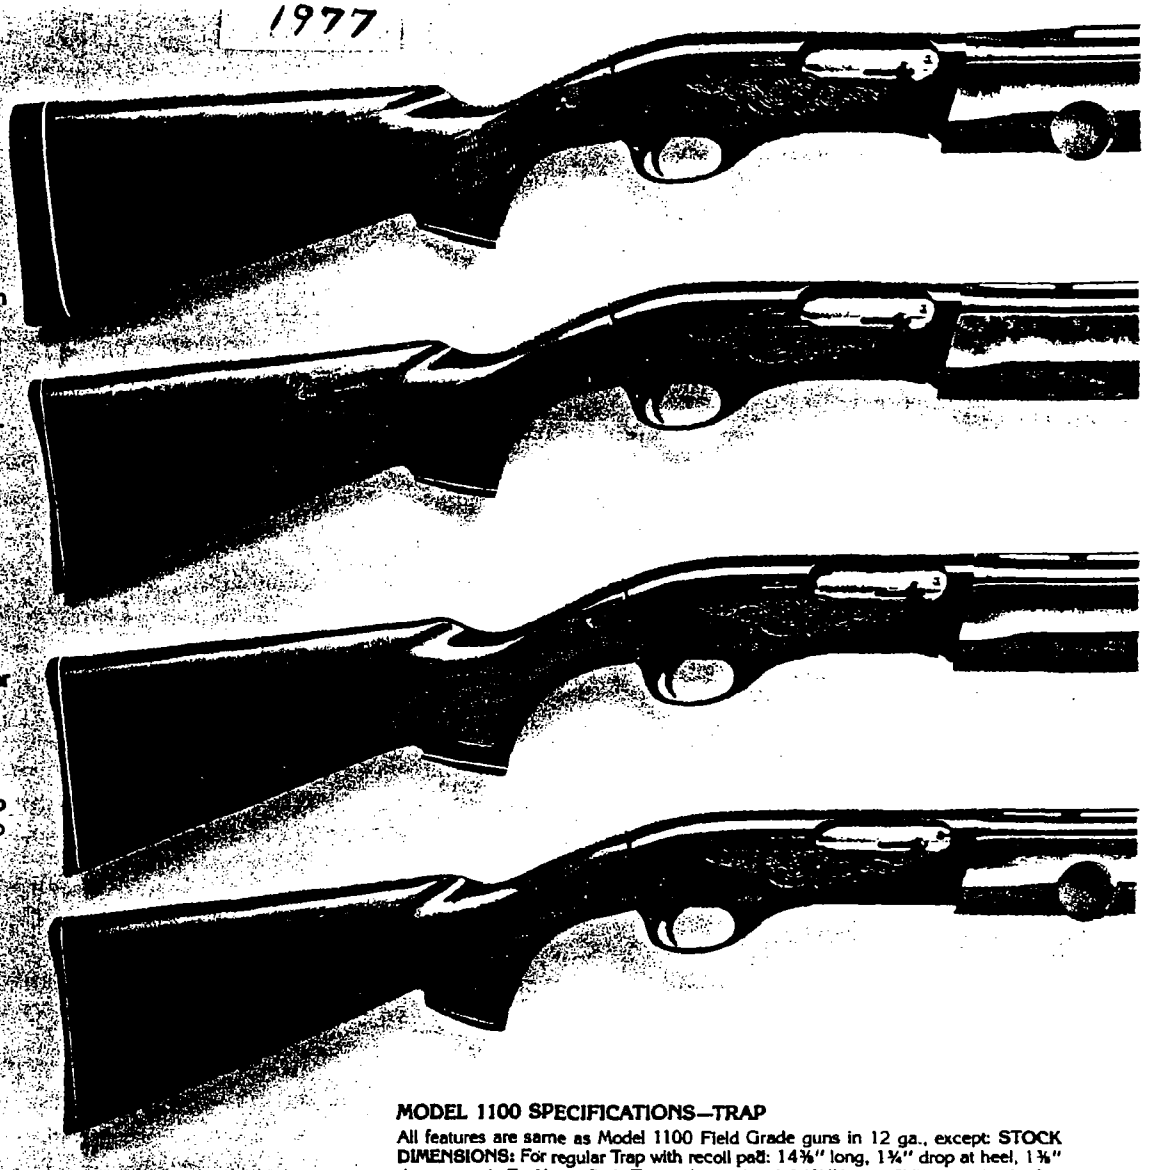
Model 1100 Trap & Skeet

Winners all! More Grand American, state and zone trapshooting championships have been won with the Model 1100 TB trap guns in the past decade than with any other autoloader. Model 1100 skeet guns dominate skeet shooting in 12, 20, 28 gauge and .410 events. They were the Number 1 choice of all shooters who competed in the 1976 World Skeet Shooting Championships. Performance and durability to stand up to the heaviest usage, while yielding minimum recoil. The ideal target guns for men, ladies and junior shooters.

Model 1100 TB Trap: 12 gauge. Autoloading performance you can count on. Select American walnut stocks available in regular or Monte Carlo versions. Rubber recoil pad. Advanced-design ventilated rib barrel immediately gives you a perfect sighting plane. Interchangeable extra trap barrels will fit all Model 1100 trap guns. Left-hand Model 1100 TB Trap available with choice of regular trap or Monte Carlo stock.



MODEL 1100 SPECIFICATIONS—TRAP

All features are same as Model 1100 Field Grade guns in 12 ga., except: **STOCK DIMENSIONS:** For regular Trap with recoil pad: 14⅜" long, 1¾" drop at heel, 1⅜" drop at comb. For Monte Carlo Trap with recoil pad: 14⅜" long, 1⅞" drop at heel, 1⅜" drop at comb, 1⅜" drop at Monte Carlo. **BARREL:** Ventilated rib only. **SIGHTS:** Ivory bead front, white metal middle. **AVERAGE WEIGHT:** 8¼ lbs.

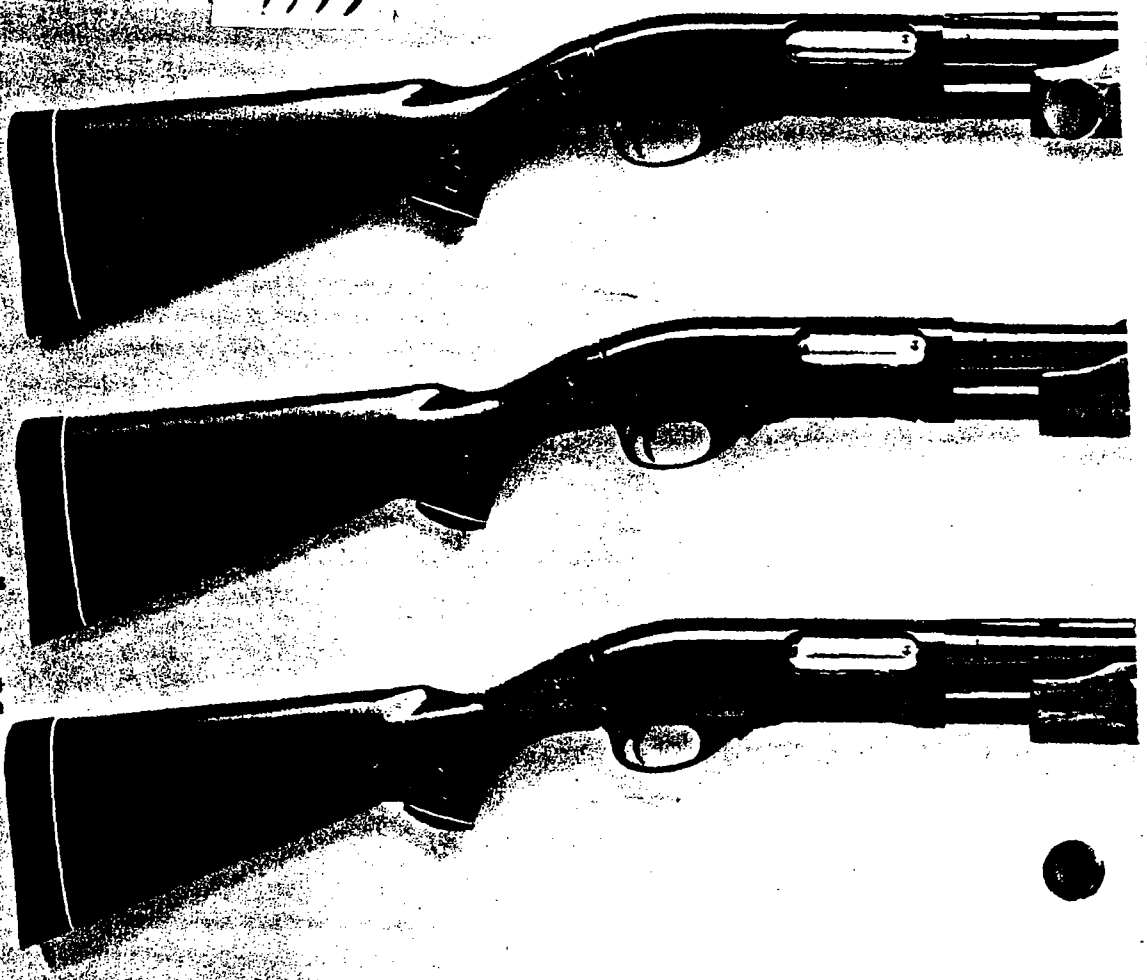
Model 870 "Wingmaster" Pump-Action Shotguns

1977



Rich appearance, perfect balance and super-dependable, lightning-fast pump action have helped make the "Wingmaster" shotgun the most popular pump-action in the world. More than 2½ million Model 870 shotguns sold since 1950 prove it.

Stocks and fore-ends are enriched and protected by the scratch-resistant Du Pont RK-W wood finish. Metal parts are vibrahoned to achieve a more lustrous finish and smoother action. Functional checkering, full beavertail fore-end, chrome-plated bolt and white line spacers enhance the overall styling.

But most important is the way the double action bars prevent twisting or binding, guaranteeing straight-line pumping for smooth feeding and positive ejection, no matter what the weather or field conditions.

MODEL 870 SPECIFICATIONS—FIELD GRADE

STYLE: Pump-action shotgun. **GAUGES:** Right-hand versions in 12, 16, 20, 28, and .410. Left-hand versions in 12 and 20. **BARREL:** Special Remington proof steel. Extra barrels are interchangeable within version (right or left hand), gauge, and chamber length without fitting. 20 ga. Lightweight extra barrels are interchangeable within chamber lengths only within Lightweight models. All .410 models have 3" chambered barrels. **RECEIVER:** Made from solid steel, top matted. **SAFETY:** Convenient positive cross-bolt type. Reversed on left-hand models. **SIGHTS:** Metal bead front. **STANDARD STOCK DIMENSIONS:** 14" long including recoil pad, 2½" drop at heel, 1⅝" drop at comb.

12, 16 & 20 GAUGES—CHAMBER. 2¾" standard velocity, "Express," and 2¾" Magnum shells. 3" Magnum and all 2¾" shells for 12 and 20 ga. Magnum models. **CAPACITY:** 5-shot; 3-shot plug furnished. **STOCK & FORE-END:** Rich American walnut. Mahogany for 20 gauge Lightweight. **OVERALL LENGTH:** 48½" with 28" barrel. **AVERAGE WEIGHT:** 12 ga.—7 lbs., 16 ga.—6¾ lbs., 20 ga.—6½ lbs., 20 ga. Lightweight—5¾ lbs. with 26" plain barrel, 20 ga. Lightweight Magnum—6 lbs. with 28" plain barrel.

Remington 3200 Over & Under Shotguns

The first thing a shooter notices when he handles a Remington 3200 is its natural pointing ability, which is the result of superb weight distribution and balance. Shooting the Remington 3200 is a unique experience. For example, straight-line recoil reduces recoil sensation. Separated barrel construction not only allows us to use more steel at the breech, but also yields less wind resistance and faster barrel cooling . . . resulting in less heat-induced barrel distortion.

First impressions aside, the key to the value of the Remington 3200 is the reliability engineered into it by Remington.

The Remington 3200 lock time is a superfast 1.4 to 1.8 milliseconds. The shot is out of the barrel before it leaves the shell in most guns.

Barrel selector and safety are combined in an easy-to-operate indicator on the upper tang. A unique firing pin system eliminates breakage of pins in actual shooting or dry-firing.

American walnut stock and fore-end are deep checkered 20 lines to the inch, and enriched and protected by the tough, scratch-resistant Du Pont RK-W wood finish. Optional satin finish is offered on Competition guns.

It's the finest over-and-under you can shoot, and it's made and serviced in America.

REMINGTON 3200 SPECIFICATIONS—FIELD GRADE

STYLE: Over-and-Under Shotgun. **GAUGE:** 12. **CHAMBER:** 2¾". **CAPACITY:** 2-shot. **BARRELS:** Ventilated rib. Special Remington proof steel. Separated design. **FRAME:** Machined steel with sliding top lock. Shield-covered breech. Hammers cock on breech opening. Sides embellished with pointing dogs. **EJECTION:** Automatic. Fired shells eject on opening. Unfired shells remain in chamber but are raised above chamber level for easy manual extraction. **SAFETY & BARREL SELECTOR:** Combination manual safety and barrel selector mounted on top tang. Left for bottom barrel; right for top barrel; middle position for safety on. **TRIGGER:** Single selective. 5/16" wide. Crisp with extra fast lock time. **SIGHTS:** Metal bead front. **STOCK & FORE-END:** American walnut with Du Pont RK-W wood finish. Checkering cut 20 lines to the inch. Rosewood toned grip cap and checkered butt plate. Semi-beavertail fore-end. **STANDARD STOCK DIMENSIONS:** 14" long. 2⅛" drop at heel. 1⅛" drop at comb. **OVERALL LENGTH:** 43" with 26" barrels. **AVERAGE WEIGHT:** 7¾ lbs. with 26" barrels.

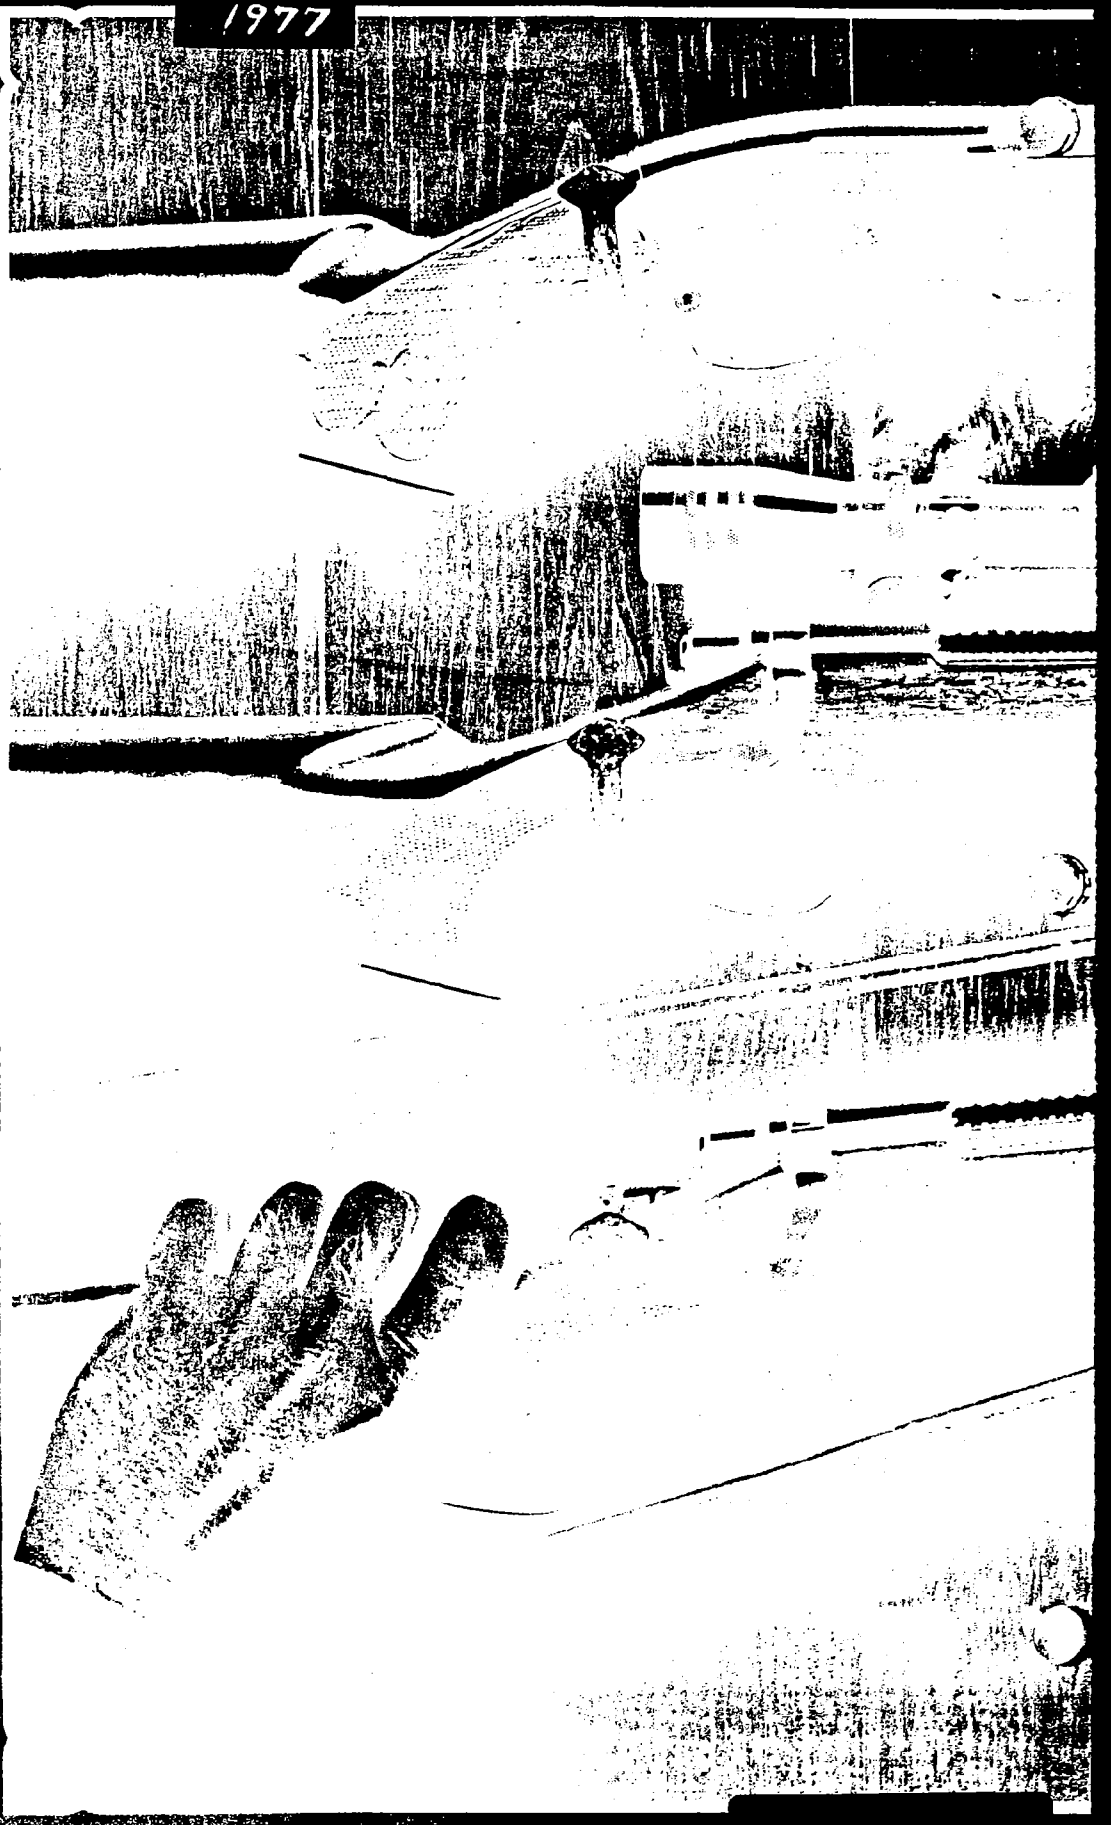
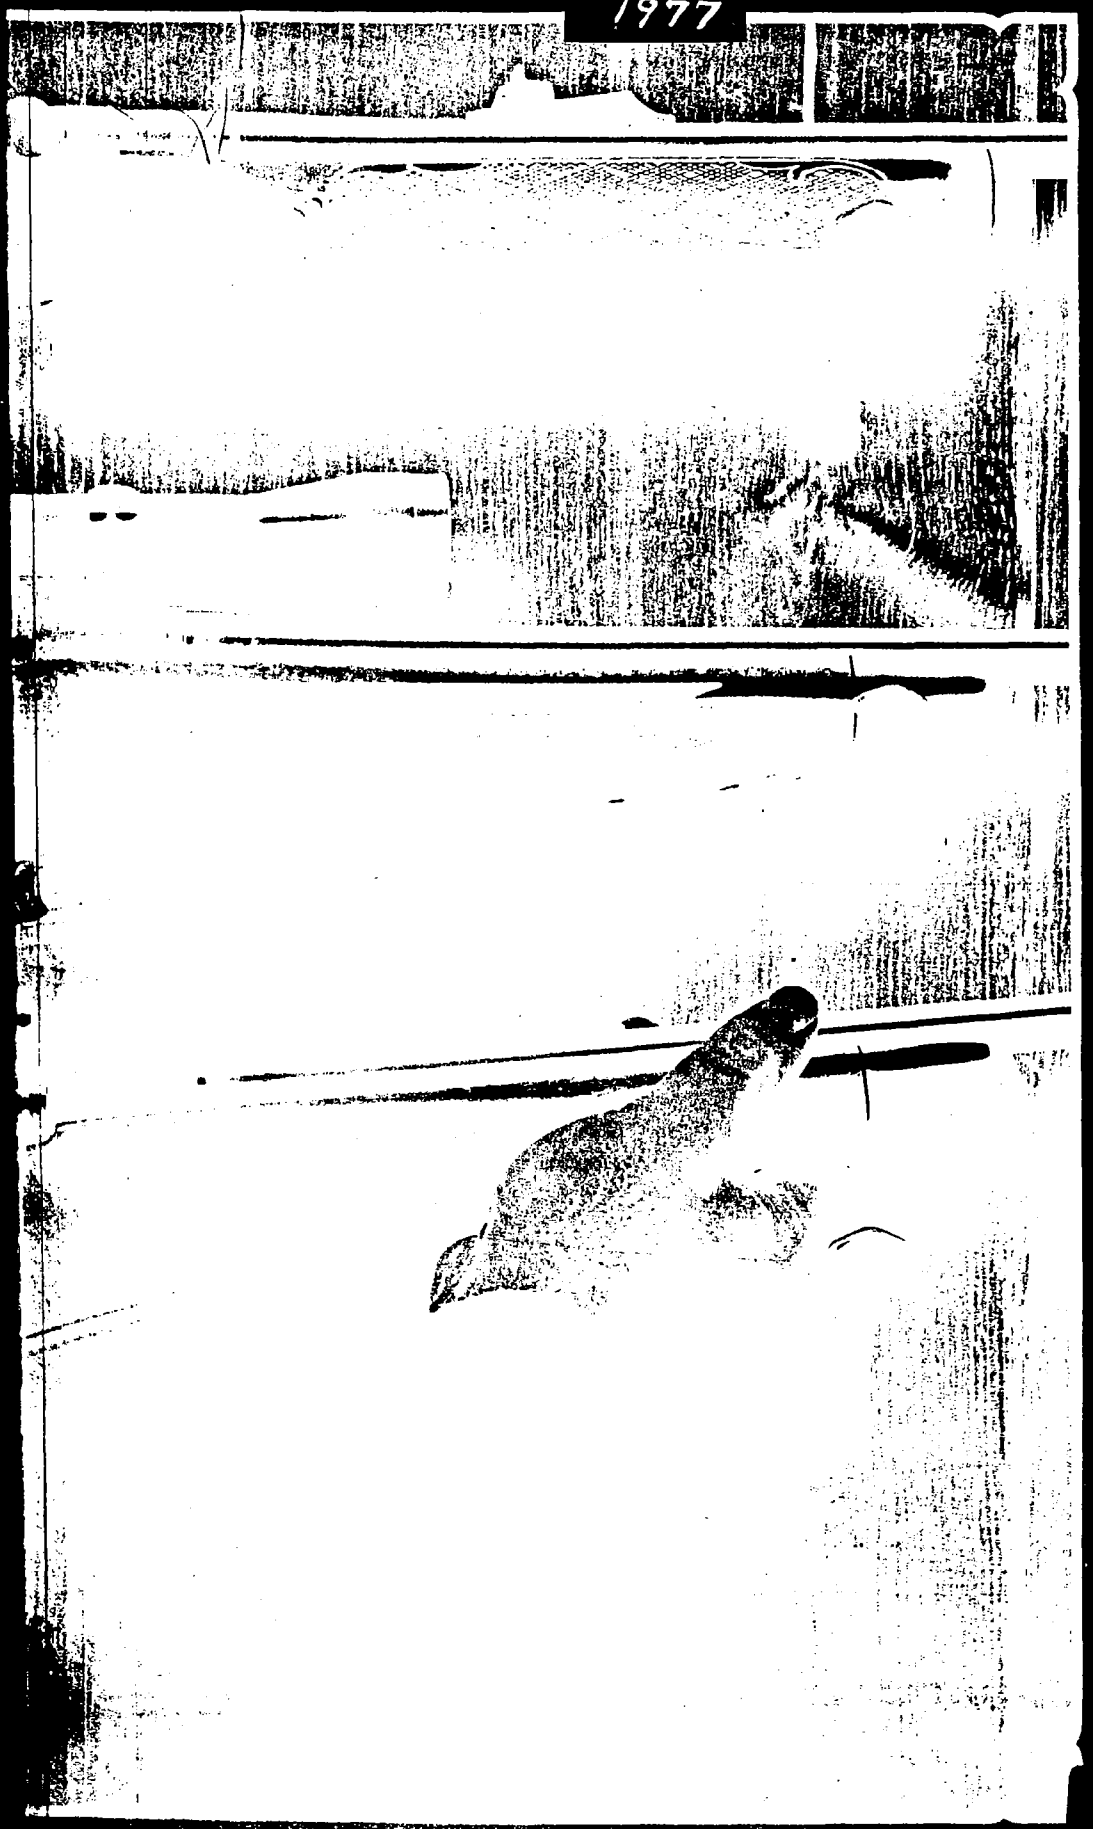
The Great Hand Me Downs

1977



R2525472

1977



"Every time I shoot this 700, I remember the day I bought it.

"I shot one of the tightest groups I ever fired with this 700, just as it came from the box. And it seems to improve with age.

"I think that's typical of all of the Remington line, from what I've seen. They may change a part here and there, but the same performance and reliability are always there.

"I own five Remingtons, and each one of them has dependability built right in . . . the same today as when I bought them. That's another thing. My Remington guns are among the few things I've bought that haven't lost their value. As a matter of fact, they seem to appreciate in value.

"When Remington says 'Best value, just as it comes from the box,' I'll add . . . and best value through the years.

"This Model 700 will make a great hand-me-down someday."

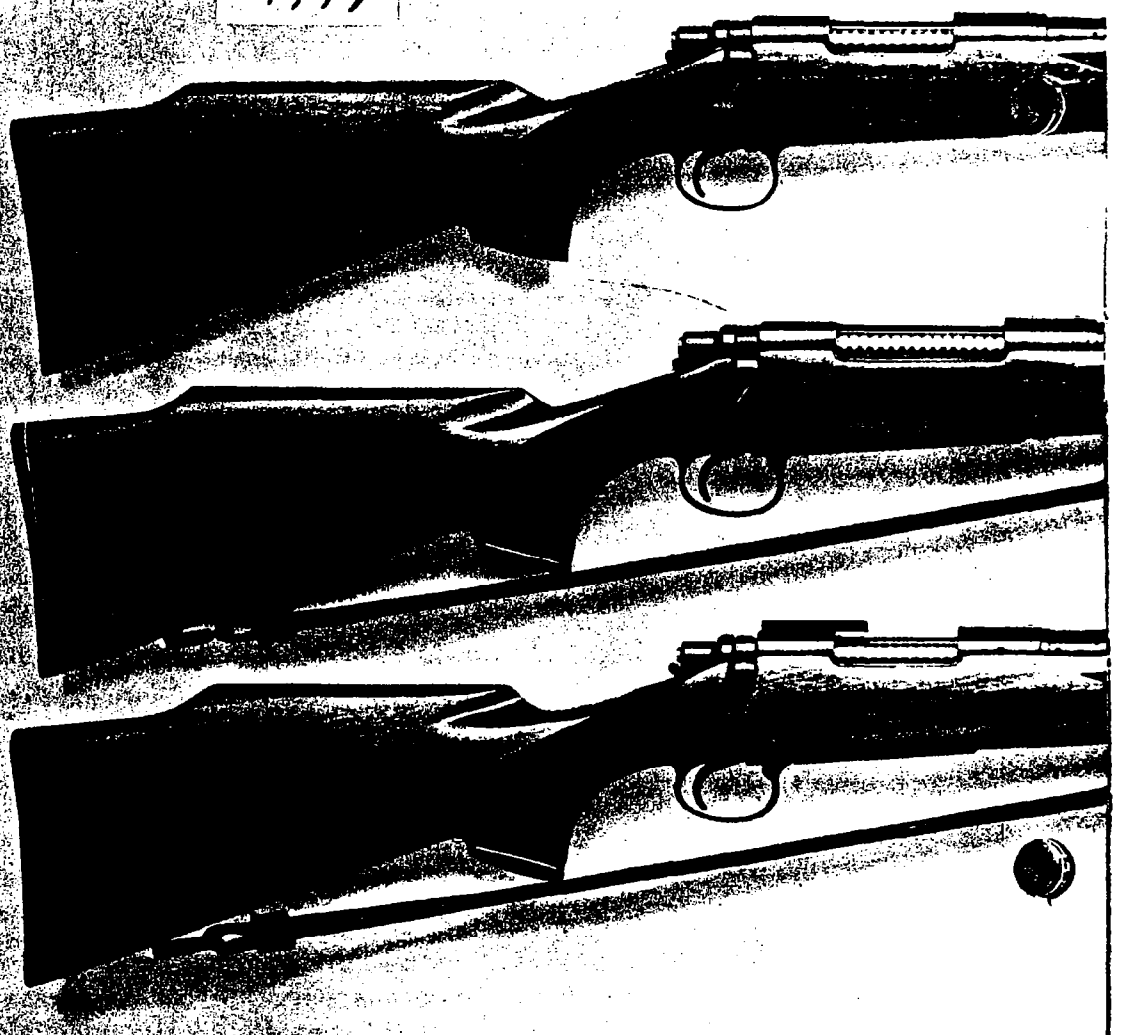
R2525473

1977

Model 700 Center Fire Bolt-Action Rifles

The Model 700 combines superb accuracy and sleek, graceful styling with optimum handling and performance features in a choice of sixteen calibers including the 8mm Remington Magnum . . . new for 1977. Excellent quality and lasting value have made the Model 700 America's best-selling bolt-action center fire rifle. The design and workmanship of the Model 700 have become the standard of excellence by which other big-game rifles are measured. The action is one of the strongest ever designed. Bolt face, barrel and receiver surround the cartridge head with three rings of solid steel.

Model 700 ADL. Dependable performance and value that last. Superlative features include a fluted anti-bind bolt, shrouded bolt head, low-profile positive thumb-type safety, skip-line checkering, Monte Carlo stock with cheekpiece, checkered bolt knob, easily detachable sights and a receiver drilled and tapped for scope mounts.



MODEL 700 SPECIFICATIONS

STOCK: American walnut BDL and "Varmint Special" models have cut checkering 20 lines to the inch that extends around entire fore-end. Safari and C Custom models are cutcheckered. ADL has skip-line checkering. Solid rubber presentation-type recoil pads on Magnum models. BDL and "Varmint Special" models include sling strap and quick-release swivels installed, black fore-end tip and white line spacers. STANDARD STOCK DIMENSIONS: 13¾" length of pull, 2⅛" drop at heel, 1⅝" drop at comb (measured from open sight line). "Varmint Special" stock: 13¾" length of pull, 1⅜" drop at heel, ½" drop at comb (measured from center line of bore). RECEIVER: One-piece ordnance steel with anti-bind bolt. Drilled and tapped for scope mounts and receiver sights. Fixed magazine with stainless steel magazine follower. BDL, "Varmint Special," and Safari grade have hinged floor plate. SIGHTS: Ramp front sight with flat-faced gold bead. BDL and Safari grade front sights are hooded. Rear sight has sliding ramp for precise elevation adjustment, also adjustable for windage. Both sights are removable for scope-block mounting without drilling or tapping. "Varmint Special" is furnished without sights, but with front and rear 40-XB type scope bases installed. SAFETY: Fast positive thumb type. Left-hand models have left-hand safety, bolt, and ejection.

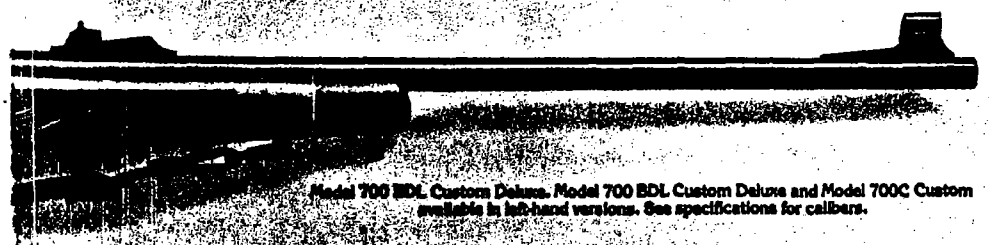
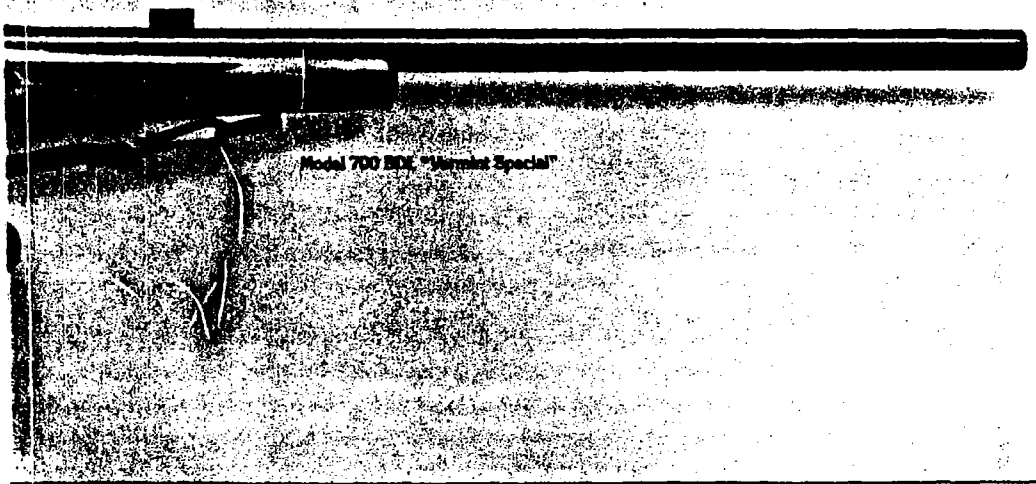
Model 700 ADL Deluxe



Model 700 BDL Custom Deluxe. Model 700 BDL Custom Deluxe and Model 700C Custom available in left-hand versions. See specifications for calibers.



Model 700 BDL "Varmint Special"

Model 700 BDL Custom Deluxe incorporates all of the lasting-value features found in the ADL, plus distinctive deep-cut functional 20-line-per-inch checkering which wraps around the fore-end. BDL version also has a hinged floorplate, hooded front sight, sling strap and quick-release swivels, white line spacers, black fore-end tip.

Model 700 BDL "Varmint Special" Chambered in seven popular varmint calibers. Combines all of the performance of the BDL with a heavy barrel for extreme accuracy at all ranges. Equipped with scope bases (no sights). The 700 BDL Varmint rifle chambered for 308 Winchester cartridge makes an excellent metallic silhouette rifle and meets the required specifications.

Model 742 "Woodsmaster" Center Fire Autoloading Rifles

Model 742 "Woodsmaster" rifles are Remington engineered for maximum strength, consistent reliability and lifetime durability. These qualities have made the "Woodsmaster" the world's most popular autoloading big-game rifle.

The strength of the "Woodsmaster" rifle is derived from such features as an artillery-type bolt with multiple locking lugs. When the action is closed, these locking lugs lock the bolt to the barrel tightly and securely. Inside the action, the cartridge head is encircled tightly by bolt, barrel and receiver—three rings of solid steel with no extractor cuts to weaken this critical area.

Reliability is the result of a dependable gas operating system. And it has all-weather reliability, because the interior working parts are coated with Du Pont "Teflon-S" resin. This friction-reducing coating lubricates, resists dirt and grime, and makes cleaning easier.

Other value features include a fast-loading, 4-shot removable clip magazine; convenient bolt release; positive cross-bolt safety; receiver drilled and

tapped for scope mounts; ramp front sight with flat-faced gold bead and adjustable rear sight; Remington's exclusive vibra-honed finish on metal parts to enhance blueing and smooth out the action.

The tough Du Pont RK-W finish enriches and protects the wood for long-lasting beauty, even under hard use.

When you put it all together, the Model 742 "Woodsmaster" rifle has the kind of quality and durability that makes it a great hand-me-down.

Model 742
The Model 742 "Woodsmaster" rifle standard version is available in five popular hunting calibers. Stock and tapered fore-end are distinctively checkered. White-line spacers enhance appearance. Sights are removable. Receiver drilled and tapped for scope mounts.

Model 742 Carbine
All of the features of the standard 742 in a shorter version. An 18½-inch barrel and shorter overall length make for fast handling qualities in dense brush or for use as a saddle gun.

Model 742 BDL Custom Deluxe
All of the performance features of the 742 "Woodsmaster" rifle plus deluxe basketweave checkering and Monte Carlo stock with full cheekpiece.

R2525477

1977

Model 760

Model 760 Carbine

Model 760 Custom Deluxe. Available with left-hand stock and safety.

Model 760 "Gamemaster" Center Fire Pump-Action Rifles

When the situation calls for a fast second shot, the smooth pump action of the 760 allows you to operate the action while keeping the rifle in a natural shooting position. Styled for fast handling, the 760 operates more surely and naturally than a lever action.

The smoothness is the result of twin action bars which eliminate twisting or binding. A swift back-and-forth motion of the hand, with the rifle to your shoulder, and you're ready for your next shot. The fixed trigger assembly means that your finger never leaves the trigger as you work the pump action. No awkward motions, no pinched fingers.

The 760 action is strong as well as smooth. Its strength comes from a receiver machined from a block of solid steel and an artillery-style bolt with multiple locking lugs.

Removable clip magazine makes for fast and easy loading and unloading. Extra clip magazines are available.

Receivers and internal parts are vibra-honed to a mirrorlike finish, burr-free to assure smooth operation. The final touch is the Du Pont RK-W finish on the wood to bring out the quality and impart long-lasting protection against scratches and weather.

Model 760
The only pump-action rifle available in 30-06. Also available in 6mm Rem., 243 Win., 270 Win. and 308 Win. calibers.

Model 760 Carbine
A good rifle for brush country or use as a saddle gun. Has an 18½-inch barrel and the features of the standard Model 760. In 30-06 and 308 Win. calibers.

Model 760 BDL Custom Deluxe
All of the smoothness of the standard Model 760 plus a special basketweave-checkered Monte Carlo stock with full cheekpiece. Chambered for 270 Win., 30-06 and 308 Win. calibers.

MODEL 760 SPECIFICATIONS

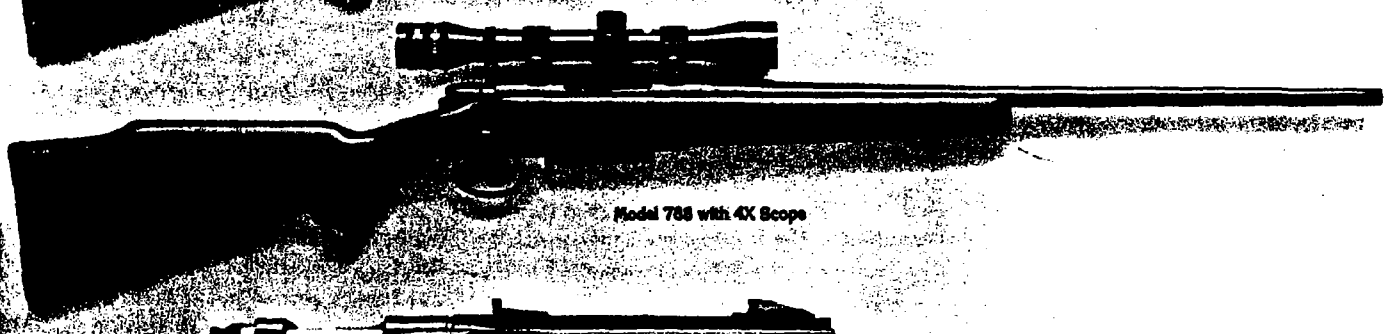
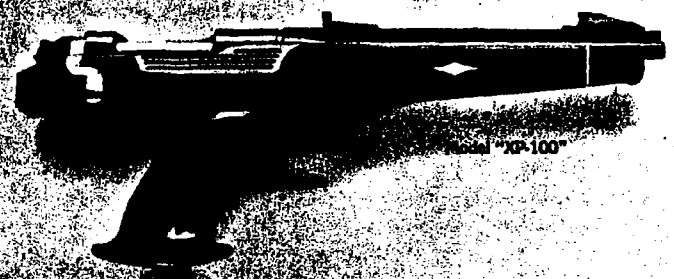
Model 788. Available in left-hand version. See specifications.



Model 788 with 4X Scope



Model "XP-100"

Model 788 Center Fire Bolt-Action Rifles

A no-nonsense big-game rifle at a no-nonsense price. We've left off the frills to give you top performance and high quality with superlative accuracy in a center fire bolt-action rifle.

And well within the range of any hunter's wallet.

An incredibly fast lock time is one reason for the accuracy. In tests against ten competitive rifles, the bullet left the barrel of the 788 before it had left the cartridge case of the others.

A good value to start with, and lasting value in the long run, make the Model 788 one of the great hand-me-downs.

Model 788

The Model 788 is equipped with Monte Carlo stock, serrated thumb-type safety, easily removable clip magazine, blade front sight and fully adjustable U-notch rear sight. Receiver drilled and tapped for scope mounts. Left-hand versions available in 6mm Rem. and 308 Win. Extra clip magazines available.

Model "XP-100" Long-Range Pistol

A unique single-shot, center fire, bolt-action pistol chambered for the 221 Remington "Fire Ball" cartridge. Designed to reduce whip, jump and recoil. Extremely accurate.

One-piece stock of Du Pont "Zytel" nylon. Universal grip fits left- or right-handed shooters. Internal fore-end cavities for addition of weights. Match-type grooved trigger. Ventilated rib. Rifle-type rear sight and ramped blade front sight. Two-position thumb safety. Receiver drilled and tapped for scope mounts. 10½-inch barrel. 16¾-inch overall length. Weighs 3¾ lbs. Furnished with zippered carrying case. See page 36 for 221 Rem. ballistics. Rem. Order No. 5470. Suggested retail price $184.95.

MODEL 788 SPECIFICATIONS

STOCK: Walnut finished hardwood, Monte Carlo. **STANDARD STOCK DIMENSIONS:** 13⅜" length of pull, 2⅜" drop at heel, 1⅜" drop at comb (measured from open sight line). **RECEIVER:** Drilled and tapped for scope mounts and receiver sight. Detachable clip magazine. **SIGHTS:** Blade front sight on ramp is detachable. U-notch rear sight lock-screw adjustment for windage and elevation. Both sights removable for scope mounting without drilling or tapping. **SAFETY:** Positive fast-action thumb type. The Great Hand Me Downs

R2525480

1977

"It's a great feeling to be able to hand down knowledge you've gained to a youngster who is eager to learn.

"And to see him get started off right. That's why I feel good about starting him off with a Remington 'Nylon 66' rifle, and a lot of practice on the range.

"Of course, any of the Remington 22's are great rim fire rifles, but the 'Nylon 66' Autoloader is kind of special to me ever since I read the book The Modern Rifle. The author, Jim Carmichel, said, 'If I had to survive in the wilderness for a lifetime, this is the rifle I'd choose.'

"That's probably because the 'Nylon 66' action doesn't need lubrication, and the stock and fore-end are made of a structural nylon material that is virtually indestructible. That's part of the story. The rest is super accuracy. The 'Nylon 66' rifle was used to set a world record . . . 100,004 hits of hand-thrown wooden blocks out of 100,010 shots. And you can add reliability, because Remington engineers fired a single 'Nylon 66' rifle 75,000 times without any malfunctions.

"This boy knows that the range is no place for smart alecks, and he pretty well knows the rules. So with what know-how I can hand down and with his 'Nylon 66' rifle, we ought to have a lot of enjoyable hours shooting together."

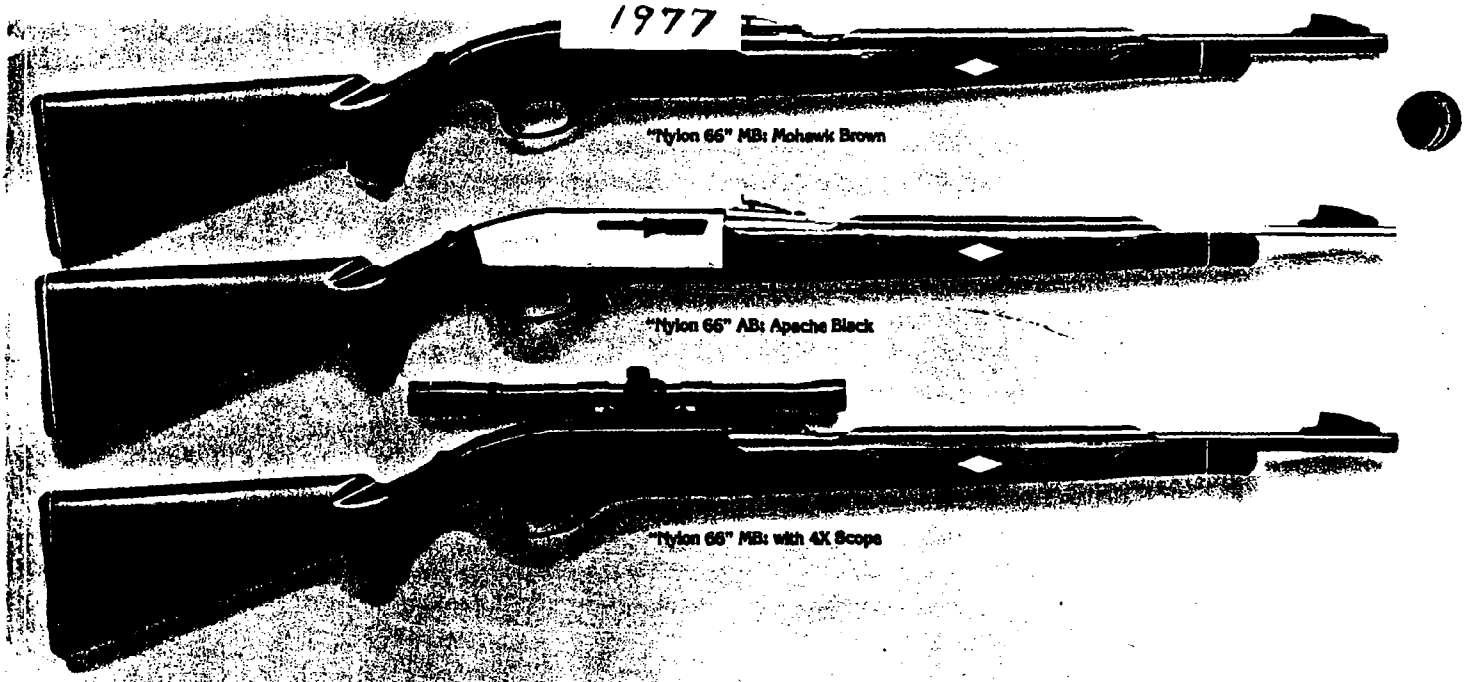
1977



"Nylon 66" MB: Mohawk Brown

"Nylon 66" AB: Apache Black

"Nylon 66" MB: with 4X Scope

Remington "Nylon 66" Autoloading Rim Fire Rifles

Exceptional! The one word which best describes the Remington "Nylon 66" Autoloader. There is no other rifle like it. The innovative features of this 22 set it apart from the rest. The stock and fore-end of Du Pont "Zytel" structural nylon withstand treatment far rougher than that encountered in normal use.

Metal parts glide smoothly on nylon bearing surfaces which reduce friction and wear to the point of being negligible. This also means that the autoloading action never needs lubrication. It stays cleaner, because there is no oil or grease in the action to pick up dirt.

Accuracy and performance are inherent in the "Nylon 66" rifle. The exceptional accuracy of this rifle originates from the bedding of its Remington proof-steel barrel, and is based on the same principle used in the most expensive target rifles. A world record for performance was set with 100,004 hits of hand-thrown wooden blocks out of 100,010 shots without a single malfunction. In verified testing by Remington engineers, a single "Nylon 66" rifle fired 75,000 rounds without any malfunctions.

The "Nylon 66" rifle is bound to become another great hand-me-down.

"Nylon 66" MB Rifle
Stock and fore-end of durable, supertough Du Pont "Zytel" structural nylon in Mohawk Brown. Blued barrel and receiver cover. Tubular magazine feeds through buttstock and has a capacity of 14 long rifle cartridges. Weighs only four pounds.

"Nylon 66" AB Rifle
Same features as the MB, but with all-weather chrome-plated barrel and receiver cover and jet-black "Zytel" nylon stock.

"Nylon 66" MB with 4X Scope
Mohawk Brown stock and fore-end. Supplied with four-power scope and mount. This extra-value combination gives you a durable, accurate shooting system.

"NYLON 66" RIFLE SPECIFICATIONS

ACTION: Autoloading. **CALIBER:** 22 Long Rifle rim fire. **CAPACITY:** Tubular magazine thru buttstock. Holds 14 Long Rifle cartridges. **BARREL:** 19¾", precision rifled ordnance steel. **STOCK:** One-piece Du Pont "Zytel" nylon, checkered grip and fore-end with white diamond inlays, white line spacers on butt plate, grip cap, and fore-end. Black fore-end tip. **COLORS:** Mohawk Brown with blued barrel and receiver. Model 552 "Speedmaster" Autoloading Rim Fire Rifles

Four different Model 552 versions cover most autoloading rim fire requirements. All have positive cross-bolt safeties, adjustable rifle sights, receivers grooved for tip-off scope mounts, shielded actions.

Model 552A
Tubular magazine holds 20 short, 17 long or 15 long rifle cartridges; rifle has 23-inch barrel; also available in carbine version with 21-inch barrel.

Model 552 BDL Deluxe
Custom checkering on stock and fore-end; protective Du Pont RK-W wood finish.

Gallery Special model for 22 shorts only. Special oil finish on plain stock.

MODEL 552 SPECIFICATIONS

ACTION: Autoloading. CALIBER: 22 Short, Long, and Long Rifle rim fire. CAPACITY: Tubular magazine holds 20 Short, 17 Long, 15 Long Rifle cartridges. BARREL: 23", Carbine 21", precision rifled ordnance steel. STOCK: Walnut finished hardwood (American walnut in BDL Grade). BDL has Du Pont RK-W finish and fine-line custom checkering. SIGHTS: Adjustable rear sight, bead front. BDL: Blade ramp front sight, sliding ramp rear sight. SAFETY: Positive cross-bolt type. RECEIVER: Grooved for tip-off scope mounts. OVERALL LENGTHS: 42", 40" (Carbine). WEIGHT: 5¼ lbs.

Model 572 "Fieldmaster" Pump-Action Rim Fire Rifles

America's favorite pump-action 22. The pump action works easily with speed and smoothness. By removing the inner magazine tube, the pump action converts to a single-shot rifle. Replacing the tube makes it a repeater again.

Model 572A
Smooth pump action. Ribbed fore-end, plain stock, bead front and adjustable rear sights.

Model 572 BDL Deluxe
Custom checkering. Du Pont RK-W wood finish and big-game type sights. Trim design and fine balance.

MODEL 572 SPECIFICATIONS

ACTION: Pump repeater. CALIBER: 22 Short, Long, and Long Rifle rim fire. CAPACITY: Tubular magazine holds 20 Short, 17 Long, 14 Long Rifle cartridges. BARREL: 23", precision rifled ordnance steel. STOCK: Walnut finished hardwood (American walnut in BDL Grade). BDL has Du Pont RK-W finish and fine-line custom checkering. SIGHTS: Adjustable rear sight, bead front. BDL: Blade ramp front sight, sliding ramp rear sight. SAFETY: Positive cross-bolt type. RECEIVER: Grooved for tip-off scope mounts. OVERALL LENGTH: 42". WEIGHT: 5½ lbs.

Model 541-S "Custom" Sporter

Model 580: Single Shot. Boy's Rifle version with one-inch shorter stock available.

Model 581: Clip Repeater. Left-hand version available.

Model 582: Tubular Repeater

Model 541-S "Custom" Sporter Bolt-Action 22 Rim Fire Rifles

The Remington Model 541-S is a classic 22 rifle, sure to become a great hand-me-down. It is designed along the lines of its big-game cousins, with similar features and outstanding value. Features include American walnut stock; thin pistol grip; fine-line cut checkering; matching rosewood-colored fore-end tip, grip cap and checkered butt plate; Du Pont RK-W wood finish. Decorative scrollwork engraving enhances appearance of specially blued receiver and bowed trigger guard. Adjustable match-type trigger; low-profile safety; artillery-style bolt with six locking lugs; double extractors. Receiver grooved for tip-off scopes.

MODEL 541-S SPECIFICATIONS

ACTION: Bolt, clip magazine repeater. **CALIBER:** 22 Short, Long, and Long Rifle rim fire. **CAPACITY:** 6-shot with 5-shot clip (10-shot clip available as accessory), checkered clip release. **BARREL:** 24", tapered, deep rich blueing, ordnance steel, drilled and tapped for front and rear sights. Countersunk at muzzle. **STOCK:** American walnut, Monte Carlo. Du Pont RK-W wood finish, fine-line cut checkering at pistol grip and fore-end. Checkered rosewood-finished butt plate and grip cap, rosewood-finished fore-end tip. White line spacers at butt plate, grip cap, and fore-end tip. **SIGHTS:** None supplied, barrel and receiver drilled and tapped for scope mounts or receiver sights: receiver grooved for scope mounts. **SAFETY:** Positive, serrated thumb type, safety indicator markings (forward for fire, rearward for safe). **BOLT:** Artillery-style rear lock-up, six locking lugs, double extractors, highly polished. **RECEIVER:** Round, ordnance steel; grooved, drilled and tapped for scope mounts or receiver sights. Deep rich blueing, engraved in scroll pattern. **TRIGGER:** Adjustable match type, steel trigger guard engraved. **OVERALL LENGTH:** 42⅛". **WEIGHT:** 5½ lbs.

REMINGTON MODEL 1100 AUTOLOADER

1978

Everybody likes a winner, and the Model 1100 has been a winner since its introduction in 1963. More shooters own 1100s than any other autoloading shotgun, and for good reasons. They like the low recoil sensation; smooth, reliable performance, plus the ea excellent balance 1100.

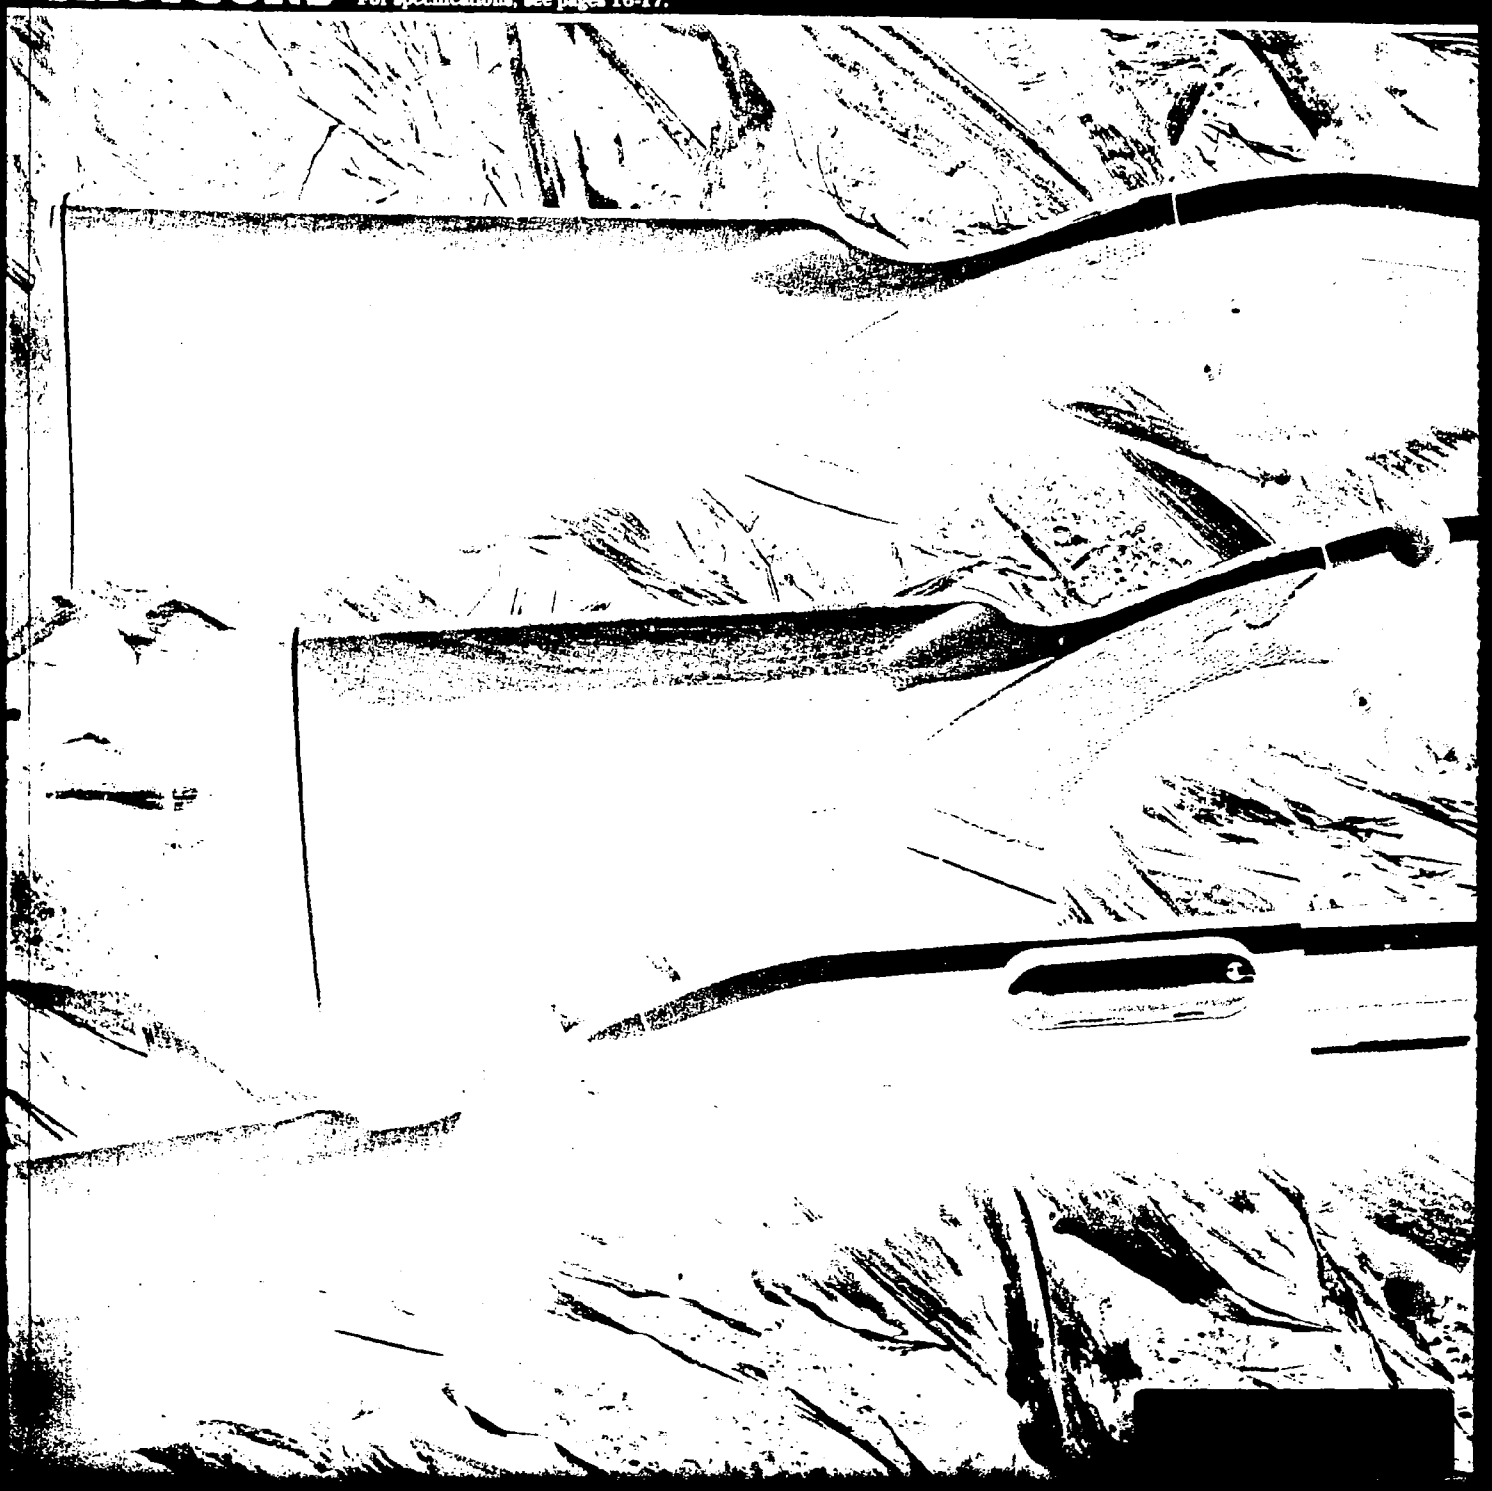
Pick the gauge—12, 16, 20, 28 or .410-bore. Pick the chamber length—the 2¾" handles all 2¾" loads, including "baby magnums" without adjustments, and the 3" Magnum, which handles all 2¾" magnum and 3" magnum loads. Choose barrel length, style and choke from the widest selection offered by any manufacturer. There are 12 gauge left-hand versions in both chamber lengths, too. And extra barrels add versatility and value to any Model 1100. For instance, you can start with an 1100 for upland game and buy a barrel that converts it to a deer gun. Changing barrels is accomplished quickly and easily without tools. (See page 38.)

The Model 1100 LT-20, 20 gauge Lightweight is a significant introduction for 1978. The gun is tailored to the smaller proportions of the 20 gauge shell, with the proven performance of two million 1100s behind it. The LT-20, with American walnut stock and fore-end, will replace our standard 20 gauge shotgun.

The Magnum model with 3-inch 20 gauge shells delivers the power and pattern of a 12 gauge shotgun. And because the LT-20 has the size, weight and balance a 20 gauge should have, it is fast handling, quick pointing, and it's a dream to carry in the field all day.

SHOTGUNS

For specifications, see pages 16-17.



R2525488

...e design, balance and ...nique gas-metering system of ...he Model 1100 combine to re...duce the recoil sensation to a ...ttle push against your shoul...s a comfortable shotgun ...y shooter, in any gauge.

MODEL 870 "WINGMASTER" PUMP ACTION

The Model 870 has proved that it has the quality for getting you outdoors with the best. More shooters have chosen the 870 than any other pump shotgun ... over 2½ n fact. They have found that you just can't beat the Model 870 for reliability.

1978

This reliability is a direct result of how the 870 is made. The receiver and action parts are vibra-honed after machining to assure a perfect fit and finish, and to minimize friction. Double action bars prevent twisting and binding for positive straight-line pumping. Lightning-fast, silky-smooth action means sure feed ...and crisp ejection, no matter ...at the weather or field conditions.

The Model 870 is as rich-looking as it is functional. Handsomely checkered American walnut stock and full beavertail fore-end (mahogany in 28 gauge and .410 bore) are protected with the durable Du Pont RK-W wood finish.

This popular pump action shotgun handles all 2¾" shells, including 2¾" magnums, and a wide range of extra barrels are available (see page 38), including a 12 gauge 34-inch full-choke duck/goose barrel. For waterfowl and turkey hunters, there are the 12 and 20 gauge 3" Magnum models. The Model 870 forged steel barrels will handle factory steel shot loads. And for left-hand shooters, 12 and 20 gauge 2¾" chamber models and a 12 gauge 3" Magnum model with ventilated rib barrels are standard.

R2525489

says it all. It's the gun that makes the competition tough for all others. The Remington 3200 brings home the silver ... and the bacon.

Superb weight distribution and balance give the Remington [illegible] milliseconds.

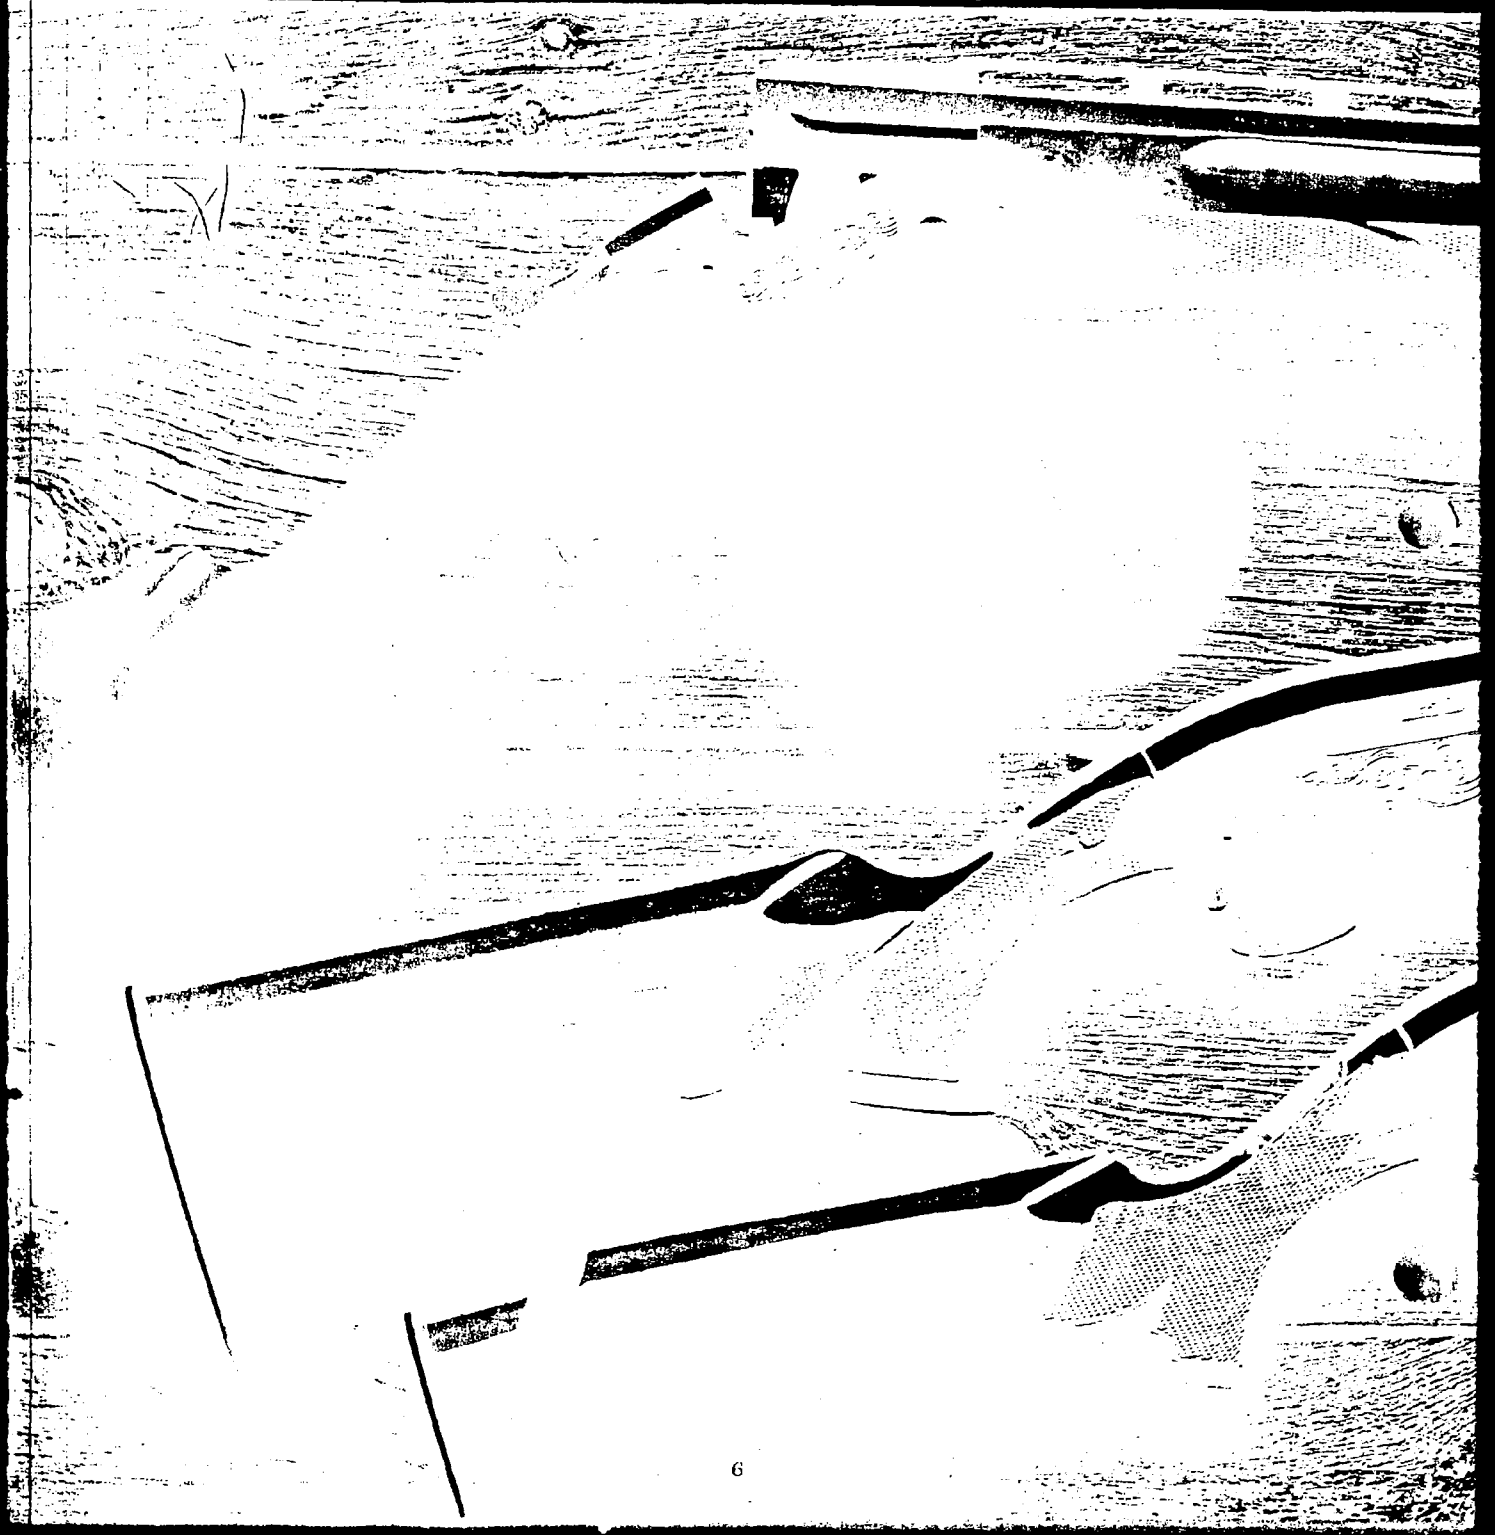
The separated [illegible] 1978 [illegible] struction is [illegible] unique in appearance. It helps eliminate sight plane heat waves and also reduces wind resis- [illegible] unique firing pin system eliminates pin breakage in actual shooting or dry firing.

The American walnut stock and fore-end are selected for figure and grain. Deep checkering, 20 lines to the inch, enhances the stock, side panel and fore-end. Competition [illegible] wood finish. Competition [illegible] guns will have optional Monte Carlo, 1⅜" or 1½" drop dimensions.

From the first time you pick up a Remington 3200, you'll know it's a natural for you, and the only thing you might have to get used to is having your name on the winners' board.

TRAP & SKEET SHOTGUNS

For specifications, see pages 18-19.



R2525490

MODEL 1100 TRAP & SKEET

The long list of wins and the number of trap and skeet [illegible]ers who prefer to shoot [illegible]Model 1100 speak for the performance and durability of these fine target shotguns.

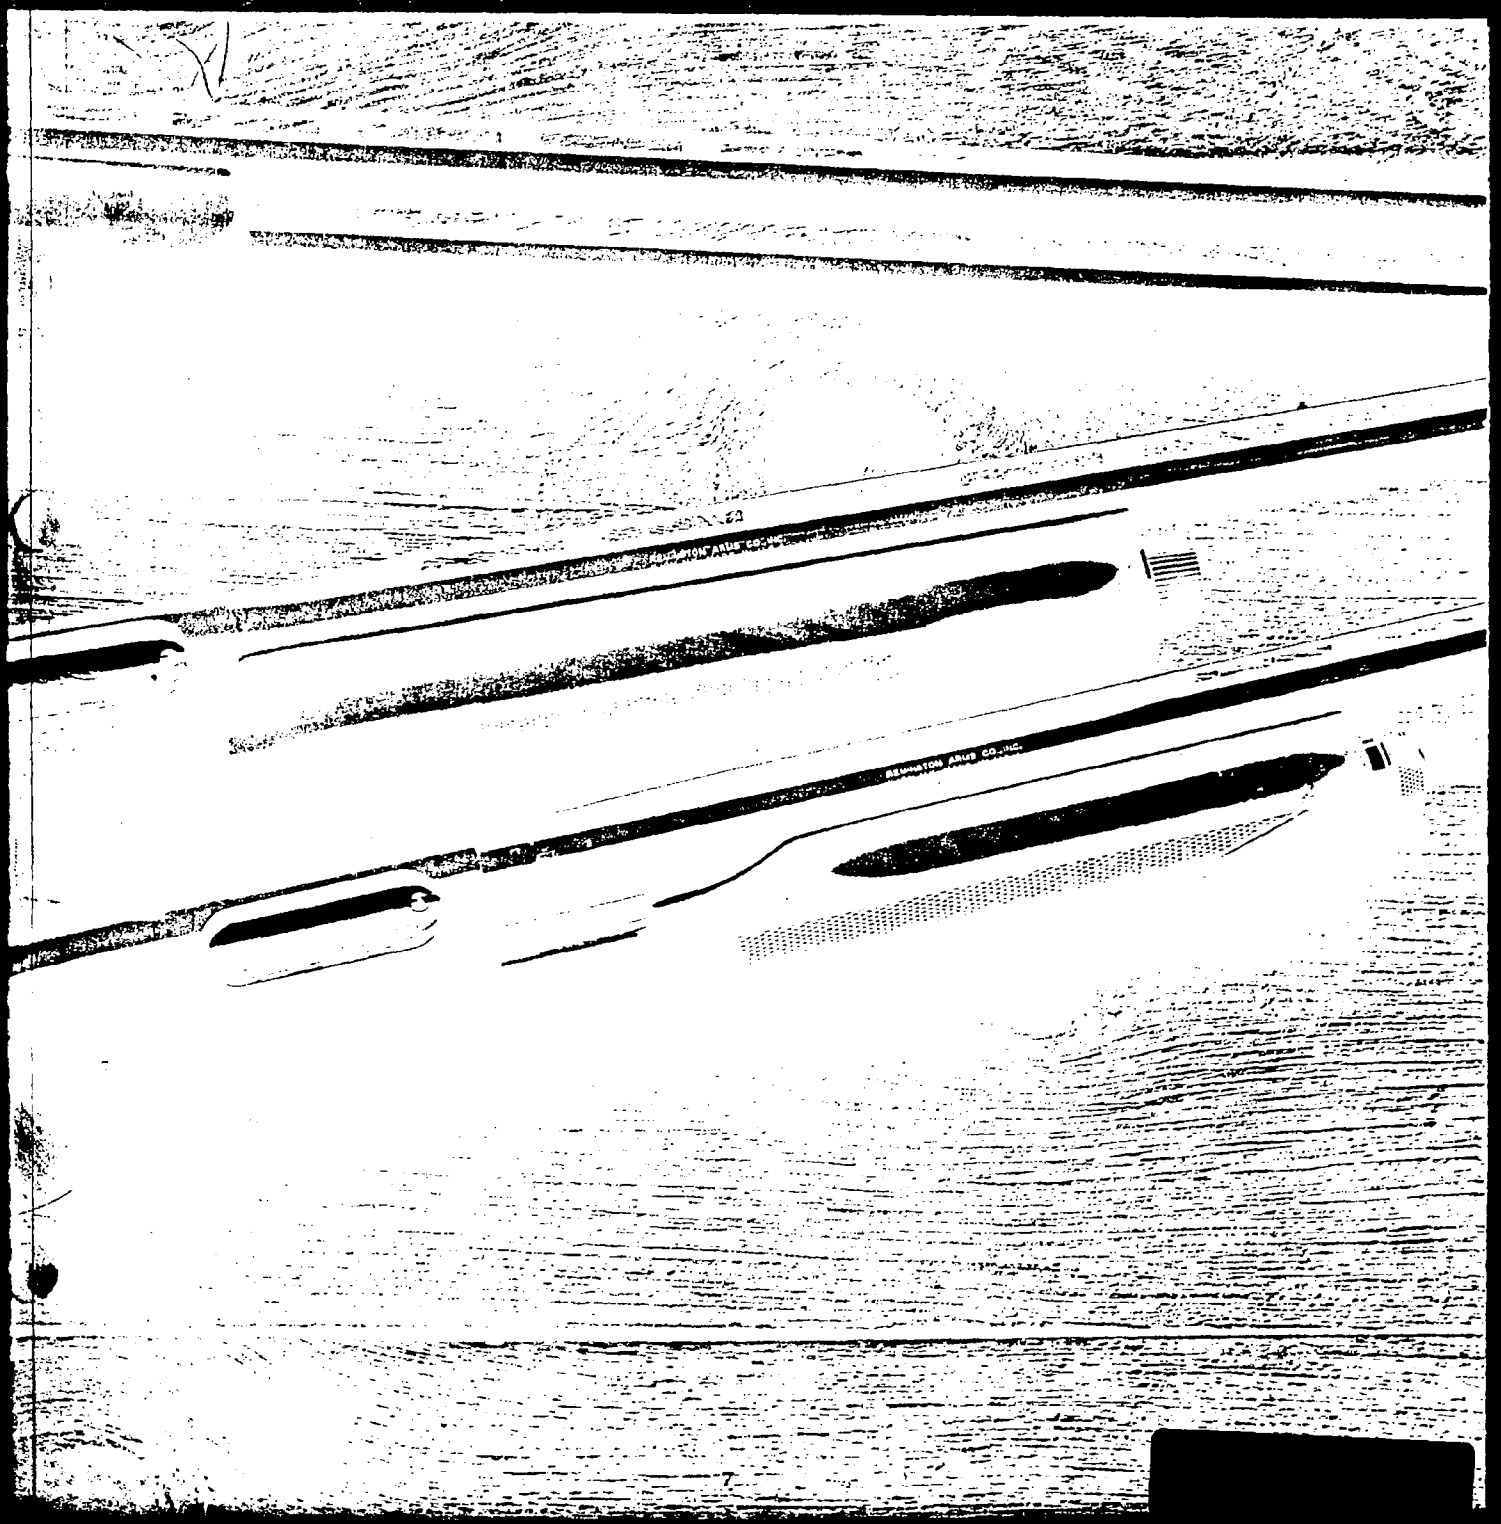
Target shooting is tough on guns. The average target shooter fires as many shells in a year as the average hunter does in a lifetime. It takes more than an average autoloader to stand up to this gru[illegible] 1978 ishment...it takes a 1100.

Now—there's a Model 1100 SA and SB skeet in 20 gauge Lightweight. Scaled down in size and weight to what a 20 gauge should be, but not scaled down in quality or performance. If you shoot in 20 gauge events, this is the Model 1100 you've been waiting for.

MODEL 870 TRAP GRADE SHOTGUNS

Two new grades of the trapshooters' favorite pump action shotgun will be offered in 1978—the new TC grade and the new TA grade. Both feature new 1⅜" drop Monte Carlo stock dimensions. The TC has the famous smooth 870 action plus a distinctive new appearance. The American walnut stock and forend have high-grade cut checkering usually found only on custom guns. The Model 870 TC grade has a custom look and feel without the custom price. In the medium price range, the proven, reliable 870 TB is still a favorite among the trapshooting fraternity.

For the trapshooter who wants value and dependability at a very moderate price, there's the new Model 870 TA grade. No extras—just a basic and reliable pump action trap gun.



R2525491

REMINGTON MODEL 700 BOLT ACTION

1978

The NEW Model 700 "Classic" is the center fire rifle for every hunter who wants bolt action accuracy and precision with the subtle elegance of classical styling.

Take the Model 700 barreled action, known worldwide for its accuracy and dependability, fit it to a satin-finish American walnut stock with cri styling, and you h The action is one of the strongest ever designed. Bolt face, barrel and receiver surround the cartridge head with three rings of solid steel . . . no weakening extractor cuts.

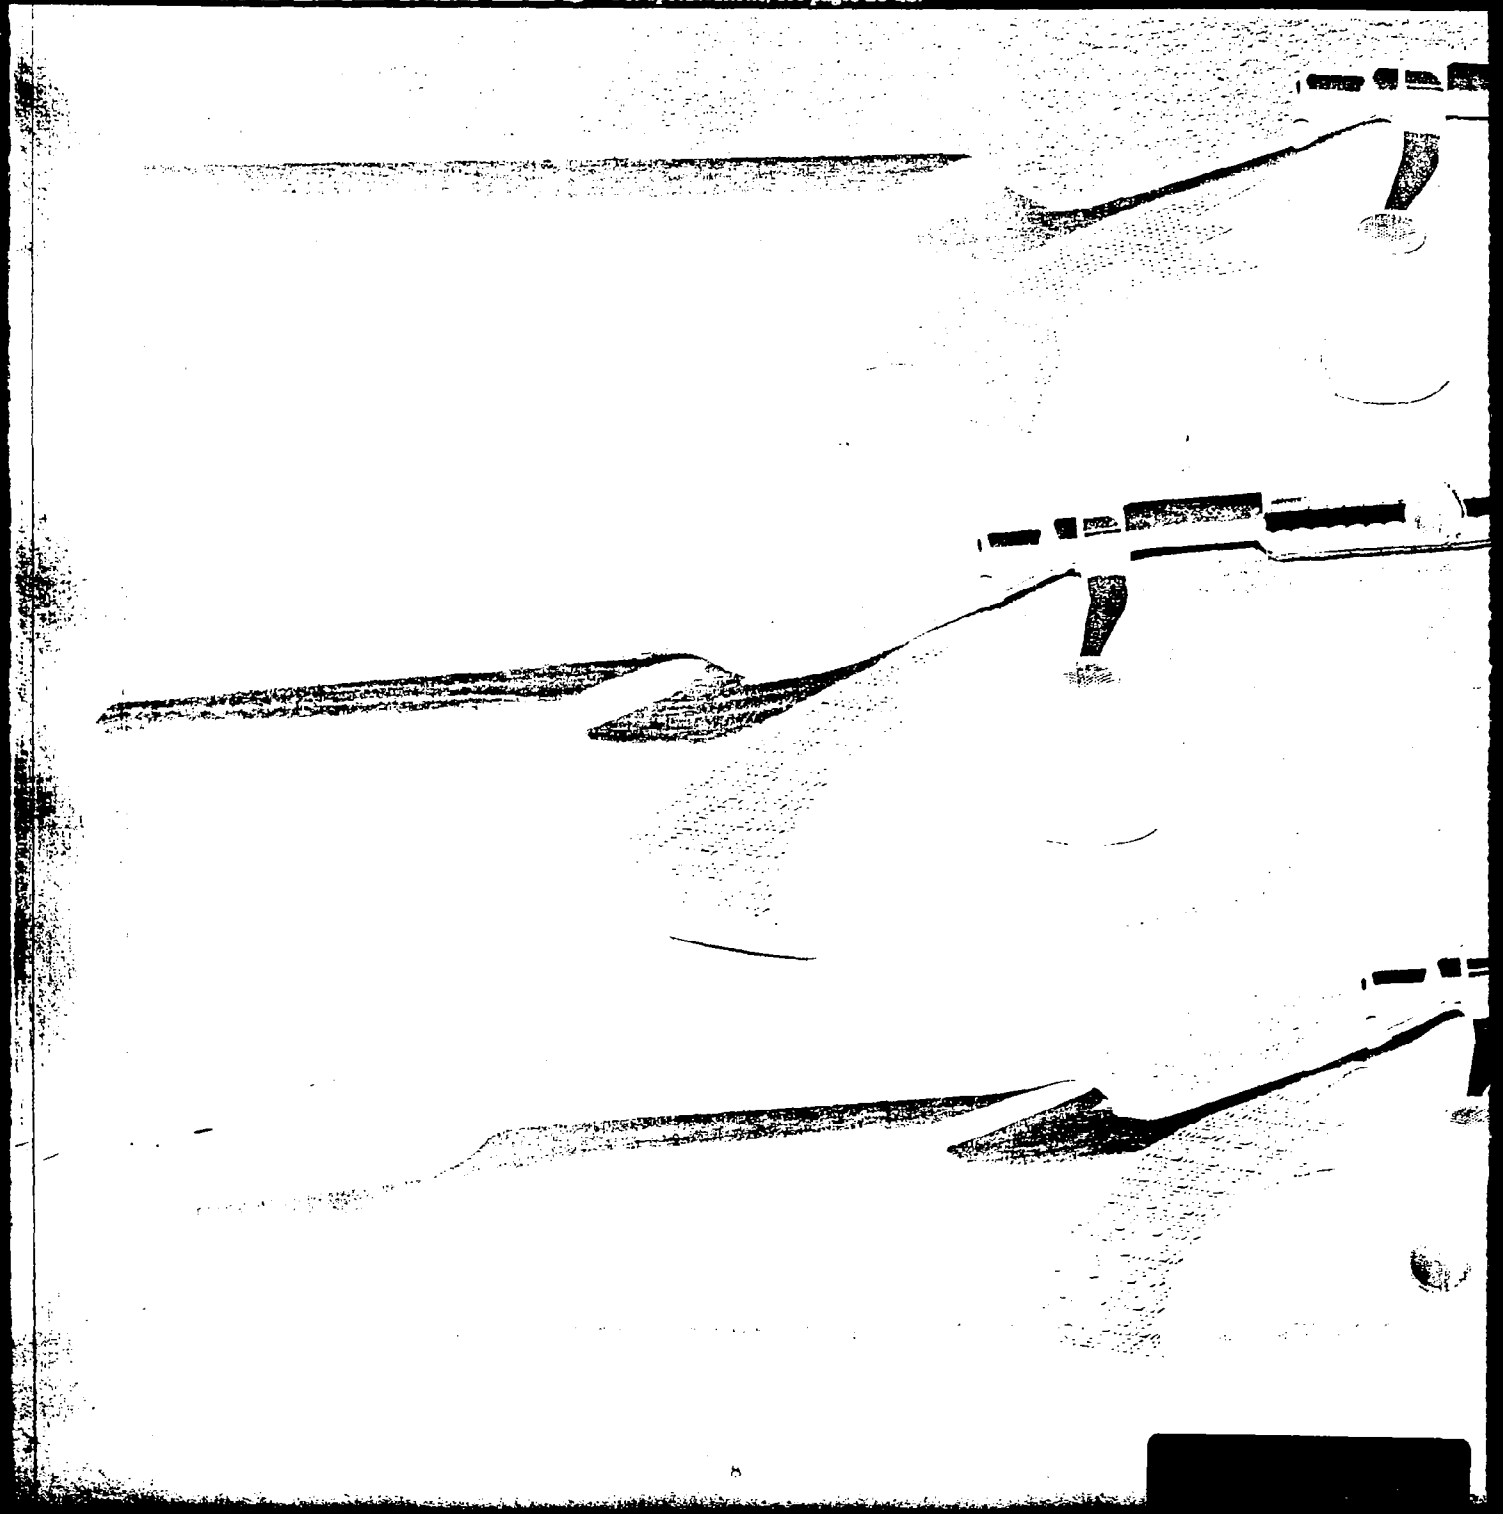
The Model 700 "Classic" has functional, full pattern checkering, contoured pistol grip and rounded fore-end tip to enhance the purity of its design. It is chambered for six popular calibers, including the 7mm Remington Magnum. Stock is fitted with rubber butt pad on all calibers except magnum, which has a full recoil pad. Sling swivel studs installed.

Now, handsome skip-line cut checkering with diamond highlights, usually found only on the most expensive custom guns, is featured on the Model 700 BDL. This extra styling touch, along with its other high-quality features, makes the Model 700 BDL the outstanding value for riflemen who also want superb performance and appearance. Choose from fourteen caliber right-hand models, three calib in left-hand models and six calibers in the heavy-barrel "Varmint Special."

The Model 700 ADL rounds out the line. It combines the strength and accuracy of the

CENTER FIRE RIFLES

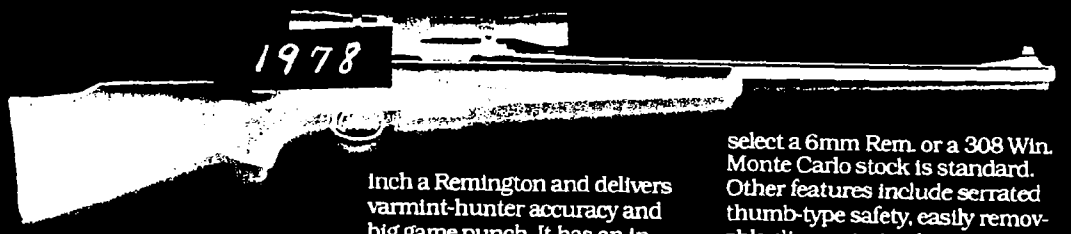
For specifications, see pages 20-23.



R2525492

...ded to a handsome walnut stock with custom styled checkering. You get all of the world-famous Remington Model 700 accuracy ...performance at a competi... ...rice. Add the ADL to the "Classic" and BDL, and you now have the widest variety of high-quality bolt action center fire rifles from which to choose.

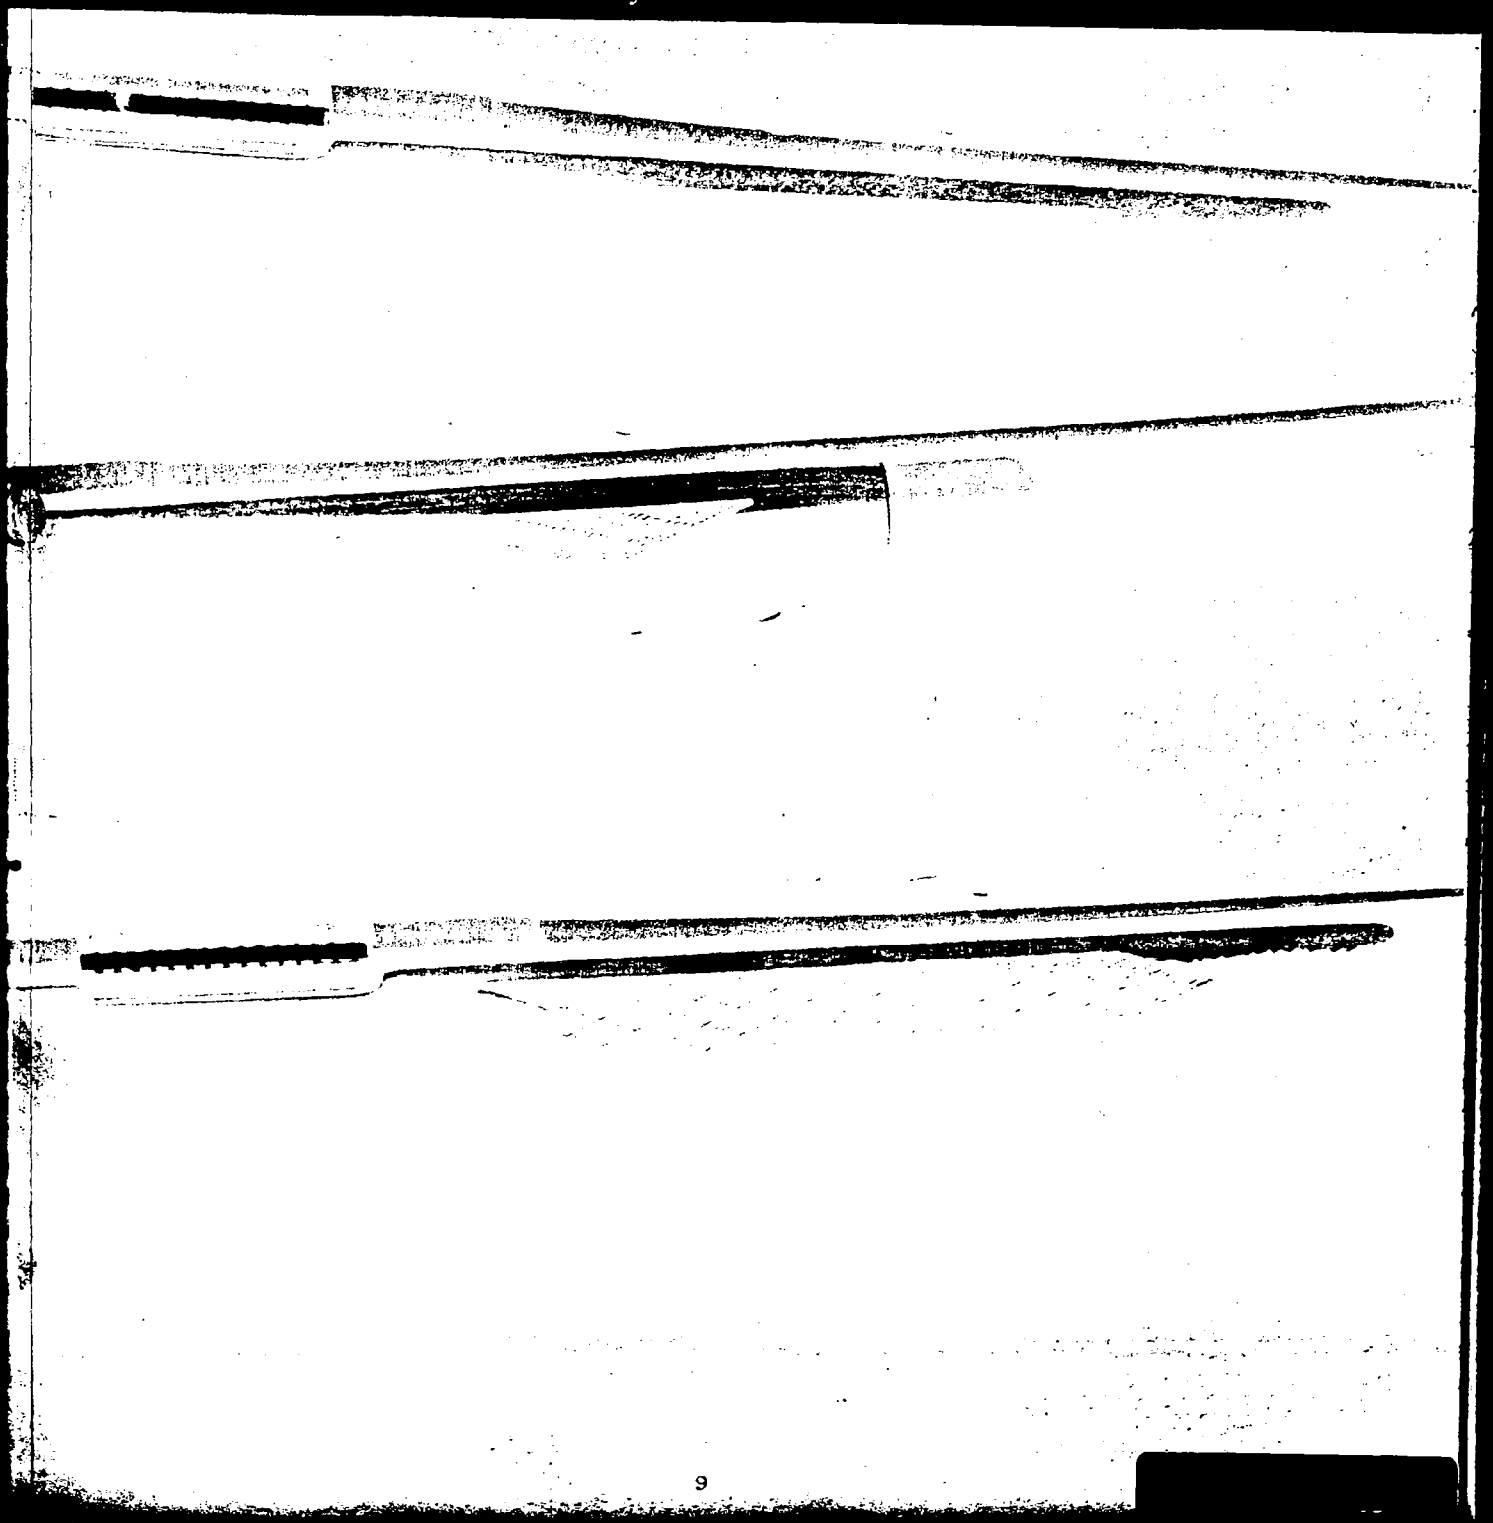
1978



MODEL 788 BOLT ACTION

No need to sacrifice quality when you're looking for a lower-priced rifle. The Model 788 is every inch a Remington and delivers varmint-hunter accuracy and big game punch. It has an incredibly fast lock time—faster than that of ten competitive rifles tested.

Chambered for six popular calibers with or without 4X scope. Left-handed shooters can select a 6mm Rem. or a 308 Win. Monte Carlo stock is standard. Other features include serrated thumb-type safety, easily removable clip magazine (convenient extra clip magazines are available), blade ramp front sight and fully adjustable rear sight. Receiver drilled and tapped for scope mounts.



R2525493

MODEL 742 "WOODSMASTER" AUTOLOADER

You may never need a second shot; but if you do, it's there on target... up to five shots, with the fast autoloading Model 742 "Woodsmaster." The "Woodsmaster" is fast, reliable, accurate, strong. When you fire the 742, the next shell is in the chamber before you can say "

The Remington 1978 autoloading actio... coil to a push instead of a shove so the Model 742 stays on target ready for the next shot—fast.

The "Woodsmaster" has a strong artillery-type bolt with multiple locking lugs to handle big game calibers like the 30-06. Three rings of solid steel—bolt, barrel and receiver—surround the cartridge head. And there are no extractor cuts to weaken this critical area.

Basketweave checkering complements the smooth lines of the BDL custom grade rifle. American walnut stock and fore-end are protected by the Du Pont RK-W wood finish that resists scratches. Monte Carlo stock with full cheekpiece is standard in the BDL custom grade.

The interior working parts are coated with friction-reducing, dirt-resisting Du Pont "Teflon-S" resin. This assures all-weather reliability, makes cleaning easier and acts as a lubricant for smoother operation.

Other standard features in both the ADL and BDL grades include convenient bolt rele... positive cross-bolt safety; rec... drilled and tapped for scope mounts; fully adjustable rear sights; blade ramp front sight with flat-faced gold bead. Both the 742 and 760 rifles feature a fast-loading, versatile 4-shot clip magazine (shown below) for quick reloading or choice of bullet weights.

CENTER FIRE RIFLES

For specifications, see pages 20-21.

R2525494

ODEL 760 'AMEMASTER" 'JMP ACTION

1978

lodel 760 "Gamemaster" ou shoot as fast as you can hp the action and pull the ger.

his is especially important en you need a fast second t. You keep the rifle in a natu- shooting position while work- the action. There are no un- ural movements and, because the trigger assembly remains fixed, your finger does not leave the trigger or get pinched by the lever. It's a smooth action that gives you pump action reliability in all temperatures and weather conditions.

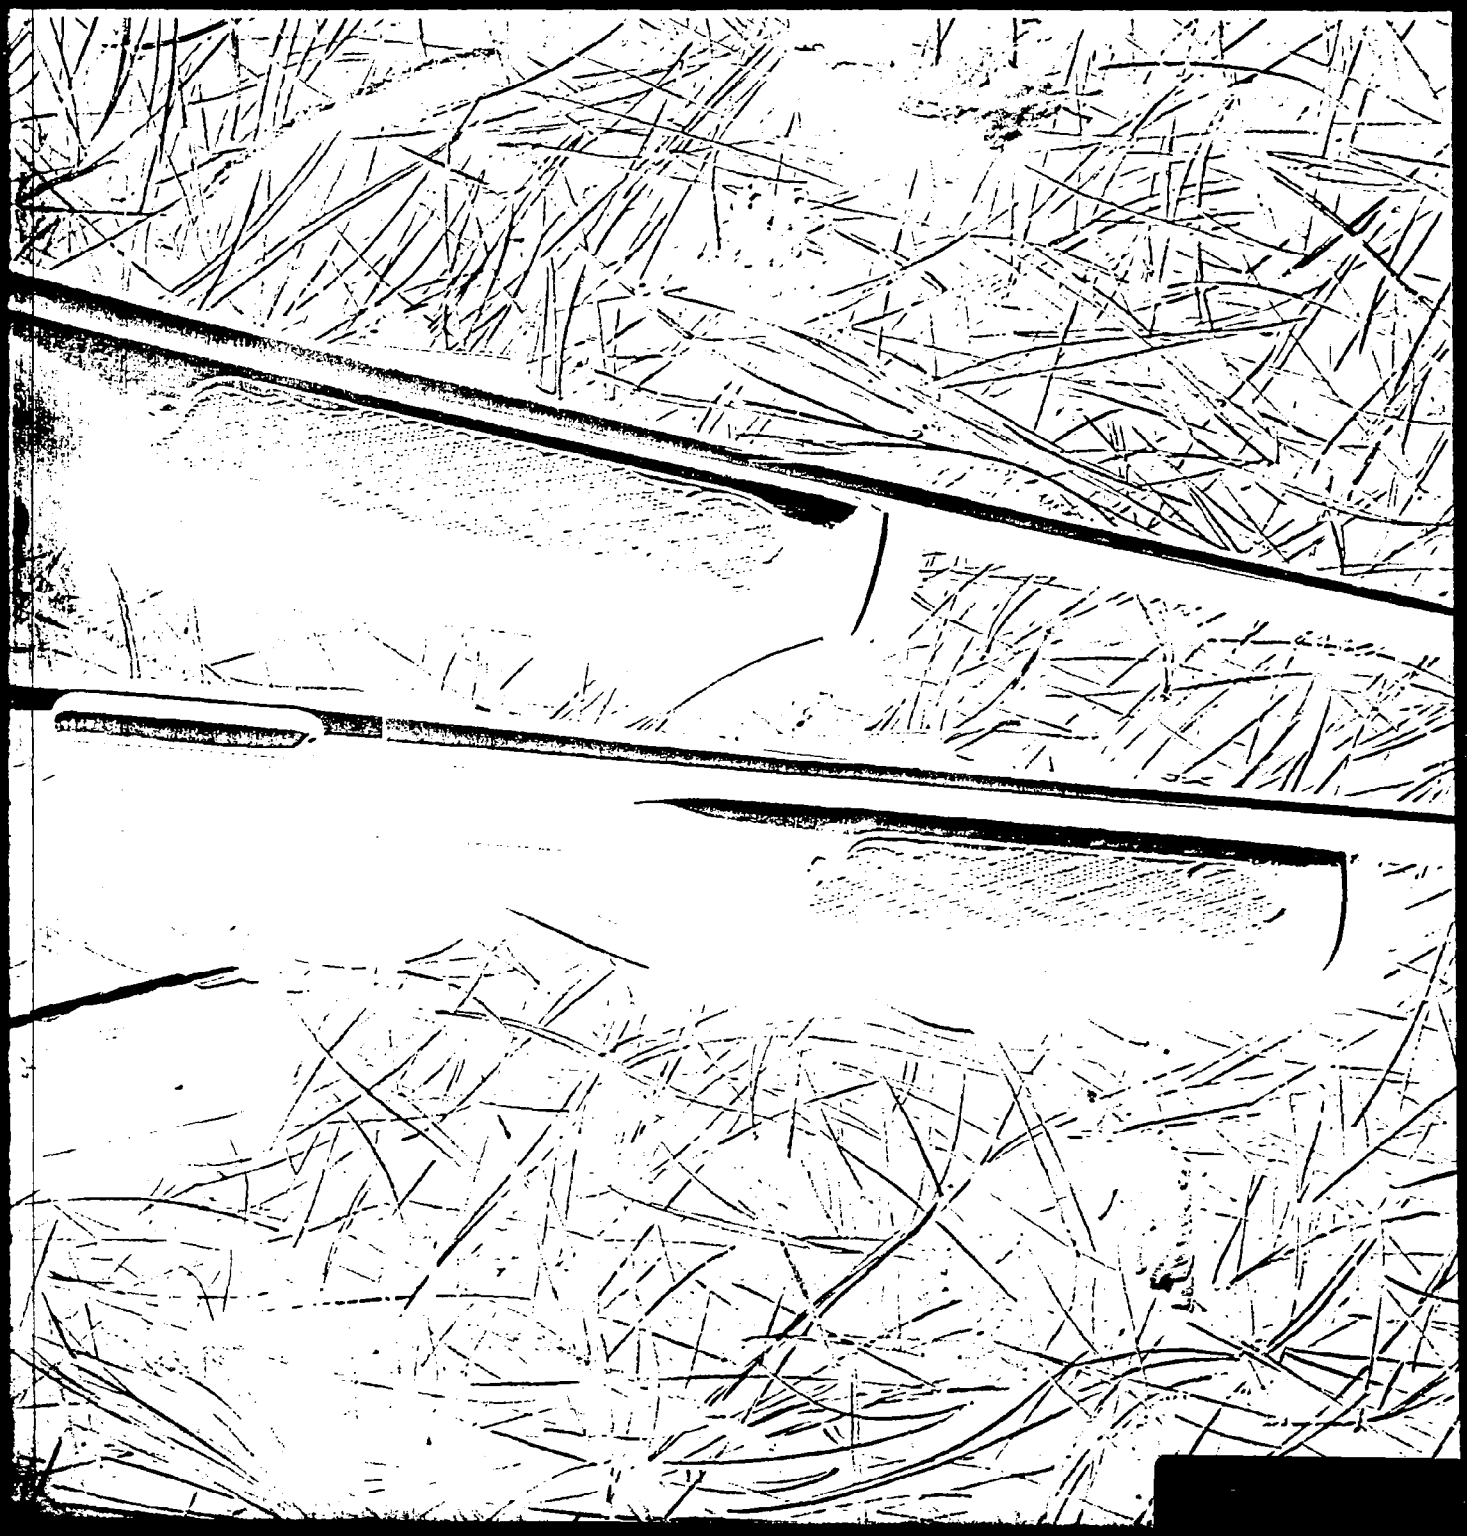
This smoothness is the result of twin action bars which eliminate twisting or binding. Internal working parts are vibra-honed to reduce friction and assure crisp, easy functioning of the action.

Strength is another attribute of the Gamemaster action. The receiver is machined from a solid block of solid steel. The bolt is an interrupted-rotary-style bolt with multiple locking lugs.

The stock and fore-end are American walnut with functional checkering and white line spacers accenting the butt plate, pistol grip and fore-end tip. The BDL custom grade has basket-weave checkering on a Monte Carlo stock with a full cheek-piece.

Chambered for all popular big game hunting cartridges, it is the only pump action rifle chambered in 30-06. The ADL grade has a standard-length barrel or an 18½-inch carbine barrel for brush country. The BDL custom grade is offered in a version with left-hand stock and safety in the 270 Win., 30-06 and 308 Win. calibers.

Receiver is drilled and tapped for scope mounts and the scope can be mounted on top of the receiver, instead of being offset as on some lever action rifles.



R2525495

REMINGTON "NYLON 66" AUTOLOADER

There is no other rifle like it!

The durability of the "Nylon 66" is really something special. The stock is Du Pont structural nylon and is virtually indestructible. In fact, it carries a life-of-the-rifle warranty against warping, cracking, chipping, fading or peeling.

[illegible] bearing surfaces which make friction to the polished negligible. They resist abrasion and so resist dirt and grit which can slow down its action and cause wear. All of this adds up to the kind of performance that prompted Jim Carmichel, author of The Modern Rifle, to say, "If I had to survive in the wilderness for a lifetime, this is the rifle I'd choose."

1978

[illegible] working, long-lasting, reliable 22 with the sporty lines of an expensive big game rifle, the handling ease of a carbine and the incredible accuracy of a specialized target rifle. It will perform in jungle heat and humidity or in arctic cold. And it will last and last.

A tubular magazine feeds through the buttstock and has a capacity of 14 Long Rifle cartridges.

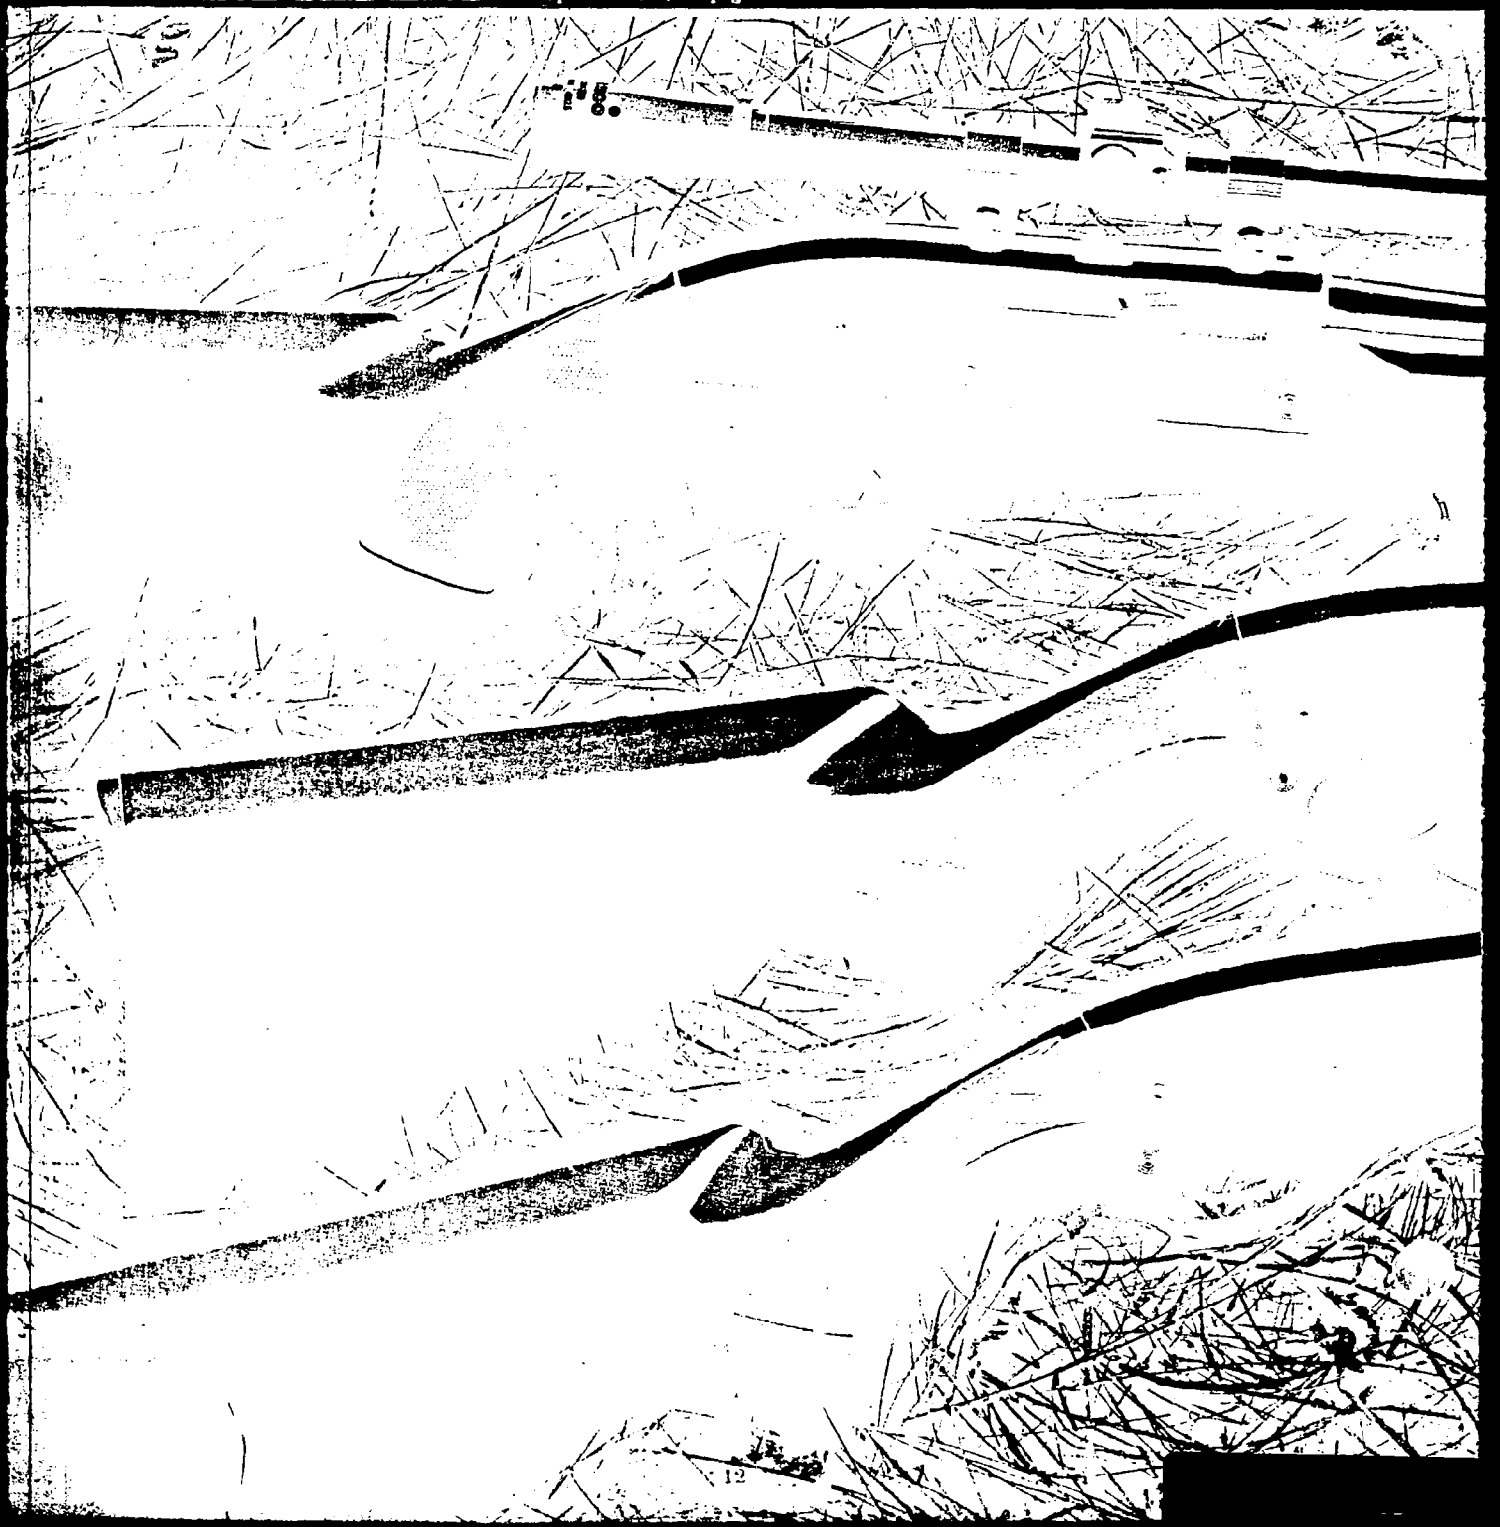
When you add up all of the features and performance of the [illegible] all the 22 you'll ever need.

MODEL 552 "SPEEDMASTER" AUTOLOADER

It's a new look for the "Speedmaster" in both the BDL and standard grades. The completely restyled stock is fitted with a 21" barrel for an over-all length of 40", making the new Model 552 easier to handle, more comfortable to shoot and smoother

RIM FIRE RIFLES

For specifications, see pages 22-25.



R2525496

center fire rifle look and feel to a rim fire favorite. The standard grade has a new rear sight, adjustable for both elevation and [illegible]age (the same sight as used [illegible]e Model 788 big game rifle). The "Speedmaster" shoots 22 Short, Long and Long Rifle cartridges. The "Speedmaster" is one of the few 22 autoloaders to function properly with 22 Shorts.

Other features include tubular magazine with a capacity of 20 Short, 17 Long or 15 Long Rifle cartridges; positive cross-bolt off scope mounts; and blade ramp front sight. T 1978 has custom checke and fore-end and the durable Du Pont RK-W wood finish, plus center fire rifle rear and blade ramp front sights.

MODEL 572 "FIELDMASTER" PUMP ACTION

The Model 572 has the same new styling as the Model 552 [illegible]he new length and restyled tock make the 572 feel and [illegible]andle like a carbine. The new rear sight on the standard model (the one used on the Model 788), plus the standard features including the super-smooth pump action, make it a trim and well-balanced repeater.

A tubular magazine holds 20 Short, 17 Long and 14 Long Rifle cartridges. Removal of the magazine tube converts the pump action to a single-shot. Replacing [illegible]ugum.

Other features include positive cross-bolt safety and receiver grooved for tip-off scope mounts. The BDL grade has custom checkering on stock and fore-end and the durable Du Pont RK-W wood finish, plus center fire rifle rear and blade ramp front sights.

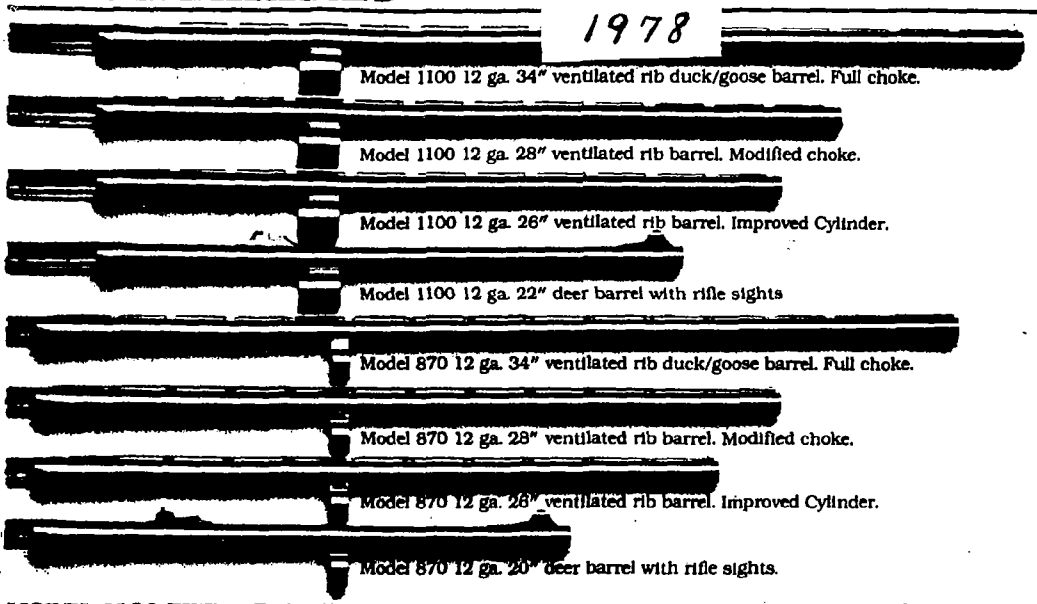
EXTRA BARRELS

1978



Model 1100 12 ga. 34" ventilated rib duck/goose barrel. Full choke.

Model 1100 12 ga. 28" ventilated rib barrel. Modified choke.

Model 1100 12 ga. 26" ventilated rib barrel. Improved Cylinder.

Model 1100 12 ga. 22" deer barrel with rifle sights

Model 870 12 ga. 34" ventilated rib duck/goose barrel. Full choke.

Model 870 12 ga. 28" ventilated rib barrel. Modified choke.

Model 870 12 ga. 28" ventilated rib barrel. Improved Cylinder.

Model 870 12 ga. 20" deer barrel with rifle sights.

You can add to the usefulness and versatility of your Model 1100 or 870 with any of the available extra barrels. Use yo target shotgun in the field, and vice versa, by simply changing the barrel. It's easy to do and there are many from which to choose. There are left-hand extra barrels for the left-hand versions of these fine shotguns, too. However, you must match the barrel to the correct receiver—left to left, right to right—and within gauge and chamber length.

1979

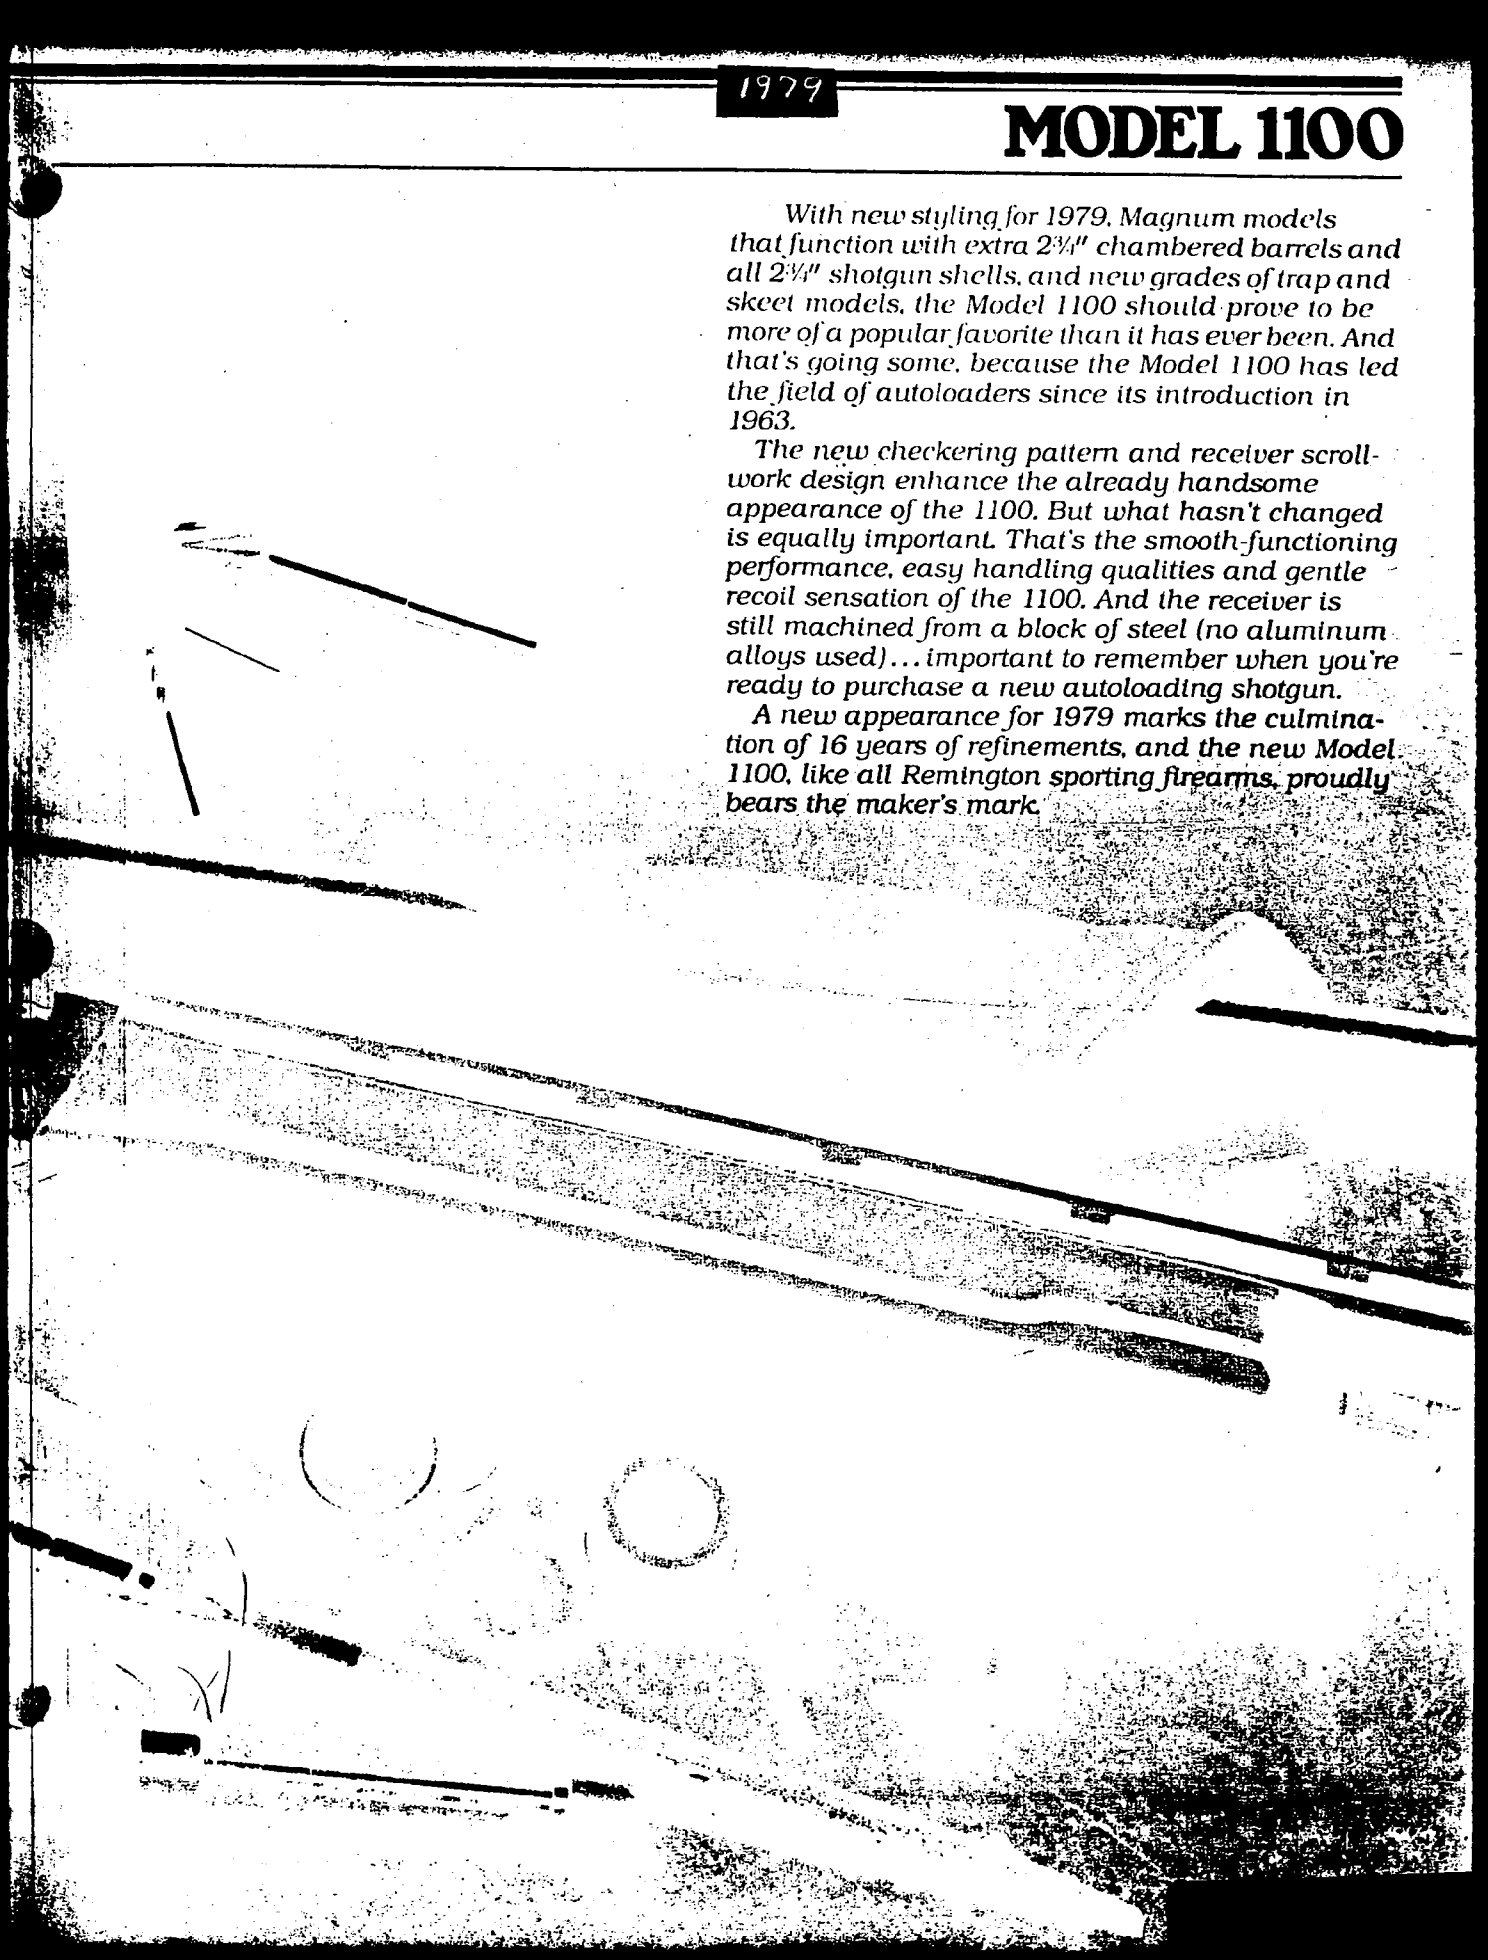
MODEL 1100

With new styling for 1979, Magnum models that function with extra 2¾" chambered barrels and all 2¾" shotgun shells, and new grades of trap and skeet models, the Model 1100 should prove to be more of a popular favorite than it has ever been. And that's going some, because the Model 1100 has led the field of autoloaders since its introduction in 1963.

The new checkering pattern and receiver scroll-work design enhance the already handsome appearance of the 1100. But what hasn't changed is equally important. That's the smooth-functioning performance, easy handling qualities and gentle recoil sensation of the 1100. And the receiver is still machined from a block of steel (no aluminum alloys used)... important to remember when you're ready to purchase a new autoloading shotgun.

A new appearance for 1979 marks the culmination of 16 years of refinements, and the new Model 1100, like all Remington sporting firearms, proudly bears the maker's mark.



R2525511

MODEL 1100

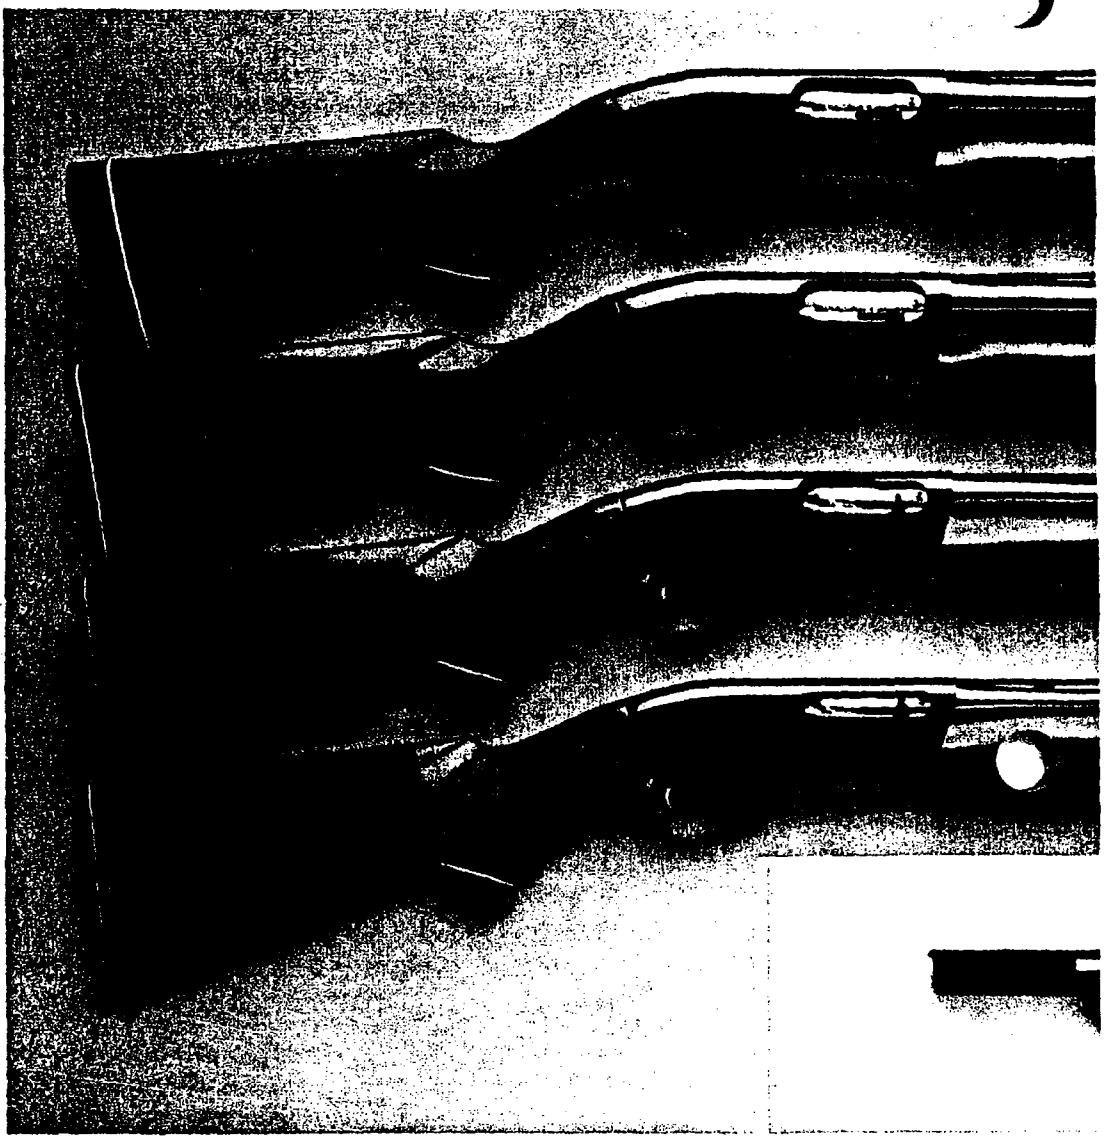
1979

AUTOLOADING SHOTGUNS-A NEW LOOK FOR AN OLD FAVORITE

The world's most popular autoloading shotgun has a brand new checkering pattern and receiver scroll design to enhance its smooth-flowing lines and handsome appearance. The way the 1100 looks is one reason more shooters prefer it over other autoloaders, but its smooth, reliable performance, easy handling, superb balance and low recoil sensations are the major reasons it's America's best selling autoloading shotgun.

And the Model 1100 is the only autoloader available in 12, 16, 20 and 28 gauge and .410 bore. You can also buy extra interchangeable barrels that will give you a field, target or deer gun quickly and easily. Extra interchangeable 2¾" chambered barrels, available for the 3" Magnum models, will handle all 2¾" shotgun shells. No tools required to change barrels. (See page 10 for barrel selections.)

Choose from two chamber lengths—the 2¾" handles all 2¾" loads, including "baby magnums" without adjustment, and the 3" Magnum model handles all 2¾" magnum and 3" magnum loads. Pick the barrel length, style and choke for your shooting needs from the widest selection offered by any manufacturer. There is even a left-hand model in 12 gauge, available in three barrel lengths.



MODEL 1100—AUTOLOADING SHOTGUN

FEATURES

Stock and Fore-end. American walnut with durable Du Pont RK-W wood finish. New checkering pattern.

Receiver. Machined from solid steel. Matte-finish top. Deep blue finish, new scrollwork design on both sides and on chrome-plated bolt.

Barrel. Special Remington proof steel. Deep blue finish. Extra barrels are interchangeable within versions (right- or left-hand), gauge and chamber length. Extra interchangeable 2¾" chambered barrels available for 3" Magnum take all 2¾" shotgun shells. Lightweight barrels interchangeable only on Lightweight models.*

Sights. Metal bead front sight.

Safety. Positive cross-bolt type. Reversed on left-hand models.

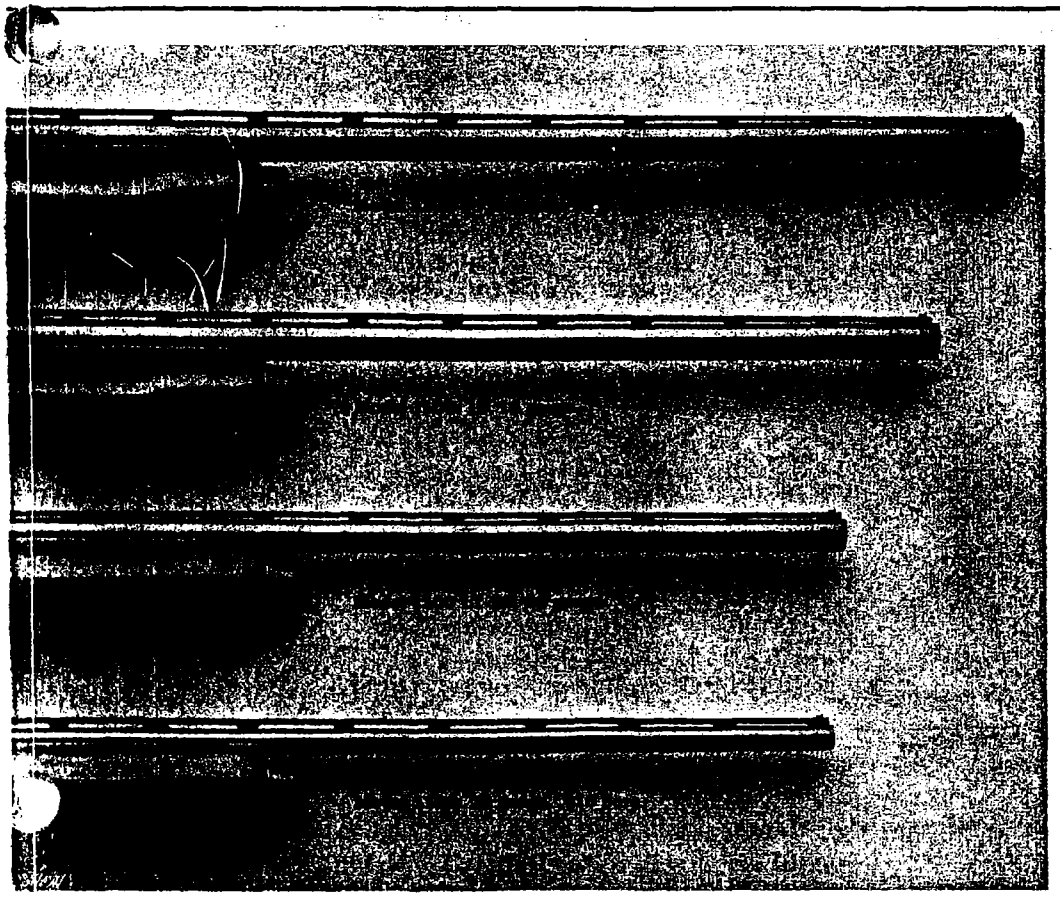
Chamber. 2¾" in standard field guns except .410 bore. Magnum models and .410 bore field guns have 3" chamber.

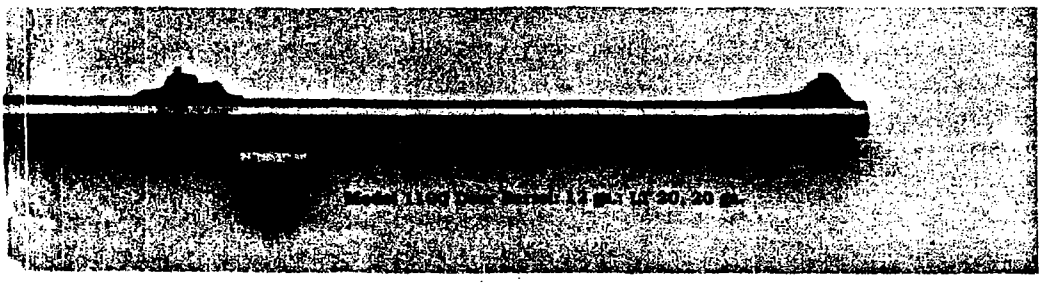
Capacity. 5-shot, 3-shot plug furnished. 4-shot capacity for 3" shells in .410 bore.

*New 20 gauge Lightweight barrels (4400 Series) will not fit pre-1977 20 gauge Lightweight or regular 20 gauge Model 1100 shotguns. (Refer to parts list for pre-1977 barrels.)

R2525512

FIELD GRADE





The unique gas-metering system reduces recoil sensation to a gentle push against your shoulder. The lack of muzzle jump means you stay on target for a second or third shot if needed. The 1100 is a comfortable gun to shoot in any gauge and is an ideal gun for a beginner.

Add the deep, rich blueing on the barrel and receiver, chrome-plated bolt, durable Du Pont RK-W wood finish on the walnut stock and fore-end and you have a Remington shotgun you'll be proud to own and shoot.

Model 1100 3" Magnum: 12 gauge. Ideal for waterfowl or turkey hunting. Takes 3" and 2¾" magnum shells. Extra interchangeable 2¾" barrels take all 2¾" shotgun shells.

Model 1100: 12, 16 gauge. Wide choice of barrel lengths and chokes. Both chamber lengths available in 12 gauge.

Model 1100 LT-20, 20 gauge Lightweight. Scaled down to the proportions of the 20 gauge shell. Magnum model specially designed for 3" and 2¾" magnum shells, furnished with recoil pad.

Model 1100: 28 gauge, .410 bore. Plain or ventilated rib barrels with a variety of choke options.

Model 1100 Deer Gun: 12 gauge; LT-20, 20 gauge. Improved Cylinder choke for rifled slugs and buckshot. Rifle sights. Barrel only shown at left.

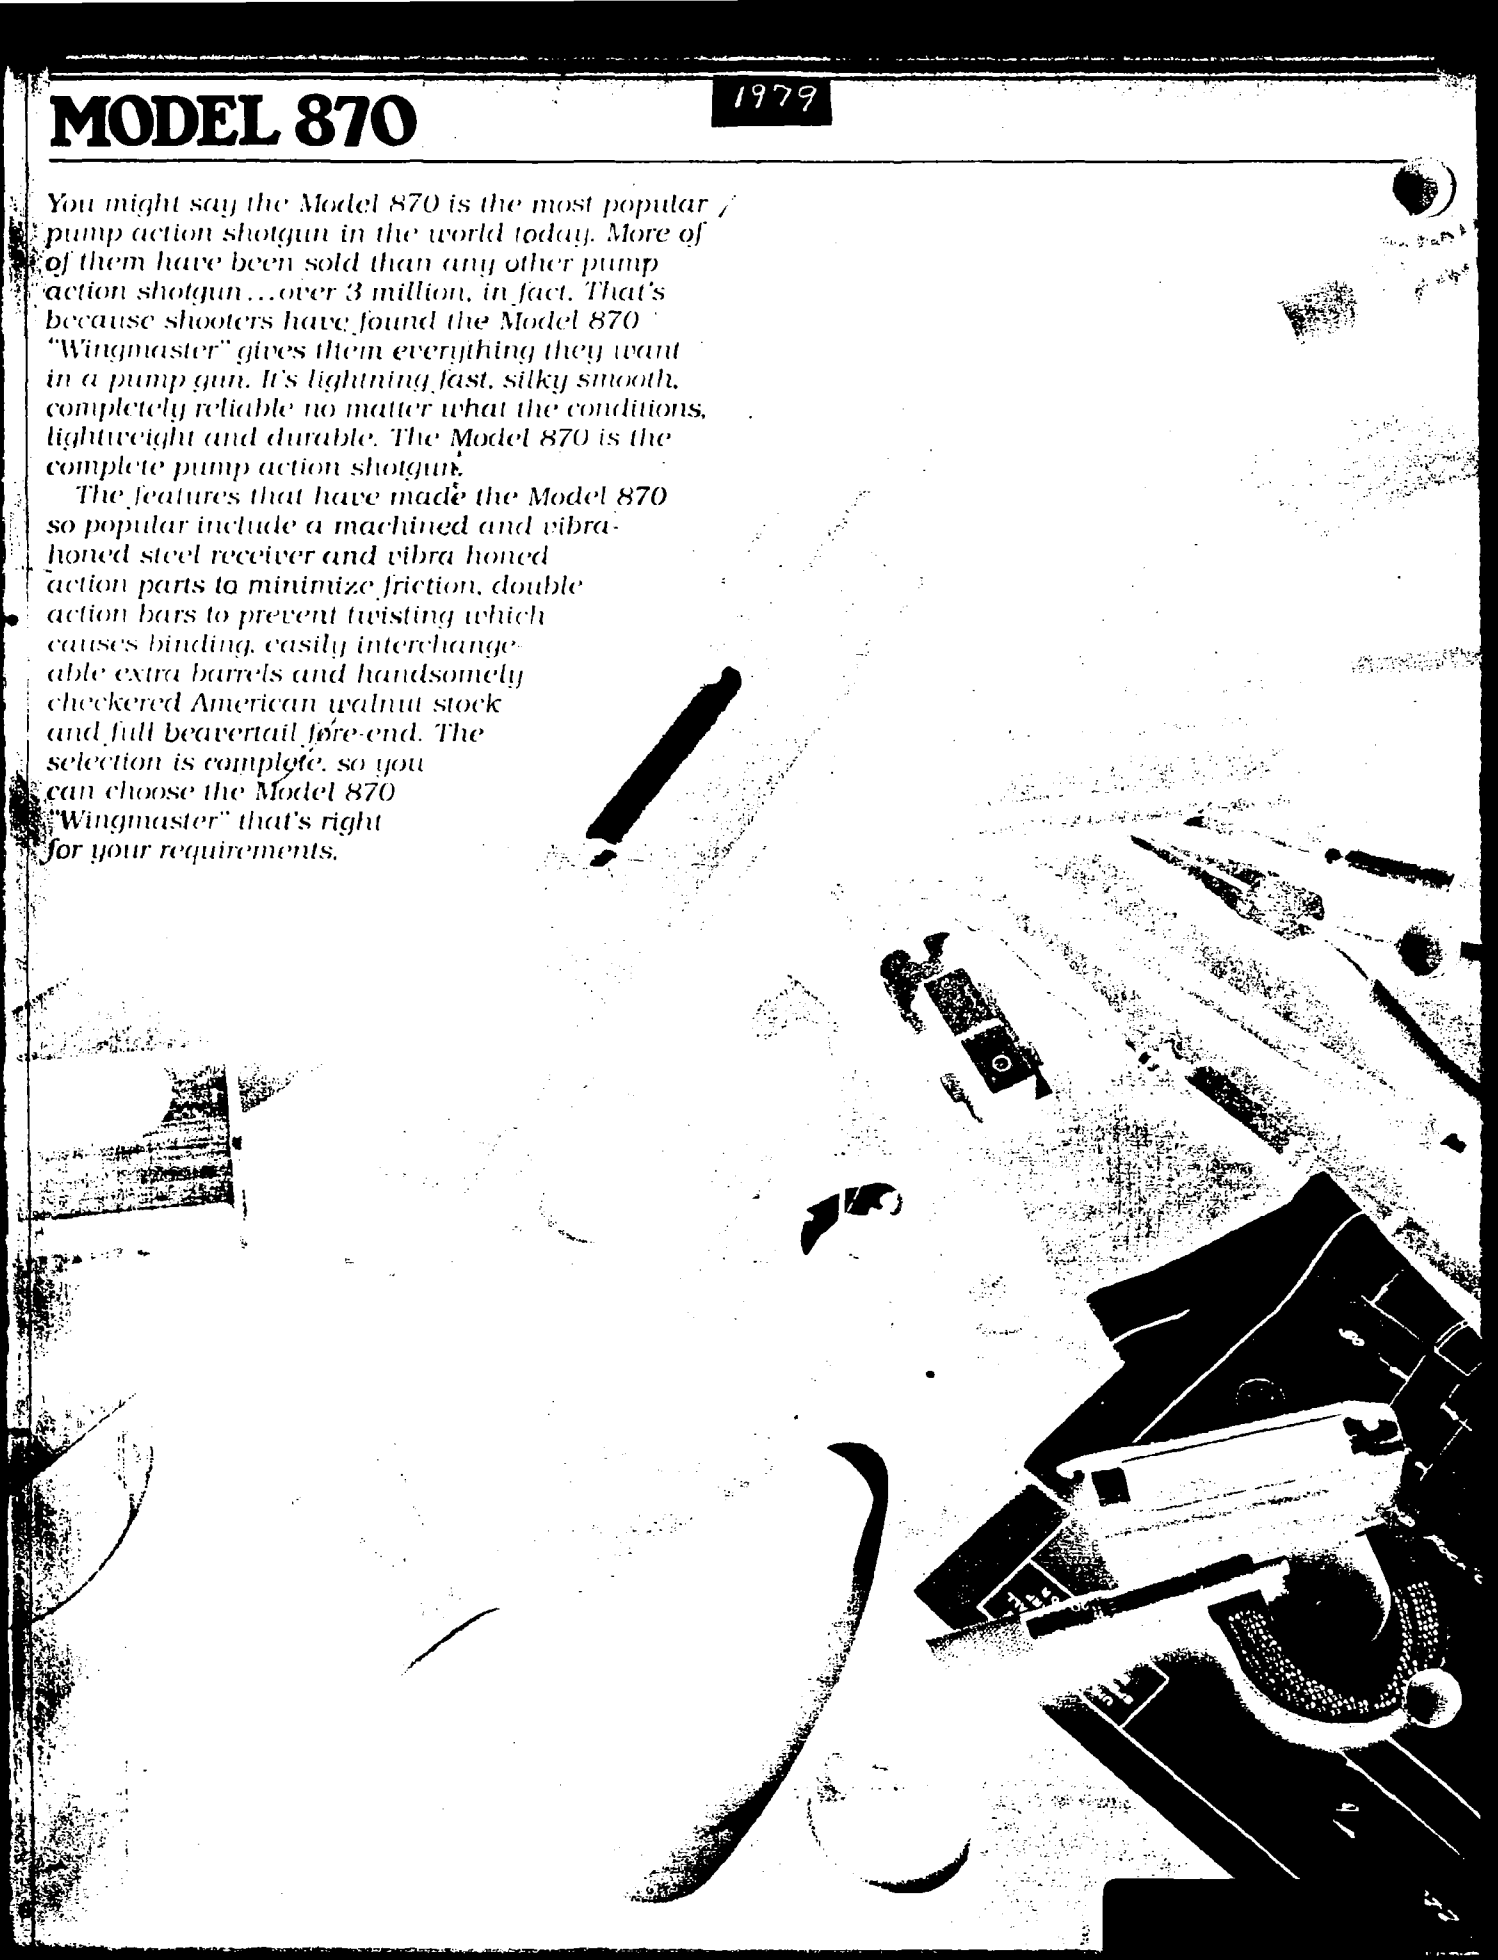
MODEL 870

1979

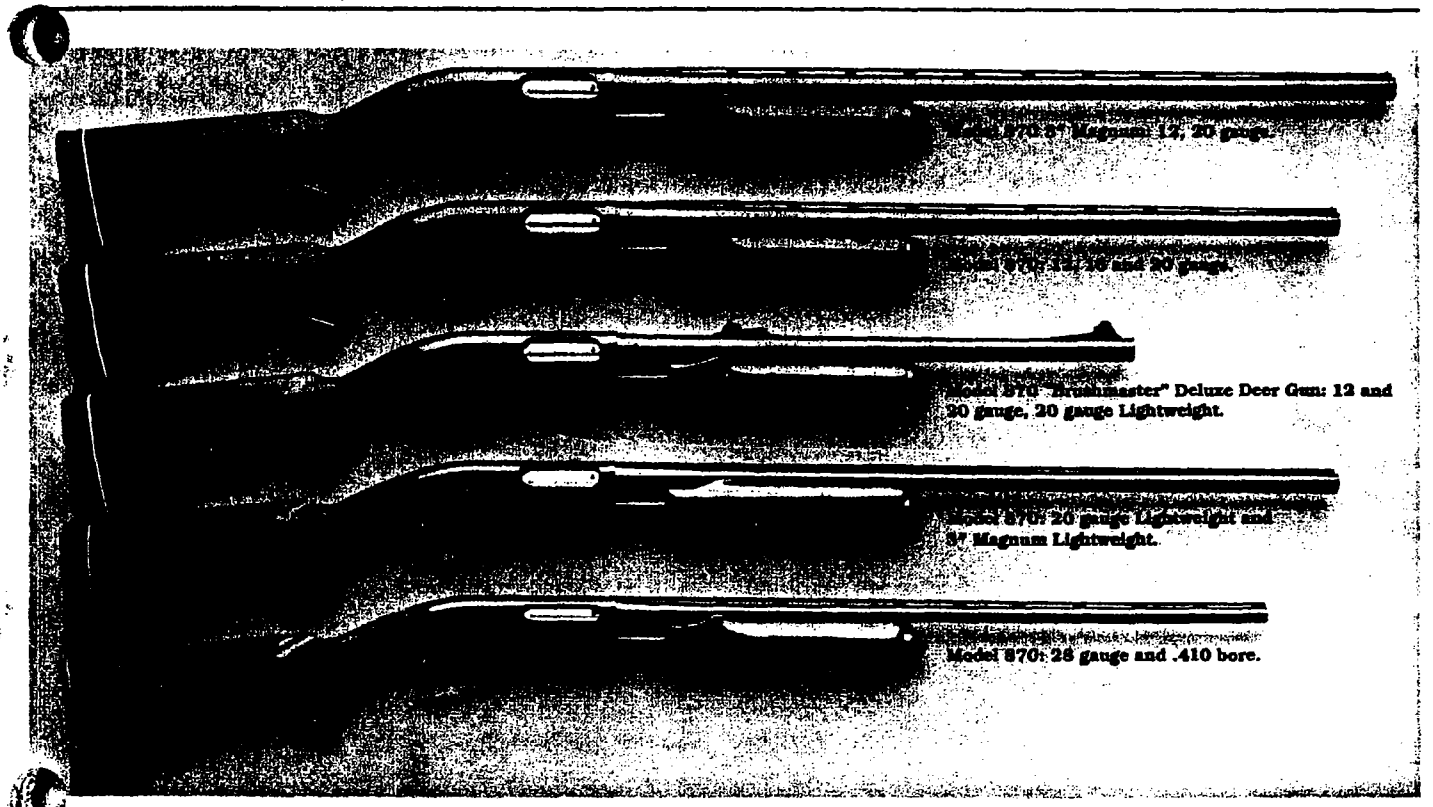
You might say the Model 870 is the most popular pump action shotgun in the world today. More of them have been sold than any other pump action shotgun...over 3 million, in fact. That's because shooters have found the Model 870 "Wingmaster" gives them everything they want in a pump gun. It's lightning fast, silky smooth, completely reliable no matter what the conditions, lightweight and durable. The Model 870 is the complete pump action shotgun.

The features that have made the Model 870 so popular include a machined and vibra-honed steel receiver and vibra honed action parts to minimize friction, double action bars to prevent twisting which causes binding, easily interchangeable extra barrels and handsomely checkered American walnut stock and full beavertail fore-end. The selection is complete, so you can choose the Model 870 "Wingmaster" that's right for your requirements.



R2525514

FIELD GRADE



Model 870 3" Magnum: 12, 20 gauge. Handles all 2¾" and 3" shells including magnums. Available in left-hand ventilated rib barrel model.

Model 870: 12, 16 and 20 gauge. Choice of barrel lengths, chokes and extra barrels including a 12 gauge 34" duck/goose barrel. Left-hand: 12, 20 gauge.

Model 870 "Brushmaster" Deluxe Deer Gun: 12, 20 and 20 gauge Lightweight. Deluxe and standard models; 12 gauge standard has plain stock and grooved fore-end. Rifle sights.

Model 870: 20 gauge Lightweight and 3" Magnum Lightweight. Magnum handles all 3" and 2¾" shotgun shells including magnums. American walnut stock and fore-end.

Model 870: 28 gauge and .410 bore. Lighter weight small gauges with all of the Model 870 features. American walnut stock and fore-end.

FEATURES

Stock and Fore-end. American walnut with durable Du Pont RK-W wood finish.

Receiver. Machined from solid steel. Matte-finish top. Vibra-honed for smoother operation and finish. Lightweight 20, 28 gauges and .410 bore have scaled-down receivers.

Barrel. Special Remington proof steel. Extra barrels are interchangeable within versions (right- or left-hand), gauge and chamber length. Lightweight barrels interchangeable only on Lightweight models.

Sights. Metal bead front sight.

Safety. Positive cross-bolt type. Reversed on left-hand models.

Chamber. 2¾" in standard field guns except .410 bore. Magnum models and .410 bore field guns have 3" chamber.

Capacity. 5-shot, 3-shot plug furnished. 4-shot capacity for 3" shells in .410-bore.

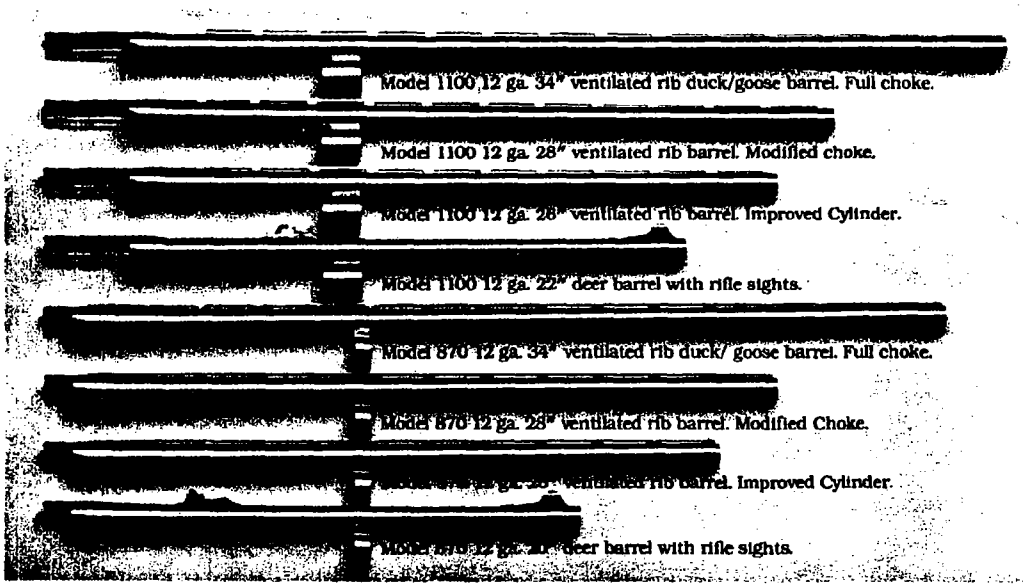
EXTRA BARRELS

1979



You can add to the usefulness and versatility of your Model 1100 or 870 with any of the available extra barrels. Use your target shotgun in the field, and vice versa, by simply changing the barrel. It's easy to do and there are many from which to choose. There are left-hand extra barrels for the left-hand versions of these fine shotguns, too. However, you must match the barrel to the correct receiver—left to left, right to right—and within gauges. Extra interchangeable 2¾" chambered barrels, available for the 3" Magnum models, will handle all 2¾" shotgun shells.

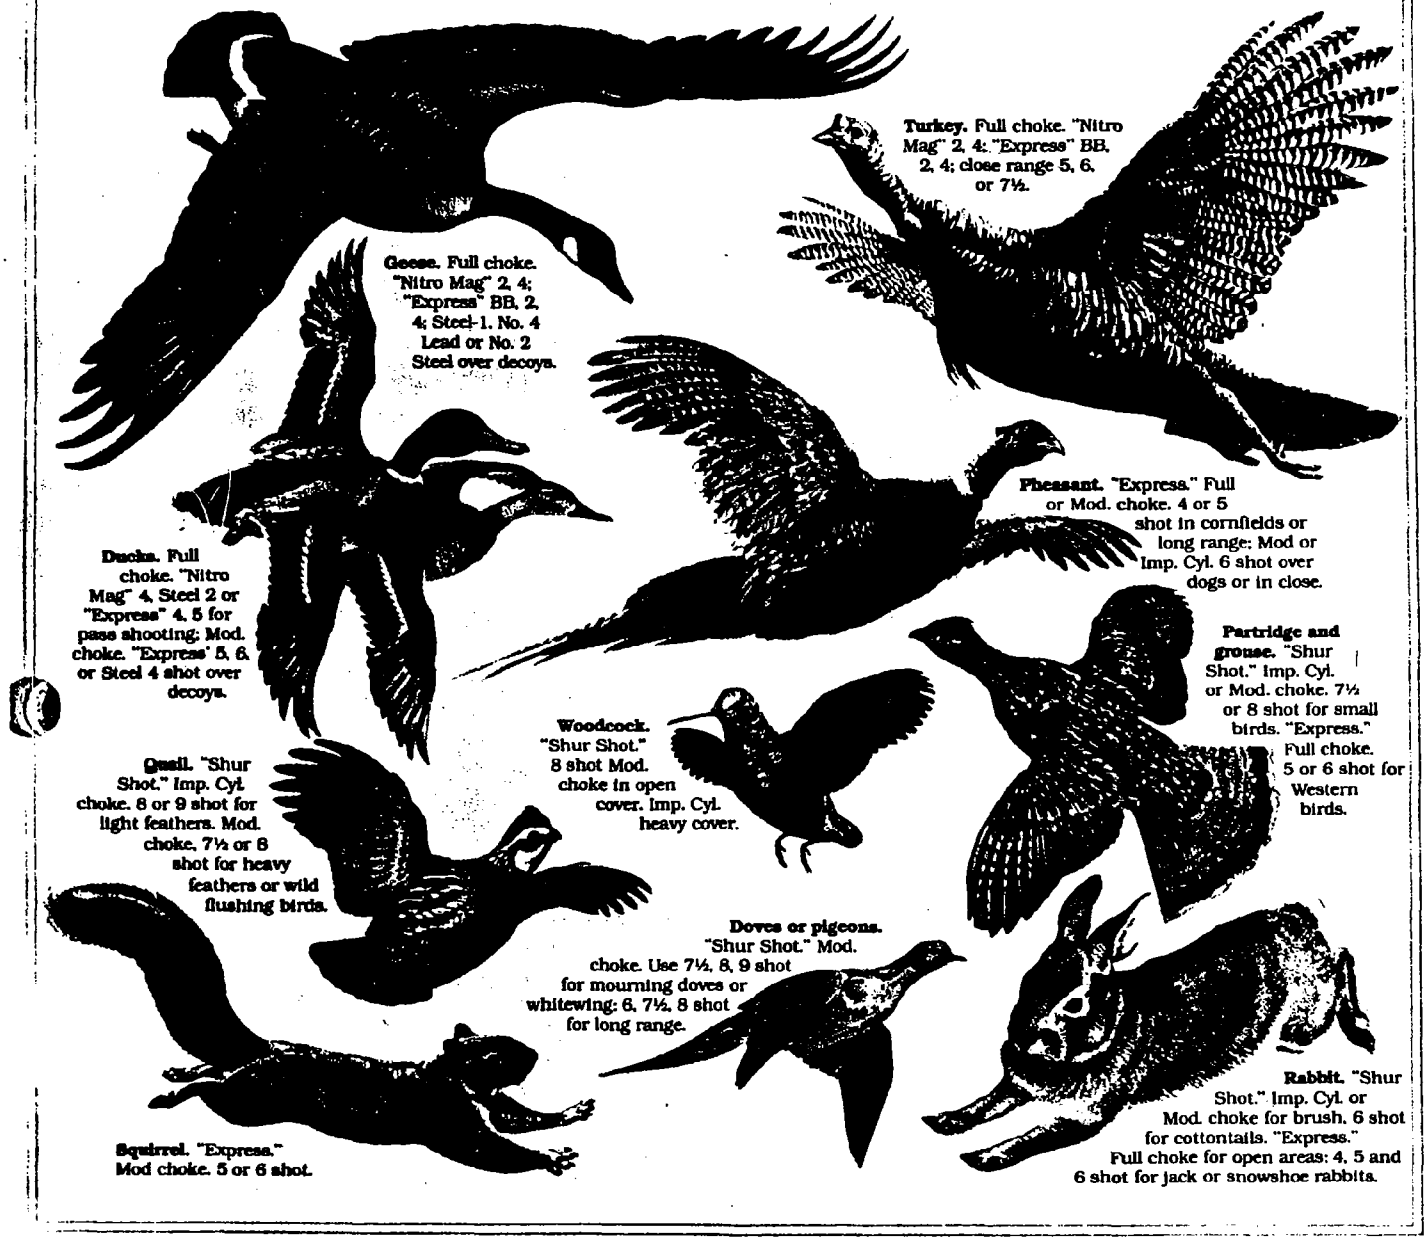
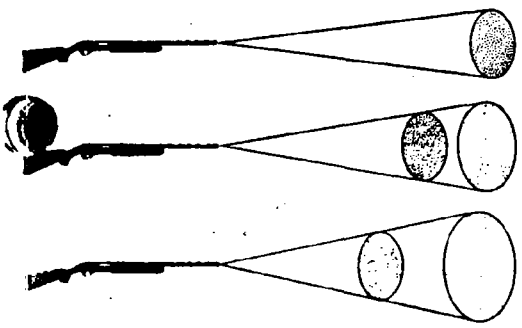
1979 SHOTGUNNING SUGGESTIONS



Remington, when you take your game seriously.

Remington shotgun shells come in today's most popular range of gauges, shell lengths, powders and shot sizes.



Choose a **Full choke** for the tightest pattern at the longest distances. Best when shooting 45 to 55 yards away.

A **Modified choke** is less constricted, delivers peak patterns between 25 and 45 yards.

For more open patterns, at distances up to 35 yards, choose an **Improved Cylinder choke.**

CENTER FIRE RIFLES 1979

R2525520

MODEL 700

Extreme accuracy, superior strength, attractive styling.

The Remington Model 700 is world-renowned for its accuracy. This is the result of the precision machining of the metal parts and careful bedding of the barreled action to the stock. Every 700 is hand assembled and closely inspected in each step of the manufacturing process, then test fired before it is given the final mark of approval.

The action is one of the strongest ever designed. Bolt face, barrel and receiver surround the cartridge head with three rings of solid steel—no weakening extractor cuts. The anti-bind bolt assures smooth operation without bind or drag.

Styling features found in the Model 700 line are usually found only on far more expensive custom guns. For example, the Model 700 BDL has a walnut Monte Carlo stock with full cheekpiece, positive cut skip-line checkering, black fore-end tip, white line spacers and the durable DuPont RK-W high gloss wood finish. Sling strap and quick-release swivels are included.

The Model 700 ADL has custom skip-line checkering on a walnut Monte Carlo stock with DuPont RK-W wood finish. And the "Classic" model has a satin finish walnut stock with full pattern positive cut checkering and quick-release swivel studs. All models have the receiver drilled and tapped for scope mounts and receiver sights.

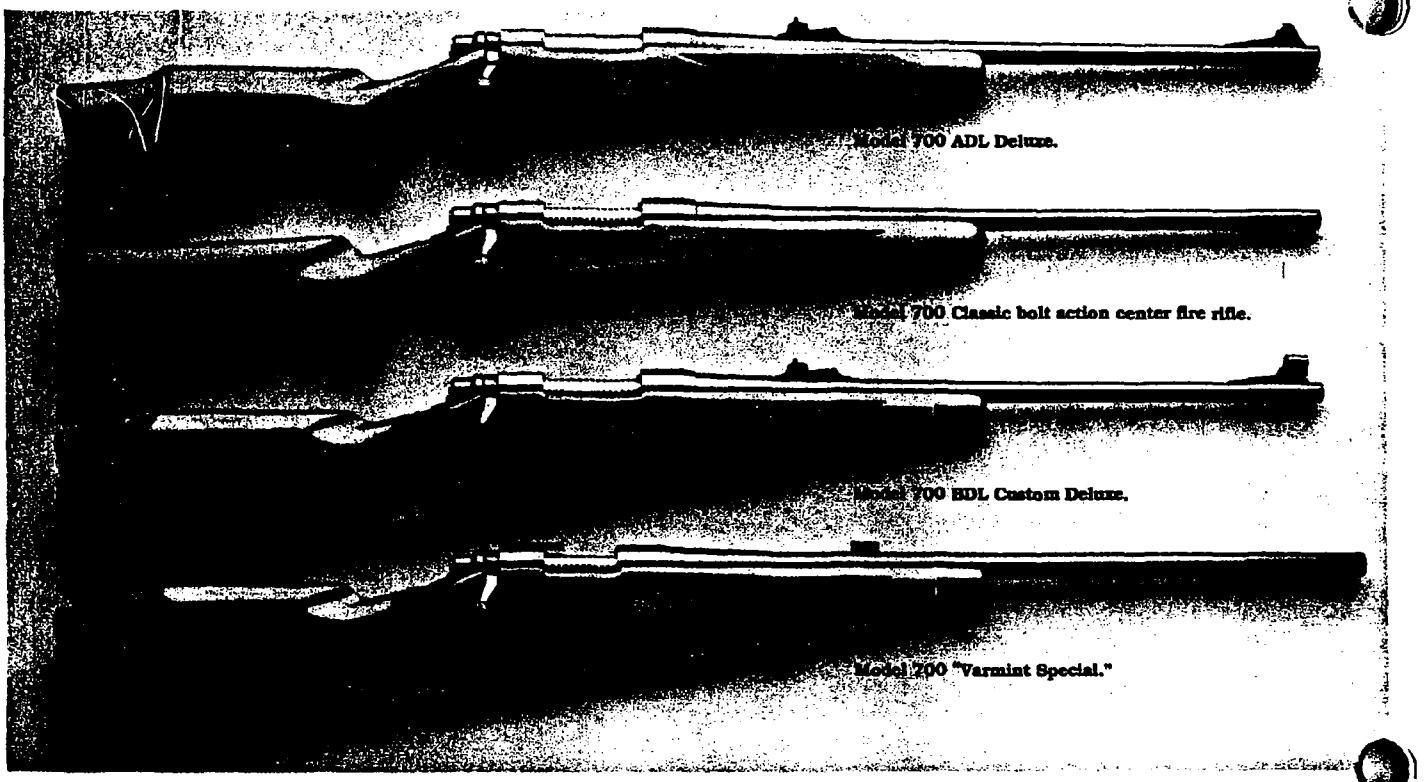
The Model 700 is also available in a heavy-barreled varmint gun. The "Varmint Special" is furnished without sights but has Remington target rifle type scope blocks installed.

To round out your choice, the Model 700 is available in sixteen calibers in right-hand models, with the addition of the versatile 7mm Express Remington in 1979, three calibers in left-hand models, six calibers in the "Classic" model and seven calibers in the heavy-barrel "Varmint Special" model. The 308 caliber "Varmint Special" is an excellent choice for the fast-growing sport of metallic silhouette target shooting.

R2525521

MODEL 700

1979



Model 700 ADL Deluxe. Economy and value combined with superb accuracy.

Model 700 "Classic" bolt action center fire rifle. Classic stock styling for the world-famous Model 700 barreled action.

Model 700 BDL "Custom" Deluxe. The standard of excellence by which other big-game rifles are measured.

Model 700 "Varmint Special." Heavy barrel adds extra weight for tack-driving accuracy on small targets at long range.

MODEL 700 FEATURES

Stock & Fore-end. American walnut. Safari grade, C "Custom" and "Classic" models have full pattern, positive cut checkering; choice of skip-line or full pattern checkering in C "Custom" grade; BDL, positive cut skip-line checkering; ADL, custom skip-line checkering. ADL, BDL and C "Custom" models have DuPont RK-W wood finish; "Classic" and Safari models have satin finish.

Monte Carlo stock on all models except "Classic." Magnum models have presentation style recoil pads. "Classic" has ⅝" brown rubber butt pad. Sling strap and quick-release swivels are included on BDL and Safari models. "Classic" and C "Custom" models have quick-release swivel studs.

Receiver. Machined from a solid ordnance-steel billet, vibra-honed for smooth finish and functioning. Jeweled anti-bind bolt. Drilled and tapped for scope mounts and receiver sights. Fixed magazine with stainless steel follower; BDL, Safari, C "Custom" grade and "Classic" models have hinged floor plate.

Sights. Blade-ramp front sight with flat-faced gold bead, hooded on BDL only. "Classic" and C "Custom" grades furnished without sights. Rear sight adjustable for elevation and windage. Both sights are removable. "Varmint Special," furnished without sights, has front and rear Remington target rifle type scope blocks installed.

Safety. Fast, positive thumb-type. Left-hand safety on left-hand models.

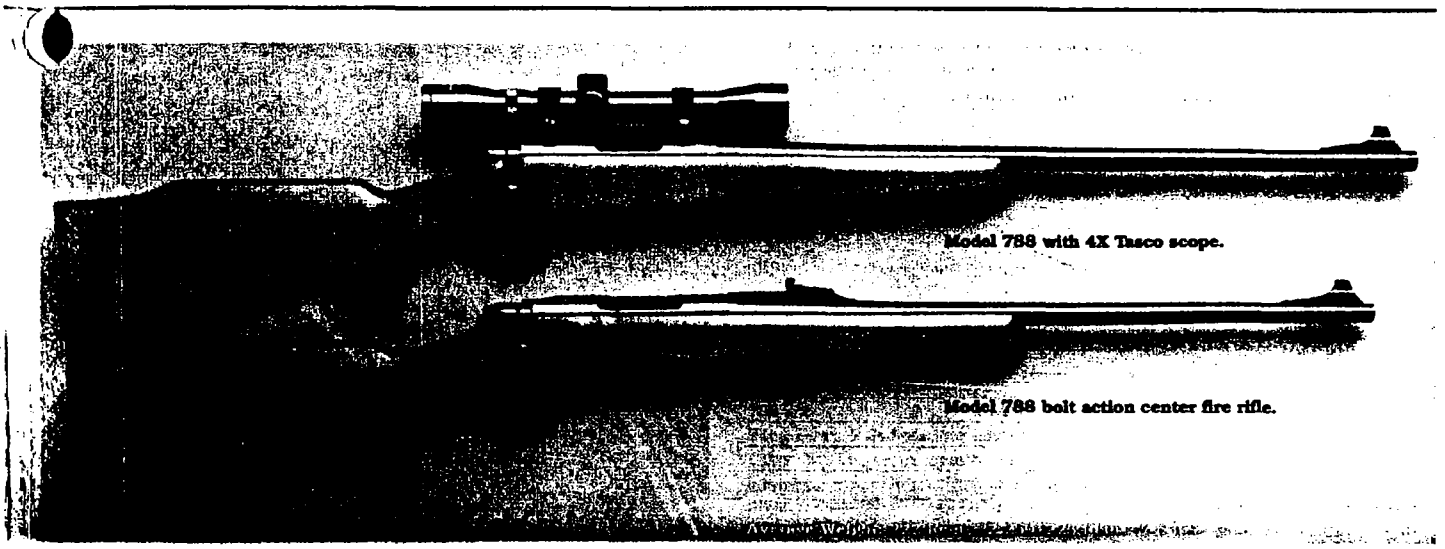
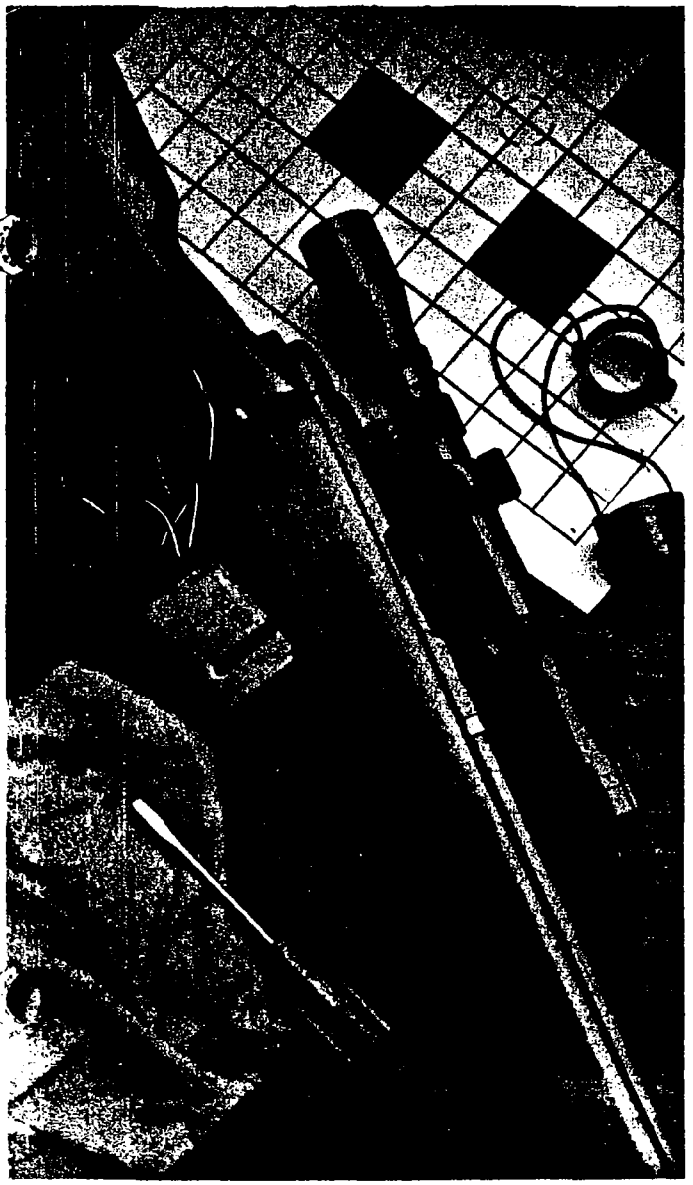
1979

MODEL 788



Model 788 with 4X Tasco scope.

Model 788 bolt action center fire rifle.



MODEL 788 BOLT ACTION CENTER FIRE RIFLE—SUPERB ACCURACY, OUTSTANDING VALUE.

Model 788 with 4X scope. The Model 788 with a Tasco 4-power scope, at one low price, makes a great value combination.

Model 788 bolt action center fire rifle. Chambered in six popular calibers from varmint through big game. Left-hand versions available in two calibers. A superb value any hunter can afford.

Model 788. Here's a center fire rifle with the accuracy required for varmint hunting with a surprisingly low price tag. And for a few dollars more than the price of the gun alone, you can get a Tasco 4-power scope with excellent optical qualities. Protective lens caps included.

The Model 788 has incredibly fast lock time—faster than ten competitive rifles tested. This helps to improve your accuracy because the bullet has left the barrel before your sights can move from the target.

FEATURES

Stock & Fore-end. Walnut finished hardwood with Monte Carlo styling standard.

Receiver. Machined from solid ordnance-steel billet. Bolt has **nine locking lugs** for utmost strength in the locked position. Receiver drilled and tapped for scope mounts and receiver sight. Detachable clip magazine. Extra clips available.

Sights. Blade-ramp front sight with detachable blade. U-notch rear sight, lock screw adjustment for elevation and windage. Sight easily removable for scope mounting.

Safety. Positive, fast-action thumb type. Left-hand safety on models with left-hand stock.

Scope. Tasco 4-power model with mount, rings and protective lens caps.

R2525523

MODEL 742

1979

MODEL 742 "WOODSMASTER" AUTOLOADER—AMERICA'S FAVORITE AUTOLOADING BIG GAME RIFLE

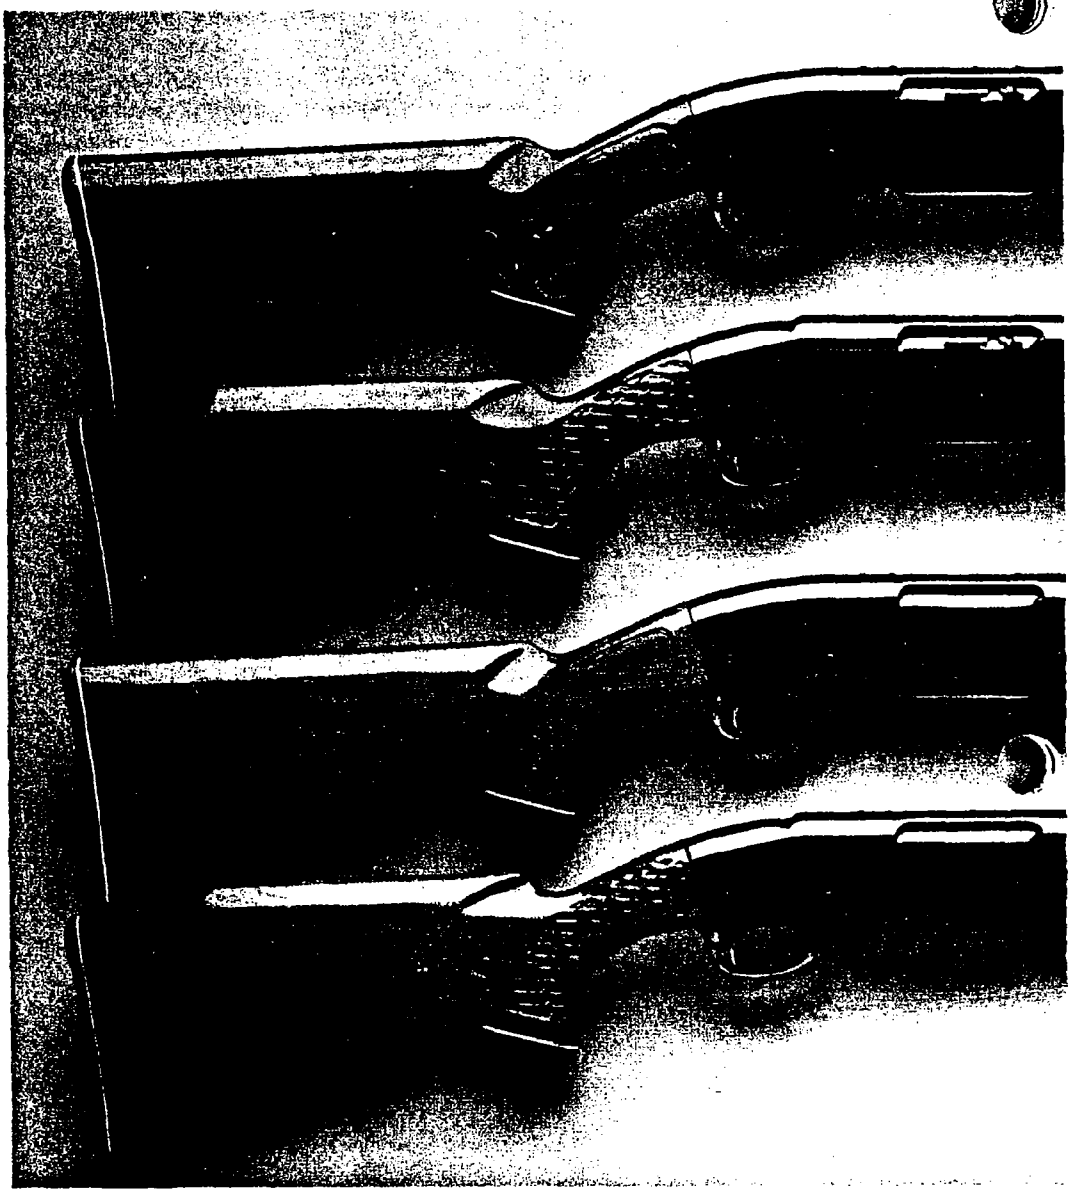
The "Woodsmaster" is a fast, reliable, accurate and strong gas-operated autoloader. Your second shot, if needed, is there on target, fast. You stay on target because the Remington-designed autoloading action reduces the recoil sensation to a gentle push against your shoulder.

Its reliability results from the smooth, positive, gas-operated action. And the interior working parts are coated with friction-reducing, dirt-resisting DuPont "Teflon-S" resin. This assures all-weather operation, makes cleaning easier and acts as a long-lasting lubricant.

Chambered in five popular flat shooting big game calibers, there's a Model 742 "Woodsmaster" rifle just right for your hunting requirements.

Model 742 "Woodsmaster" Center fire autoloading rifle. Chambered in five popular calibers including 30-06. 4-shot removable clip magazine. Carbine available.

Model 742 BDL "Woodsmaster" Custom Deluxe. Deluxe basketweave checkering on Monte Carlo stock and fore-end. Full cheekpiece. Available with left-hand cheekpiece and safety.



MODEL 742
FEATURES

Stock & Fore-end. American walnut. Distinctive skip line checkering—Custom Deluxe model has deluxe basketweave checkering and Monte Carlo stock (ideal for scope) with full cheekpiece. DuPont RK-W wood finish, white line spacers and black fore-end tip.

Receiver. Machined from solid ordnance-steel billet; interior parts are vibra-honed and coated with DuPont "Teflon-S" resin for dependable performance. Artillery-type bolt with multiple locking lugs. Drilled and tapped for scope mounts.

Magazine Capacity. Removable 4-shot clip. 5-shot capacity (4 in clip, 1 in chamber). Extra clips available.

Sights. Blade-ramp front sight with flat-faced, gold bead. Sliding-ramp rear sight adjustable for elevation and windage. Both sights removable for scope mounting.

Safety. Positive cross-bolt type. Left-hand safety on BDL with left-hand stock.

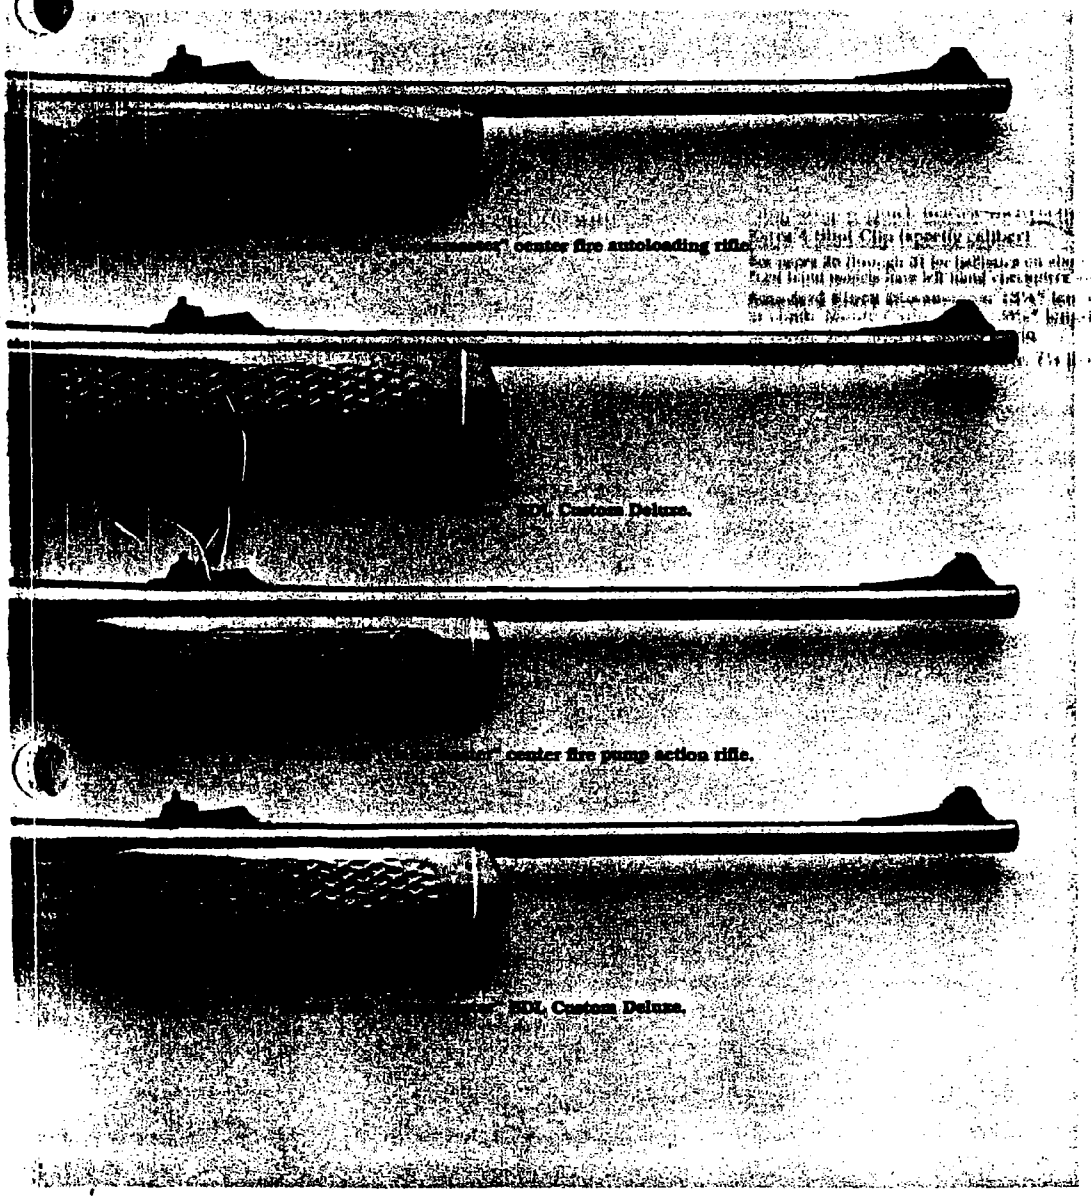
R2525524

MODEL 760



MODEL 760 "GAMEMASTER" PUMP ACTION CENTER FIRE RIFLE—FAST, SMOOTH, RELIABLE, NATURAL ACTION

The Model 760 "Gamemaster" lets you shoot as fast as you can pump the action and pull the trigger. You keep the rifle in a natural shooting position while working the action. The smooth 'action' gives this gun reliability in all temperatures and weather conditions.

This smoothness is the result of twin action bars which eliminate twisting and binding. Internal working parts are vibra-honed to reduce friction and assure crisp, easy functioning of the action.

Model 760 "Gamemaster" Center fire pump action rifle. Fast handling, fast shooting big game rifle. Carbine available.

Model 760 "Gamemaster" Custom Deluxe. Deluxe basketweave checkering on stock and fore-end. Monte Carlo stock (ideal for scope) with full cheekpiece. Available with left-hand cheekpiece and safety.

MODEL 760
FEATURES

The new Model 870 Wingmaster Field Grade Shotguns:

PUMP ACTION PERFECTION

1980

[illegible] 50, the [illegible] has been [illegible] work. Dependably bringing home [illegible] meat and trophies, winning friends, [illegible] the [illegible] conscious right or left arm of millions.

Over three million, in fact. Enough to make it the most popular pump action shotgun in [illegible] winners [illegible]

[illegible] the quality American walnut stock a[illegible] beaver tail forend feel [illegible] that a deep [illegible] queing on receivers and barrels and you've got shotguns that can be [illegible] with pride in any gun cabinet. [illegible] didn't change the working parts that [illegible] twisting [illegible] pounding. That makes the [illegible] smoothest, most dependable gun ever [illegible] like a closer look at the [illegible] stment [illegible] shotgun [illegible] must turn [illegible]

A historical note. Remington "firsts" started at Eliphalet Remington's forge in New York State's Mohawk Valley back in 1816. Over the next 164 years Remington introduced more rifles, shotguns, and ammunition than any other manufacturer—all made in America. Innovation: it's what keeps us advancing in every shooting sport, it's what keeps us "first in the field."

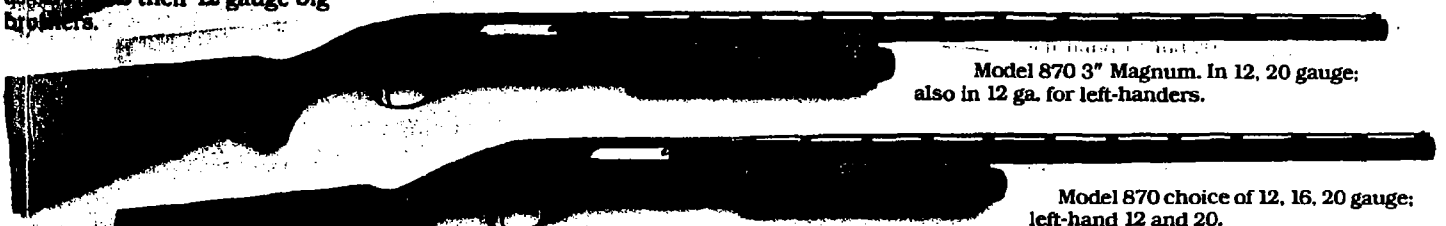
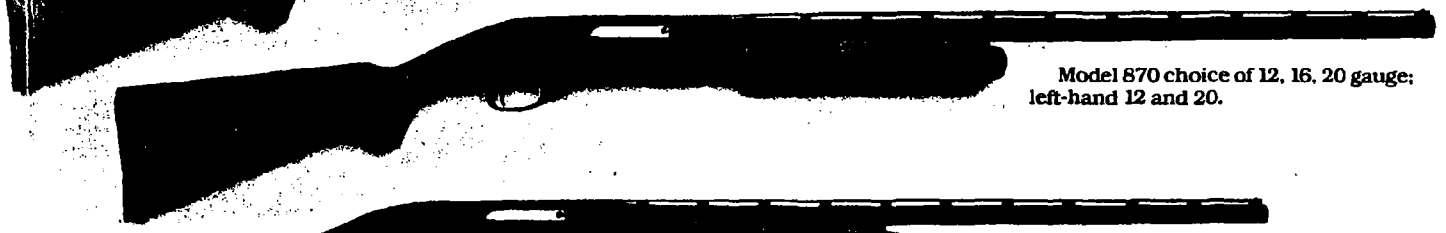
Model 870 Features & Specifications:

THE PREFERRED PUMPS, 1980
THE LONGEST LINE.

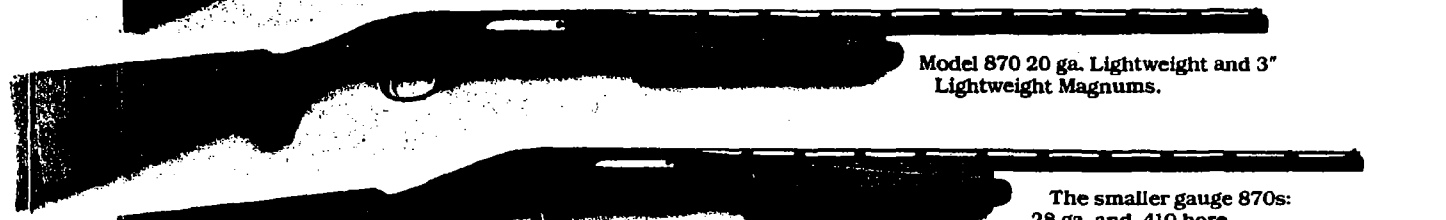
Every Model 870 ... we make starts ... with a receiver ... machined from ordinance steel. Our smaller gauge shotguns, the ... weight 20, the 28, and the .410 bore, have scaled-down receivers. But they are still built ... their 12 gauge big brothers.



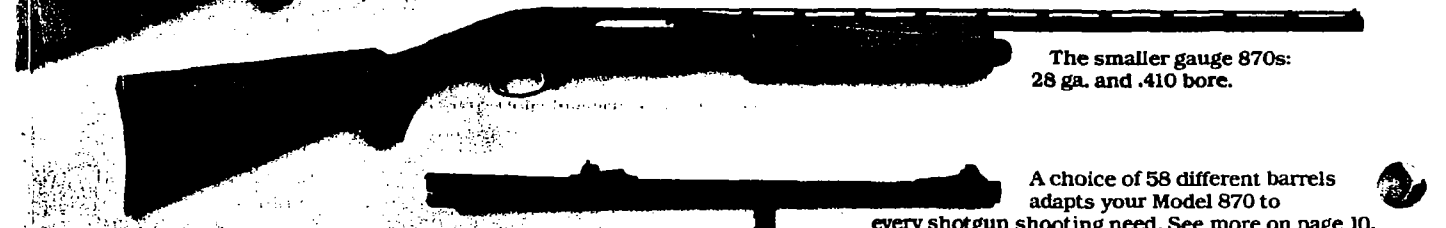
Model 870 3" Magnum. In 12, 20 gauge; also in 12 ga. for left-handers.



Model 870 choice of 12, 16, 20 gauge; left-hand 12 and 20.



Model 870 20 ga. Lightweight and 3" Lightweight Magnums.



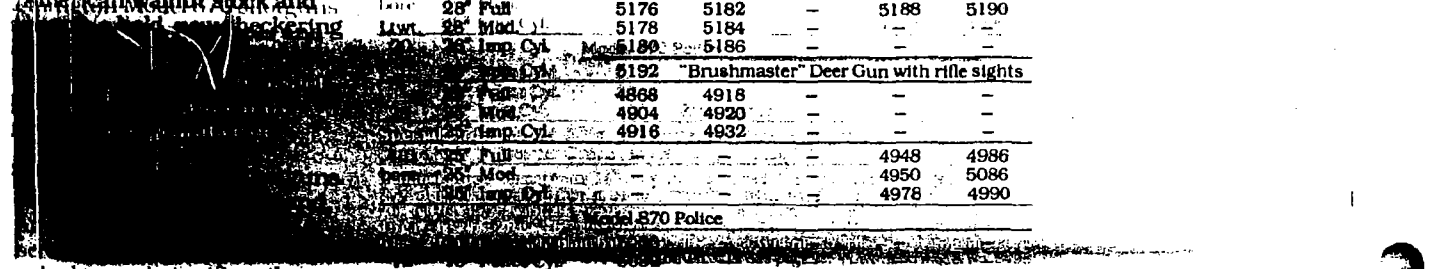
The smaller gauge 870s: 28 ga. and .410 bore.

A choice of 58 different barrels adapts your Model 870 to every shotgun shooting need. See more on page 10. The Model 870 Deer Barrel shown.

Barrels are of a special grade ... proof steel. Extra barrels are ... fully interchangeable within ... gauges, chamber lengths, and ... versions (right- or left-hand, ... and lightweight models).

All 870s, except the .410 bore, ... have a 5-shot capacity. A 3-shot ... plug, required for certain hunting situations, is furnished. ... The .410 models can hold up ... to four 3" shells.

Except for the deer guns, ... which have rifle sights, field ... 870s feature a metal bead front ... sight. ... barrels are ... American walnut stock and ... with ... backering ...



... adds does not significantly ... affect their appearance or ... performance.

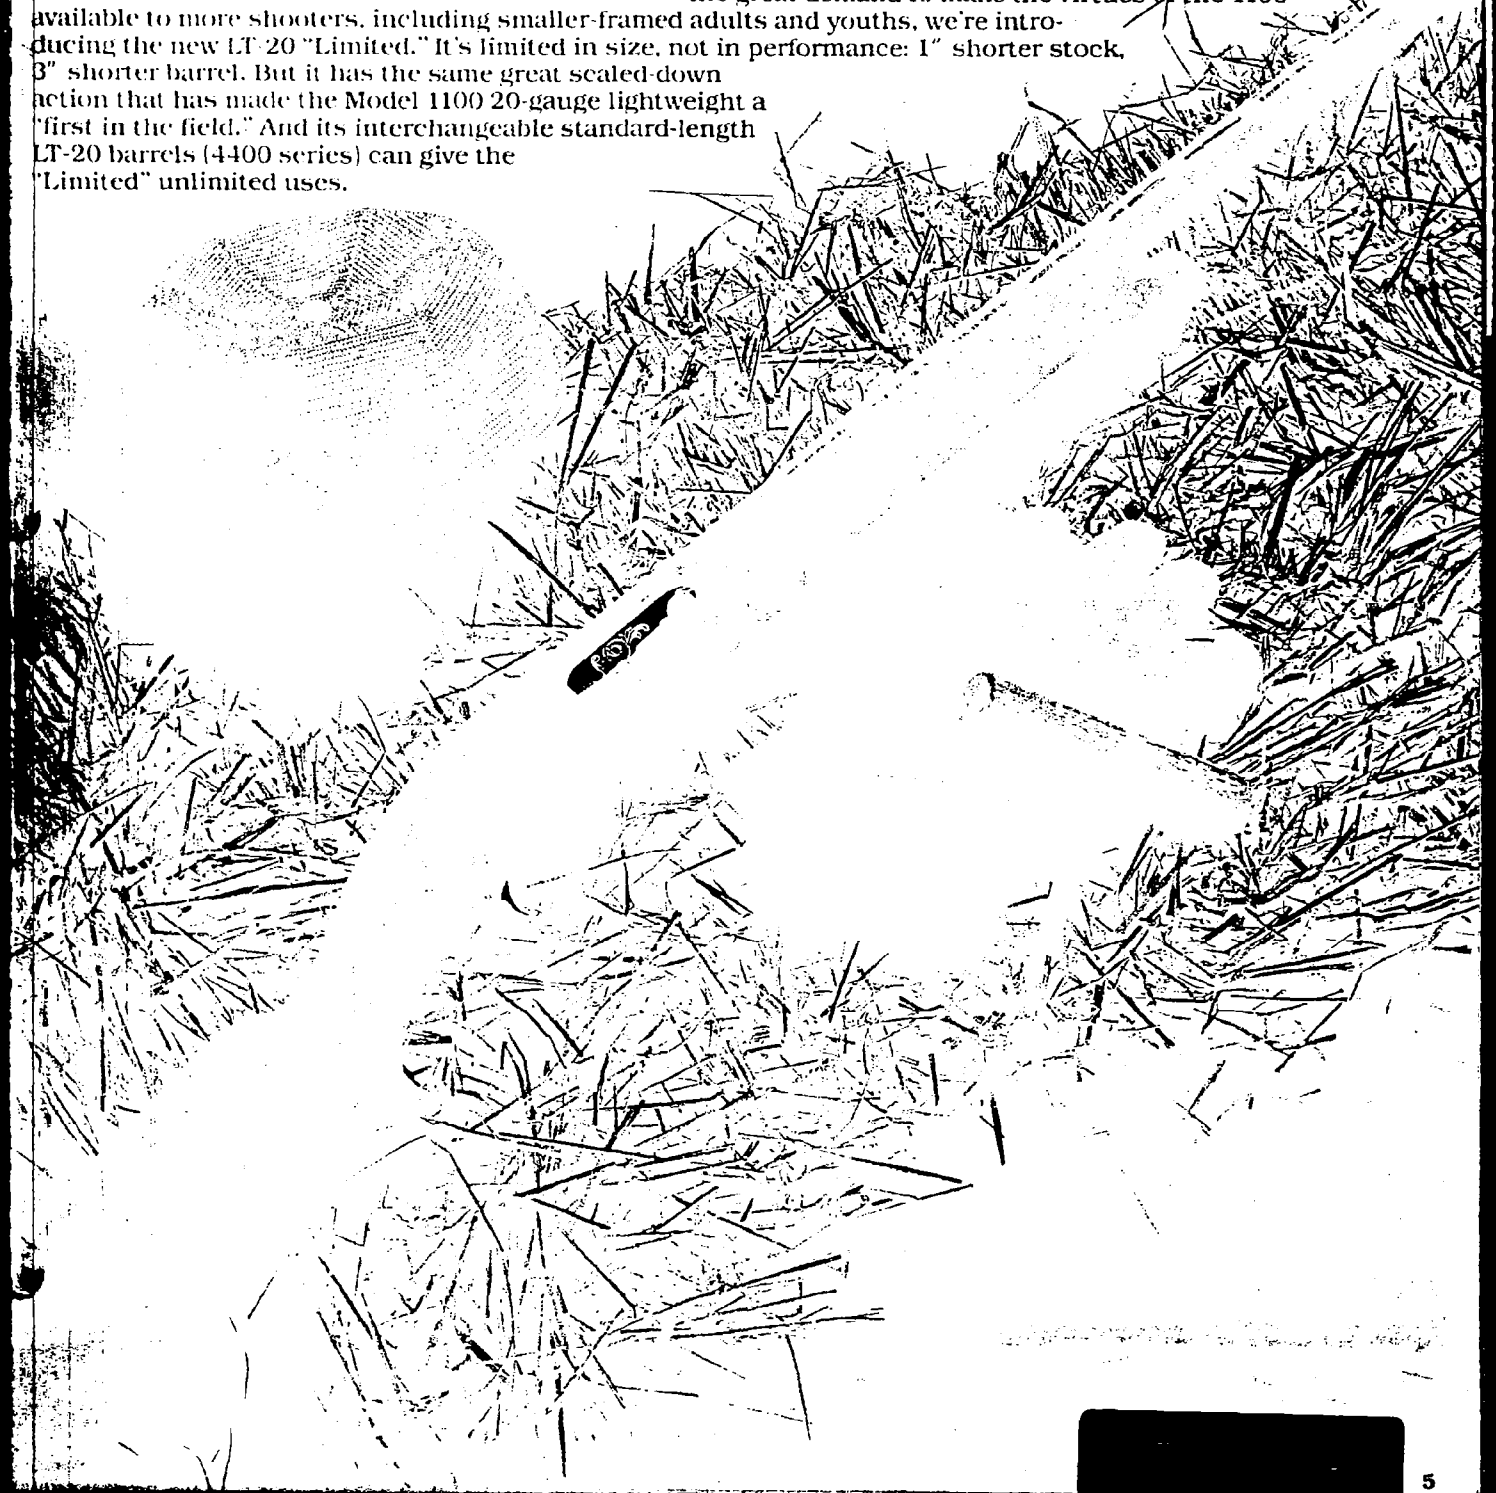
R2525532

The Model 1100 Field Grade Shotgun 1980

AN AUTOLOADING LEGEND.

We've been making autoloading shotguns successfully since 1905. Last year we introduced the second generation of our all-time favorite autoloader, the Model 1100. It featured refined checkering patterns, richer receiver scrollwork, deeper blueing. Sportsmen like you made it a success.

Naturally, all those qualities which kept the original 1100 first in the field must have helped. A low recoil sensation, superb balance, easy handling. Proven reliability. And choice. Now, in our diamond anniversary year for autoloaders, we're adding a new, lightweight 20 gauge 1100 to our line. The LT-20 "Limited." Because of the great demand to make the virtues of the 1100 available to more shooters, including smaller-framed adults and youths, we're introducing the new LT-20 "Limited." It's limited in size, not in performance: 1" shorter stock, 3" shorter barrel. But it has the same great scaled-down action that has made the Model 1100 20-gauge lightweight a "first in the field." And its interchangeable standard-length LT-20 barrels (4400 series) can give the "Limited" unlimited uses.



R2525533

1980

THE LEGEND & THE LIMITED.

Model 1100 ... interchangeable ... gauge, and .410 bore. When you add upwards of 52 different extra barrels, it means simply that there is an 1100 for everyone. For every kind of shotgun shooting sport. ... Extra interchangeable 2¾" chambered barrels ... for the 3" Magnum ... will ... hand ... ll 2¾ ... shotg ... shells.

Even ... Model ... 1100 has more than just an American walnut stock and fore-end, durable DuPont RK-W wood finish, and richer blueing. From the beginning, it's engineered tough. Both barrel and receiver start as solid billets of ordnance-quality chrome molybdenum steel. Action parts are vibra-honed for smoothness and to cut friction.

The unique gas-metering system makes this autoloader more than just reliable. It helps reduce recoil sensation to a gentle nudge, not a knock. This lets you concentrate on your target, and helps you shoot better.

The 1100s are well-balanced, easy-handling, comfortable guns in any gauge. Even more so now with the new 20 ga. lightweight, the LT-20 "Limited."

All Model 1100s have a positive cross-bolt safety, and a metal bead front sight. All models except .410 bore have a 4-shot capacity (3-shot plug furnished). The .410s hold four 3" shells.

The barrels on current Remington Model 1100 shotguns are of sufficient thickness and hardness that the repeated use of factory-loaded steel shot loads does not significantly affect their appearance or performance.

The scaled-down 1100s. The LT-20 (20 ga.), 28 ga., .410 bore. The LT-20, 20 ga. Lightweight Magnum takes 3" and 2¾" magnum shells and has a recoil pad.

Remington Shotgun Barrels:

IT'S LIKE GETTING ANOTHER GUN FOR THE PRICE OF AN EXTRA BARREL.

1980

There's no easier or better way to add to the enjoyment and versatility of your Model 1100 or 870 than to get one or more extra barrels.

Now your field gun can become a target gun, a goose gun can become an ideal deer gun—you're the boss when you own the special extra barrel needed to do the job.

And Remington gives you today's widest choice. There are even several left-hand barrels for the left-hand versions of our Models 870 and 1100.

Remember one thing. Barrels must be matched to the correct receiver, and within gauges. Extra interchangeable 2¾" chambered barrels, available for 3" Magnum receivers, will handle all 2¾" shotgun shells.

Learn more: see your dealer's new Remington Extra Barrel Selector.

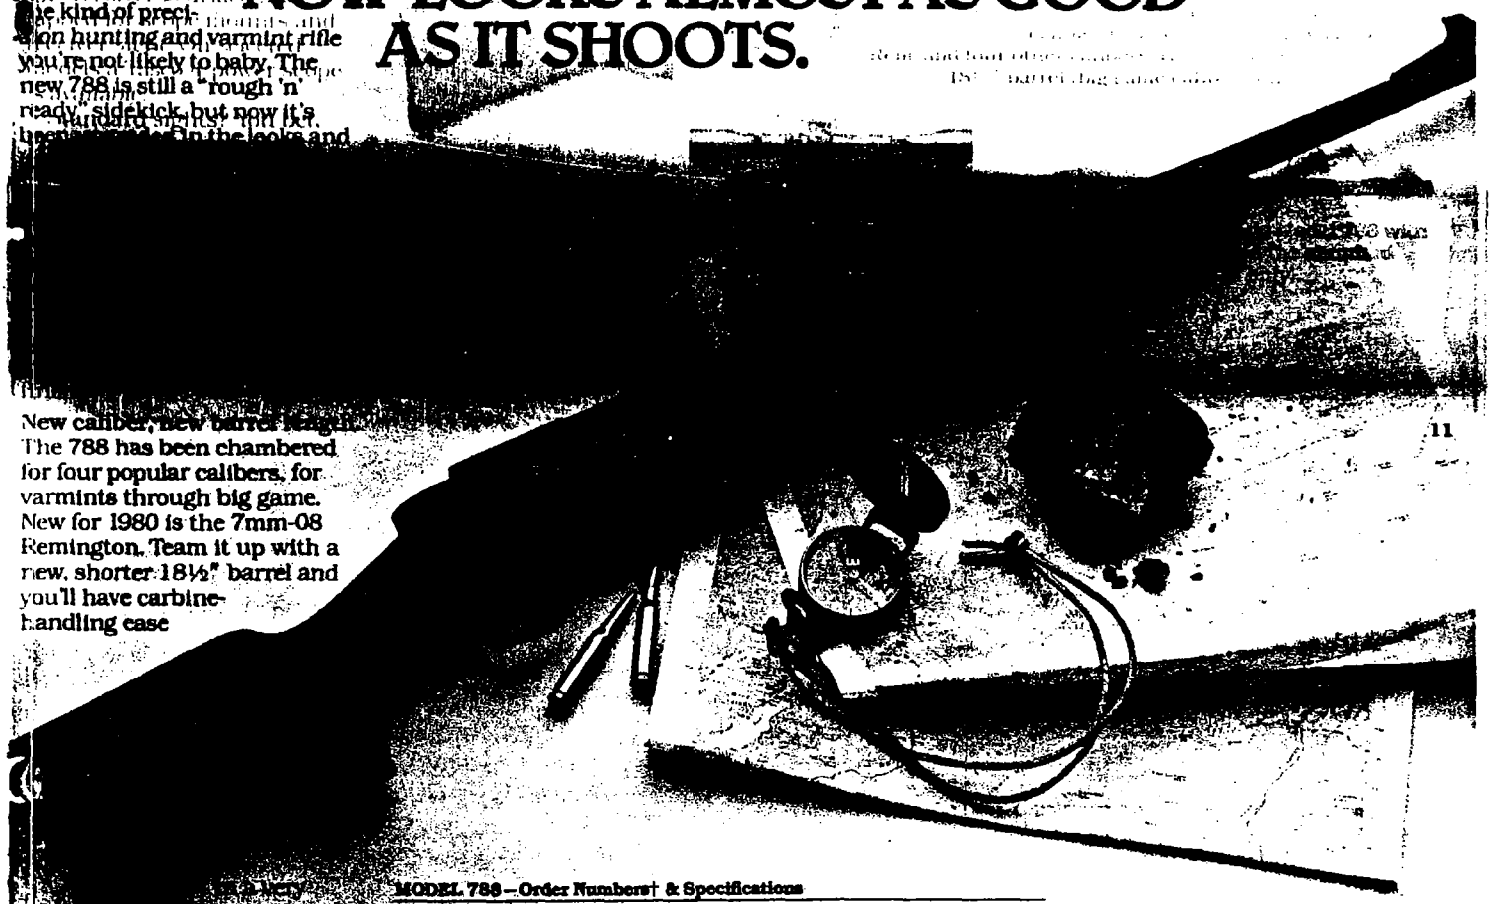
The new Model 788 rifle:

THE WORKHORSE NOW LOOKS ALMOST AS GOOD AS IT SHOOTS.

1980

Always renowned for accuracy, our Model 788 has also earned its keep as the kind of precision hunting and varmint rifle you're not likely to baby. The new 788 is still a "rough 'n' ready" sidekick, but now it's [illegible] on the looks and



New caliber, new barrel length. The 788 has been chambered for four popular calibers, for varmints through big game. New for 1980 is the 7mm-08 Remington. Team it up with a new, shorter 18½" barrel and you'll have carbine-handling ease

11

A very potent new hunting caliber. The 7mm-08 Rem. makes the most of the larger capacity of a necked-down 308 Win. case and the higher retained velocity and energy of the popular 7mm bullet.

Strength meets good looks. The Model 788 still has the same tough receiver, milled from a solid ordnance-steel billet. It still has the nine locking lugs for utmost strength. The receiver is drilled and tapped for scope mounts and receiver sight. On selected models a Tasco 4-power scope is available.

Standard sights: [illegible] There's a blade-ramp front sight [illegible] There's [illegible] with [illegible] the [illegible] rust-and-glare-resistant [illegible]

Take a closer look at the 788. The workhorse never looked better.

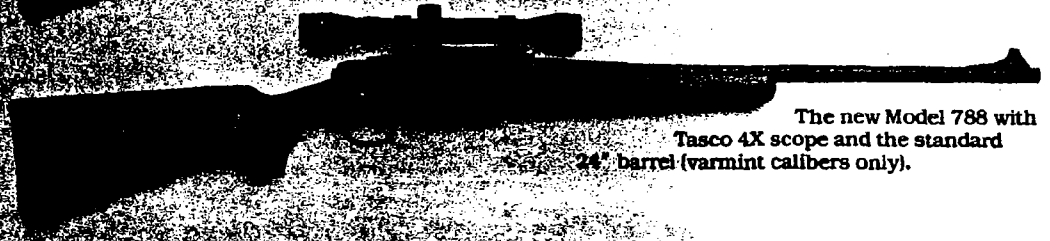
The new Model 788 is now chambered in the new 7mm-08 Rem. and four other calibers. Here's the new 18½" barrel (big game calibers only).



The new Model 788 with Tasco 4X scope and the standard 24" barrel (varmint calibers only).

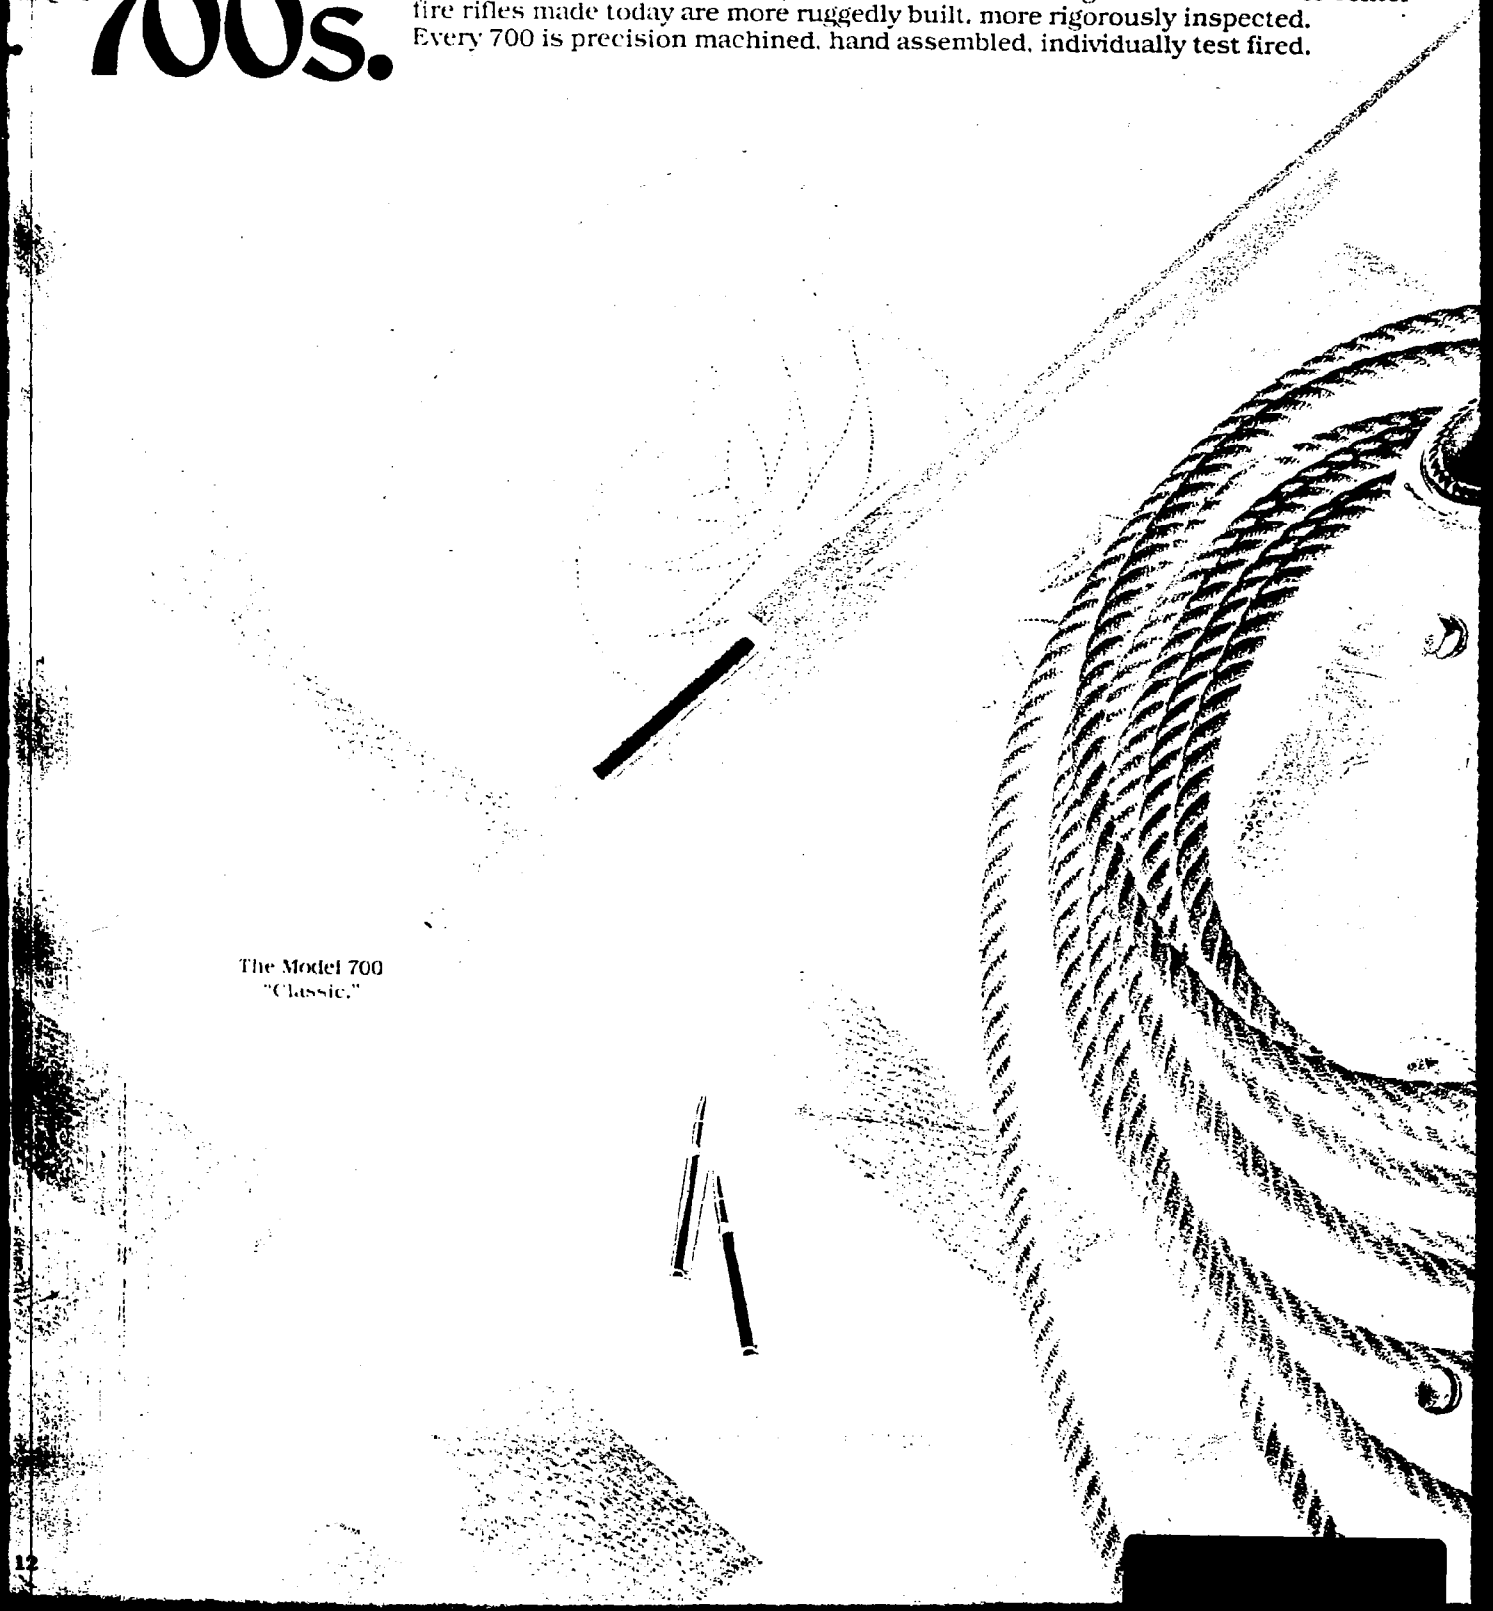
R2525539

The ultimate center fire rifles:

THE MAGNIFICENT 700s.

We didn't ma[1980]0 first in the field: sportswriters and hunters like you did. Today the family of 700s are the world's most popular center fire, bolt action rifles, because they alone give you an unparalleled combination of accuracy, dependability, classic good looks, long-lasting value, and choice.

Take your pick from seventeen different calibers, from super-accurate varmint and metallic silhouette calibers on up to those able to handle the largest North American and African game. No other center fire rifles made today are more ruggedly built, more rigorously inspected. Every 700 is precision machined, hand assembled, individually test fired.



The Model 700 "Classic."

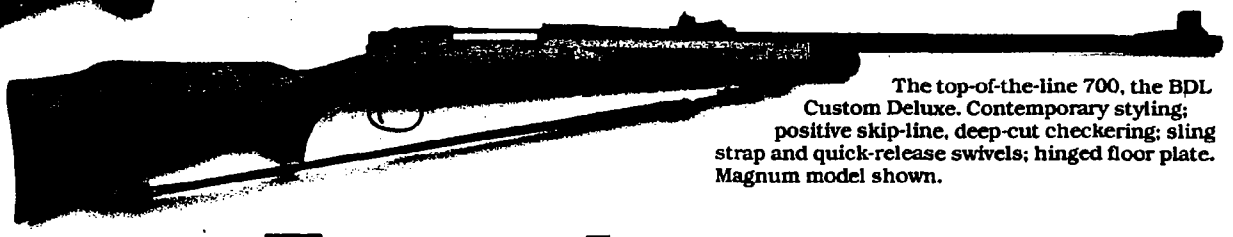
R2525540

1980

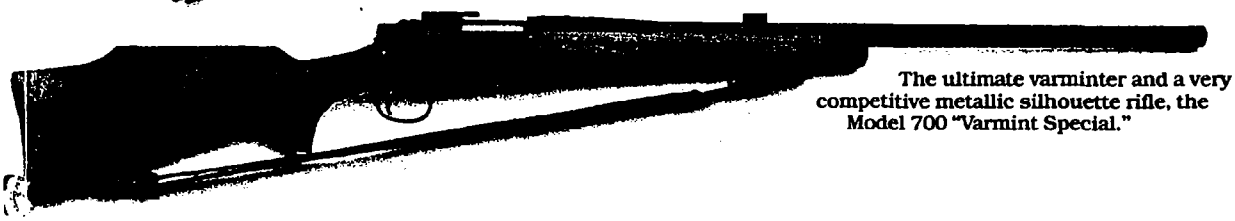
The 700 action. Clearly, it's one of the strongest ever designed. Bolt face, barrel, and receiver surround the cartridge head with three rings of solid steel. There's not a single extractor cut to weaken it. The receiver itself is machined from a single billet of ordnance-quality steel, then vibra-honed for smooth functioning. Every 700 also has a polished anti-bind bolt.

Our value-packed 700, the ADL. It's the least expensive, but we didn't cut any corners.

Our traditional 700, the "Classic." Clean, subtle elegance in a very businesslike rifle.



The top-of-the-line 700, the BDL Custom Deluxe. Contemporary styling; positive skip-line, deep-cut checkering; sling strap and quick-release swivels; hinged floor plate. Magnum model shown.



The ultimate varminter and a very competitive metallic silhouette rifle, the Model 700 "Varmint Special."

The models. When you consider buying a Model 700, you not only get a wide choice of calibers. You get a choice in appearance. From the traditional styling of our 700 "Classic," the custom-styled 700 BDL and "Varmint Special," to the value-conscious good looks of our 700 ADLs.

Our top-of-the-line BDLs and the heavy-barreled "Varmint Specials" feature a Monte Carlo walnut stock, full cheekpiece, positive-cut skip-line checkering, hinged floor plate, sling strap, and quick-release swivel.

The "Classic" is just that. Non-Monte Carlo stock, simple but elegant full-pattern cut checkering, improved satin wood finish, highly polished blueing, its own brown rubber butt pad, sling-swivel studs, hinged floor plate.

Our value-leading ADL model has custom skip-line checkering on its American walnut stock and a hand-applied DuPont RK-W wood finish. It's available in ten hardworking calibers.

All Model 700s have a receiver drilled and tapped for scope mounts and receiver sights. Magnum models feature presentation-style recoil pads.

New caliber, new sporting possibilities. The Model 700 "Varmint Special" is now chambered for the new 7mm-08 Remington. Here's a great off-the-shelf combination for serious metallic silhouette shooters.

Sights and safeties. The ADL features a blade-ramp front sight with flat-faced gold bead. The BDL's sight is hooded. Rear sights on ADLs and BDLs are adjustable for elevation and windage. All sights are removable. "Classic," C "Custom," and "Varmint Special" models have no sights; the latter is fitted with front and rear target-rifle scope blocks.

The safeties on all Model 700s are the fast, positive thumb-type. Left-hand models have a left-thumbed safety.

R2525541

The Model 742 and Model 760 Rifles:

10-POINT FAVORITES.

1980

When that big 10-point buck makes a mistake and heads your way, you can't afford to make one. You need a center fire rifle that's accurate, fast handling, dependable. One that can give you extra *aimed* shots, if needed, in split seconds.

We've got a pair of firsts for the field. The world's best-selling center fire autoloader, the Model 742. And the best-selling pump, the Model 760.

The Model 742 "Woodsmaster." This is the brush-bred autoloader with the smooth, reliable gas-operated action that reduces recoil sensation to a gentle push. That helps you keep your head down, lets you get off extra shots accurately, easily, naturally.

The 742 has a tough, rotating artillery-type bolt with multiple locking lugs to handle big game calibers. When it comes to choice, the "Woodsmaster" is available in five popular calibers. There are also carbine and left-hand versions available.

The **Model 760 "Gamemaster."** Here's the perfect whitetail pump: its smooth action, aided by twin action bars and vibra-honed internal parts, lets you shoot as fast as you can pump and pull the trigger. The rifle stays in a natural shooting position. Your finger never leaves the trigger, never gets pinched by a lever.

The 760's strength comes from a receiver, like the 742's, machined from a solid-steel billet. It also features an artillery-type bolt. The "Gamemaster" is available in a wide choice of popular hunting calibers, including left-hand models, and in two carbine calibers.

Stocks, sights, and safeties. Both Models 742 and 760 have rich American walnut stocks and fore-ends. Standard models feature distinctive skip-line checkering; deluxe BDL models have Monte Carlo stocks, with full cheekpieces, basketweave checkering.

All our [illegible] have blade front sights, sliding-ramp rear sights. All easily-removable for scope mounting. Receivers are already drilled and tapped for scopes.

All four versions employ positive cross-bolt safeties; left-hand BDL models have left-hand safeties. In both pump action and autoloading models you have a 5-shot capacity (4 in the removable clip, 1 in the chamber).

R2525543

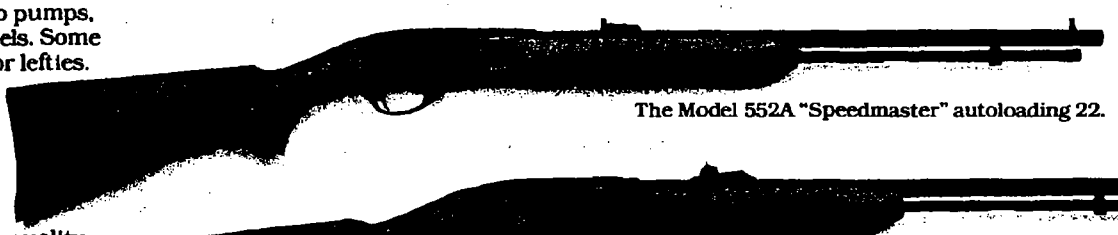
The widest choice in 22-cal. rifles:

1980

AUTOS, BOLTS, & PUMPS APLENTY.

From the serious small game hunter or precision target shooter to the casual weekend plinker, there's a Remington 22 for just about everyone. All 100% American made. American serviced.

Choose your action. We have eight autoloaders, two pumps, eight bolt action models. Some have scopes. One is for lefties. Two are downsized for younger shooters. One, our famous "Nylon 66," is so durable it carries a lifetime stock warranty. Choice and American quality make our family of 22s first in the field.

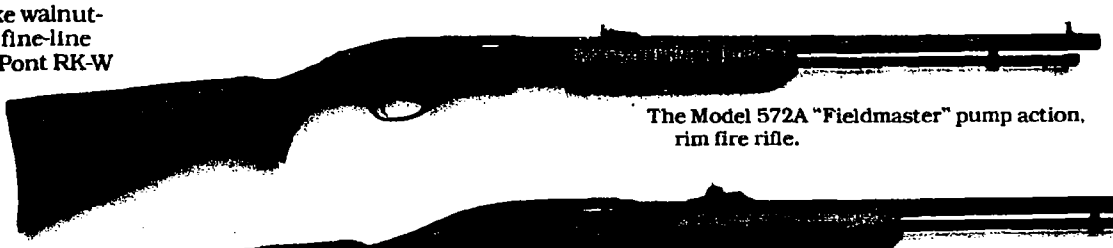


The Model 552A "Speedmaster" autoloading 22.

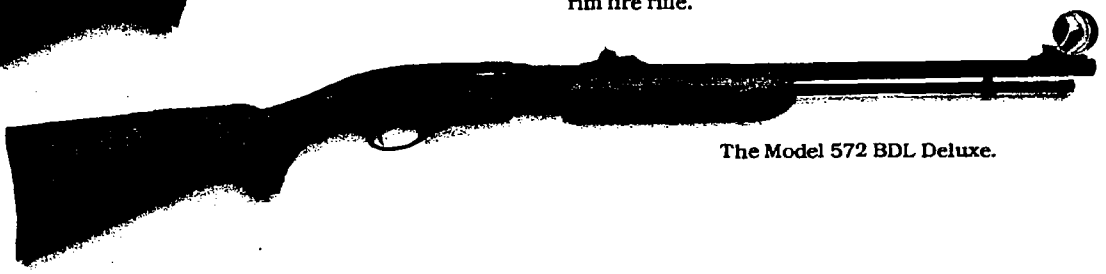
The Model 552 BDL Deluxe.

The autoloaders. The Remington 552 "Speedmaster" is the only 22 autoloading rifle that shoots Short, Long, and Long Rifle cartridges interchangeably. The deluxe walnut-stock BDL model has fine-line checkering, a rich DuPont RK-W wood finish, and sights you'd expect on a big game rifle. The standard Model 552A has an adjustable rear sight, bead front sight. Its stock is walnut-finished hardwood.

The tubular magazine holds 20 Short, 17 Long, or 15 Long Rifle cartridges. With the tube out, you've got an ideal single-shot rifle for beginners. Both models feature a receiver grooved for tip-off scope mounts. And positive cross-bolt safeties.



The Model 572A "Fieldmaster" pump action, rim fire rifle.



The Model 572 BDL Deluxe.

The pump-actions. Remington builds the only 22 pump made in America, the Model 572 "Fieldmaster." Like our Model 552 autoloaders, our pump accepts all three lengths of 22 cartridges interchangeably. The BDL grade has the custom checkering, the wood finish, and the sights of our best big game pumps. Even the budget-minded 572A model has clean, crisp styling. Its plain walnut-finished hardwood stock invites abuse; it's built to take it. The Model 572's capacities, sights, and safeties are identical to those of the 552 autoloader.

Our basic bolt-actions. The Model 581 and 582 rim fire rifles give you quite a choice. Use the 581 as a 6-shot repeater, or convert it in minutes to a beginner's single-shot. The adapter is furnished. The 582 features a magazine tube which takes up to 20 Short, 15 Long, or 14 Long Rifle cartridges.

Both rifles have a walnut-finished Monte Carlo stock, an ordnance-steel receiver grooved for a scope, and adjustable sights. The Model 581 is available in a shorter stock version for younger shooters.

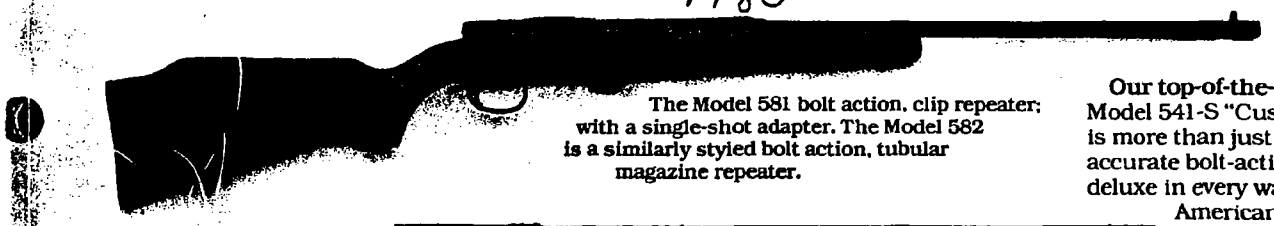
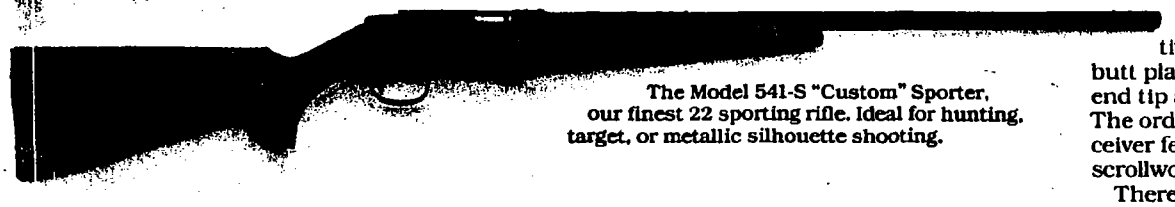
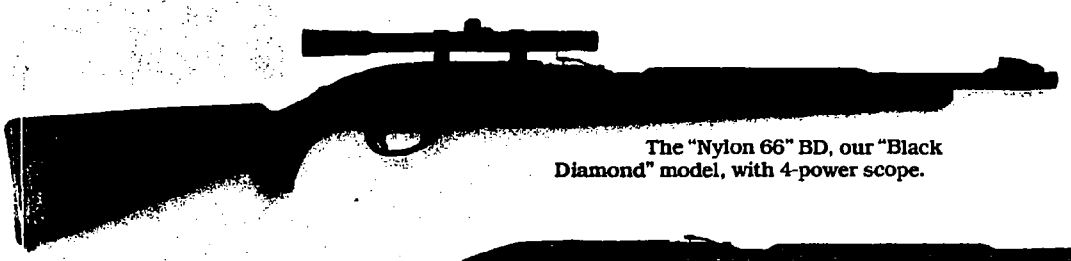
1980



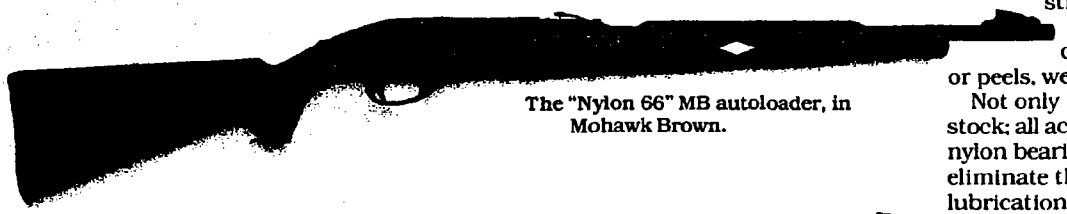
The Model 581 bolt action, clip repeater; with a single-shot adapter. The Model 582 is a similarly styled bolt action, tubular magazine repeater.



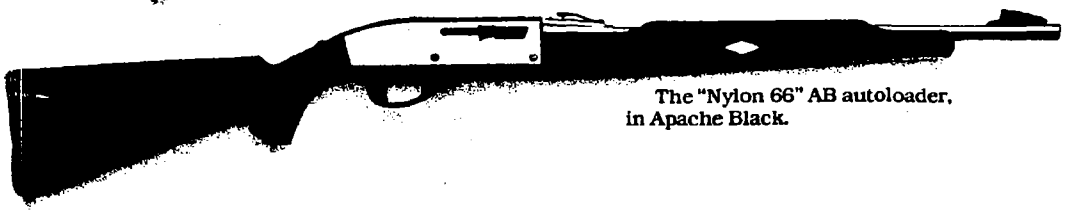
The Model 541-S "Custom" Sporter, our finest 22 sporting rifle. Ideal for hunting, target, or metallic silhouette shooting.



The "Nylon 66" BD, our "Black Diamond" model, with 4-power scope.



The "Nylon 66" MB autoloader, in Mohawk Brown.



The "Nylon 66" AB autoloader, in Apache Black.

Our top-of-the-line 22. The Model 541-S "Custom" Sporter is more than just a superbly accurate bolt-action 22. It's deluxe in every way. Its quality American walnut stock has fine-line, positive-cut checkering. Its butt plate, grip cap, and fore-end tip are rosewood-finished. The ordnance-quality steel receiver features decorative scrollwork engraving.

There's more. The 541-S has an adjustable match trigger, artillery-style bolt with six locking lugs, and double extractors. Its receiver is drilled and tapped for scope mounts.

The lifetime 22s. When you buy a "Nylon 66" autoloader, you own the world's most durable rim fire rifle. It's the only one made that carries a lifetime warranty on its Du Pont "Zytel" structural nylon stock. If it ever warps, cracks, chips, fades, or peels, we'll replace it. Free.

Not only is there nylon in the stock; all action surfaces ride on nylon bearings to positively eliminate the need for internal lubrication.

Our "Nylon 66" rifles are available in six models, in two stock colors. You can choose some with 4-power scopes for even greater accuracy. One, our Gallery Special model, shoots 22 Shorts; all others have a capacity of 14 Long Rifle cartridges. Remove the tube and you have a fine single-shot 22.

1980

TACK-DRIVING ACCURACY.

Rifle shooters and handgunners are getting into the exciting target sport of metallic silhouette in such record numbers, we had to be impressed.

So for 1980, we're giving serious target shooters more of what they've asked for. For all kinds of metallic silhouette, benchrest, and position-target events.

Take our new Model 700 "Varmint Special," chambered for the innovative, new 7mm-08 Remington. Now the 700 action, known for years as the ultimate in bolt-action strength and accuracy, is available in a great new caliber that's as good for targets as it is for hunting. Even the stock has been specially selected for weight to meet strict competitive requirements.

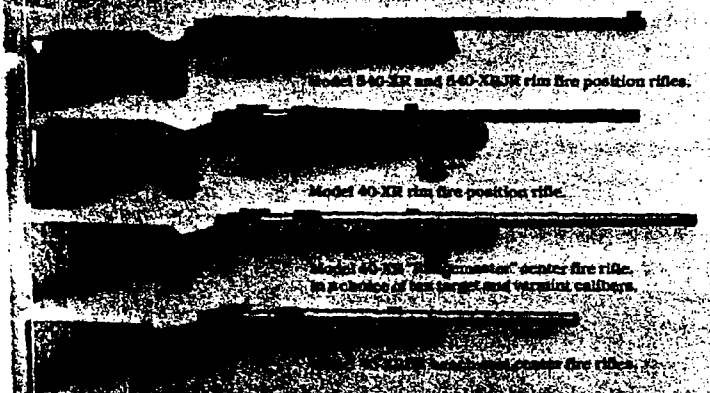
The 7mm-08 Remington cartridge, with its 140 grain pointed soft point bullet, gives metallic silhouette shooters the predictable accuracy and high retained energy they need for targets up to 600 meters.

New, too, is the Model "XP-100" Silhouette target pistol, designed especially for metallic silhouette events. The same XP-100 action, the basis for many of the finest custom target pistols, is teamed up with a longer 15" barrel. Fitted with a sight ramp, it's also drilled and tapped to permit easy mounting of your own sights.

The ideal metallic silhouette caliber in one of the most accurate rifles ever made: the Model 700 "Varmint Special," in 7mm-08 Rem.
Note: Metallic silhouette rifle rules do not permit the use of rifle slings.

The new "XP-100" Silhouette is chambered for an ideal metallic silhouette caliber, the 7mm Bench Rest Remington. For more on our Bench Rest System, see the next page.

Now, for about half the cost of a custom-made pistol and without the wait you can really make your mark. The "XP-100," in 7mm BR Rem.



Model 540-XR and 540-XBR rim fire position rifles.

Model 40-XR rim fire position rifle.

Model 40-XB "Rangemaster" center fire rifle, in a choice of two target and varmint calibers.

The Model 540-XR and 540-XBR.
These rifles, chambered for the 22 Long Rifle cartridge, feature a position-style Monte Carlo stock with a checkpiece, thumb groove, five-way adjustable butt plate, and full-length guide rail. Front swivel block, sling, and swivels are optional extras. There is a common sight alignment with a rear peep or iron sights. The trigger is adjustable from 1 to 5 lbs. Both models have a 26" medium weight target barrel, countersunk at the muzzle.

The Model 40-XR.

This single-shot 22 Long Rifle position-target rifle has a position-style stock with a front swivel block on a fore-end guide rail. These rifles, built one at a time in our custom shop, also feature thumb grooves, adjustable combination hand stops and sling swivels, and two-way vertically adjustable butt plates. Triggers are adjustable from 2 to 4 lbs. Receivers are drilled and tapped for receiver sights. Target scope blocks are installed.

The Model 40-XB "Rangemaster."

Here's the center fire rifle that's as much at home taking varmints as it is taking trophies. It's available as a single-shot in all these calibers: 222 Rem., 22-250 Rem., 243 Win., 6mm Rem., 25-06 Rem., 7mm Rem. Mag., 7.62mm NATO (308 Win.), 30-06, 30-338 (30-7mm Mag.), 300 Win. Mag. Or, at an extra charge, as a repeater in these calibers: 222 Rem., 22-250 Rem., 243 Win., 6mm Rem., 7.62mm NATO (308 Win.).

The 40-XB receiver, bedded to the stock, is drilled and tapped for scope block and receiver sights. Target scope blocks are installed.

Other features include a match-type trigger, adjustable from 2 to 4 lbs. The weight of pull can be changed externally. A special 2-oz. trigger, which does not have a safety, is available on single-shot models only, at extra charge.

The distinctive, unblued stainless steel barrel is free-floating, drilled and tapped for scope block and iron front target sight.

The Model 40-XBBR.

The same basic rifle as our Model 40-XB "Rangemaster," the XBBR is chambered primarily for bench-rest target shooting. Available only as a single-shot, you can order the 40-XBBR in these calibers: 22 BR Rem., 222 Rem., 223 Rem., 6x47, 6mm BR Rem., and 7.62mm NATO (308 Win.).

The 40-XBBR has a matched trigger, adjustable from 1½ to 3½ lbs. A special 2-oz. trigger is optional at extra cost.

The Model 40-XC National Match Course Rifle.

Our center fire 40-XC has the same improved position-style stock as our rim fire 40-XR rifle, which is pictured. The 40-XC is available as a 5-shot bolt action repeater in 308 Win. (7.62mm NATO). Its receiver is drilled and tapped for metallic sights; scope-mount bases are installed. The trigger is adjustable from 2 to 4 lbs.

R2525546

1980

New barrel, new caliber, same award-winning action: the new Model "XP-100" Silhouette target pistol, now in 7mm Bench Rest Rem.

The Model "XP-100," now in two models.

This is the unique single-shot center fire, bolt action pistol that has become a legend for its strength, precision, balance, and accuracy. It is still chambered for the 221 Remington "Fire Ball" in its vent rib 10½" barrel. Now you can also get the "XP-100" Silhouette with a 15" barrel in the 7mm Bench Rest Remington caliber. This could be the perfect factory-made metallic silhouette handgun.

Both "XP-100s" have a one-piece DuPont "Zytel" stock with universal grip, two-position thumb safeties; receivers drilled and tapped for scope mounts or receiver sights, and match-type grooved triggers.

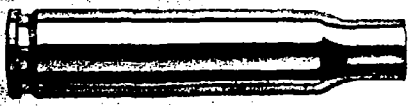
The new 7mm-08 Remington cartridge.

For 1980, Remington will be chambering two of our center fire rifles in this potent new caliber. One is our superaccurate Model 700 "Varmint Special"; the other is our newly designed, economical Model 788. This new caliber should become a hit with metallic silhouette shooters and hunters of a wide range of medium-sized North American game. The 7mm-08 Rem. is a compact package that's perfect for short-action and shorter-barreled guns: its 140 grain bullet optimizes the downrange ballistics and retained energy of its shorter case. Check the numbers for yourself on pages 26-27.
Order Number: 7M081.

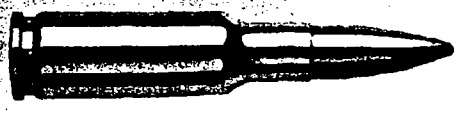
The new 7mm-08 Rem. 140 grain.

The Bench Rest Remington, the case for winning.

Remington now offers you a most innovative, universal unprimed brass case. A 308 Win. case, which can be shortened to 1.520", has thinner walls and is specially annealed for case forming. By necking it down to fit .224, .243, 6mm, or 7mm bullets, you have the makings of a truly great bench-rest and metallic silhouette cartridge. Remington also makes the small No. 7½ primers that withstand the higher-pressure loads of this combination.
Order Numbers: Unprimed BR case—URBR; No. 7½ small rifle primers—X22628.



The Bench Rest Remington case, ready for sizing.



The necked-down Bench Rest case, sized for 7mm bullets.
NOTE: The 7mm BR Remington is not available as a factory-loaded cartridge

2 1984. INTRODUCING THE MODEL

From now on, even the fastest game will seem a little slower.

When a white flag suddenly flashes through the brush and a big buck becomes a blur, you need a center fire rifle that comes up fast. And gives you the quickest second shot in the business.

Remington's new Model Four autoloading and Model Six pump-action rifles do all that and more, shot after shot. Without your eyes once leaving the target, or your cheek leaving the stock.

Hot on the heels of the most successful center fire autoloaders and pumps in history, these two new rifles took six long years to design, test, and produce to Remington standards.

The autoloader's gas-metering system has been completely redesigned for added smoothness and reliability. The bolt design on both rifles has been engineered to provide a smoother, more dependable action. The bolts now have massive locking lugs similar to those of bolt-action rifles.

Everything about these ne rifles has been engineered fo speed, for smoothness, for dependability. Because we know there are times when you might need a fast, aimed extra shot. Along the way, we stubbornly stuck to a major objective—to create two rifles that, even on the closest examination, would have the look.

THE NEWS ABOUT

Words alone cannot tell the whole story of how we've made the Model Four autoloader and Model Six pump-action the sweetest-handling, most reliable rifles in their action types. Bar none.

For strength, the new bolts have been engineered with locking lugs similar to those on bolt-action rifles.

There's a new degree of smoothness and dependability in the autoloader's redesigned gas-metering system, too. And refinements in the pump-action Model Six make its double action bars slide faster, with far less effort than you'd ever imagine.

Great strides have been made in handling and pointability, too. Both rifles come up fast and balanced, thanks to substantial changes in stock dimensions and weight distribution. Both the Model Four and Six feature Monte Carlo stocks with functional, full cheekpieces; stylish curved pistol grips; and trend-setting flared fore-ends. The grip is further enhanced by rich, positive-cut checkering.

An added custom feature is a cartridge head that's imbedded in blued steel, just forward of the receiver.

Other changes include a beefier, smoother-functioning magazine release. And a redesigned magazine that has a faster-feeding lip. The magazine is built of a heavier-gauge steel and holds four cartridges.

Blade-ramp front sights and adjustable sliding-ramp rear sights are standard. Receivers are drilled and tapped for scope mounts. A positive safety switch is fitted to all models.

One more point. *Perhaps most important of all, every part of every Remington firearm and ammunition product is made by American craftsmen. Right here in the United States of America. That's one sure way to keep all of us first.*

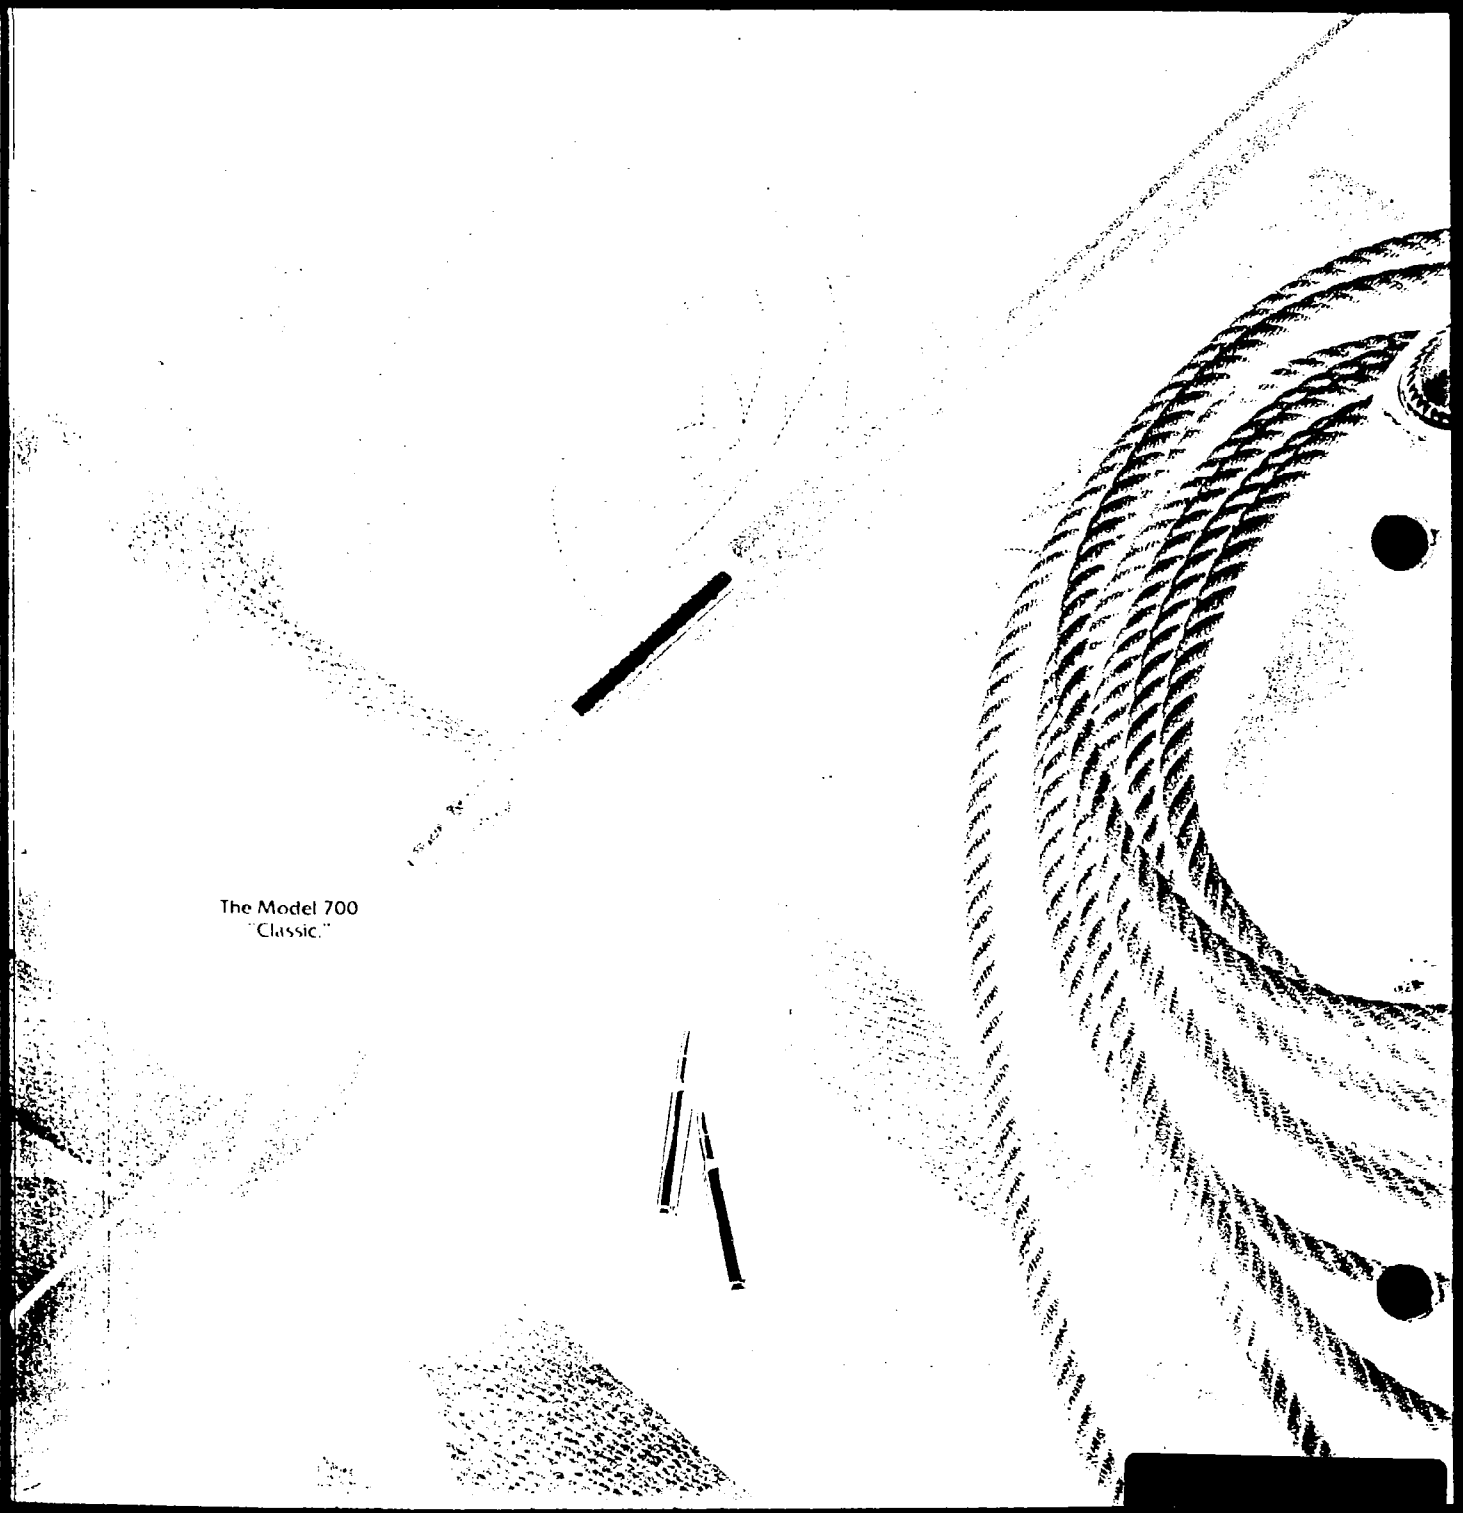
1981.

THE MODEL 700: KING

Sportswriters and hunters like you have made the Model 700 line the royal family of center fire rifles. They've become America's most popular bolt-actions, because they give you the right combination of accuracy, dependability, good looks, long-lasting value, and choice. From the superaccurate varmint and metallic silhouette calibers to rifles able to handle the largest North American and African big game, there's a 700 for you. No other center fire rifles in their class are more ruggedly built, more rigorously inspected. Every one is precision machined, hand assembled, and individually test fired. And it's all done right here in the United States of America.

The 700 action. Clearly, it's one of the strongest ever designed. Bolt face, barrel, and receiver surround the cartridge head with three rings of solid steel. There's not a single extractor cut to weaken it. The receiver itself is machined from a single billet of ordnance-quality steel, then vibra-hon for smooth functioning. Every 700 also has a polished anti-bind bolt.



The Model 700 "Classic."

R2525553

e models. When you con- buying a Model 700, you not only get a wide choice of calibers. You get a choice of styles. From the traditional looks of our 700 "Classic," the custom-styled 700 BDL and "Varmint Special" to the value-conscious good looks of our 700 ADLs.

Our value-packed 700, the ADL. It's the least expensive, but you wouldn't know it to look at it.

Our traditional 700, the "Classic." Clean, subtle elegance in a very businesslike rifle.

The top-of-the-line 700, our BDL Custom Deluxe. Contemporary styling, positive skip-line checkering, and more. Now available in 7mm-08 Rem. (Magnum model with recoil pad shown.)

The ultimate varminter and a very competitive rifle for metallic silhouette shooting: the Model 700 "Varmint Special."

Our top-of-the-line BDL and the heavy-barreled "Varmint Special" feature a Monte Carlo walnut stock, full cheekpiece, positive-cut skip-line checkering, black fore-end tip, high-lustre blueing, hinged floor plate, sling strap, and quick-release swivel.

Famous outdoor writer Jim Carmichel says: "The Remington Classic' is probably the best looking, most shootable, hunting rifle ever offered by an American firearms maker." It features an American walnut stock, simple but elegant full-pattern cut checkering, a special satin wood finish, highly polished blueing, its own brown rubber butt pad, sling-swivel studs, and a hinged floor plate.

Our value-leading ADL model has custom skip-line checkering on its American walnut stock and a hand-applied DuPont RK-W wood finish. It's available in seven hardworking calibers.

All Model 700s have a receiver drilled and tapped for scope mounts and receiver sights. Magnum models feature presentation-style recoil pads.

Center fire barrels are made of special Remington steel. The way they're made and what they're made of help make the 700s so accurate.

Sights and safety switches. The ADLs feature a blade-ramp front sight with flat-faced gold bead. The BDL's front sight is hooded. Rear sights on ADLs and BDLs are adjustable for elevation and windage. All sights are removable. "Classic" and "Varmint Special" models have no sights; the latter is fitted with front and rear target-rifle scope blocks. Model 700 C "Custom" sights are optional.

The safety switch on each Model 700 is the fast, positive thumb-type. Left-hand models have a left-hand safety switch.

Ask your Remington dealer or gunsmith about the bolt-action rifle all others are measured by: the Model 700.

Model 40-XR rim fire position rifle.

Model 40-XB "Rangemaster" center fire rifle is available in ten target and varmint calibers.

Model 40-XBBR bench-rest center fire rifle.

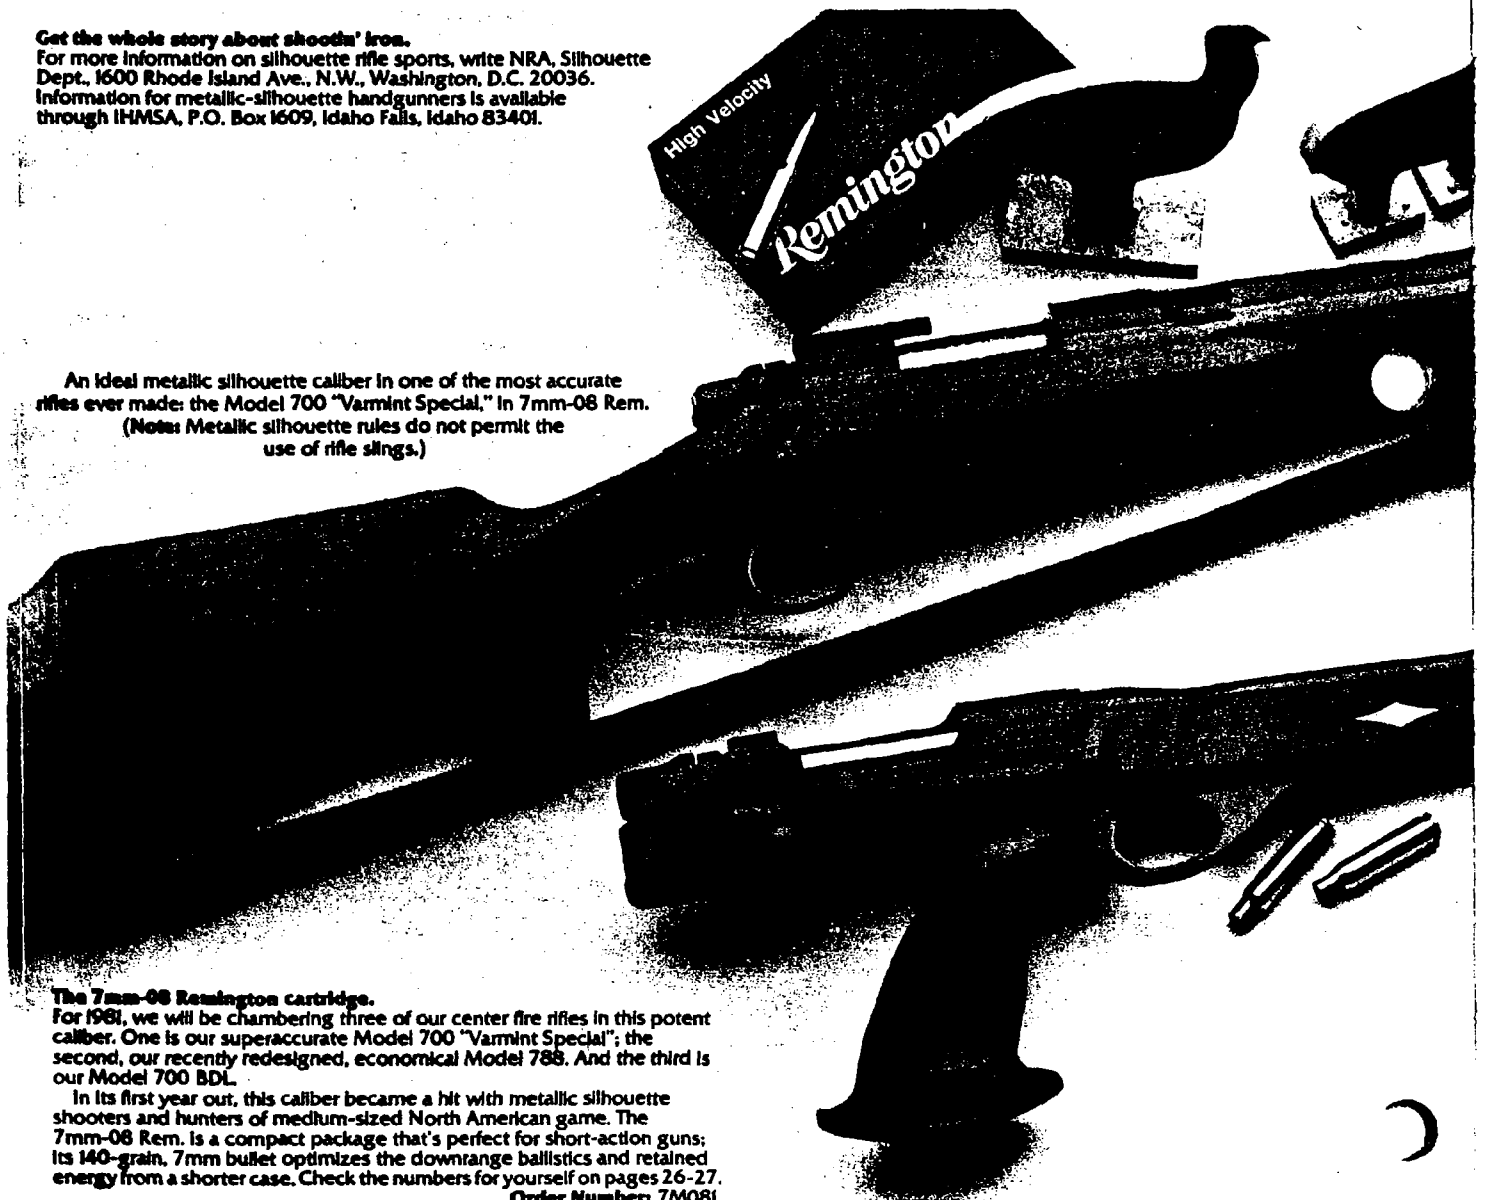
Remington has what you need when you're shootin' iron. Or out to set records in any other precision target sport. **Introducing the "Rambusters."** It's a whole Remington family of matched firearms, ammunition, and components. All designed to work together, to improve your odds in all metallic silhouette events.

Take our "XP-100" Silhouette. This center fire pistol with an action that's long been the basis for many custom-made competition guns, has been specially refined for metallic silhouett shooting. Right out of the b it's more gun than virtually any custom pistol you can buy. It has a 14¾" barrel, chambered for an ideal silhouette cartridge —the 7mm BR Remington.

Then there's the Model 700 "Varmint Special," chambered for the innovative 7mm-08 Rem. and the 308 Win. cartridges. Here the 700 action, renowned for its strength and accuracy, is yours in two great metallic silhouette calibers.

For metallic silhouette shoot-

Get the whole story about shootin' iron.
For more information on silhouette rifle sports, write NRA, Silhouette Dept., 1600 Rhode Island Ave., N.W., Washington, D.C. 20036. Information for metallic-silhouette handgunners is available through IHMSA, P.O. Box 1609, Idaho Falls, Idaho 83401.

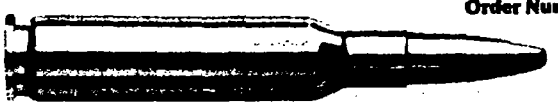


An ideal metallic silhouette caliber in one of the most accurate rifles ever made: the Model 700 "Varmint Special," in 7mm-08 Rem. (Note: Metallic silhouette rules do not permit the use of rifle slings.)

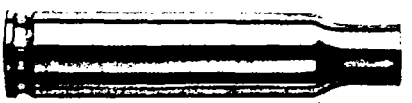
The 7mm-08 Remington cartridge.
For 1981, we will be chambering three of our center fire rifles in this potent caliber. One is our superaccurate Model 700 "Varmint Special"; the second, our recently redesigned, economical Model 788. And the third is our Model 700 BDL.

In its first year out, this caliber became a hit with metallic silhouette shooters and hunters of medium-sized North American game. The 7mm-08 Rem. is a compact package that's perfect for short-action guns; its 140-grain, 7mm bullet optimizes the downrange ballistics and retained energy from a shorter case. Check the numbers for yourself on pages 26-27.

Order Number: 7M081.



The 7mm-08 Rem. with 140-grain pointed soft point bullet.



The Bench Rest Remington case, ready for sizing.

R2525555

[illegible] in 22-caliber, Remington [illegible]rs you the Model 541-S "Custom" Sporter. For more information on it, see p. 17.

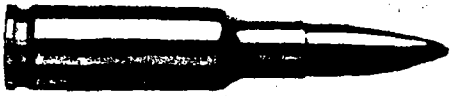
Remington also offers the bench-rest and position target shooter a full spectrum of rim fire and center fire rifles. We invite you to read more about them below.

The Models 540-XR & 540-XRJR.
These single-shot 22 L.R. target rifles feature a position-style Monte Carlo stock, with a cheekpiece, thumb groove, five-way adjustable butt plate, and full-length guide rail. Front swivel block, sling, and swivels are optional extras. There is a common sight alignment with scope or iron sights. The trigger is adjustable from 1 to 5 lbs. Both models have a 26" medium-weight target barrel, countersunk at the muzzle. The 540-XRJR model has a 1¾" shorter stock.

The Model 40-XR.
This single-shot 22 Long Rifle target rifle has a position-style stock with a front swivel block on a fore-end guide rail. These rifles also feature thumb grooves, adjustable combination hand stops, and sling swivels, plus two-way vertically adjustable butt plates. Triggers are adjustable from 2 to 4 lbs. Receivers are drilled and tapped for receiver sights. Target scope blocks are installed.

One of the metallic silhouette shooter's favorite handguns: the Model "XP-100" Silhouette, in 7mm Bench Rest Rem.

The case for winning: the Bench Rest Remington.
In 1979 we introduced an innovative universal unprimed brass case that starts with the external configuration of the 308 Win. case. With thinner walls, its easily formed case can be shortened to 1.520" and necked down to fit .224, 6mm, or 7mm bullets. The case also features a small-rifle primer pocket for proven consistency in bench-rest competition. It's the mak[illegible] of a truly great bench-rest and metallic silhouette cartridge. We also [illegible]e the small No. 7½ BR primers, built to withstand the higher-pressure [illegible]ds of this potent combination. **Order Numbers:** Unprimed BR cases—URBR; No. 7½ small-rifle primer—X22628.



The necked-down BR case, [illegible]zed for 7mm bullets. (Note: The 7mm BR Rem. is not available as a factory-loaded cartridge.)

The Model 40-XB "Rangemaster."
Here's the center fire rifle that's as much at home taking varmints as it is taking trophies. Each is made one at a time in our custom shop, individually fired from the shoulder for accuracy, and shipped with the paper target.

It's available as a single-shot in all these calibers: 222 Rem., 22-250 Rem., 243 Win., 6mm Rem., 25-06 Rem., 7mm Rem. Mag., 7.62mm NATO (308 Win.), 30-06, 30-338 (30-7mm Mag.), 300 Win. Mag. Or, at an extra charge, as a repeater in these calibers: 222 Rem., 22-250 Rem., 243 Win., 6mm Rem., 7.62mm NATO (308 Win.).

The 40-XB receiver, hand-bedded to the stock, is drilled and tapped for scope block and receiver sights. Target scope blocks are installed.

Other features include a match-type trigger, adjustable from 1½ to 3½ lbs. The weight of pull can be changed externally. A special 2-oz. trigger, which has no safety switch, is available on single-shot models only, at extra charge.

The distinctive, unblued stainless steel barrel is free-floating, drilled, and tapped for scope block and iron front sight.

The Model 40-XBBR.
The same basic rifle as our Model 40-XB "Rangemaster," the XBBR is chambered primarily for bench-rest target shooting. Available only as a single-shot, you can order the 40-XBBR in these calibers: 22 BR Rem., 222 Rem., 223 Rem., 6x47, 6mm BR Rem., and 7.62mm NATO (308 Win.).

The 40-XBBR has a match-type trigger, adjustable from 1½ to 3½ lbs. A special 2-oz. trigger is available at extra cost.

The Model 40-XC National Match Course Rifle
Our center fire 40-XC has the same improved position-style stock as our rim fire 40-XR rifle, pictured. The 40-XC is available as a 5-shot bolt-action repeater in 308 Win. (7.62mm NATO). Its receiver is drilled and tapped for metallic sights; scope-mount bases are installed. The trigger is adjustable from 2 to 4 lbs.

The Model "XP-100."
Here's the unique single-shot center fire, bolt-action pistol that has become a legend for its strength, precision, balance, and accuracy! Still chambered for the 221 Remington "Fire Ball" with a vent rib 10½" barrel, it's also available in 7mm BR Rem. with a 14¾" barrel. In this latter configuration you have what has been called the perfect factory-made metallic silhouette handgun for "unlimited" events.

Both "XP-100" handguns have one-piece DuPont "Zytel" nylon stocks with universal grips, two-position thumb safety switches, receivers drilled and tapped for scope mounts or receiver sights, and match-type grooved triggers.

0 THE 788: NO-FRILLS SUCCESS STORY.

Last year we upgraded our Model 788 center fire rifle in looks and handling; the shooters of America gave it landslide approval.

Almost overnight, the new 788 took off, winning new friends to its better-looking all-business way of getting things done. Long known for accuracy, the 788 bolt-action has earned its keep as the kind of precision big-game and varmint rifle you don't have to baby.

What we did, and why. Last year the stock was completely resculptured. Subtle changes included a fluted comb, thicker pistol grip, wider fore-end, recessed floor plate, and a polished bolt. All topped off with a rich walnut finish.

We also added the 7mm-08 Remington to its existing caliber list. Teamed up with a new, shorter 18½" barrel, it gave hunters true carbine-handling ease with a potent new hunting cartridge. The 7mm-08 Rem. makes the most of the larger capacity of a necked-down 308 Win. case, and the higher retained velocity and energy of the popular 7mm bullet. The 788 is also available in four other calibers.

Strength meets good looks. The Model 788 has one tough receiver, milled from a solid ordnance-steel billet. And nine locking lugs for backup strength. The receiver is drilled and tapped for scope mounts. On selected models a Tasco 4-power scope with 30-30 reticles is available.

All our center fire barrels are made of Remington special steel. For a lifetime of greater accuracy.

Standard sights? You bet. There's a one-piece blade-ramp front sight and a V-notch rear sight with lock-screw adjustments for elevation and windage. The safety switch is the positive, fast-action thumb type.

THE 1100s: FIRST IN FIELDS & FLYWAYS. 11

1981

No other autoloader in history has better proven itself than the Model 1100. Behind its enviable record of dependability and the widest choice of gauges stand the sweet handling and low recoil sensation that have become the trademarks of this autoloading legend.

The Model 1100 has the toughness of an ordnance-quality steel receiver. In every model. And the richness of American walnut in every stock and fore-end.

One of the most versatile ways to enjoy the virtues of a Model 1100 is to buy an 1100 Magnum. Depending on the shotshells or barrels you choose to fit it, the Model 1100 Magnum can be converted from waterfowling to upland hunting or big game—even to informal clay target shooting—in seconds.

There are Model 1100 Magnums in 12 and 20 gauge. They give you virtually everything you could ask for in one hardworking shooting system.

One more thing. *On all too many firearms today, about the only thing that's still American is the wood. Not so with Remington. Every part of every product is made and serviced in the United States of America. That's the only way we've ever done it, for the past 165 years.*

R2525558

1981

THERE'S A MODEL 1100 FOR

nd plenty of extra barrels in ase you change your mind. hat means the world's most opular autoloading shotgun an economically grow as your hooting interests do.

In most cases, the same 1100 n match the precise require- ents of a waterfowler, target hooter, upland game or deer unter. Thanks to the widest hoice of extra interchangeable arrels ever offered. Learn more bout them on page 20.

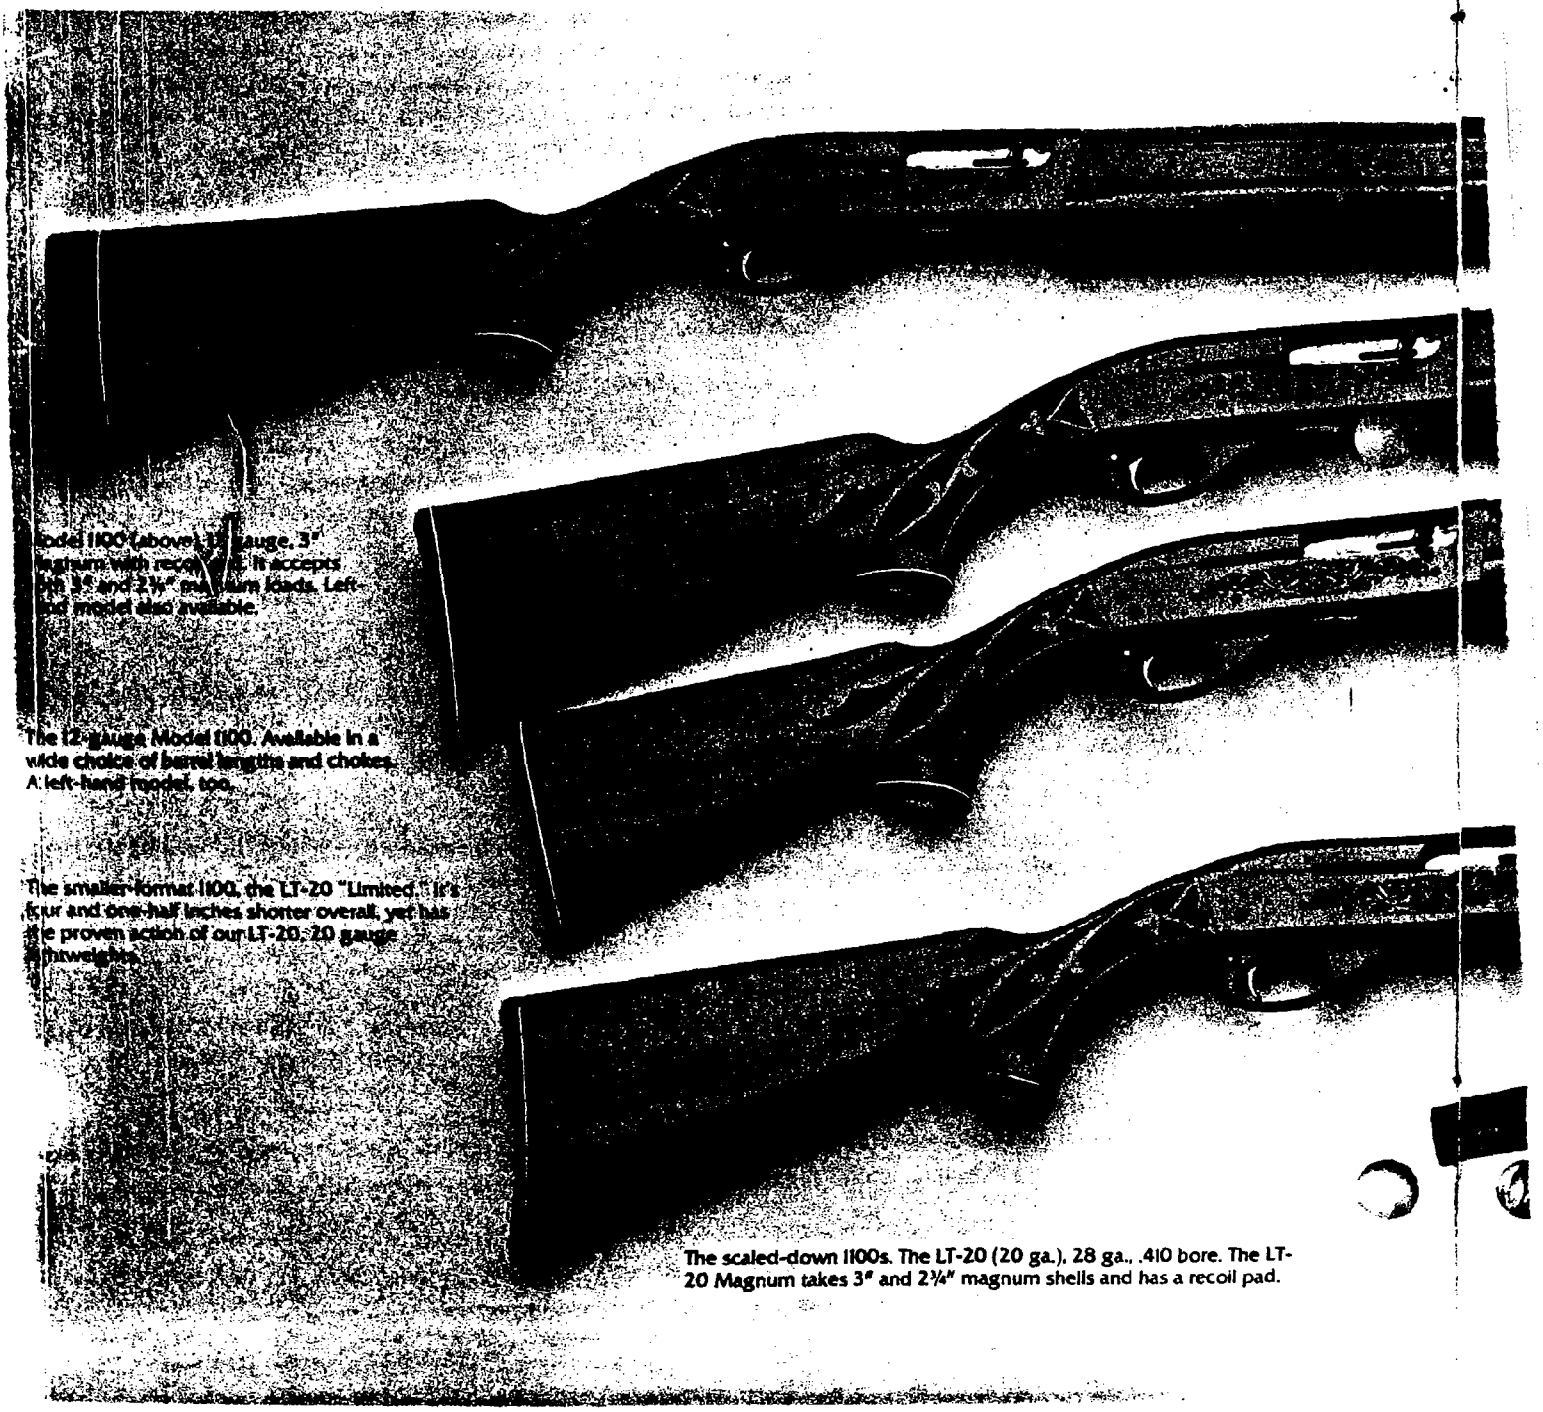
Every Model 1100 has more than just an American walnut stock, durable DuPont RK-W wood finish, and richer blueing. From the beginning, it's engineered tough. Both barrel and receiver start as solid billets of ordnance-quality steel. All action parts are vibra-honed to work smoothly.

The unique gas-metering system makes this autoloader more than just reliable. It helps reduce recoil sensation to a gentle nudge. Which lets you concentrate more on your target, to become a better shot.

The 1100s are well-balanced, easy-handling, comfortable guns in any gauge. And no other autoloader comes in more gauges, versions, or specifications.

Every field-grade 1100 has a positive cross-bolt safety switch and a metal-bead front sight. All models but the .410 bore have a 5-shot capacity, with a 3-shot plug furnished. The .410s hold four 3" shells.

On current Remington Mo 1100 shotguns, the barrels are sufficiently thick and hard so that the repeated use of factory-loaded steel shot does not affect their appearance or performance.



odel 1100 (above) 12 gauge, 3" agnum with recoil pad. It accepts th 3" and 2¾" magnum loads. Left- nd model also available.

The 12-gauge Model 1100. Available in a wide choice of barrel lengths and chokes. A left-hand model, too.

The smaller-format 1100, the LT-20 "Limited." It's four and one-half inches shorter overall, yet has the proven action of our LT-20, 20 gauge lightweight.

The scaled-down 1100s. The LT-20 (20 ga.), 28 ga., .410 bore. The LT-20 Magnum takes 3" and 2¾" magnum shells and has a recoil pad.

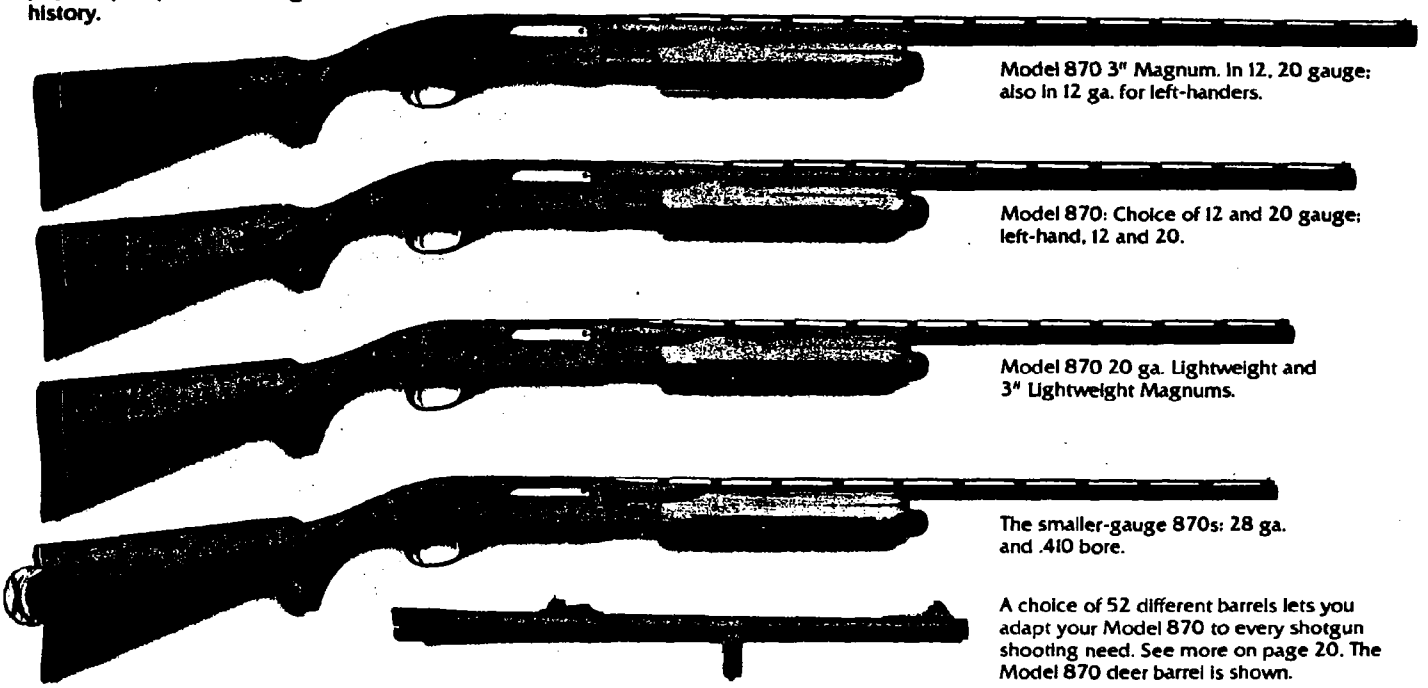
LAST WORD IN DEPENDABILITY. 1981

For over thirty years, the Model 870 "Wingmaster" has been hard at work. Dependably bringing home meals and trophies, winning friends at every turn. With over three million loyal fans, it's become the most popular pump-action shotgun in history.



Model 870 3" Magnum. In 12, 20 gauge; also in 12 ga. for left-handers.

Model 870: Choice of 12 and 20 gauge; left-hand, 12 and 20.

Model 870 20 ga. Lightweight and 3" Lightweight Magnums.

The smaller-gauge 870s: 28 ga. and .410 bore.

A choice of 52 different barrels lets you adapt your Model 870 to every shotgun shooting need. See more on page 20. The Model 870 deer barrel is shown.

Every Model 870 has a receiver machined from solid steel, vibra-honed action parts, and double-action slide bars that positively eliminate binding and twisting. To let you get off extra shots smoothly, as fast as you can pump and pull the trigger.

Barrels are of ordnance-quality steel. And we offer the widest choice of fully interchangeable barrels to make your 870 even more versatile; see page 20 for details.

All 870s except the .410 bore have a 5-shot capacity. A 3-shot plug, required for certain hunting situations, is included in every box. The .410 models can hold up to four 3" shells.

Except for the deer guns, which have rifle sights, field 870s feature a metal-bead front sight. All 12- and 20-gauge shotguns have recoil pads. American walnut stock and fore-end, and a durable DuPont RK-W wood finish, are standard on all Model 870s.

On current Remington Model 870 shotguns, the barrels are sufficiently hard and thick so that repeated use of factory-loaded steel-shot loads does not significantly affect their appearance or performance.

1981

AUTOS, BOLTS &

You're looking at the widest choice in 22-cal. rifles available today. From small-game hunting to metallic silhouette shooting, from precision paper targets to casual weekend plinking, there's a Remington 22 for you. All made and serviced right here in the United States of America.

Choose your action. We have seven autoloaders, two pumps, seven bolt-action models. Some have scopes. One is for southpaws. Two are downsized for smaller-sized shooters. And one, our famous "Nylon 66," is so durable it has a lifetime stock warranty. Choice, value, and American quality make our 22 family first in the field.

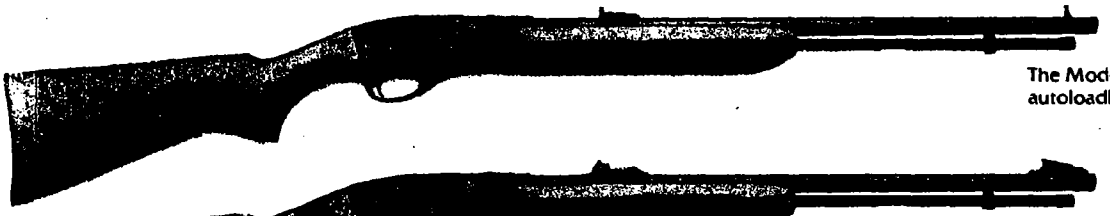
The autoloaders. The Remington 552 "Speedmaster" shoots Short, Long, and Long Rifle cartridges interchangeably. The deluxe walnut-stock BDL model has custom checkering, a rich DuPont RK-W wood finish, and sights you'd expect only on a big-game rifle. The standard Model 552A has an adjustable rear sight, bead front sight. And a walnut-finished hardwood stock.

The tubular magazine holds 20 Short, 17 Long, or 15 Long Rifle cartridges. With the tube out, it's an ideal single-shot rifle for beginners. Both models feature a receiver grooved for tip-off scope mounts. And positive cross-bolt safety switch.

The pump-actions. Remington builds the only 22 pump-action rifle made in America. The Model 572 "Fieldmaster," like our Model 552 autos, accepts all three lengths of 22 cartridges interchangeably. The BDL grade has the walnut stock, custom checkering, DuPont RK-W wood finish, and the sights of our best big-game pumps. Even the budget-minded 572A model has clean, crisp styling, and a no-nonsense walnut-finished hardwood stock that's built to take abuse. The 572's capacities, sights, and safety switch are identical to those of the 552 autoloaders.

Our basic bolt-actions. The Model 581 and 582 rim fire rifles give you quite a choice. Use the 581 as a 6-shot repeater, or convert it in minutes to a beginner's single-shot. The adapter is included. The 582's magazine tube takes up to 20 Short, 15 Long, or 14 Long Rifle cartridges.

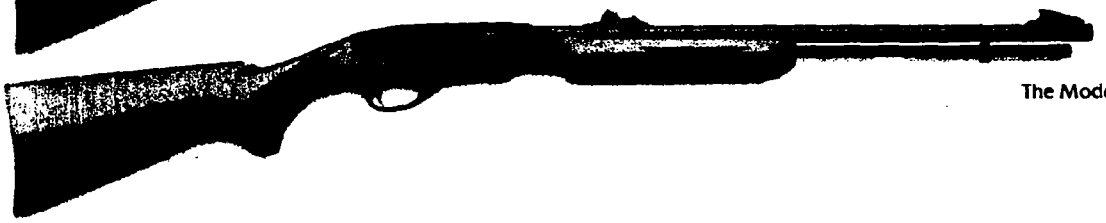
Both rifles have a walnut-finish Monte Carlo stock, an ordnance-steel receiver, grooved for a scope, and adjustable sights. The Model 581 is available with a shorter stock, perfect for younger shooters. Left-hand version too.



The Model 552A "Speedmaster" autoloading 22.

The Model 552 BDL Deluxe.

The Model 572A "Fieldmaster" pump action, rim fire rifle.



The Model 572 BDL Deluxe.

Metallic silhouette shooting made easy. Your participating Remington dealer can sell you a complete, low-cost set of four iron animals, sized to meet the requirements of sanctioned rim fire silhouette competition. Ask him for details, or write us (see address on back cover).

R2525563

top-of-the-line 22. Model 541-S "Custom" Sporter is more than just a superbly accurate bolt-action 22. It's deluxe in every way. And very popular with metallic silhouette shooters and discriminating hunters alike.

From its American walnut stock with fine-line, positive-cut checkering to its rosewood-finish butt plate, grip cap, and fore-end tip. Even the all-steel receiver features decorative scrollwork engraving. The 541-S also has an adjustable match trigger, artillery-style bolt with six locking lugs, and double extractors. And a receiver that's drilled and tapped for scope mounts. Quite a package.

The lifetime 22s. When you buy a "Nylon 66" autoloader, you own the world's most durable rim fire rifle. It's the only one made that carries a lifetime warranty on its DuPont "Zytel" structural-nylon stock. If it ever warps, cracks, chips, fades, or peels, we'll replace it. Free. And it only weighs 4 lbs.

Not only is there nylon in the stock, but all action surfaces ride on nylon bearings, too. So there's no need for internal lubrication. Ever.

Our "Nylon 66" rifles are available in five models and two stock colors. Some have 4-power scopes for a better view of the target. All have a capacity of 14 Long Rifle cartridges; by removing the magazine tube in the stock, the "Nylon 66" becomes a single-shot.

THIS TOUGH RIFLE STOCK has a full **LIFETIME WARRANTY**

Made of tough DuPont structural nylon, this stock is so much stronger and more durable than one made of wood that we guarantee it will not warp, crack, chip, fade or peel for the life of the rifle or we will replace it free. The gun should be sent Collect to ARMS SERVICE DIVISION, REMINGTON ARMS COMPANY, INC., ILION, NEW YORK 13357.

This Warranty gives you specific legal rights and you may also have other rights which may vary from state to state. This warranty does not cover work damage caused intentionally or by unreasonable use.

OUR WIN, PLACE

You don't dare leave winning a trophy to chance. Instead, you depend on Remington. On reliable, pump-action Model 870's, our ever-popular Model 1100 autoloaders, and our over-and-under wonders, the Remington 3200s.

The Remington 3200 matched set.
Here is the limited-production skeet gun and small-gauge barrel set you've heard so much about. In .410 bore and 28, 20, and 12 gauge, the point of impact, sighting plane, weight, and balance are virtually identical. Its patented weight system gives this gun a true custom appearance. All smaller-gauge barrels fit precisely into the 12-gauge fore-end without unsightly wood-to-metal gaps.

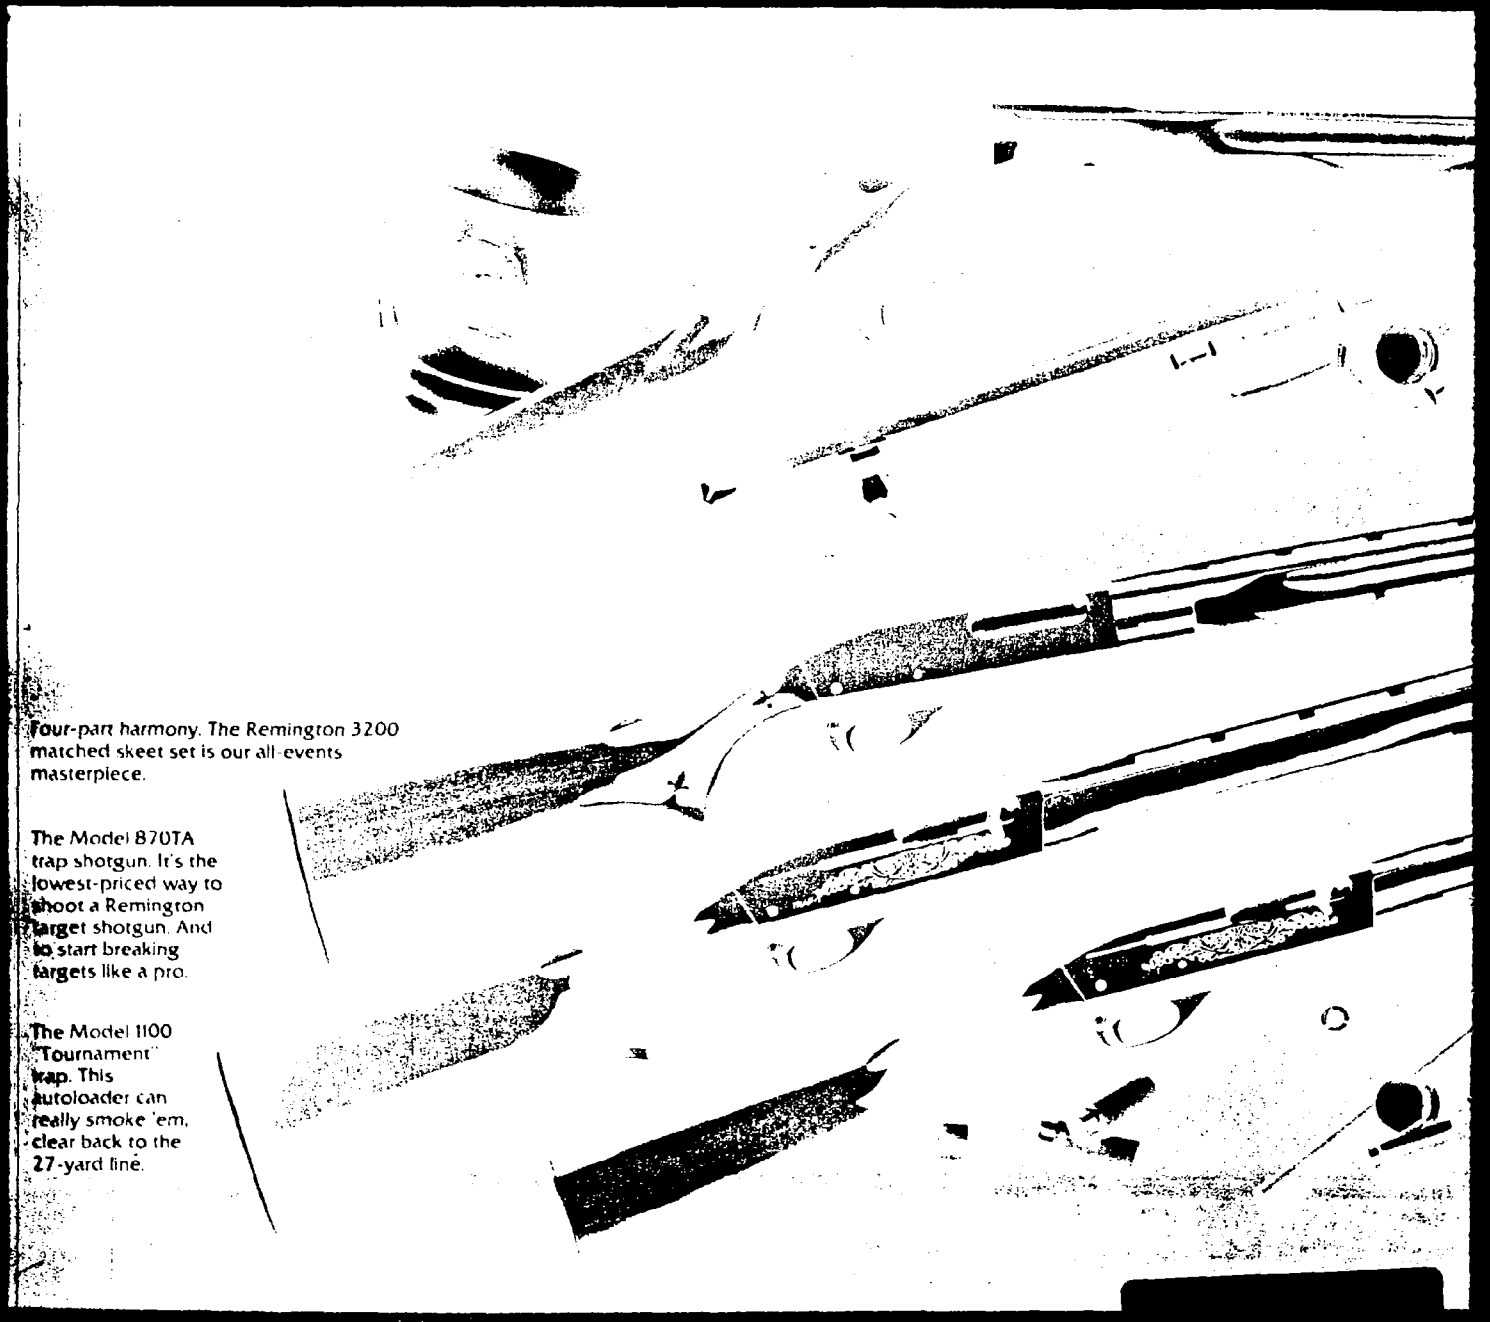
This prestigious set features a stock and fore-end crafted from fine American walnut, specially selected for figure, grain, and match. Deep-cut checkering, a rich, hand-applied satin finish, and finely polished barrels make this set worth every penny. And it comes with its own handsome, custom-crafted luggage case.

The Model 1100 weight-equallzer kits.
They give the three smaller-gauge Model 1100s nearly identical balance and pointability. It's the closest thing yet to a matched set, at a fraction of the cost.

This system, designed and built by Remington, is available in kits for all three smaller-gauge skeet guns. This four-part system helps balance out the stock and fore-end. In fact, it gives all these smaller 1100s virtually the same weight and balance. And you can install it quickly with simple hand tools.

The easiest way yet to start breaking targets. Without breaking your budget.
Our lowest-priced trap gun is the Model 870TA. But you'd never know it to look at it, or shoot it. It gives you the sure, easy pointability and incredible dependability of our highest-priced 870 trap gun, yet costs much less. Like every 870, it has an all-steel receiver, American walnut stock and fore-end, plus a long target-breaking heritage.

Autoloading automagic.
The most successful skeet guns in history have been



Four-part harmony. The Remington 3200 matched skeet set is our all-events masterpiece.

The Model 870TA trap shotgun. It's the lowest-priced way to shoot a Remington target shotgun. And to start breaking targets like a pro.

The Model 1100 "Tournament" trap. This autoloader can really smoke 'em, clear back to the 27-yard line.

R2525565

SHOWPIECES.

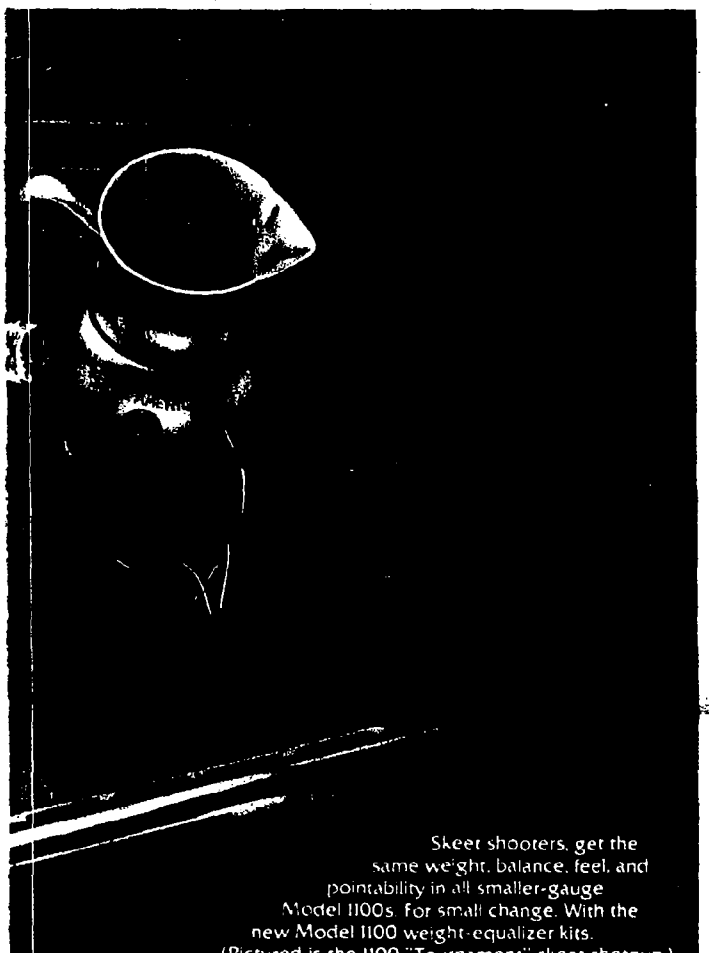
1981

[R]ington's Model 1100 loaders. Could it be the sweet handling, the low recoil sensation, the undeniable dependability—or plenty of all three? There are no less than 11 different 1100s to help you break targets in skeet.

You can repeat the solid Model 1100 story for pointability, low recoil, and reliability for a whole family of autoloading trap guns. With six models to choose from, one should be right for you.

The full line of target guns. Check our specification charts and you'll see that Remington still offers you the widest choice in clay-target shotguns. Autos, pumps, over-and-unders—in "Tournament," standard, and "Competition" grades. In the barrel lengths, chokes, and gauges you need to take you from league shoots to the big leagues. With guns that look as good as they shoot.

To learn more about trap, skeet, and new "sporting clays" games, write:
Remington Arms Company, Inc.,
Dept. TS,
Bridgeport, Conn. 06602.



Skeet shooters, get the same weight, balance, feel, and pointability in all smaller-gauge Model 1100s. For small change. With the new Model 1100 weight-equalizer kits. (Pictured is the 1100 "Tournament" skeet shotgun.)

20 REMINGTON EXTRA BARRELS.

1981

Why change your gun every time you change your game? The best and easiest way to add to the enjoyment and versatility of your Model 1100 or 870 is to get one or more extra barrels for it.

Now your field gun can become a target gun, or make your goose gun an ideal deer gun. In seconds. You're the expert when you own the special extra barrel matched to the job.

And Remington gives you the industry's widest choice. There are even several barrels for the left-hand versions of our 870s and 1100s.

One thing to remember: Barrels must be matched to the correct receiver, and within gauges. Extra interchangeable 2¾" chambered barrels, available for Magnum receivers, will handle all 2¾" shotgun shells within the same gauge.

Learn more; see your dealer's **Remington Extra Barrel Selector.**

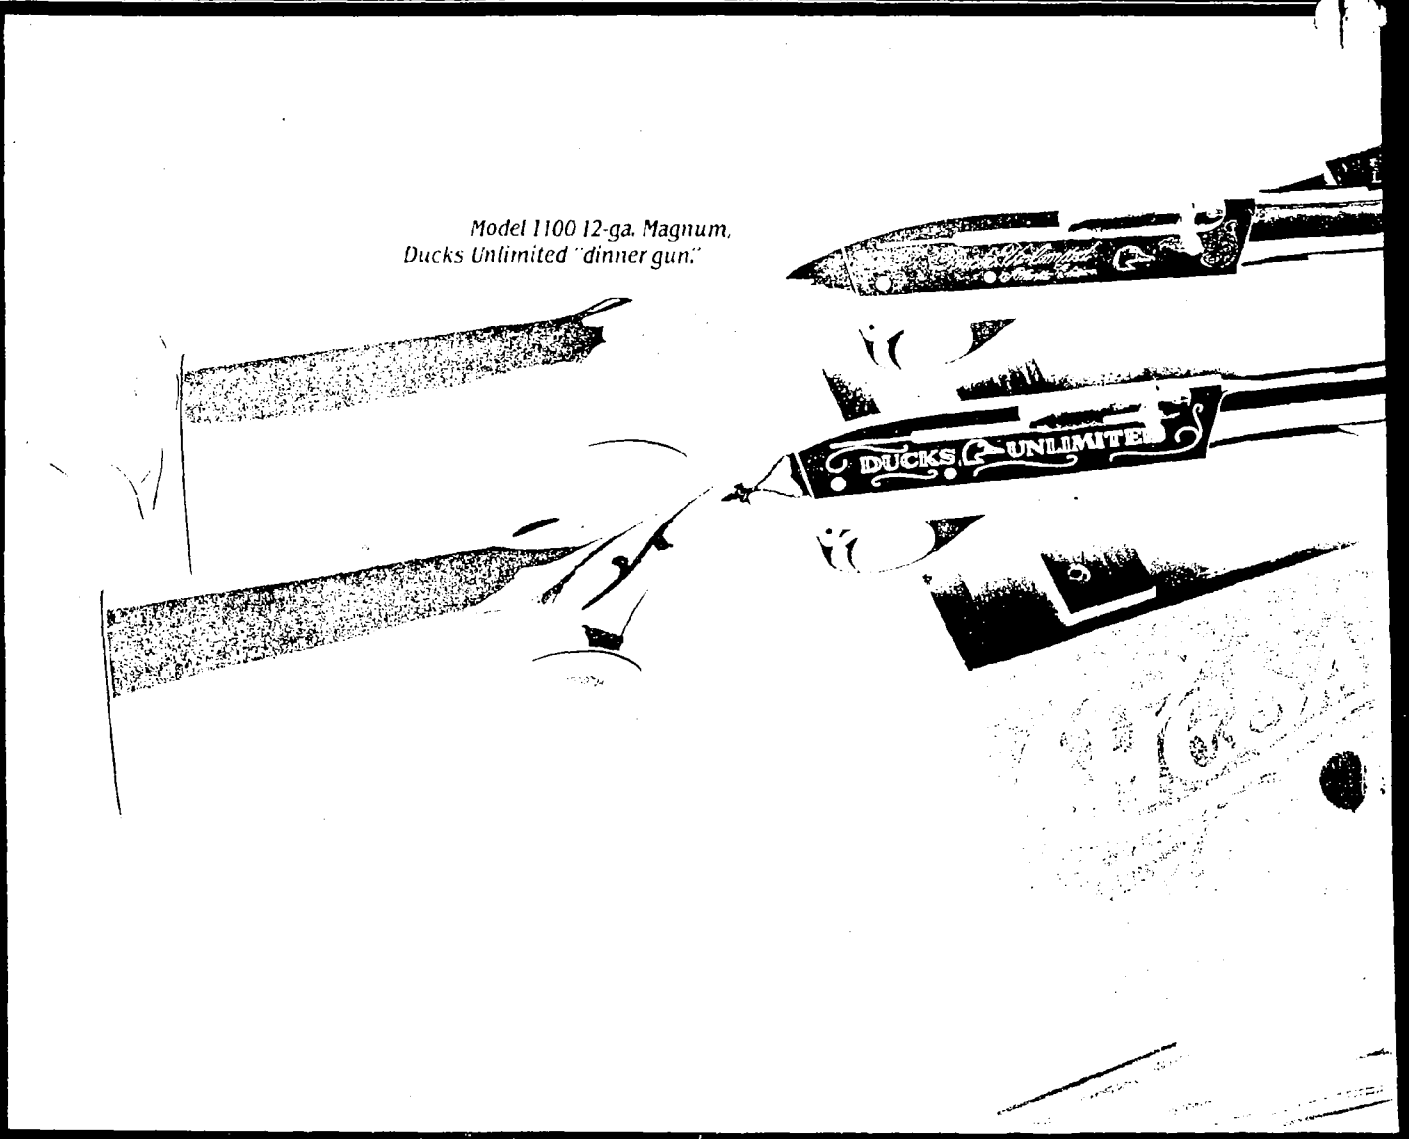
FIRST IN THE FIELD

REMINGTON MAKES AN ONGOI



Model 1100 12-ga. Magnum, Ducks Unlimited "dinner gun."

As outdoorsmen and conservationists, we can all appreciate the success of Ducks Unlimited every time a flight of greenheads, "cans," pintails, or bluebills passes by.

For some 45 years now, DU has helped preserve the vital Canadian wetlands where about 70% of our ducks and geese are hatched. No federal, state, or provincial programs could ever hope to equal the landmark efforts of this nonprofit group of sportsmen. DU de Mexico has also underwritten major projects in that country to keep our wintering waterfowl healthy.

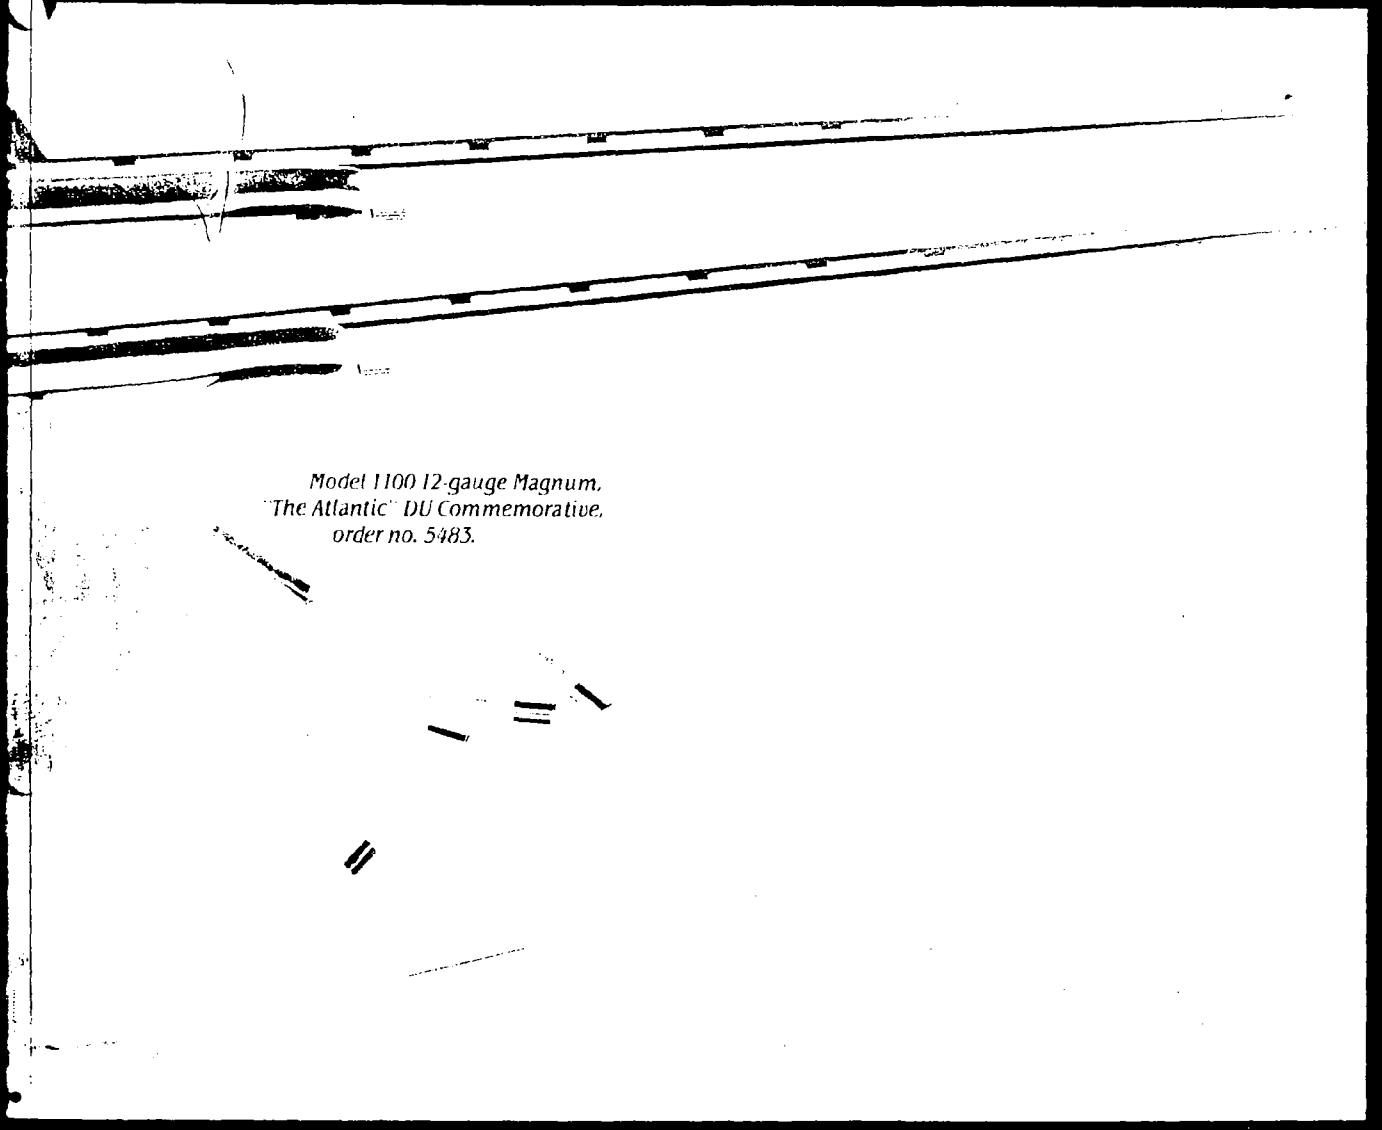
We at Remington have supported DU projects from the start; we're now expanding our commitment. A special Ducks Unlimited Commemorative Model 1100 shotgun is now available through your full-service Remington dealer. Shown below and in the inset, "The Atlantic" edition is the first and only 12-ga. 3" Magnum Model 1100 we've ever offered with a 32" Full choke barrel. It gives you the extra reach and smooth, controlled swing you need for longer-range pass shooting. And we send DU a contribution for every gun sold.

This commemorative 1100 has distinctive engraving on both sides of its all-steel receiver, and a special block of DU serial numbers. Because it will only be produced this year, it's almost sure to become a collector's item.

R2525570

AND THE F[illegible] 1982

MITMENT TO DU. AND YOU.



Model 1100 12-gauge Magnum, "The Atlantic" DU Commemorative, order no. 5483.

Members may recall our fund-raising limited-edition models or Ducks Unlimited dinners. One, introduced last year, was "The Chesapeake," our special Atlantic flyway commemorative. Three other limited-edition Remington shotguns are planned. Our other "dinner gun" was a custom Model 1100 20-ga. LT-20, the "DU Special." Both of these guns have become valuable fund-raisers through dinner auctions and raffles.

Another of our ongoing DU programs features special wooden shotshell boxes. The "Chesapeake" Atlantic flyway box, introduced in 1981 and pictured above, is the first of four planned commemoratives. Like our "dinner guns," they're designed and priced to be sold or raffled, but only through DU.

We're proud to help increase waterfowl migrations through DU. If you'd like more information about DU programs or membership, write Ducks Unlimited, Inc., National Headquarters, P.O. Box 66300, Chicago, Ill. 60666.

MODEL 1100s: FRO

TAKE A CLOSER LOOK AT AMERICA'S MOST POPU

Model 1100 12-gauge Magnum.

Right from the start, we've built our Model 1100s to be shooting systems, not just shotguns. A key to their consistently high value to you, as owner or seller, is in their versatility.

The same Model 1100 that you buy for waterfowl hunting today can be converted to become an ideal upland, target, or rifled slug gun, in seconds. The 1100 has today's widest choice of economically priced, ruggedly built extra barrels. (For more on extra barrels, see page 20.)

No other autoloader in history has better credentials than the 1100. Sportsmen and women who have bought over three million of them count on their sweet handling, low recoil sensation, and dependable performance under the most adverse conditions.

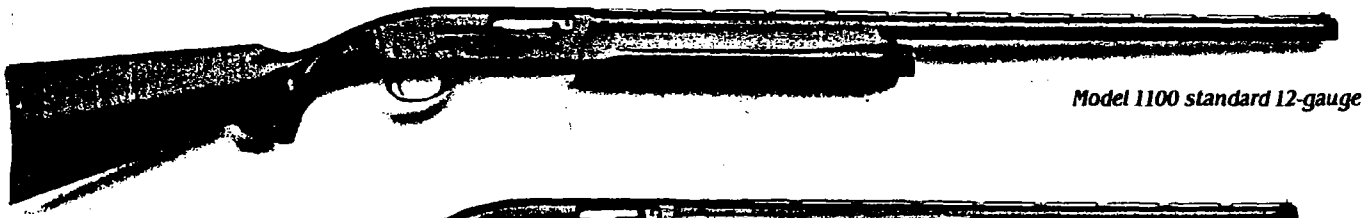
The Model 1100 has the toughness of an ordnance-quality steel receiver, even in its lightweight, smaller gauges. No other autoloader today can make that claim. And every 1100 has an American walnut stock and fore-end.

On all too many firearms these days, about the only thing that is still American is the wood. Not so with Remington. Every part of every product is designed, built, tested, and serviced in the U.S.A. That's been our only way for over 165 years.

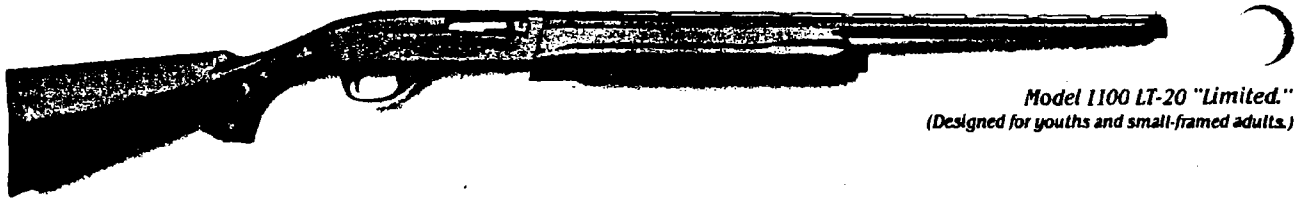
From the beginning, the 1100 is engineered tough. Both barrel and receiver start as solid billets of ordnance-quality steel. All action parts are vibra-honed to work smoothly.

The unique gas-metering system helps reduce recoil sensation to a gentle nudge. Which helps you concentrate more on your target, for a quick, sure second shot.

The 1100s are well balanced for easy pointability in any gauge. No other autoloader comes in more gauges, versions, or specifications.



Model 1100 standard 12-gauge field.



Model 1100 LT-20 "Limited."
(Designed for youths and small-framed adults.)

R2525572

M DUCKS T[illegible] 1982 [illegible].

AR MOST VERSATILE AUTOLOADING SHOTGUNS.

Field-grade Model 1100 with optional deer barrel. (Standard Model 1100 deer guns fitted with recoil pad.)

One of the most versatile ways to enjoy the virtues of a Model 1100 shotgun is to buy an 1100 Magnum. Depending on the shotshells or accessory barrels you choose to fit it, the Model 1100 Magnum can be quickly converted from waterfowling to upland hunting or big game—even to informal clay target shooting—without tools.

There are Model 1100 Magnums in 12 and 20 gauges. They give you virtually everything you could ask for in one hardworking shooting system. Including lasting value.

To give you an idea of how it holds its value, ask your Remington dealer to show you a used Model 1100 Magnum. Or any used 1100 autoloading shotgun, for that matter.

Every field-grade 1100 has a positive, cross-bolt safety switch and metal-bead front sight. All models except the .410 have a 5-shot capacity, with a 3-shot plug furnished. The .410s hold four 3" shells.

On current 1100 shotguns, the barrels are sufficiently durable so repeated use of factory-loaded steel shot doesn't affect their appearance or performance.

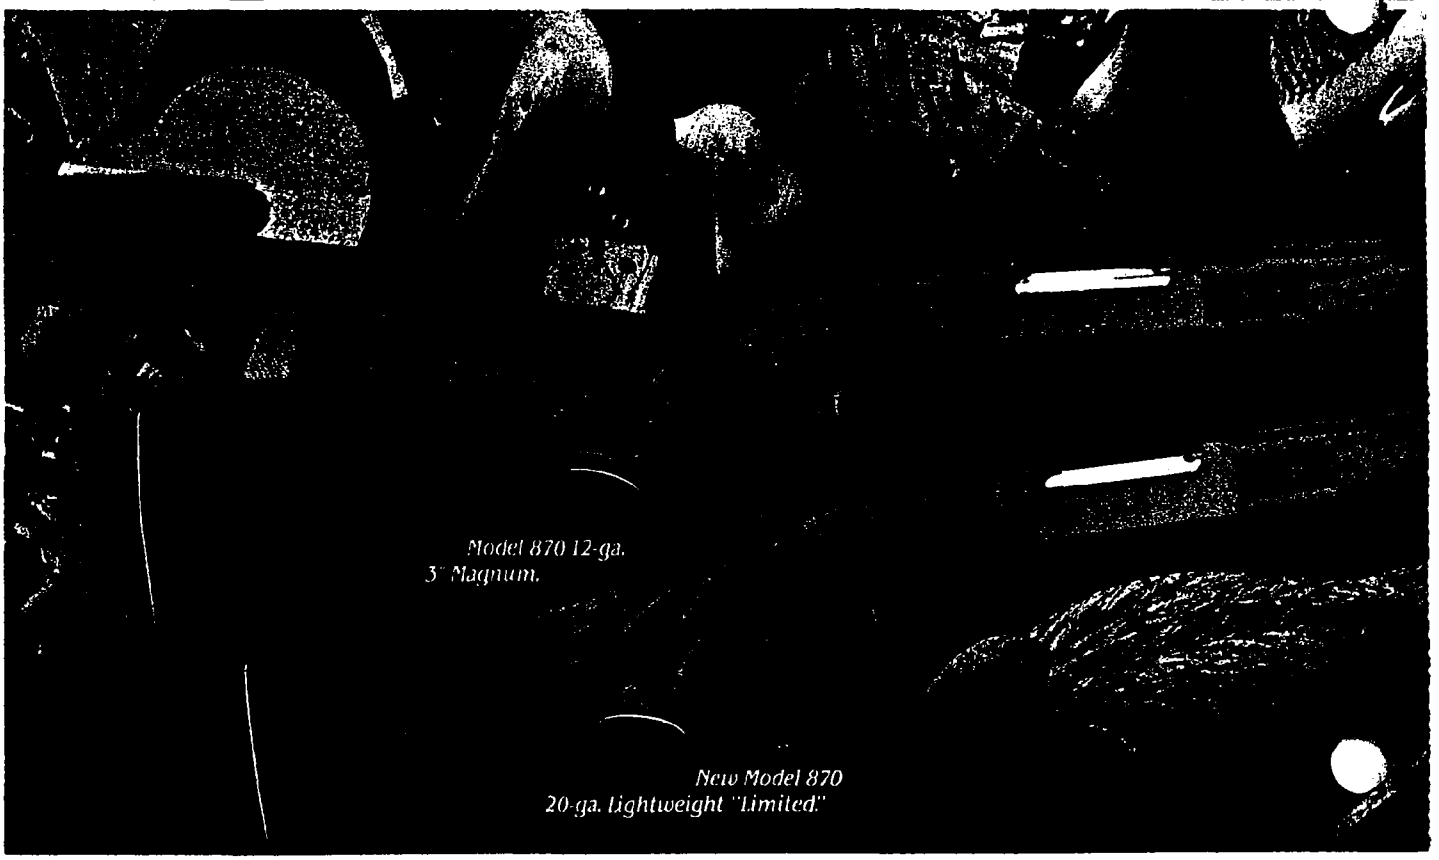
870s: BUILT SIM

NOW THERE'S A NEW, SMALLER M[illegible]BE[illegible]



Model 870 12-ga. 3" Magnum.

New Model 870 20-ga. Lightweight "Limited."

No pump action shotgun made has a larger, more loyal following than our Model 870 "Wingmaster." Today over 3 million 870s are helping hunters get their limit.

The 870's legendary performance, reliability, and lasting value have also made it the standard long gun of law-enforcement agencies from Key West to Point Barrow.

New for 1982 is the Model 870 20-gauge Lightweight Limited. It's built expressly for younger shooters and smaller-framed adults. The 1½" shorter stock and 3" shorter barrel teamed with the scaled-down, all-steel receiver, make this pump a real first in its field. It's available with either a Modified or Improved Cylinder choke.

The Model 870 became the most popular pump action shotgun in history for some very solid reasons. Every 870's receiver is machined from a solid billet of ordnance-quality steel, has vibra-honed action parts, and famous double-action slide bars that positively eliminate binding and twisting. You get those important extra shots off smoothly, simply, as fast as you can pump and pull the trigger.

LE, BUILT S[illegible] 1982

HE WORLD'S FIRST FAMILY OF PUMPS.

)rdnance-quality steel is also found in every 870 barrel. And, :iking of barrels, we offer the l st choice of fully interchange- barrels to make your shotgun estment pay off in many differ- ways. See page 20 for details.

ll 870s except the .410 bore* k have a 5-shot capacity. A not plug, required for certain ting situations, is packed free h every Remington shotgun.

)ur field guns feature metal- bead front sights; deer guns /e rifle sights. All 12- and gauge 870s have recoil pads. rent Remington shotgun barrels sufficiently durable to handle repeated use of factory-loaded el-shot loads without signifi- tly affecting their appearance or formance.

The 870 is definitely top shelf in the appearance department. quality shows in its handsome erican walnut stock and fore- . distinctive checkering, durable ront RK-W wood finish, and a p. richly blued metal finish.

Compare the 870's strong, simple approach to shotgunning with any other pump made. You'll see why it's been the best value in pumps, for over thirty years.

*The .410s hold up to four 3" shells.

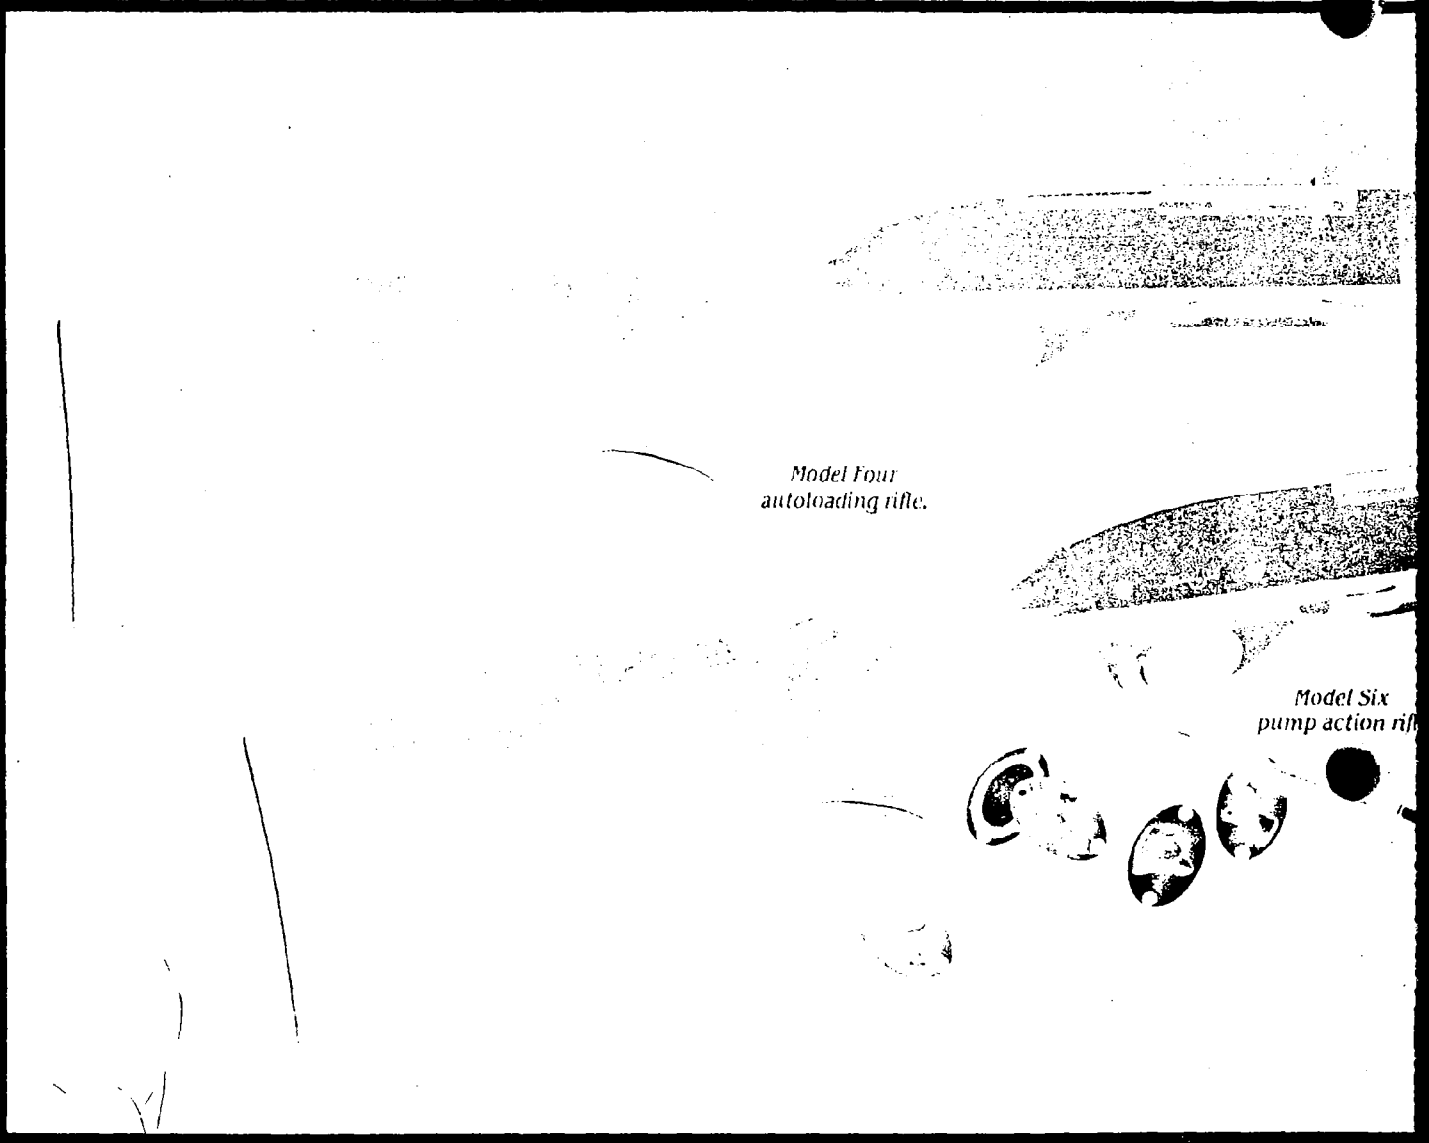
THE FOU

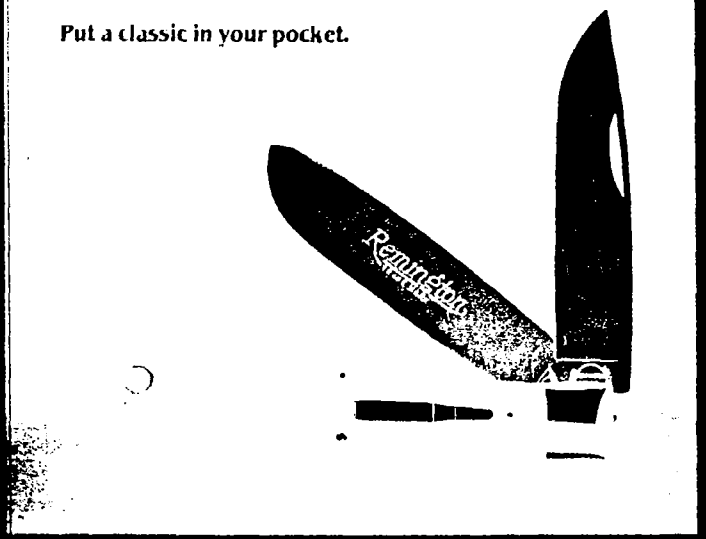
TOGETHER, THEY'RE AME[illegible]CA'S



Model Four autoloading rifle.

Model Six pump action rif

Put a classic in your pocket.



Now you can own a first-class, full-size replica of the renowned Remington "Bullet" knife. Our original knives, out of production for over forty years, are today highly priced, and highly prized by knife collectors around the world.

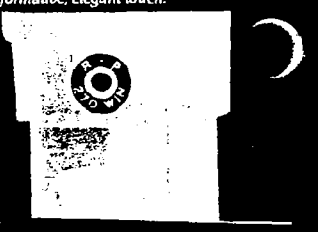
Our "Bullet" knife replica is timeless in design and utility. There are two 4½" blades, each made of tempered, 440 stainless steel. One is etched with our 1930's logo; the other dedicates the knife to our new Model Four and Six rifles.

Your participating Remington dealer can put a classic knife into your pocket. Available in limited quantities; see him for details.

A white flag flashes through the brush and that big buck becomes a blur. Reason enough for a centerfire rifle that comes up fast *and* gives you the quickest second shot in the woods.

The Model Four autoloader and Model Six pump do both. Without your eyes once leaving the target or your cheek leaving the stock.

An informative, elegant touch.



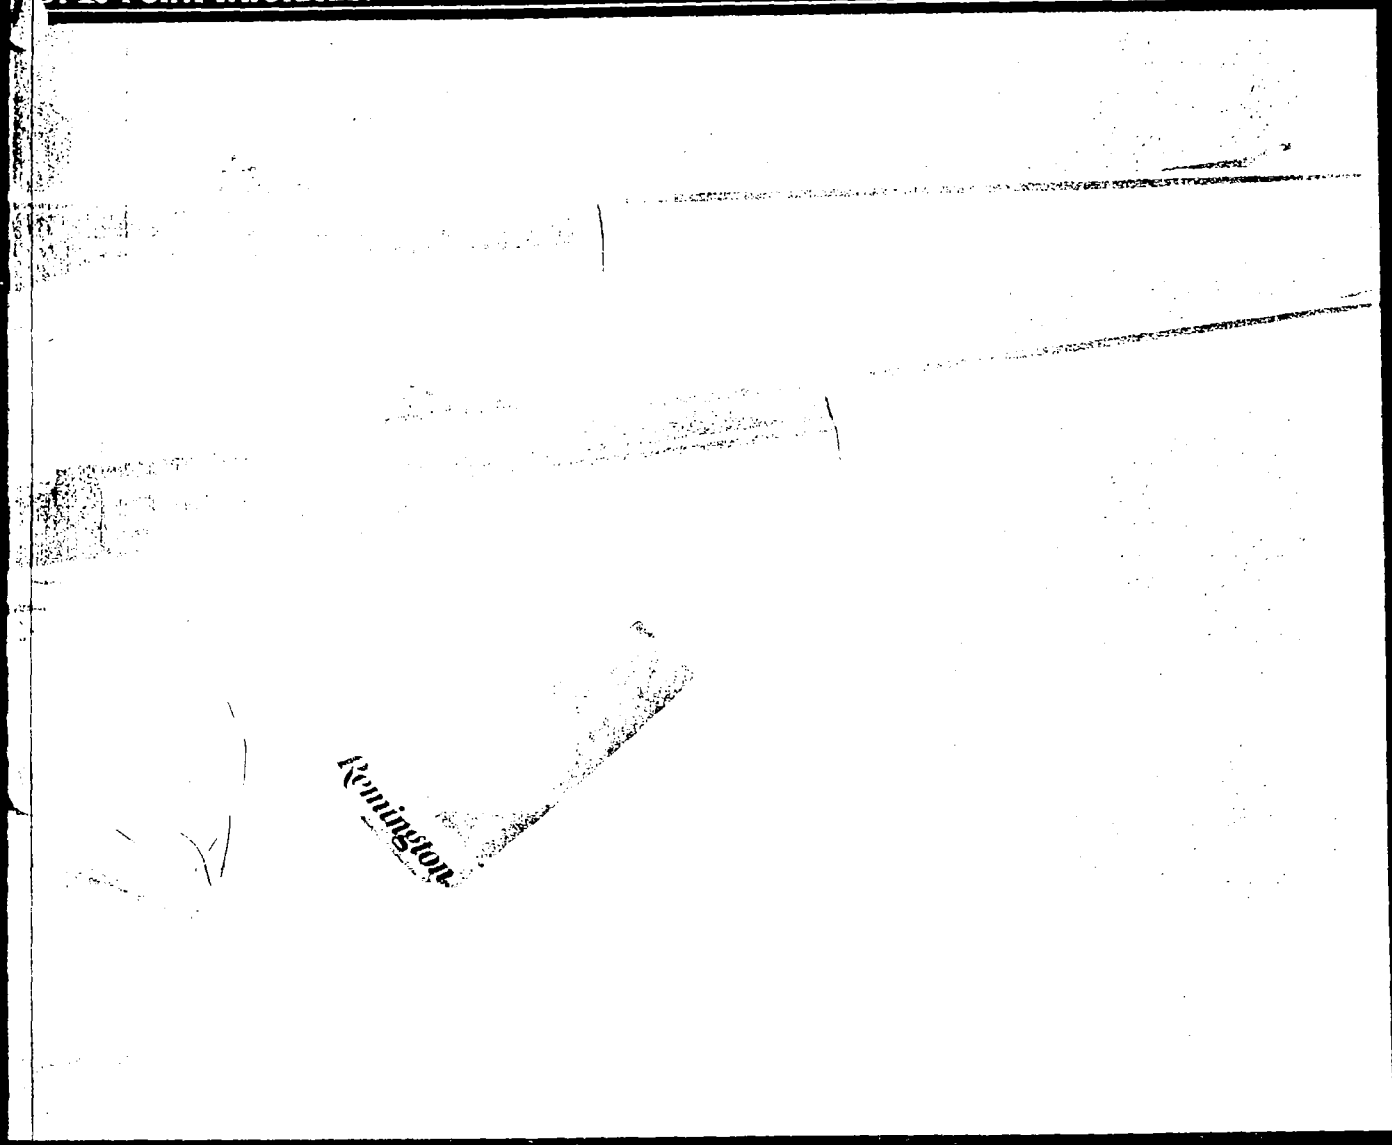
Bullet" is a trademark of Remington Arms Company, Inc., for knives.

R2525576

& SIX.

1982

ST 10-POINT FAVORITES.



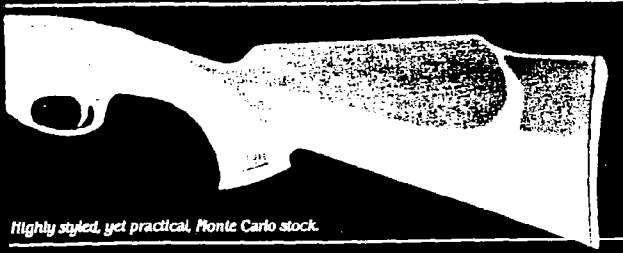
Our smoothest magazine release yet.

Remington has been making autoloading and pump action rifles for over 70 years. All that experience has helped us make the Four and Six the smoothest, best-balanced, and most dependable centerfire autos and pumps ever made. And the best value for your hard-earned dollars.

The Four's autoloading action features a unique gas-metering system. The double action bars of our Model Six pump slide faster, easier than ever before. Bolts in both rifles are engineered to provide a smoother, more dependable action. For strength, the bolts have locking lugs similar to those on bolt action rifles. And the receivers are milled from solid blocks of ordnance-quality steel.

The custom look is enhanced by positive-cut checkering on rich American walnut. And by a real classic touch: a cartridge head, indicating the gun's caliber, is imbedded in blued steel, just forward of the receiver.

A bolt you'd expect in a bolt action.



Highly styled, yet practical, Monte Carlo stock.

Other features include a beefier, smoother-functioning magazine release and a strong four-shot magazine for fast feeding.

Blade-ramp front sights and adjustable sliding-ramp rear sights are standard. Receivers are drilled and tapped for easy scope mounting. A positive, cross-bolt safety switch is fitted to all models.

The Models Four and Six are available in most popular big-game calibers, from 6mm to 308. And, like every Remington product, every part of these rifles is made and assembled right here in America.

For full specifics on these rifles, turn the page.

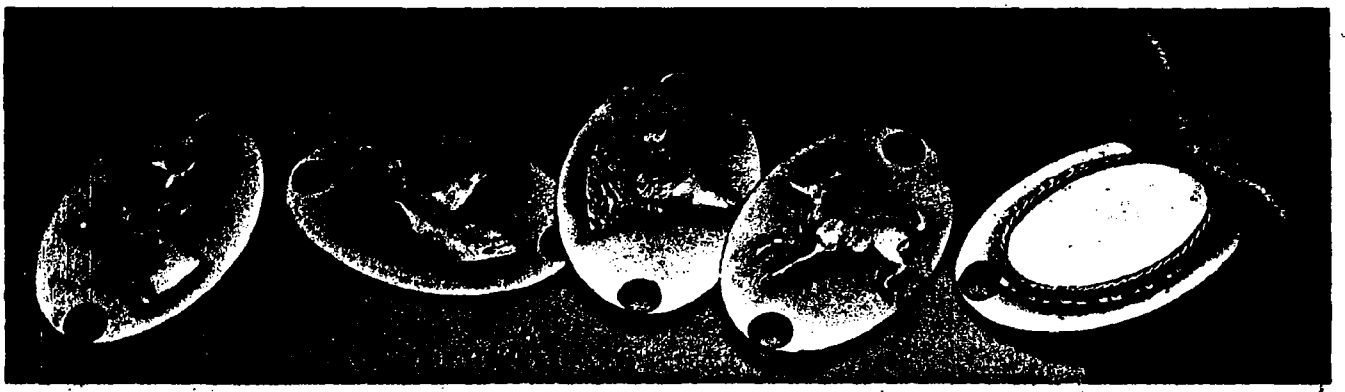
MAKE A FOUR OR SIX A 10.

1982

A CRAFTSMAN'S TOUCH SETS OUR NEWEST CENTERFIRES APART.



When you buy one of these stylish, precision-cast pewter grip-cap inserts for your new Model Four or Six rifle, you instantly personalize it.

Designed by well-known wildlife sculptor Sid Bell, they're made expressly for Remington's new Models Four and Six. All but one of these inserts feature big-game animals. The fifth design is a handsome signet plate you can have engraved with your initials. These inserts can be installed in seconds.

Chances are, your Remington dealer already has these great-looking inserts in stock. Or he can order one for you. Either way, here's a great opportunity to customize your new Model Four or Six, and at a very reasonable cost.

Give your new Model Four or Six that extra touch of value and craftsmanship; see your dealer today.

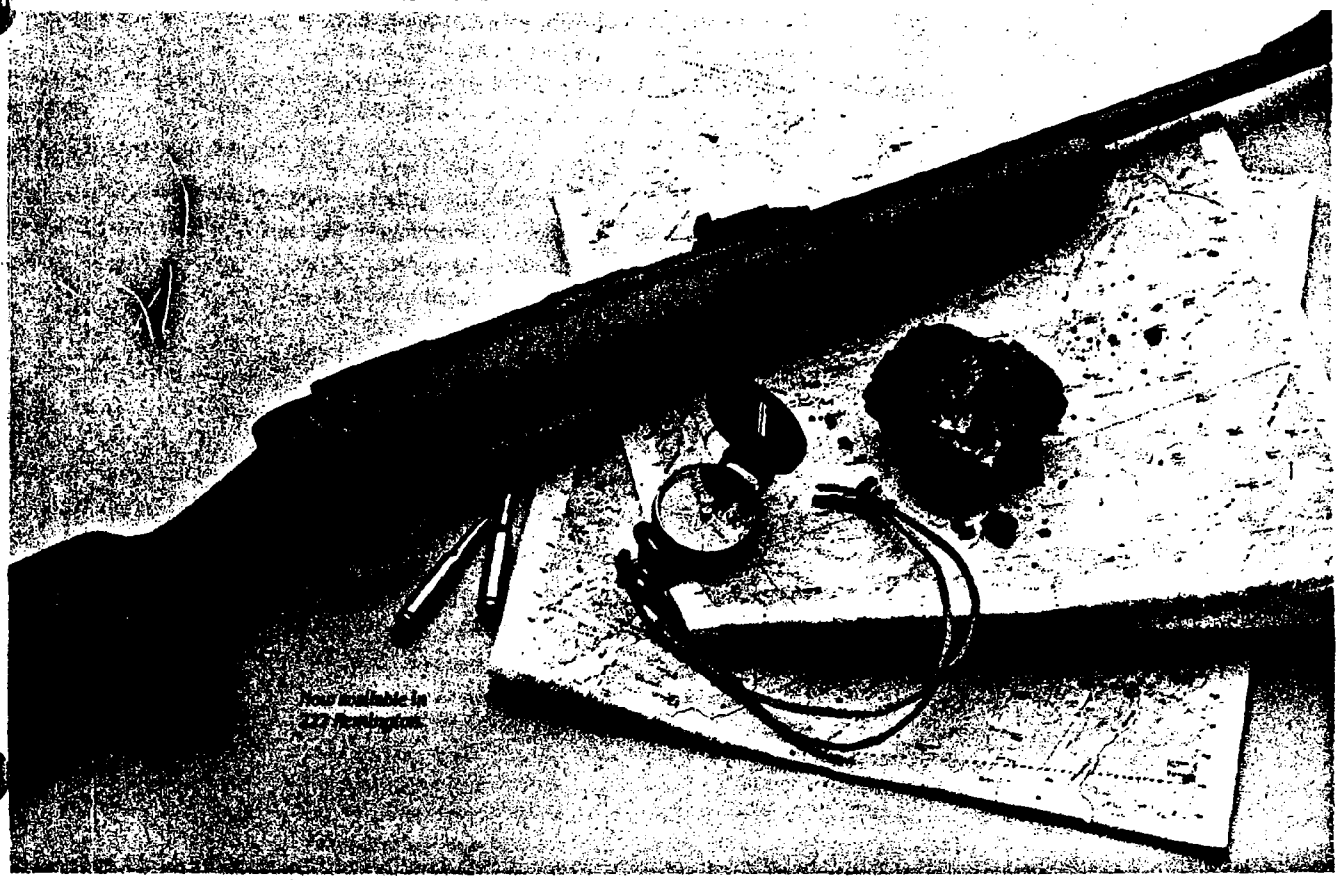
R2525578

THE RUGGED, REFINED 788.

1982

FROM HIGH COUNTRY TO BACKWOODS, GET THE 4x4 OF BOLT ACTION CENTERFIRES.



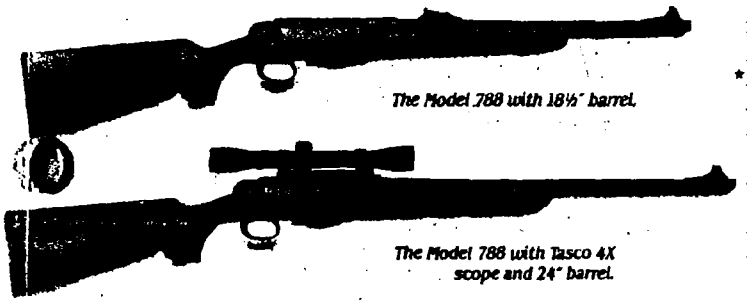
The Model 788 is one hardworking, high-value package. It's the bolt action rifle that combines clean, good looks with the kind of no-nonsense performance we all need today. Long known for accuracy, the 788 has earned its keep as the kind of precision-built big-game and varmint rifle you don't have to baby.

The 788's receiver, milled from a solid ordnance-quality steel billet, has nine locking lugs for backup strength. It's drilled and tapped for scope mounts. (On selected models, a Tasco 4-power scope with 30-30 reticle is available.)

All our centerfire barrels are made of Remington special steel. They're fitted with standard one-piece blade-ramp front sights and V-notch rear sights with lock-screw adjustments for elevation and windage. The safety switch is the positive, fast-action thumb type.

The 788 rifle is available in 7mm-08 Rem. Teamed up with a shorter 18½" barrel, it gives hunters true carbine-handling ease with potent downrange performance. The 7mm-08 Rem. makes the most of the larger capacity of its necked-down 308 Win. case and the higher retained velocity and energy of the ever-popular 7mm bullet. The 788 is also available in five other calibers.

The all-business nature of the 788 is shown in its classic, straight-line stock. It insures a more consistent eye-and-sight alignment, lower recoil sensation, and less muzzle jump. This rifle also has a deeply curved, thick pistol grip; a fluted comb, wide fore-end, recessed floor plate, polished bolt, and rich walnut finish.



The Model 788 with 18½" barrel.

The Model 788 with Tasco 4X scope and 24" barrel.

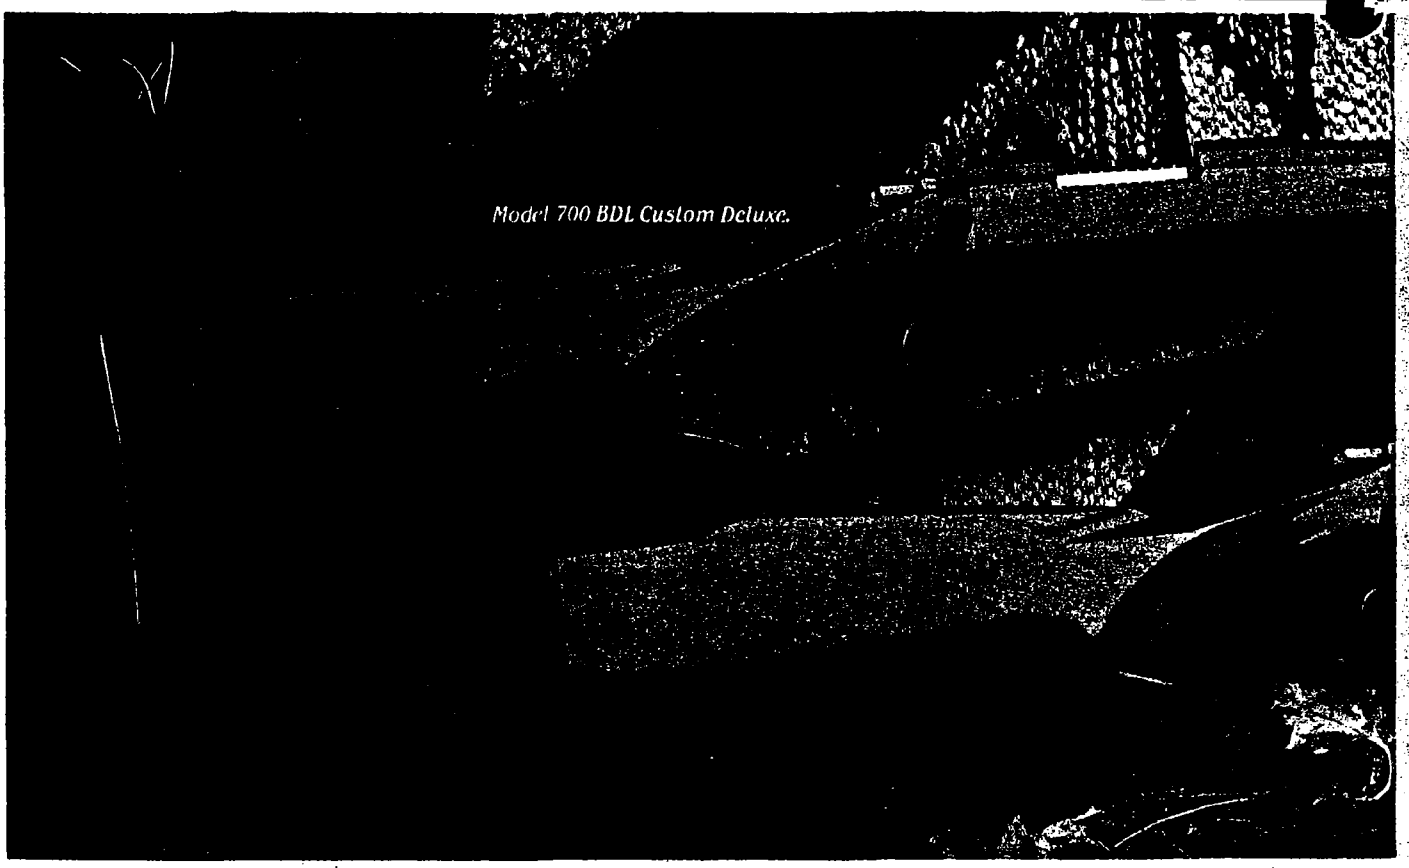
1982

700s: TOUGH

NOBODY BUILDS A STRONGER ACTIO



Model 700 BDL Custom Deluxe.

Before you buy any centerfire rifle, you owe it to yourself to check out a Model 700. You'll know instantly that this rifle's action is probably the toughest, yet smoothest, available today.

We built it that way. The bolt face, barrel, and receiver surround the cartridge head with three rings of solid steel. There's not a single extractor cut to weaken it. The receiver itself is precisely machined from a single billet of ordnance-quality steel, then vibra-honed to ensure the smoothest functioning. Every 700 has a polished anti-bind bolt.

The Model 700 has become America's best-selling rifle because it teams up accuracy, dependability, long-lasting value, and choice with undeniably good looks.

Hunters praise the extra measure of confidence a 700 gives them. They know it's built to perform the way they want it to, shot after precise shot. And, in big-game calibers, they like its versatility—it can deliver flat-shooting bullets at extra-long ranges one day, yet works equally well at close range or in heavy cover the next.

From superaccurate varmint and metallic silhouette calibers to rifles able to handle the largest North American and African big game, there's one 700 that's made just for you.

Our 700s are precision-machined, hand-assembled, rigorously inspected, and individually test-fired. The value you'll appreciate if you ever sell your 700 is built in—at our one plant, right here in America.

As a 700 buyer, you have a wider choice of rifle styles. There's our traditional straight-line-stock "Classic," our custom-styled BDL and "Varmint Special," our value-leading ADLs, and our special-order

he BDL and heavy-barreled "Varmint Special" models fea- e a walnut Monte Carlo stock, full ekpiece, positive-cut skip-line ckering, black fore-end tip, high- re blueing, hinged floor plate, ig strap, and quick-release vels.

amous sports writer Jim Car- michel said our 700 "Classic" probably the best-looking, most otable hunting rifle ever offered in American firearms maker." It ures a walnut stock, full-pattern checkering, special satin wood sh, brown rubber butt pad, sling- el studs, and a hinged floor

ven our cost-conscious ADL model has an American walnut k, custom skip-line checkering, a hand-applied DuPont RK-W d finish. No one who sees it d believe it's our lowest-priced

ll 700 receivers are drilled and tapped for scope mounts. main models feature presenta- style recoil pads. Their barrels are made of Remington special steel. The way they're built helps to make the 700 the world standard of bolt action strength and accuracy.

Sights and safety switches.

The ADLs feature blade-ramp front sights with flat-faced gold beads. The BDL's front sight is hooded. Rear sights on ADLs and BDLs are adjustable for elevation and windage. All sights are easily removable. Our "Classic" and "Varmint Special" models have no sights; the latter is fitted with front and rear target-rifle scope blocks. Model 700C "Custom" sights are optional.

The safety switch on each Model 700 is the fast, positive thumb type. Left-hand models have a left-hand safety switch.

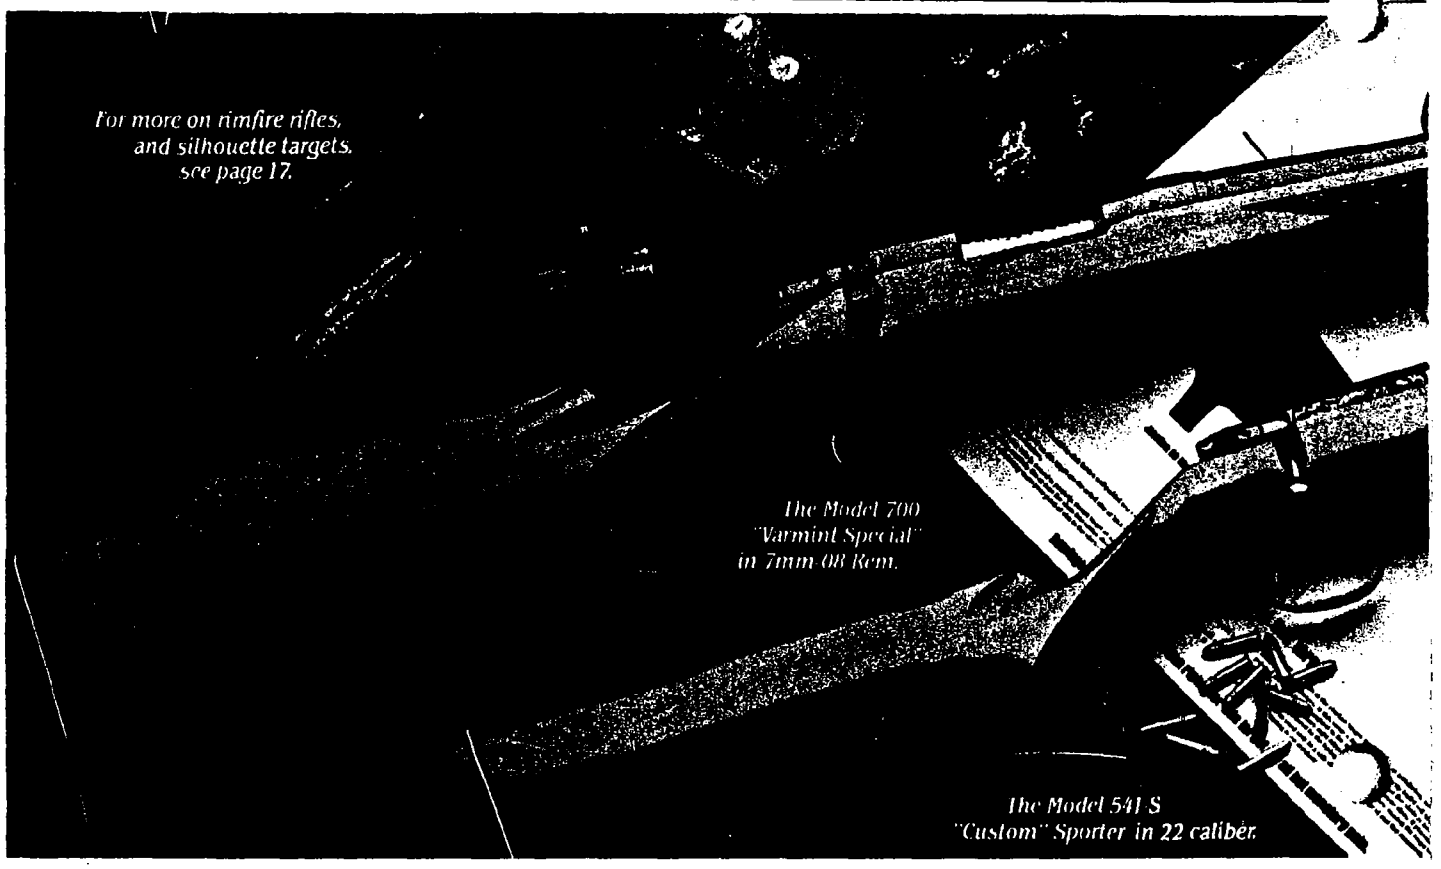
REACH FOR TH

SET YOUR SIGHTS ON OUR MOST ACCURATE



Remington has whatever you need whether you're shootin' iron or out to set records in any other precision target sport.

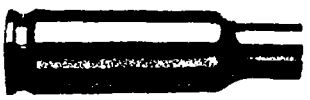
"Rambusters" is our name for a family of matched firearms, ammunition, and components. All designed to work together, to improve your odds in all metallic silhouette events.

Take our "XP-100" Silhouette. This centerfire pistol, with an action that's long been the heart of many custom-made competition guns, has been specially refined for metallic silhouette shooting. Right out of its box, the "XP-100" is more gun than virtually any custom pistol you can buy. It has a 14¾" barrel, chambered for an ideal silhouette cartridge—the 7mm BR Rem.

Then there's the Model 700 "Varmint Special," chambered for the innovative 7mm-08 Rem. or .308 Win. cartridges. Here the 700 action, renowned for its strength and accuracy, can be yours in two great metallic silhouette calibers.

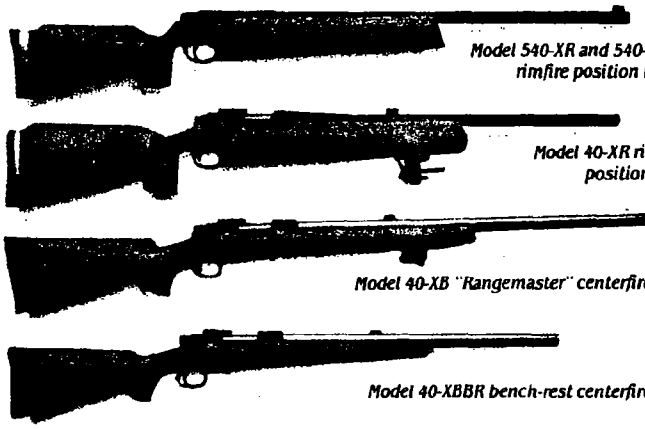
For rimfire metallic silhouette events, Remington puts more power and performance behind every penny in its Model 541-S "Custom" Sporter. You get an adjustable match trigger, artillery-style bolt with six locking lugs, double extractors and distinctive styling.

Remington also offers the bench-rest and position-target shooter a wide range of high-value, high-performance rimfire and centerfire rifles. Read more about all of them to the right.



The case for winning: the Bench Rest Remington.

In 1979 we introduced an innovative universal unprimed brass case that starts with the external configuration of the 308 Win. case. With thinner walls, its easily formed case can be shortened to 1.520" and necked down to fit .224, 6mm, or 7mm bullets. The case also features a small-rifle primer pocket for proven consistency in bench-rest competition. It's the makings of a truly great bench-rest and metallic silhouette cartridge. We also make the small No. 7½ BR primers, built to withstand the higher-pressure loads of this potent combination. **Order Numbers:** Unprimed BR cases—URBR; No. 7½ small-rifle primer—X22628.



Model 540-XR and 540-XRJR rimfire position rifles.

Model 40-XR rimfire position rifle.

Model 40-XB "Rangemaster" centerfire rifle.

Model 40-XBBR bench-rest centerfire rifle.

For more on silhouette rifle sports, write NRA, Silhouette Dept., 1600 Rhode Island Ave., N.W., Washington, DC 20036. Handgunners, write IHMSA, Box 1609, Idaho Falls, ID 83401.

The Models 540-XR & 540-XRJR.

These single-shot 22 L.R. target rifles feature a position-style Monte Carlo stock, with a cheekpiece, thumb groove, five-way adjustable butt plate, and full-length guide rail. Front swivel block, sling, and swivels are optional extras. There is a common sight alignment with scope or iron sights. The trigger is adjustable from 1 to 5 lbs. Both models have a 26" medium-weight target barrel, countersunk at the muzzl 540-XRJR model has a 1¾" shorter stock.

* Note: The 7mm BR Rem. is not available as a factory-loaded cartridge.

The Model 40-XBBR.
The same basic rifle as our Model 40-XB "Rangemaster" the XBBR is chambered primarily for bench-rest target shooting. Available only as a single-shot, you can order the 40-XBBR in these calibers: 22 BR Rem., 222 Rem., 223 Rem., 6x47, 6mm BR Rem., and 7.62mm NATO (308 Win.).

The 40-XBBR has a match-type trigger, adjustable from 1½ to 3½ lbs. A special 2-oz. trigger is available at extra cost.

Length of Pull: 12". **Overall Length:** 38" with 20" barrel. 42" with 24" barrel. **Average Weight:** 9¼ lbs. with 20" barrel. 12 lbs. with 24" barrel.

The Model 40-XC National Match Course Rifle.
Our centerfire 40-XC has the same improved position-style stock as our rimfire 40-XR rifle, pictured. The 40-XC is available as a 5-shot bolt-action repeater in 308 Win. (7.62mm NATO). Its receiver is drilled and tapped for metallic sights; scope-mount bases are installed. The trigger is adjustable from 2 to 4 lbs.

40-XC National Match (7.62mm NATO only)	6002

Length of Pull: 13½". **Overall Length:** 42½" with 24" stainless steel barrel. **Weight:** 11 lbs without sights.

The Model "XP-100."
Here's the unique single-shot centerfire, bolt-action pistol that has become a legend for its strength, precision, balance, and accuracy. Still chambered for the 221 Remington "Fire Ball" with a vent rib 10½" barrel, it's also available in 7mm BR Rem. with a 14¾" barrel. In this latter configuration you have what has been called the perfect factory-made metallic silhouette handgun for "unlimited" events.

Both "XP-100" handguns have one-piece DuPont "Zytel" nylon stocks with universal grips, two-position thumb safety switches, receivers drilled and tapped for scope mounts or receiver sights, and match-type grooved triggers.

"XP-100" (221 Rem. "Fire Ball")	5470
"XP-100" (7mm BR Remington)	5471

Overall Length: 16¾" with 10½" barrel, 21¼" with 14¾" barrel. **Weight:** 3¾ lbs. with 10½" barrel; 4¼ lbs. with 14¾" barrel. **Twist:** 1 in 12" R.H. (#5470); 1 in 9¼" R.H. (#5471).

Weights, stock dimensions, and wood-grain figure may vary according to the individual firearm.

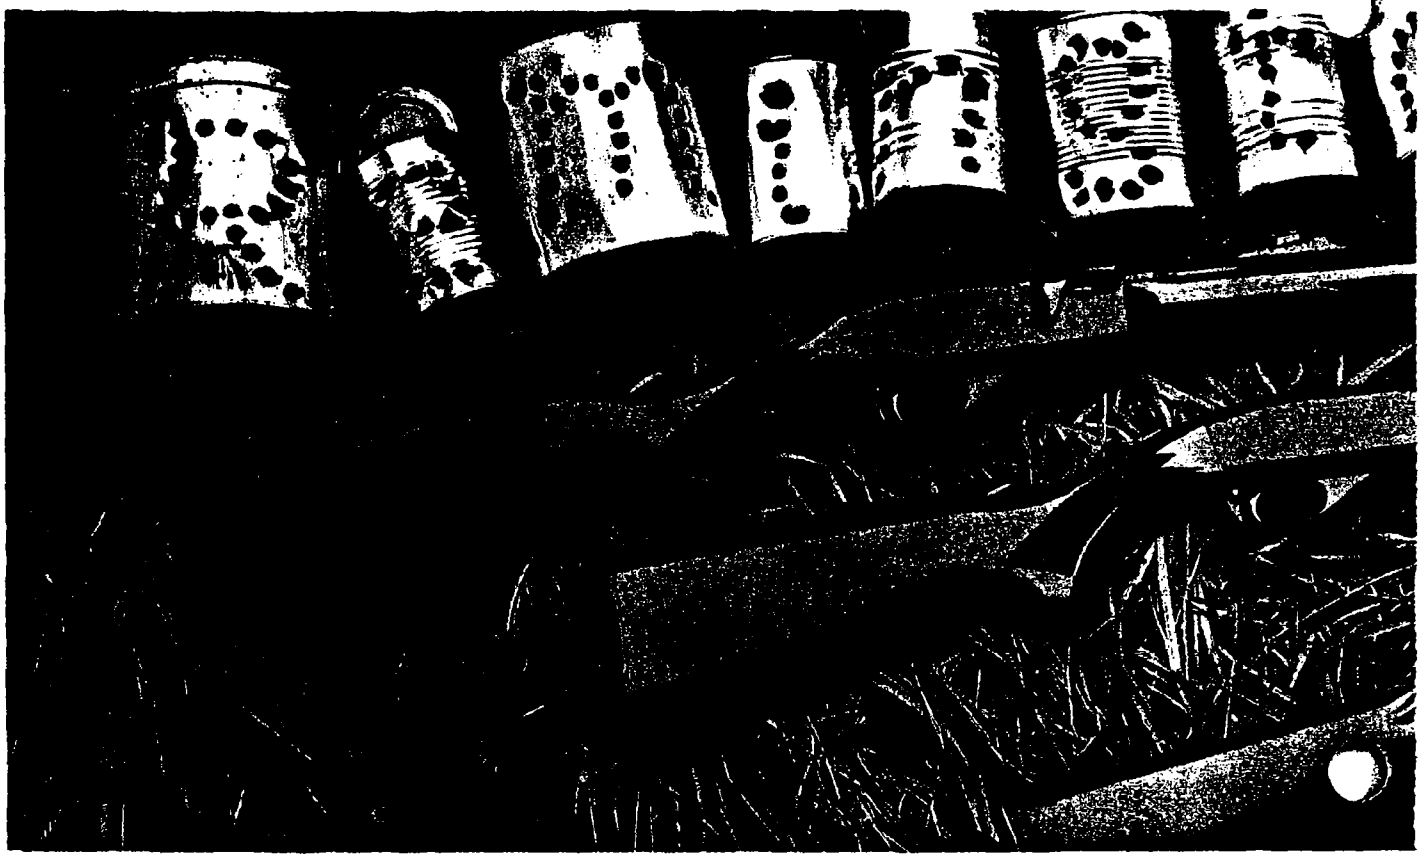
REMINGTON

WITH SEVEN AUTOLOADERS, FIVE BOLT ACTIONS.



From small-game hunting to metallic silhouette shooting, from precision paper targets to casual plinking fun, there's a Remington 22 built just for you. Each is built to last, because it's made and serviced right here in America.

Choose your action. We have autos, pumps, and bolt actions. Some have scopes, One is for southpaws. Two are downsized for smaller-sized shooters. And one, our famous "Nylon 66," is so durable that it has a lifetime stock warranty. Choice, value, and American-made quality and value that show make our 22 family first in its field.

The autoloaders.

The Remington 552 "Speedmaster" shoots Short, Long, and Long Rifle cartridges interchangeably. The deluxe walnut-stock BDL model has custom checkering, a rich DuPont RK-W wood finish, and sights you'd expect on a big-game rifle. The standard Model 552A has an adjustable rear sight, bead front sight, and a walnut-finish hardwood stock.

The tubular magazine holds 20 Short, 17 Long, or 15 Long Rifle cartridges. With the tube out, it's an ideal single-shot rifle for beginners. Both models feature a receiver grooved for tip-off scope mounts. And a positive cross-bolt safety switch.

The pump actions.

Remington builds America's only 22 pump action rifle: the Model 572 "Fieldmaster." Like our Model 552 autos, it accepts all three types of 22 cartridges interchangeably. The 572 has the walnut stock, custom checkering, Du Pont RK-W wood finish, and the sights of our best big-game pumps. Even the budget-priced 572A model has clean, crisp styling and a no-nonsense walnut-finish hardwood stock that's built to take abuse. The 572's capacities, sights, and safety switch are identical to those of our 552 autoloaders.

Our basic bolt actions.

Even our low-priced rimfire rifles give you plenty for your money. Use the Model 581 as a 6-shot repeater, or convert it in minutes to a beginner's single-shot (the adapter is included). The Model 582's magazine tube takes up to 20 Short, 15 Long, or 14 Long Rifle cartridges.

Both rifles have a walnut-finish Monte Carlo stock, an ordnance-quality steel receiver grooved for a scope, and adjustable sights. The Model 581 is available with a shorter stock that is perfect for younger shooters. A left-hand version is available.

Our top-of-the-line 22.

The Model 541-S "Custom" Sporter is more than just a superbly accurate bolt action 22. It's deluxe in every way. And very popular with metallic silhouette shooters and discriminating small-game hunters alike.

On its American walnut stock you'll find rich, positive-cut checkering, a distinctive butt plate, grip cap, and fore-end tip. Even the all-steel receiver features decorative scrollwork engraving. The 541-S, chambered for Short, Long, and Long Rifle 22s, has an adjustable match trigger, artillery-style bolt with six locking lugs, and double extractors. And a receiver that's drilled, tapped, and grooved for scope mounts.

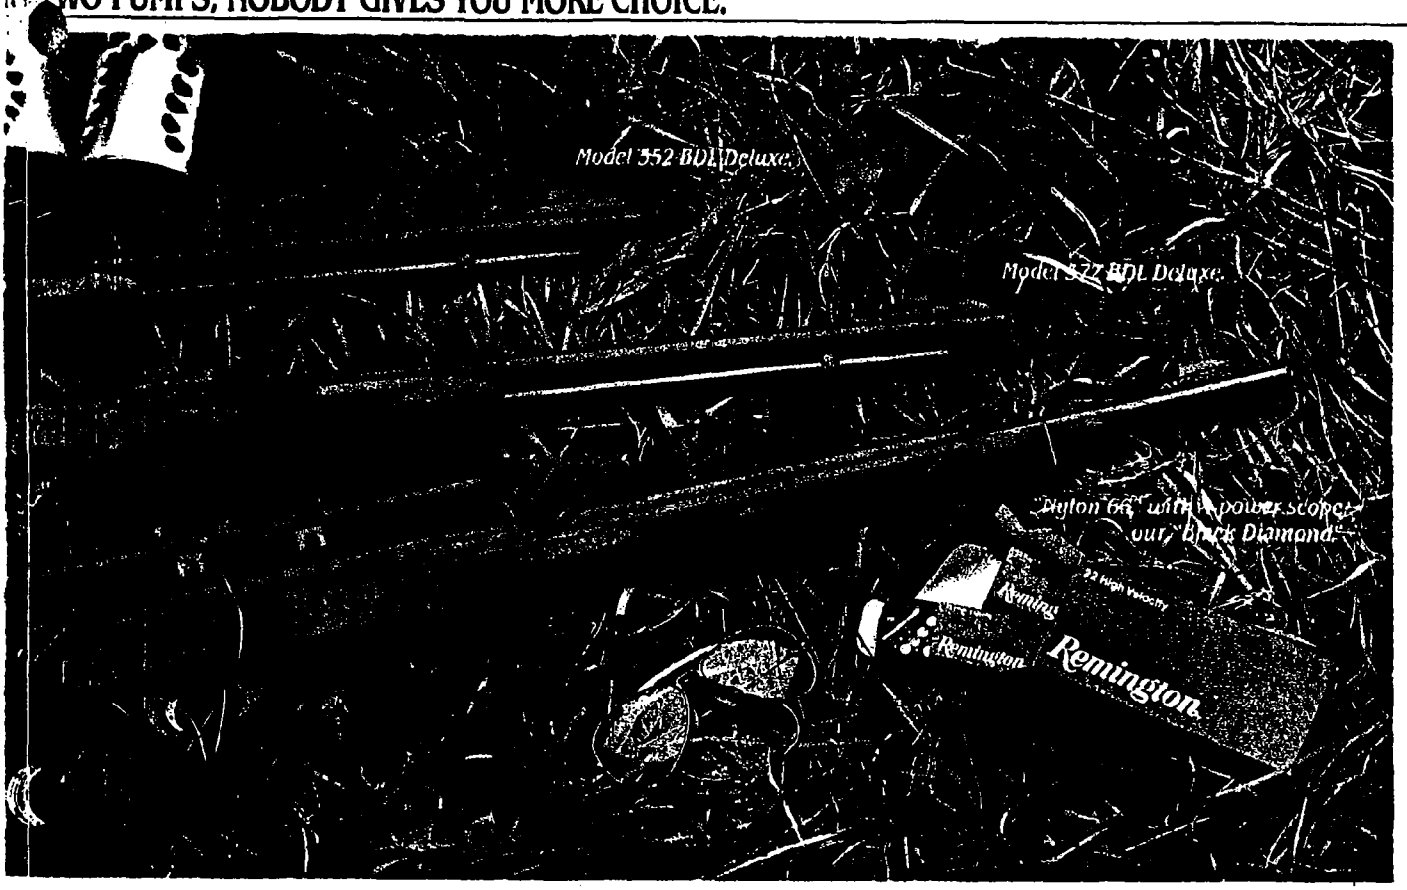
RIMFIRES. 1982

TWO PUMPS, NOBODY GIVES YOU MORE CHOICE.



The lifetime 22s.

When you buy a "Nylon 66" autoloader, you own the world's most durable rifle: it's the only one made anywhere that carries a lifetime warranty on its stock. Made of DuPont structural nylon, it won't warp, crack, chip, fade, or peel. If it does, we'll replace it—free.

Not only is there nylon in the stock, but all action surfaces ride smoothly on nylon bearings. So there's no need for lubrication. Ever.

Our "Nylon 66" rifles are featherweights at only 4 lbs. They're available in five models and two stock colors. Some have 4-power scopes. All have a capacity of 14 Long Rifle cartridges. By removing the magazine tube in the stock, you can change it into a single-shot.

Metallic silhouette shooting made easy.

Your participating Remington dealer can tell you how to acquire a complete, low-cost set of four iron animals, sized to meet precise NRA requirements for rimfire silhouette competition. Ask him for details, or write us (see address on back cover).

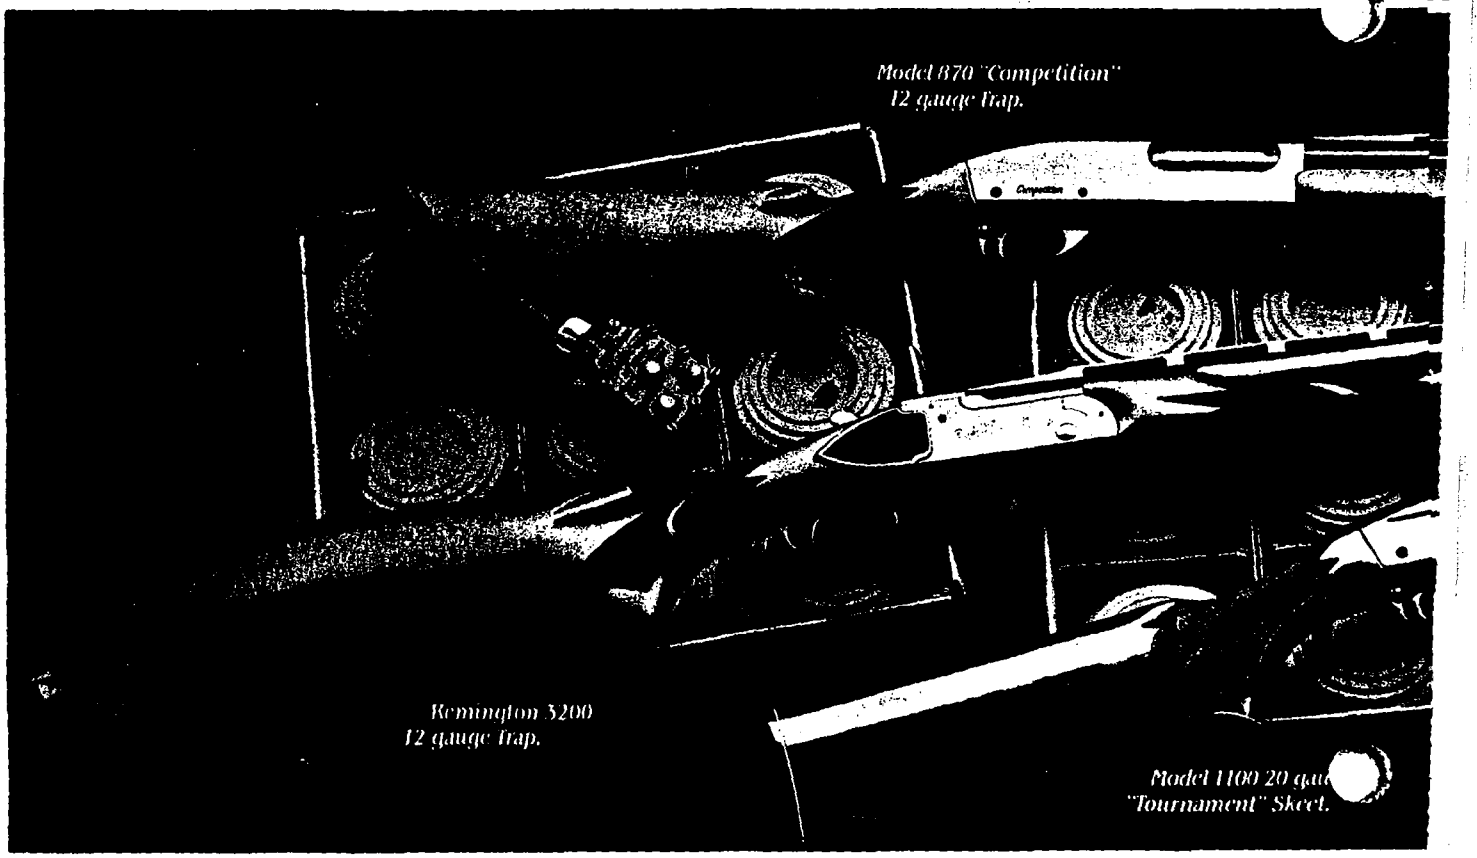
SKEET &

THE ULTIMATE COMPETITOR, OUR MODEL 870 "COMPE



For decades now, one name has led the list in target-breaking breakthroughs: ours. That's even truer now, as Remington brings you the world's most innovative trap gun.

The Model 870 "Competition."

This is the first target shotgun that has the pointability of a single-barrel, the low recoil sensation of a Model 1100 autoloader, and the proven reliability of a Model 870 pump.

The "Competition" single-shot trap gun has a unique gas-assisted recoil-reduction system. It makes you harder to beat, because you can concentrate more on breaking targets, unaffected by flinching or fatigue. The "Competition's" kind of comfort really shows up on those 300-bird days.

With a richly figured stock and full-length fore-end, the "Competition" is unlike any other 870. It features deep, positive-cut checkering and a hand-applied satin wood finish. The receiver sports a nonglare matte finish.

The Remington 3200 matched set.

For skeet competitors, our ultimate all-events shotgun is our limited-production 3200 skeet gun and small-gauge barrel set. With the .410 bore and 28, 20 and 12 gauge, the point of impact, sighting plane, weight, and balance are virtually identical. Smaller-gauge barrels fit snugly into the 12-ga. fore-end without unsightly wood-to-metal gaps.

The 3200's wood is select American walnut. With deep-cut checkering, a rich low-lustre finish, and finely polished barrels, its appearance matches its high performance. The set comes complete with a custom-fitted luggage case.

"Automagic" that never quits.

The Model 1100 story of great pointability, low recoil, and reliability is told daily on score sheets and in clubhouses everywhere. There are no less than 15 different ways to have an 1100 help you break more birds, in trap or skeet.

Now special weight-equalizer kits give our three smaller-gauge 1100s the balance and pointability that's nearly identical to that of our 12-ga. model. It's the closest thing yet to a matched set, but at a fraction of the cost. Your full-service Remington dealer has details.

Check the charts and you can see that nobody can offer you a wider line of value-packed, quality-built clay-target shotguns than we do. Autos, pumps, over-and-unders, in the barrel lengths, chokes, and gauges you need to take you from league shoots to the big leagues.

EXTRA BARRELS.

1982

DOZENS OF WAYS TO GET EXTRA DUTY FROM EVERY MODEL 1100 AND 870.

With extra barrels, your field gun can become a target gun, your goose gun an ideal deer gun. In seconds. You're the expert when you own the special extra barrel matched to the job.

Nobody offers you more choices of extra barrels than we do. There are even extra barrels for the left-hand versions of both our 870s and 1100s.

One thing to remember.

Barrels must be matched to the correct receiver, and within the proper gauge. Extra interchangeable 2¾" chambered barrels, available for Magnum receivers, will handle all 2¾" shotgun shells within the same gauge.

For the full story, check your dealer's ***Remington Extra Barrel Selector.***

Remington

FIRST IN THE FIELD

R2525589

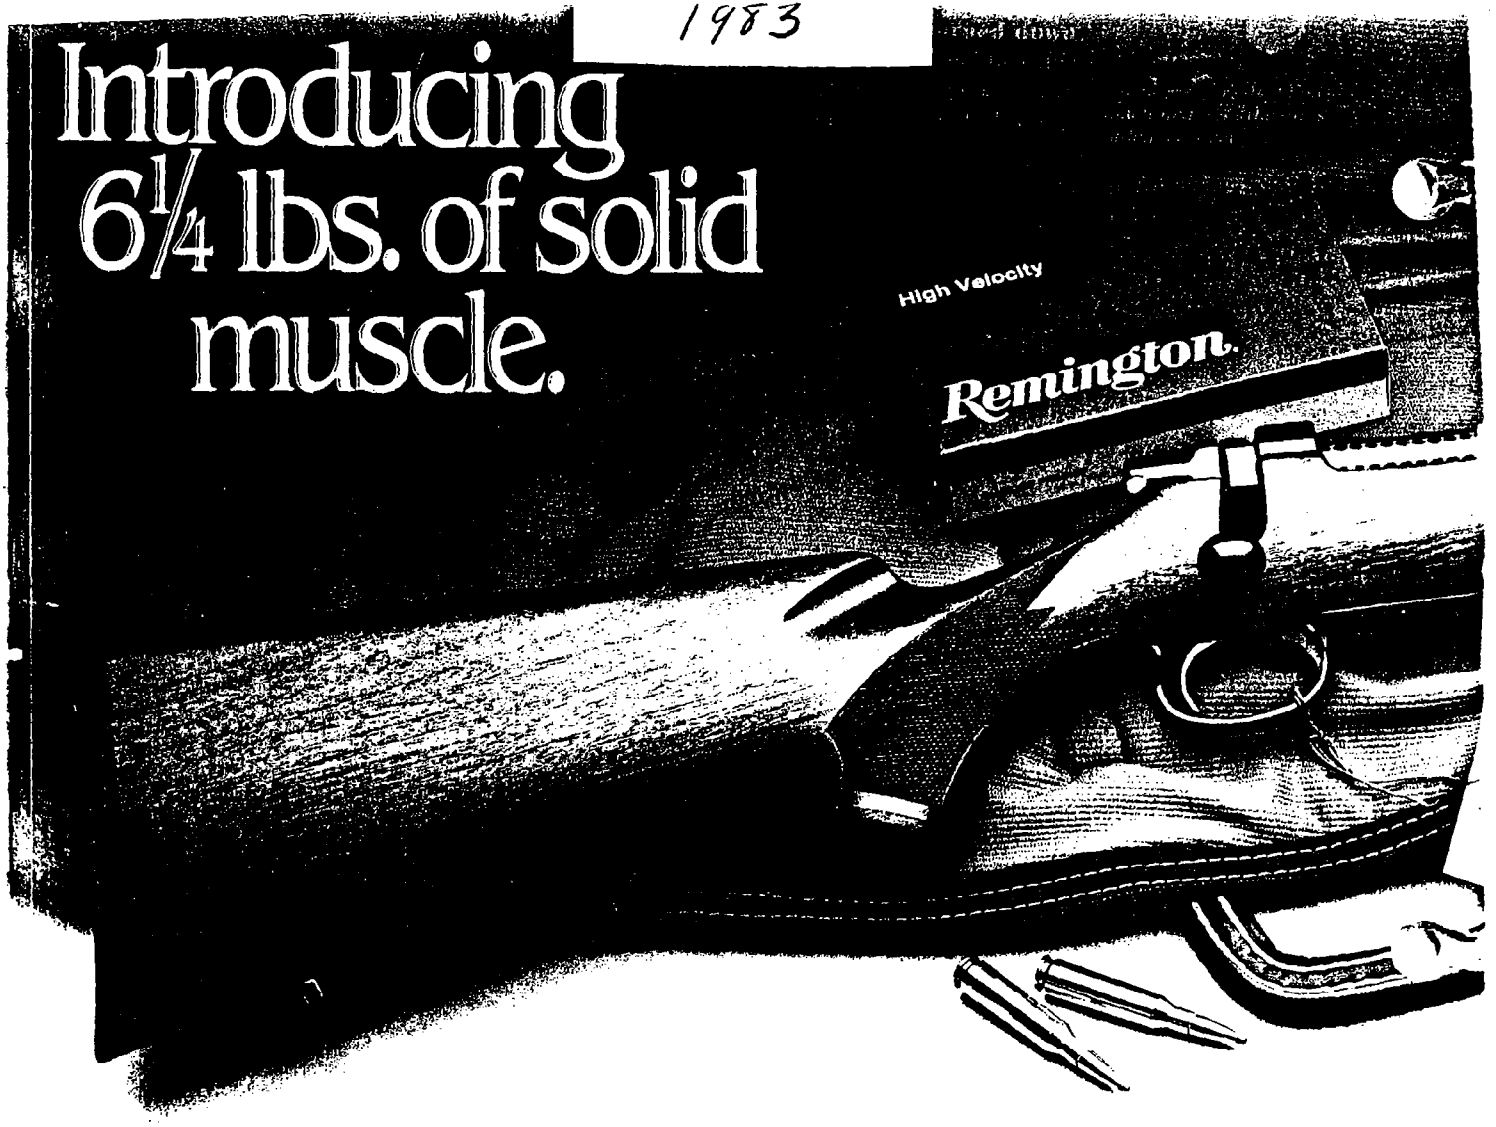
[redacted] 1983

760 [redacted]

R2525590

1983

Introducing 6¼ lbs. of solid muscle.



On every Remington you'll find some words that are missing on all too many products these days: "Made in U.S.A." That says plenty about the way we've been making America's most popular firearms since 1816.

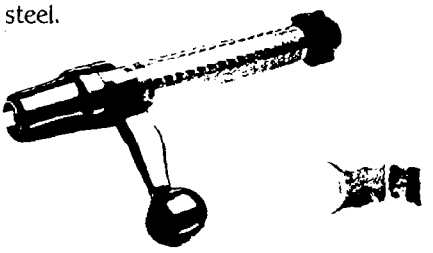
Our latest "First in the Field." For 1983, we're offering hunters what is certainly the most innovative centerfire rifle in over a decade. The Remington Model Seven.

From tons of research comes the lightest, most compact Remington centerfire rifle ever. And along with the strength of its bolt action and five high-velocity calibers, this new rifle has the best power-to-weight ratio of any rifle made. In America or anywhere else.

Shoulder a Model Seven. You'll notice immediately it's compact yet solid, ruggedly built yet incredibly light. Fact is, the Seven gives today's hunter the lightness and quick handling of traditional scabbard rifles. With none of the shortcomings of their actions or caliber choice.

The Model Seven didn't start as a heavy rifle that had its barrel turned down or lopped off. This rifle came fresh off a drawing board, with its light weight and ideal balance designed in from the start. There was never a compromise in quality, either; this new bolt action rifle is the state of the art in wood and metal. American walnut and blued steel.

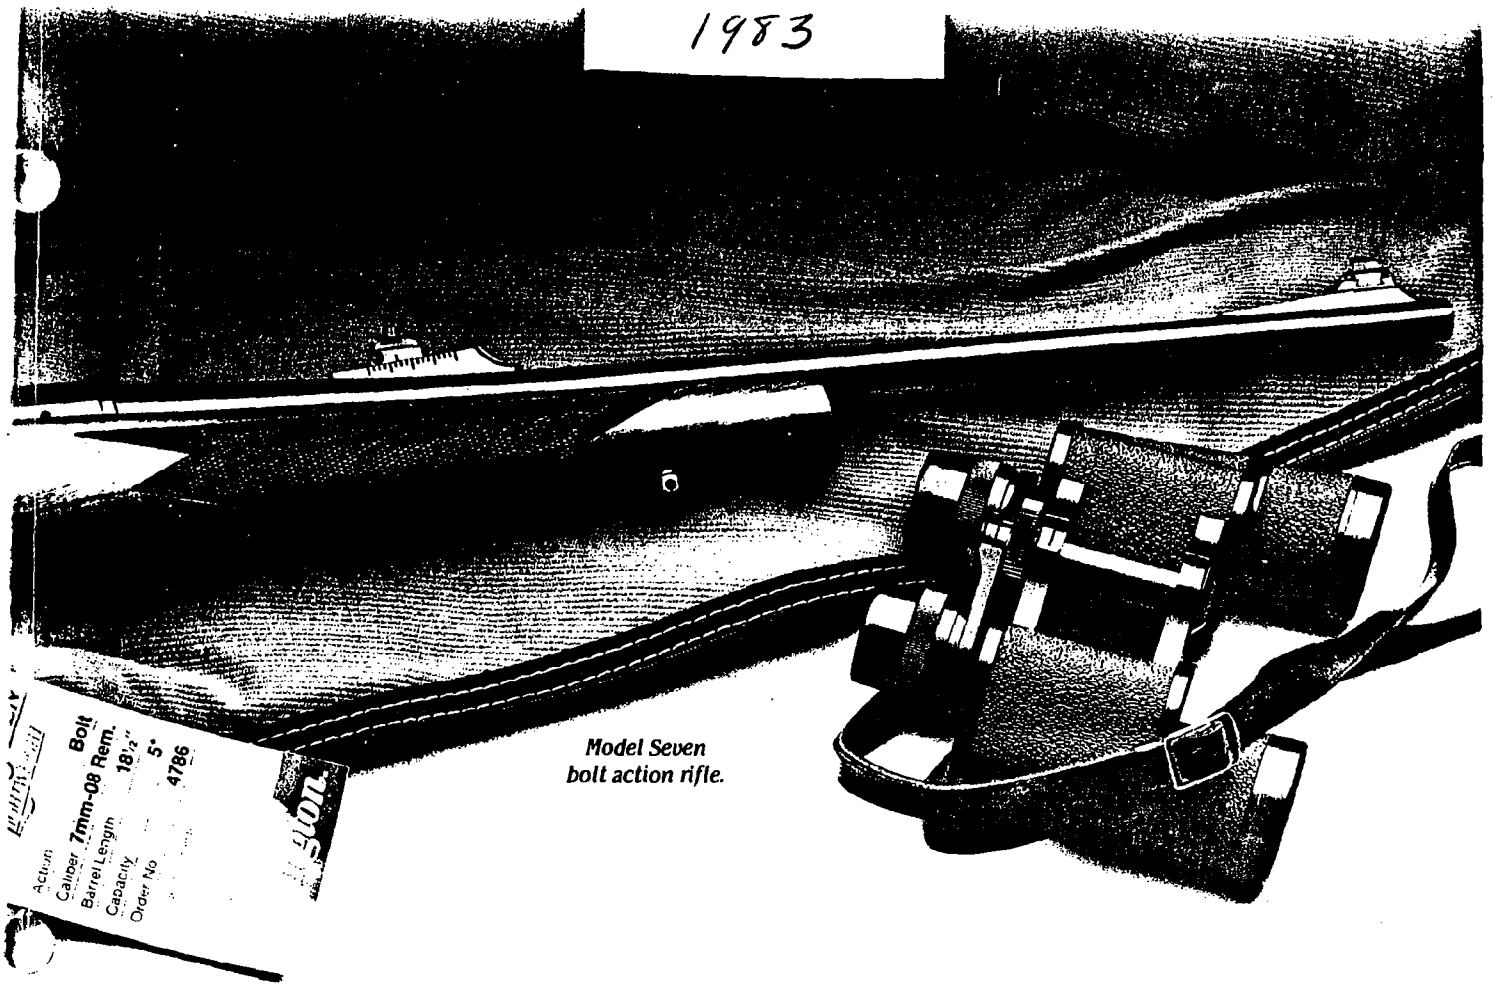
Check the chart. You'll see that the Seven is available in five modern, high-performance calibers. Its exclusive short action surrounds the cartridge head with three rings of solid steel.



The highly polished bolt, machined from the finest ordnance steel.

R2525591

1983



Model Seven bolt action rifle.

Every Model Seven is built to the accuracy standards of our famous Model 700, and is individually test fired to prove it. Its 18½" Remington special steel barrel is free-floating out to a single pressure point at the fore-end tip. And there is ordnance quality steel in everything from its fully enclosed bolt and extractor system to its steel trigger guard and floor plate. Ramp front and fully adjustable rear sights, sling swivel studs are standard.

Sure to be appreciated is the stylish turn of the Seven's schnabel fore-end. The slim, satin-finished stock and cut checkering look great and perform like a Remington First in the Field."

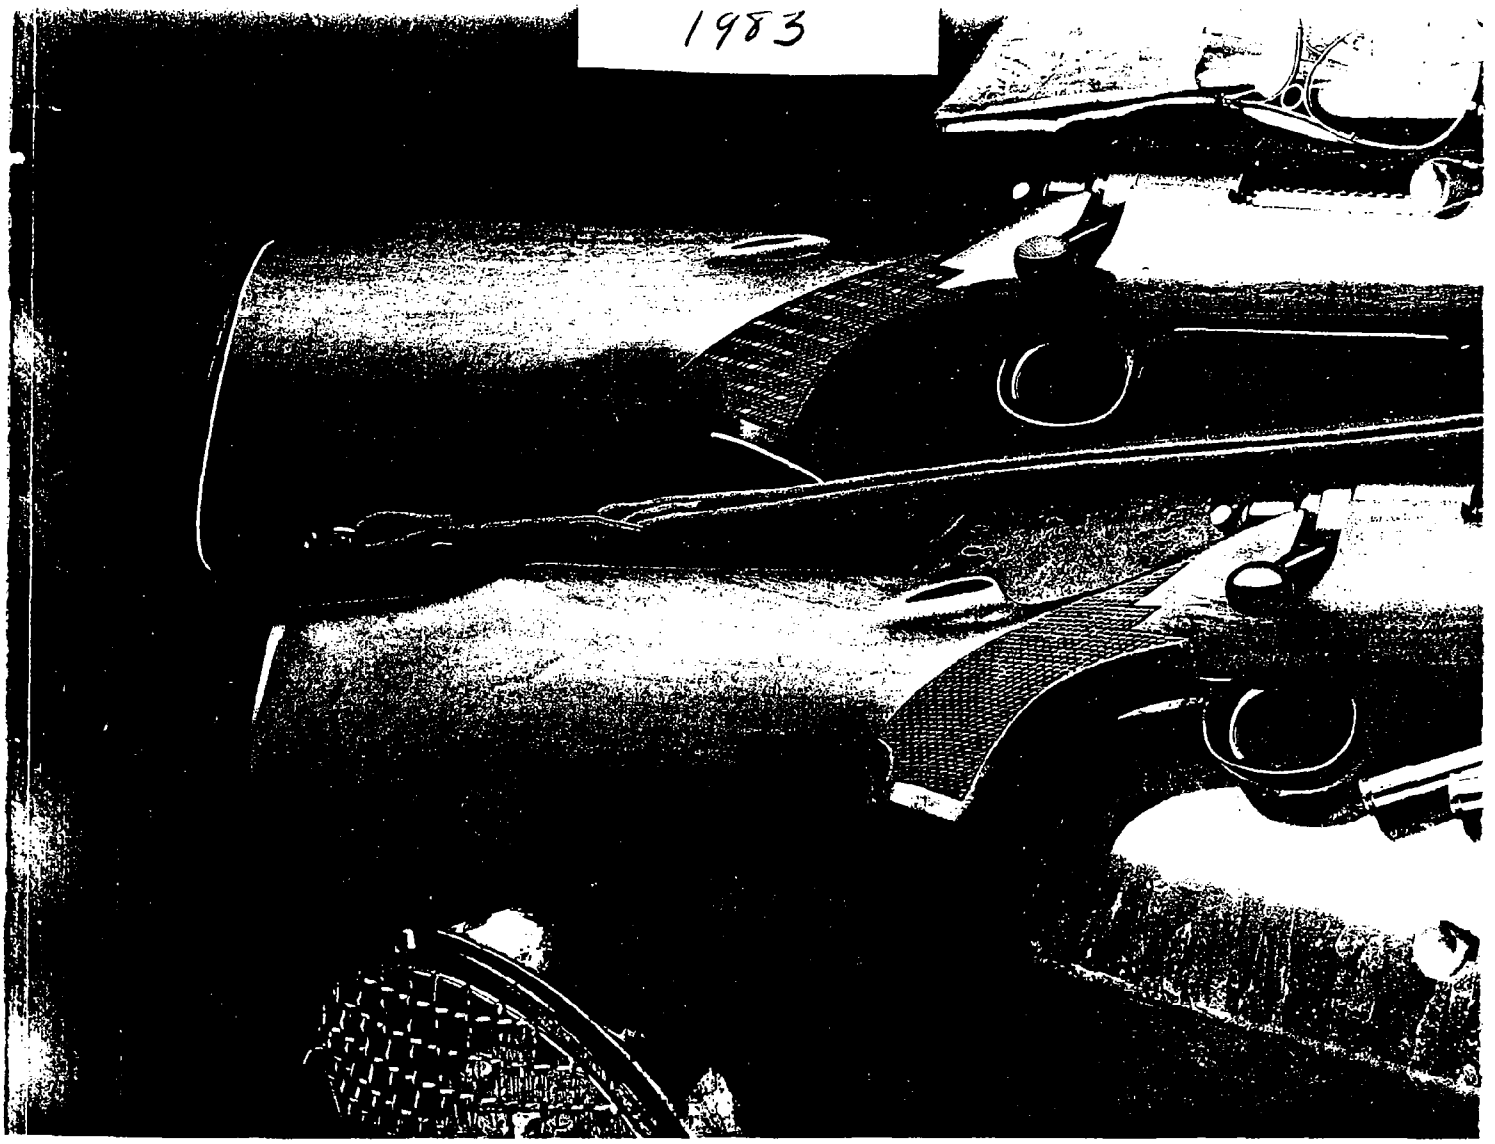
1983



Now the rifles with the strongest actions and the largest following are better than ever.

Our economical Model 700 ADL is handsomely restyled for 1983, and available in nine potent calibers. Dollar for dollar, no other bolt action rifle in America can match its price/performance ratio.

Our 700 "Classic" is now chambered in a .30 caliber legend: the 300 H & H Magnum. Available in limited quantities only through your full-service Remington dealer on a first come, first-served basis.

For the first time ever, the 700 BDL will be chambered in a varminter's favorite: the 223 Rem.

The 700s—tough actions to follow. Hunters around the world claim these rifles have the toughest, smoothest actions available today. That's because they have receivers machined from single billets of ordnance quality steel. The bolt face, barrel, and receiver surround the cartridge head with three rings of solid steel. And there are no extractor cuts to weaken it.

Each 700 is precision-crafted, hand-assembled, inspected, and test-fired. Every part is made right here in the U.S.A.; that's been the Remington way since 1816.

There's a Model 700 for every kind of hunter, and every hunter's taste. If you want a Monte Carlo stock, high-gloss finish, plus many custom touches, you'll want a 700 BDL. Prefer a traditional straight-line stock and satin finish? Look at our 700 "Classic." Or for a stylish combination of both, at a lower cost, see our new ADL.

If you want the strength of a 700 action in a made to order rifle, you'll want a 700 "Custom."

What's new in the 700 ADL. For 1983, the ADL has a slimmed down pistol grip, restyled forend, cut checkering in a new pattern, and a satin wood finish on its Monte Carlo stock. And standard sling swivel studs.

The "Classic" adds a caliber. Outdoor sportswriter Jim Carmichel said the "Classic" is "probably the best looking, most shootable hunting rifle ever offered by an American firearms maker." Wait till he sees our newest "Classic" the 300 H & H Magnum.

We've recently offered sportsmen two other limited production "Classics" in long standing favorite calibers. The 7mm Mauser (7 x 57) and 257 Roberts "Classic" sold out fast. The 300 H & H should

1983

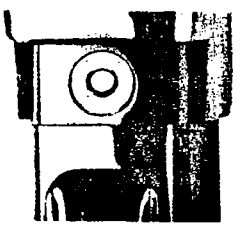
Highly styled yet practical. Monte Carlo stock.

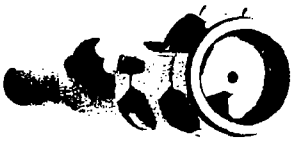
Before that big buck becomes a blur, your new Model Four or Six rifle is on him. With the lightning-fast actions that give you the quickest second shot in the woods. Just in case you need it.

We've been making autoloading and pump action centerfire rifles longer than anybody. And every part of every one of them has been designed, built, and deep-woods tested right here in America.

An informative, elegant touch.



A bolt you'd expect in a bolt action.



The Four and Six are the smoothest, best-balanced, most dependable rifles ever made in their action types. Our experience in making autoloading rifles goes back over 75 years; we've built pumps for over 70.

The Model Four's autoloading action has a unique gas-metering system. The double action bars on the Six slide fast and easy. They totally eliminate twisting or binding. For added strength on rifles, the bolts have locking lugs you'd expect on the finest bolt action rifles. Receivers are milled from solid blocks of ordnance quality steel.

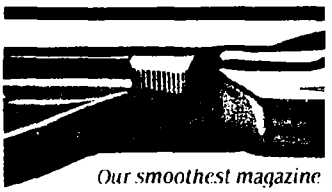
R2525595

1983

For hightailing game, our quick-reflex rifles.

Both rifles are loaded with custom touches, too. Like positive cut checkering on American walnut Monte Carlo stocks. And a Ram's head, indicating the caliber, embedded in blued steel. As extra cost options, you can customize your Four or Six with a flash pewter grip cap inscribed by wildlife sculptor Bob Kuhnhausen.

Four and Six have beefy, fast-functioning magazine release and rugged four shot magazine. Blade ramp front sights



Our smoothest magazine release yet.

and adjustable sliding-ramp rear sights are standard. Receivers are drilled and tapped for scope mounts. A positive, cross-bolt safety switch is fitted to all models.

A custom touch to set your Model Four, Six, or Seven apart.

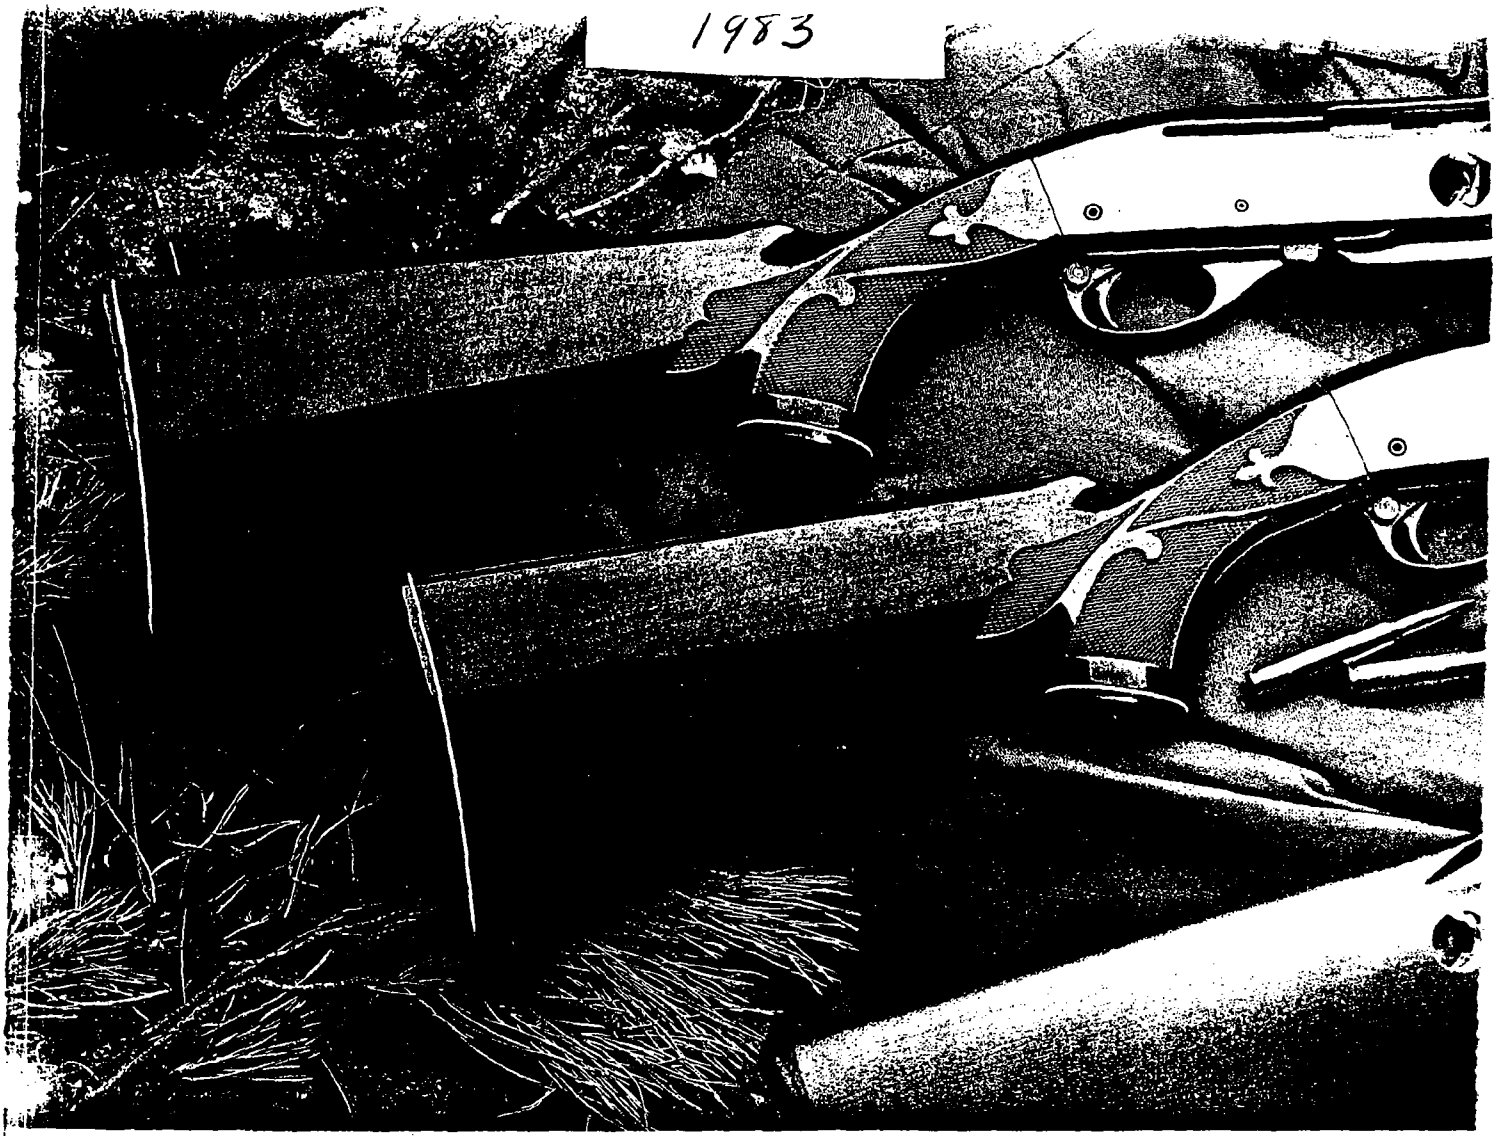
1983



Every Remington centerfire rifle is loaded with value, but three of our models combine their game-dropping performance with low price.

Choose your action. There's an economical Remington rifle in today's most popular types: autoloaders, pumps, or bolt actions.

The 7400 auto. Here's the rifle that gives you the mechanical innovations and power of our top-of-the line Model Four, but at a lower cost.

The 7400 has an improved gas-meter autoloading action. And a bolt tough enough to come from a bolt action rifle.

You'll find the Model 7400 in six of today's most popular varmint and big game calibers. Its blade-ramp front sight and adjustable sliding-ramp rear sight are standard. Receivers are drilled and tapped for scope mounting.

A sturdy, easy-functioning magazine release makes cold-weather changes of its 4-shot magazine a snap.

Both 7400 and 7600 rifles have traditional straight-line American walnut stocks with handsome checkering patterns.

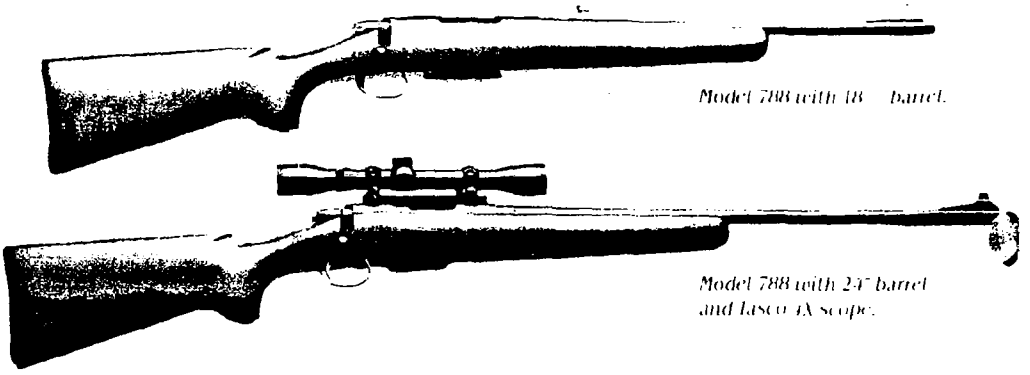
The 7600 pump. Even our lowest-priced pump has the same ordnance steel receiver, bolt, smooth-sliding double action bars, magazine release, sights, and cross-bolt safety switch as our high-grade Model Six.

In appearance, the 7600 is the good-looking twin of our 7400.

The 7600 is available in five favorite calibers, from 6mm Rem. to 308.

The 788 bolt action. We've been calling this rugged, no nonsense rifle the "4 x 4 of bolt action centerfires." No wonder.

Combining simple good looks with incredible accuracy the 788

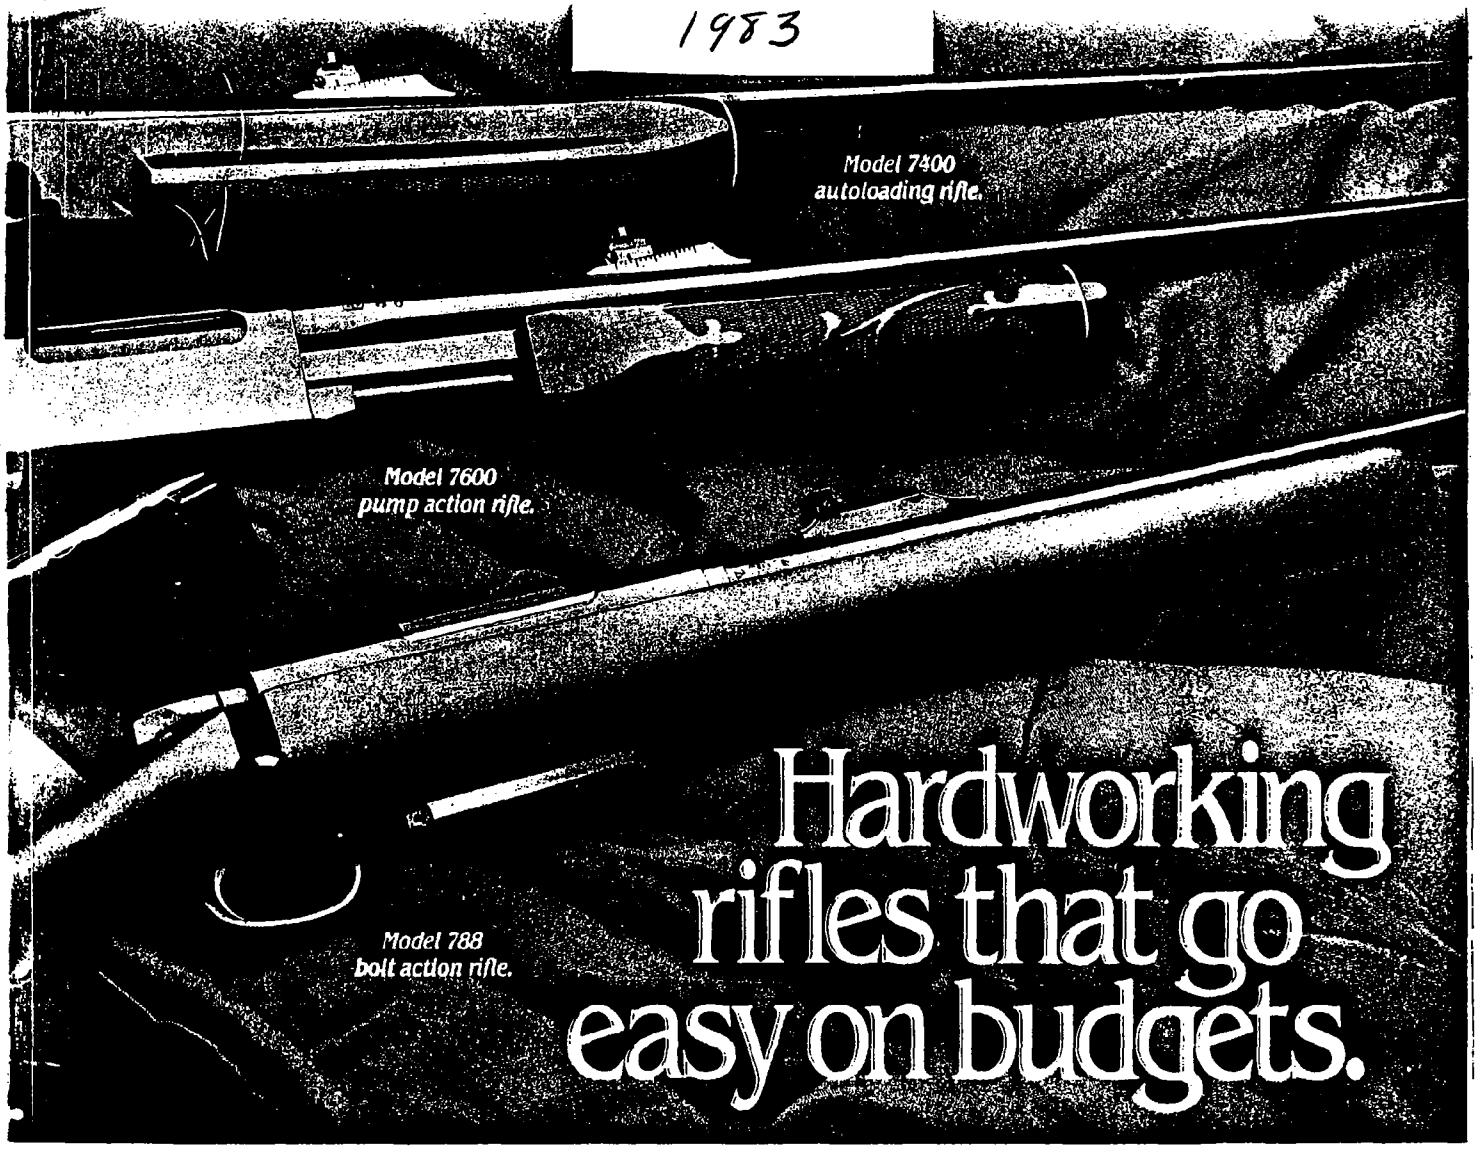


Model 788 with 18" barrel.

Model 788 with 24" barrel and Lasco 4X scope.

R2525597

1983



Hardworking rifles that go easy on budgets.

is one backwoods or mountain rifle you don't have to baby.

The 788's bolt and receiver are milled from ordnance-quality steel and have nine locking lugs for strength. The barrel is fitted into a one piece blade ramp front sight and an adjustable V-notch rear sight. The safety switch is the side action thumb type.

The 788's all business nature is reaffirmed with the classic lines of its straight hardwood stock. It ensures a more consistent eye and sight alignment, lower recoil sensation, less muzzle jump.

Put the rugged, refined 788 to work in one of six hard hitting calibers. From varmints to big game it gives you plenty. Without costing plenty for it.

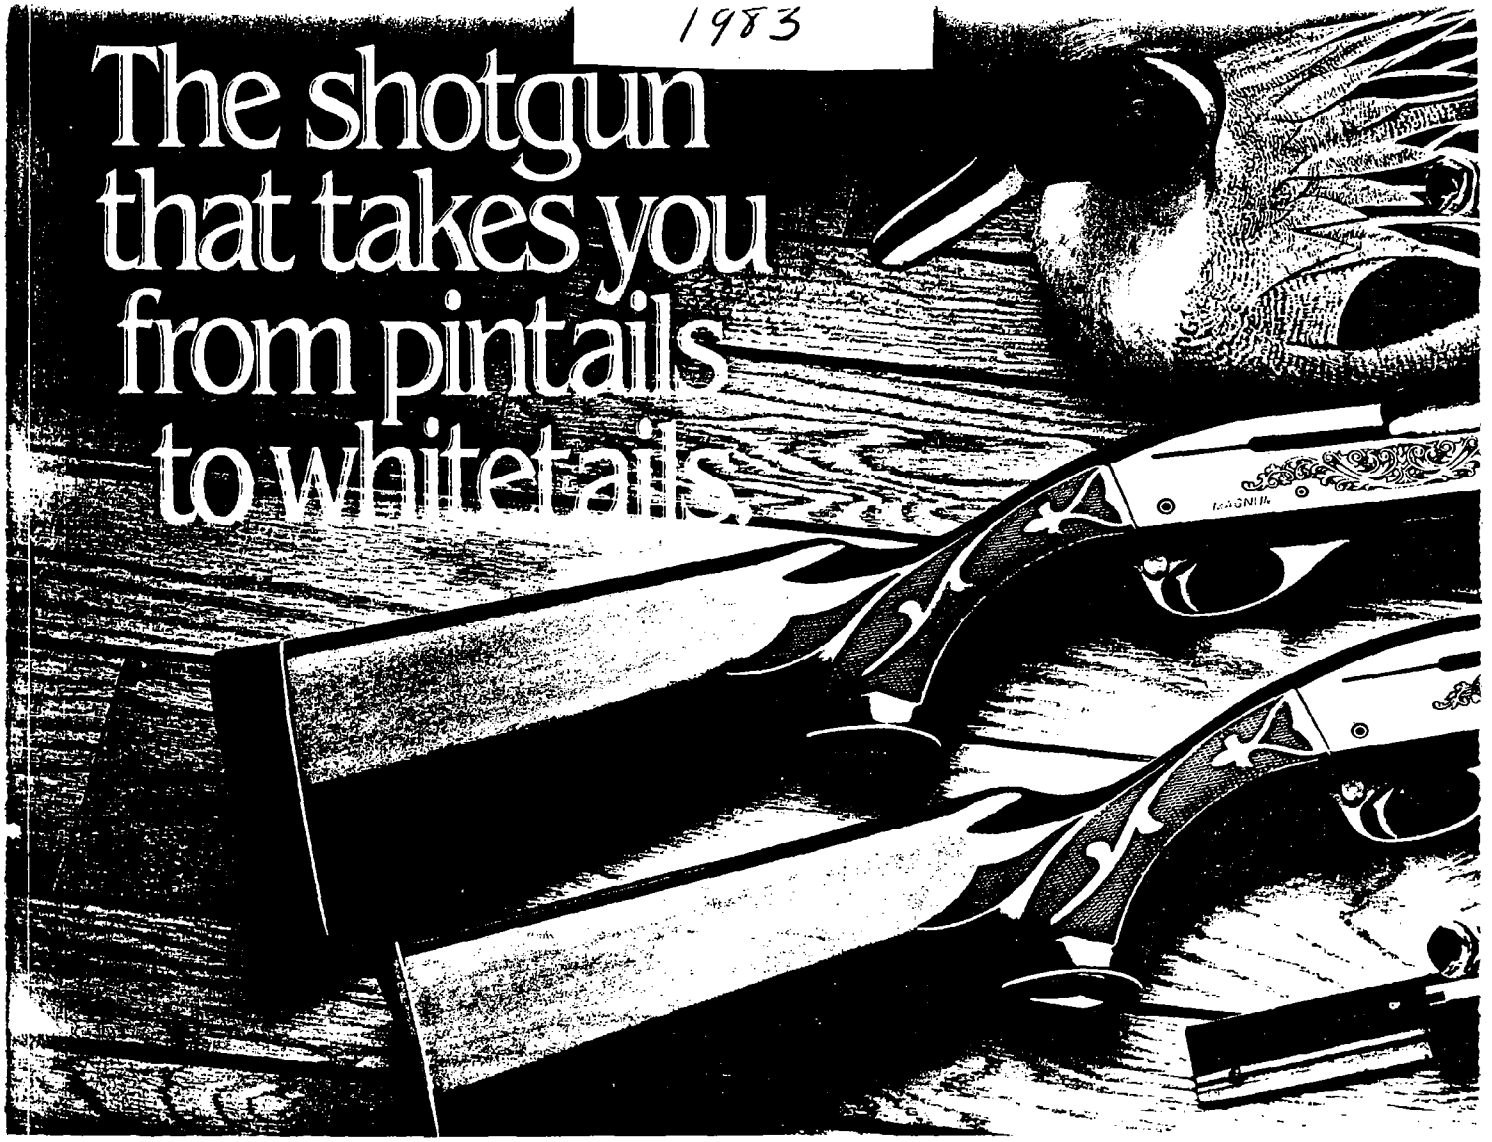
R2525598

1983

The shotgun that takes you from pintails to whitetails.



The Model 1100 is America's most popular autoloading shotgun. Sportsmen and women count on it for sweet handling, low recoil sensation, dependable performance under the most adverse conditions. And for its incredible versatility.

The same Model 1100 that you buy for waterfowl hunting today can become an ideal upland, target, or rifled-slug gun for big game. In seconds. The 1100 has the widest choice of economically priced, ruggedly built extra barrels. Read more on page 14.

Our new Model 1100s. The back cover shows you our latest "first in the field" the 1100 "Special Field." It combines traditional styling, compact dimensions, ideal balance, positive cut checkering, and less weight to give the upland hunter an exceptional performance package. At only a few dollars above our standard 1100s, it's an exceptional value, too. In both 12 and 20 gauge.

Our autoloading line now includes an LT-20 Magnum with a 28" Mod. choke barrel. And a first for lefties: a 12 ga. slug gun with a 22" barrel, Imp. Cyl. choke.

The heart of every 1100 is its tough, ordnance-quality steel receiver. No other gunmaker today puts the strength of a steel receiver on every autoloader in its line. And every 1100 has an American walnut stock and fore end.

On all too many firearms these days, about the only thing that's still American is the wood. Not so with Remington. Every part is designed, built, tested and serviced in the U.S.A. That's been our only way for over 165 years.

The 1100's strength starts with solid engineering. Both barrel and receiver come from single billets of ordnance quality hardened steel. All action parts are vibra-honed for smoothness. The 1100 has a unique gas metering system which reduces recoil sensation to a gentle nudge. Knowing you won't get a kick helps you concentrate more on hitting target. And getting your limit.

No other autoloader made today comes in more gauges, versions, or specifications. Surely the most versatile of [illegible]

The new Model 1100 "Special Field."

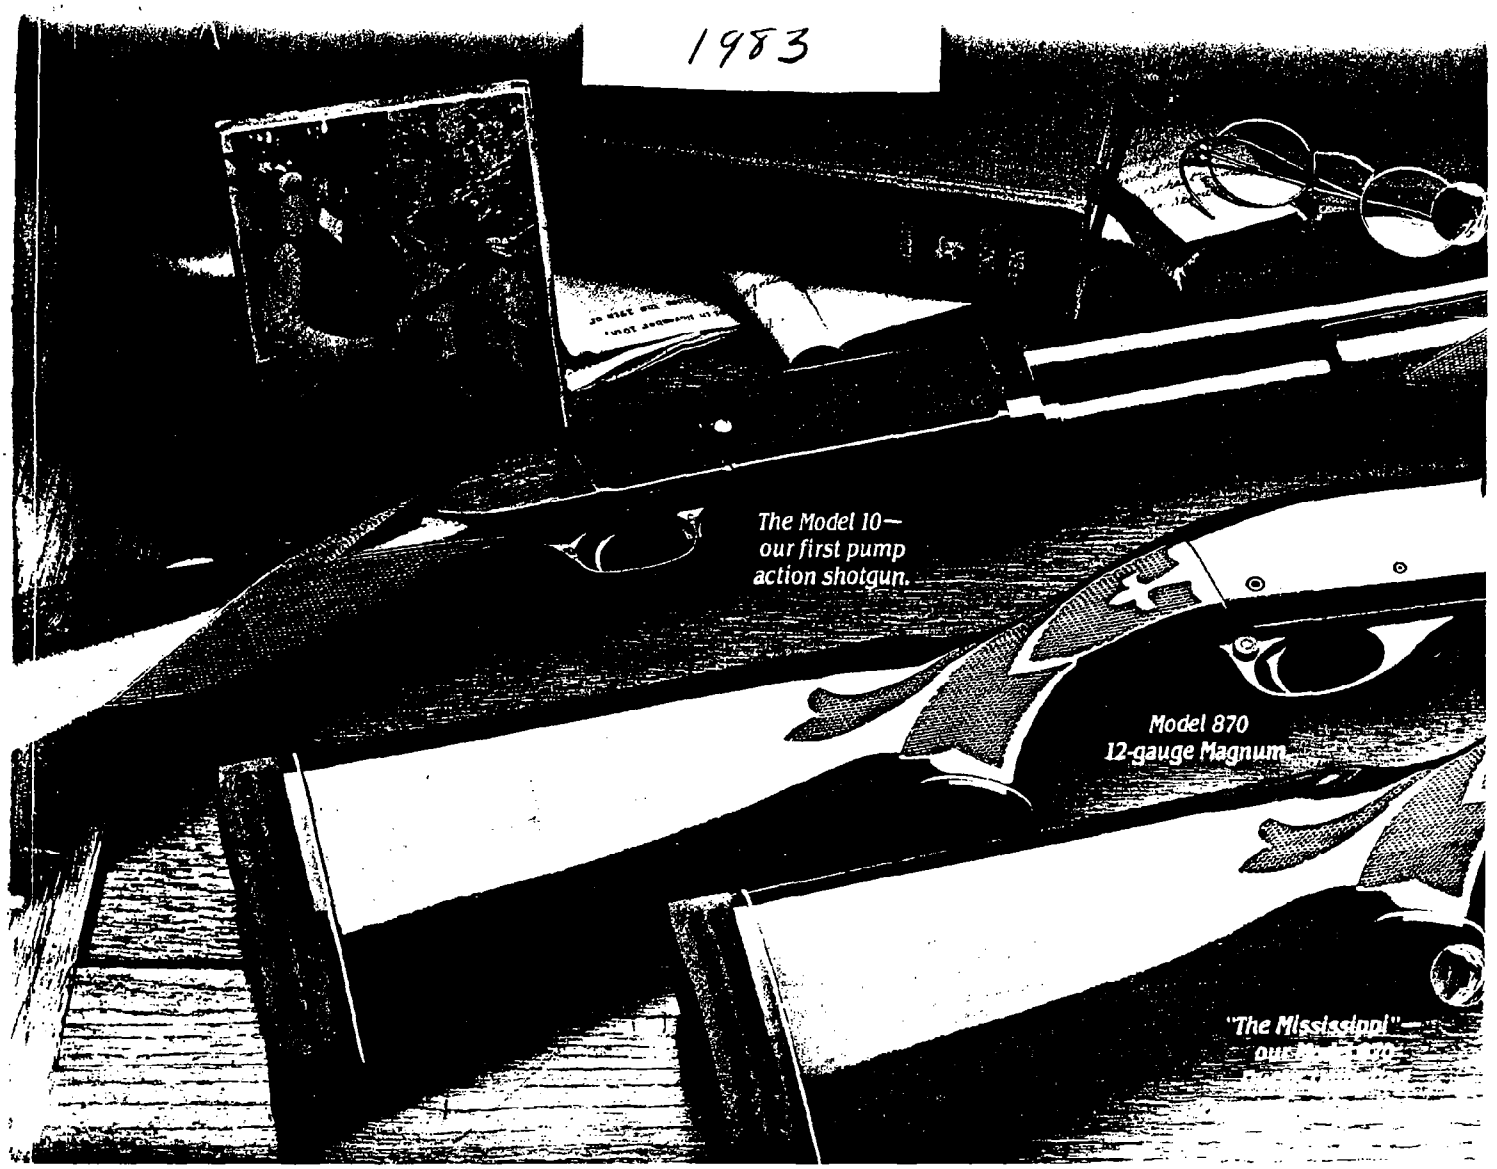
Special Order Model 1100s:

Nominal stock dimensions:

1983



Back in 1908, hunters liked the way Remington's first pump action shotgun came up fast, pointed well, and cycled shells smoothly. Our Model 10 was built simple and strong, just like our refined pump actions that followed it.

Over 32 years ago we built the first Model 870 "Wingmaster," the shotgun that was destined to become the most popular pump action in history. Today, well over 3 million 870s are helping America's hunters stay "First in the Field."

Its legendary performance, reliability, and value have also made it the standard law enforcement shotgun, from Atlanta to Alaska.

A special 870 helps Ducks Unlimited. New for 1983 is a DU Commemorative 870, available only through your full service Remington dealer. The Mississippi," the first 12 ga. 3" Magnum 870 we've ever offered with a 32" Full

Choke barrel, gives you a long sighting plane and smooth, controlled swing for longer-range pass shooting. And we send DU a contribution for every gun sold.

This Model 870 has distinctive engraving on both sides of its all-steel receiver, and a special DU serial number. Because it will only be produced this year, it's sure to become a collector's item. For more about Ducks Unlimited, write them at Box 66300, Chicago, IL 60666.

Our newest 870 pumps. There's a growing number of hunters who appreciate scaled down, lighter weight shotguns. We've just expanded our line with a new light weight 20 ga. Magnum with a 28" Modified choke, vent rib barrel.

Southpaw slug hunters will go for our latest 870. It's a true left-hand shotgun with a 20" Improved Cylinder slug barrel and rifle sights.

The 870 for smaller-framed shooters. Last year we introduced the popular Model 870 20 ga. Lightweight Limited. With its 1" shorter stock, 3" shorter barrel, and scaled-down all-steel receiver the Limited is perfect for the beginning younger shooter or any smaller framed adult. It's available with either Mod. or Imp. Cyl. choke.

Even our smallest, lightest receiver is machined from a solid billet of ordnance steel. Action parts are vibra honed for smoothness. Double action slide

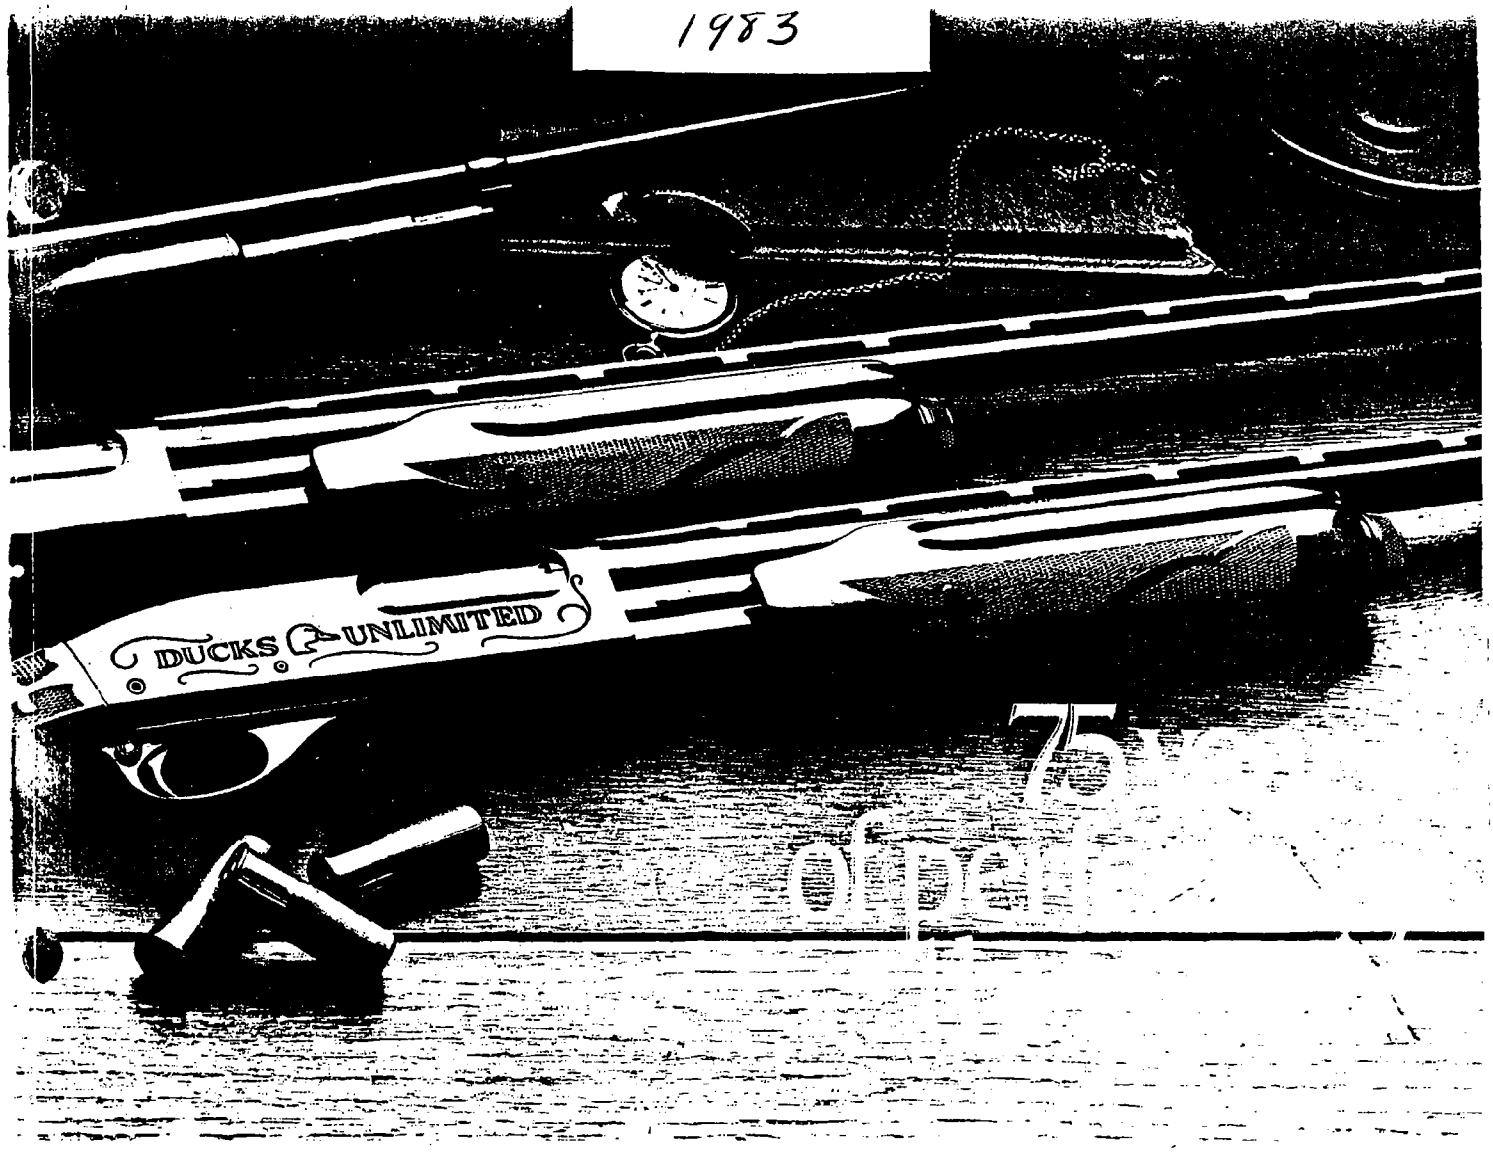
1983



bars eliminate binding and twisting, so extra shots come as fast as you can pump and pull the trigger.

A word about barrels. The 870 is the widest choice of extra barrels: see page 14.

Current Remington barrels can handle the repeated use of factory loaded steel shot loads without affecting the appearance or performance.

Field 870s have metal-bead front sights; deer guns have rifle sights. All 870s except .410s* have a 5-shot capacity. A 3 shot plug is included free.

Every 870 has a positive, cross-bolt safety switch. All 12- and 20-models have recoil pads. Stocks are solid American walnut, with distinctive checkering, and a durable DuPont RB.W finish.

Compare our 870s with any other pump. You'll see why it's still the pump action leader.

1983

Serious trap and skeet shooters have plenty to like in our 1983 clay target line up. Proven autoloaders and pump action shotguns that have an extra plus stamped on every barrel: "Made in U.S.A."

The ultimate competitor. The Remington Model 870 "Competition" is the first target shotgun that has the easy pointability of a single barrel, the low recoil sensation of a Model 1100 autoloader, the rugged dependability of an 870 pump. That's because no other single shot trap gun has a gas-assisted recoil-reduction system like this special 870's.

With less recoil you become more competitive, can have greater concentration, experience less fatigue. Important factors on those long 300 bird days.

This shotgun has refined touches that set it apart visually, too. Its richly figured walnut stock has deep, positive-cut checkering. It has a matte-finished receiver top, unique full fore-end, and hand-applied satin finish.

Naturally, there is an economy model, too—our 870 TA. Model 870 pumps are available at even more competitive prices.

"Automagic" for skeet and trap. Few guns have become legends the way our Model 1100 autos have. Today there are 14 ways to have an 1100 help you smoke more birds. In trap or skeet.

Multi-event skeet shooters will like our special Model 1100 weight-equalizer kits. They give your 20, 28, and .410 the same great balance and pointability of your 12-ga. 1100—but at only a fraction of the cost of a matched set.

Check the charts. It's our bet you'll find the kind of autoloader or pump that can take you from league shoots to the big leagues.

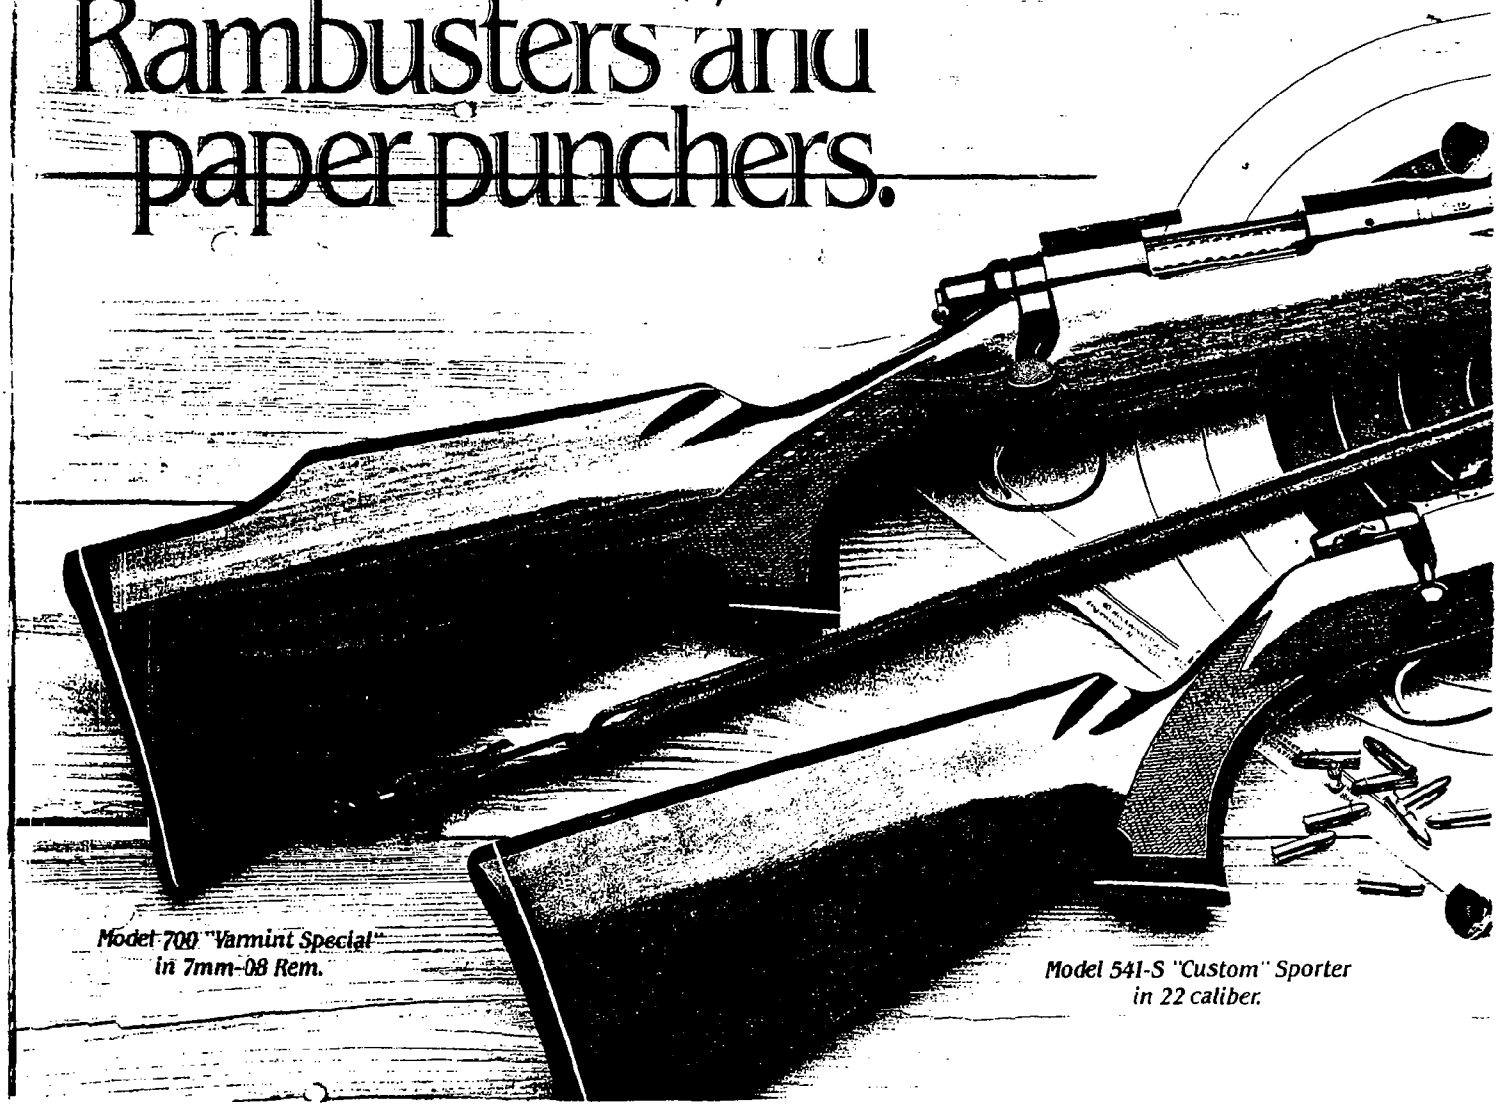
Rambusters and paper punchers.



Model 700 "Varmint Special" in 7mm-08 Rem.

Model 541-S "Custom" Sporter in 22 caliber.

Remington has just what you need whether you're shooting iron animals or out to break records in any other precision target sport.

"Rambusters" is our name for a whole family of matched firearms and ammunition. All designed to improve your odds in metallic silhouette events.

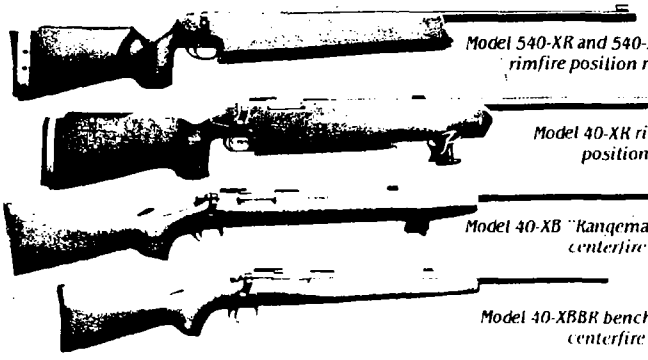
Take our "XP-100" Silhouette pistol. Its centerfire action has long been the heart of many custom-made competition guns; now it's been specially refined for metallic silhouettes. Right out of the box, the "XP-100" is more gun than virtually any custom pistol. It's chambered for an ideal silhouette cartridge—7mm BR Rem.

Or consider the Model 700 "Varmint Special," in 7mm-08 Rem. or 308 Win. cartridges. You get the action known everywhere for strength and accuracy in two great metallic silhouette calibers.

For rimfire silhouette events, it's our Model 541-S "Custom" Sporter. It has an adjustable match trigger, artillery style bolt, distinctive looks. For more, see page 19.

We also offer bench rest and position shooters a wide range of high-value specialty rifles.

For more on silhouette rifle sports, write NRA, Silhouette Dept., 1600 Rhode Island Ave., N.W., Washington, DC 20036. Handgunners, write IHMSA, Box 1609, Idaho Falls, ID 83401.



Model 540-XR and 540-XRJR rimfire position rifles.

Model 40-XR rimfire position rifle.

Model 40-XB "Rangemaster" centerfire rifle.

Model 40-XBBR bench rest centerfire rifle.

Models 540-XR & 540-XRJR. These single-shot 22 L.R. target rifles feature a position-style Monte Carlo stock, with a cheekpiece, thumb groove, adjustable butt plate, full length guide rail. Front swivel block, sling, and swivels are optional extras. There's a common sight alignment with scope or iron sights. The trigger is adjustable from 1½ lbs. Both have a 26" medium weight target barrel, countersunk at the muzzle. The 540-XRJR has a 1¼" shorter stock.

Model "XP-100" Silhouette in 7mm Bench Rest Remington.

For more on rimfire rifles and silhouette targets, see page 19.

Model 40-XB "Rangemaster." Here's the centerfire rifle that's as much at home taking varmints as it is taking trophies. Each is made one at a time in our custom gun shop (read more about it on page 241). Every 40-XB is individually test fired from the shoulder for accuracy, and shipped with the paper target that proves it.

Choose the "Rangemaster" as a single-shot in 222 Rem., 22-250 Rem., 243 Win., 6mm Rem., 25-06 Rem., 7mm Rem. Mag., 7.62mm NATO (308 Win.), 30-06, 30-338 [illegible] 7mm Mag.), 300 Win. Mag. Or, [illegible] extra cost, as a repeater in 222 [illegible] m., 22-250 Rem., 243 Win, 6mm [illegible] m., 7.62mm NATO (308 Win.).

The 40-XB receiver, drilled and [illegible]ped for scope block and sights, [illegible] bedded to the stock. Target [illegible] blocks, standard. So is a [illegible]h type trigger, adjustable [illegible] 3½ lbs. The weight of pull can be changed externally. A special 2-oz. trigger, without safety switch, is available on single-shot models only, at extra cost.

The distinctive, unblued stainless steel barrel is free floating, drilled, and tapped for a scope block and an iron front sight.

Length of Pull: 13½" **Overall Length:** 42" with 24" stainless steel barrel **Weight:** 11 lbs. without sights

Model "XP-100." Here's the single-shot centerfire bolt action pistol that has become a legend for its strength, precision, balance, and accuracy. Still chambered for the 221 Rem. "Fire Ball" with a vent rib 10½" barrel, it's also chambered in 7mm BR Rem. — ideal for metallic silhouette handgun "unlimited" events.

Both "XP-100" handguns have one-piece DuPont "Zytel" nylon stocks with universal grips, two-position thumb safety switches, receivers drilled and tapped for scope mounts or receiver sights, and match-type grooved triggers.

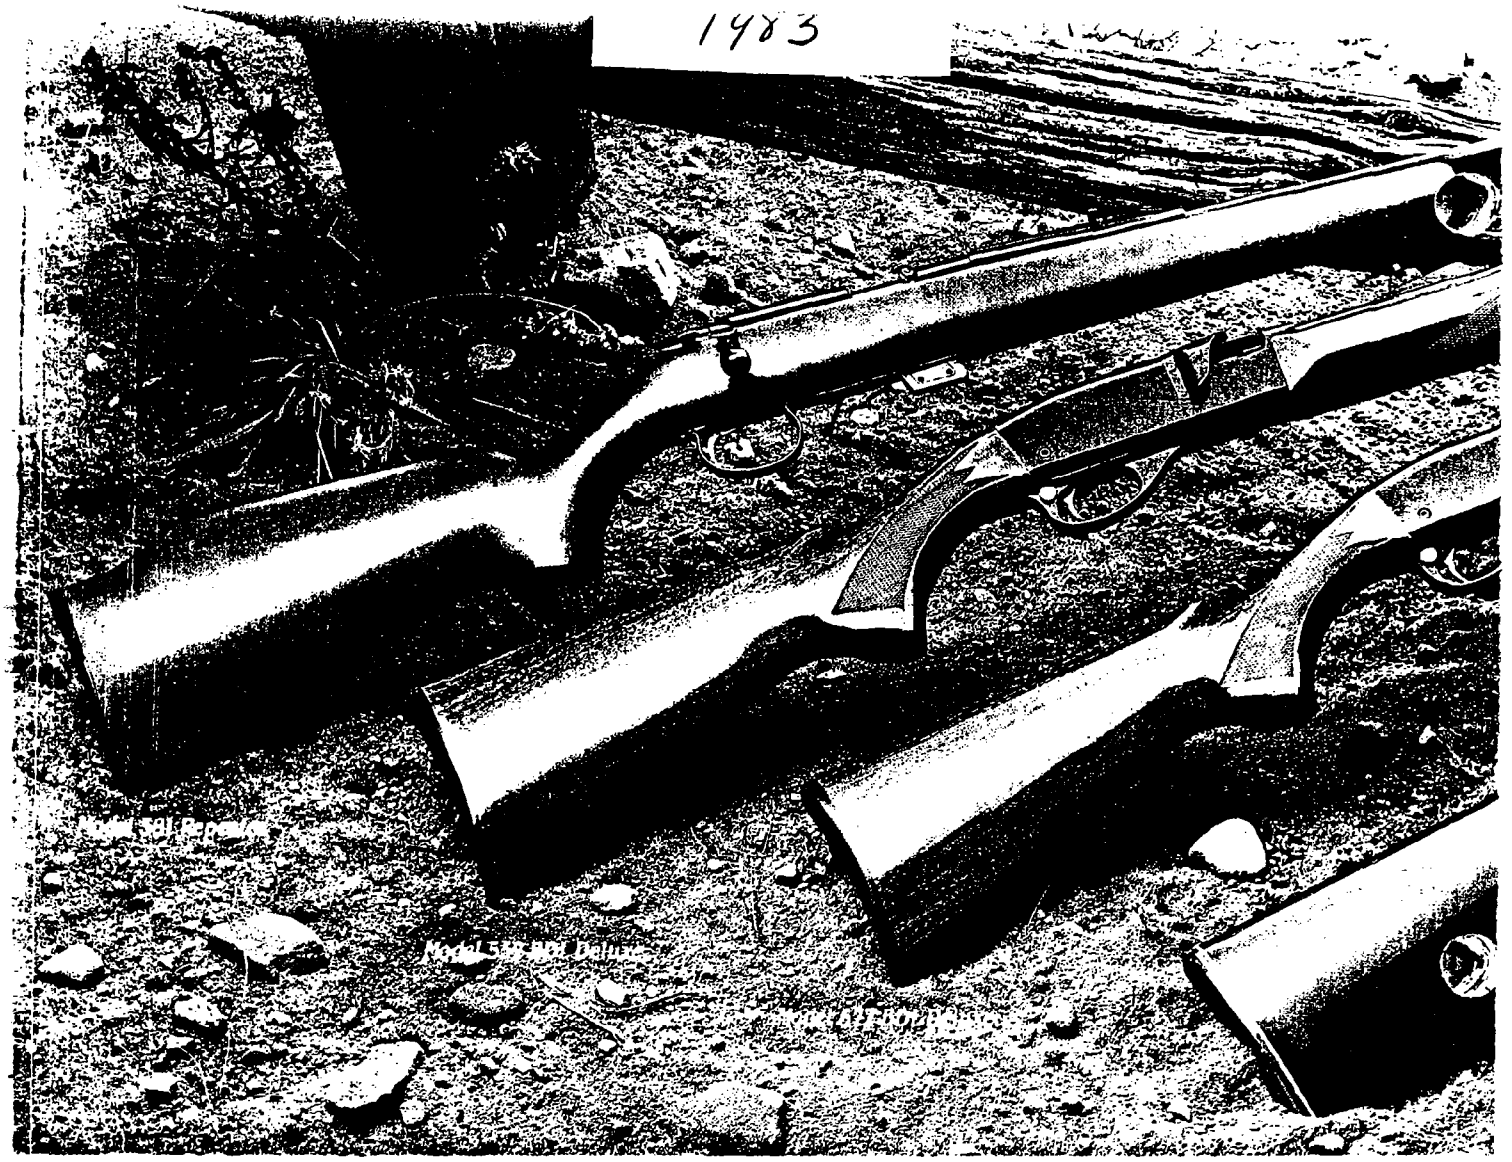
1983



We put some hard-hitting words onto every 22 rifle we make: "Made in U.S.A." Whether it's for small-game hunting or metallic silhouettes, paper targets or toppling tin cans, every Remington 22 has performance written all over it.

The widest choice in 22s. Choose your action. Nobody makes more autoloaders, pumps, or bolt actions than we do. Some have scopes. One's for lefties. Two are smaller sized for younger shooters. And one, our "Nylon 66" autoloader, is so rugged that it has the world's only lifetime stock warranty.

Our Model 552 autos. These Remingtons shoot Short, Long, and Long Rifle loads interchangeably. Our 552 BDL has a rich walnut stock, custom checkering, a durable Du Pont RK W wood finish, and sights you'd expect on a big game rifle. Even our standard-grade 552A has an adjustable rear sight, bead front sight, and a walnut-finish hardwood stock.

Our Model 572 pumps. They're America's only 22 pump action rifles. Like our 552 autos, the 572s let you load and shoot all three types of 22 cartridges interchangeably. In BDL trim, the 572 has the walnut stock, checkering, wood finish, and sights of our best big game pumps. Even the budget-priced 572A has clean, crisp styling and a no-nonsense walnut-finish stock that's built to take abuse. The 572's capacities, sights, and safety switch are just like those of our 552 autos.

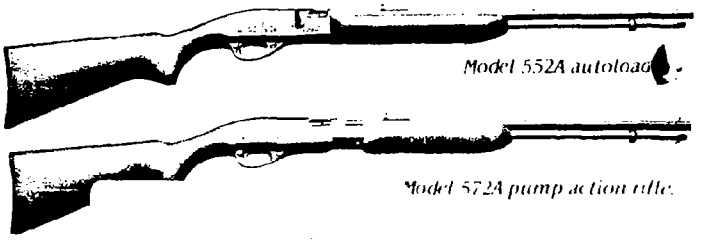
Our basic bolt actions. Every Remington rimfire gives you plenty for your money. The 581 is a great 6-shot repeater, yet it can be converted in minutes to a beginner's single-shot (adapter included). The Model 582 has a magazine tube which handles up to 20 Short, 15 Long, or 14 Long Rifle cartridges.

Both rifles have a walnut-finish Monte Carlo hardwood stock, an ordnance quality steel receiver grooved for a scope, and adjustable sights. The 581 comes in a left-handed version for southpaws. A short stock Model 581 is also available.

The top of the line. Our Model 541-S "Custom" Sporter is more than just a superbly accurate bolt action 22. It's deluxe in every way. Its fans range from small game hunters to precision target shooters, and no wonder.

The 541-S, chambered for Short, Long, and Long Rifle 22s, has an adjustable match trigger, artillery style bolt with six locking lugs and double extractors. Its receiver is drilled, tapped, and grooved for scope mounts. On its American walnut stock you'll find rich positive cut checkering, a distinctive butt plate, grip cap, and fore-end tip. Plus an all steel receiver enhanced with scrollwork engraving.

The lifetime 22s. When you buy a "Nylon 66," you own the



Model 552A autoloader

Model 572A pump action rifle.

Our rimfire roundup.

"Nylon 66" with 4-power scope and "Black Diamond" model.

world's most durable rifle. It's the only one made anywhere that has a lifetime warranty on its stock. Made of "Zytel," DuPont's structural nylon, this autoloader won't warp, crack, chip, fade, or peel. If it does, we'll replace it — free.

There's even more in the "Nylon 66's" corner. All action surfaces ride smoothly on nylon bearings. So there's never a need for lubrication. The "66" is also a real featherweight at only 4 lbs. And accuracy has been its trademark since its introduction over 25 years ago.

Look for the "Nylon 66" in five models, two stock colors. Some have 4-power scopes. All have a capacity of 14 Long Rifle cartridges, yet can be quickly converted to a single-shot.

Metallic silhouettes made easy. Your participating Remington dealer can tell you how to acquire a complete, low cost set of four iron animal silhouettes. They're sized to meet precise NRA requirements for rimfire silhouette competition—one of the fastest-growing shooting sports today. See your dealer, or write us (address on back cover).

THE UPLAND AND WATERFOWL "WINGMASTER."

Since 1950, one model number has meant pump action quality and dependability beyond all others: 870.

Our very first Model 870 had a machined-steel receiver, ordnance-steel barrel, and American walnut stock and fore-end. We still build every 870 this way--the right way.

When you compare the 870 to any other pump action shotgun—at any price—you'll see why America's hunters have bought over four million "Wingmasters."

Another "First in the Field." Sure to be one of the hottest 870s ever is our all-new "Special Field." It gives pump action shooters the same kind of compact dimensions, easy pointability, and superb balance that our innovative Model 1100 "Special Field."

Available in both 12 and 20 gauges, and all three chokes, this newest 870 has the short overall length and lightweight portability that make it ideal for day long hunting in any field situation.

This model looks like no other pump shotgun. It has full pattern cut checkering on its traditional straight-line stock. We chose this so called "English" stock for more than just cosmetic purposes. It helps the "Special Field" come up fast and point right. Instantly.

Mechanically, the "Special Field" is 870 through and through. It has the same rugged, all-steel receiver, double action slide bars, and silky smooth vibra-honed action parts.

Today's broadest line of pumps. Check our specs. You'll find virtually any combination of gauge, barrel length, and choke. There's a left-hand slug gun, lightweight 20 ga. Magnum, even a pair of short stock/short barreled "Youth Guns"--for the smaller-framed adult or child.

Your full-service Remington

1984

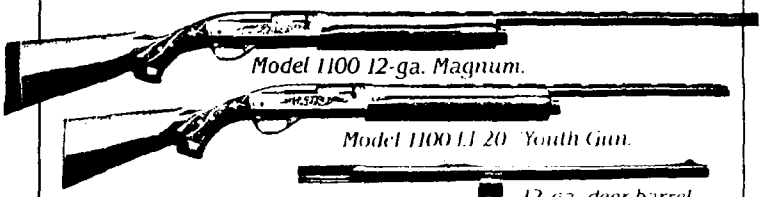
NO OTHER AUTOLOADER MEASURES UP TO AN 1100.

Simply put, the Model 1100 is the best-selling gas-autoloader in history. For over 20 years others have tried to copy it, because they knew it was *the* shotgun to copy.

The 1100 has never really been duplicated. No other auto functions quite so smoothly or reliably. No other can match its low recoil sensation or breadth of line. There are over 40 different variations of barrel length, style, choke, chamber, and gauge to choose from. And the 1100s come with an unmatched choice of extra barrels.

They can take you from pin tails to whitetails, quail to clay birds. In seconds.

The 1100 can make you a better shot. *Outdoor Life* writer Jim Carmichel put it this way: "Anyone who can shoot well will probably shoot better with an 1100. Much of this is due to the gas system, which tames the recoil so effectively. In addition the 1100 simply feels right to just about everyone."



Model 1100 12-ga. Magnum.

Model 1100 LT-20 Youth Gun.

1984

MAKE YOUR SHOTGUN SUIT YOUR SEASON.

Whether you're hunting deer in dense woods, pheasant in cornfields, or clay-target shooting in between, our extra barrels make your one Remington shotgun ready for the action. In a jiffy.

When you own the accessory barrel matched to the job, your Model 1100 or 870 can be just what you want it to be. At a fraction of the cost of buying another gun.

Nobody offers you more choices of extra barrels than we do. There are even barrels for left-hand versions of our shotguns.

Remember this: barrels *must* be matched to the correct receiver, and within the proper gauge. Extra interchangeable 2¾" chambered barrels, available for Magnum receivers, will handle all 2¾" shells within the same gauge.

For added ease in making your choice, see your dealer's *Remington Extra Barrel Selector* guide.

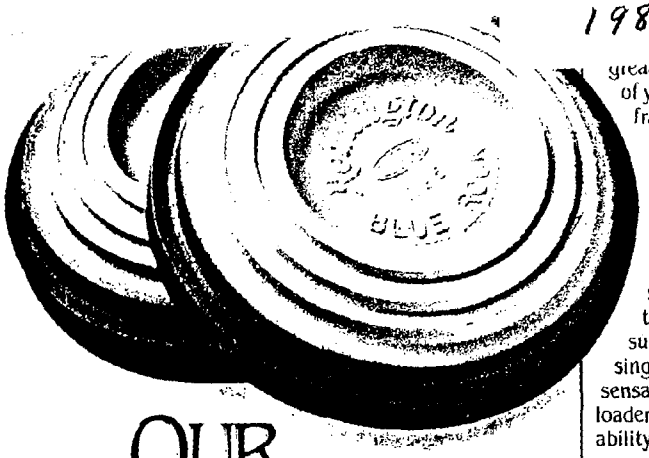
1984



OUR CLAYBUSTIN' BEST.

Remington gets serious ...and skeet shooters ready for ...ng day—and all season ...It starts with autoloaders ...pump action shotguns—...s has a performance heritage ...er 70 years.

Automagic™ for skeet and ... No other autoloader has ...oated more family rooms than our trophy-taking Model 1100s. Today there are over a dozen ways you can put the 1100 legend to work to make your mantle or bookshelf come alive.

Multi-event skeet shooters will like our special Model 1100 weight-equalizer kits. They give your 20, 28, and .410 the same great balance and pointability of your 12-ga. 1100—but at a fraction of the cost of a matched set.

The ultimate competitor. We don't call this special 870 the "Competition" Trap for nothing. Its unique gas-assisted recoil-reduction system makes this the first target shotgun that has the sure, easy pointability of a single-barrel, the low recoil sensation of a Model 1100 autoloader, and the rugged dependability of an 870 pump.

With less recoil you concentrate more, feel less fatigue. The result: you become more competitive, especially on those tough 300-bird days.

This shotgun is special in appearance, too. Its richly figured walnut stock has deep, positive-cut checkering. And a distinctive full fore-end and matte-finish receiver top.

Our lower-cost competitors. For shooters on a shoestring, consider either our SA-grade 1100 skeet gun or our TA-grade guns (1100s and 870s). More affordable, they have all the bird-smokin' potential of our finest guns.

1984

ACCURACY AND POWER FOR EVERY HUNTER'S TASTE.

In the world of centerfire rifles, there's no stronger, more accurate bolt action rifle than the legendary Model 700.

The way we build our 700s, from the least-costly ADL to the highest-grade "Custom," has made its barreled action the first choice of hunters for 20 years.

More finalists at major National Bench Rest Shooters Association events have used Remington actions than all other commercial actions combined. Remington bolt actions are also the clear favorites at metallic-silhouette events, coast to coast.

That says plenty about accuracy, quick lock time, and superior strength. But hunting's also a matter of style. So our 700s come with today's longest list of calibers, widest choice of stock styles. Even several left-hand versions.

Receivers are milled from the finest ordnance-quality steel. Bolt face, barrel, and receiver surround the cartridge head with three rings of solid steel. With no extractor cuts to weaken it.

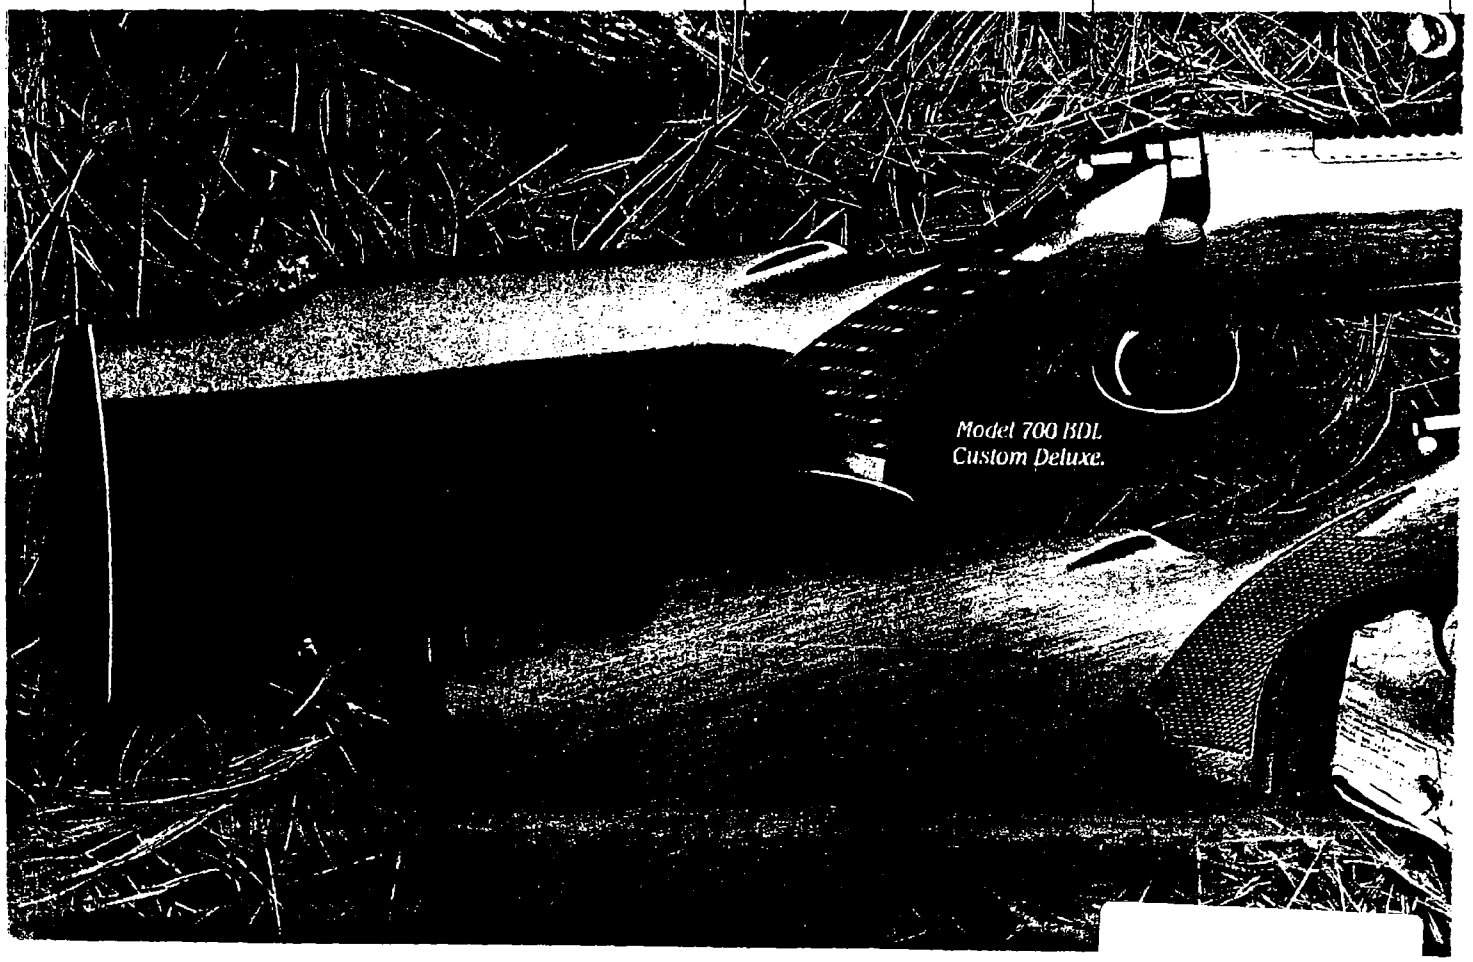
[illegible] forged of special steel, like a custom bench rest rifle. Its crisp trigger is rated as the finest in any production rifle.

Each 700 is hand-assembled and test fired for incredible "out-of-the-box" performance.

Every 700 looks as good as it shoots. If you want a Monte Carlo stock, high gloss finish, plus many custom-gun touches, you'll select a BDL or "Varmint Special." Prefer a traditional straight-line stock and satin finish? Check out our 700 "Classic." Or for a freshly restyled combination of both, at a lower cost, our 700 ADL is a must.

Our 700s also come made to-order. Our "Custom" is available in four different grades from the Remington Custom Gun Shop. (See page 30.)

The "Classic" is now chambered in a .25-caliber legend: the 250 Savage. It'll be available only through your full-service Remington dealer—on a first-come, first-served basis. Recent limited-production offerings of classic calibers like the 7mm Mauser (7x57), 257 Roberts, and 300 H&H Mag. were rapid sellouts. So



Model 700 BDL Custom Deluxe.

R2525616

1984

place your order early for this latest "Classic."

Our hot-selling ADL. Last year our revamped ADL became a hit with hunters across the country. They liked its slimmed-down pistol grip, rakish new fore-end, cut checkering, practical-yet-handsome satin-finished Monte Carlo stock. And standard sling swivel studs.

See one today. We think you'll agree it's the best-looking, most economically priced bolt action rifle you can buy.

Sights, scopes, and safeties. Long-action ADL/BDL calibers have blade-ramp front sights; rear sights are adjustable for windage/elevation. BDL front sights are hooded. All sights are removable.

"Classic," short action ADLs/BDLs, "Varmint Specials" have no sights. Sights optional on all 700 "Custom" rifles.

Receivers are drilled and tapped for scope mounts. The safety switch on all 700s is the fast, positive thumb type. Magnum models feature pre-cision-style recoil pads.

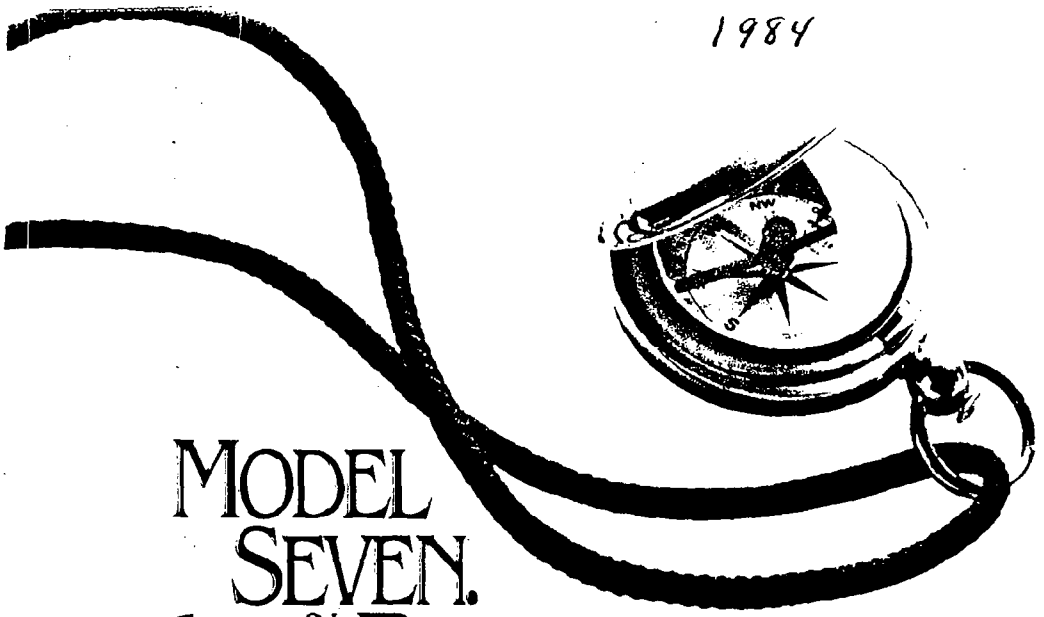
1984



MODEL SEVEN. 100% REMINGTON, BUT 20% LESS* SIZE & WEIGHT.

In 1983, we introduced the lightest, fastest, most compact Remington bolt action rifle in history.

The Model Seven has to be seen and shouldered to appreciate its incredible ease of handling, fluid pointability, and strength of action.

This rifle's only 1" longer than a yardstick, just a few ounces above the magic 6 lbs. When you consider the range of calibers offered, the Seven has *the best power to weight ratio of* any rifle made in America. Or anywhere else.

The Model Seven's length and weight are 20% less than the average of all our Model 700s.

R2525618

1984

The Seven is no scaled-down big rifle. Far from it. This rifle sprang fresh off our drawing board, with its light weight, compact dimensions, and ideal balance built in from the outset. You get what you see, with no compromise in Remington quality.

The Seven's action and specially tapered 18½" barrel are built to be as strong and dependable as those Remington actions that have been the prime choice of target champions and custom gunmakers alike.

The Model Seven brings new levels of accuracy to the short-action bolt. In six great, hard-hitting calibers, each one is built to the same accuracy standards of our legendary Model 700; it's individually test-fired to prove it. Hooded front and fully adjustable rear sights are standard, yet easily removable for scope mounting.

It looks as good as it works. The Seven's cut-checkered American walnut stock is satin finished, and sports a distinctive Schnabel fore-end. Every part of this rifle, right down to its crisp trigger, hinged floor plate, and sling swivel studs, is made here in America. To the performance standards shooters expect—and get—from Remington.

The result is a high-value lightweight rifle that's not 1" longer, 1 oz. heavier, or $1 more expensive than it should be. Shoulder one today; you'll feel the difference a Model Seven makes.

1984

RIFLES WITH RE[illegible] AS FAST AS YOUR OWN.

When the big game's moving fast, these rifles let you keep right up with him. These four Remington rifles have the lightning fast actions that give you the quickest extra shots in the woods.

The Model Four and Model 7400. These rifles keep you right on target, even between shots. Automatically.

Our autoloaders can deliver up to four extra shots with the low recoil sensation that keeps your cheek on the stock, your eye on the target. Your finger on the trigger.

Our autoloading rifles are the fastest, smoothest, best-selling centerfires in their action type. And no one has more experience making autos than we do.

We've been improving their design and performance for almost 80 years. Our Model 8, America's first autoloading rifle, caused quite a stir back in 1906. But it didn't have half the high-performance, high-value features you'll get in 1984's best autos.

The Model Four's and 7400's supersmooth gas-metering system makes their autoloading action the quickest in the business. Bolts lock up and perform like the finest bolt actions. And all internal parts are vibra-honed for added smoothness.

Our pump actions: preferred for some very miserable reasons. We made our Model Six and Model 7600 for the kind of rain, sleet, snow, and ice that seem to follow you when never you hunt.

We've been perfecting the centerfire pump since 1912. The Six and 7600 shown here are the latest generation to weather the storm. And, by far, the best.

These rifles are streamlined versions of the best-selling pump action rifle ever—our late, lamented Model 760. The Six and 7600 chamber extra-loads-per-speed,

R2525620

TACK-DRIVIN' ACCURACY FOR ANY TARGET.

the trophy-precision shooters need—whether it's for knocking down silhouettes you can hardly see or paper-punching overlapping bull's-eyes hundreds of yards out.

Shown here are just two of a family of hard-hitting competitors. Our "XP-100" pistol has a proven centerfire action that's long been the heart of many custom-made competition guns. We've refined it especially for Unlimited Handgun events, chambering it in an ideal silhouette cartridge—the 7mm Rem.*

The "XP-100," a legend for its strength, precision, balance, and accuracy, is also chambered for the 221 Rem. "Fire Ball." Each pistol has a one-piece "Zytel" nylon stock with universal grip, two-position thumb safety, match-type grooved trigger, and a receiver drilled and tapped for scope mounts or receiver sights.

For rifle silhouette events, shooters like the way our heavy-barreled Model 700 "Varmint Special" does the trick. It gives you the power and pinpoint accuracy of the world-acclaimed 700 bolt action, in a choice of great silhouette cartridges—the 7mm and 308.

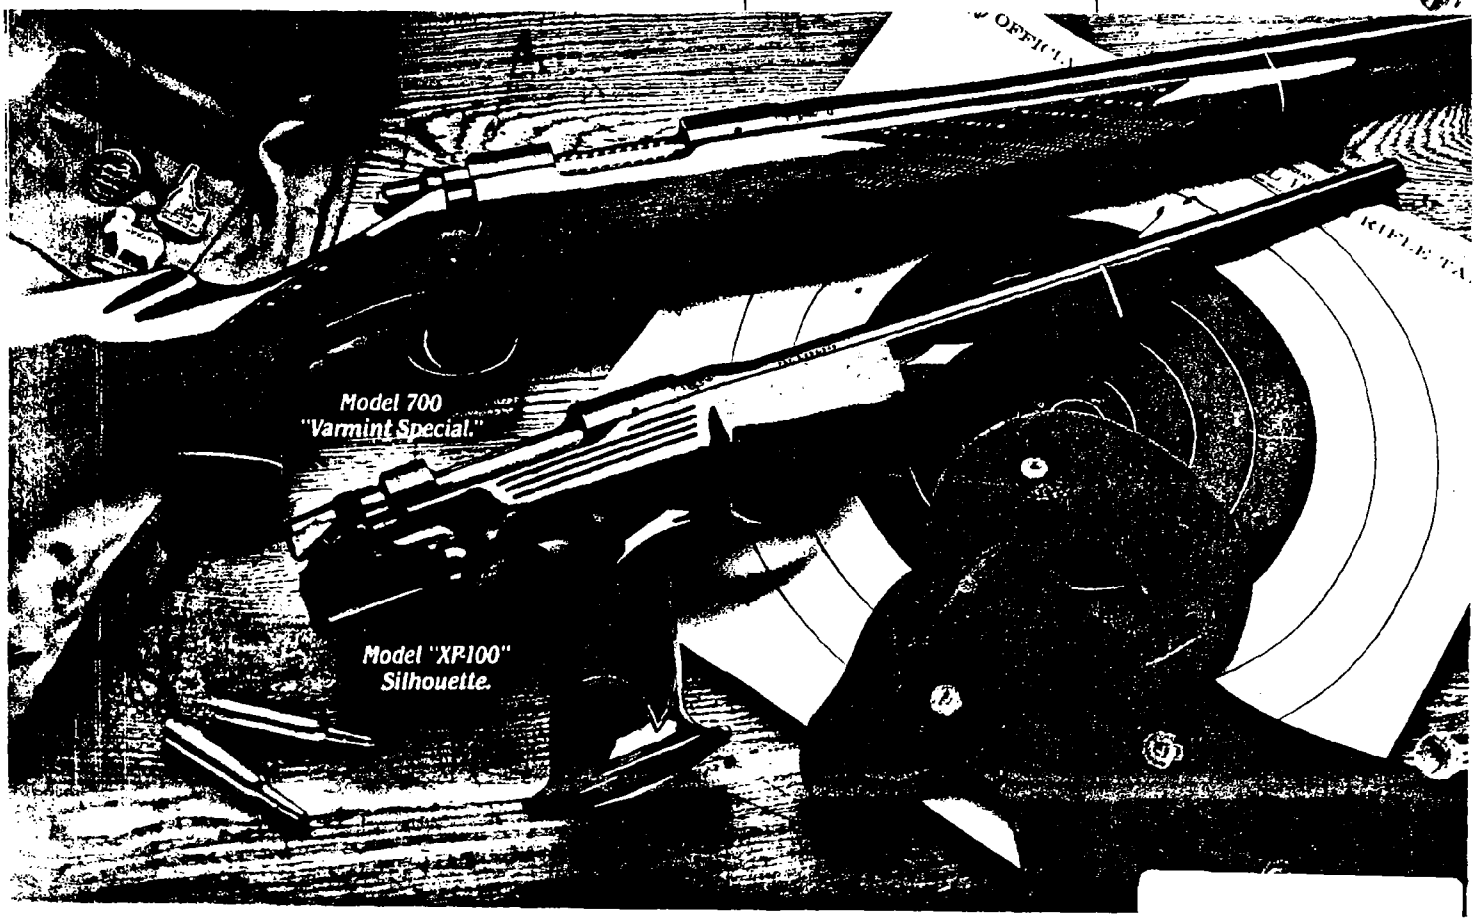
For specifics on this special 700, see pages 10-11.

Learn more about silhouette shooting: contact NRA, Silhouette Dept., 1600 Rhode Island Ave., N.W., Washington, DC 20036. Handgunners, write IHMSA, Box 1609, Idaho Falls, ID 83401.

Remington also offers the bench-rest and position shooter a wide range of specialty rifles. Our Models 40-XB and 40-XBBR centerfires, with stainless steel barrels, are great for taking trophies and varmints alike. Each is made to order in our Custom Gun Shop, in your choice of up to 10 different calibers.

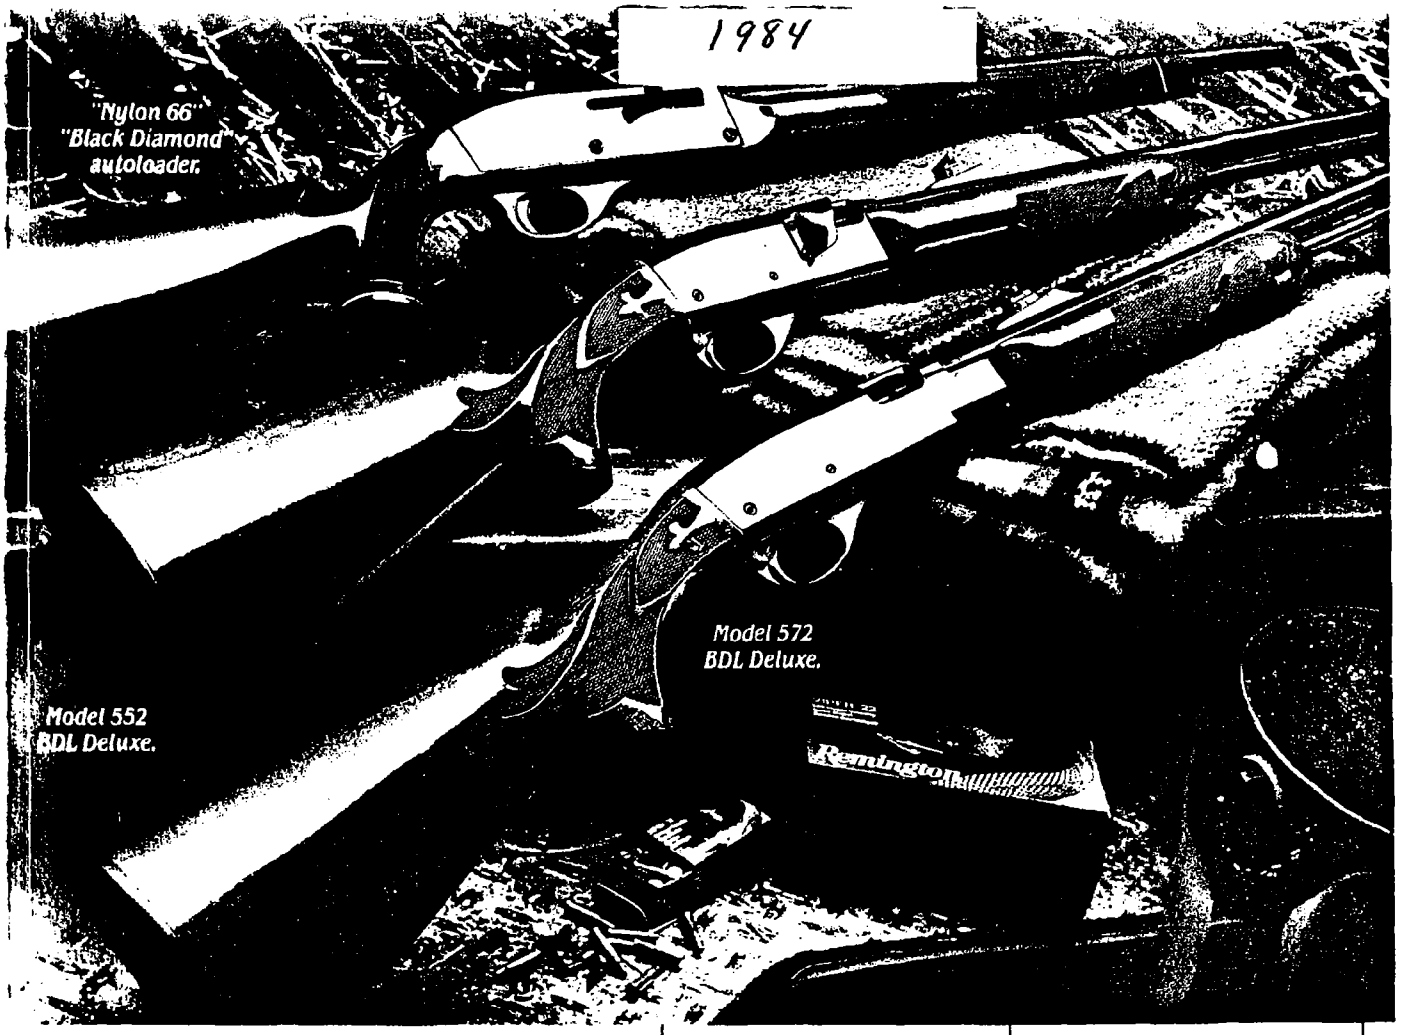
And there are our 40-XR rimfire single shot and our 40-XC Match Course centerfire repeater. Both these bolt action rifles have improved position-style stocks and a host of features geared to the competition minded shooter.

Ask your full-service Remington dealer for specifics and ordering information on all our rambustin' and paper punchin' rifles. They're what you need to get the edge when you're splitting hairs.



R2525622

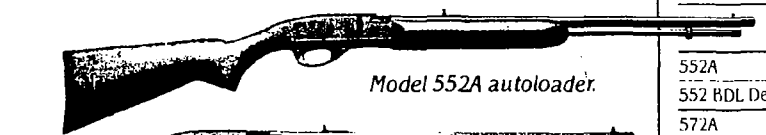
1984



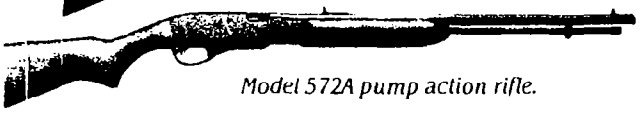
THE RIGHT STUFF. NOT KIDS' STUFF.

Every Remington 22 rifle has performance features needed by serious rimfire shooters — of any age. Whether you're after small game or just low-powered plinking fun, there's an American built Remington 22 that's right for you.

Take our Model 552s. These sharp-shooting autoloaders take Short, Long, and Long Rifle 22s interchangeably. The 552 BDL has a genuine walnut stock, custom checkering, a durable Du Pont wood finish, and sights you'd expect on a big game rifle. Our standard-grade 552A has an adjustable rear sight and a hardwood stock.



Model 552A autoloader.



Model 572A pump action rifle.

The only 22 pump actions made in America are Remington 572s. They let you shoot all types of 22 cartridges interchangeably. Like our 552s, the 572 BDL and 572A models are loaded with big game rifle features that can help you shoot better.

We call the "Nylon 66" our lifetime 22, because it's unquestionably the most durable rifle you can buy. Made of "Zytel," Du Pont's amazing structural nylon, it carries the world's only lifetime warranty on a stock.

If it ever warps, cracks, chips, fades, or peels, we'll replace it—free.

All action surfaces glide on supersmooth, maintenance free nylon bearings. Yet accuracy has been the long suit of the "66" since its introduction over 25 years ago.

The "Nylon 66" has a capacity of 14 Long Rifle cartridges, yet can be quickly converted to a single shot.

The New Model 1100 SP "Special Purpose" Magnum

the Model 1100 autoloader are hardly a secret, since we just made our three-millionth in 1983. Jim Carmichel, the well known shooting editor of OUTDOOR LIFE, put it this way: "Anyone who can shoot well, will probably shoot better with an 1100."

If it didn't sound too much like just another ad we could say "we must be doing something right" or "three million shooters can't be wrong"—but no matter how we say it, the Remington Model 1100 is the most popular autoloading shotgun in the world. So, isn't it the one gun you should be looking at, and handling, before you buy that autoloader? We think it is. —J. M.

This year, we've taken the world's most popular shotgun and tailored it to the special needs of waterfowl and turkey hunters. We call it the 1100 SP (Special Purpose) Magnum.

In order to keep reflection to an absolute minimum, this 1100 has a low luster finish on its hardwood stock and fore-end. The receiver, barrel, even the bolt, go through a sandblasting process that dulls the metal finish to a smooth, no-sheen satin texture, the same that's been used for many years on military and police products.

For complete corrosion protection, the piston and piston seal are nickel-plated. The bore is plated with chrome to ensure a long life for your gun under even the worst conditions.

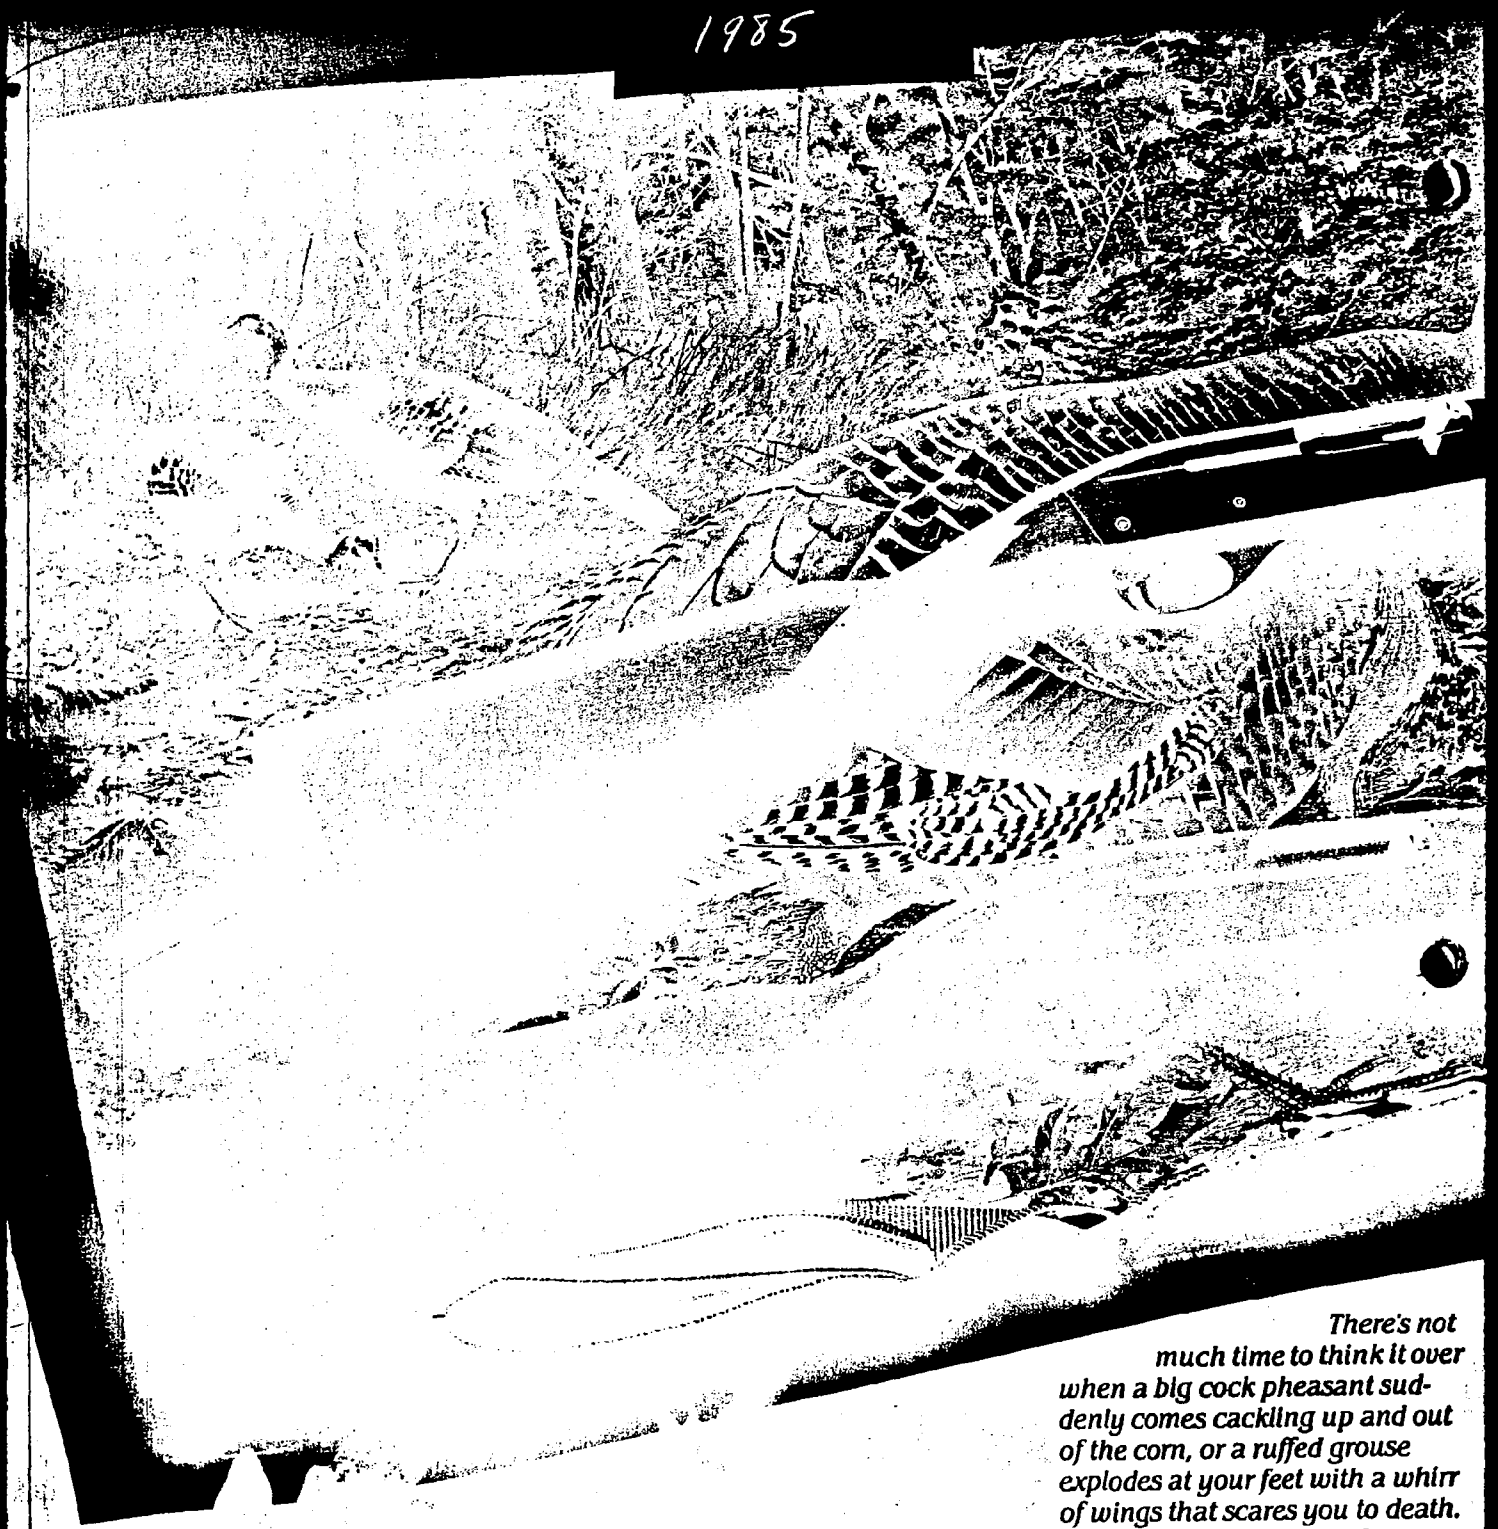
This 1100 SP Magnum comes in a 3" chamber and 26" Full choke, a great choice for turkey hunting in heavy cover, or for fast handling in a blind. There's also a 30" Full choke for pass shooting traditionalists. A camouflaged sling made of CORDURA™ nylon is attached for easy going to and from the woods or blind.

Now in its 3rd season, the 1100 Special Field combines a shorter length of 41 inches, lighter weight, and a traditional straight line stock. The result is lightning-fast shouldering, superb pointability, and carrying ease—all the features you want and expect in an ideal upland gun.

For more 1100 models and specifications, see the next page.

R2525625

1985



There's not much time to think it over when a big cock pheasant suddenly comes cackling up and out of the corn, or a ruffed grouse explodes at your feet with a whirr of wings that scares you to death.

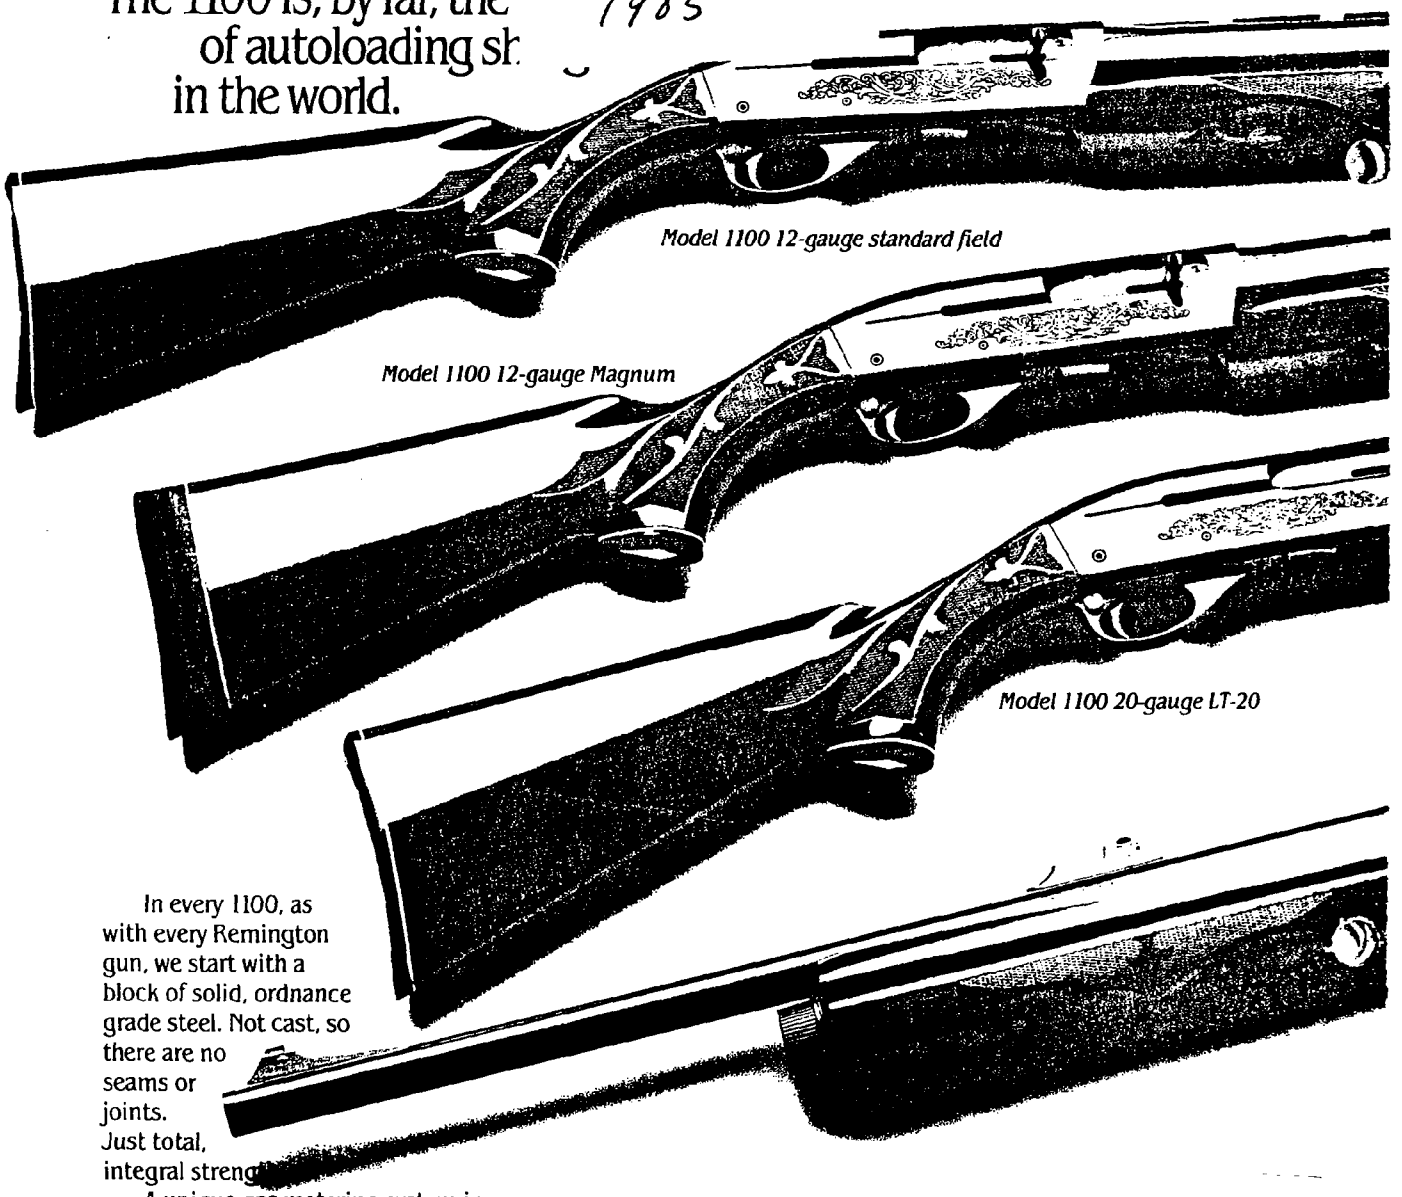
And there's little time for contemplation when the feathered burst of a covey of quail temporarily derails your reactions. These are the times when you need the balance of a Remington Model 1100—a gun that comes to your shoulder so naturally and so fast that it matches the speed of the fastest gamebird.

The handling and reliability of

R2525626

The 1100 is, by far, the of autoloading sh in the world.

1985



Model 1100 12-gauge standard field

Model 1100 12-gauge Magnum

Model 1100 20-gauge LT-20

In every 1100, as with every Remington gun, we start with a block of solid, ordnance grade steel. Not cast, so there are no seams or joints. Just total, integral streng

A unique gas metering system in the 1100 functions with the full range of factory loaded shells including low base, high base, or baby magnums. Recoil sensation is significantly reduced, keeping you on target shot after shot.

And, for the ultimate in smooth, frictionless action, Remington developed a process we call vibra-honing to give your 1100 receiver and action parts that little extra polish that can mean so much in the field.

The Field Grade 1100 is our basic, proven standard for general hunting. And the most popular. In addition to its American walnut stock and checkering, it comes with a positive crossbolt safety and metal bead front sight.

1100 Magnums are the most versatile 1100s, giving hunters more choice and value for their shotgun dollar.

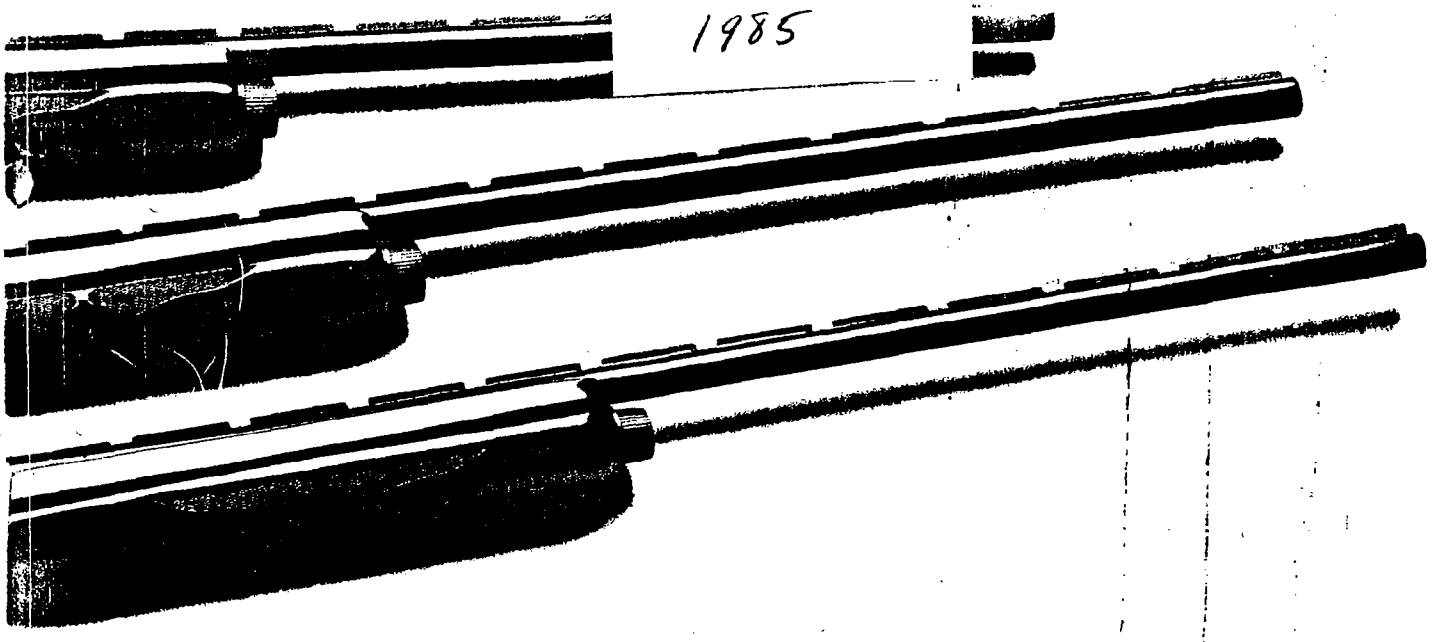
1985



Model 1100 12-gauge left-hand deer gun

Depending on the shotshells and extra barrels used, one 1100 Magnum can be quickly converted for almost any kind of hunting.

Our 3" Magnum 1100s accept and function with 1100 standard 2¾-inch chambered field barrels. But remember, 3" shells must never be loaded in a 2¾" chamber.

The **1100 Deer Gun** has a shorter barrel and rifle sights. Improved cylinder choke delivers maximum effectiveness with rifled slug and buckshot loads. All 1100s except .410 and "Special Field" have a 5-shot capacity; 3-shot plug is furnished.

The 1100 is the only autoloader made, in popular specifications, for both left- and right-hand shooters.

It also has the widest choice of economically priced, ruggedly built extra barrels. The same model that you buy for waterfowl today can become an ideal upland, target, or rifled-slug gun for big game. In seconds. Without special tools.

Model 870 20-gauge "Special Field"

The new Model 870 SP "Special Purpose" Magnum

All over the world—from mallards in the wheat fields of Saskatchewan, jacksnipe in the marshes of the Nile, to quail in the piney woods of Georgia... you're in Remington pump country.

The pump action shotgun has been around for the last 100 years. And, if you went poking around in the American hunter's gun racks, closets, or under the bed, you'll probably find more pump shotguns than any other kind. Why? Because hunters realize a pump gun gives you sturdy reliability at a reasonable price.

It's a typically American gun, and over the years, there have been some mighty good pump shotguns produced by American gunmakers. But, right now, the experts pretty well agree that the Remington Model 870 "Wingmaster" has topped the list since its intro in 1950 with sales of over 4 million. Never before in the history of shotgun sales has this record been equaled.

The reason for this unprecedented world leadership boils down to one simple answer. You hit what you shoot at with an 870 "Wingmaster"...and the gun always works!

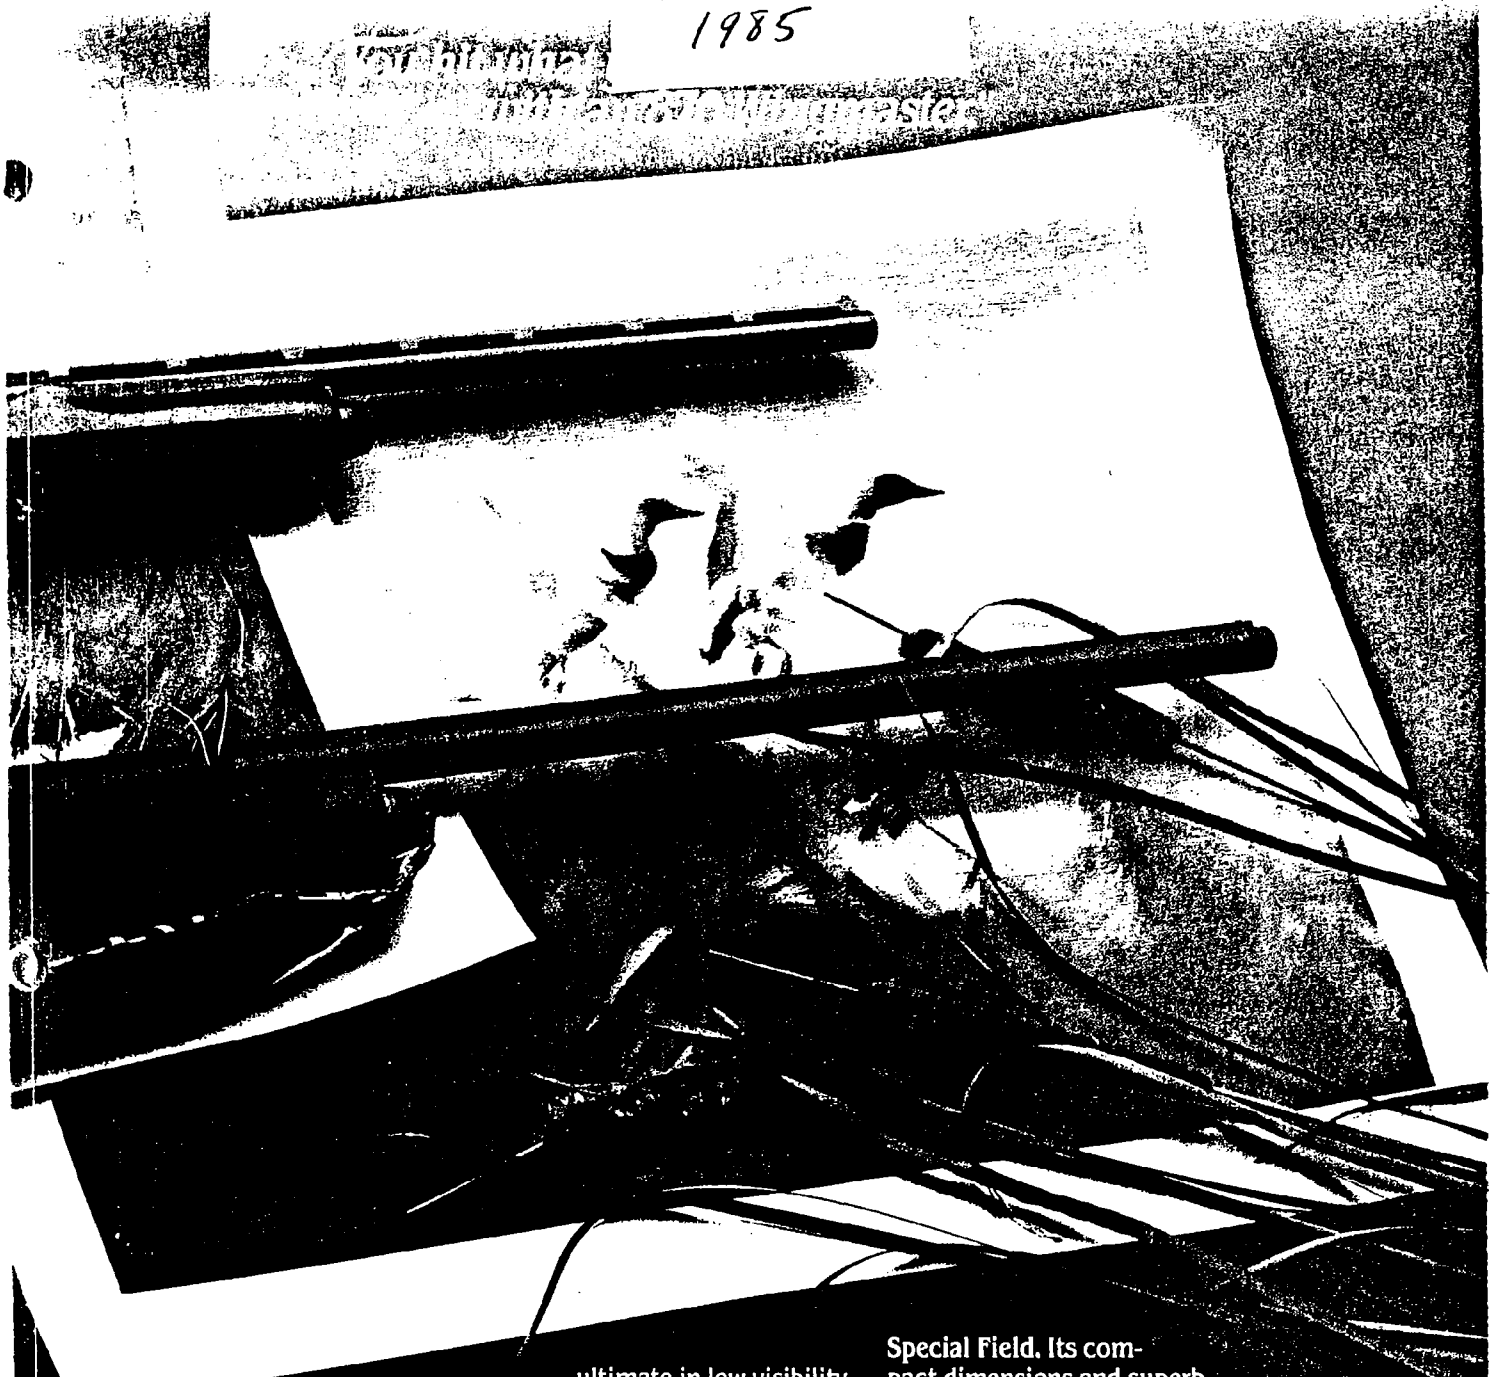
So when you pick out a Model 870, do it with confidence and pride. Its proven reputation for durability and dependability means that one of your grandchildren may well be shooting that same 870 "Wingmaster" some day...and hitting what they shoot at, too.

—J. M.

DEL 870s

R2525629

1985



Compare it to any other pump action shotgun, at any price. You'll see why the Model 870 "Wingmaster" shotgun has become the world standard.

This year, each 870 Field Grade will be chambered in 3" magnum. So you'll be choosing not only one of the most dependable, but also one of the most versatile, shotguns available.

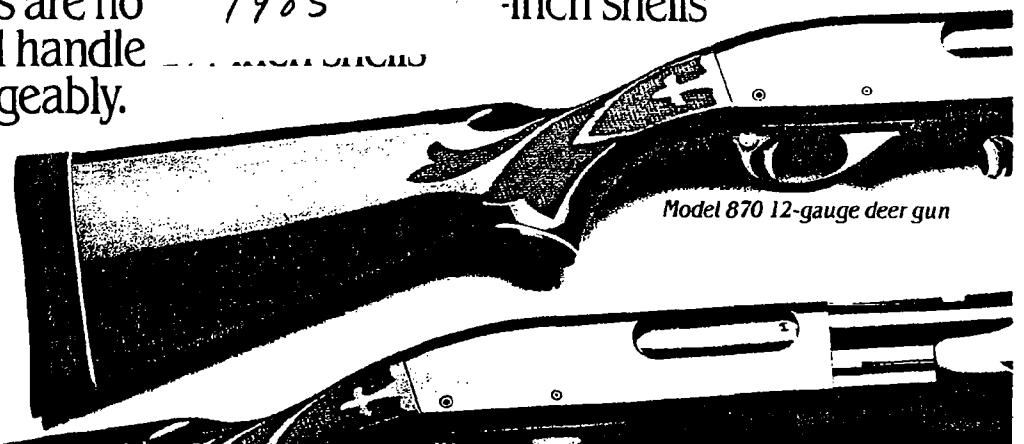
A brand new 870 SP (Special Purpose) Magnum gives waterfowl and turkey pump gun hunters the ultimate in low visibility and corrosion protection. Available in 26" and 30" Full choke barrels, this 870 has a no-sheen satin finish on the receiver, barrel, even the bolt. A subdued oil finish on its hardwood stock minimizes reflection. It also penetrates the wood, keeping it from swelling even in the most extreme dampness. A padded sling of CORDURA nylon gives you extra convenience and cover.

Ideal for day-long hunting in any field situation is the model 870 Special Field. Its compact dimensions and superb balance give you the fast pointability and handling you'd expect in an upland gun.

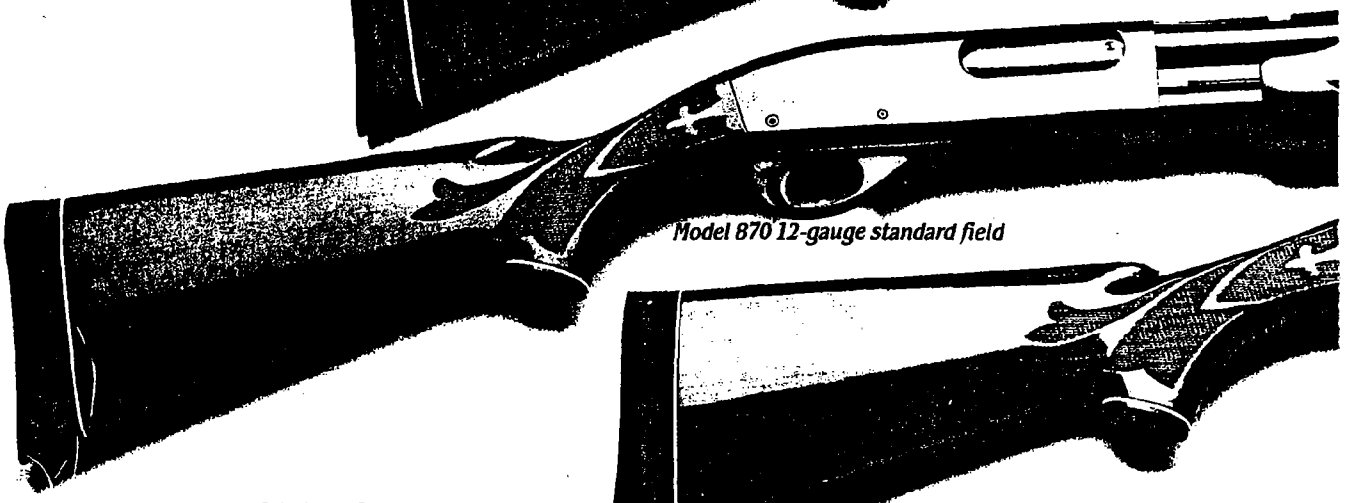
Every one of our "Wingmaster" shotguns has rugged, forged-steel barrels and action parts that are polished by a special process to give you the smoothest possible results. Turn the page for more 870 models and information.

R2525630

All Model 870s are no 1985 -inch shells and will handle ... interchangeably.



Model 870 12-gauge deer gun



Model 870 12-gauge standard field

You now have a full line of Model 870s to choose from. All with the same world-famous Remington pointability, smooth action and solid dependability to help you get that high-flyin', honker. Or ghost or a ruffed grouse.

Check our specs. You'll find the right combination of gauge, barrel length, and choke for your perfect pump. There are left-hand guns in a wide range of specifications; also, a lightweight 20-gauge, a deer gun with rifled sights, even 20-gauge Youth Guns, an ideal way to get the younger ones started.

Every 870 has a positive cross-bolt safety. Easily worked even with gloves, this safety is close to the trigger—right where it should be for that quick shot.

Twelve- and 20-gauge models have recoil pads. Stocks are solid American walnut with checkering, sealed against the elements by durable Du Pont RKW wood finish. And built to take all kinds of abuse.

All 870s except .410s and "Special Field" have 5-shot capacity; a 3-shot plug is included.

A wide choice of interchangeable barrels can help make your 870 an even better value among today's pump shotguns.

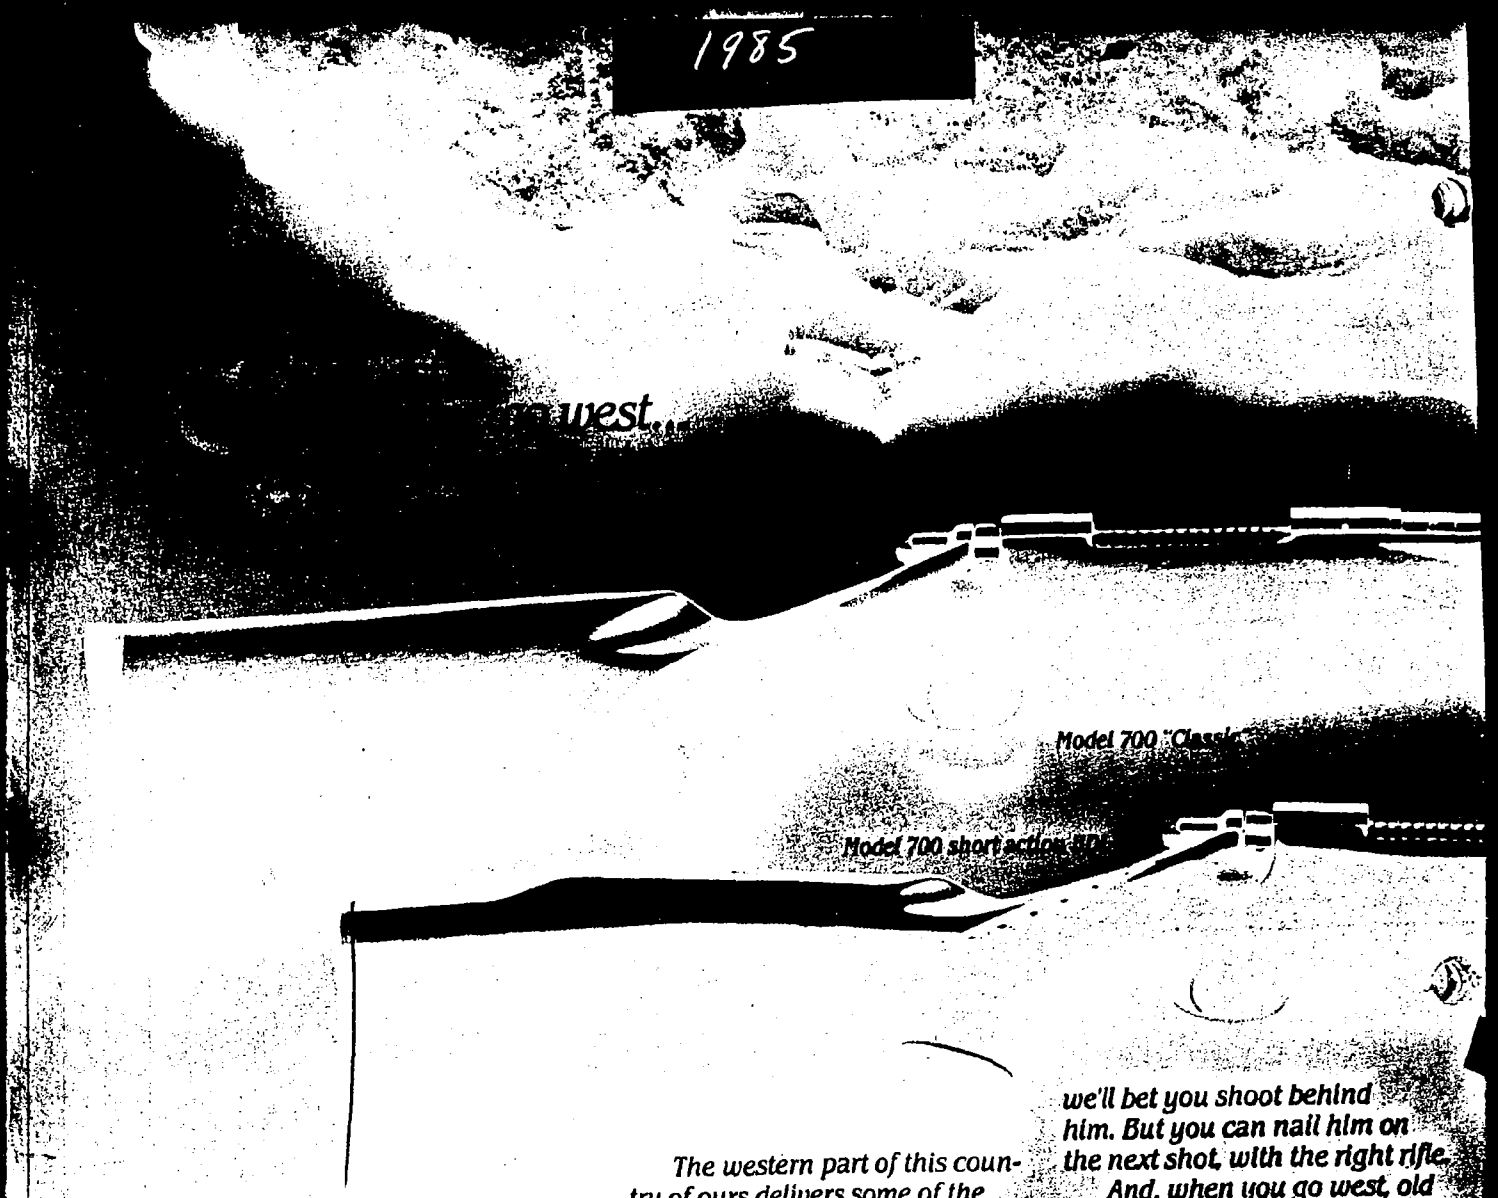
R2525632

1985



The western part of this country of ours delivers some of the world's greatest hunting experiences. That's where you need our world-famous bolt action rifle. A rifle that can take it day after day. Year after year. And still deliver those long shots with flat trajectory, excellent accuracy, and power to spare.

Guaranteed to raise the hair on any hunter's neck is the sudden answer of a bull elk to your partner's bugling on a clear frosty morning in the high country.

When you get that first shot on an antelope as it flashes across the prairie...at 40 miles per hour, faster than a race horse... we'll bet you shoot behind him. But you can nail him on the next shot, with the right rifle.

And, when you go west, old man, you'd better be ready to roll out of that nice warm sleeping bag and climb, bright and early, to where that mule deer with the big rack might be. Then climb some more to get above 'im. That's when a light but powerful rifle is your best friend.

It could be a hard-to-stop mountain goat you're after. And sheep hunting is no stroll in the park, either. It's times like this you're glad to have Remington by your side.

Whatever the big game, wherever you hunt it—on foot, horseback or moose-hunting canoe—remember, you're in Remington Country. —J. M.

Model 700 left-hand BDL

Model 700 "Varmint Special"

Model 700 ADL

Whatever your needs call for in strong accurate bolt action, you can bet we have the answer. Our 700s come with today's longest list of calibers, widest choice of stock styles, even several left-hand versions. Every one a legend in looks and performance. The **Model 700 BDL** and **"Varmint Special"** rifles have Monte Carlo stocks, high gloss RKW finish on walnut, plus many custom gun touches. The "Varmint Special" has a heavier barrel to eliminate barrel-whip, delivering pinpoint accuracy at long distances.

Our well known **700 Classic**, on the previous page, is for those who prefer a traditional straight line stock and satin finish. Jim Carmichel of **Outdoor Life** said, "The Remington 'Classic' is probably the best-looking, certainly the most shootable, hunting rifle ever offered by a major firearms maker."

For 1985 we're continuing our tradition of chambering it for classic calibers with the 350 Remington Magnum. A limited quantity will be manufactured. So don't wait to order.

Long action ADL/BDL calibers have blade ramp front sights, adjustable rear sights. Specifically, these calibers are 25-06, 270, 30-06, 7mm MAG, and 300. Front sights are hooded on the BDL models. All sights are removable. (Short action calibers do not have sights.)

For custom 700s made to your specifications, see the back page or call our Custom Gun Shop.

The **Model "XP-100"** bolt action pistol has become a legend for its strength, precision, balance and accuracy. We've chambered it in 7mm Bench Rest Rem., an ideal silhouette cartridge, with a 14¾-inch barrel. It's also available with a 10½-inch vent rib barrel for the 221 Remington "Fire Ball" for varmints. Each has a one-piece "Zytel" nylon stock with universal grip, two-position thumb safety, match-type grooved trigger, and a drilled receiver.

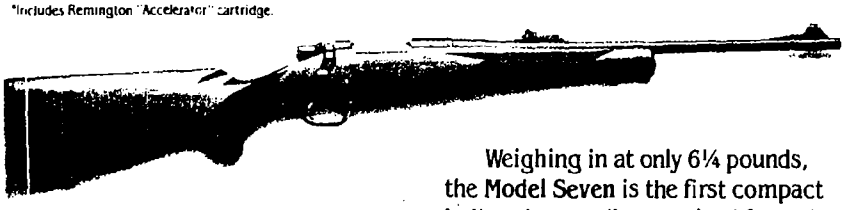
Barrel Length	18½"	18½"	18½"	18½"	18½"
Overall Length	37½"	37½"	37½"	37½"	37½"
Twist R-H (1 turn in)	14"	9⅛"	9¼"	9⅛"	10"
Average Weight (lbs.)	6¼	6¼	6¼	6¼	6¼
ORDER NUMBERS	4720	4782	4784	4786	4788

Standard Stock Dimensions: 13½" length of pull, 1" drop at heel, ⅜" drop at comb (measured from centerline of bore).
*Includes Remington "Accelerator" cartridge.



Weighing in at only 6¼ pounds, the Model Seven is the first compact bolt action totally conceived from the ground up.

Rather than starting as a heavy rifle that had its barrel turned down or lopped off, the Model Seven's ideal weight and balance were designed in. The result is an extremely compact centerfire bolt action gun with one of the best power-to-weight ratios of any rifle made anywhere.

The Model Seven has to be seen and shouldered to appreciate its incredible ease of handling, fluid pointability, and strength of action.

Its quality touches include a fully enclosed bolt and extractor system, 18½-inch tapered barrel with ramp front and adjustable rear sights. A slimmed down, straight line walnut stock and Schnabel fore-end have cut checkering.

Each Model Seven is built to the same standards as our legendary Model 700, bringing new levels of accuracy to the short action bolt. Now you can choose from six high performance calibers including 7 mm-08 and 308. Though the Model Seven is 20% less weight than our full scale bolt action rifles, you can be sure it's 100% Remington.

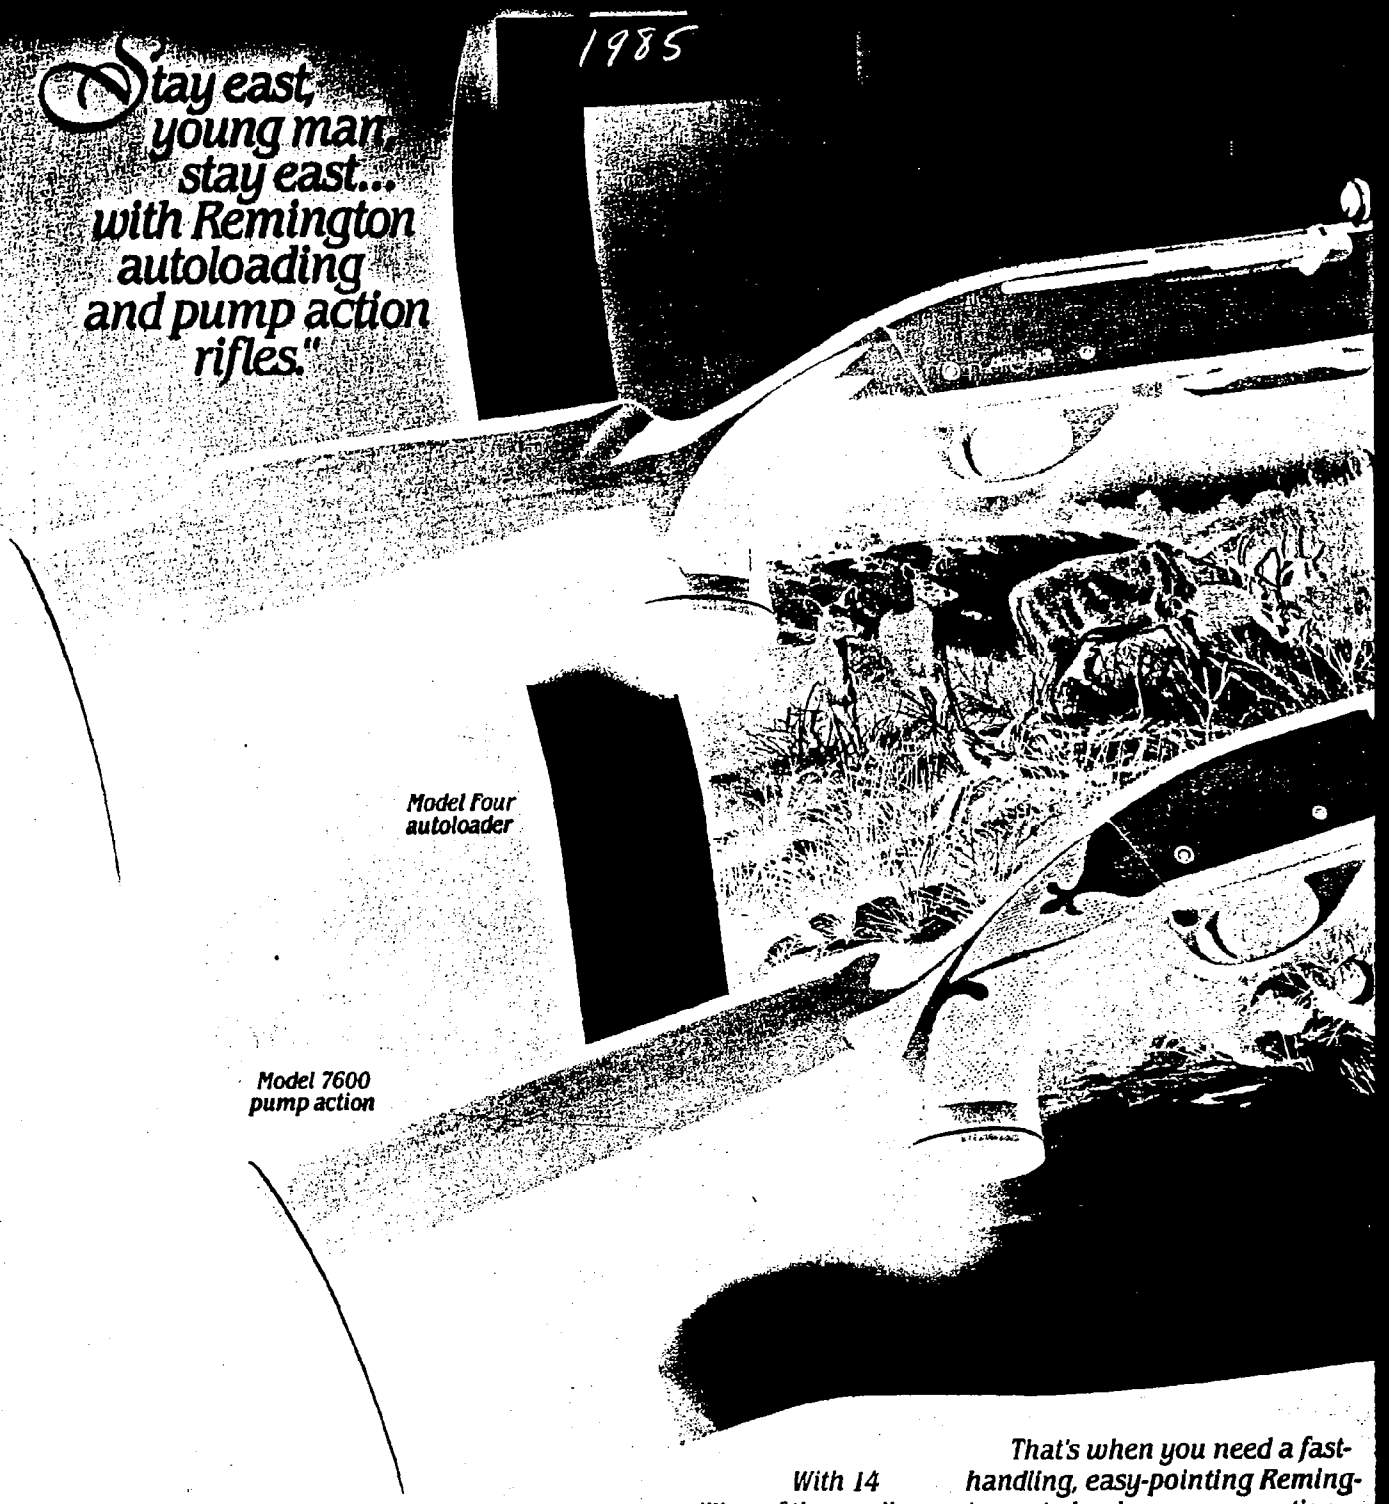
1985

"Stay east, young man, stay east... with Remington autoloading and pump action rifles."



Model Four autoloader

Model 7600 pump action

If you're a white-tailed deer hunter, you know you're hunting the most popular, and perhaps the smartest, game animal in North America. You'll find him from the southern tip of Panama to 600 miles north of the Canadian border.

With 14 million of these wily whitetails in this country alone, you figure they must be everywhere...until Opening Day.

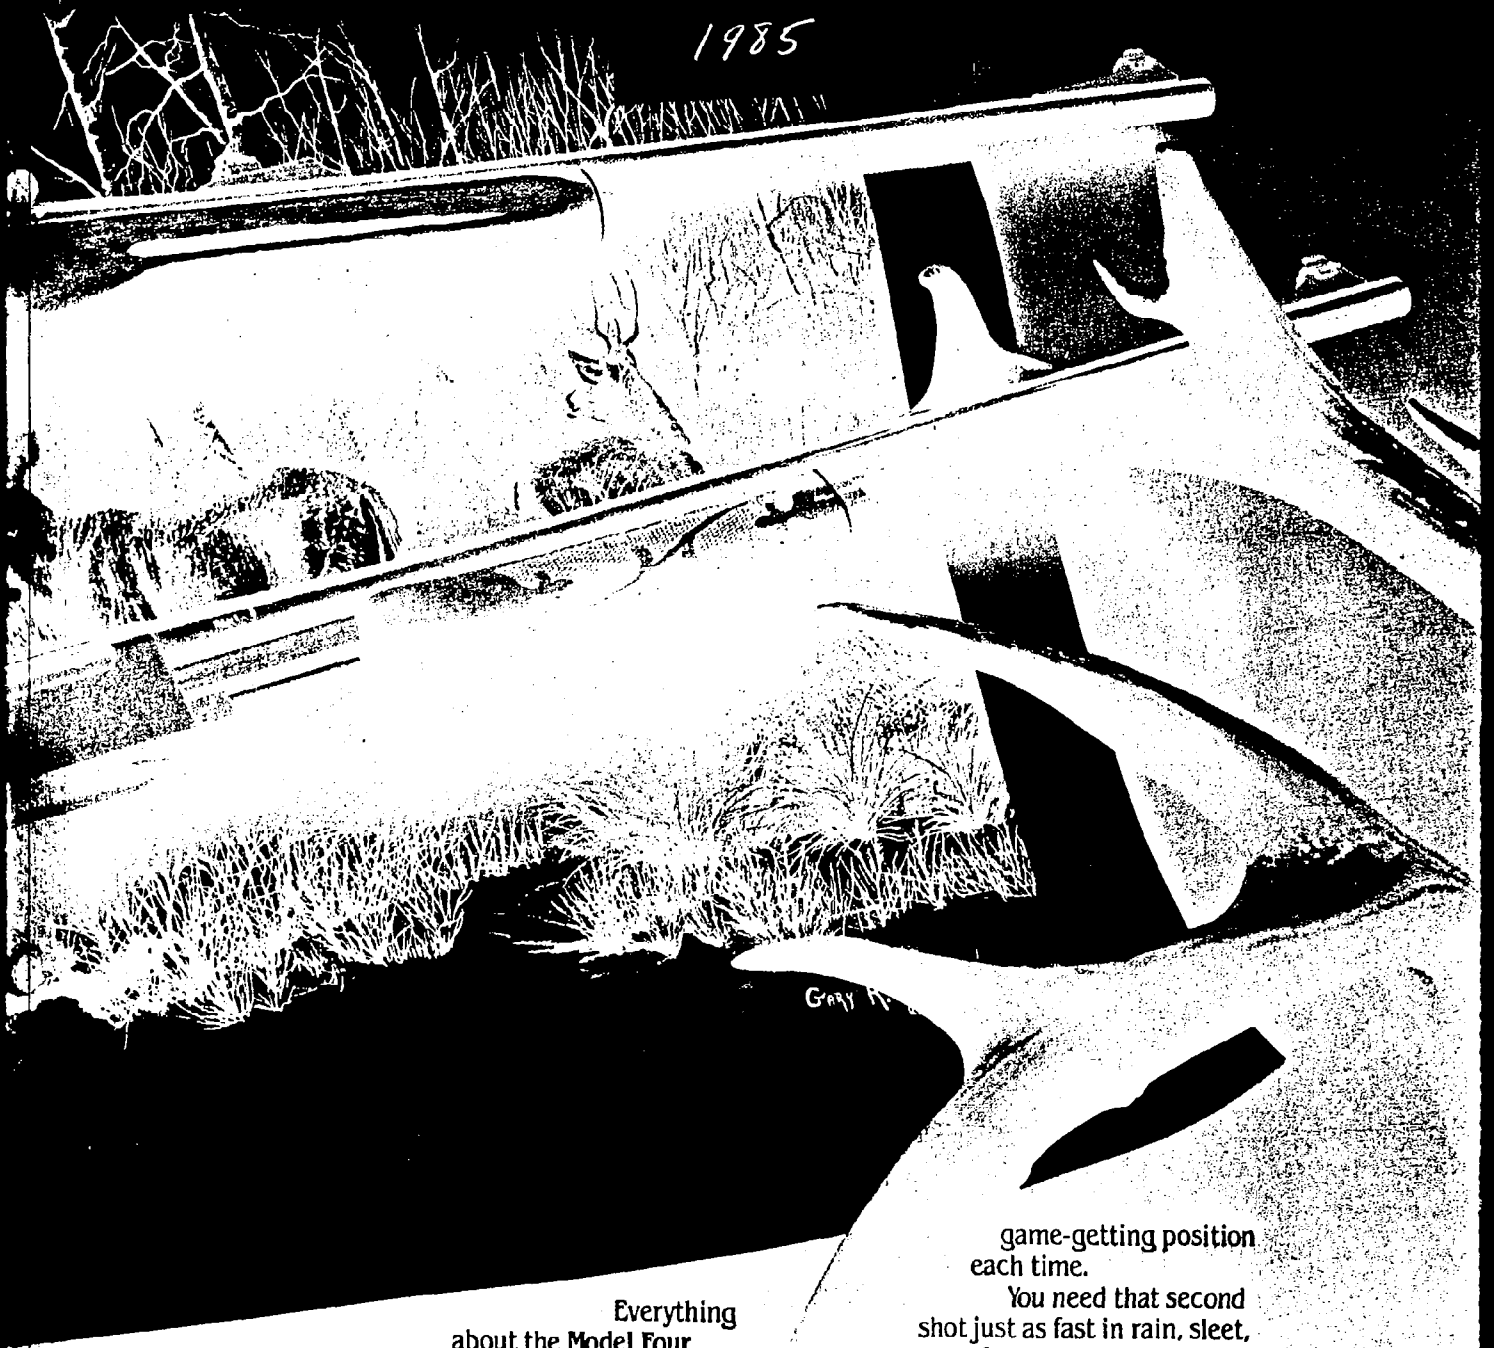
They hide in the tightest of brush and, being naturally camouflaged, they're mighty hard to see. When you finally do jump a whitetail, that's all you do see—his white tail or "flag"—putting tree after tree between you and him.

That's when you need a fast-handling, easy-pointing Remington auto loader or pump action rifle. In case you need it, you'll be ready with the fastest, most accurate second shot in the business. Because, even with your heart in your mouth, Remington helps keep your eye on the target, your cheek on the stock, and your finger on the trigger.

With these pump and auto rifles, you're shooting an action just like your favorite autoloading

PUMPS & AUTOS

R2525637



or pump action shotgun that you've been hunting with all fall. You get the same fit. The same feel. The same pointability.

So stay east, young man, stay east. You could be on a quiet stand, a noisy drive, or patiently perched in a tree down South... wherever, you're in Remington country. It's there you'll find all the real reasons why these rifles have been the choice of woodswise and experienced deer hunters for the past 81 years. —J. M.

Everything about the **Model Four** and **Model 7400** autoloading rifles has been engineered for speed. For smoothness. For dependability.

The gas metering system is designed for performance and reliability. Handling and pointability are without equal, thanks to stock dimensions and ideal weight distribution.

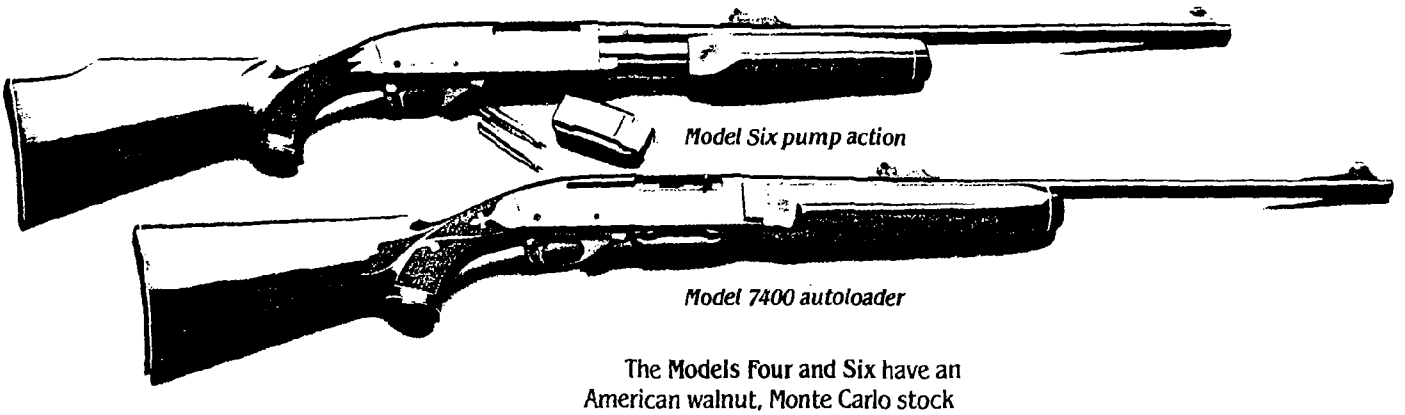
These autoloaders deliver up to four extra shots with low enough recoil sensation to keep you in game-getting position each time.

You need that second shot just as fast in rain, sleet, snow, or freezing cold. That's where the reliability of our **Model Six** and **Model 7600** pump action rifles really comes through. Double action slide bars keep performing at your command, with far less effort than you'd ever imagine. See the next page for specifications.

R2525638

1985

Wheth np or auto, one of these rifles is just your speed. Fast.



Model Six pump action

Model 7400 autoloader

The **Models Four and Six** have an American walnut, Monte Carlo stock with full cheekpiece. You'll like the feel of the curved pistol grip, the balance of the flared fore-end, the looks of the rich, cut checkering.

An added custom feature is a cartridge head imbedded just forward of the receiver. A removable 4-shot magazine lets you load or unload quickly or change your ammo fast for different game or conditions.

There are detachable sights, with flat-faced front gold beads. The bolt has massive locking lugs, similar to those of bolt action rifles.

The **Model 7400** autoloader and **7600** pump action rifles feature the same mechanical advantages of the Model Four and Six, but at lower cost. Stock and fore-end sport a custom checkering pattern.

Model 552 autoloading "Speedmaster"

"Nylon 66" autoloader

When it comes to rimfire, Remington offers three rifles that are hard to beat for fun or small game.

Take our **Model 572**, the only pump action 22 made in America. It fires Shorts, Long, and Long Rifle cartridges interchangeably. A 21-inch barrel gives you great balance and accuracy. A slim, contoured pistol grip, plus precision sights, add the kind of shooting control you'd expect only on big game rifles.

Same's true of our 552 "Speedmaster" rifle. It's the only 22 autoloader that shoots all cartridge types. Like the 572, the "Speedmaster" can quickly be converted to single load capacity, an important feature when shooting with youngsters. Both models come in standard A grades for the budget-minded. And BDL for those who demand the very best.

Our most unique rimfire rifle is the innovative Nylon 66. It's precision molded from the same incredibly strong Du Pont "Zytel" that the Army uses for helicopter gears and the NFL for helmets, and we use for the most durable rifle you can buy. That's why we can give you the world's only lifetime warranty on a stock. If the Nylon 66 ever warps, cracks, fades or peels, we'll replace it, free.

All action surfaces of the "66" glide on supersmooth nylon bearings that never need lubrication. This gun performs perfectly in all weather conditions. It's long been the choice of trappers and hunters from the frozen reaches of Alaska to the jungles of the Amazon.

Whichever way you go, know that when you shoot Remington, you've got a unique rimfire edge.

Model 572 BDL pump action

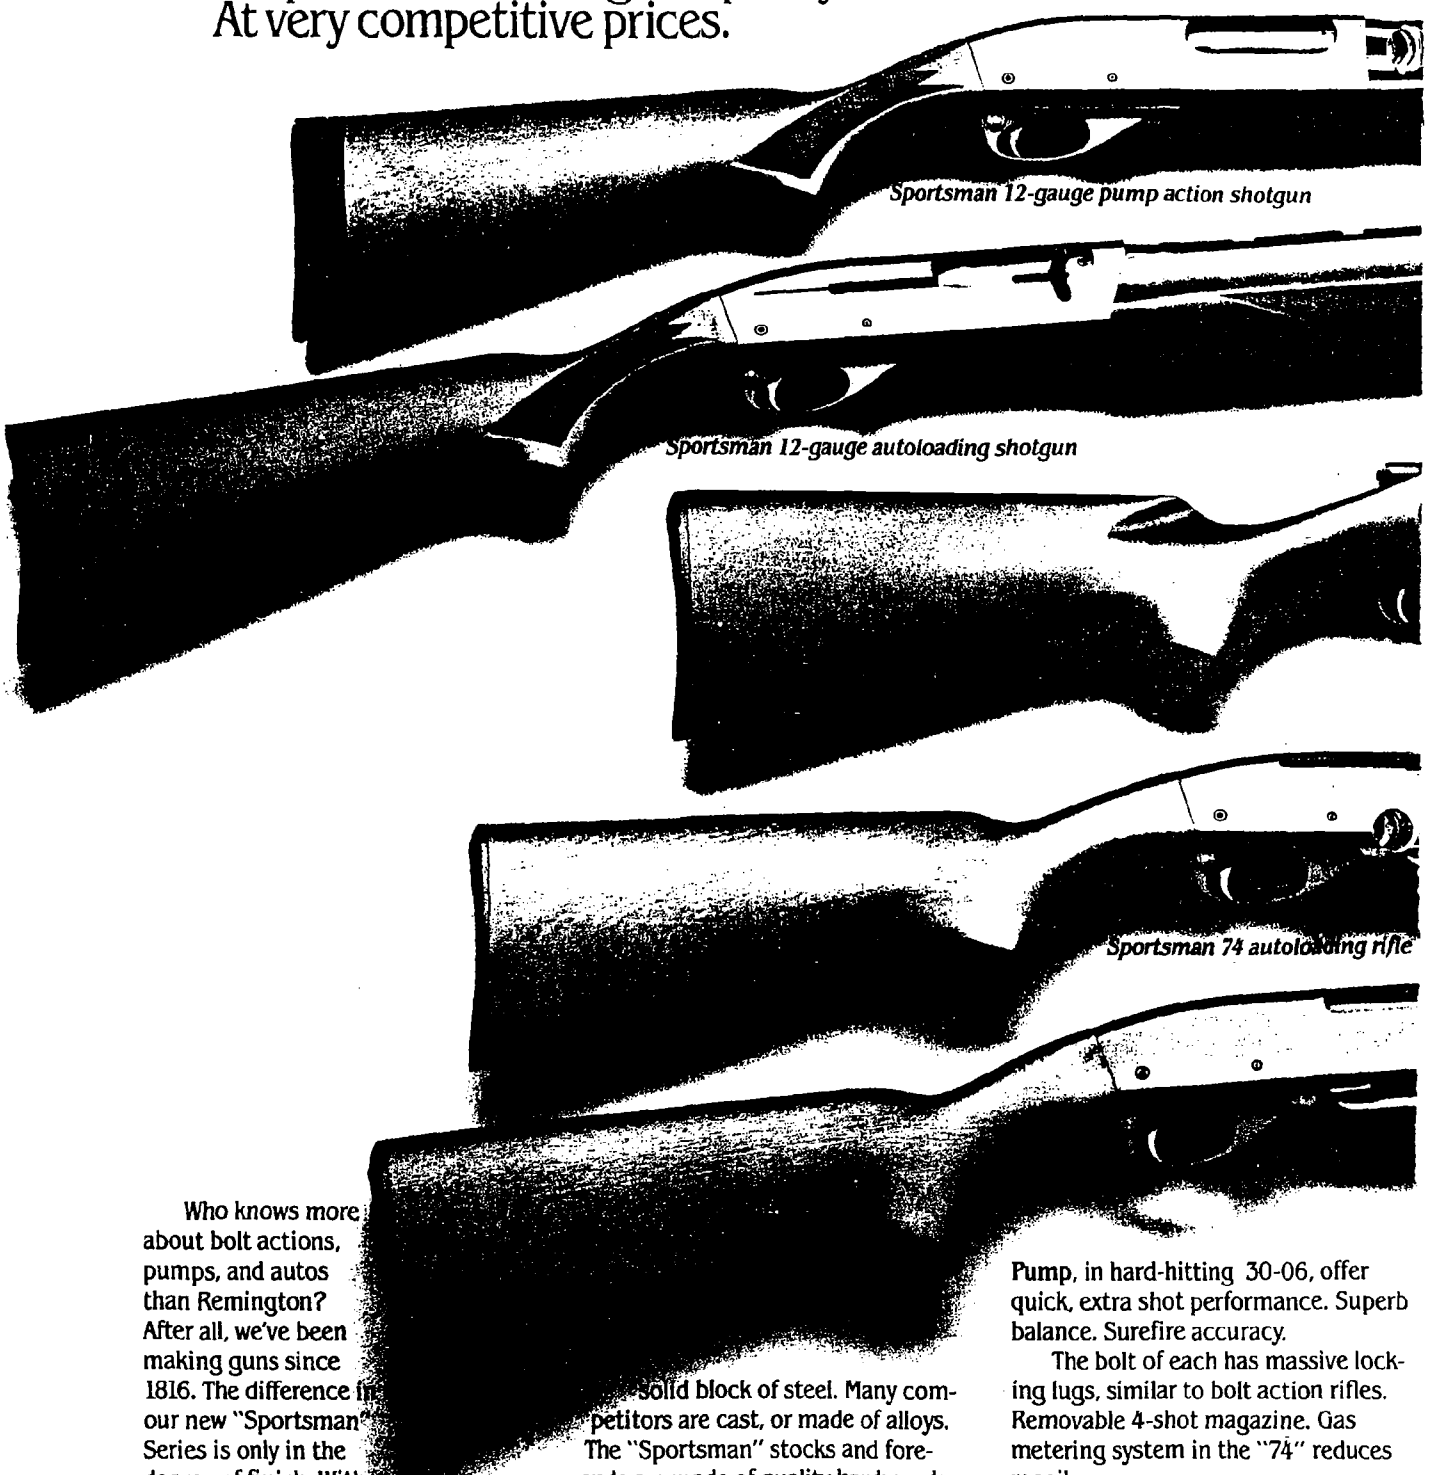
The new "Spo ...ers you uncompromised Remington quality. At very competitive prices.



Sportsman 12-gauge pump action shotgun

Sportsman 12-gauge autoloading shotgun

Sportsman 74 autoloading rifle

Who knows more about bolt actions, pumps, and autos than Remington? After all, we've been making guns since 1816. The difference in our new "Sportsman" Series is only in the degree of finish. With "Sportsman" we concentrate on the basics. Yet when you compare, feature for feature, with any similarly priced guns, you'll find added Remington value in every "Sportsman" inch.

All receivers are machined from a solid block of steel. Many competitors are cast, or made of alloys. The "Sportsman" stocks and forends are made of quality hardwoods with satin finish.

"Sportsman" rifle receivers are drilled and tapped for easy scope mounting. Metal sights are on all guns, with rear sights on the rifles that are adjustable for windage and elevation.

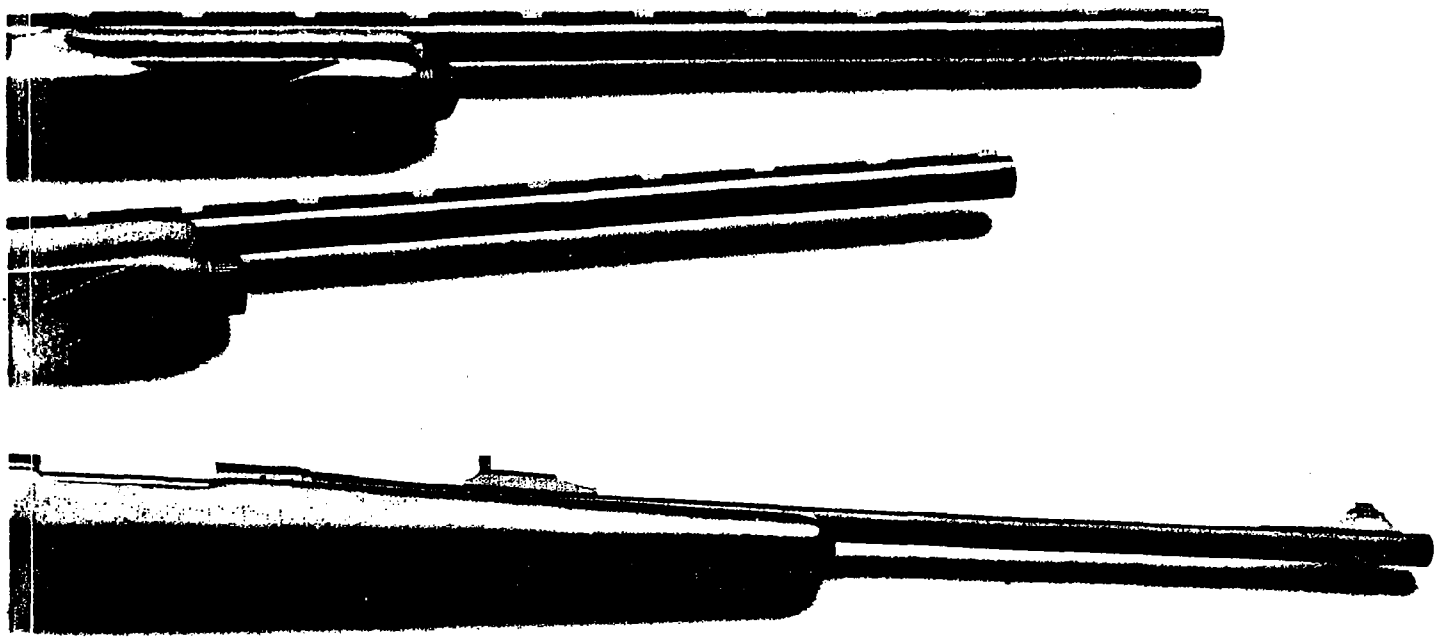
The "Sportsman" 74 Auto and 76 Pump, in hard-hitting 30-06, offer quick, extra shot performance. Superb balance. Surefire accuracy.

The bolt of each has massive locking lugs, similar to bolt action rifles. Removable 4-shot magazine. Gas metering system in the "74" reduces recoil.

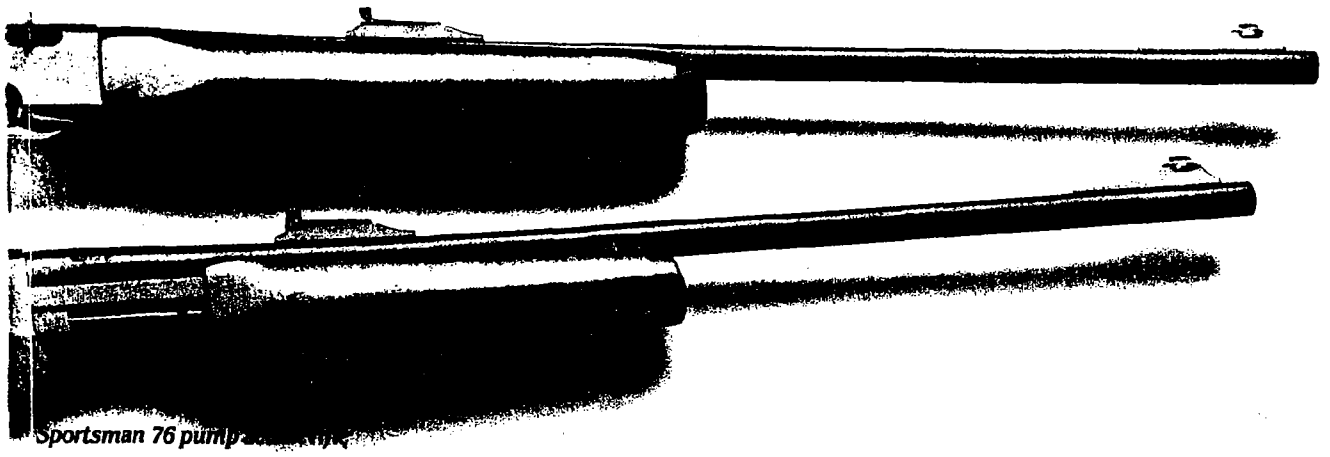
Our "Sportsman" 12 Pump and 12 Auto shotguns have vent rib barrels in either 28-in. Mod. or 30-in. Full ch... The pump is chambered in 3-in.; the Auto is in 2¾-in.

The "Sportsman" 12 Pump has exceptionally fast, smooth chambering and extraction through use of

R2525641



Sportsman 78 bolt action rifle



Sportsman 76 pump ...

double action bars. Barrel extension locks in the breech bolt to ensure constant headspace.

There's also a "Sportsman" 78 ... action rifle chambered for two ... action calibers, the 270 Win. and ...-06; also available in short action ... hambered for 243 and 308. It has the same rugged Remington action, ...lt, and barrel that's long been rec... ...ized for strength and accuracy by ...ters and bench rest shooters alike. ...ve ever thought of buying a ... quality gun because it's more ...rdable, think again. Now, you don't ... to wait to own a Remington.

Model 1100 "Tournament" skeet

Model 870 TA trap

Serious target shooters know our Model 1100 for its great pointability, low recoil, and reliability. Our 1100 "Tournament" Model has positive cut checkering and fine American walnut. Ask your dealer about our Model 1100 weight-equalizer kits. They give your 20-, 28-, and .410 the same balance as your 12-gauge 1100 skeet gun.

For trap, it is tough to beat our revolutionary 870 "Competition." This single-shot gun has a unique gas-assisted system to reduce recoil. It gives you the pointability of a single barrel, the recoil of an 1100, and the dependability of an 870.

Highly competitive but worthy lower-cost models are our SA Grade 1100 skeet gun and TA Grade 1100s and 870s.

Target Loads.

Trap and skeet shooters have called our PETERS shells "True Blue" for a good reason. Reliability. With our sure-fire 209 primer, a hotter primer mix and covered flash hole.

Pick up a 90 pack of "Blue Rock" clay targets and get into the best of clay busting.

Later this year, look for our line of target loads in 20, 28, and .410—all with "Power Piston" wads and the other features that make Remington a top brand on trap and skeet fields.

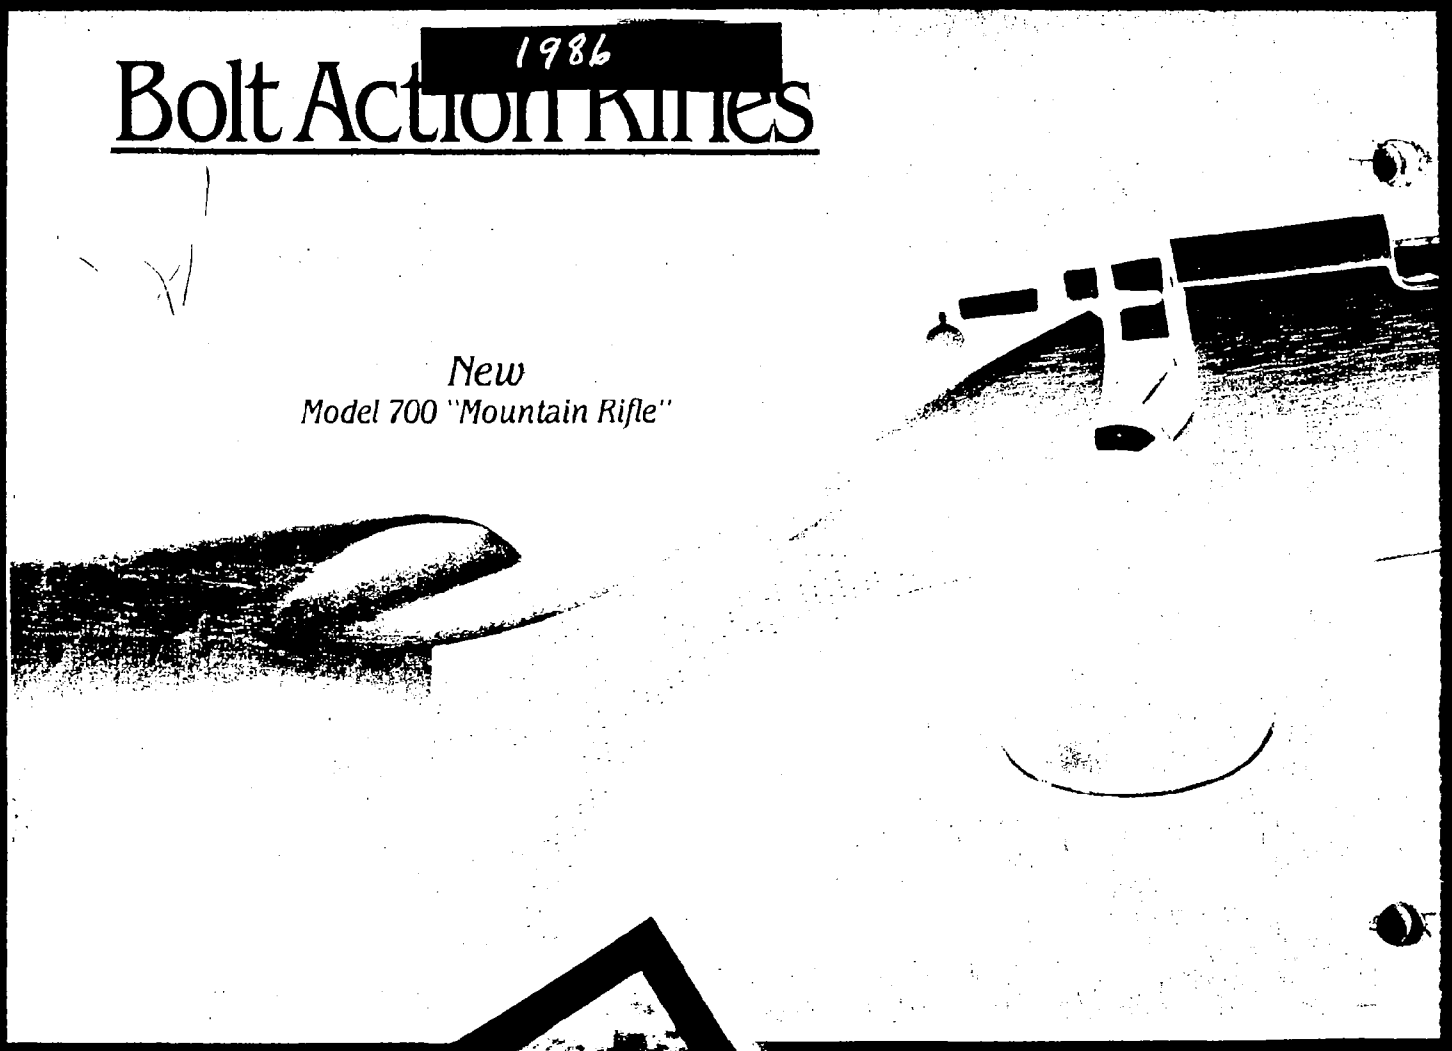
Bolt Action Rifles

New
Model 700 "Mountain Rifle"

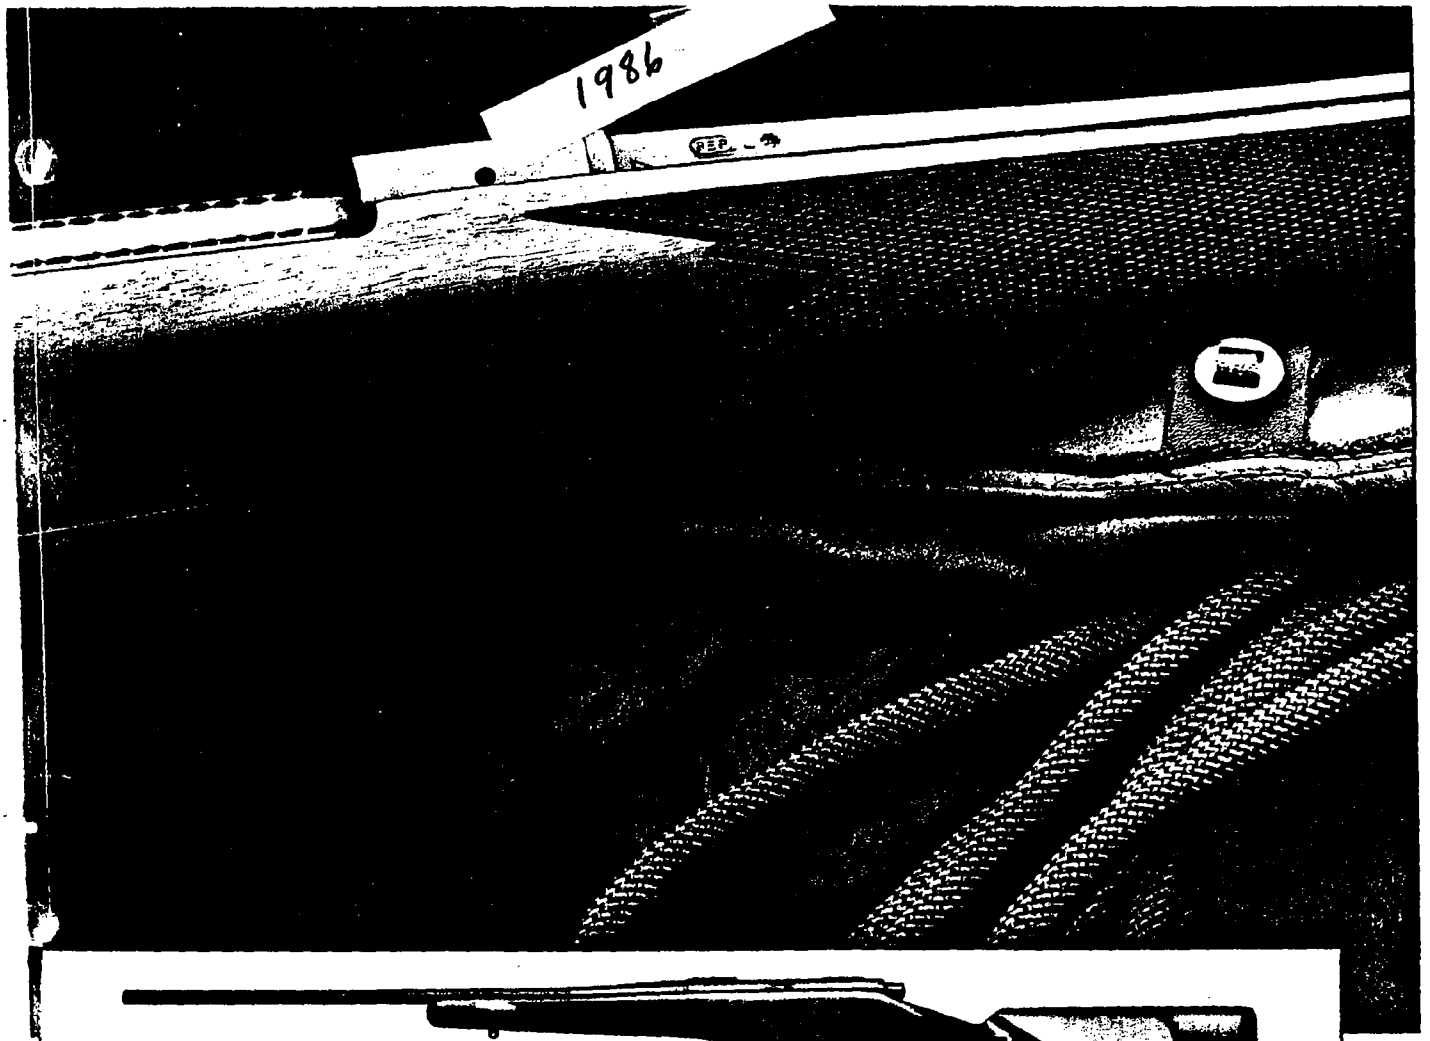


"You have to be part mountain sheep, part pack mule to hunt here in the Bob Marshal Wilderness."

Augusta, Montana

ears, the Model 700 has been own as a rifle of legendary strength and accuracy. But for 1986, the legend is reborn in a lighter, easier-to-carry version. And although this new 70(conserves on tiring weight, its performance and quality remain uncompromised.

R2525645



The trim new Model 700 "Mountain Rifle" with tapered barrel, cut checkering and slender cheekpiece.

The benefits of this new rifle make exciting news for experienced rifleemen everywhere.

Clean, smooth, classic lines give this rifle a custom look...without the extra cost. Its 22" tapered barrel and slender stock design substantially reduce your carrying weight. At just 6¾ lbs., it shaves a full ½ lb. from our standard Model 700. Yet, the *"Mountain Rifle"* has the same action that has made the 700 a favorite of precision shooters, including national benchrest and silhouette champions.

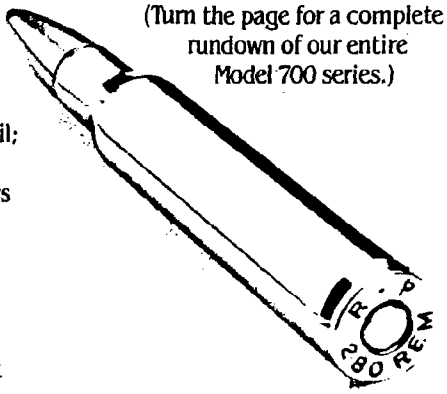
The satin-finished stock of traditional American walnut is streamlined and functional, with the right feel for the experienced rifleman.

This new *"Mountain Rifle"* is chambered in three proven, big-game calibers—270 Win, 280 Rem and 30-06. And it has a host of features that come from years of experience and development: a lower-pitched pistol grip to help straighten your wrist for better control; a slender cheekpiece positions the eye for sighting while softening recoil; a proven hinged floor plate and specially designed follower that allows the bolt to glide smoothly; and a *naturally* placed safety that is easily accessible and operable, even with gloves on.

And, as with all Model 700s, you're getting the most accurate, strongest bolt action you can buy...out of the box. Its bolt face, barrel and milled receiver surround the cartridge head with three rings of solid steel.

No extractor cut weakens the bolt.

(Turn the page for a complete rundown of our entire Model 700 series.)



R2525646

Bolt Action Rifles

1986

R2525647

om the moderately priced ADL to he trim new *"Mountain Rifle"* and ur custom grades, the Model 700 is raised by hunters and outdoor writ- alike for style, strength and accu-. It's also proven to have the fast- st lock time* of any production centerfire on the market, so nothing is going to put you on target faster. And its crisp trigger is rated the finest of any production rifle.

Our *Model 700 BDL* and heavy-barreled *"Varmint Special"* feature a Monte Carlo style American walnut stock with cheekpiece, positive cut skip-line checkering, hinged floorplate, quick release swivel studs and RK-W finish. The *"Varmint Special"* is once again available in 6 mm Rem.

For 1986, we are continuing our tradition of chambering the Model 700 *"Classic"* in classic calibers for a limited production run. This year's offering will be the 264 Win Mag.

This *"Classic"* is just that. With a traditional straight line stock, simple but elegant full-pattern cut checkering, satin wood finish, highly polished blueing, brown rubber butt pad, sling swivel studs and a hinged floorplate.

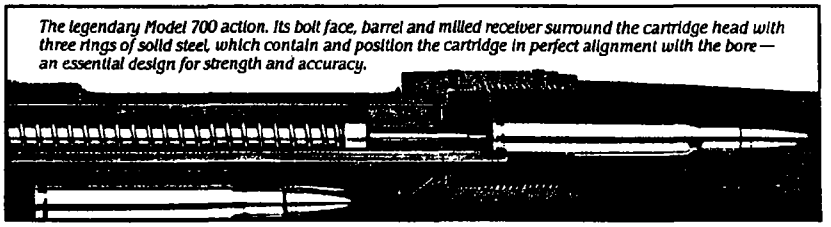
Our value-leading *Model 700 ADL* has cut checkering on its American walnut stock and a hand-applied satin finish.

Blade ramp front sights and fully adjustable rear sights come with all Model 700 ADLs and BDLs except in the varmint calibers (17 Rem, 222 Rem, 223 Rem and 22-250 Rem). BDL front sights are hooded, and all are removable. All Model 700s are factory drilled and tapped for scope mounts.

Last, but least only in weight, is our 6¼-pound *Model Seven*. Our compact bolt action rifle has one of the best power-to-weight ratios of any rifle. In five high-performance short action calibers, including the 7mm-08 Rem and 223 Rem, the Model Seven's quality features include an 18½-inch tapered barrel with ramp front, adjustable rear sights and hinged floorplate. A slimmed down, straight line stock of American walnut has cut checkering, satin finish and a stylish Schnabel fore-end.

Note: Other calibers and our *Model 700 "Safari"* rifles are available in custom grades. See your Remington Pro Line™ Center for our Custom Gun Shop brochure.

*Lock time is the time it takes after the trigger is pulled for the firing pin to strike the primer.



The legendary Model 700 action. Its bolt face, barrel and milled receiver surround the cartridge head with three rings of solid steel, which contain and position the cartridge in perfect alignment with the bore — an essential design for strength and accuracy.

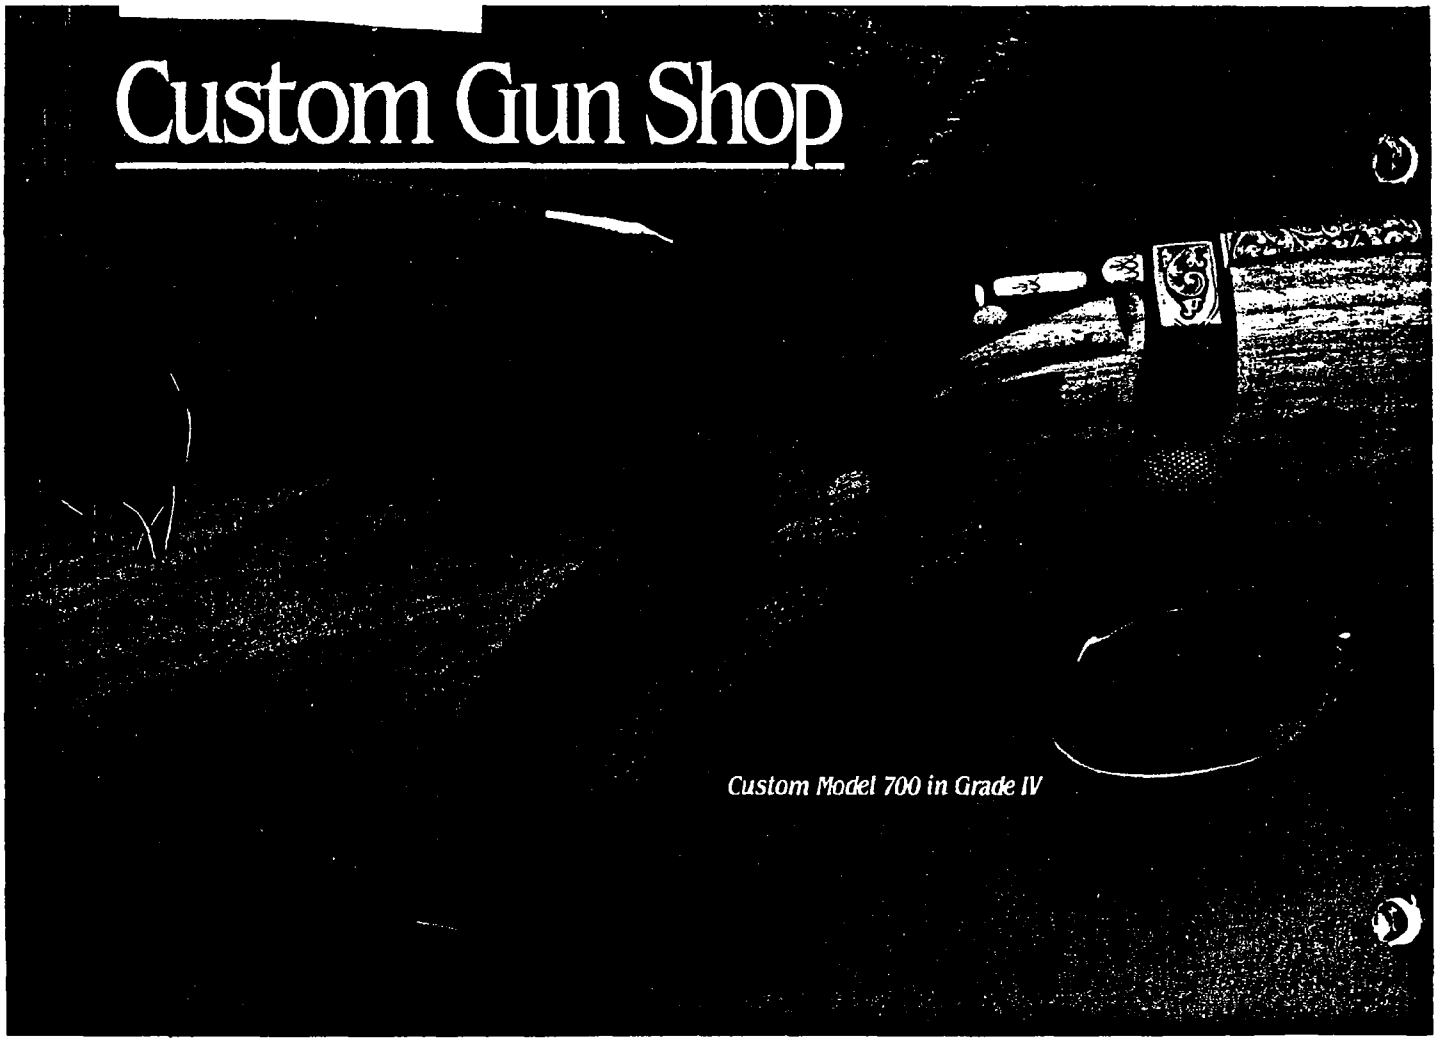
Custom Gun Shop



Custom Model 700 in Grade IV

The Remington Custom Gun Shop is all about making one gun. One at a time. Fit and finished for one individual. A gun you just can't walk into a store and buy off the shelf.

Choose your Model 700 Custom bolt action in a range of grades: I, II, III or IV. Depending on your individual tastes and requirements, special woods are selected and actions with engraving are created by our craftsmen, in calibers from 17 to 458.

Our new Model 40-XR Custom Sporter rimfire has the same quality and feel as our legendary Model 700, in an exquisite 22-caliber single-shot version. Like the custom Model 700, it's available in grades I, II, III or IV.

Also for 1986, our Custom Gun Shop offers the new Remington Model 700 "Custom" KS "Mountain Rifle," fitted with an extra lightweight, super strong Kevlar™ fiber-reinforced stock. Available in six calibers from 270 Win to 375 H&H in either right- or left-hand action. It's the perfect gun for almost any kind of big game.

The Safari grade Model 700s are a special breed of custom rifles. They're built with the strength to take the biggest game and still be a handsome addition to any gun cabinet. Safari grade rifles are now offered in 8mm Rem Mag, 375 H&H Mag and 458 Win Mag in classic or Monte Carlo style stocks.

Our new Custom "XP-100" long range handgun with wood stock comes in 7mm-08 Rem and 35 Rem calibers. With ramp front sights, the 7mm-08 is ideal for metallic silhouette shooting. The 35 Rem version is also well suited for big game handgun hunting.

Autoloading and pump action rifles and shotguns are also custom crafted in D and F grades. Each gun from our Custom Gun Shop is an example of Remington's dedication to excellence in precision as well as beauty.

For information or to order any gun from our Custom Gun Shop, see your Remington Pro Line™ dealer. Or, send a check for $5,* payable to Remington Arms Co., Eden Park Bldg., GCD, Wilmington, DE 19898, for the new Custom Gun Shop brochure.

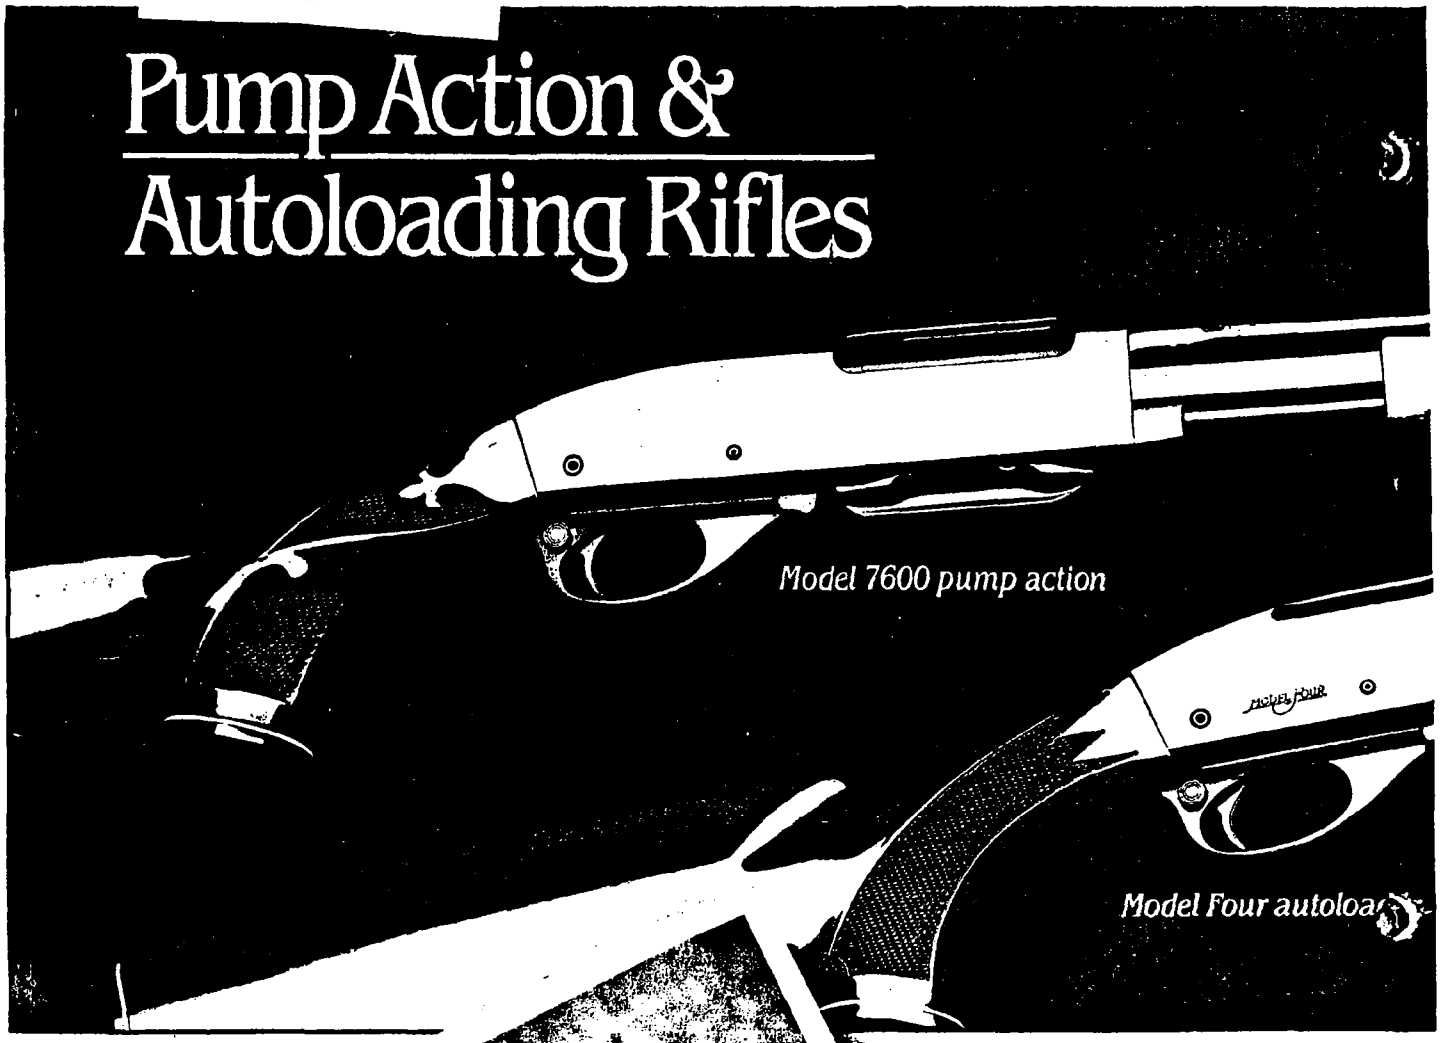
Pump Action & Autoloading Rifles

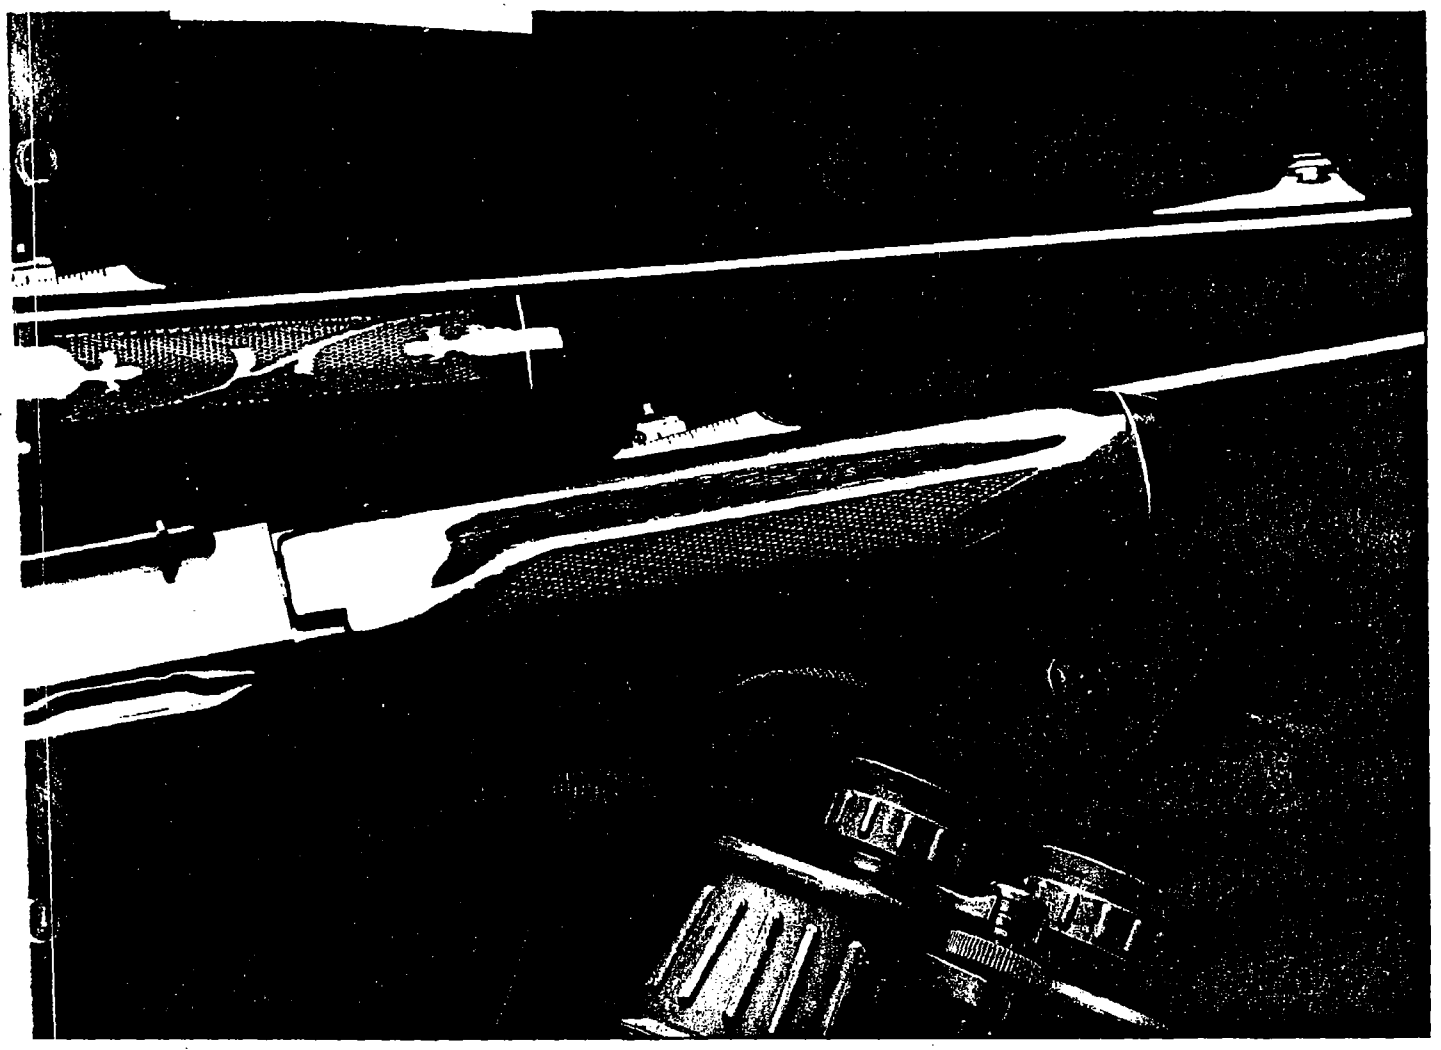


"Here the whitetail's important enough to close schools on Opening Day."

Elk County, Pennsylvania

R2525651

1986



experienced whitetail hunter ws that lightning-quick actions reactions are the name of the me. Our pump action and auto- ding centerfire rifles are designed, lanced and finished to make the st of your reflexes. That's why ngton actions have been the of successful deer hunters for rs.

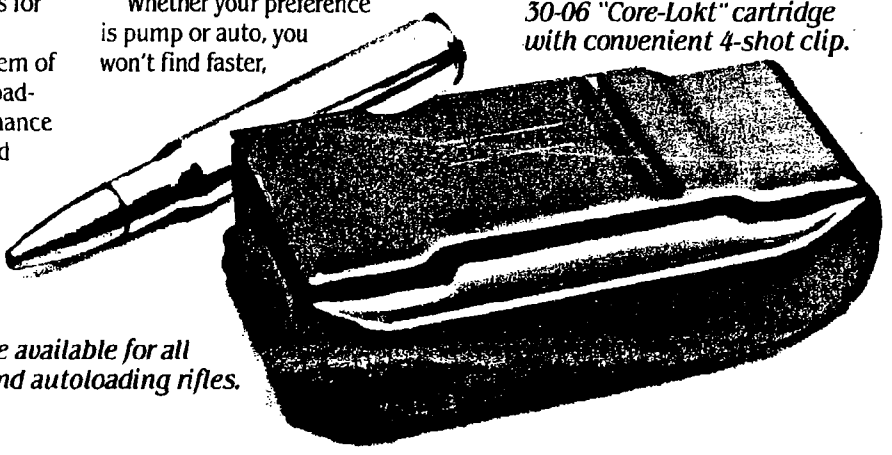
he unique gas metering system of Models Four and 7400 autoload- ifles is designed for performance eliability. Their handling and tability are without equal, ks to stock dimensions and nced weight distribution.

These autoloaders deliver up to four extra shots, with low recoil sensation to keep you in game-getting position each time.

For added strength on all guns, the bolts have locking lugs similar to those you'd expect only on bolt action rifles.

Whether your preference is pump or auto, you won't find faster, smoother or better balanced rifles. All have machined steel receivers, quality American walnut stocks and forearms, and the kind of 100% American craftsmanship that Remington gives you.

Remington's popular 30-06 "Core-Lokt" cartridge with convenient 4-shot clip.



Extra 4-shot clips are available for all Remington pump action and autoloading rifles.

R2525652

1986

Pump Action & Autoloading Rifles

If you prefer autoloading shotguns, like our well-known Model 1100, the *Models Four* and *7400* should be your choice of rifles.

Or if you prefer pump action shotguns, like our Model 870, the *Models Six* and *7600* pump action rifles should be your choice. Their double action bars keep performing at your command with far less effort than you'd ever imagine, even in the most miserable conditions.

The differences between models in each action type come down to added quality touches. The Models Four and Six are loaded with custom features: positive cut checkering on their American walnut Monte Carlo stocks, comfort of a full cheekpiece, curved pistol grip and a flared fore-arm for ideal control. An added design feature is a cartridge head imbedded just forward of the receiver, for quick identification.

A removable 4-shot magazine lets you load or unload quickly, or change your ammo fast for different game or conditions.

There are detachable sights, with flat-faced front beads. The bolt has massive locking lugs, similar to those of bolt action rifles.

The Models 7400 autoloader and 7600 pump action rifles have the same proven action as the Four and Six but cost less. They feature white-line spacers, American walnut stocks with high-gloss RK-W finish and custom checkering. There are detachable sights on all models.

With features like these, it's no wonder Remington rifles have been the choice of woods-wise and experienced deer hunters for 80 years.

New Rem™ Choke

veryone should have at least one hotgun they love to shoot. That's why e added the extra versatility of "Rem" hoke to America's already top-selling hotguns—the 1100 and 870. Now ith easy-to-change choke tubes, you an use your favorite gun even more.

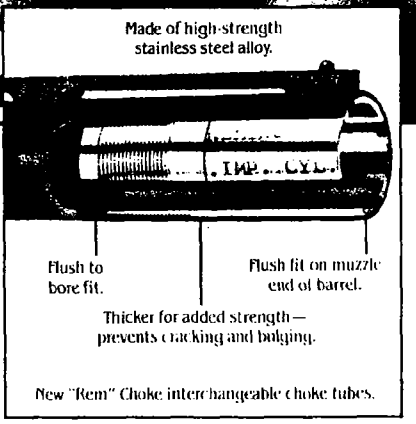
But these new interchangeable choke ubes are more than just versatile. They re superior to anything else on the mar- et from competitive manufacturers.

These American-made choke tubes re crafted from high-strength stain- ss steel, a material advantage you on't find from any other gun manu- acturer. No carbon steel or alloy actory choke tubes have the rength or corrosion sistance we offer.

"Rem" Chokes have the strength to handle steel shot without wear or deformation.

Beginning in 1986, all Models 1100 and 870 fitted with "Rem" Choke come with three choke tubes—Full, Modified and Improved Cylinder, plus a wrench to install them. The new 870 "Wingmaster" also includes a handy "Rem" Choke carrying pouch made of durable Cordura® nylon. This pouch is also available as an accessory from your Remington dealer.

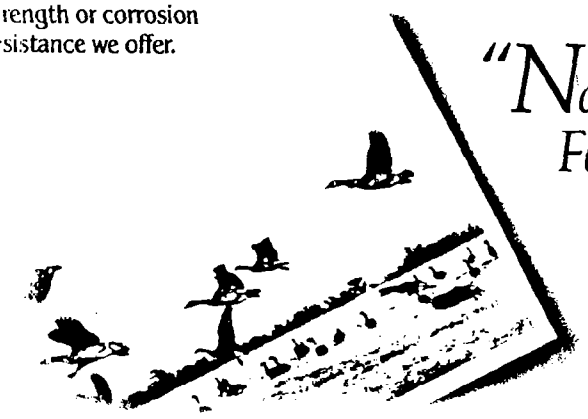
Available in these 12-gauge models for 1986: all new 870s, 1100s and "Sportsman" shotguns with 28", 26" and 21" barrels.



New "Rem" Choke interchangeable choke tubes.

"Rem" Choke will also be available in 12-gauge extra barrels for both Models 1100 and 870 in 28", 26" and 21" lengths. Not available on 30" barrels, deer guns, target guns or any gauge other than 12.

Note: "Rem" Choke is not available as a retrofit to existing barrels.



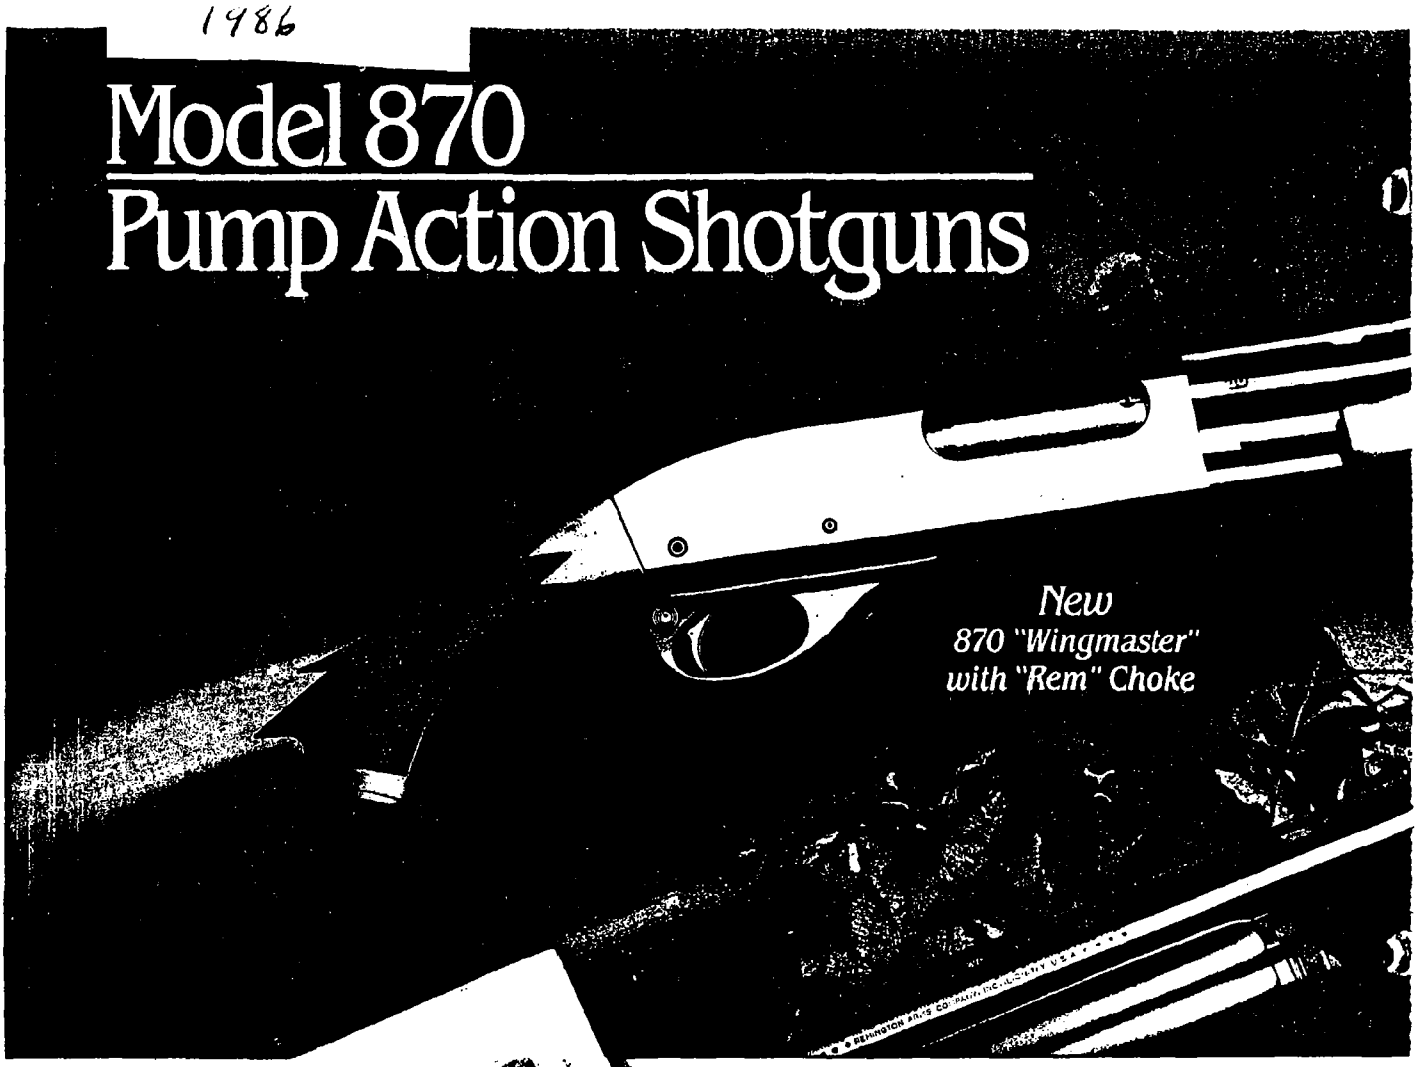
"Nothing's too predictable out here. For days, the geese are decoying. Then suddenly there's not a one that isn't a long pass."

Cairo, Illinois

R2525654

1986

Model 870
Pump Action Shotguns

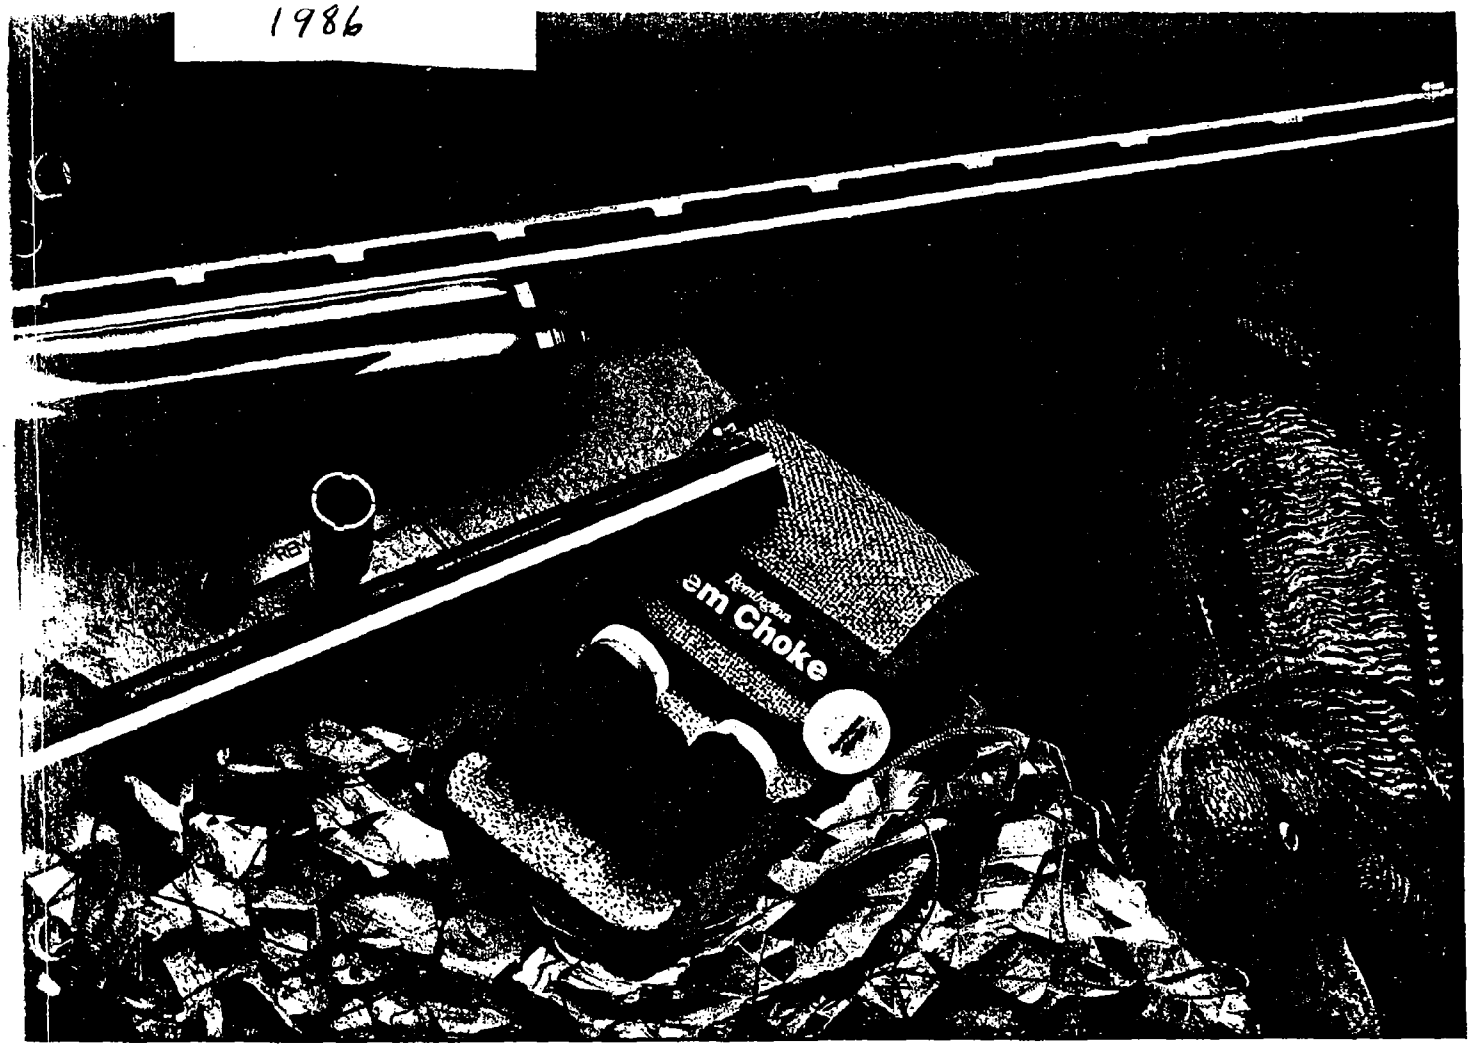


"It's a tradition for us here on the Eastern Shor. We talk about it all year round...complain of fog, rain and bad luck. Then one foggy, rainy morning, it's here and we're out there in the blind. And we wouldn't trade it for anything."

Easton, Maryland

R2525655

1986



Introduced in 1950, the Model 870 has become the most popular pump action shotgun ever produced. It has been praised by outdoor writers and, more importantly, recommended by almost every owner. No small feat when you consider there are more than four million 870s.

Dependable, rugged and a proven value, the 870 is also known as the most versatile gun around. And now, with the availability of new "Rem" Choke, even more so.

These screw-in choke tubes, in 12 gauge only, are stronger than others and made of high-strength stainless steel. A handy carrying pouch made of durable Du Pont "Cordura" nylon comes with the new 870 "Wingmaster," and is available as accessory from your Remington dealer.

We've further upgraded the 870 12-gauge "Wingmaster" for 1986. This new restyled 870 "Wingmaster" pump has cut checkering on its satin finished American walnut stock and fore-end for confident handling, even in wet weather. We've also added an ivory bead "Bradley" type front sight. It's available with 26" or 28" barrel with "Rem" Choke for quick handling and versatility, or 30" full choke for a longer sighting plane and smoother swing. Like all 870s (except 28 gauge), it handles 3" and 2¾" shells interchangeably.

As recently written in *Guns and Ammo*, "Suitable for any hunting or target shooting, the Remington 12-gauge 870 is truly versatile. Combine this shotgun's extreme durability and unique ruggedness with extra accessory barrels and it becomes top candidate for the title of 'the world's most versatile firearm.'"

And now, you have more choices than ever. Choose from extra barrels in a wide variety of lengths, styles and chokes that fit virtually any Model 870.

(See the specifications on the following pages.)

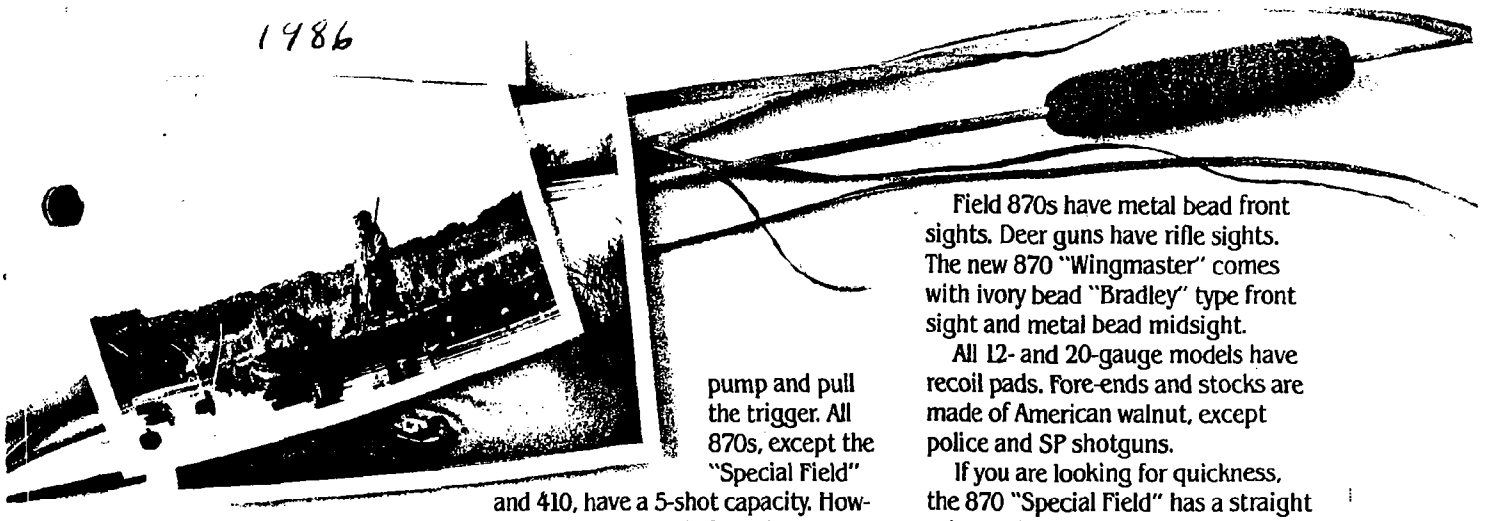
Model 870 20-gauge Youth Gun

Model 870 12-gauge deer barrel

R2525657

1986



Every Model 870 has a receiver machined from a solid block of ordnance-grade steel. Its action parts are "vibra-honed" for smooth operation. And double action bars positively eliminate binding or twisting. So you get extra shots off as fast as you can pump and pull the trigger. All 870s, except the "Special Field" and 410, have a 5-shot capacity. However, a 3-shot plug is furnished. A positive cross-bolt safety is close to the trigger and works even with gloves.

"Rem" Choke comes on all 12-gauge 870s, except 30" barrels, deer guns, target guns or as a retrofit. It is available on 28", 26" and 21" extra barrels.

Field 870s have metal bead front sights. Deer guns have rifle sights. The new 870 "Wingmaster" comes with ivory bead "Bradley" type front sight and metal bead midsight.

All 12- and 20-gauge models have recoil pads. Fore-ends and stocks are made of American walnut, except police and SP shotguns.

If you are looking for quickness, the 870 "Special Field" has a straight grip stock, a shortened and slimmer fore-end and magazine, cut checkered stock and fore-end, as well as a 21-inch barrel, 4-shot capacity total.

See charts for specifications (870 "Special Purpose" waterfowl, turkey and deer guns are on page 21).

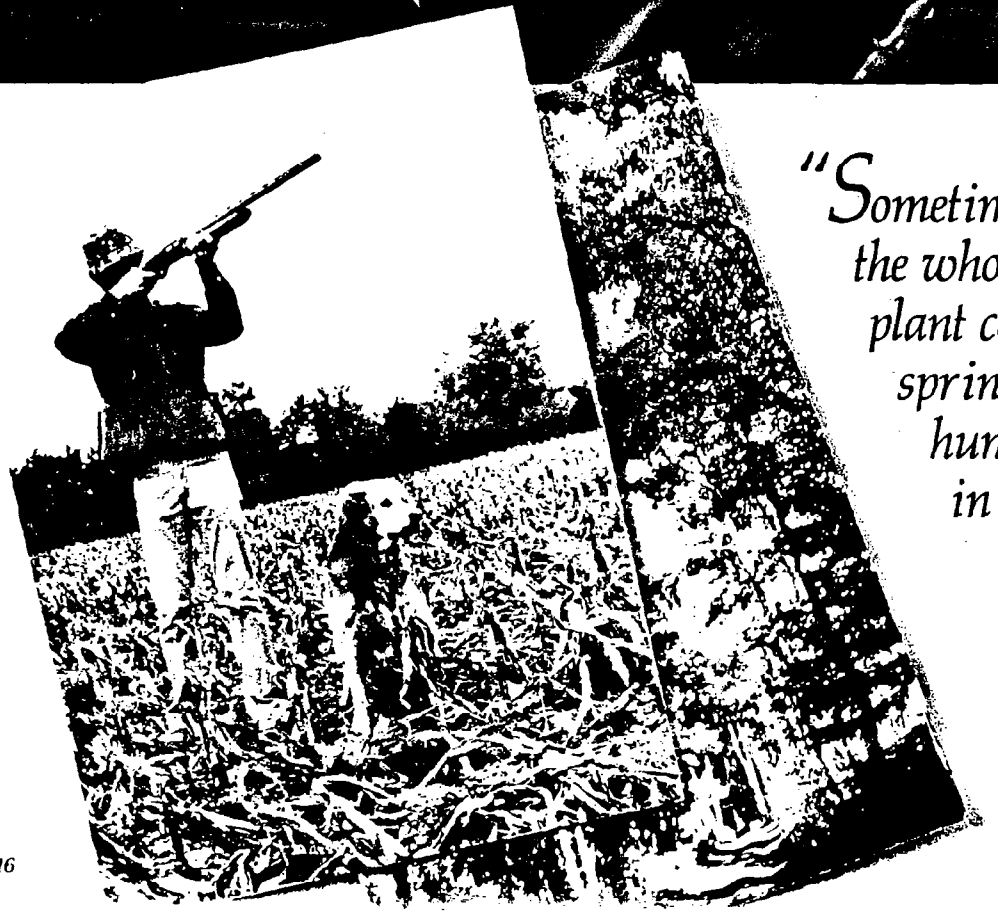
R2525658

1986

Model 1100 Autoloading Shotguns

Model 1100 12 gauge

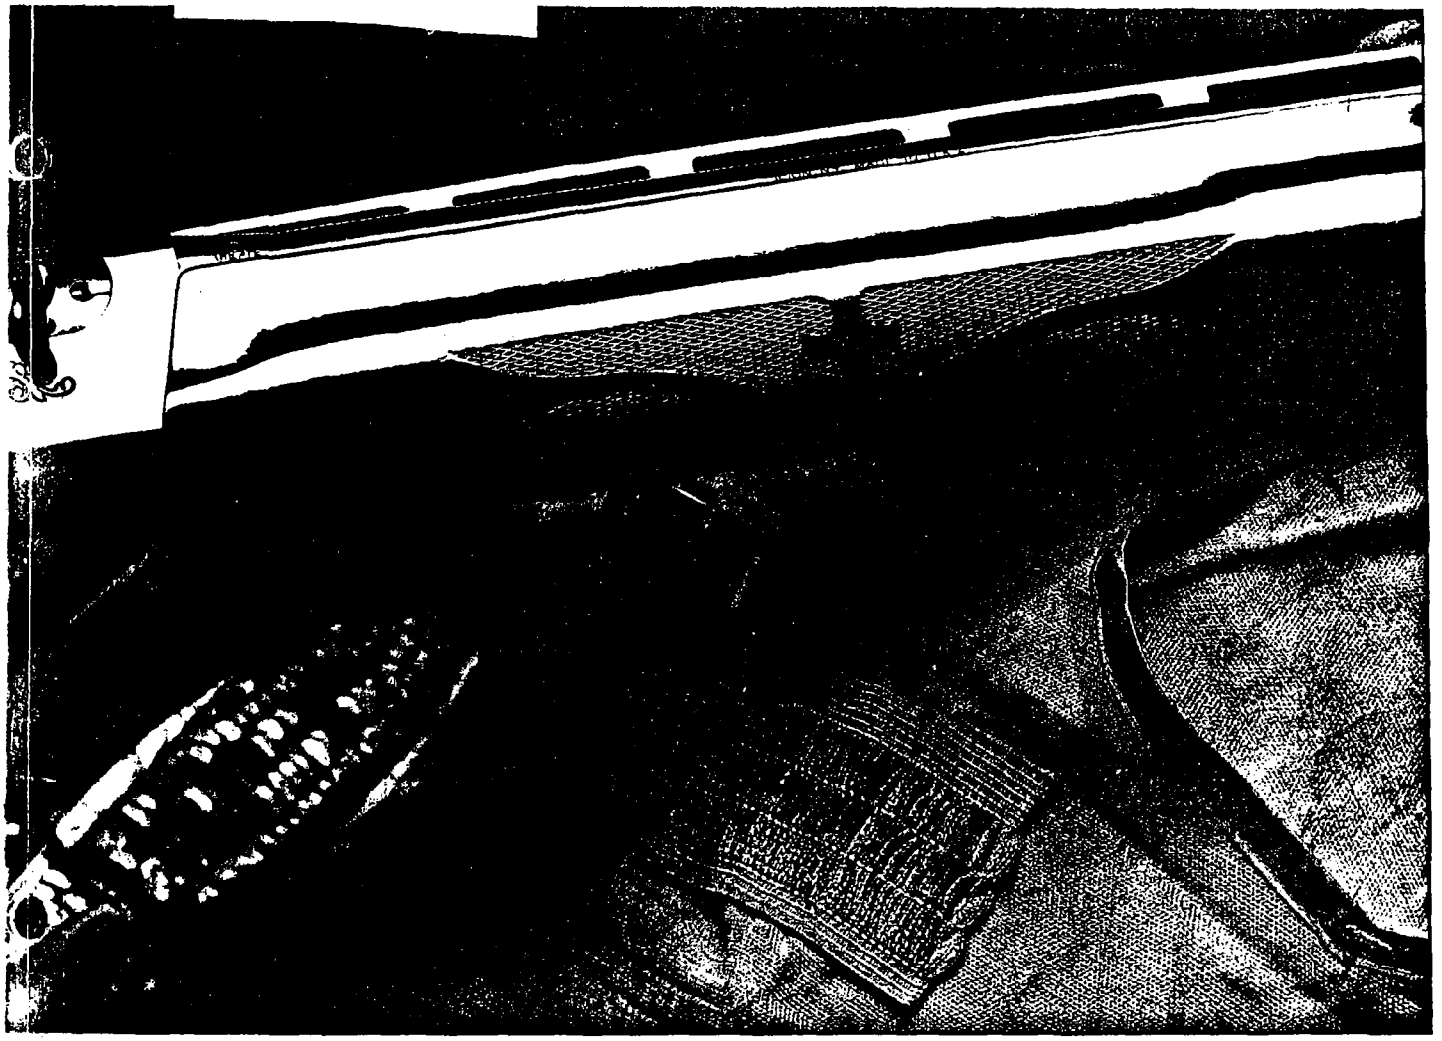


"Sometimes I think the whole reason we plant corn in the spring is so we can hunt pheasants in the fall."

Mount Pleasant, Iowa

R2525659

1486



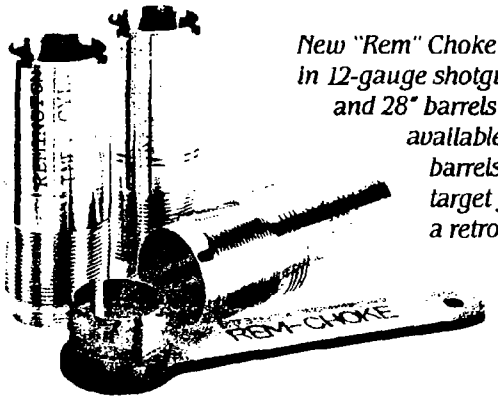
"Anyone who can shoot well, will probably shoot better with an 1100." So said Jim Carmichel of *Outdoor Life* after the 1100 came to the market. The reasons are well known today: soft recoil, reliability, pointability, handling...now proven by over 3 million shooters across the land.

Like all Remington shotguns, every 1100 receiver starts with a solid block of ordnance-grade steel for total strength. The 1100's unique gas metering system significantly reduces recoil, so that you stay on target shot after shot.

All action parts are polished by our patented "vibra-honing" process for smooth, natural performance. The stocks and fore-ends are shaped from American walnut, with durable RK-W finish, and deep, lustrous blueing on the finished metal. (Except "Special Purpose" 1100s. See page 21.)

The 1100 is still the only autoloader made, in popular specifications, for both left- and right-handed shooters.

The Model 1100 comes in any of four gauges and seven styles, plus a host of interchangeable barrels. And now 12-gauge 1100s are available with new "Rem" Choke interchangeable choke tubes. You won't find a better balanced, easier handling or more versatile choice. (See the next page for specific model information.)



New "Rem" Choke is available in 12-gauge shotguns, 21", 26" and 28" barrels only. Not available on 30" barrels, deer guns, target guns or as a retrofit.

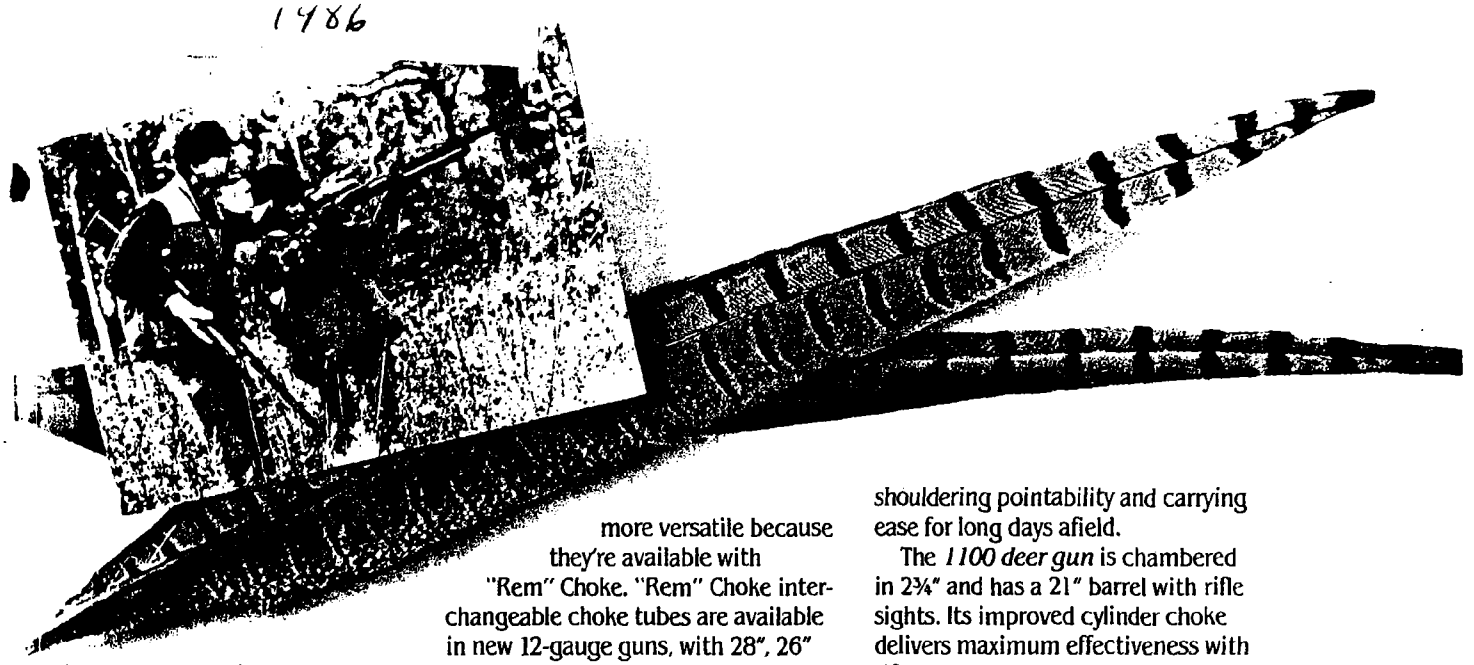
R2525661

1986



The *Field Grade* 1100 is the proven standard for general hunting, while the *1100 Magnum* has always been the most versatile with waterfowlers. Both come with a positive cross-bolt safety and metal bead front sights.

And now both styles are even more versatile because they're available with "Rem" Choke. "Rem" Choke interchangeable choke tubes are available in new 12-gauge guns, with 28", 26" or 21" barrels only. Not available on 30" barrels, deer guns, target guns, or as a retrofit to existing 1100 barrels.

The *1100 "Special Field"* combines a shorter overall length of 41" with lighter weight and an English style straight line stock. The result is quick shouldering pointability and carrying ease for long days afield.

The *1100 deer gun* is chambered in 2¾" and has a 21" barrel with rifle sights. Its improved cylinder choke delivers maximum effectiveness with rifled slugs and buckshot loads.

Youths and smaller-framed adults will like the *LT-20 "Youth Gun."* It has the same great action and soft recoil, with a shorter stock and barrel to reduce size and weight, but in no way limiting its performance.

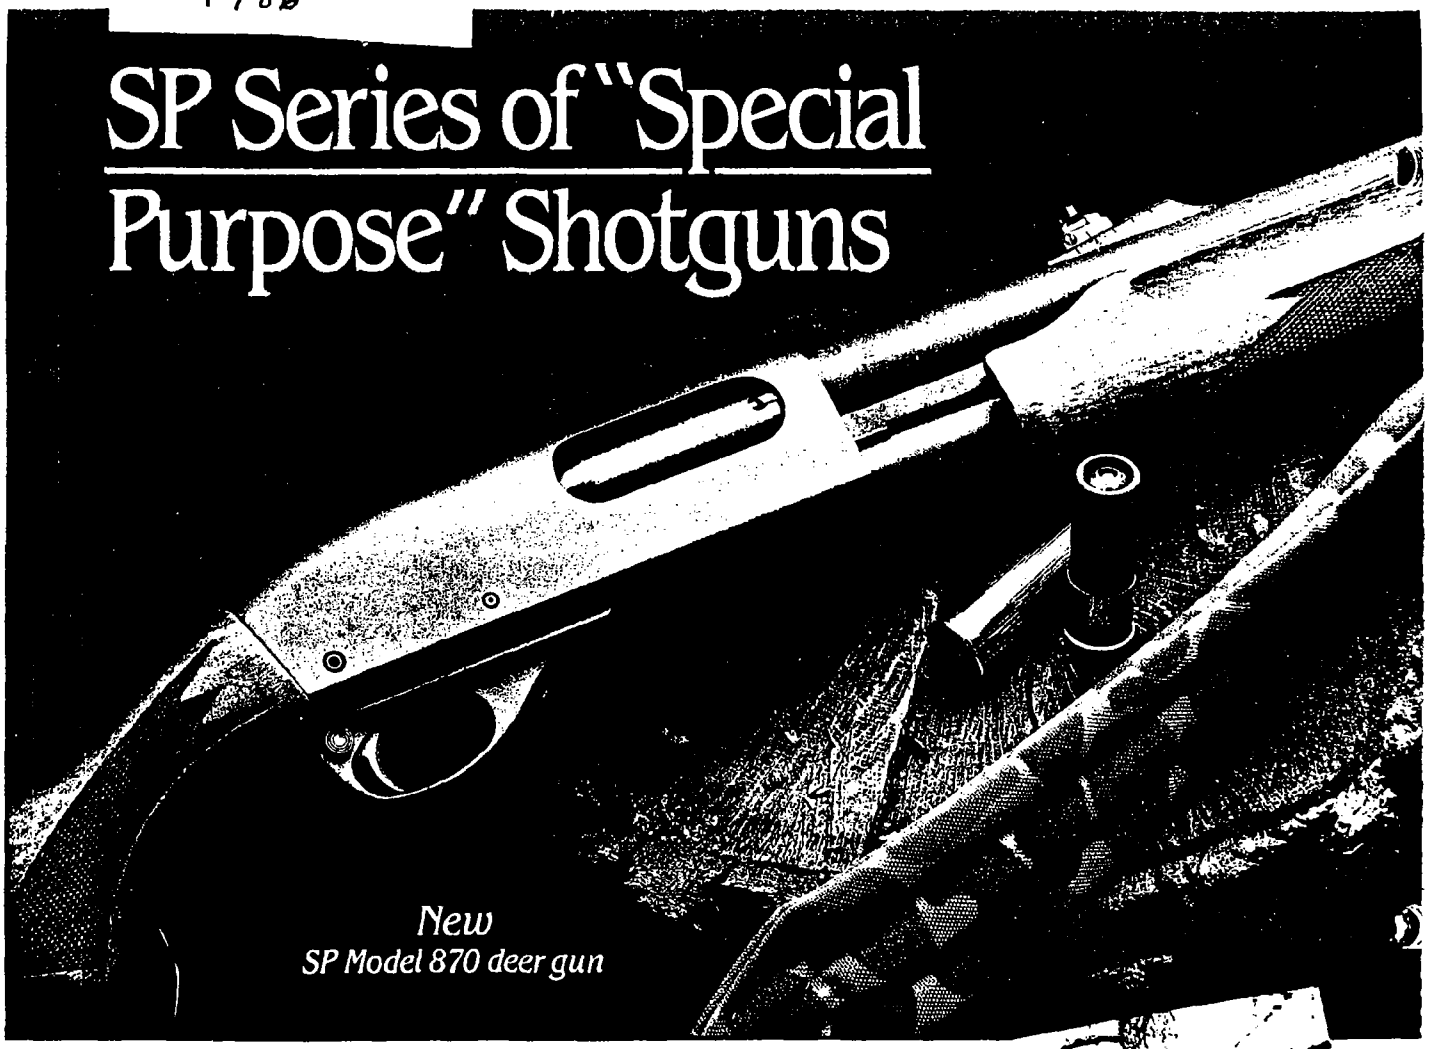
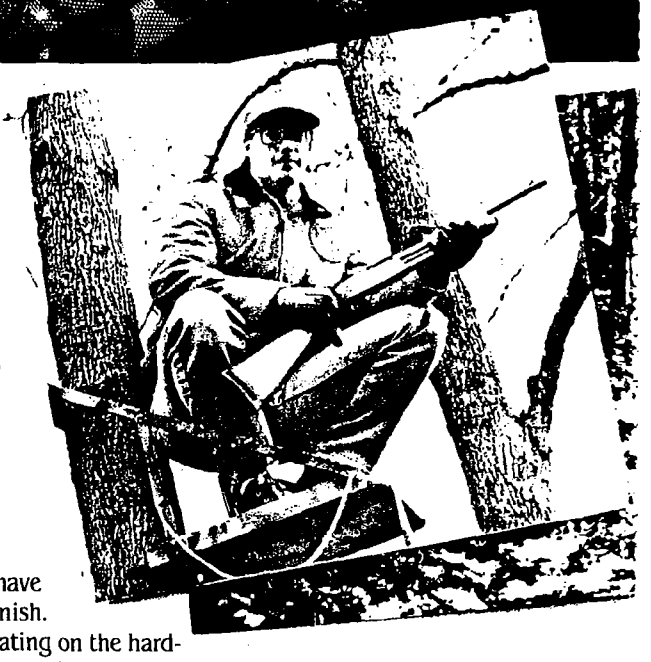
SP Series of "Special Purpose" Shotguns



New
SP Model 870 deer gun

"Here you need a gun that can take all the weather a North Woods winter can dish out. And still take an 8-pointer."

Escanaba, Michigan



Last year we introduced the non-glare 1100 and 870 SP Magnums for serious waterfowl and turkey hunters. This year, we're doing the same for deer hunters. These guns have ramp front sights and adjustable rear sights.

The barrels and receivers on these new SP deer guns have been shot-blasted and protected with a nonreflective Parkerized finish. Bolts and carrier assemblies have a dull black oxide finish.

A subdued oil coating on the hardwood stocks and fore-ends resists reflecting sunlight. It also penetrates the wood, protecting it from moisture.

All "Special Purpose" guns come with recoil pads and a padded sling of durable Du Pont "Cordura" nylon. They are detachable, but we think you'll find a shotgun sling can be very useful company, especially during a long day's hunt.

MODEL 1100

Gauge	Barrel Length and Choke	Overall Length	Avg. Wt. (lbs.)	Order Numbers Vent Rib Barrel 2¾" Chambers	3" Chambers*
12	30" Full ("Special Purpose")	50"	7⅞	—	5349
	26" "Rem" Choke ("Special Purpose")	46"	7⅞	—	5342★
	21" Imp. Cyl. ("Special Purpose") Deer Gun w/rifle sights, recoil pad	41"	7⅞	5280★	—

MODEL 870

Gauge	Barrel Length and Choke	Overall Length	Avg. Wt. (lbs.)	Order Numbers Vent Rib Barrel 3" Chambers*
12	30" Full ("Special Purpose")	50½"	7¼	6984
	26" "Rem" Choke ("Special Purpose")	46½"	7¼	4862★
	20" Imp. Cyl. ("Special Purpose") Deer Gun w/rifle sights, recoil pad	40½"	7	4864★

* All 3" chambers handle 2¾" shells. However, 2¾" chambers **will not** handle 3" shells.

★ New for 1986.

The *Model 870 SP Deer Gun* has a [illegible]" barrel and 3" chamber, for use with 12-gauge slugs and buckshot.

The *Model 1100 SP Deer Gun* has a 21" barrel and 2¾" chamber.

All *SP Magnum* turkey and waterfowl guns are 12 gauge, with vent ribs and 3" chambers. Choose a 30" full choke for longer sighting plane and smoother swings. Or a 26" barrel with new "Rem" Choke, for quick handling and versatility. The 30" barrel SP Magnum's bores are chrome lined for corrosion and wear resistance. They will handle steel shot with ease, season after season, without wear or deformation.

Whether you're heading for the woods or the field, your SP Magnum Model 1100 or 870 will not only help keep you invisible to the wariest of eyes, but we bet it'll prove to be one of the most practical and frequently used working guns you're ever likely to own.

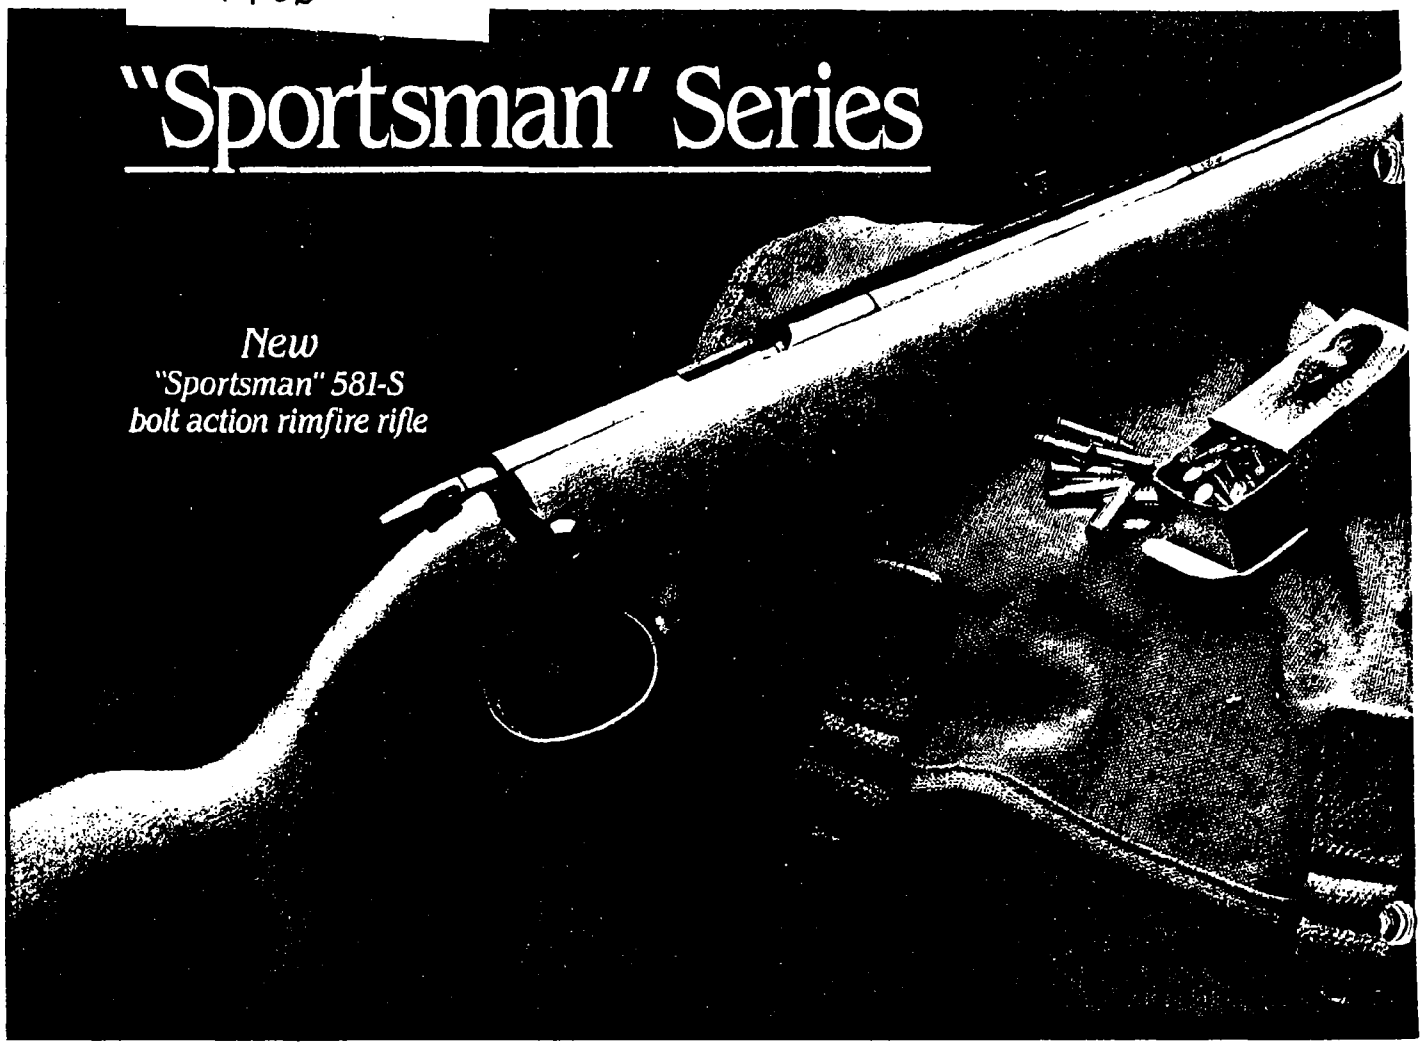
"Sportsman" Series



New
"Sportsman" 581-S
bolt action rimfire rifle

"On Saturday afternoons, my dad and I would go out behind the barn and plink tin cans with my first 22. I still have that old gun."

Sodus Point, New York

If you've ever thought of buying a lesser-quality gun because it's cheaper, think again. Because now, you don't have to settle for anything less than a Remington.

The difference between our "Sportsman" Series and our higher-grade Remington guns is only in the degree of finish and details. The reliable Remington fit, feel, pointability and quality are all there. As with all Remington shotguns and centerfire rifles, receivers are machined from a solid block of ordnance-grade steel. American hardwood stocks have a durable satin finish, and all rifles are fitted with a blade front sight and adjustable rear sights.

For 1986, the "Sportsman" Series has something new for both riflemen and shotgunners alike.

First, we brought back our *Model 581 rimfire* bolt action rifle. This

for 1986.

hly accurate 22, with a strong, ...ion action, will be welcomed by ...ers of all ages.

...t we added the short action 223 to the list of calibers available on our "Sportsman" 78 bolt action rifle. It has the same action as our legendary Model 700s. Of course, 270, 30-06, 243 and 308 are also available.

For shotgunners, we have the new "Rem" Choke. So whether you like pumps or autos, you now have even more choice: both the "Sportsman" 12-gauge pump and 12-gauge auto can be ordered with three interchangeable choke tubes in a 28" vent rib barrel, or a 30" full-choke barrel without choke tubes. The "Sportsman" pump action has a 3" chamber; the autoloader, a 2¾" chamber.

The same Remington pump and auto shootability of our Model 7600 and 7400 is built into our "Sportsman" 76 and 74 rifles. Both are chambered for the versatile 30-06 cartridge, and give you great balance, surefire accuracy and fast extra shot performance to help you rack up more points.

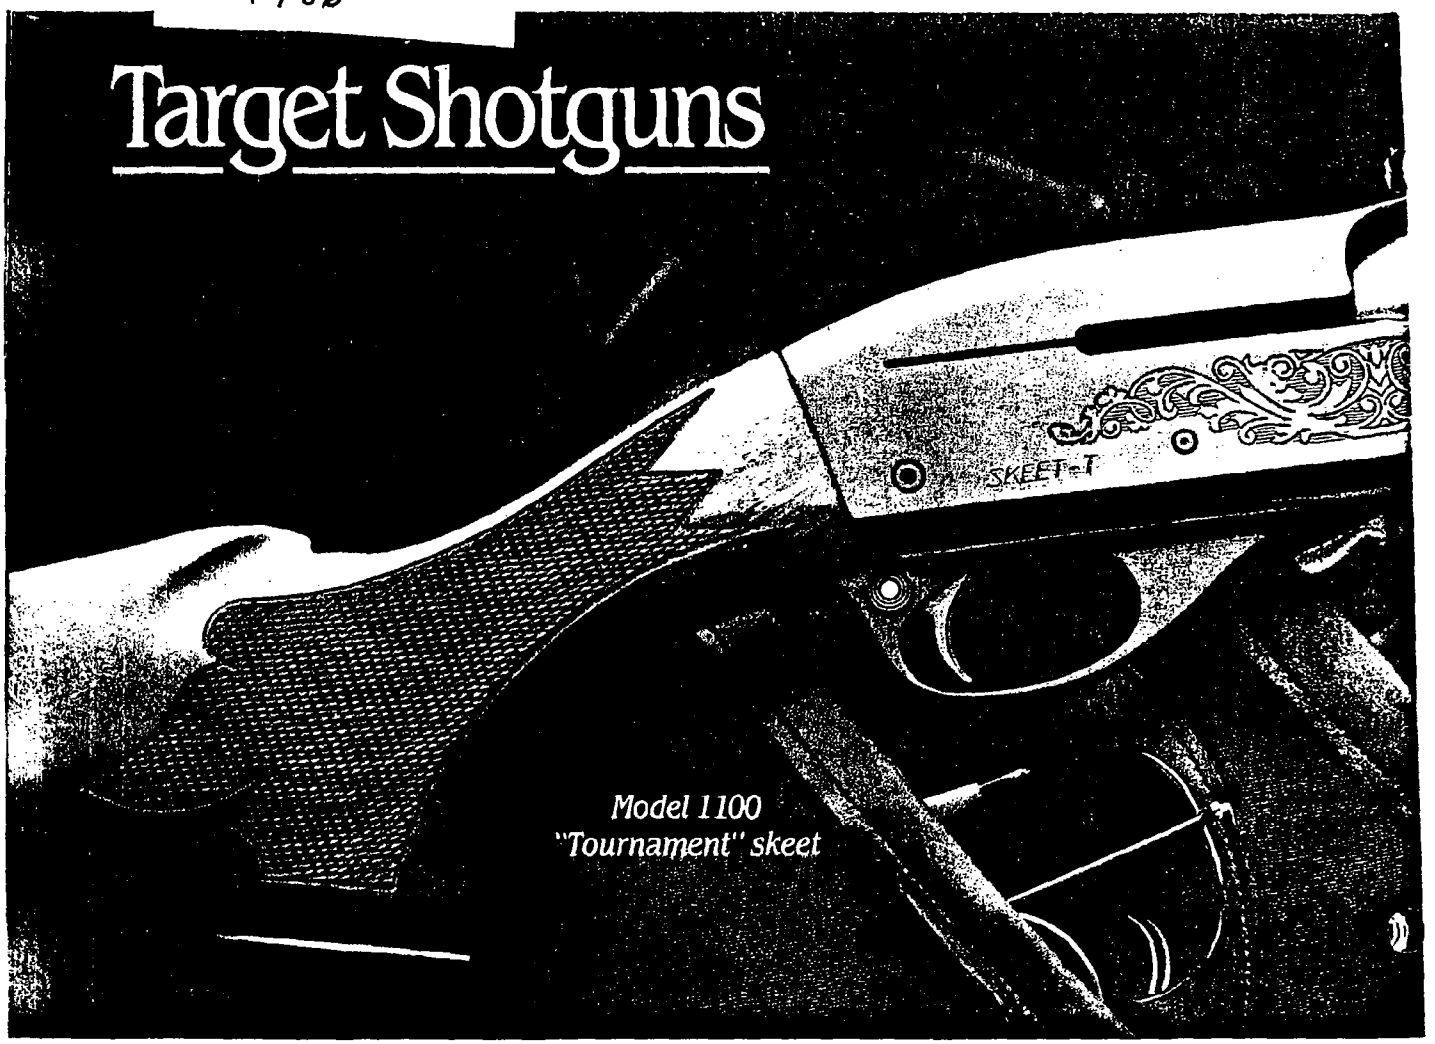
Target Shotguns



Model 1100
"Tournament" skeet

With the great pointability and low recoil of all Model 1100s, our *"Tournament"* grade comes with positive cut checkering in fine American walnut. Optional weight-equalizer kits give your 20, 28 and 410 the balance of your 12-gauge 1100 skeet gun.

For trap, the 870 *"Competition"* combines single barrel pointability and 870 dependability. This single-shot gun reduces recoil with its unique gas-assisted system.

Traps and Targets.

We offer everything from automatic traps for skeet and trap competition to less expensive mechanical, hand-loaded traps. The Model 4100-T Trap and 4100-S Skeet automatic traps are fully adjustable, autoloading and electrically operated systems. Our spring-loaded "Blue Rock" 78 trap is also a winner. And load up with our famous "Blue Rock" targets.

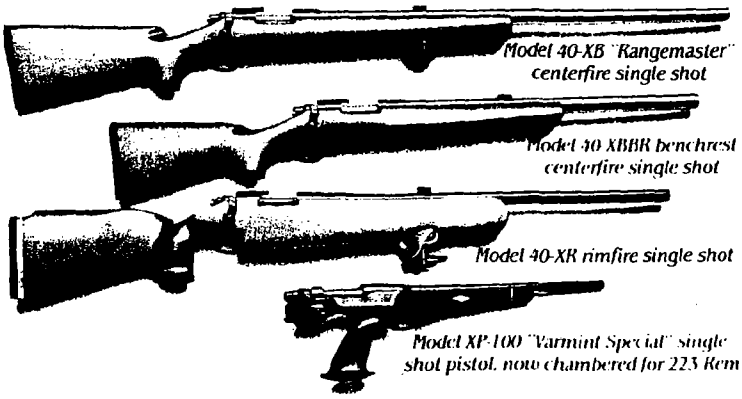
Target Gu

The Model 40-XC "Match Course" centerfire repeater



Model 40-XB "Rangemaster" centerfire single shot

Model 40 XBBR benchrest centerfire single shot

Model 40-XR rimfire single shot

Model XP-100 "Varmint Special" single shot pistol, now chambered for 223 Rem

Remington offers the benchrest and position shooter a range of custom specialty rifles. Our 40-XB and 40-XBBR centerfires come with stainless steel barrels in calibers from 222 Rem to 300 Win Mag. Available in single shot or repeater, the 40-XB features a free floating barrel, a high comb that is grooved for easy bolt removal and a hand-bedded action. Both the 40-XB and 40-XBBR single shot have a wide match-type externally adjustable trigger that changes weight of pull and eliminates creep and overtravel.

Benchrest shooters especially like the 40-XBBR's design because it meets the 10½-lb. Varmint and Sporter class limit.

Our 40-XR rimfire single shot and 40-XC match course centerfire repeaters have improved position stocks for that extra competitive edge.

In June 1986, our "XP-100" Long Range Pistol will be available in 223 Rem. With its proven bolt action and 14½" barrel, it is ideal for handgun varmint hunting.

The "XP-100" is also available with a 14½" barrel chambered for the 7 mm BR (Benchrest) Remington, an ideal silhouette caliber. These "XP-100s" feature a "Zytel" nylon stock with universal grip, two-position thumb safety switch, match-type grooved trigger and drilled and tapped receiver.

Ask your Remington Pro Line™ dealer for specifics on all target-grade and custom-grade guns. Call 1-800-THE-GUNS for your nearest dealer.

Extra 5-shot or 10-shot clip available at extra cost on all clip-fed 22s, from your Remington dealer. ★New for 1986.

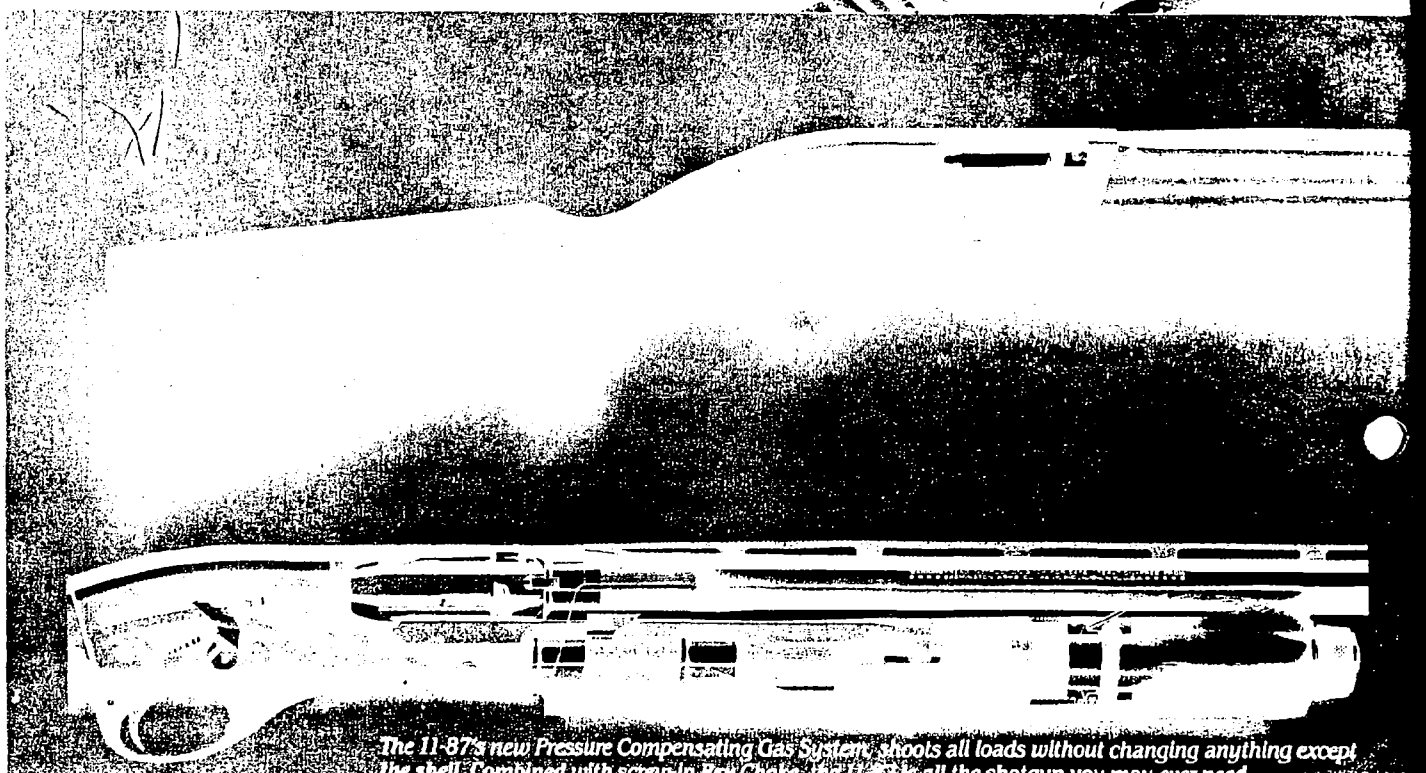
Perhaps our most noted rimfire rifle is the "Nylon 66." It's been used and abused from Alaska to Africa, yet has an uncanny ability to survive. Precision molded from Du Pont "Zytel," the "Nylon 66" has the world's only lifetime stock guarantee. We'll replace the stock, free, if it ever warps, cracks, chips, fades or peels.

It's just one more way we prove that our 22 rifles are made to Remington standards.

R2525670

1987

1987



The 11-87's new Pressure Compensating Gas System shoots all loads without changing anything except the shell. Combined with screw-in Rem Choke, the 11-87 is all the shotgun you may ever need.

[illegible] 11-87 [illegible]
[illegible] Pressure Compensating Gas System which [illegible]
[illegible] changeable [illegible] magnums to light 2¾" loads. And [illegible] soft recoil that you'd think you were shooting a smaller gauge gun.

[illegible] Incredibly, this gas system is also completely sealed against fouling. No matter how many rounds you shoot, the compensating spring never has to be removed for maintenance. Never. That's something you just can't find on any other autoloading shotgun.

But it's only one of many features that adds to the 11-87's proven durability—shown in lab tests to be *double* that of the most popular autoloader currently on the market.

Its piston and piston seal are heat-treated for added toughness. The [illegible] extractor also adds a measure of improved dependability.

Stainless steel magazine tube resists rust and is easy to clean.

A patented detent system makes it a cinch to add or remove magazine plugs.

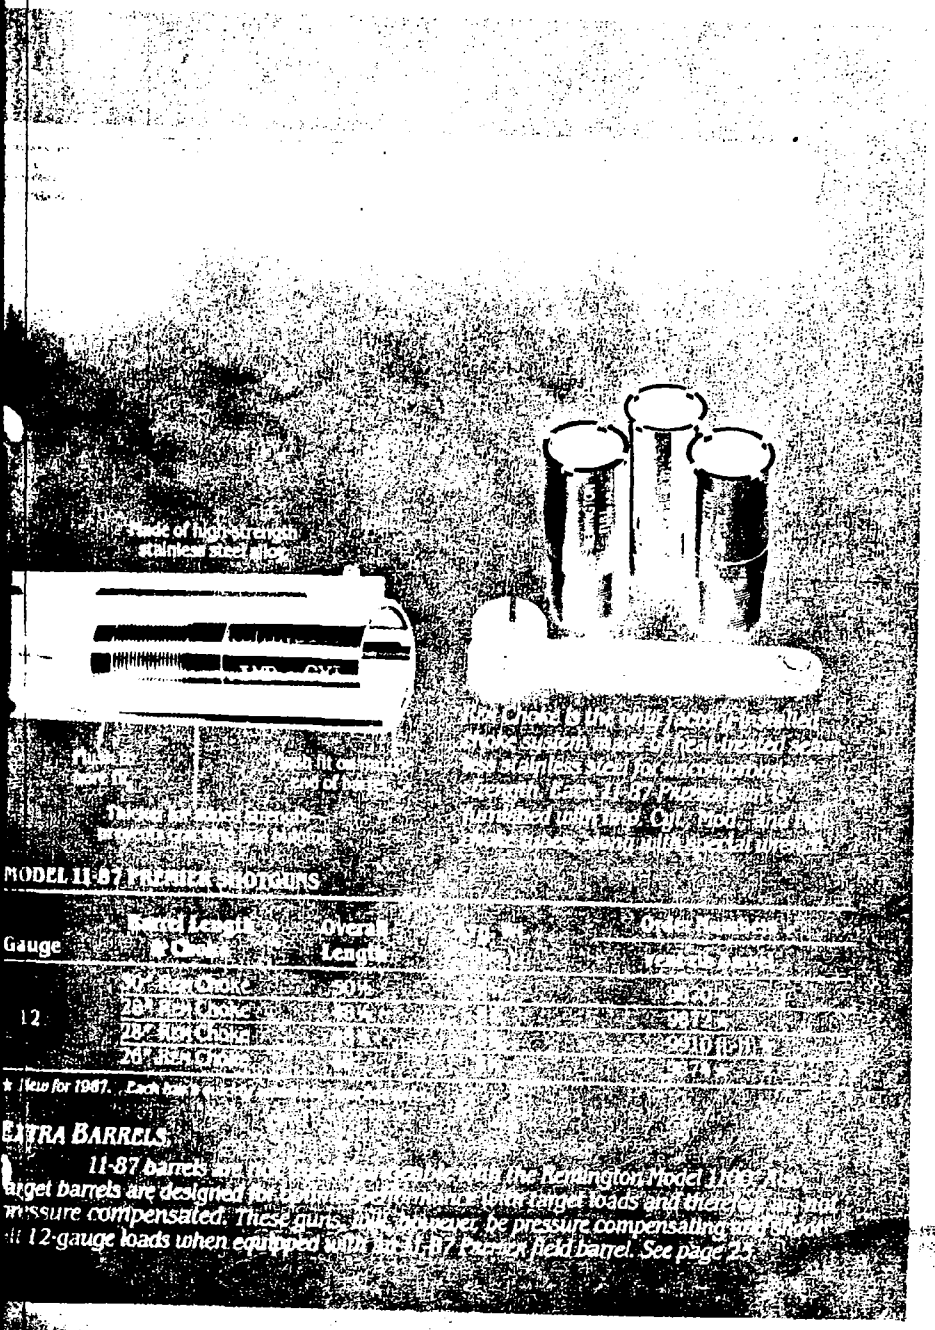
But as one look at this gun should tell you, it's beauty is more than purely functional. The 11-87 retains the sleekness of line and pointability that Remington first brought to autoloading shotguns two decades ago. It features cut checkering and satin finish on its American Walnut stock, a clean, richly polished receiver and classic styling not usually found on true working guns.

Add it all up, and you've got the most versatile, dependable, *shootable, affordable* autoloading shotgun made. Which not only makes the new 11-87 PREMIER the perfect choice for your next shotgun. In fact, the *only* choice.

R2525672

1987

NEW 11-87 AUTOLOADING SHOTGUNS.



Once in a great while, a gun comes along that's so perfectly conceived, it forever changes the way hunters think about an entire category.

The new Remington Model 11-87 PREMIER™ with REM™ Choke is such a gun. Simply put, it's the finest, most versatile 12-gauge autoloading shotgun ever made.

By us. Or anybody else.

It offers the dependability of a pump *and* the easy shootability of an autoloader.

The magnum power of a waterfowl gun *and* the light handling of an upland gun.

It looks like the gun of your dreams and it is a gun you can afford.

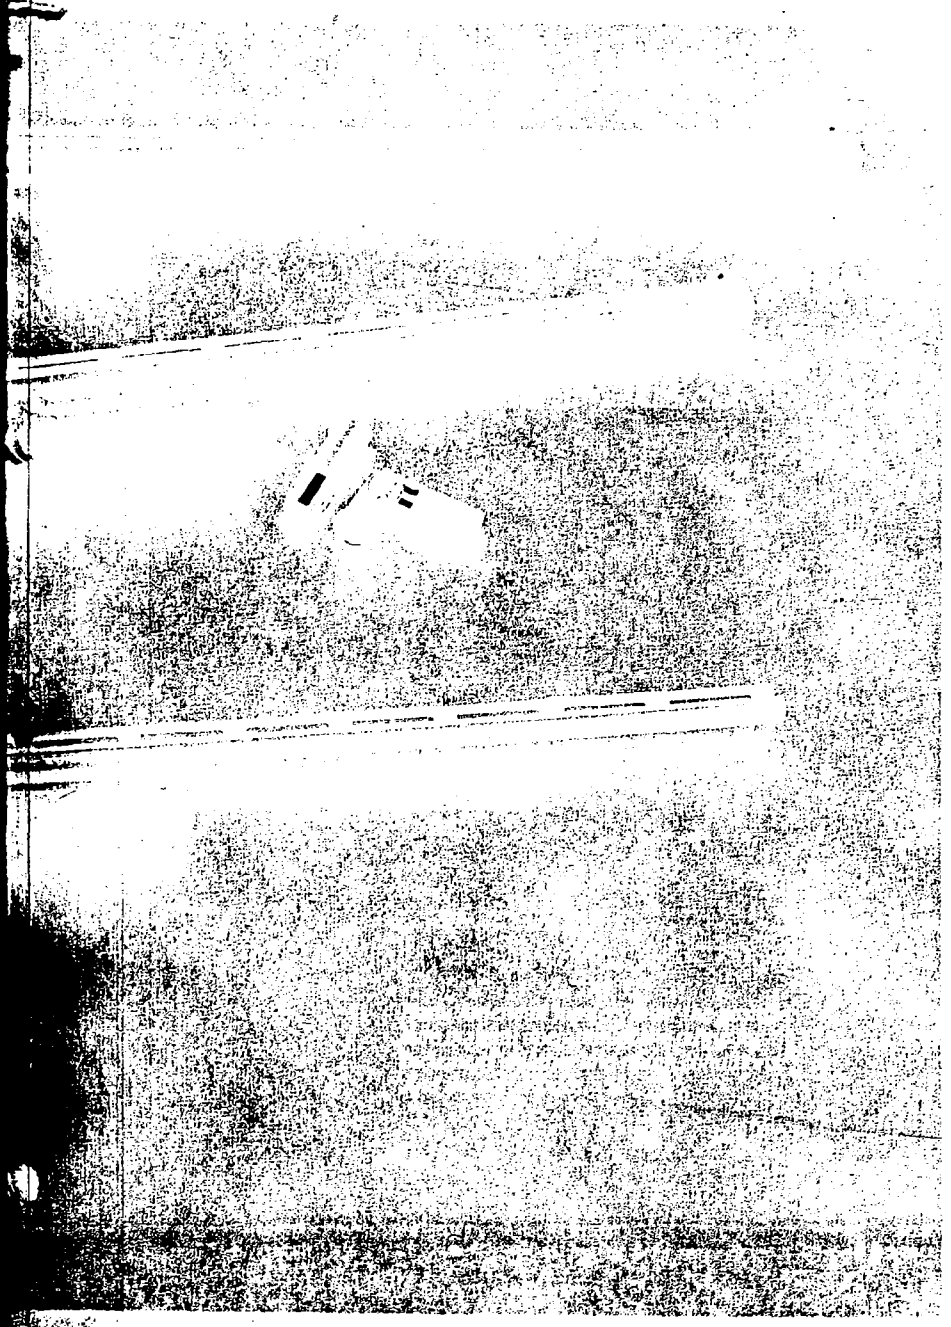
So head to your local Remington dealer. You'll see why the new 11-87 PREMIER is the perfect choice for your next shotgun.

R2525673

R2525674

1987

870 PUMP ACTION SHOTGUNS.



The Remington 870 is more than America's most popular pump action shotgun. With sales well over 4 million, it's the world's most popular shotgun. Period.

With that kind of record, it's easy to let well enough alone.

But "well enough" is not what's made Remington the industry leader for over 170 years.

Rather, it's our constant commitment to the quality of the hunting experience itself, and to its ever-changing needs.

That's why our 12- and 20-gauge 870s now have the strongest interchangeable choke system available in a production gun. In fact, REM™ Chokes are the only original manufacturer's choke tubes crafted from heat-treated, seamless stainless steel. So they won't be damaged when shooting steel shot.

It's also why all 12- and 20-gauge Model 870s are now chambered for 3" magnums and can handle 2¾" loads interchangeably. Which, combined with REM Choke, makes today's 870 the "top candidate for the title of the world's most *versatile* shotgun," according to *Guns & Ammo*.

So, if you're still shooting a dependable old 870 shotgun, enjoy it. But if you're thinking about a new gun, the complete line of 1987 870s offers plenty of good reasons to buy.

The truth is, even old favorites can be improved upon.

(870s continued on next page.)

R2525675

870s.

1987

Choose your Model 870 WINGMASTER® pump action shotgun with confidence. Because the 870's reputation for durability, and dependability, means one of your grandchildren will likely be shooting that same gun someday. (And hitting what they shoot at, too.)

The receivers and barrels start from solid billets of ordnance grade steel for unmatched strength. The action parts are polished by our "vibra-honing" process for smooth, sure operation and richer blueing base.

Stocks and fore-ends are crafted from American Walnut, with DuPont high-gloss or satin finish for super protection.

And, the positive cross bolt safety is quickly accessible.

MODEL 870 WINGMASTER.

America's favorite pump shotgun has crisp cut checkering, satin finish, and classic lines. An ivory bead front sight and metal mid-bead are like those usually found on target guns. It comes equipped with Full, Mod., and Imp. Cyl. REM™ Chokes. And, like all 12-gauge 870s, the WINGMASTER handles 3" and 2¾" shells interchangeably.

MODEL 870 SPECIAL FIELD.™

Compact dimensions, English-style straight stock and lighter weight make this gun a natural for fast, upland shooting. Its straight pistol grip, innovative 21" barrel, and slimmed fore-end and magazine are designed for instinctive shouldering and fast swinging.

Both 12- and 20-gauge models come with REM Choke screw-in choke tubes.

Cut checkering and satin finish make the SPECIAL FIELD as eminently presentable as it is shootable.

MODEL 870 WINGMASTER DEER GUN.

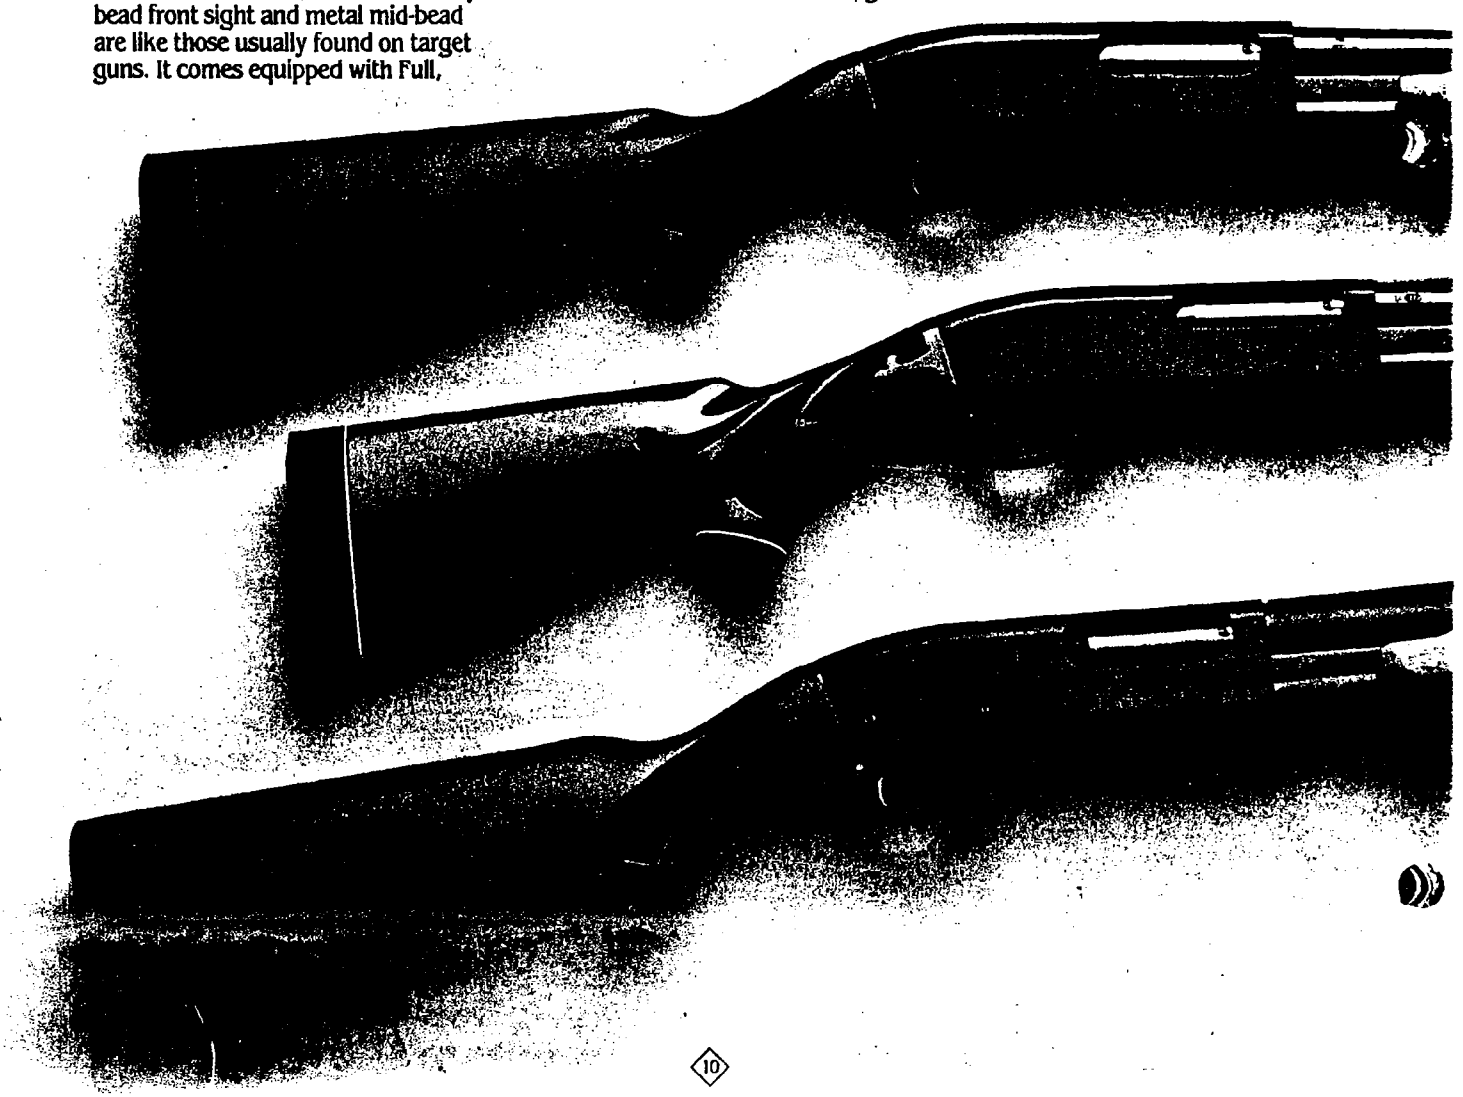
20" plain barrels with rifle sights and Imp. Cyl. Choke make this WINGMASTER a woodsmaster. The satin finished stock has cut checkering.

MODEL 870 YOUTH GUN.

Shortened 12½" stock with recoil pad, and 21" barrel offer the smaller framed shooter full-sized performance. In 20-gauge only with REM Choke.

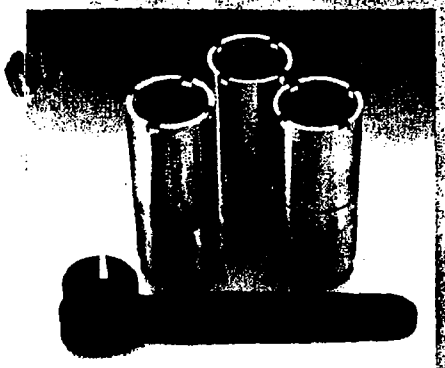
MODEL 870 EXPRESS.™

This economy priced pump action is the best entry level shotgun ever to hit the market. It has the same twin action bars and overall handling as our top-of-the-line WINGMASTER. Available in 3" chamber and 28" vent rib barrel only, the EXPRESS has a hardwood stock with low lustre finish, solid butt pad, and it comes equipped with a Modified (only) screw-in REM Choke tube and wrench. Other chokes may be purchased from your Remington dealer.



R2525676

MODEL 1987



All of our Model 870s except for the EXPRESS, Deer, and Target guns are equipped with Improved Cylinder, Modified, and Full REM Choke tubes, along with a special wrench. When in the gun, these tubes are flush-fitting so there's nothing to offset your gun's clean lines.

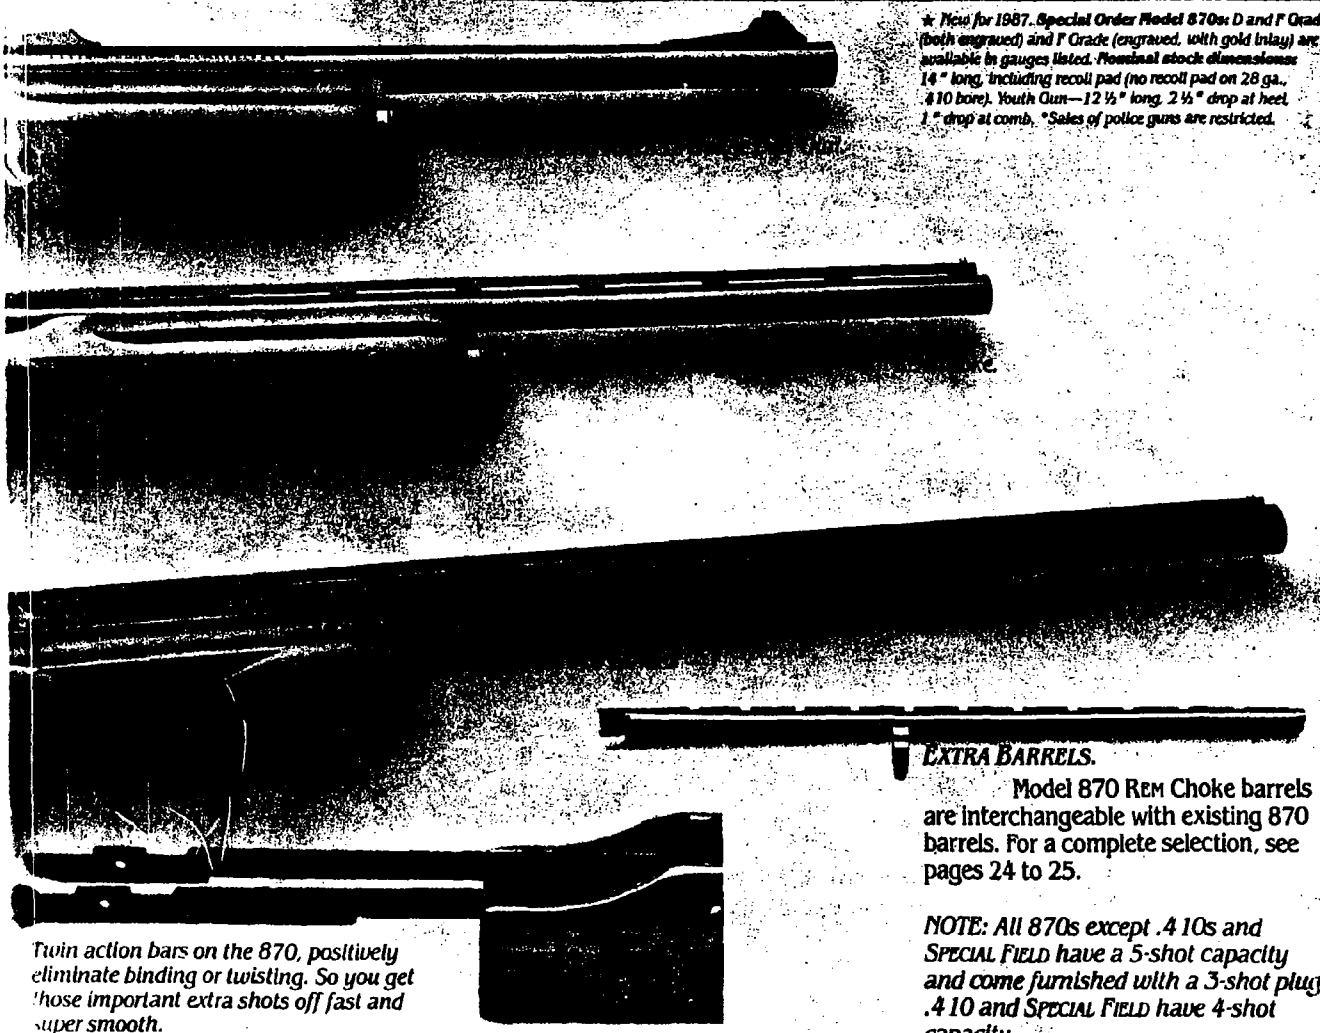
★ *New for 1987. Special Order Model 870s: D and F Grades (both engraved) and F Grade (engraved, with gold inlay) are available in gauges listed. Nominal stock dimensions: 14" long, including recoil pad (no recoil pad on 28 ga., .410 bore). Youth Gun—12½" long, 2½" drop at heel, 1" drop at comb. *Sales of police guns are restricted.*



Twin action bars on the 870, positively eliminate binding or twisting. So you get those important extra shots off fast and super smooth.

EXTRA BARRELS.

Model 870 REM Choke barrels are interchangeable with existing 870 barrels. For a complete selection, see pages 24 to 25.

NOTE: All 870s except .410s and SPECIAL FIELD have a 5-shot capacity and come furnished with a 3-shot plug. .410 and SPECIAL FIELD have 4-shot capacity.

R2525677

SPECIAL PU 1987 OTGUNS.

Remington Country is the game's home turf. And, as we all know, even the slightest glint from a gun can set wary game off. And send you home empty-handed.

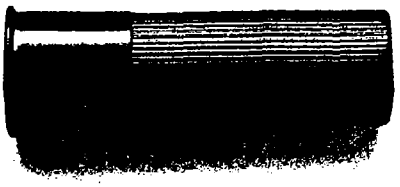
That's why we introduced our line of Special Purpose 3" Magnum shotguns with a dull gray parkerized finish on all metal parts and improved subdued protective finish on stock and fore-end that resists moisture penetration and gives the appearance of an oil finish.

This year, we're adding the ultimate in versatility and endurance to our SP line—with our new 11-87 Special Purpose shotgun. Its exclusive Pressure Compensating Gas System (see page 6) allows you to shoot all loads interchangeably, from 3" magnums to 2¾" loads without changing anything except the shell.

Combined with flush-fitting stainless steel REM™ Chokes, in 26" and 30" vent rib barrels, you may never need another gun.

The 11-87 SP also sports a thicker extractor, heat treated piston and piston seal, patented detent system in magazine tube, and rust-resistant stainless steel magazine tubes. Plus the

See Remington's revolutionary Special Purpose MultiRange DUPLEX™ shotshells on pages 4-5.



All Remington Special Purpose shotguns are outfitted with detachable camouflage slings made of DuPont CORDURA® Nylon. They're padded for carrying comfort and completely waterproof.

R2525678

1987

pressure valve in the new gas system is totally self-cleaning. So you never have to remove the compensating spring for maintenance. Never.

MODEL 11-87 SPECIAL PURPOSE AUTOLOADERS.

All 12-gauge, in 26" and 30" vent rib barrels with flush-fitting REM Chokes. Metal bead front sight.

MODEL 11-87 AND 870 SPECIAL PURPOSE DEER GUNS.

Choose 11-87 autoloader with 21" barrel, or 870 pump action with 20" barrel, both have 3" chamber, rifle sights.

NOTE: 11-87 Deer Gun is designed for optimum performance with slug and buckshot loads and therefore is not pressure compensated, but will accommodate all 12-gauge loads if outfitted with an 11-87 PREMIER® field barrel.

MODEL 870 SPECIAL PURPOSE PUMP ACTION.

All 12-gauge, 3" chambers. Choose 26" or 30" vent rib barrel with REM Choke, metal bead front sights.

R2525679

1100 AUTO 1987 SHOTGUNS.

Introduced 24 years ago, the gas-operated Remington Model 1100 has set the standard in autoloading pointability, balance, and soft recoil.

For 1987, in addition to having the widest choice of extra barrels, both 12- and 20-gauge Model 1100s come with flush-fitting REM™ Chokes—the only factory-installed choke tubes made of heat-treated, seamless stainless steel—in Full, Modified and Improved Cylinder, with special wrench. So, one gun can take you from upland to flyway. And, by changing the barrel, to deer country, too.

Like all Remington shotguns and centerfire rifles, the barrel and receiver on each Model 1100 start from a solid billet of ordnance grade steel, for long lasting durability even with repeated use of steel shot.

The 1100's gas system allows you to shoot as fast as you can pull the trigger. All with low recoil. Stocks and fore-ends are crafted from fine, American walnut. And every part of every Remington gun is designed, built and tested right here in America.

MODEL 1100 MAGNUM 12- AND 20-GAUGES.

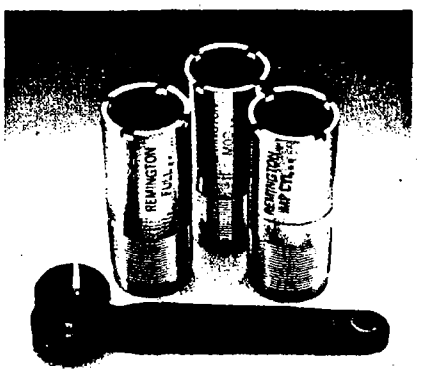
All 1100 Magnum models have 3" chambers and are equipped with recoil pads and interchangeable REM Choke tubes. They're designed to shoot magnum shells only.

MODEL 1100 FIELD GRADE.

Now all 2¾" chambered field guns come with REM Choke in 12- and 20-gauges. Receiver scrollwork, high gloss RKW finished stock, and white line spacers. Familiar diamond grip cap inlay.

MODEL 1100 SPECIAL FIELD.™

Combines a shorter overall length of 41" with lighter weight and English style straight grip stock—for quick shouldering and natural pointability. Stock is cut checkered, and satin finished. Now in 12- and 20-gauges with REM Choke: both with 2¾" chamber and 21" barrel.



All 12- and 20-gauge 1100 field guns now come equipped with REM Choke—the only factory installed screw-in tubes made from seamless stainless steel. (Remington recommends using a Modified Choke tube when shooting steel shot.)

R2525680

1987

MODEL 1100 DEER GUN.

2¾" chamber, 21" plain barrel with rifle sights. Imp. Cyl., choke delivers optimum performance with slugs and buckshot.

MODEL 1100 YOUTH GUNS.

Shorter stocks and barrel lengths reduce size and weight for youths and smaller framed adults, but in no way limit performance. Available only in 20-gauge, now furnished with REM Chokes.

SIGHTS AND SAFETIES.

Unless otherwise noted, all 1100s have metal bead front sight and the positive cross bolt safety is quickly accessible.

NOTE: All models except .410 have 5-shot capacity with 3-shot plug. .410 has 4-shot capacity.

R2525683

EXTRA BARRELS.

With a quick, easy barrel change, your favorite Remington field gun can become your favorite target gun, or that long barrel goose gun can become a great short barrel deer gun.

This year, our 12- and 20-gauge field barrels come equipped with Full, Modified, and Improved Cylinder REM™ Chokes—the only factory-installed screw-in choke system made of heat-treated, seamless stainless steel.

New 12-gauge REM Choke extra barrels will fit previously manufactured guns.* But the *Model 11-87 is not in any way interchangeable with the Model 1100.*

All of our 12- and 20-gauge target barrels feature newly designed and sure-to-smoke-em REM Chokes for trap and skeet.

*Note: New 20-gauge REM Choke barrels have a thicker taper and may NOT readily fit pre-1987 Model 1100 LT shotguns. The fore-end may have to be modified by a gunsmith. This modification is NOT covered under Remington's Warranty Repair Policy.

MODEL 870 EXTRA BARRELS WITH 2¾" CHAMBERS. Model 870 extra barrels with 2¾" chambers will fit both Magnum and 2¾" receivers. Use only 2¾" shells in these barrels.

R2525685

1987

There will always be a place for the luxury and warmth of walnut in Remington Country. But there's also a new world of opportunity presented by the use of sophisticated synthetics.

Why a synthetic stock?

According to Jim Carmichel, Shooting Editor of *Outdoor Life*, wooden stocks can react to changes in the atmosphere and temperature. This, in turn, may cause changes in a rifle's point of impact.

"Even a carefully sighted-in rifle can become useless after a day or two of bad weather.

Synthetic stocks are virtually immune to this and are thus highly reliable when it comes to making your bullet go where you aim."

But a high degree of accuracy—no matter how humid, how wet, how hot or cold—is not the only criteria.

Fiberglass stocked guns are also lighter than wooden stocked guns—1 lb. on the average. And virtually indestructible. Every hunter who's ventured more than a hundred yards from the road knows how the dings and gouges suddenly appear in a traditional stock when the going gets tough.

Even the best stock in the world means little if the action isn't equally superior. With Remington, you're getting a combination of DuPont high-tech materials with *the strongest, most accurate bolt action* available today.

All models have straight line combs, solid black English-style butt pads, and sling swivel studs.

MODEL 700 RS.

These right hand long action rifles—in 270 Win., 30-06 and 280 Remington—share the sleek styling of our MOUNTAIN RIFLE™ (on page 28). Stocks are DuPont RYNITE® (RS), noted for unyielding strength and durability. Also, the exclusive manufacturing process enables minute detail to be incorporated into the mold and reproduced with great fidelity. Available in gray or gray camo with a textured grip for control and *smooth cheekpiece* for comfort. Historical "Remington Arms" insignia on grip cap.

MODEL 700 FS.

Available in three right hand calibers—7mm Rem Mag, 243 and 308 Win.—and three left hand—7mm Rem Mag, 30-06 and 270 Win.—these rifles have the same strong, accurate action as our Model 700 ADL (Page 30), with hand layup fiberglass stocks reinforced with DuPont KEVLAR® for extreme toughness. Available in gray or gray camo.

MODEL SEVEN FS.

In three right hand calibers—308 Win., 7mm-08 Rem, 243 Win.—this compact bolt action features a hand layup fiberglass stock (FS), reinforced with DuPont KEVLAR® at points of bedding and stress. Quality features include hinged floorplate, tapered barrel with ramp front, adjustable rear sights. Available in gray or gray camo, with textured finish for a sure grip.

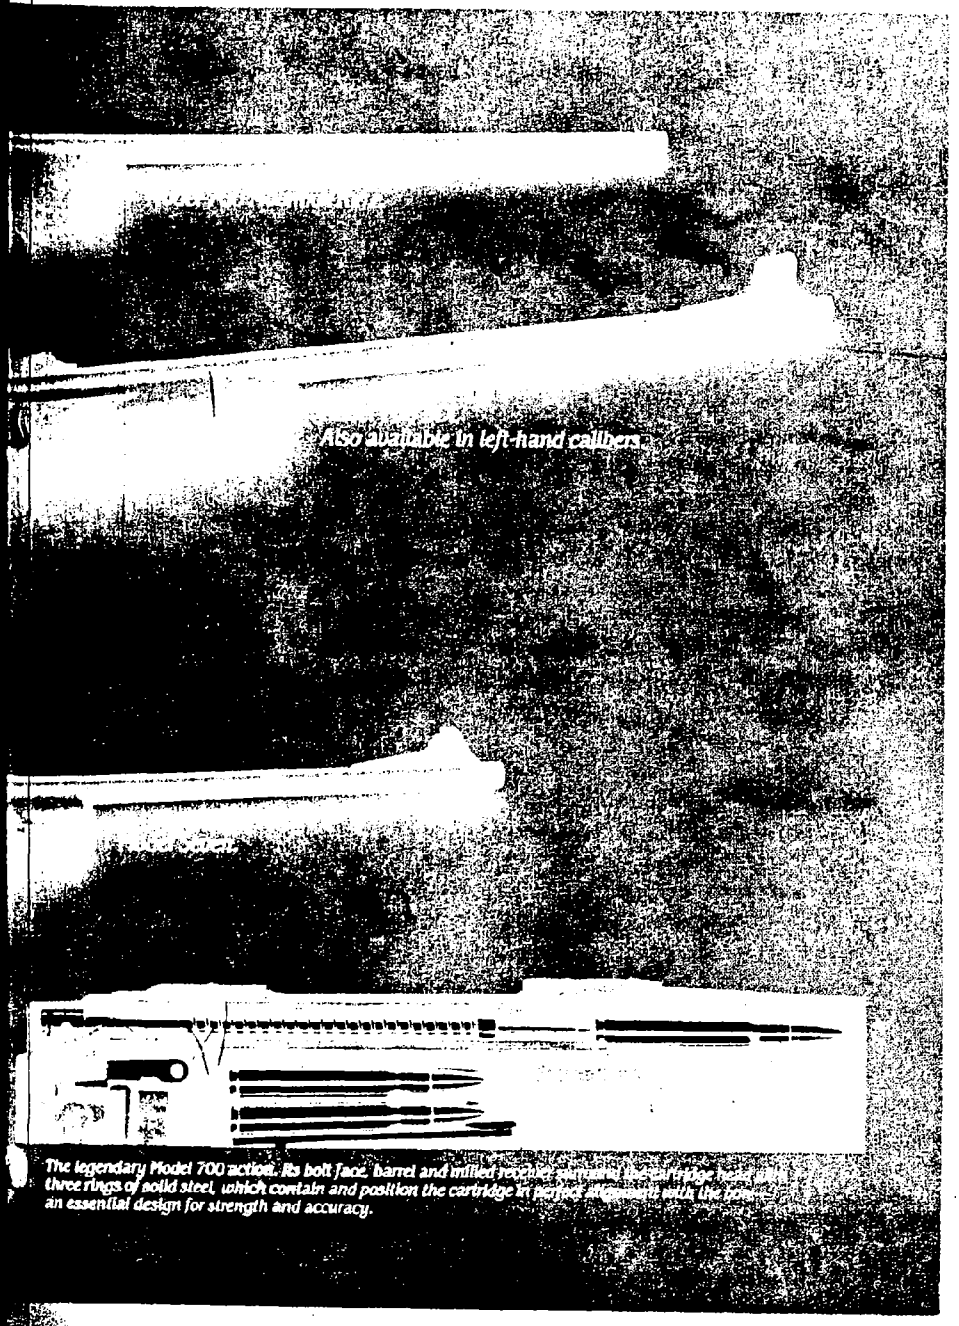
R2525688

BOLT ACTION RIFLES.



The legendary Model 700 action. Its bolt face, barrel and milled receiver surround the cartridge head with three rings of solid steel, which contain and position the cartridge in perfect alignment with the bore—an essential design for strength and accuracy.

It's no accident that among the most knowledgeable and experienced riflemen, Remington bolt action rifles continually lead the field in delivering excellent accuracy, and plenty of reliability.

After all, our development of the bolt action rifle goes back to 1899. And in all the years since, we've constantly sought to improve even those features that were already accepted to be the best.

That's why we didn't settle for the open-faced bolt with ejector cut still found on so many centerfire rifles. Rather, we developed our uncompromised "wall of steel" lock-up, in which the bolt, barrel and milled receiver surround the cartridge head with three rings of solid steel.

It's also why, in the last five years, we've been able to introduce rifles, such as our MOUNTAIN RIFLE™ and Model Seven that are lighter and more compact than ever before.

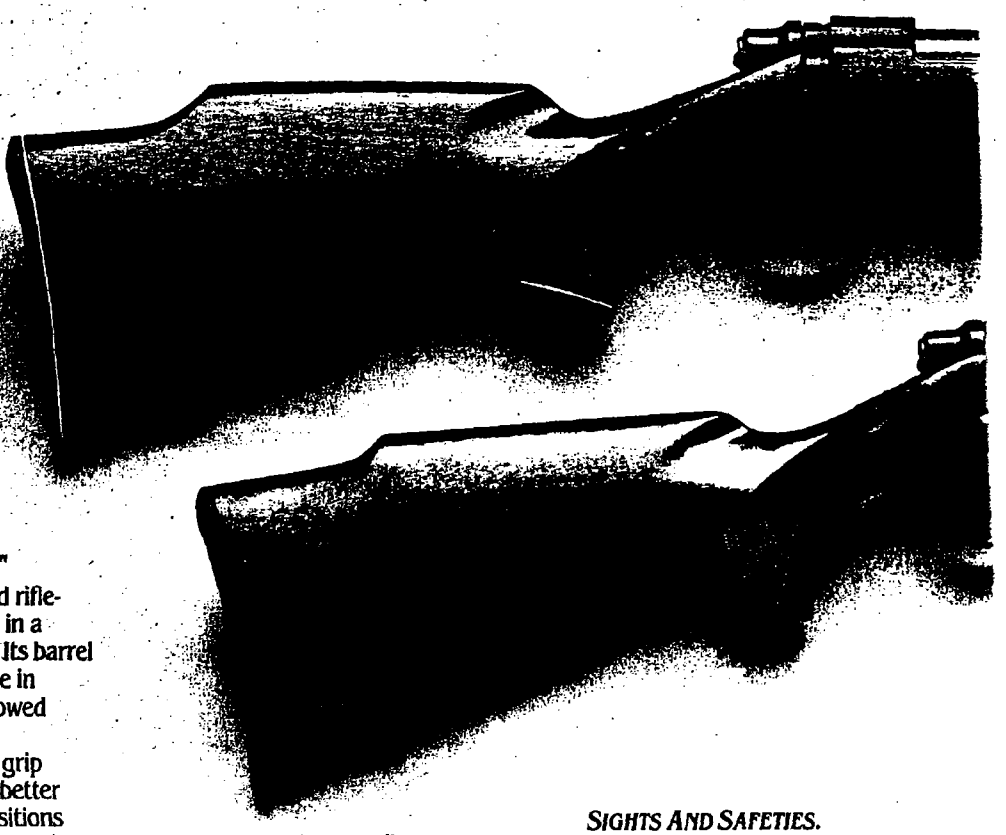
But some things about every Remington bolt action *haven't* changed. Action parts are still machined from solid steel blocks.

Barrels are still hammer-forged and carefully bedded to the stock. Every finished gun is still *individually inspected and test fired,* so when you squeeze off that shot of a lifetime, you hit what you're aiming at. And, like all Remington products, our rifles are still 100% *made in the U.S.A. Just like they* have been since 1816.

1987

R2525689

1987 ...CTION RIFLES.



MODEL 700 MOUNTAIN RIFLE.™

This is the experienced rifleman's answer to lighter weight in a superior-handling full-size rifle. Its barrel is tapered, without any sacrifice in accuracy. And its stock is narrowed without any loss of strength.

A lower-pitched pistol grip helps straighten your wrist for better control. Slender cheekpiece positions the eye while softening recoil. American Walnut stock with 20 line-cut checkering, satin finish, hinged floorplate and sling swivel studs complete this triumph of form and function. Drilled and tapped for scope mounting.

MODEL SEVEN.

This gun is so sweet you have to pick it up, feel it, shoulder it, to believe it. As one outdoor writer put it, "The Model Seven gives hunters the lightness and quick handling of traditional scabbard rifles—without their shortcomings in actions or caliber choice."

Put another way, this classically styled, 18½" barrelled rifle is the sportscar of our line—it's compact, yet powerful with superb handling and pointability.

MODEL 700 CLASSIC.™

Jim Carmichael called it "probably the best looking, certainly the most shootable hunting rifle ever offered by a major firearms maker."

The CLASSIC features a straight line stock with swivel studs, satin finish, hinged floorplate, cut checkering, English style brown butt pad, highly polished, rich blueing on metal surfaces.

For 1987, we will chamber a limited number of CLASSICS in .338 Win. Mag.—the favorite caliber of Alaskan big game outfitters.

MODEL 700 BDL.

The flagship of our bolt action line, this rifle, in right and left hand models, has a Monte Carlo stock with cheekpiece, positive cut skipline checkering, floorplate, swivel studs and scratch-resistant RKW high-gloss finish on stock. Furnished with hooded ramp front, and adjustable rear sights. New this year are LH models in 243 and 308 Win.

MODEL 700 VARMINT SPECIAL.™

This heavy barrelled bolt action has the same features as our BDL, with a heavier hammer-forged barrel to dampen vibration and deliver pinpoint accuracy. Equipped with scope mounting blocks in lieu of sights.

MODEL 700 ADL.

Our value leader in bolt actions, the ADL has all the accuracy and power advantages of our highest-end 700's without some of the extra features like floorplates. But when it comes to performance, they don't shoot any better than this.

SIGHTS AND SAFETIES.

All Model 700 ADLs and BDLs (except those in varmint calibers—.17, .222, .223, 22-250) have removable blade ramp front sights and adjustable rear sights. BDL front sights are hooded.

All of our bolt action Centerfire rifles have a positive two-position safety switch.

NOTE: For 1987, Remington also has a complete line of synthetic stocked bolt action rifles. (See page 26.)

This year's limited edition Model 700 CLASSIC will be chambered in .338 Win. Mag., the load of choice for large and dangerous North American big game. Now the .338 in 225 grain and an exclusive 250 grain loadings are being offered. (See page 37.)

1987

PUMP & AUTO RIFLES.

If you're used to shooting a Remington pump or auto shotgun in the field or flyways, a Remington pump or auto *rifle* for the woods will be second nature.

And isn't that what you need when you're hunting big game and only get one or two quick shots a year?

The motion is smooth and natural. So even with your heart in your mouth—these actions let you get the first shot off easily. And keep your finger on the trigger, your eye on the target, for a fast second shot when needed.

Yet, even though these rifles may *feel* like your favorite shotgun, they perform like a true rifle should, delivering shots with excellent accuracy, and plenty of reliability.

No wonder actions like these were the choice of woods-wise and experienced deer hunters 80 years ago.

As they still are today.

Whether your action is a true-blue pump or gas-operated auto, nobody has more experience making rifles in those actions than Remington. All have receivers and barrels machined from solid steel, American walnut stocks and massive locking lugs similar to those usually found only on bolt action rifles.

Our Models Four and 7400 autoloaders are engineered for speed and softer recoil. The unique gas metering system and balanced feel keeps you on target.

Our Models Six and 7600 pump rifles offer the same superb pointability and balance as our autoloaders. And, for anyone used to a pump shotgun, they offer the same speed thanks to our smooth, twin action bars that perform in any—and we mean *any*—weather.

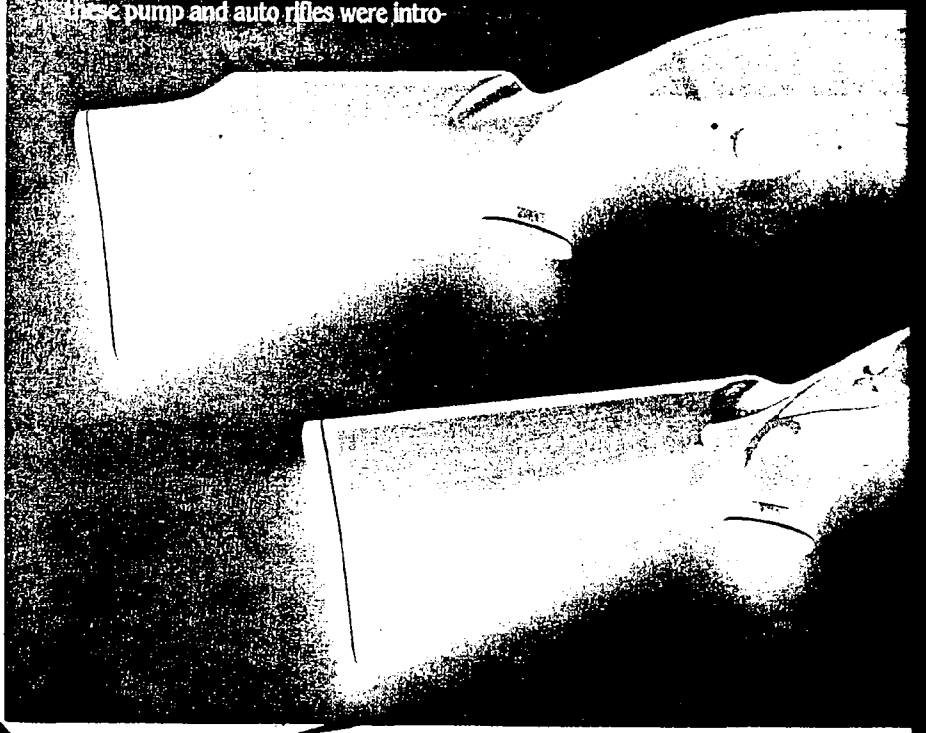
A removable four-shot magazine lets you load and unload quickly. Extra magazines are available.

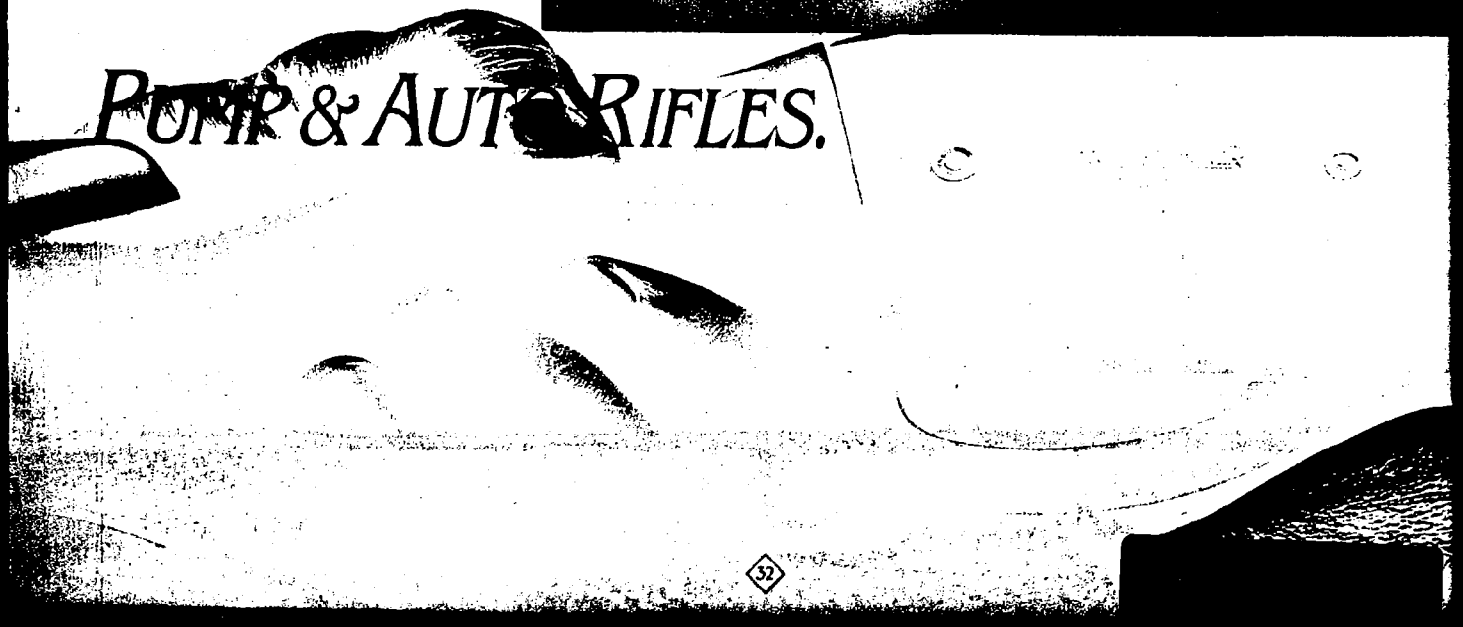
Models Four And Six.

"Any way you add it up, they equal a 10," said *Guns & Ammo* when these pump and auto rifles were introduced six years ago. Many custom touches include Monte Carlo stock with cheekpiece, curved grip, flared fore-end, rich cut checkering, and a cartridge head imbedded in front of the receiver. Detachable sights, with flat faced front gold beads.

Model 7400 And 7600.

A customer recently commented that the 7600 was "the most beautiful" gun we made. "Please, never stop making it." That's quite a recommendation. Our Models 7400 and 7600 have the same mechanical advantages as our Four and Six, but a lower price tag.





R2525693

SPORTSMAN® RIFLE SERIES.

1987

At Remington, we're committed to upgrading the quality of the hunting life for everybody. That's why we created our SPORTSMAN® series three years ago so that more shooters could experience the joys of Remington Country. At a price well within range of competitor's lesser-quality offerings.

The major performance features of these guns are exactly the same as in our higher priced models. And performance is, ultimately, the only thing that truly counts.

Barrels and receivers are machined from solid ordnance grade steel. Action parts are tumbled by our patented "vibra honing" process for a smooth fit and reliable functioning.

SPORTSMAN stocks are made of American hardwoods with satin finish. All rear sights are adjustable for elevation and windage.

So you *still* don't have to settle for anything less than a Remington.

SPORTSMAN 581-S RIMFIRE RIFLE.

Called back by popular demand, this 22-caliber bolt action rifle is a dependable workhorse for the experienced rifleman. *And* the ideal beginner's gun with a single shot adapter. Full size Monte Carlo stock, 24" barrel, 5-shot clip handles short, long or long rifle cartridges interchangeably.

NEW MODEL 700 GUN KIT

For the first time, Remington's world famous 700 bolt action is available with a "do it yourself" stock. So all you craftsmen can have the satisfaction of owning the finest bolt action finished one-of-a-kind—to your individual taste.

NEW MODE

R2525694

1987

SPORTSMAN 78 BOLT ACTION RIFLE.

In five proven calibers, this rifle has Remington's famous "wall of steel" lock-up in which the bolt, barrel, and milled receiver surround the cartridge head with three rings of solid steel for the ultimate in accuracy and strength.

SPORTSMAN 74 AUTO AND 76 PUMP RIFLES.

If you're used to an auto or pump shotgun, these rifles will be second nature. The 74 auto gas system keeps recoil to a minimum and delivers fast, second shots. The 76 pump has the smoothest twin action slide bars in the business, so you can keep your sights on the target for a quick second shot, if needed. Chambered for 30-06, with removable 4-shot clip.

Available in 270 Win., 30-06, 243 Win., 308 Win. and 7mm Rem Mag with iron sights, instruction manual, 3 checkering templates and swivel studs. All metal work is completely finished, polished and blued. Stock is 100% inletted, ready for finishing.

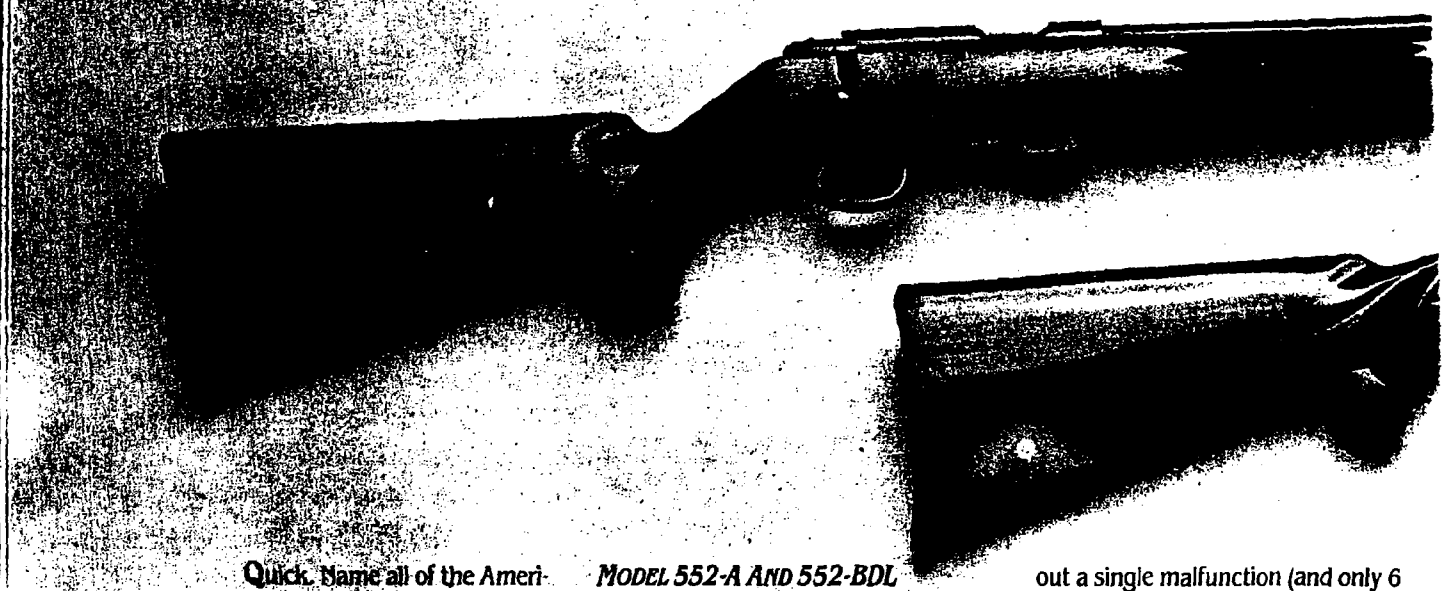
RIMFIRE RIFLES AND AMMUNITION 1987



Quick. Name all of the American companies that can offer you a complete rimfire shooting system.

If you couldn't think of anybody but Remington, you're right. Because nobody but Remington manufactures both. And certainly, no other manufacturer can approach the level of strength, quality, and accuracy that is the hallmark of our entire line of Remington 22 rifles and cartridges.

Our rifles are built for uncompromised strength, with barrels machined from solid billets of steel, action parts tumbled in our "vibra-honing" process for smoothness, and a deeply polished finish.

Whichever you shoot, our hard-hitting rimfire bullets mesh perfectly with our pumps, autos and bolts for the ultimate in rimfire performance.

Model 541-T Bolt Action.

Because of the inherent accuracy of Remington bolt actions, the crisp trigger release and rear lock-up design comparable to our finest target rifles, this five shot clip repeater is a favorite of those needing a serious rimfire rifle. American walnut stock and cut checkering. Drilled and tapped for scope mounting.

Model 572-A And 572-BDL Pump Action.

The famous Remington Fieldmaster™ is the *only* 22 pump action rifle still made in America. BDL has high-grade walnut stock, custom checkering and big-game rifle sights. Standard model has adjustable rear sight and bead front sight.

Model 552-A And 552-BDL Autoloaders.

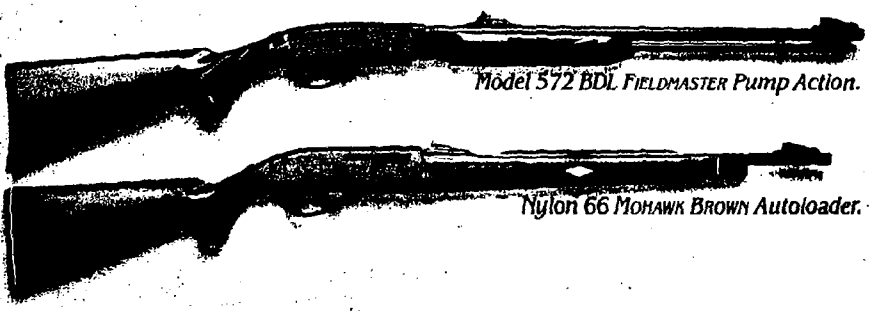
Our Model 552 Speedmaster® rifles have the same basic styling as 572 pump action rifles, with a semi-automatic action. Delivers shot-after-shot consistent accuracy.

Nylon 66™ Autoloader.

Used to establish a world's record on hand thrown 2¾" wooden blocks, the Nylon 66 shot 100,010 without a single malfunction (and only 6 misses to boot). It is still one of the strongest, most indestructible guns made.

22 Ammunition

At Remington, we load our big game quality and know-how into every little 22. (Only the price is low.) Cases are made of brass, bullets have uniformly controlled alloy, and our own Kleanbore® priming mixture promises fast, sure ignition.



Model 572 BDL Fieldmaster Pump Action.

Nylon 66 Mohawk Brown Autoloader.

SHOTGUNS

11-87™

The Most Durable And Versatile Autoloading Shotgun We've Ever Made

Last year, we introduced the remarkable Remington Model 11-87™. And in just 12 months time, it's become the shotgun against which all other 12-gauge autoloaders are measured.

The Remington Model 11-87 is the first and only American-made sporting arm that's pressure-compensating to shoot all 12-gauge ammunition — everything from light 2¾" field loads to heavy 3" magnums — without changing anything but the shell.

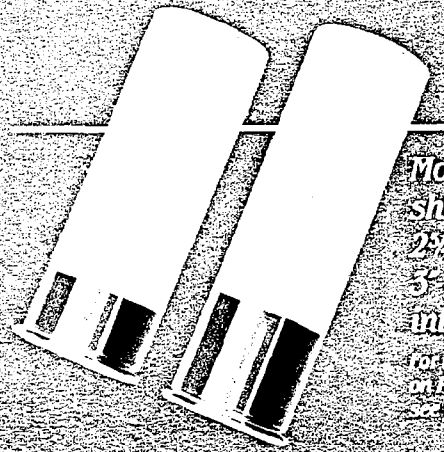
Combined with screw-in Rem Choke tubes and your choice of 26", 28" or 30" barrels, the 11-87 Premier is the most versatile shotgun you've ever shouldered. There are also two 11-87 target guns — specifically for clay target shooting and 11-87 Special Purpose shotguns for waterfowl, turkey and deer.

And the 11-87 provides twice the shooting life of any autoloader we've ever made. With an extractor that's 25% thicker for greater strength.

Both piston and piston seal are heat-treated for more endurance. The magazine tube is stainless steel to resist rust and corrosion.

The magazine cap features a patented detent system to prevent backing off during repeated shooting. And the pressure-compensating (PC) gas system is self-cleaning. So the PC spring never has to be removed for maintenance.

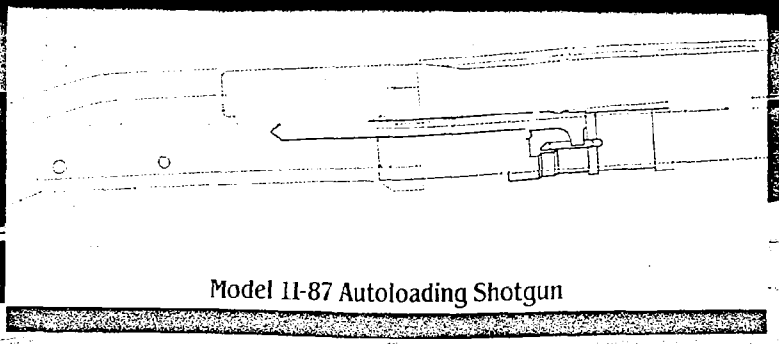
All this adds up to make the Model 11-87 one gun that's definitely durable enough to be passed along from father to son.



Model 11-87 shoots all standard 2¾" field loads and 3" magnum shells interchangeably.

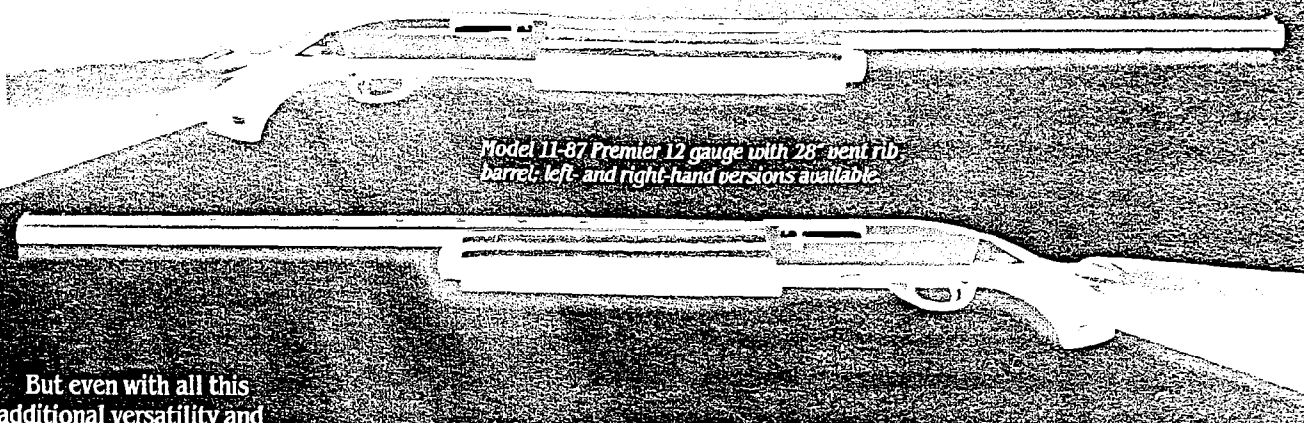
For information on Remington shotshells see pages 24 through 29.

R2525703



Model 11-87 Autoloading Shotgun

...with satin finish and ...lines to the inch.



Model 11-87 Premier 12 gauge with 28" vent rib barrel; left- and right-hand versions available.

But even with all this additional versatility and durability, the 11-87 produces a recoil that's so soft, you may think you're shooting a smaller-gauge shotgun.

And the 11-87 maintains the balance, "feel" and clean lines hunters and shooters have come to expect in a Remington autoloader. The classic American walnut stock and fore-end feature a rich satin finish and checkering that's evenly cut 20 lines to the inch.

With all this going for it, it's easy to see why the Remington Model 11-87 just may be the best all-around shotgun ever.

The patented pressure compensation system automatically controls the gas pressure bled from the bore to maintain a controlled bolt velocity. This feature allows the 11-87 to load, shoot and eject light 2¾" field loads or 3" 12-gauge shells interchangeably.

**For information regarding the Model 11-87 SP Magnum, see pages 8 and 9. Also available—Model 11-87 Trap and 11-87 Skeet Target Shotguns. For complete specifications, see page 16.

870 America's Favorite Pump Action Shotguns

Ask a shotgunner to name the best pump action in the field, and one name will come up more than any other.

The Remington Model 870™ Wingmaster®.

With well over 4 million 870 shotguns sold, this durable gun is by far the most popular pump action in the world. And for good reason, too.

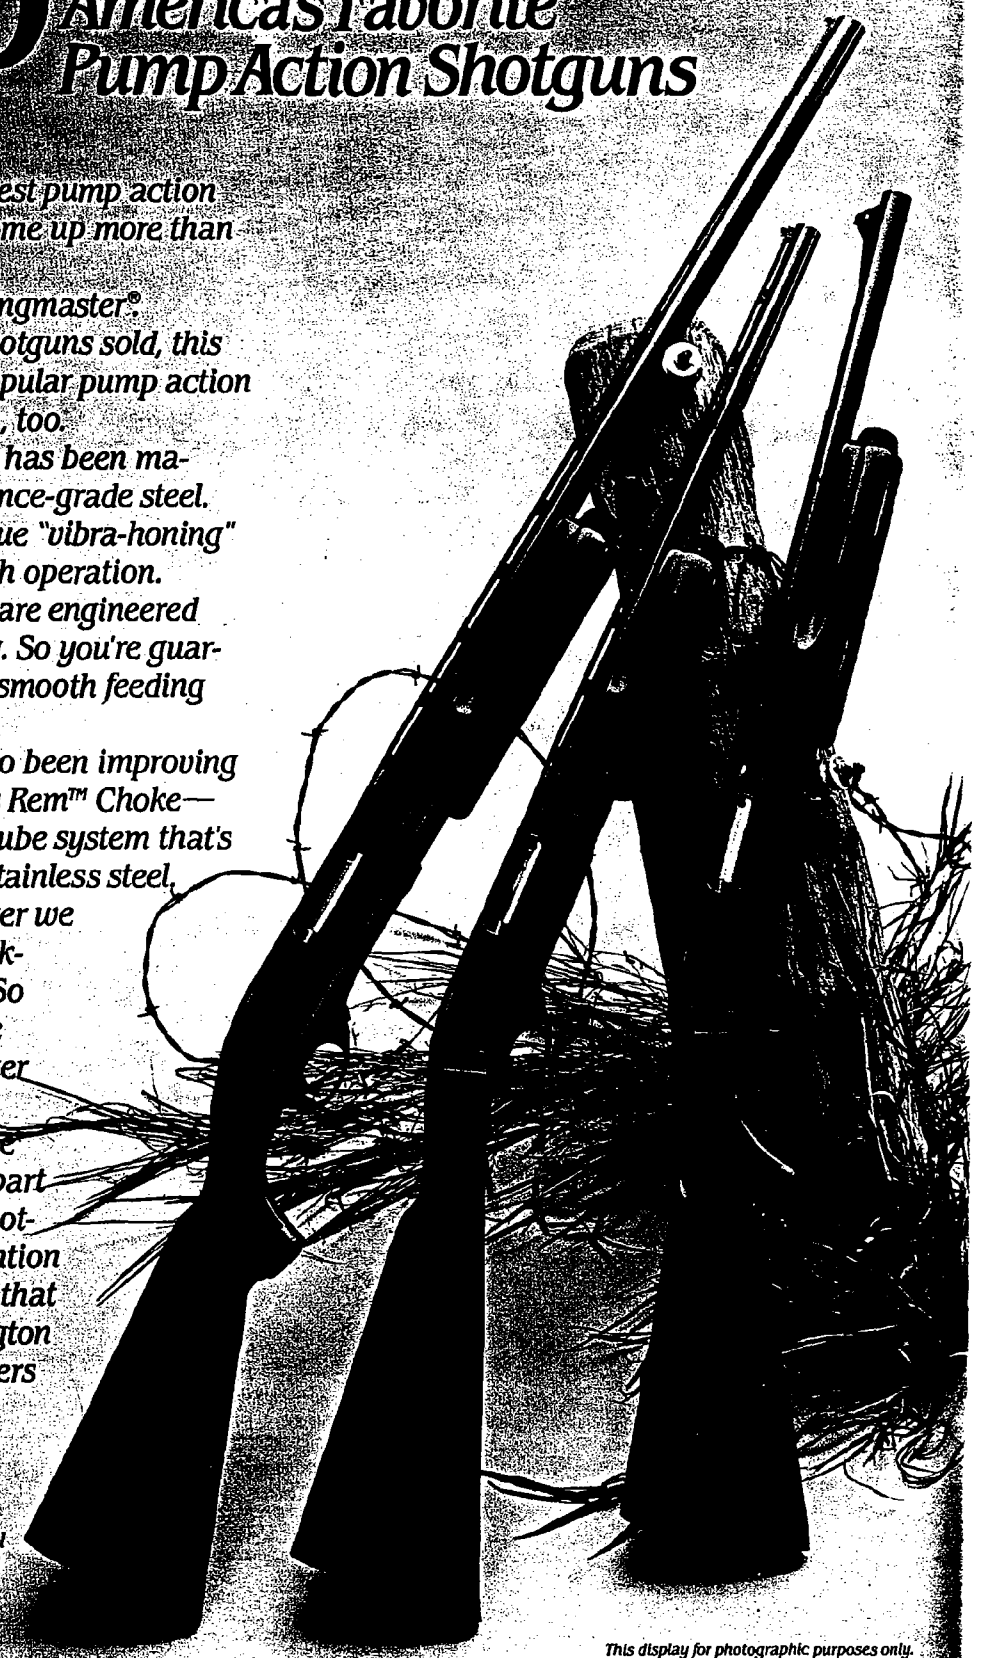
Since 1950, every 870 receiver has been machined from solid billets of ordnance-grade steel. All receivers go through our unique "vibra-honing" process to ensure reliable, smooth operation.

And the twin-action slide bars are engineered to eliminate twisting and binding. So you're guaranteed straight-line pumping for smooth feeding and positive ejection.

For the past 38 years we've also been improving the 870 with innovations such as Rem™ Choke—the only factory-installed choke tube system that's made of heat-treated, seamless stainless steel.

Every 12-gauge 870 Wingmaster we make has positive deep-cut checkering on the stock and fore-end. So the checkering is sharper, to give you a sure grip. And an even better chance of making a sure shot.

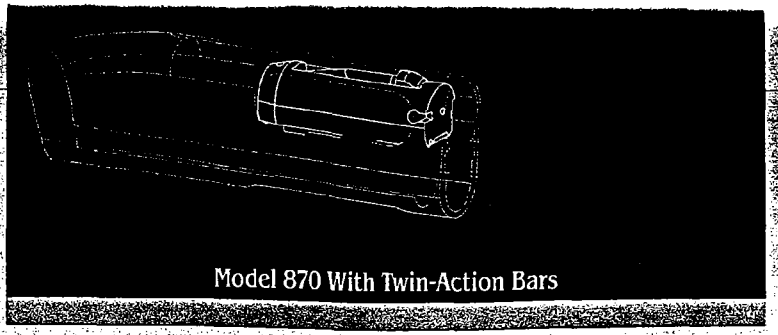
It's features like these that have continued to set the Model 870 apart from every other pump action shotgun in the field. And it's this attention to every detail—large or small—that will continue to make the Remington 870 the choice of more shotgunners again this year.



Shown, from left to right—Model 870 Wingmaster 12 gauge, Model 870 Special Field 20 gauge and Model 870 12-gauge Deer Gun.

This display for photographic purposes only. Remington does not recommend leaning a firearm against a fence post.

R2525705



Model 870 With Twin-Action Bars

All Model 870 shotguns feature twin-action bars that eliminate twisting or binding. So you get second and third shots off as fast and smooth as your first shot.

Model 870™ Wingmaster®. Today there are more Model 870 shotguns in the field than any other pump action. This reliable shotgun features an ivory bead front sight and metal mid bead similar to those usually found on target guns. And, like all current 12-gauge 870 shotguns, the Wingmaster handles 2¾" and 3" shells interchangeably.

Model 870 Special Field. Compact dimensions, English-style straight stock and lighter weight make this gun a natural for fast, upland shooting. Its straight pistol grip, innovative 21" barrel with shortened fore-end and magazine are designed for instinctive shouldering and fast handling.

Model 870 Brushmaster® Deer Gun. Available for right- and left-hand shooters, the 870 Brushmaster deer gun features a 20" barrel with rifle sights and Improved Cylinder choke.

Model 870 Youth Gun. Shortened 12½" stock with recoil pad and 21" barrel offer the smaller-framed shooter full-size performance. In 20 gauge only, with Rem™ Choke.

Model 870 Express™. This just may be the best shotgun value on the market. The 870 Express has the same action as our top-of-the-line Wingmaster. Available in 3" chamber and 28" vent rib barrel only, the Express has a hardwood stock with low-luster finish and solid butt pad, and it comes equipped with a Modified (only) Rem Choke tube and wrench. Other chokes may be purchased from your Remington dealer. And for deer hunters we also offer the 870 Express Combo, which includes a 20" slug barrel.

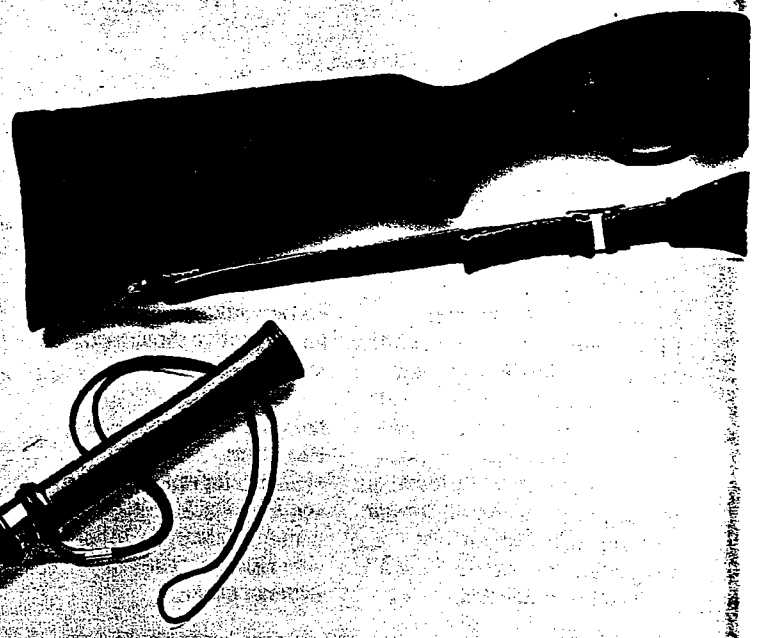
SPECIAL PURPOSE *Shotguns*

As Invisible As Guns Get



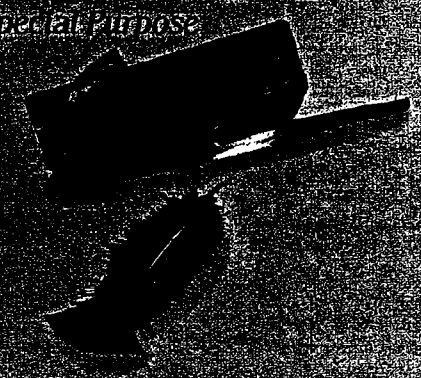
To serious waterfowl, turkey and deer hunters, dull guns are very bright ideas.

Especially rugged, nonglare guns like the Remington Model 11-87™ and Model 870™ Special Purpose Magnums.

Even to the wariest eye, we've made every visible component nearly invisible.

The nonreflective Parkerized finish protects the SP Magnum barrels and receivers. A dull black finish covers exposed bolts and carrier assemblies. We've even added a special coating on the hardwood stocks and fore-ends. It penetrates the wood to form a protective moisture seal. And doubles as a subdued finish that's resistant to reflection.

Each Special Purpose gun also comes with recoil pad and padded camouflage sling of durable, water-resistant DuPont Cordura® nylon. The sling is detachable, but useful company during a long day's hunt. Whether you need fast handling in tight quarters or a longer sight plane for pass shooting, you'll appreciate just how well these Special Purpose guns perform.



Model 11-87 Special Purpose Autoloaders. You can shoot all loads. From 2¾" field loads to 3" magnums, without changing anything but the shell, thanks to the exclusive pressure compensating gas system. This gas system is self-cleaning.

Model 11-87 autoloaders also have thicker extractors, heat-treated piston and piston seal, and a patented detent system in the magazine tube.

All 12-gauge 11-87 shotguns in 26" and 30" vent rib barrels come with flush-fitting Rem™ Chokes.

Model 11-87 And Model 870 Special Purpose Deer Guns. Choose the 11-87 autoloader with 21" barrel, or 870 pump action with 20" barrel; both come with 3" chamber and rifle sights. The 870 has twin-action bars that eliminate binding or twisting. It's the same action found on our popular 870 Wingmaster® pump action shotgun. So you get those crucial second and third shots off as quickly and easily as your first shot.

Note: The 11-87 deer gun is designed for optimal performance with slug and buckshot loads and therefore is not pressure compensated, but will accommodate all 12-gauge loads if used with an 11-87 PC-equipped barrel.

Model 870 Special Purpose Pump Action. All 12 gauge, 3" chambers. Choose 26" or 30" vent rib barrel with Rem Choke.

NICKEL BUCKSHOT

Nickel Tops The Copper

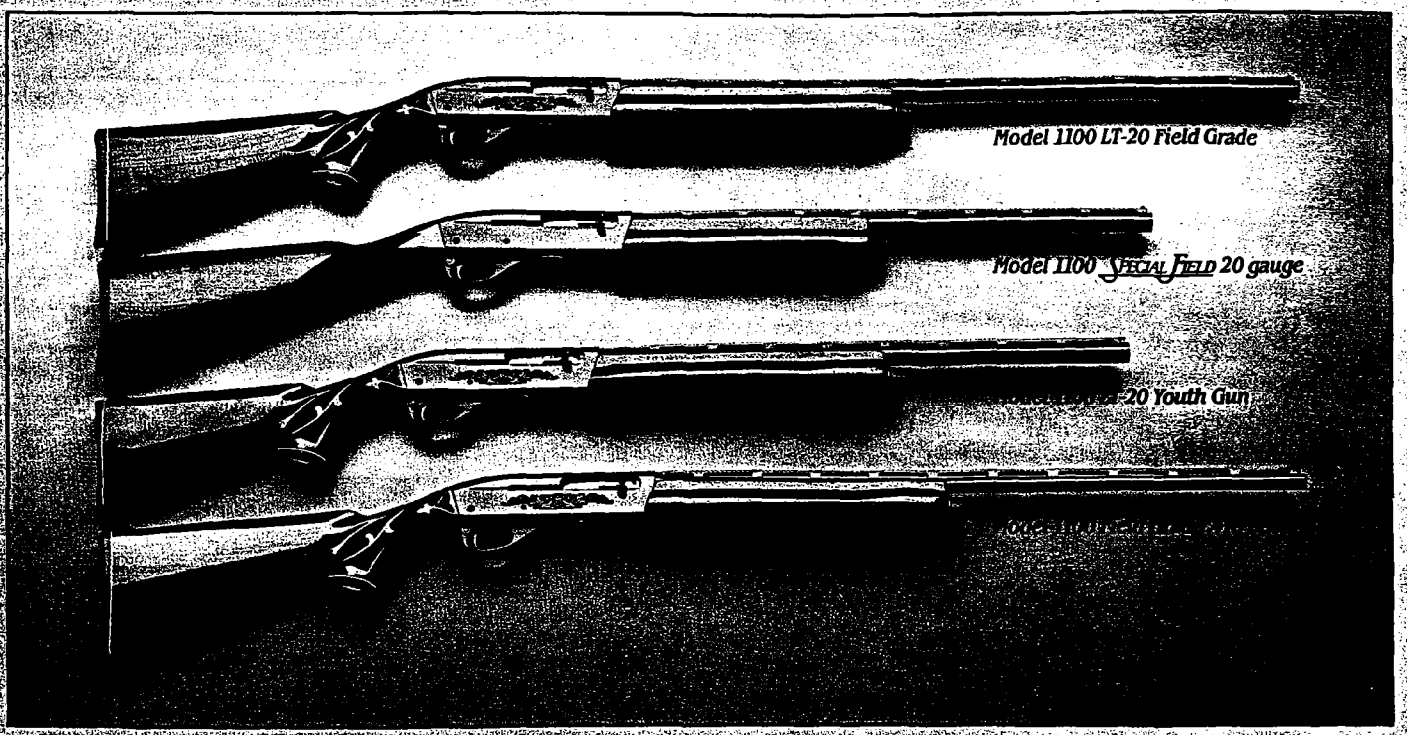
Big game hunters don't have to buy the same old line of buckshot any more. Because now there's new Remington nickel buckshot loads. The roundest, hardest buckshot loads ever developed.

To begin with, these new shells use only the best raw buckshot available. So the shot is rounder. Then, each pellet is electroplated with layers of copper, topped by nickel and finally buffered in the hull to prevent deformation. So the shot stays rounder, patterns tighter—maximizing your on-target performance.

They're the most accurate buckshot loads ever. And only Remington makes 'em. In new 2¾" loads with 00 and #4 buckshot. Or 3" loads in 000, 00, #1 and #4 buckshot.

R2525708

1100 Autoloaders



The Surefire Legends

As Jim Carmichel, Outdoor Life gun editor, puts it, "Anyone who can shoot a shotgun well will probably shoot better with an 1100."

That was true a decade ago. And it still holds true today.

Since its introduction in 1963, the Remington Model 1100™ has brought home more game from the field and trophies from the firing line than all other autoloading shotguns combined. And it's become the standard for pointability, balance and soft recoil.

The Model 1100 is available in 12 gauge Special Field, 20 and 28 gauge and .410 bore, plus a wide range of extra barrels.

The 20 gauge comes with flush-fitting Rem™ Chokes, the only factory-installed choke tubes of heat-treated, seamless stainless steel in Full, Modified and Improved Cylinder—or optional skeet chokes.

And like all Remington shotguns and centerfire rifles, every Model 1100 features a receiver machined from solid, ordnance-grade steel.

All receivers are polished in our "vibra-honing" process to ensure smooth performance. And every Model 1100 stock and fore-end is made from select American walnut for strength and good looks.

With all this going for it, it's no wonder the Remington Model 1100 has become a surefire legend.

Model 1100 Field Grade. The 20 gauge comes with Rem Choke and 2¾" or 3" chamber.

Model 1100 Special Field. Made for quick shouldering and natural pointability with a shorter overall length of 41", a lighter weight and English-style straight grip stock. In 12 and 20 gauge only, with Rem Choke, 2¾" chamber and 21" barrel.

Model 1100 Youth Guns. Shorter stocks and barrel lengths reduce size and weight for youths and smaller-framed adults, but in no way limit performance. Available in 20 gauge, with Rem Choke.

Sights And Safeties. Unless otherwise noted, all Model 1100 shotguns have metal bead front sight and quick access positive cross bolt safety.

Note: All models except Special Field and .410 bore have a 5-shot capacity with 3-shot plug. Special Field and .410 have a 4-shot capacity with 3-shot plug included.

Field To Target In A Snap

Now your long barrel goose gun can also become a great short barrel deer gun.

It just takes a quick, easy barrel change. And changing barrels means your gun is more versatile.

And our extra 12- and 20-gauge field barrels come equipped with Full, Modified and Improved Cylinder Rem™ Chokes—the only factory-installed screw-in choke system made of heat-treated, seamless stainless steel.

Model 11-87™ Extra Barrels. In 12 gauge only. Three lengths: 26", 28" and 30".

Model 870™ Deer Barrels. In 12 or 20 gauge with 20" Improved Cylinder barrel.

Note: New 12-gauge Rem Choke extra barrels will fit previously manufactured guns. But Model 11-87 barrels are not in any way interchangeable with Model 1100 barrels or guns.

New 20-gauge Rem Choke barrels may NOT readily fit pre-1987 Model 1100 LT shotguns. The fore-end may have to be modified by a gunsmith. This modification is NOT covered under Remington's Warranty Repair Policy. Barrels are interchangeable within gauge only.

REMINGTON CUSTOM GUN SHOP

At our Ilion firearms plant, there is an area set apart from the production lines. A series of well-lit, relatively quiet rooms where craftsmen practice a vanishing art.

This is the Remington Custom Gun Shop. Here, a dedicated group of artisans continues to build very special firearms largely by hand.

They work unhurriedly to meet the special orders of hunters and shooters who choose to express their passion for the shooting sports with the acquisition of an extraordinarily fine rifle or shotgun.

Using fine woods, precious metals, hand-selected and assembled components and painstaking methods, they make guns one at a time to fit the dimensions, the style, the taste and the experience of just one customer.

There is no higher achievement in the art of gunmaking. And for the shooting sports enthusiast, few things in life can rival the satisfaction of owning one of these magnificent firearms.

In the Remington Custom Gun Shop, almost anything is possible. To see some of those possibilities for yourself, send a check for $5 to Remington Arms Company, Eden Park Building, Wilmington, DE 19898 for your copy of our handsome, full-color Custom Gun Shop brochure.

The Legendary PARKER™ Returns

The original Parker™ is back. After years of speculation and anticipation, it will be returning to American fields and coverts in 1988. It will be built in 20-gauge AHE grade by The Parker Gun Works Division of Remington Arms Company in Ilion, N.Y. Production will be limited.

Original Parker shotguns earned their legendary stature in an era sometimes described as "the golden age of shotgunning," a period graced by the presence of many fine doubles, the Parker held top ranking in the affection and preference of American gunners. And for good reasons.

Even before their relative scarcity gave them "collector" status, basic Parker features brought to their proud owners:

☐ Classic, clean lines that were the epitome of what a fine shotgun should look like.

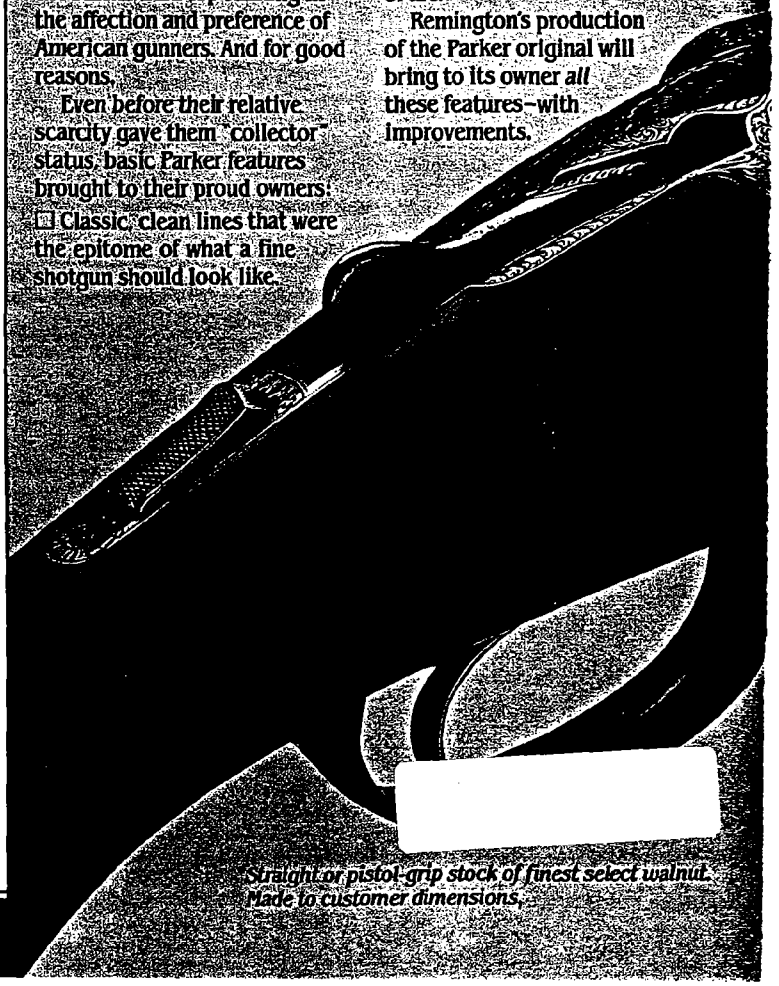
☐ Superb balance and handling qualities afield that seemed "to do your shooting for you."

☐ Dependable performance that earned them the nickname, "The Old Reliable."

☐ One-at-a-time production and hand-fitted "Old World" craftsmanship all the way down to the basic standard grades.

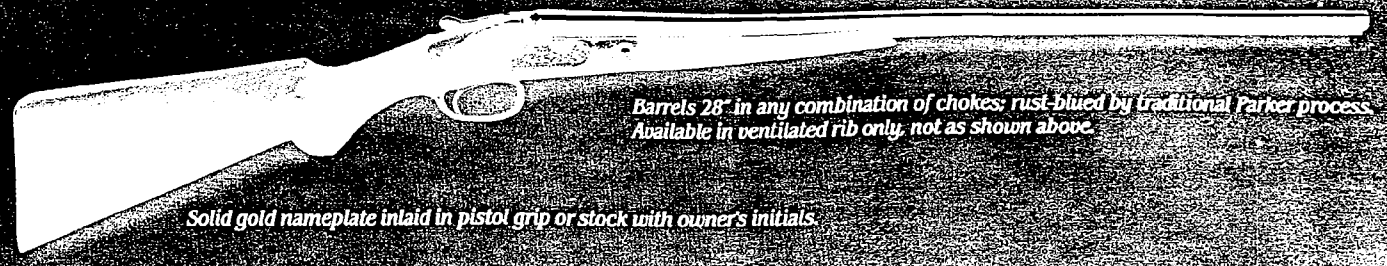
☐ In the higher grades, an esthetic level of wood figure, extensive custom engraving and fine-line checkering that made each gun an individual work of art.

Remington's production of the Parker original will bring to its owner *all* these features—with improvements.



Straight or pistol-grip stock of finest select walnut. Made to customer dimensions.

R2525711



Barrels 28" in any combination of chokes; rust-blued by traditional Parker process. Available in ventilated rib only, not as shown above.

Solid gold nameplate inlaid in pistol grip or stock with owner's initials.

Without sacrificing any of its classic visual elegance and "between-the-hands" feel, Remington has given "The Old Reliable" even greater strength and performance reliability. Modern, heat-treated metals are used throughout. A completely new, single selective trigger mechanism not only improves functional reliability, but offers exceptionally fast lock time.

A new and simplified design increases automatic ejector reliability.

Beyond these useful but inconspicuous refinements, the new Parker retains all the timeless qualities of fit, feel and finish of the vintage originals. In the hands of a proud owner, it will continue to allow the classic reply to an admiring comment: "It's not just a shotgun. It's a *Parker*."

Ivory front and mid beads.

Matching splinter or beavertail fore-end.

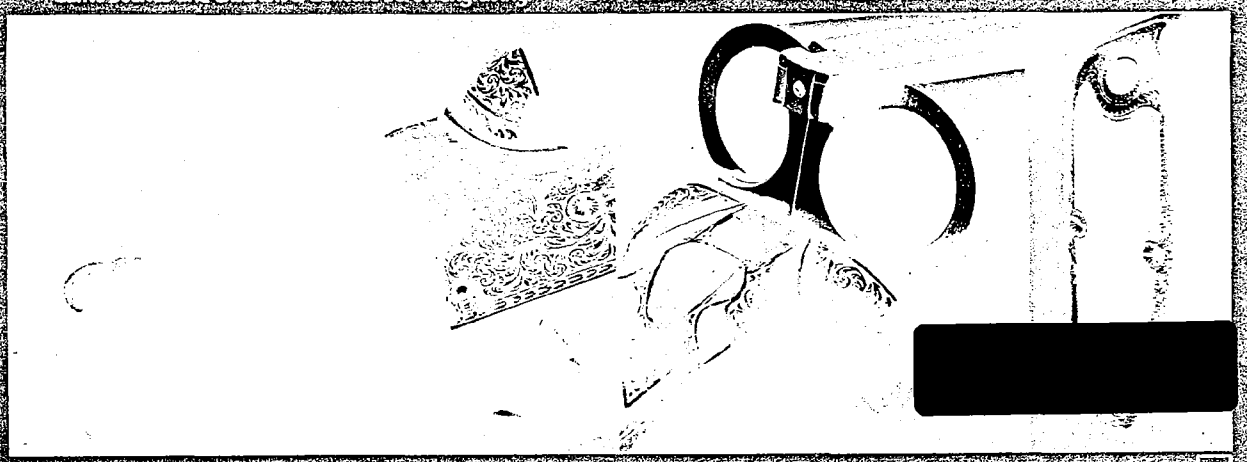
Initially available in ventilated rib only, not as shown above.

Case-hardened receiver with natural hue and luster.

Game scenes and extensive, delicate scroll engraving.

2¾" chambers.

Rubber recoil pad or skeleton steel butt plate.



This vintage Parker is shown for illustrative purposes only. Engraving and checkering designs will vary.

R2525712

Custom Gun Shop

Tradition directs that the craftsman sign his work. Look carefully and you'll find the mark of the gunmaker discreetly placed on every custom gun.

In a world of mass production, the Remington Custom Gun Shop affords you the rare opportunity to take the road less traveled.

Because here, you'll make the choices that help create a special firearm, yours and yours alone.

Beginning with one of the classic Remington actions, Custom Shop craftsmen refine the specifications and dimensions to meet your precise needs.

Then they add the details, the checkering, the engraving and the finish that give that firearm a one-of-a-kind look and feel.

You'll choose your preferred stock style and wood from three exquisite walnut grades. You can specify the degree of checkering and engraving, all of which is painstakingly done by hand. You decide on the metal finish, the butt plate or recoil pad, the grip cap and countless other features that make your gun a work of art.

On these pages, you'll see some of the firearms recently completed by the artisans of the Remington Custom Gun Shop.

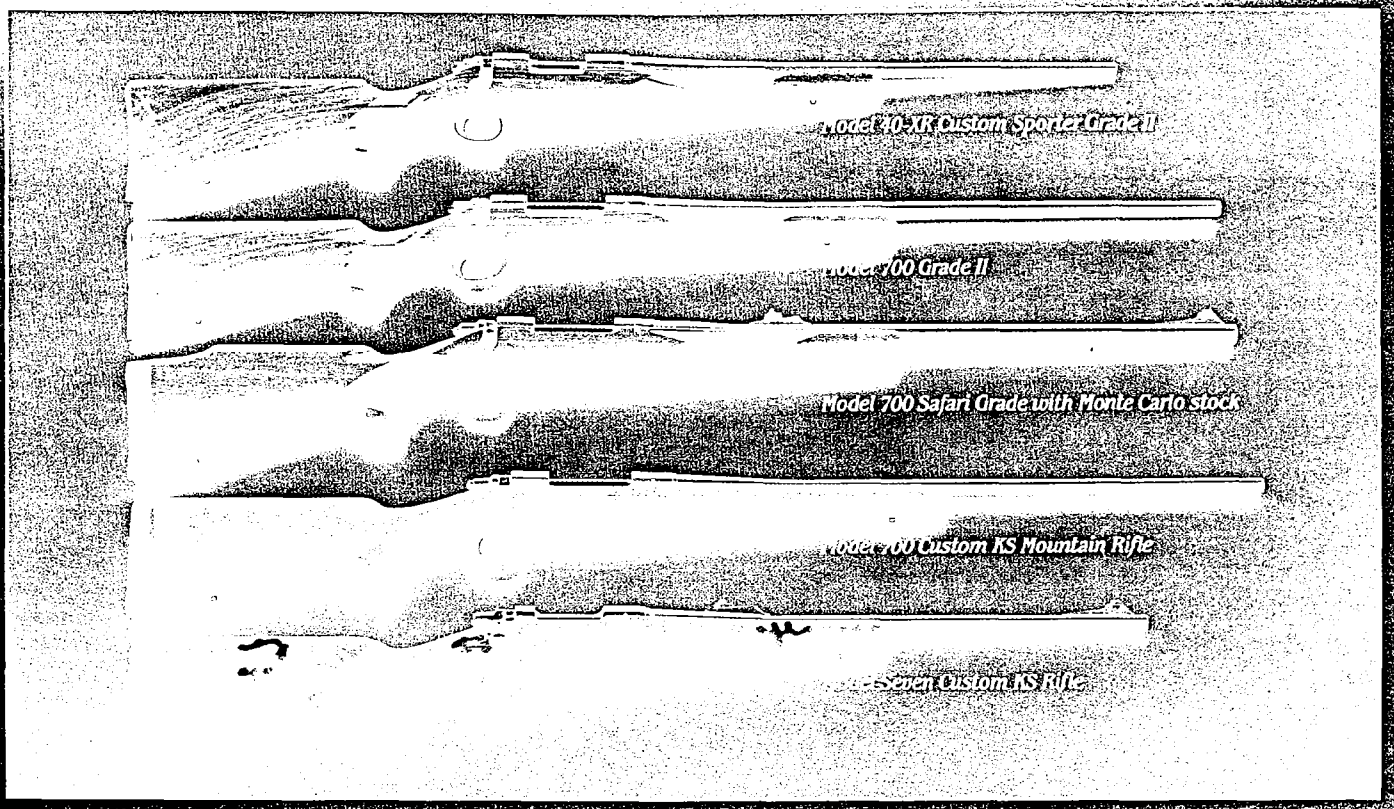
And as proud as we are of these guns, we know there are people who are even prouder:

Their new owners.

Model XP-100 Custom with wood stock.

Model XP-100™ Custom Long Range Pistol.
With a stock crafted from select walnut, the XP-100 is a favorite of metallic silhouette shooters. It also has more than enough knock-down power for the serious hunter, in .223 Remington, 7mm-08 Remington and .35 Remington calibers.

R2525713



Model 11-87™ F Grade Autoloading Shotgun. America's favorite shotgun receives very special attention, with flawless hand-cut checkering and skilled engraving that covers most metal surfaces. More than 150 hours of dedicated handwork is needed to assemble and complete this exceptional firearm.

Model 40-XR™ Custom Sporter Grade II. Built by hand to be the finest .22 rimfire ever made. It offers most of the options of the Model 700 Custom, grades I through IV.

Model 700™ Grade II Bolt Action Rifle. Hand-rubbed English walnut stock. The distinctive point-pattern checkering is cut by hand, one line at a time. The barrel is chambered, crowned and fitted by hand as well. The Model 700 is available in four grades in 26 different calibers—many with left-hand versions.

Model 700 Safari Grade. Our renowned bolt action, in calibers that allow you to face the world's largest, most dangerous game animals with confidence: .458 Win. magnum, 8mm Remington magnum or .375 H&H magnum. The Monte Carlo stock features a cheekpiece, rosewood grip cap and fore-end tip. The Safari grade rifles are also available with a Classic straight comb stock.

Model 700 Custom KS Mountain Rifle. The optimum combination of strength, accuracy and light weight. The stock is hand-laid-up Kevlar® so this rifle weighs in at less than seven pounds even in magnum calibers. And the stock is unaffected by weather changes, so a sighted-in rifle stays sighted in no matter what the temperature or humidity. Truly a world-class big game rifle.

Model Seven™ Custom KS Rifle. The same proven bolt action design as our Model 700, but in streamlined dimensions that make it even lighter and easier to handle. The classic Kevlar stock features a straight comb cheekpiece, European knob pistol grip and 1" black Old English recoil pad. Weight: just 5¾ pounds. Available in .35 Remington and .350 Remington magnum only.

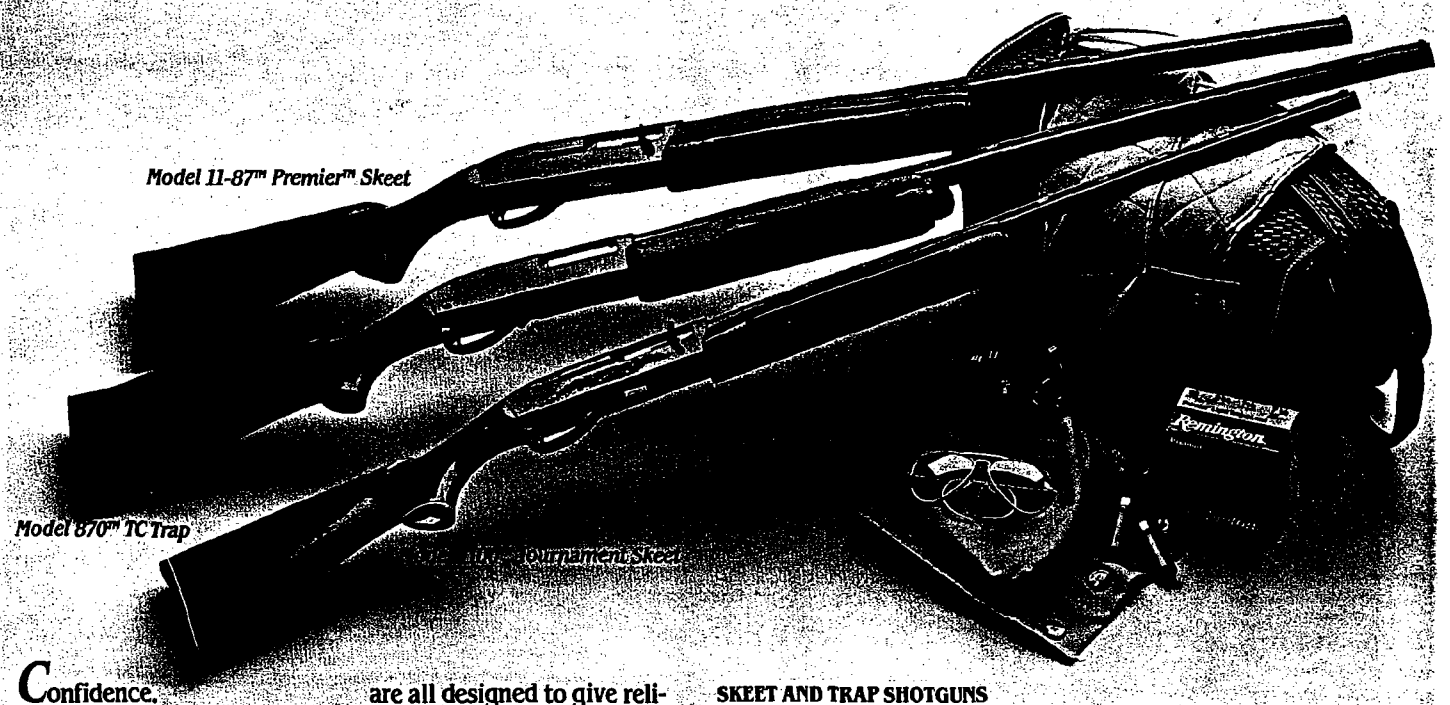
TARGET SHOTGUNS

Step Up To The Line With Confidence



Model 11-87™ Premier™ Skeet

Model 870™ TC Trap

Model 1100™ Tournament Skeet

Confidence.

It's something all champion shooters have in common. Confidence in themselves. In their loads. And most of all, in their shotguns.

Now Remington offers three shotguns that will increase the confidence of any shooter.

The Remington Premier™ Trap and Premier Skeet are designed with all the balance, pointability and soft recoil for which Remington autoloaders are famous. Along with features that make the Model 11-87™ twice as durable as any autoloading shotgun we've ever made.

The magazine tube is stainless steel, to resist rust and corrosion. And the extractor, new firing-pin spring, heat-treated piston and piston seal are all designed to give reliable, maintenance-free operation.

Or if you prefer a pump action for shooting clay targets, pick up a newly designed Remington Model 870™ TC Trap. It gives trap shooters the same dependable pump action that has made the 870 the choice of more than 4 million shotgunners worldwide.

But no matter what your choice, both the Model 11-87 and the Model 870 TC Trap offer overbored fixed or Rem™ Choke barrels. And all three Remington target shotguns feature American walnut stocks and fore-ends, with tournament-grade cut checkering, handsome satin finishes and tournament-style trap or skeet vent ribs.

SKEET AND TRAP SHOTGUNS

Gauge	Description	Chambers	Vent Rib Barrel Length & Choke	Overall Length	Avg. Wt. (lbs.)	Order Nos.
12	11-87 Premier™ Skeet	2¾"	26" Skeet	46"	7¾	9880★
12	11-87 Premier Skeet	2¾"	26" Rem™ Choke	46"	7¾	9882
12	11-87 Premier Trap	2¾"	30" Trap Full	50½"	8¼	9876★
12	11-87 Premier Trap (Monte Carlo)	2¾"	30" Full Choke	50½"	8¼	9878★
12	11-87 Premier Trap	2¾"	30" Rem Choke	50½"	8¼	9886
12	11-87 Premier Trap (Monte Carlo)	2¾"	30" Rem Choke	50½"	8¼	9888
12	870 TC Trap	2¾"	30" Full Choke	51"	8"	4938★
12	870 TC Trap	2¾"	30" Rem Choke	51"	8"	6977
12	870 TC Trap (Monte Carlo)	2¾"	30" Rem Choke	51"	8¼	6979
12	870 TC Trap (Monte Carlo)	2¾"	30" Full Choke	51"	8¼	4912★
20	1100 Tournament Skeet	2¾"	26" Rem Choke	46"	6¾	9605
28	1100 Tournament Skeet	2¾"	25" Skeet	45"	6½	5282
410	1100 Tournament Skeet	2½"	25" Skeet	45"	7¼	5300

All 11-87 and 870 TC Trap barrels are overbored, reducing recoil and improving patterning.

Shell for best PATTERN: Model 11-87 Skeet and Trap barrels are designed for optimal performance with target loads and therefore are not pressure compensated unless a Premier Field Grade 11-87 extra barrel. Model 11-87 barrels are not interchangeable with Model 1100™ barrels.

See page 11 for information on extra barrels.

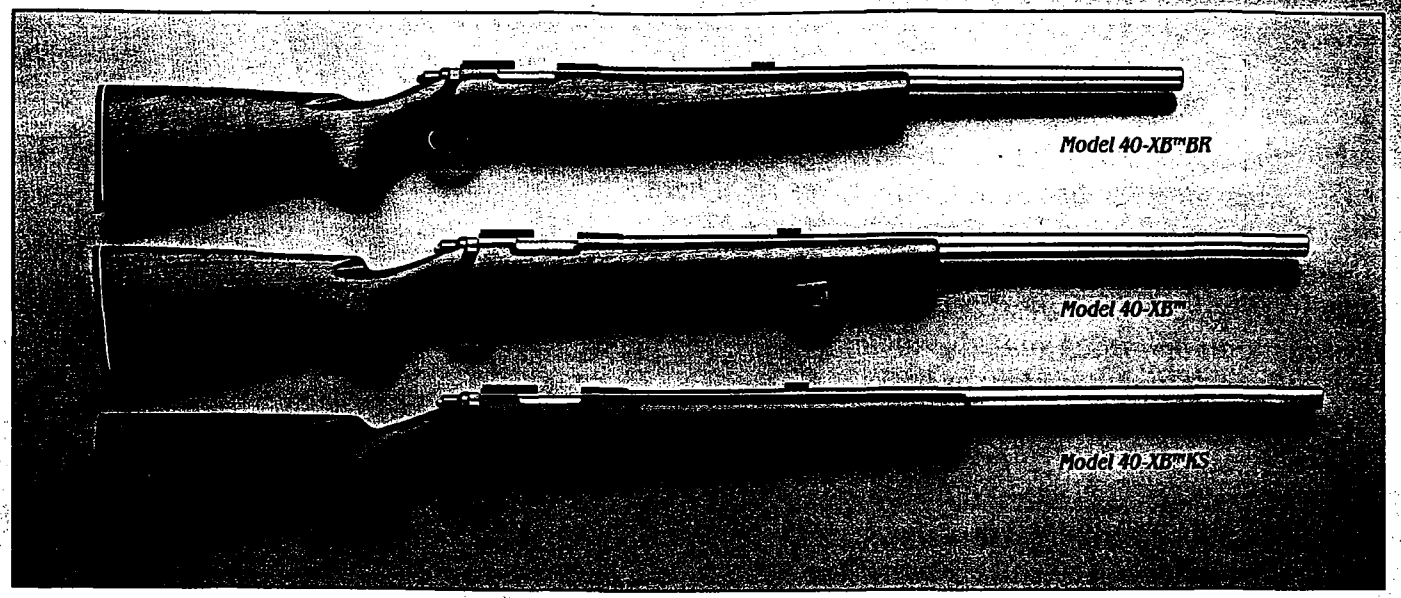
TARGET RIFLES

The Most Accurate Production Rifles Made



The ability to maintain accuracy. That's the primary consideration of any shooter investing in a new target rifle. And that's why more shooters consider Remington the only brand of target rifle to buy.

In fact, the Remington name dominates at national benchrest events across the country. That's because in any event—benchrest, metallic silhouette or position target—Remington provides the legendary out-of-the-box accuracy, crisp triggers and faster lock times champion shooters demand.

Silhouette shooters who want an accurate, single shot, match-quality pistol will appreciate the Remington Model XP-100™. The stock is one piece of Zytel™ nylon. The competition-proven action, match-type trigger and drilled and tapped receiver are standard.

And Remington target rifles, or the Remington XP-100 target pistol, are manufactured with all the strength needed to not only attain—but maintain—accuracy round after round and event after event.

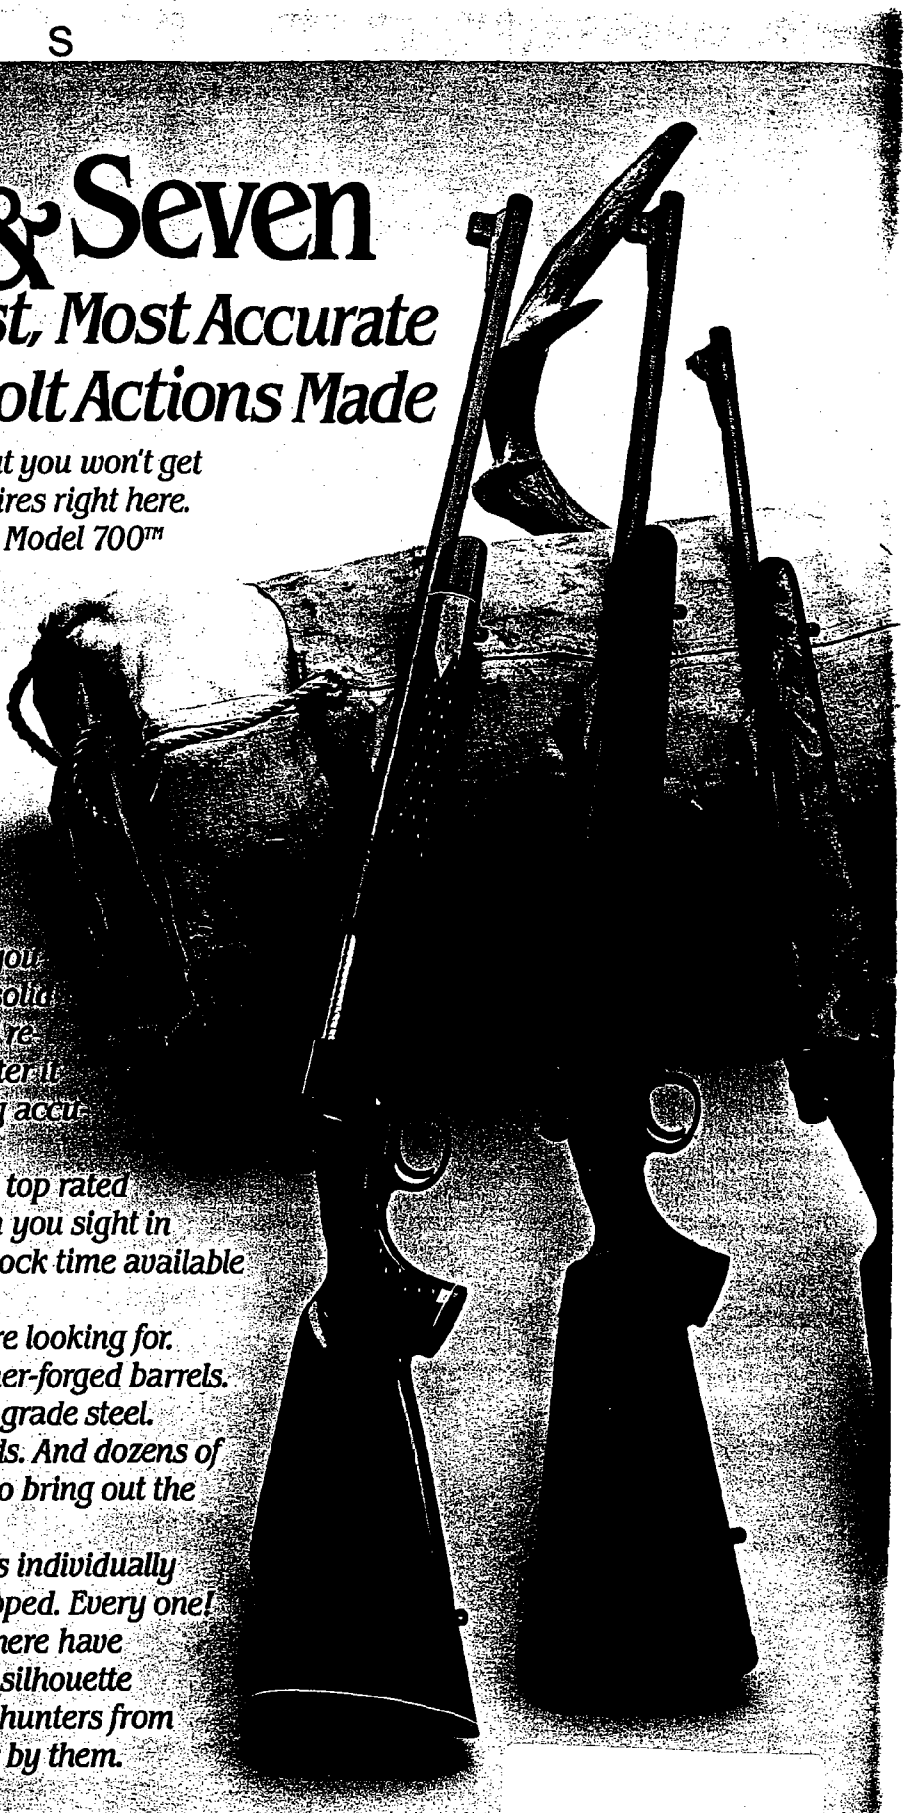
Model 700 & Seven

The Strongest, Most Accurate Out-Of-The-Box Bolt Actions Made



You can easily pay more for a rifle, but you won't get more rifle than the bolt action centerfires right here.

These are the legendary Remington Model 700™ and Model Seven™ rifles. Put simply, they're the strongest, most accurate production-line rifles available today.

You won't find gimmicks or tricks on these rifles. What you will find is proven design, classic good looks and a dedicated attention to finish and detail that makes each of these rifles a purebred in accuracy, handling and reliability.

Each Remington bolt action offers you the renowned 3 rings of steel lockup: solid steel in the bolt face, barrel and milled receiver surround the cartridge and center it in alignment with the bore for startling accuracy and unsurpassed strength.

Their crisp triggers are consistently top rated among all production rifles. And when you sight in on your target, you'll have the fastest lock time available today in a production rifle.

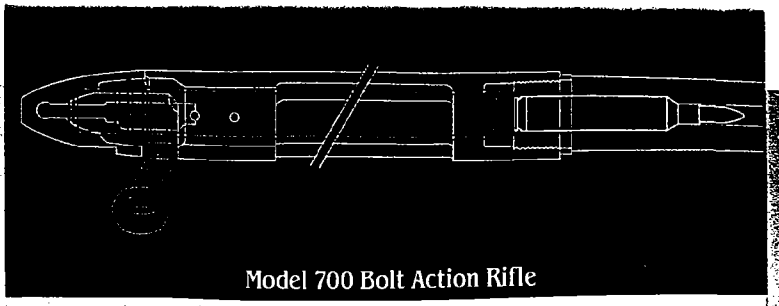
You'll also have all the features you're looking for. Select American walnut stocks. Hammer-forged barrels. Receivers milled from solid, ordnance-grade steel. Rich, deep-cut checkering. Swivel studs. And dozens of subtle refinements evolved over time to bring out the best in you.

Every Model 700 and Model Seven is individually inspected and test fired before it's shipped. Every one!

No wonder outdoor writers everywhere have praised them. National benchrest and silhouette champions have won with them. And hunters from Albuquerque to the Arctic Circle swear by them.

All RS and FS rifles feature non-glare matte finish on exposed metal surfaces.

R2525717



Model 700 Bolt Action Rifle

Synthetic Stocks

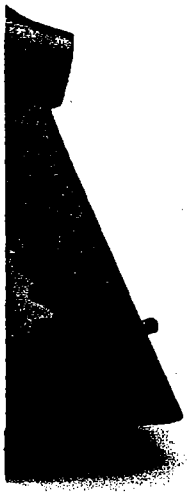
We've combined the flawless bolt actions of our Model 700™ and Model Seven™ with stocks of fiberglass reinforced with Du Pont Kevlar® and of Rynite®, a tough thermoplastic resin developed by Du Pont and available only from Remington.

Result? Unwavering accuracy—no matter what the weather. Because these new stocks won't absorb moisture or react to changes in temperature that can throw off a rifle's point of impact.

Through heat, cold, rain, snow or humidity, a sighted-in rifle stays that way. With no movement. No surprises.

And you'll find that these new stocks add nothing to the weight of the rifle. (In fact, the fiberglass stock, reinforced with Kevlar, weighs almost one pound less than comparable wood-stocked models.)

They're stronger. Tougher. Virtually indestructible. And they'll absorb more felt recoil, which is important when you're shooting a lightweight, large-caliber firearm.



Model 700 RS.
These right-hand long-action rifles are available in three game-stopping calibers. Stocks are Du Pont Rynite (RS), with a textured finish from fore-end to butt except for the cheekpiece, which is smoothed for comfort. With a historic "Remington Arms" insignia on the grip cap. A hinged floorplate and iron sights.

Model 700 FS.
The Kevlar-reinforced fiberglass stock (FS) version of our Model 700. Choose from three right-hand or three left-hand calibers. The hammer-forged barrel features iron sights, and the rifle has a blind magazine.

Model Seven FS.
The lightest, most compact of the Remington synthetic stock rifles—but with plenty of knock-down power. Available in three right-hand calibers. With hinged floorplate, tapered barrel, ramp front sight, adjustable rear sight. Textured stock.

The Rynite stock feels solid throughout, with inletting held to extremely close tolerances. The fiberglass stock is laid up and bedded by hand, with Kevlar reinforcement at all critical stress and bedding points. Yet with all the technology in these rifles, you won't have to pay custom gun prices to own one.

All FS and RS models have straight-line combs, solid black English-style recoil pads and sling swivel studs. Choice of gray/black or camo finishes.*

Model 700™

Centerfires For Everything From Prairie Dogs To 10-Pointers

Model 700™ Mountain Rifle.

New for 1988—.243 Win., 7mm-08 Remington and .308 Win.

At just 6¾ lbs.* the Mountain Rifle answers the demand by many knowledgeable riflemen for a full-size rifle at an easier-to-carry weight. By tapering the barrel and slimming down the stock, we've given it superb handling characteristics with no loss in accuracy or strength.

The pistol grip is pitched lower to help keep your wrist straight for better shot placement. The American walnut stock has a satin finish, and features 20-line deep-cut checkering and a smooth, trim cheekpiece to position the eye properly. Includes a hinged floorplate, sling swivel studs and butt pad. Drilled and tapped for scope mounting.

Model 700 BDL.

The bolt action that's proven its game-getting qualities all over the world. It combines outstanding performance, perfect proportions and handsome detailing—and offers it all in both right- and left-hand models.

A Monte Carlo American walnut stock has a high-gloss finish, and features positive-cut skipline checkering to add a distinctive touch. Hinged floorplate, sling swivel studs, hooded ramp front sight and adjustable rear sight are also featured on the Model 700 BDL.

Model 700 Varmint Special.

All the styling and features of our Model 700 BDL, but with a barrel that meets the special demands of the dedicated varmint hunter. It's a heavier, hammer-forged barrel that reduces vibration and delivers extraordinary accuracy—throughout a whole day's shooting.

Model 700 ADL.

It's a Model 700 all right, but we've limited some of the extra features to put pure 700 performance in your hands at a better price. You'll still appreciate the satin-finished walnut stock, the cut checkering, the sling swivel studs—and the accuracy and reliability of the finest bolt action rifle at an affordable price.

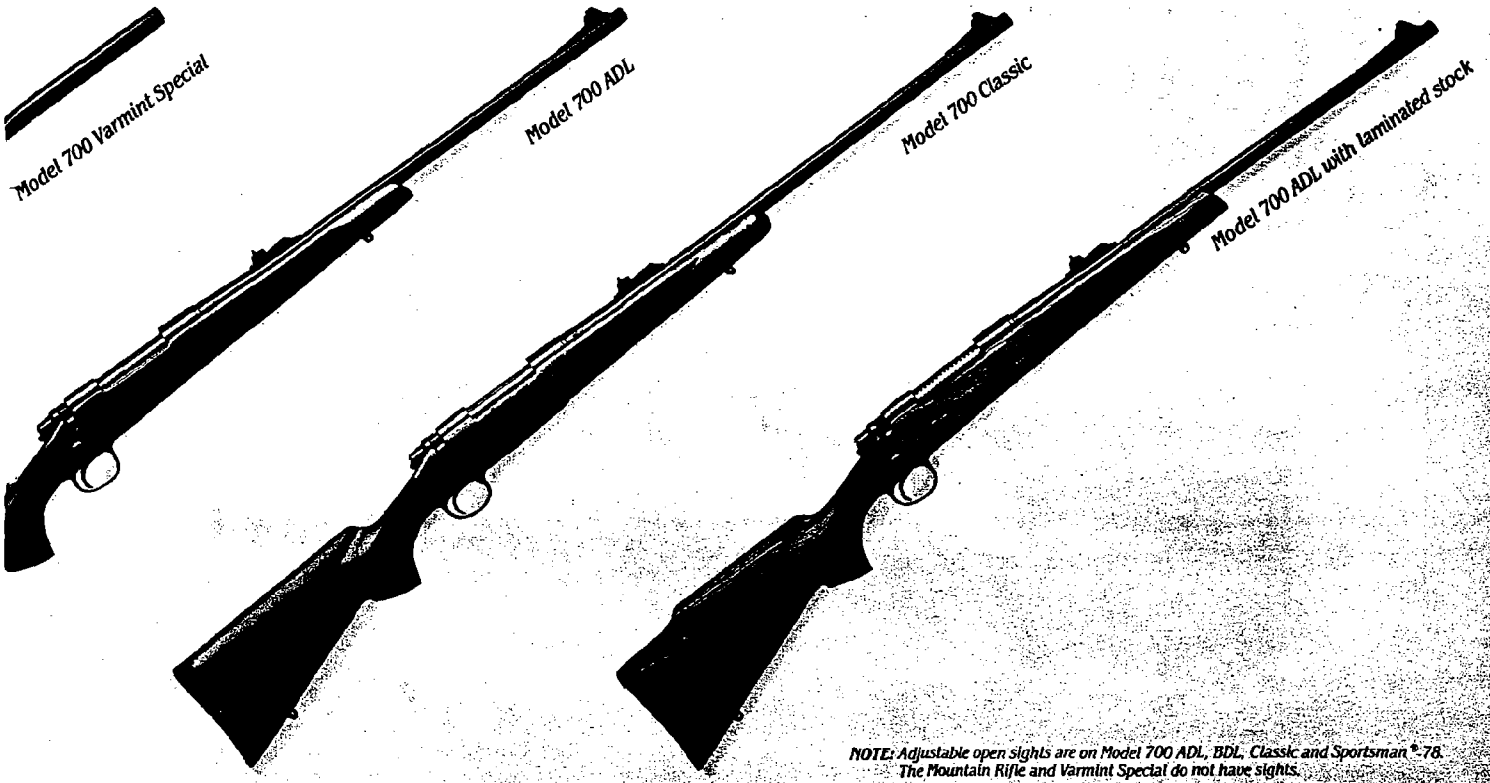
And there's also a new Model 700 ADL laminated stock available in 30-06 caliber.

Model 700 Classic.

For 1988, Remington again offers its 700 Classic, this year chambered for the .35 Whelen cartridge. Purists and handloading enthusiasts will recognize the .35 Whelen as one of the most talked-about "wildcat" loads ever. (And this year, Remington will offer the first factory-loaded .35 Whelen cartridges. See page 23 for details and ballistics.)

A straight-line stock with cut checkering, satin finish, swivel studs and hinged floorplate give this year's Classic all the good looks and pure shootability you'd expect from this limited-edition series.

R2525719



NOTE: Adjustable open sights are on Model 700 ADL, BDL, Classic and Sportsman® 78. The Mountain Rifle and Varmint Special do not have sights.

SPECIAL CENTERFIRE OFFERINGS

Model Seven™ Walnut Stock. For hunters who want the best of both worlds, we offer the short-action Model Seven, a perfect blending of big game power and streamlined dimensions. Its styling is classic, with a satin-finished American walnut stock, cut checkering and Schnabel fore-end.

Choose from five popular calibers—.223 Remington, .243 Win., 6mm Remington, .308 Win. or 7mm-08 Remington—each with 18½" barrel, hinged floorplate and ramp front and adjustable rear sights. A brown butt pad and sling swivel studs complete the package.

Model 700™ Gun Kit. This kit brings you our legendary Model 700 bolt action but with a stock that allows you to finish the wood to your liking. All metal components are completely polished and blued, and the stock is factory-inletted. With an instruction manual and three checkering templates, you finish it and make it uniquely yours.

The Model 700 Gun Kit also includes iron sights, swivel studs—and, when you finish, a lot of satisfaction.

Sportsman® Model 78™ Bolt Action Rifle. The major performance features found on the Sportsman Model 78 are EXACTLY the same as on our other Model 700 bolt actions—but it's competitively priced. It has the same 3 rings of steel that surround the cartridge head, and the barrels and receivers are machined from solid billets of ordnance-grade steel.

Available in .223 Remington, .243 Win., .270 Win., .308 Win. and .30-06 calibers.

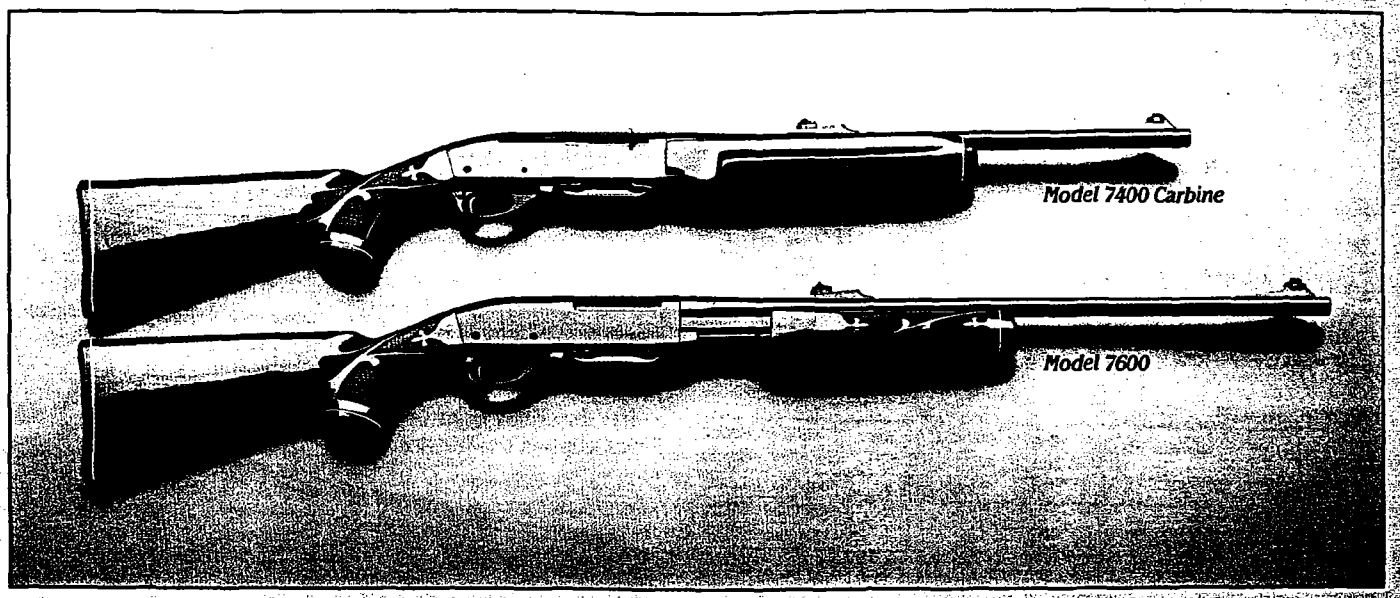
Model 7400 & 7600
Pumps And Autoloaders



If your first shot is well placed, you won't need a second. But when you've got to get off a second shot, these are two actions that'll really come through for you.

Our pump action, for example, uses the same non-binding, smooth-as-silk twin-action bars that have made our Model 870™ the best-selling shotgun in history.

And our autoloader has a unique gas-metering system that is designed for reliability.

But no matter which action you prefer, you'll get exceptional accuracy, proven performance and the thorough attention to detail that characterizes every Remington big game rifle.

Receivers are machined from solid steel. Straight-line American walnut stocks have a high-gloss RKW finish, with styled checkering. A removable four-shot magazine clip lets you load or unload with ease.

Model 7400™ Autoloader. Sleek good looks and right-on-the-money accuracy and reliability. Superb balance and pointability, with the proven gas system that softens felt recoil to keep you on target for following shots. Includes adjustable sights. Choice of six favorite big game calibers.

Model 7600™ Pump. The same exceptional balance and feel as our Model 7400, but with the pump action that's been a favorite of veteran hunters for years. Twin-action bars eject and chamber a second cartridge faster than you can say "Whitetail!" Includes adjustable sights. Choose from six calibers, including 30-06 in carbine dimensions with 18½" barrels.

MODEL 7400™ AND MODEL 7600™

35 Whelen	22"	42"	16"	8		4664★

Stock Dimensions: 13 5/16" length of pull; 1 5/16" drop at heel; 1 9/16" drop at comb. Model 7600 also accepts 30-06 and 308 Accelerator® cartridges. Each has a positive cross-bolt safety.
★ New for 1988.

Finally! A Factory-Loaded .35 Whelen Cartridge

For years, it was a cartridge only dedicated reloaders and wildcatters knew about. Now this long-standing favorite will be factory loaded for the first time. And only Remington has it!

The large-bore .35 Whelen is made to order for North American big game, with its proven accuracy and one-shot knockdown power. It's available with 200-grain pointed or 250-grain soft point bullet.

(For more information, see pages 30, 31 and 35.)

To handle this cartridge, we've chambered our Model 7600 pump action rifle and our 1988 Model 700 Classic to create two potent new big game packages.

R2525722

RIMFIRE RIFLES

You can't beat the Remington system. We make the rifles and the cartridges. We make them perfect for each other. No one else in America does. And no other manufacturer approaches the level of strength, accuracy and quality that has distinguished Remington .22s for generations.

They're accurate, well made and a lot of gun for the money. So no matter which .22 you put with what ammo, you've picked a combination made for each other.

They're Made For Each Other

RIMFIRE RIFLES

Model	Action	Barrel Length	Overall Length	Average Wt. (lbs.)	Magazine Capacity	Order Number
541-T	Bolt	24"	42½"	5⅞	5-Shot Clip*	9824
581-S	Bolt	24"	42½"	5⅞	5-Shot Clip*	9848
552 BDL Deluxe Speedmaster®	Auto	21"	40"	5¾	15 Long Rifle	5604
572 BDL Deluxe Fieldmaster®	Pump	21"	40"	5½	15 Long Rifle	5622

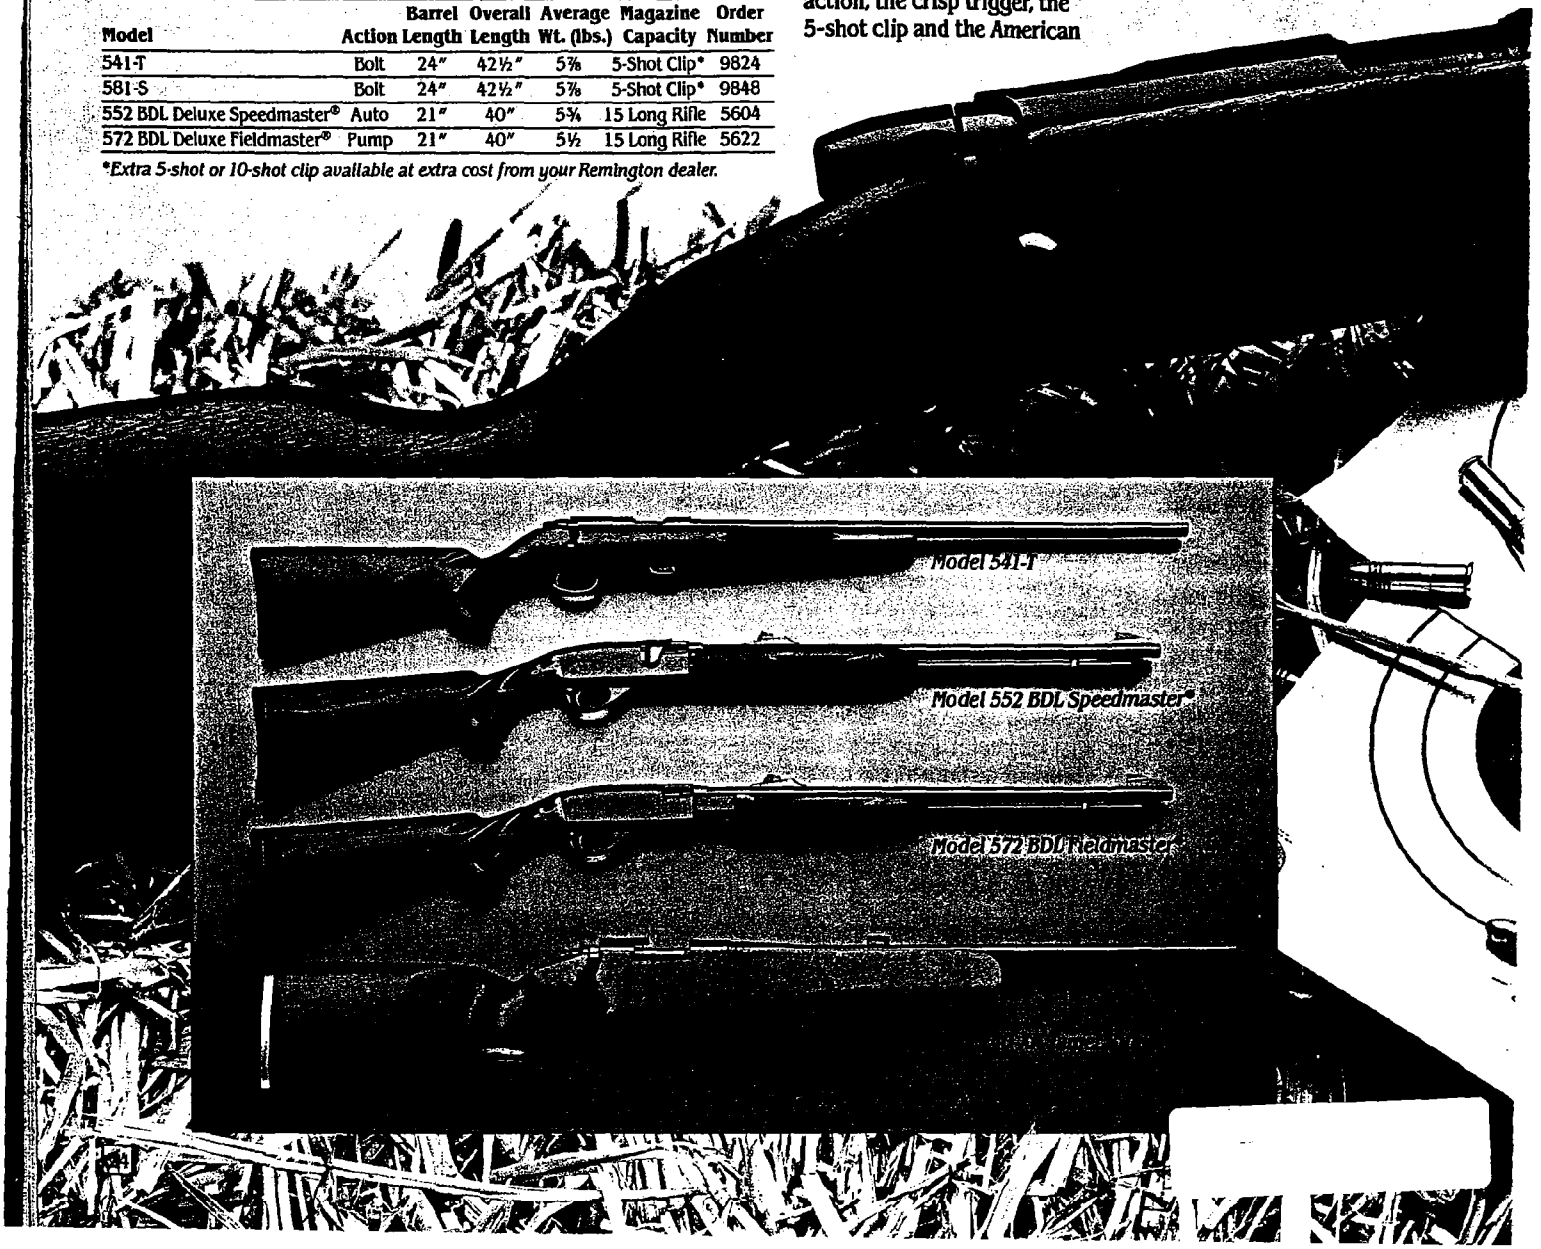
**Extra 5-shot or 10-shot clip available at extra cost from your Remington dealer.*

Sportsman® Model 581-S™ Rimfire Rifle.
A strong, dependable firearm choice for the most experienced shooter or more recent beginner. Run shorts, long, or long-rifle cartridges through the 24" barrel all day. The full-sized stock cradles comfortably against your cheek. Standard 5-shot clip. Extra clips available from dealers.

Model 541-T™ Bolt Action.
The T stands for target. That's how accurate this gun is. If you're serious about shooting, you'll appreciate the fine bolt action, the crisp trigger, the 5-shot clip and the American walnut stock with detailed, deep-cut checkering. It's drilled and tapped for scope mounting.

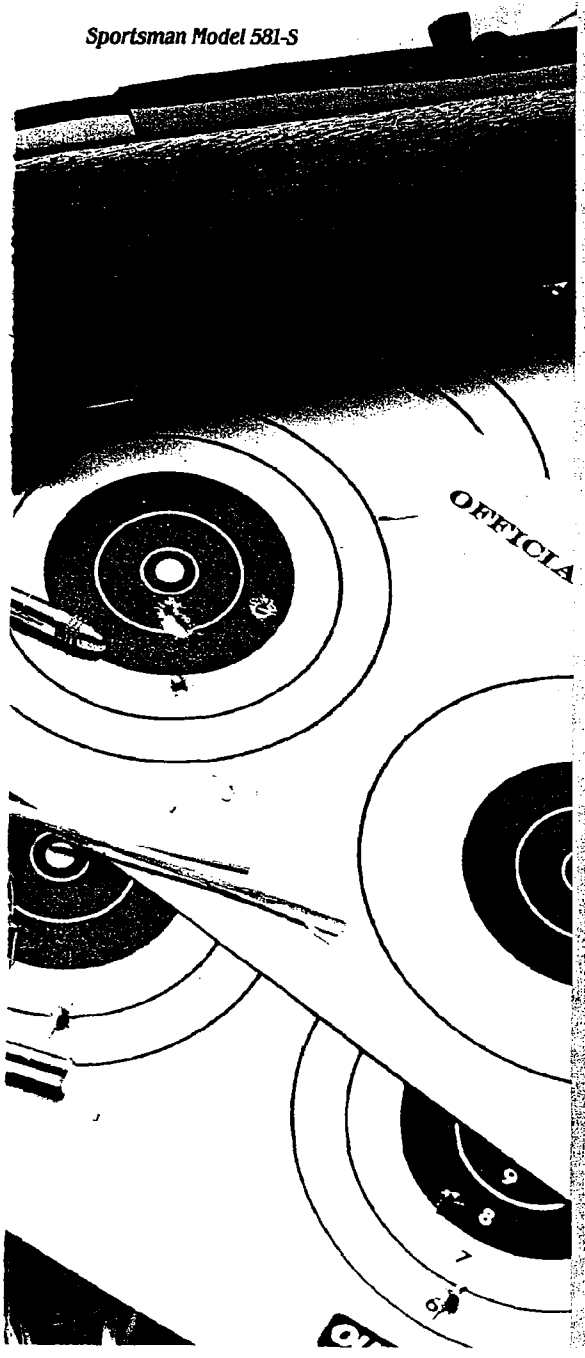
Model 572™ BDL Pump Action.
The famous Remington Fieldmaster® is the only .22 pump action rifle still made in America. It has a satin-finished walnut stock, custom checkering and big game rifle sights.

Model 552™ BDL Autoloader.
The same styling as our famous pump action rifles, only in a semi-automatic version. Round after round, it delivers consistent performance.



Model 40-XR™
Bolt Action Target.
Whatever your event, this rifle gives you the best out-of-the-box accuracy. A crisp trigger. And the fastest lock time. It's assembled, adjusted and tested by the dedicated craftsmen from our Custom Gun Shop. Refer to the table on page 17 for more details.

Sportsman Model 581-S



RIMFIRE AMMUNITION

We load our big game quality and know-how into every cartridge. Even .22s.

Hyper Velocity Yellow Jacket®.
Maybe the higher muzzle velocity is why this is the fastest-selling hyper velocity .22 on the market. 245 fps faster than standard .22s. Needless to say, the hollow point bullets make for dramatic on-target energy.

Hyper Velocity Viper™.
The same truncated cone bullet design as the Yellow Jacket, it has tremendous energy and velocity.

High Velocity .22 Cartridges.
Perfect for small game or plinking. Cartridges are coated with a special lubricant. Golden™ bullets chamber easily, stay clean and prevent leading or fouling in barrels. Delivers consistently tight groups.

Standard Velocity Target .22s.
Our standard target loads with their consistent velocity and solid lead bullets give you increased accuracy for paper punching and silhouette shooting.

CBEE 22™.
This may be the quietest rimfire round ever developed. The new Remington CBEE 22 has the velocity (700 fps) and quietness of an airgun, with the impact of a .22 bullet. It's perfect for smaller varmints. Available in short and long specs.

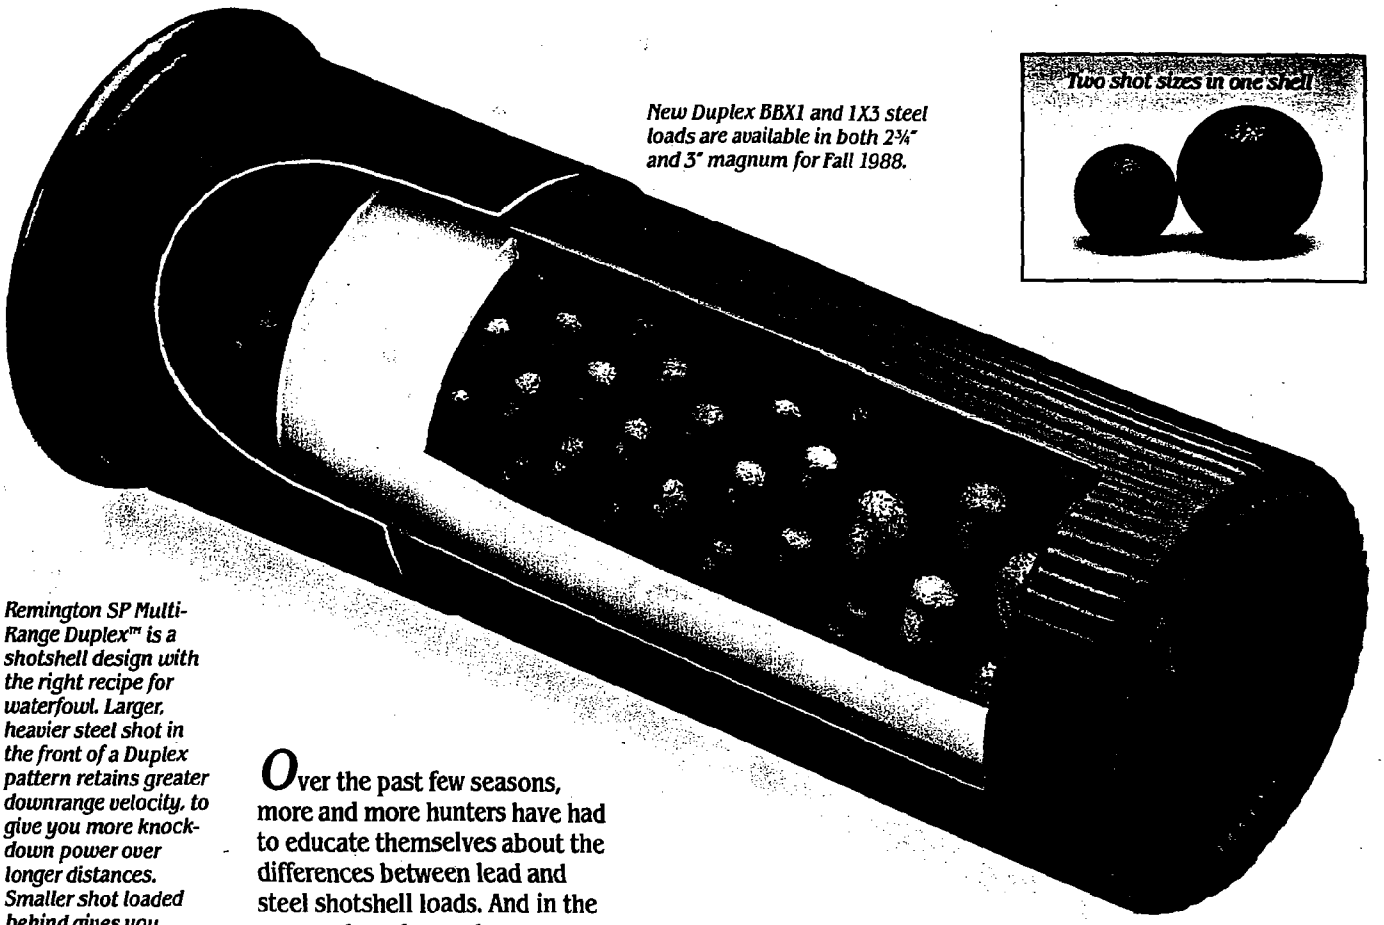
STEEL

We Make Every Shot Count



New Duplex BBX1 and 1X3 steel loads are available in both 2¾" and 3" magnum for Fall 1988.

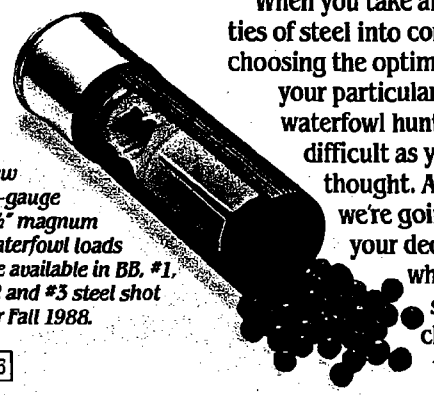
Remington SP Multi-Range Duplex™ is a shotshell design with the right recipe for waterfowl. Larger, heavier steel shot in the front of a Duplex pattern retains greater downrange velocity, to give you more knock-down power over longer distances. Smaller shot loaded behind gives you denser, more uniform patterns at closer range.

Note: For best all-around results with steel, Remington recommends a Modified choke for improved results. Full choke does not increase pattern density.

Over the past few seasons, more and more hunters have had to educate themselves about the differences between lead and steel shotshell loads. And in the process have learned some very surprising and satisfactory qualities about steel shot.

Sure, steel performs differently than lead. Steel is lighter than lead. But, on the other hand, it patterns better. And also produces higher muzzle velocities than lead.

When you take all the qualities of steel into consideration, choosing the optimum load for your particular brand of waterfowl hunting isn't as difficult as you may have thought. And this year, we're going to make your decision about which brand of steel load to choose easier than ever.



New 10-gauge 3½" magnum waterfowl loads are available in BB, #1, #2 and #3 steel shot for Fall 1988.

That's because for 1988, Remington continues to offer the most innovative steel loads in the industry.

Last year we introduced a dozen new steel shotshell offerings—including the revolutionary Remington SP MultiRange Duplex™. This year, we're introducing a dozen more, including new Remington 10-gauge steel shot waterfowl loads.

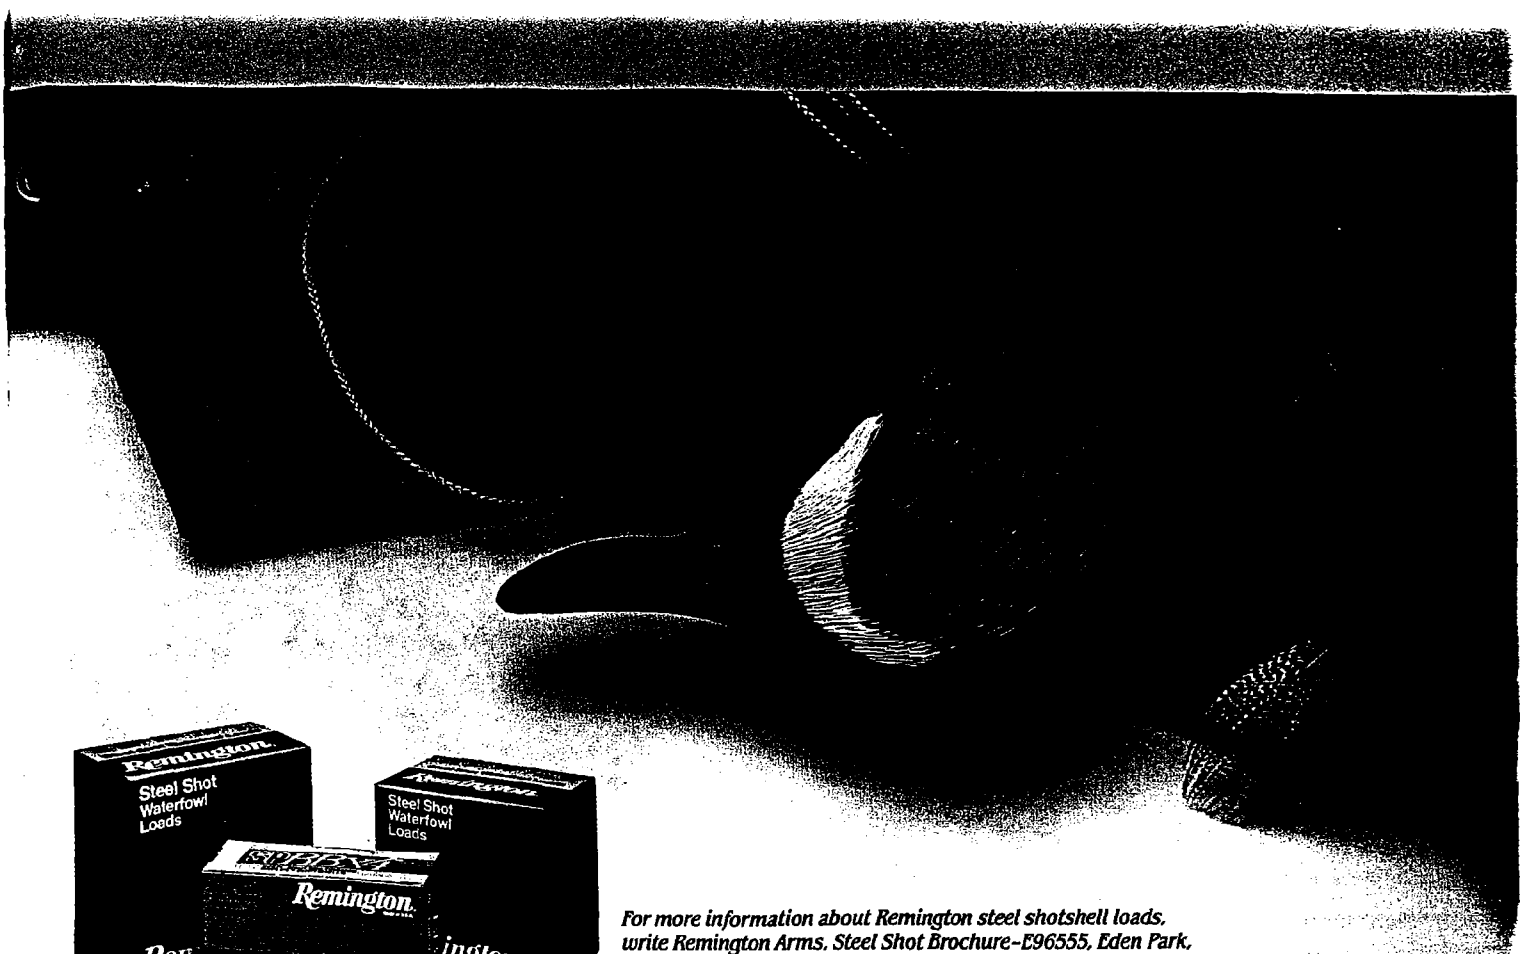
These 10-gauge 3½" magnum loads will be available in BB, #1, #2 and #3 steel shot for the 1988 waterfowl season.

And this fall we're expanding our line of Duplex shotshells with new BBX1 and 1X3 12-gauge steel loads in 2¾" and 3" magnums. In addition, #3 steel shot will now be available in a standard 12-gauge 1⅛-oz. 2¾" load, and 1¼-oz. 2¾" and 3" magnums.

We didn't forget 20-gauge waterfowlers, either. A 1-oz. #3 steel shot load will be offered in 3" magnum. It's just the right shell to use over shorter distances on fast-moving ducks.

So this year, when you're choosing a duck or goose load, choose the brand that continues to offer you the most technically advanced steel shotshells. Choose Remington.

R2525725



For more information about Remington steel shotshell loads, write Remington Arms, Steel Shot Brochure-E96555, Eden Park, Wilmington, DE 19898. Or visit your nearby Remington dealer and see our new steel shot conversion chart.

LEAD

A Continued Pattern Of Success

New for 1988, the lead shot Duplex line has increased by four. With 2X4 and 4X6 2¾" and 3" magnums now available for waterfowl, turkey and upland game hunters.

SP MultiRange Duplex™. If hunters were at all skeptical when we introduced the revolutionary Remington SP MultiRange Duplex shells last year, one squeeze of the trigger convinced them how exceptionally well these loads perform in the field.

Duplex is the first factory-loaded round with two shot sizes in every shell. Larger shot for more knock-down power, and smaller shot for improved patterns. So you always have the right load for long shots, close shots and every shot in between. This perfect blend of power and patterning, along with the unique olive-drab hull and nonreflective base, has also made these Duplex loads a favorite among turkey and waterfowl hunters.

Premier™. Our highest-grade shotshell line. Premier features specially selected shot, which is Copper-Lokt™ to ensure true flight and better patterns. The Power Piston® wad is custom matched to the load. Extended range, magnum and extra-long-range loads have a granulated polyethylene buffer to doubly protect against pellet deformation.

Nitro Mag®. When you want more range with extra payload in your patterns, reach for Nitro Mag. These loads combine a controlled distribution of granulated poly filler with our patented Power Piston wad to cushion and protect the extra-hard lead shot. That gives you tighter patterns at distances up to 15 yards beyond ordinary mags.

Express™ Extra Long Range. The standard high-base loads for all hunters feature our exclusive one-piece Power Piston wad, which cushions and protects the shot without barrel leading. The wad's base acts as a seal and keeps gas from pushing past the shot column, so you get every bit of energy behind the payload.

ShurShot® Field Loads. For quick upland game like rabbits and quail, ShurShot field loads are a real bonus. That's because these shells have up to 30% more shot packed into our Power Piston wad than many competitive loads.

Buckshot. New for 1988, nickel-plated extra-hard buckshot in 00 and #4 2¾" loads, and 000, 00, #1 and #4 in 3" magnums. Like all Remington buckshot loads, a granulated polyethylene filler helps cushion the pellets to reduce deformation and improve your pattern. The granulated filler and nickel-plated shot help assure true flight and denser patterns at extended ranges.

Slugger® Rifled Slugs. High velocity magnum and short magnum Slugger loads are two of the fastest rifled slugs ever made. With speeds up to 1760 fps, you get flatter trajectory and less wind deflection, to deliver consistent and highly accurate hits on target. The 1-oz. slug assures maximum energy transfer on impact.

CENTERFIRE

You Can't Beat The System

Remington introduces the .35 Whelen, in two bullet weights. Never factory loaded before, it's one of the most popular wildcat loads. Praised for its accuracy by the serious hunter for big game. In 200-grain pointed soft point Core-Lokt and 250-grain soft point. And for extremely high velocity and accuracy, load up with a .280 Remington 120-grain hollow point. Both are Remington exclusives.

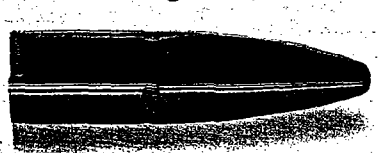
We design and test our centerfire rifles with the best possible centerfire ammunition. Our own. No other company in America makes both centerfire cartridges and centerfire rifles. We do. And when you put them together, you get the proven high performance of a single shooting system. It's a system you can't beat.

We make cartridges to precise tolerances out of top-quality brass. To assure proper velocity at safe pressure limits, we select the optimum powder for each cartridge and bullet type.

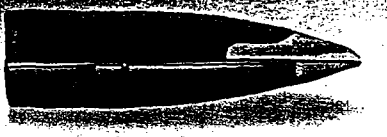
For instantaneous ignition, our Kleanbore® primers deliver positive, consistent ignition for dependable performance, without rust or corrosion. But our real advantage for superior performance is our bullet.

The one mushroom to pick when you're going into the woods. Core-Lokt bullets.

Core-Lokt® Soft Point Bullet. Our Core-Lokt bullet design is called the "deadliest mushroom in the woods." It provides superior penetration and controlled expansion, up to double the original caliber size. The heavy midsection jacket locks the metal jacket and lead core together. So the bullet stays in one piece at impact, expands in a controlled manner and mushrooms uniformly. Excellent in heavy brush, for medium and heavy big game—with positive performance at all ranges.



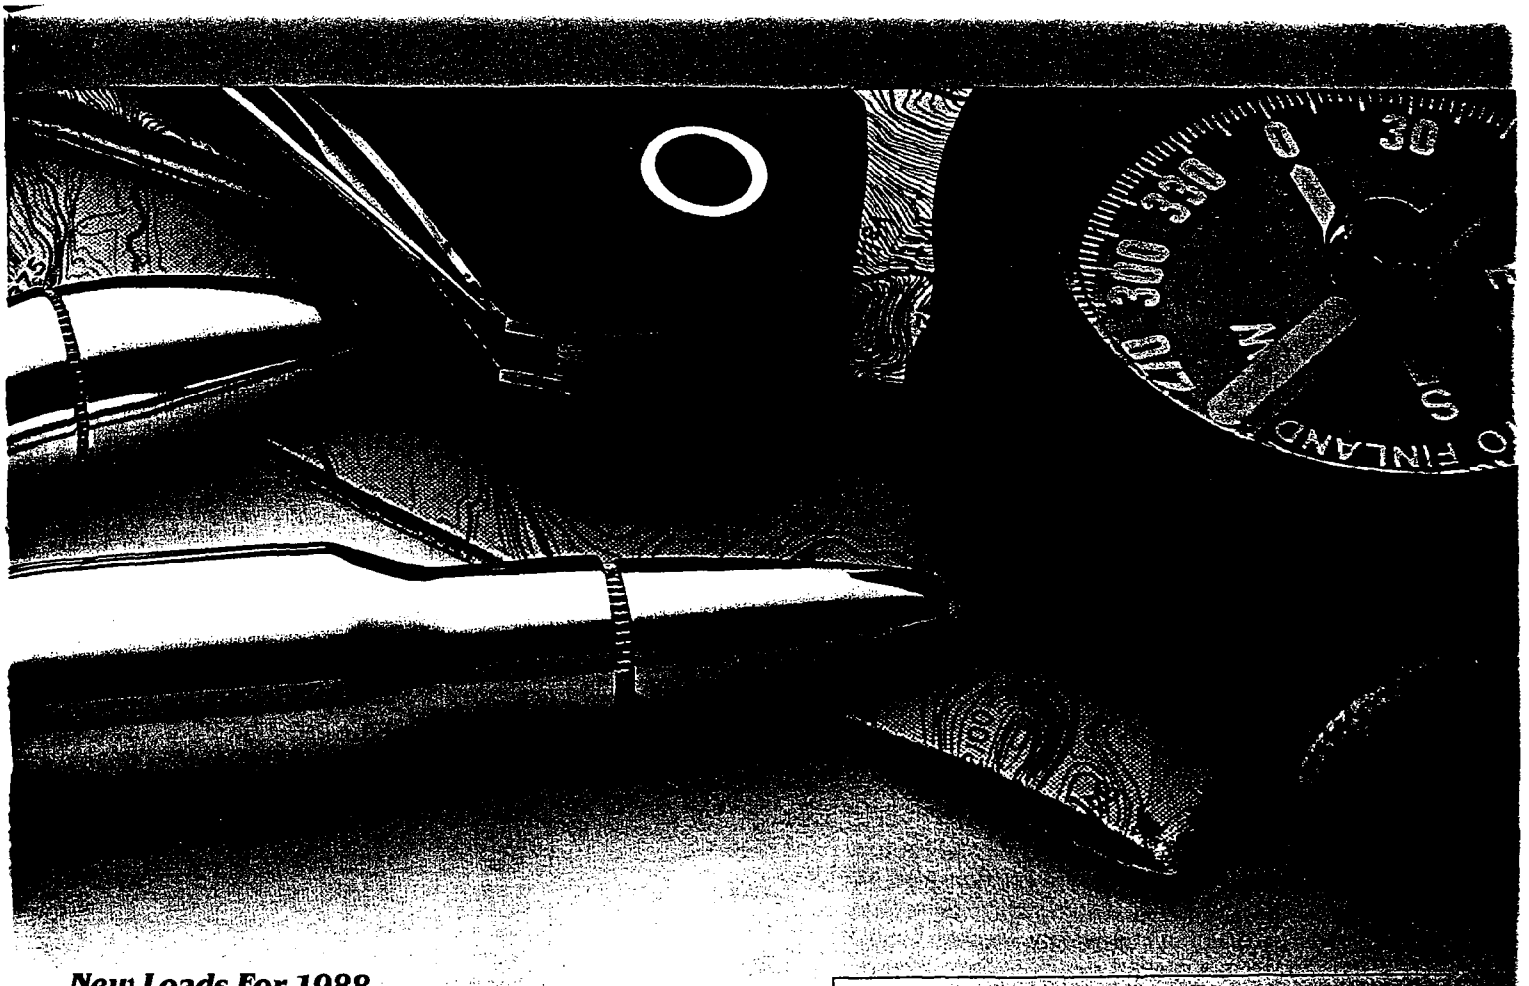
Core-Lokt Pointed Soft Point Bullet. Pointed profile offers flatter trajectory at longer ranges with maximum retained velocity and controlled expansion on impact.



Bronze Point™ Expanding Bullet. Using a bronze "tip" to protect the lead bullet core, the Bronze Point slices through the air with flat trajectory and excellent accuracy at extreme ranges. The tip also enables the bullet to penetrate medium-skinned game in a controlled manner before it mushrooms for optimum stopping power.

Power-Lokt® Hollow Point Bullet. The choice of varmint shooters, for long range pinpoint accuracy. Electrolytically bonding a copper jacket to the lead core forms a perfectly balanced, concentric projectile that delivers consistent, downrange accuracy. For target shooting and small game.

R2525729



New Loads For 1988

New 7mm-08.
We expand our line with this 120-grain hollow point offering. It shoots flat for varmint hunting and medium-size game.

New .308 Win.
With 168-grain boattail hollow point bullet for long range accuracy to exceed what other manufacturers offer. A true match-grade performer.

New .35 Whelen, In Two Bullet Weights.
One of the best balanced and most accurate cartridges for North American big game. We offer the .35 Whelen in 200-grain pointed soft point and in 250-grain soft point bullets. Very popular with deer hunters who appreciate a bullet good in heavy brush. No one else offers this load.

New .280 120-Grain Hollow Point.
This is the first time we've offered this caliber in a lighter grain for hunting varmint and medium-size game. Great for woodchucks and coyotes. This Remington exclusive hollow point is flat shooting, with high velocity and excellent long range accuracy.

New 7mm Magnum.
Now in a 140-grain pointed soft point. Excellent for antelope and other medium-size game when you need a flat-shooting long range bullet.

New 7mm BR.
In 140-grain pointed soft point. An extremely accurate cartridge that retains tremendous knockdown power. Its mild recoil makes it great for silhouette shooters.

INTERCHANGEABILITY CHART **Cartridges within groups shown are interchangeable. Other substitutions should not be made without specific recommendation of the firearms manufacturer, since improper combinations could result in firearm damage or personal injury.**

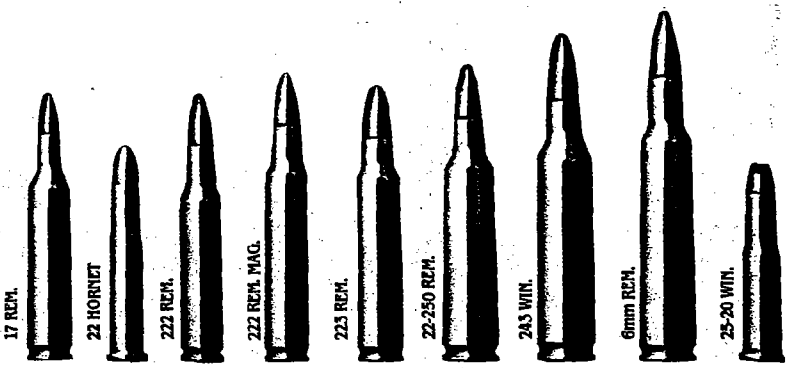
R2525730

CENTERFIRE



These tables were calculated by computer. A standard scientific technique was used to predict trajectories from the best available data for each round. Trajectories shown typify the ammunition's performance at sea level, but note that they may vary owing to atmospheric conditions, equipment and the ammunition itself.

All velocity and energy figures in these charts have been derived by using test barrels of established lengths.

Ballistics shown are for 24" barrels, except those for 30 carbine, .350 Remington magnum and .44 Remington magnum, which are for 20" barrels, and the 7mm BR, which has a 15" barrel. These barrel lengths were chosen as representative, as it's impractical to show performance figures for all of them.

The muzzle velocities, muzzle energies and trajectory data in these tables represent the approximate performance expected of each specified loading. Differences in barrel lengths, internal firearm dimensions, temperature and test procedure can produce actual velocities that vary from those given here.

CENTERFIRE RIFLE VELOCITY vs. BARREL LENGTH

Muzzle Velocity Range (fps)	Approx. Change in Muzzle Velocity per 1" Change in Barrel Length
2000–2500	10
2500–3000	20
3000–3500	30
3500–4000	40

1. Determine how much shorter, or longer, your barrel is than the test barrel.
2. In the left column of the above table, select the muzzle-velocity class of your cartridge.
3. To the right of that class, read the approximate change in velocity per inch of barrel length.
4. Multiply this number by the difference in the length of your barrel from that of the test barrel.
5. If your barrel is shorter than the test barrel, subtract this figure from the muzzle velocity shown for your cartridge.
6. If your barrel is longer, add this figure to the muzzle velocity shown.

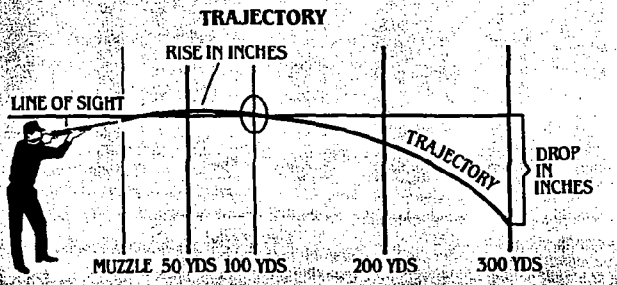
CENTERFIRE



The trajectory figures shown in these ballistics tables are the rise or drop, in inches, of the bullet from a direct line of sight at selected yardages. Sighting-in distances have been set at 100 to 250 yards. (See the drawing above.)

The line of sight used is 0.9" above the axis of the bore. This height is common to iron sights and low-mounted scopes.

The trajectory tables can also be used for rifles with high-mounted scopes, that is, 1½" above the axis of the bore. The difference in drops at even the extreme 500-yard range is not significant enough to negate the figures shown.

Since the rise or drop figures shown at the stated yardages are points of impact, you must hold low for positive figures, high for negative figures.

Many shooters who use the same cartridge often find it helpful to commit the rise and drop figures for that cartridge to memory, or tape them to their rifle stock. That way they know instantly the right "hold" as soon as they estimate the target's range.

Vented Test-Barrel Ballistics.
This Remington-patented, industry-accepted method provides data that more precisely reflects actual use of revolver ammunition. It considers cylinder gap, barrel length, powder position, production tolerances—even wear and tear—and reams of industry data. Although our final values differ from conventional figures, the ammunition is unchanged.

Key elements of our patented procedure include: (a) horizontal powder orientation; (b) cylinder gap: .008"; (c) barrel length: 4". Since each of these factors affects velocity, our method permits shooters to predict bullet performance in barrels of any length.

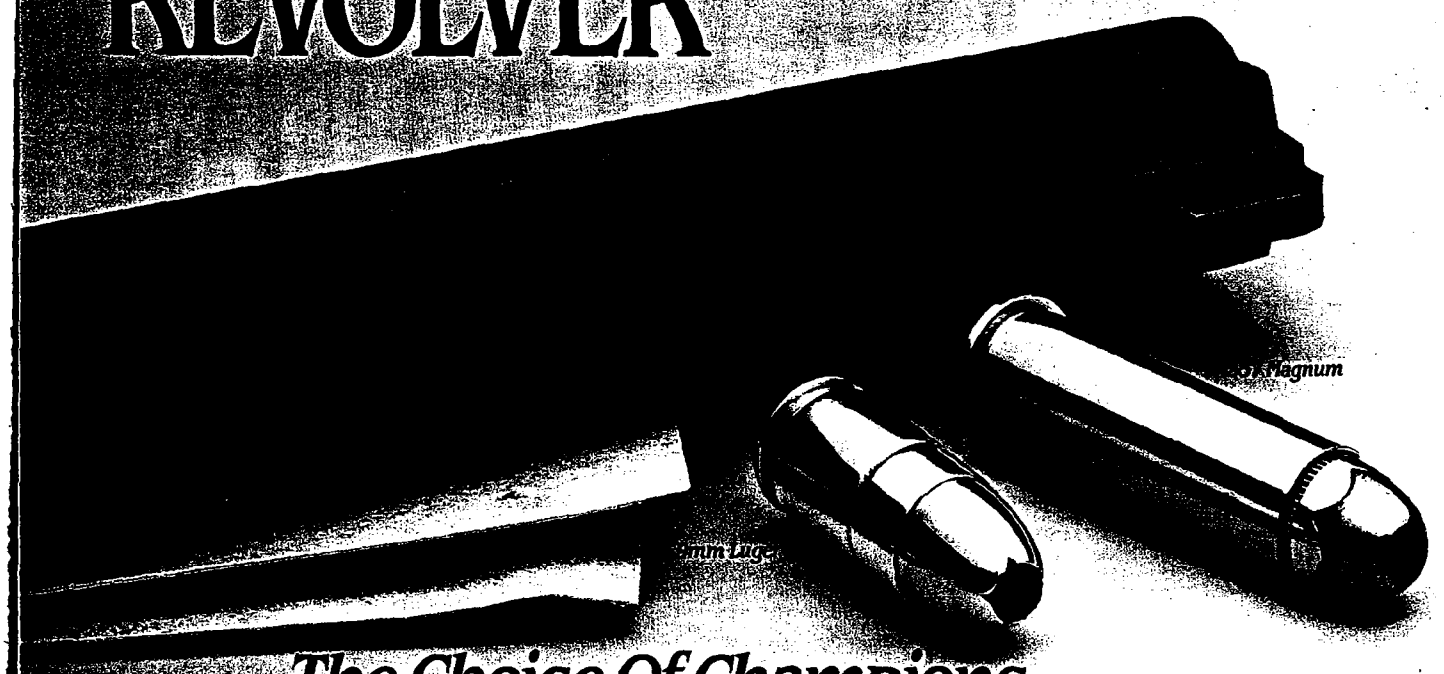
PISTOL & REVOLVER



The Choice Of Champions

Every time you squeeze the trigger, you're up against a handful of variables. That's why we spend so much research and development time analyzing the targets you'll use this ammunition on. The range you'll be shooting. And the guns you'll use it in. You want results. So do we.

Our bullets cover every conceivable situation you'll find yourself in. From the clean, hole-punching capability of a wadcutter to the knockdown power of a semi-jacketed hollow point. The bullets must be highly accurate. Highly consistent. And extremely dependable.

So each Remington bullet is ideally matched with case, powder and primer to deliver optimum performance.

Semi-Jacketed Hollow Point.
The scalloped jacket delivers the maximum expansion and stopping power, with controlled expansion even at high velocities.

Soft Point.
Delivers deeper penetration than the semi-jacketed hollow point.

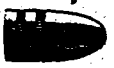
Metal Case.
Helps ensure positive functioning in autoloaders.

Wadcutter.
Solid lead for precision target shooting—leaves an easy-to-see hole in the target.

Semi-Wadcutter.
Lead bullet offers rapid expansion with wadcutter target performance.

Metal Point.
Fully jacketed, for the best penetration possible.

Lead Gas Check.
Minimizes lead fouling in higher-velocity loads.



Lead Round Nose.
A general-purpose bullet, and a standard for military and law enforcement.

New Loads For 1988

New .44 Magnum.
A 210-grain semi-jacketed hollow point, it meets the rigorous demands of the most sophisticated handgun hunter and also performs well in rifles.

New .41 Magnum.
A 170-grain semi-jacketed hollow point, with higher velocity and muzzle energy that exceeds anything else on the market. A true performer for handgun hunting of all types.

New .45 ACP Shot Cartridge.
This is a new offering that provides dense shot patterns at close range. Excellent for dangerous pests.

New .357.
In 180-grain semi-jacketed hollow point. Now you've got the heavier bullet you need for silhouette shooting and for hunting larger game.

New 9mm.
In 88-grain hollow point. This unique load delivers 30% more muzzle energy than conventional 9mm cartridges and extraordinarily high velocity at non +P pressures. The competition can't even touch it.

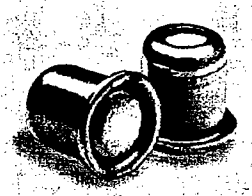
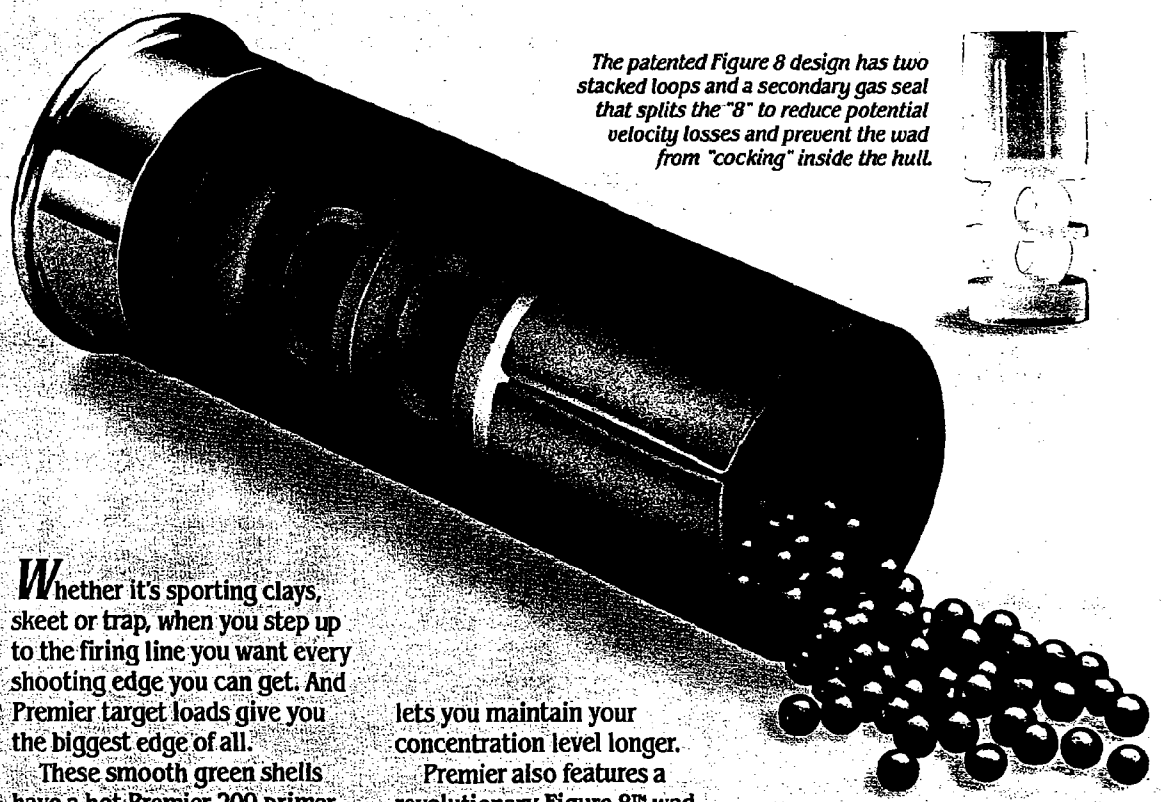
TARGET

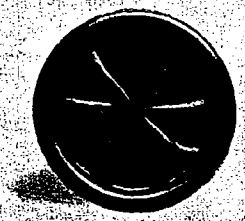
Premier™ Target Loads. When You Aim To Win



Premier 209 primer, powder charge and Figure 8 wad are all available from your local Remington dealer.



The patented Figure 8 design has two stacked loops and a secondary gas seal that splits the "8" to reduce potential velocity losses and prevent the wad from "cocking" inside the hull.



The smooth Hardbody hull has a mouth with a built-in memory for easy crimp starting and finishing—allows up to 20% more reloads than any other target load.

Whether it's sporting clays, skeet or trap, when you step up to the firing line you want every shooting edge you can get. And Premier target loads give you the biggest edge of all.

These smooth green shells have a hot Premier 209 primer with a covered flash hole and ultra-sensitive primer additive. Together, these components provide dependable, instant ignition of a special powder charge that provides the quick-hitting velocities shooters demand from a competition load.

This clean-burning charge produces a soft recoil. That reduces shooting fatigue, and lets you maintain your concentration level longer.

Premier also features a revolutionary Figure 8™ wad packed with Remington's extra-hard shot to deliver denser patterns and break more targets. Round. After round. After round.

The smooth Hardbody™ hull has a mouth with a built-in memory for easy crimp starting and finishing. It also features a durable primer pocket that retains its shape longer. The unibody hull has 20% more tensile strength than previous Remington target loads. So you get more reloads from every shell.

And the Premier target load is the perfect match for Remington's autoloading and pump action target shotguns. For complete specifications on these guns, turn to page 16.

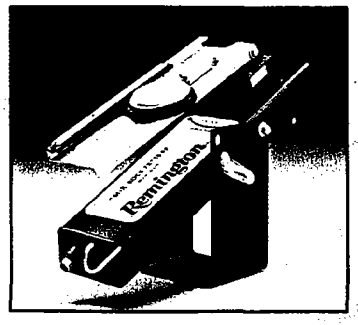
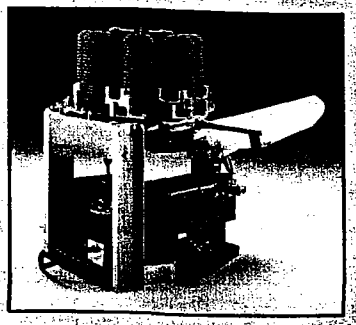
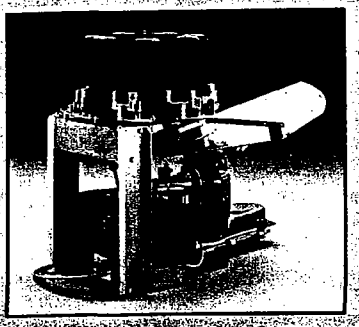
GUN CLUB & RELOADING



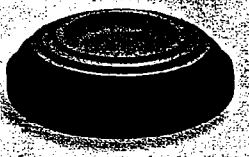
Portable Blue Rock® 78 Trap. The Blue Rock 78 Trap is spring loaded and manually operated. Designed for sporting clays, trap and skeet shooting. Ideal for small clubs and private ranges. Weighs only 37 lbs. Order Number 4324.



Remington 4100-S Automatic Trap. This skeet trap ensures fast rotation, consistent direction and distance. Electrically operated, it holds 154 targets. Order Number 4312 (pairs), 4310 (single).



Remington 4100-T Automatic Trap. This fully adjustable trap has all the features of the 4100-S, but with an oscillation feature to create more target variety. Order Number 4334.



Blue Rock Targets. Luminous orange targets have balanced weight for true flight, thin dome for easy breaking in flight, heavy rim for stability, spin and stackability.

Clothes Worth Tracking Down

No matter what the season, keeping warm, staying dry and moving easily and quietly are as critical to having a successful hunt as shouldering an accurate firearm.

And no clothing will keep you warmer, drier or allow you to move more comfortably outdoors than Remington clothing systems for Big Game, Waterfowl and Upland game hunting.

The outer layer fabrics repel rain, snow, wind and all the punishment rugged terrain can dish out. The inner layers have the best warmth-to-weight ratio of any insulating fibers available, even when wet.

The entire line of outdoor clothing has another unique feature, too. The Remington name. So you only have to make one stop for all your hunting needs. That's at your nearby Remington dealer.

Fabrics/Insulation/Coatings

Thermax™
Warmer and softer than polypropylene, this hollow-core fiber wicks away perspiration, yet won't retain odors. Machine washable and dryable.

Worsterlon®
Has the comfort of cotton, the warmth of wool and it's more durable. Machine washable and dryable.

Thermolite®
Warmer than any other thin man-made insulation, and maintains better loft after washing and use.

Thermoloft®
30% warmer than other thin man-made insulations at the same weight, and has down-like compressibility.

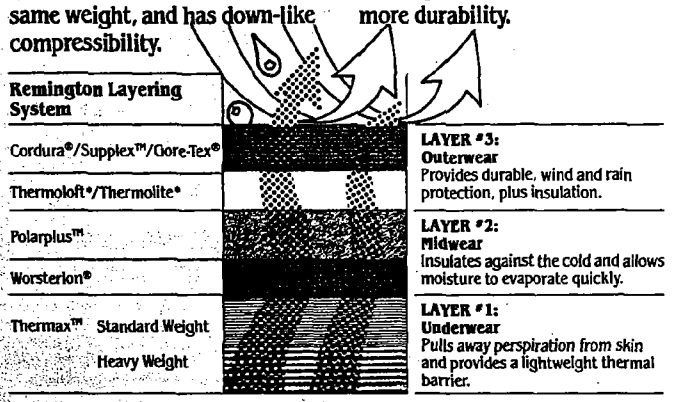
Supplex™
Fine-textured Du Pont nylon with a soft, pliable cotton feel and more durability.

Gore-Tex®
Keeps you dry by letting perspiration escape, yet won't let wind, rain or snow penetrate.

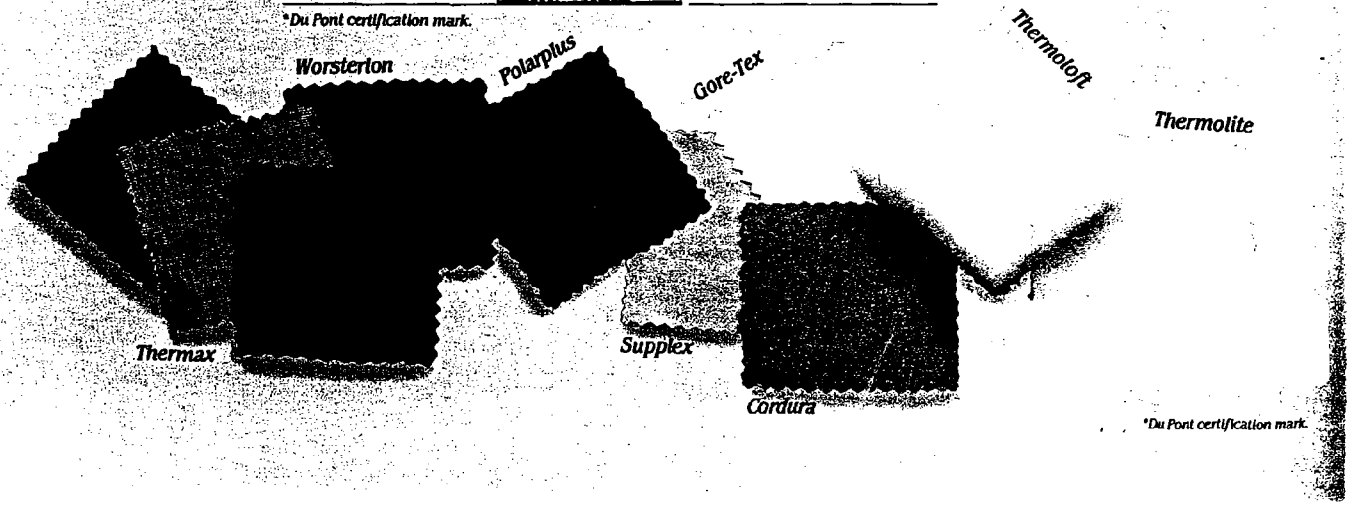
Cordura®
More puncture resistant and durable than leather or cotton duck, with flexibility, light weight and easy care.

Polarplus™
As warm as wool at half the weight. Fast drying. Will not pill.

Zepel®
Rain and stain repellent.



*Du Pont certification mark.



*Du Pont certification mark.

WATERFOWL
Clothing

Now waterfowlers can reach for the sky easier than ever before. New Remington action sleeves and backs on all our waterfowl parkas won't pull or bind like other clothing designs. Generously cut gussets under the sleeves and deep side vents in the back allow more overhead and side-to-side movement to let you reach farther and easier.

Also new for 1988, Marsh Grass© camouflage design. Exclusively from Remington.

REMINGTON ACCESSORIES

Everything To Complete Your Hunting Trip

Remington Luggage And Gun Cases. Whoever said getting there was half the fun was half right. Especially if you travel with the well designed Remington bags and cases. They're made from Du Pont Cordura® nylon for the look and feel of good cotton duck. Yet they resist tears and scratches. So even if overstuffed, they maintain their good looks. Trim is rich, oil-tanned leather; the hardware is solid brass. Seams are double and triple stitched so you never have to worry about an edge or a pocket tearing. And each bag is double treated with Zepel® for complete rain and stain resistance. Plus, the zippers can handle everything you dish out. In short, these are luggage and gun cases made for getting you there and back again.

Sportsman's Bag. Multi-purpose shoulder bag features detachable padded shoulder strap with swivel clasps, three interior, two exterior bellows pockets, waterproof liner, large zippered pocket on back. Measures 14" long, 12" high, 6" deep.

Duffle Bag. Double Cordura bottom, wraparound handles, easy-access U-shape zipper, dust flap and zippered end pockets. Two sizes: Large—25" long, 10" high, 10" deep. X-Large—29" long, 12" high, 13" deep.

Gun Cases. We line all our gun cases with corduroy and one-inch open cell foam padding to cushion and protect your firearm from moisture and bumps. Choose scoped rifle or shotgun cases from two styles: Brown and beige basketweave with oil-tanned leather trim, or durable, plain weave Cordura nylon in Remington green, with tan Cordura accents and Remington logo.

Shell Bag. Full-cut interior yoke eliminates spillouts. Adjustable shoulder strap.

Game Bag. Traditional English-style bag features an easily removed bloodproof game bag. Plus large bellows pockets, snap flaps, and adjustable shoulder straps. Fishermen will like this one as well.

Remington Counterscent™. Remington knows you don't want to give yourself away in the woods. So take away odors and human scent. Wash with Remington Counterscent. It removes fuel fumes and strong food odors from you and your clothes. And it's ideal for fishermen who want to remove the smell of fish or bait—and it keeps lures clean. Plus, it's mild and easy to use.

It contains aloe and moisturizers, to help protect skin that's exposed to all the elements. And, it's biodegradable and phosphate free to prevent freshwater contamination.

Rem™ Oil. Made with a special formula containing Teflon®. Provides superior lubrication, cleaning, rust protection and moisture displacement. Available in 4-oz. and 10-oz. spray cans or 1-oz. squeeze bottle.

Rem Guard. Here's a unique way to spray the ruggedness back into your outdoor wear. Use Remington Rem Guard. It restores water and oil repellency without compromising garment performance. So it won't ruin the breathability of high-performance garments. The nonflammable propellant means you can restore garments safely around the evening campfire.

Rem I And Rem II Men's Field Watches. Now you can tell the time without giving away your location in the woods. Durable, shock resistant and waterproof. Rain and repeated recoils won't stop these watches.

In two styles, both with quartz-accurate movements. Made by the Hamilton Watch Company to U.S. military specifications.

Rem I Men's Watch—Deluxe Sportsman

Rem II Men's Watch—Classic Sportsman

Rem I Men's Watch—Deluxe Sportsman $149.95.
Rem II Men's Watch—Classic Sportsman $79.95.

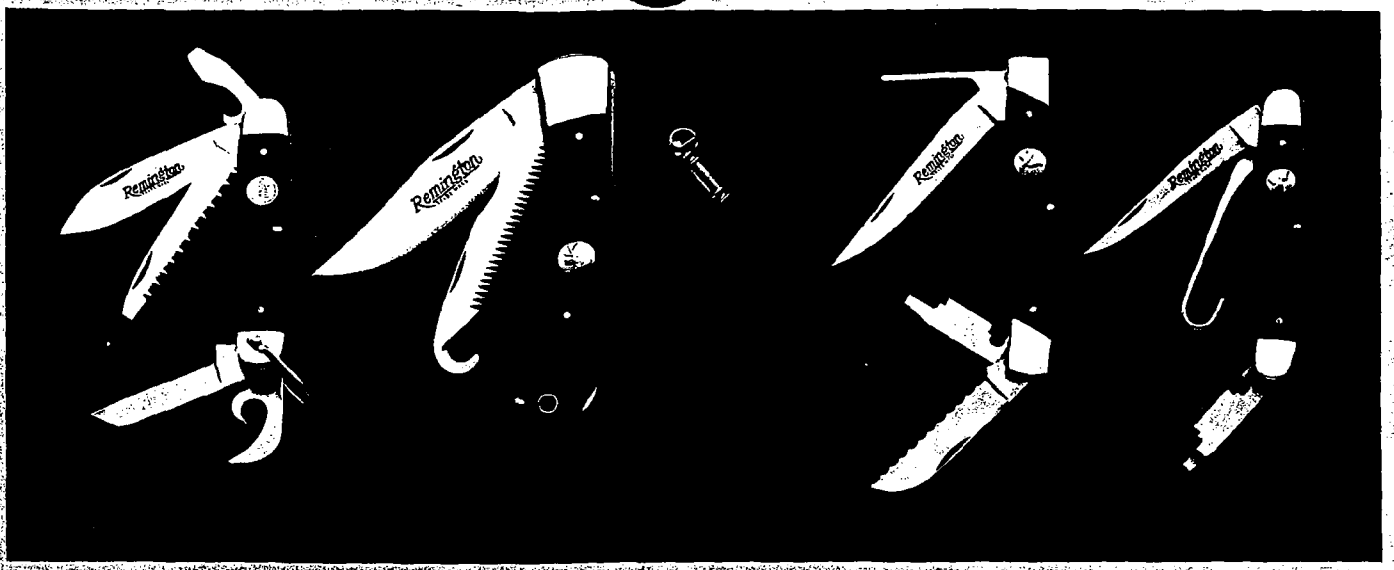
New Remington Knives



A Cut Above The Competition

This year we're introducing our sharpest line of hunting and shooting products ever. Remington knives.

This collection of specialized cutting tools has all the features you'd expect from the world's leading manufacturer of sporting firearms, ammunition and accessories—plus some unique extras that will really give you an edge in the field or on the range.

All blades are honed from 440 stainless steel to give you the sharpest, longest-lasting cutting edges possible. Delrin™ handles provide the rugged good looks of antler and a durable, non-slip grip. And nickel bolsters, brass linings and stainless steel pins all add to the life and the value of these knives.

But it's all the job-specific details that really place this new line a notch above ordinary knives. And will carve a place for themselves among the most dedicated hunters and shooters.

Model	Blade Length	Features
Remington Utility Knife	2⅜" spear blade, 1¾" coping blade	Saw, screwdriver, can opener, shackle
Remington Big Game Knife	3⅜" clip blade, 3⅝" bone saw	Special self-cleaning bone saw, paunch hook, grip notches on blade backs for extra control, leather sheath with sharpening tool and embossed Remington logo
Remington Waterfowl Knife	3" skinning blade, 2¼" serrated blade	Choke tool† (fits Remington, Browning and other popular 12- and 20-gauge choke tubes), screwdriver tip, pin punch sized to fit shotgun firing mechanism, bone/cartilage serrated blade
Remington Upland Knife	2⅝" clip blade	Choke tool† (fits Remington, Browning and other popular 12- and 20-gauge choke tubes), screwdriver tip, gut hook

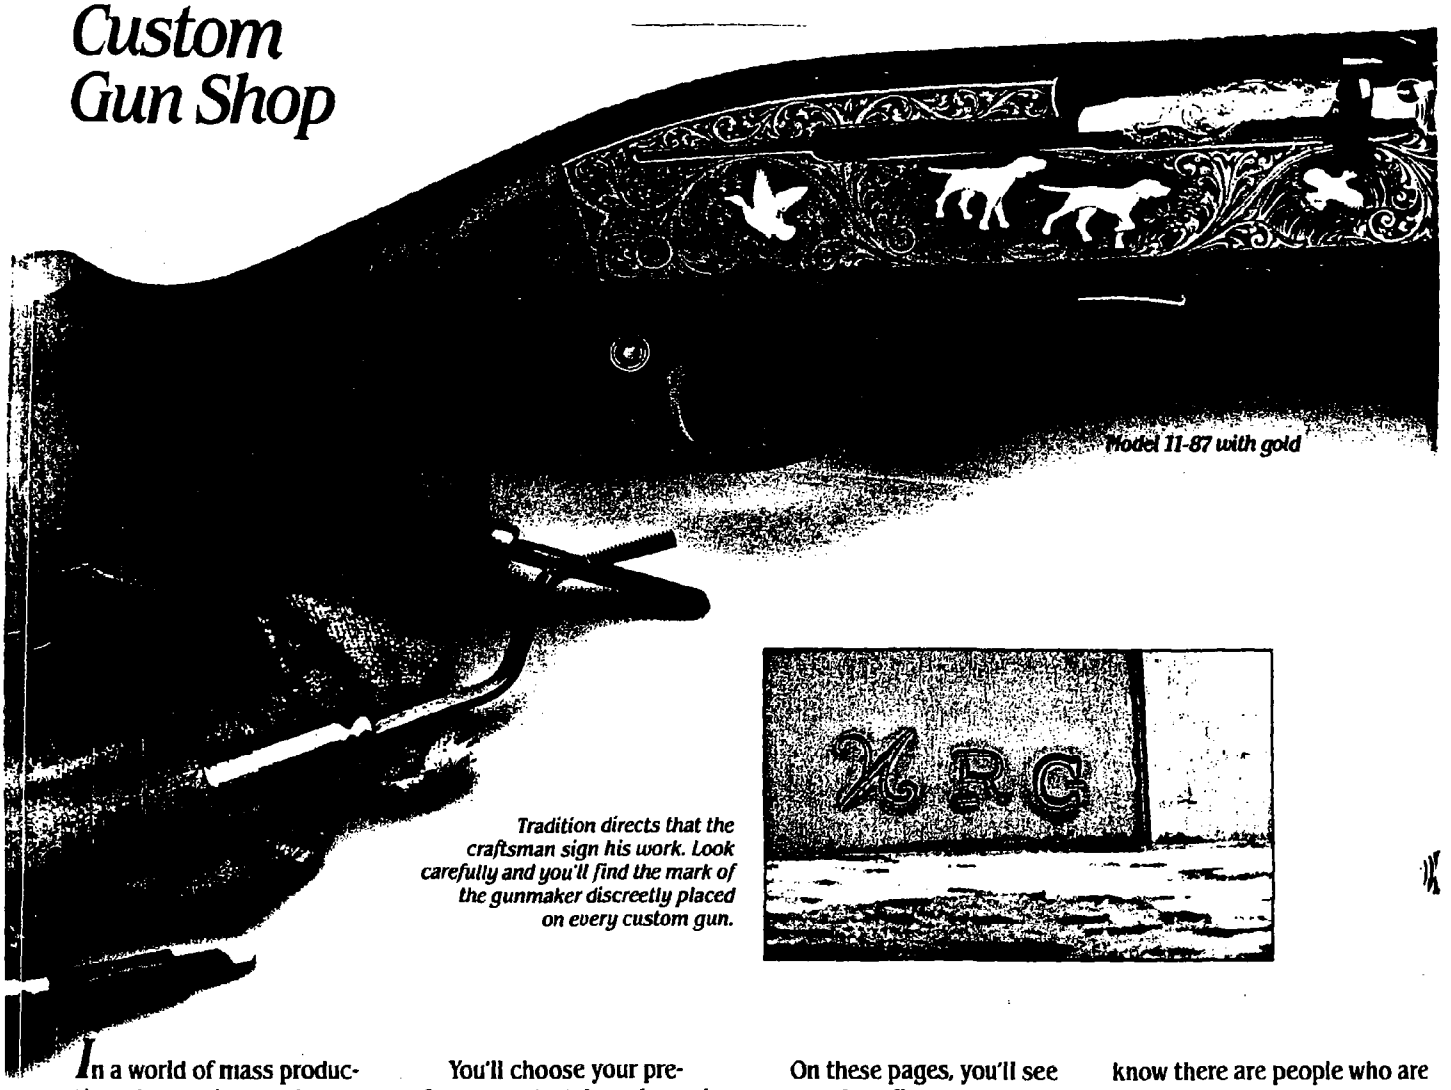
Custom Gun Shop



Model 11-87 with gold

Tradition directs that the craftsman sign his work. Look carefully and you'll find the mark of the gunmaker discreetly placed on every custom gun.

In a world of mass production, the Remington Custom Gun Shop affords you the rare opportunity to take the road less traveled.

Because here, you'll make the choices that help create a special firearm, yours and yours alone.

Beginning with one of the classic Remington actions, Custom Shop craftsmen refine the specifications and dimensions to meet your precise needs.

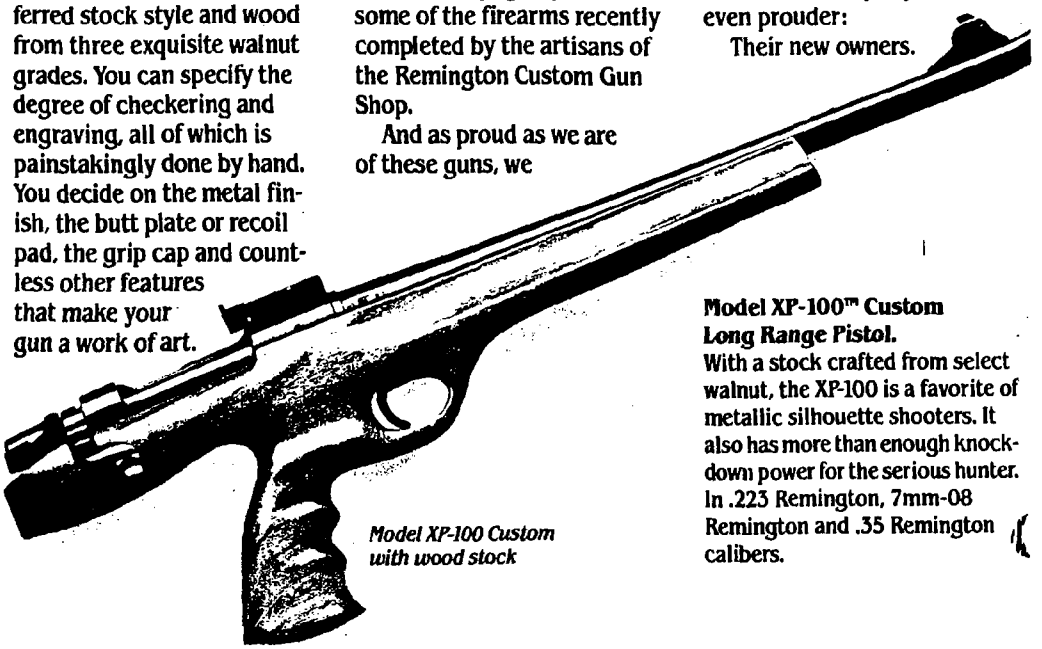
Then they add the details, the checkering, the engraving and the finish that give that firearm a one-of-a-kind look and feel.

You'll choose your preferred stock style and wood from three exquisite walnut grades. You can specify the degree of checkering and engraving, all of which is painstakingly done by hand. You decide on the metal finish, the butt plate or recoil pad, the grip cap and countless other features that make your gun a work of art.

On these pages, you'll see some of the firearms recently completed by the artisans of the Remington Custom Gun Shop.

And as proud as we are of these guns, we know there are people who are even prouder:

Their new owners.

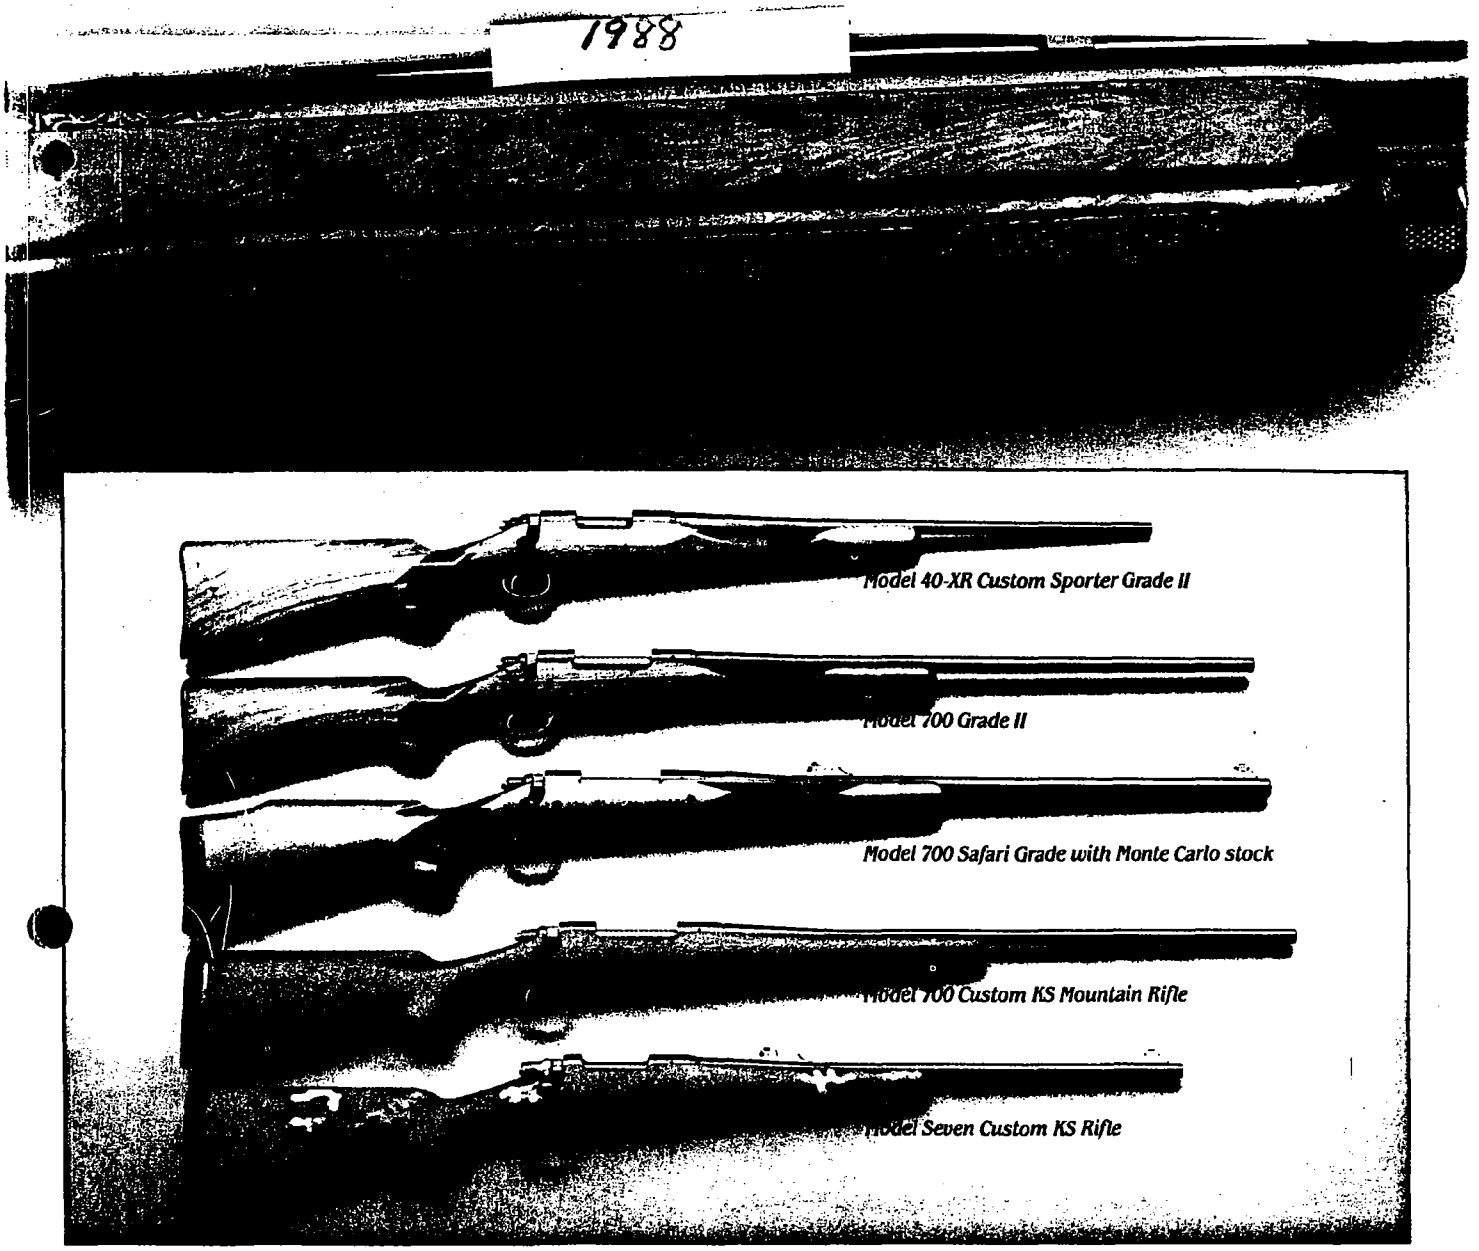


Model XP-100 Custom with wood stock

Model XP-100™ Custom Long Range Pistol.
With a stock crafted from select walnut, the XP-100 is a favorite of metallic silhouette shooters. It also has more than enough knockdown power for the serious hunter. In .223 Remington, 7mm-08 Remington and .35 Remington calibers.

R2525749

1988



Model 11-87™ F Grade Autoloading Shotgun.
America's favorite shotgun receives very special attention, with flawless hand-cut checkering and skilled engraving that covers most metal surfaces. More than 150 hours of dedicated handwork is needed to assemble and complete this exceptional firearm.

Model 40-XR™ Custom Sporter Grade II.
Built by hand to be the finest .22 rimfire ever made. It offers most of the options of the Model 700 Custom, grades I through IV.

Model 700™ Grade II Bolt Action Rifle.
Hand-rubbed English walnut stock. The distinctive point-pattern checkering is cut by hand, one line at a time. The barrel is chambered, crowned and fitted by hand as well. The Model 700 is available in four grades in 26 different calibers—many with left-hand versions.

Model 700 Safari Grade.
Our renowned bolt action, in calibers that allow you to face the world's largest, most dangerous game animals with confidence: .458 Win. magnum, 8mm Remington magnum or .375 H&H magnum. The Monte Carlo stock features a cheekpiece, rosewood grip cap and fore-end tip. The Safari grade rifles are also available with a Classic straight comb stock.

Model 700 Custom KS Mountain Rifle.
The optimum combination of strength, accuracy and light weight. The stock is hand-laid-up Kevlar®, so this rifle weighs in at less than seven pounds even in magnum calibers. And the stock is unaffected by weather changes, so a sighted-in rifle stays sighted in no matter what the temperature or humidity. Truly a world-class big game rifle.

Model Seven™ Custom KS Rifle.
The same proven bolt action design as our Model 700, but in streamlined dimensions that make it even lighter and easier to handle. The classic Kevlar stock features a straight comb, cheekpiece, European knob pistol grip and 1" black Old English recoil pad. Weight: just 5¼ pounds. Available in .35 Remington and .350 Remington magnum only.

R2525750

Model 11-87

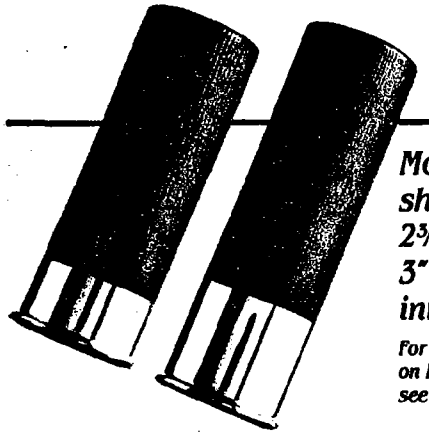
The Most Durable And Versatile Autoloading Shotgun We've Ever Made

Last year we introduced the remarkable Remington Model 11-87™. And in just 12 months' time, it's become the shotgun against which all other 12-gauge autoloaders are measured.

The Remington Model 11-87 is the first and only American-made sporting arm that's pressure compensating to shoot all 12-gauge ammunition—everything from light 2¾" field loads to heavy 3" magnums—without changing anything but the shell.*

Combined with screw-in Rem™ Choke tubes and your choice of 26", 28" or 30" barrels, the 11-87 Premier™ is the most versatile shotgun you've ever shouldered. There are also two 11-87 target guns specifically for clay target shooting, and 11-87 Special Purpose shotguns for waterfowl, turkey and deer.**

And the 11-87 provides twice the shooting life of any autoloader we've ever made. With an extractor that's 25% thicker for greater strength.



Model 11-87 shoots all standard 2¾" field loads and 3" magnum shells interchangeably.

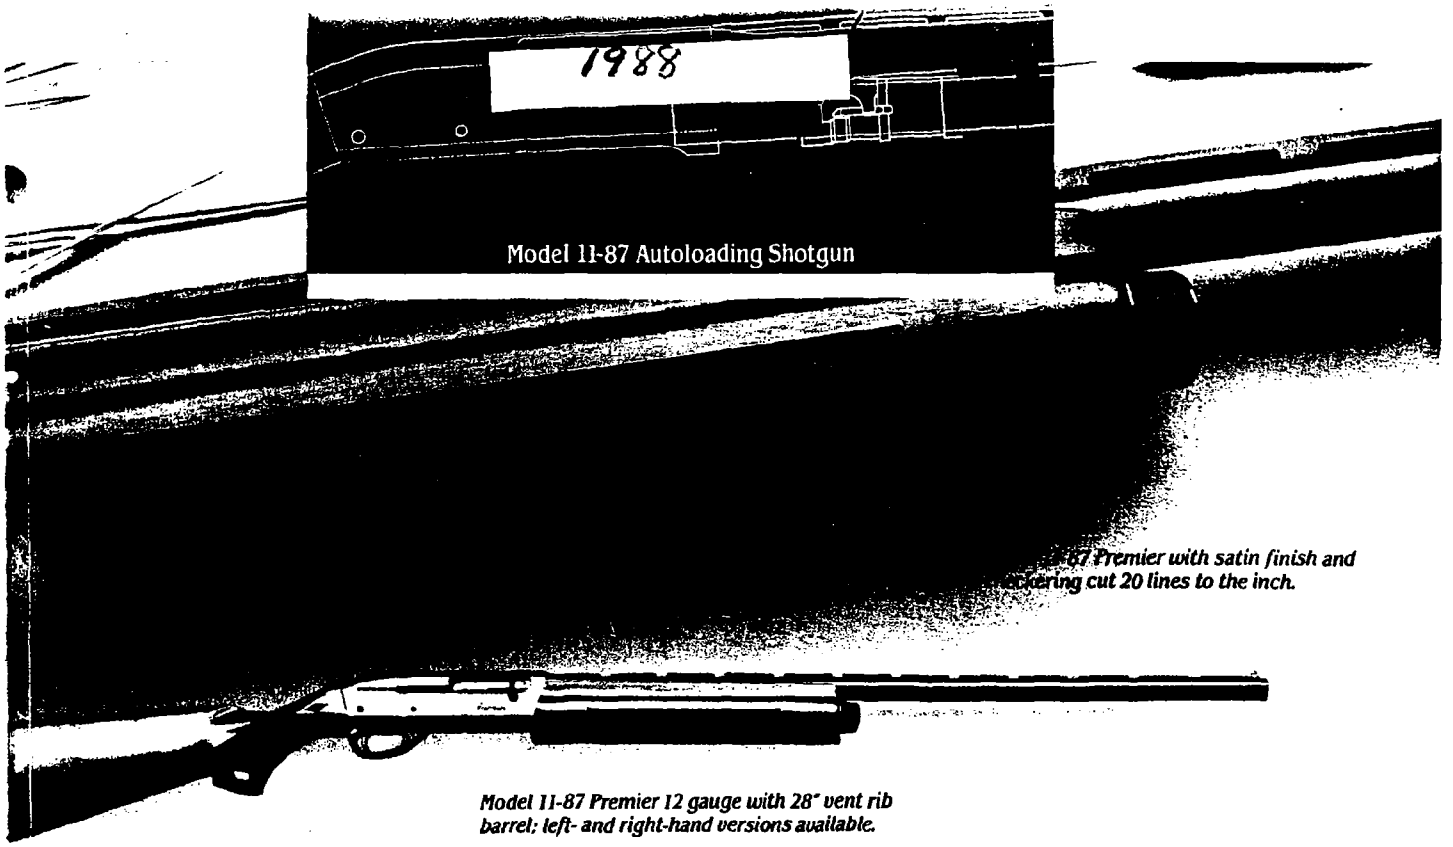
For information on Remington shotshells, see pages 26 through 29.

Both piston and piston seal are heat treated for more endurance. The magazine tube is stainless steel to resist rust and corrosion.

The magazine cap features a patented detent system to prevent "backing off" during repeated shooting. And the pressure compensating (PC) gas system is self-cleaning. So the PC spring never has to be removed for maintenance.

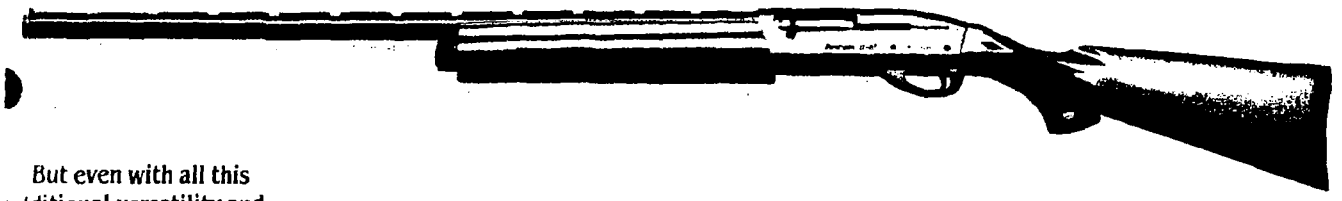
All this adds up to make the Model 11-87 one gun that's definitely durable enough to be passed along from father to son.

R2525751



...87 Premier with satin finish and ...ckering cut 20 lines to the inch.

Model 11-87 Premier 12 gauge with 28" vent rib barrel; left- and right-hand versions available.



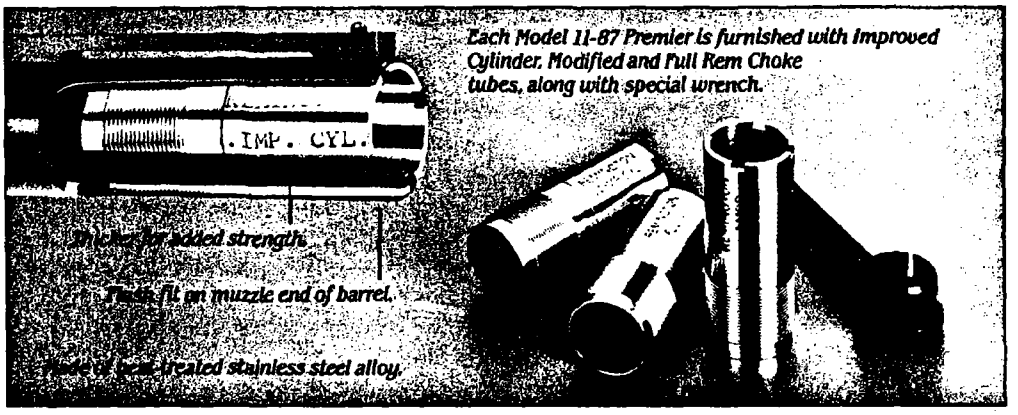
But even with all this additional versatility and durability, the 11-87 produces a recoil that's so soft, you may think you're shooting a smaller-gauge shotgun.

And the 11-87 maintains the balance, "feel" and clean lines hunters and shooters have come to expect in a Remington autoloader. The classic American walnut stock and fore-end feature a rich satin finish and checkering that's evenly cut 20 lines to the inch.

With all this going for it, it's easy to see why the Remington Model 11-87 just may be the best all-around shotgun ever.

The patented pressure compensation system automatically controls the gas pressure bled from the bore to maintain a controlled bolt velocity. This feature allows the 11-87 to ...t, shoot and eject light 2¾" field ...ds or 3" 12-gauge shells interchangeably.

***For information regarding the Model 11-87 SP Magnum, see pages 8 and 9. Also available— Model 11-87 Trap and 11-87 Skeet Target Shotguns. For complete specifications, see page 16.*



Each Model 11-87 Premier is furnished with Improved Cylinder, Modified and Full Rem Choke tubes, along with special wrench.

...ker for added strength.

...Flush fit on muzzle end of barrel.

...Made of heat-treated stainless steel alloy.

MODEL 11-87™ PREMIER SHOTGUNS

Gauge	Barrel Length & Choke	Overall Length	Avg. Wt. (lbs.)	Order Numbers vent rib barrel
12	30" Rem™ Choke	50½"	8⅜	9870
	28" Rem Choke	48¼"	8¼	9872

	26" Rem Choke	46"	8⅛	9874

Each has a quickly accessible cross-bolt safety.

R2525752

Model 870 America's Favorite Pump Action Shotguns

Ask a shotgunner to name the best pump action in the field, and one name will come up more than any other.

The Remington Model 870™ Wingmaster®.

With well over 4 million 870 shotguns sold, this durable gun is by far the most popular pump action in the world. And for good reason, too.

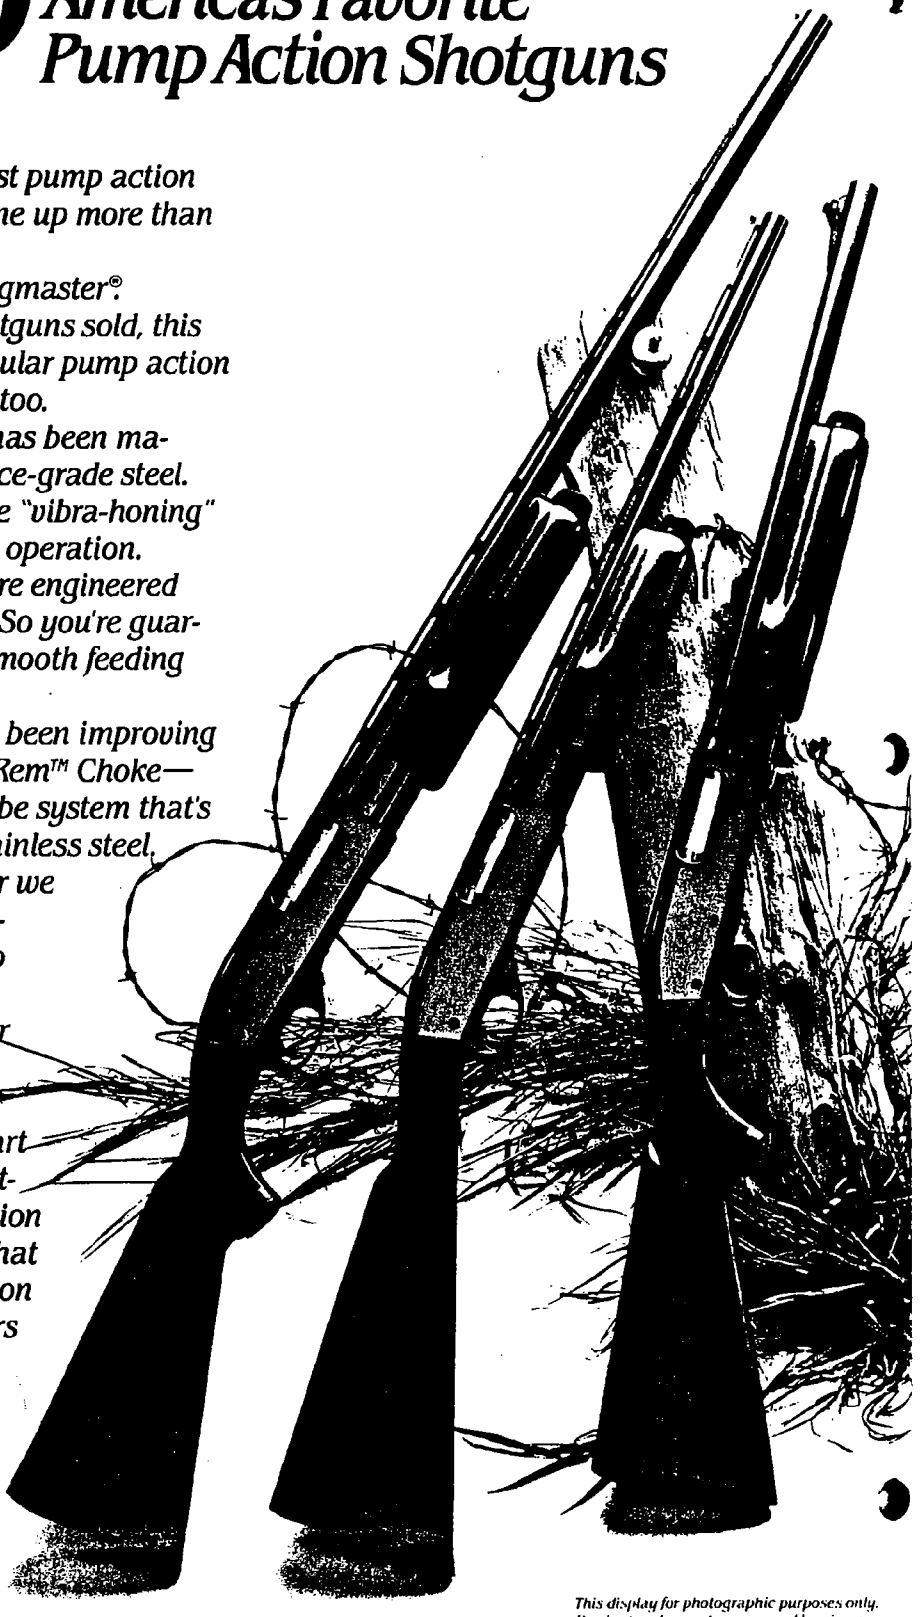
Since 1950, every 870 receiver has been machined from solid billets of ordnance-grade steel. All receivers go through our unique "vibra-honing" process to ensure reliable, smooth operation.

And the twin-action slide bars are engineered to eliminate twisting and binding. So you're guaranteed straight-line pumping for smooth feeding and positive ejection.

For the past 38 years we've also been improving the 870 with innovations such as Rem™ Choke—the only factory-installed choke tube system that's made of heat-treated, seamless stainless steel.

Every 12-gauge 870 Wingmaster we make has positive deep-cut checkering on the stock and fore-end. So the checkering is sharper, to give you a sure grip. And an even better chance of making a sure shot.

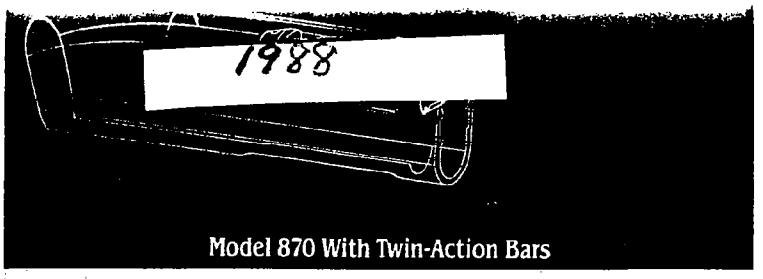
It's features like these that have continued to set the Model 870 apart from every other pump action shotgun in the field. And it's this attention to every detail—large or small—that will continue to make the Remington 870 the choice of more shotgunners again this year.



Shown, from left to right—Model 870 Wingmaster 12 gauge, Model 870 Special Field 20 gauge and Model 870 12-gauge Deer Gun.

This display for photographic purposes only. Remington does not recommend leaning a firearm against a fence post.

R2525753



Model 870 With Twin-Action Bars

All Model 870 shotguns feature twin-action bars that eliminate twisting or binding. So you get second and third shots off as fast and smooth as your first shot.

Model 870™ Wingmaster™. Today there are more Model 870 shotguns in the field than any other pump action. This reliable shotgun features an ivory bead front sight and metal mid bead similar to those usually found on target guns. And, like all current 12-gauge 870 shotguns, the Wingmaster handles 2¾" and 3" shells interchangeably.

Model 870 Special Field. Compact dimensions, English-style straight stock and lighter weight make this gun a natural for fast, upland shooting. Its straight pistol grip, innovative 21" barrel with shortened fore-end and magazine are designed for instinctive shouldering and fast handling.

Model 870 Brushmaster™ Deer Gun. Available for right- and left-hand shooters, the 870 Brushmaster deer gun features a 20" barrel with rifle sights and Improved Cylinder choke.

Model 870 Youth Gun. Shortened 12½" stock with recoil pad and 21" barrel offer the smaller-framed shooter full-size performance. In 20 gauge only, with Rem™ Choke.

Model 870 Express™. This just may be the best shotgun value on the market. The 870 Express has the same action as our top-of-the-line Wingmaster. Available in 3" chamber and 28" vent rib barrel only, the Express has a hardwood stock with low-luster finish and solid butt pad, and it comes equipped with a Modified (only) Rem Choke tube and wrench. Other chokes may be purchased from your Remington dealer. And for deer hunters we also offer the 870 Express Combo, which includes a 20" slug barrel.

SPECIAL PURPOSE *Shotguns*

As Invisible As Guns Get

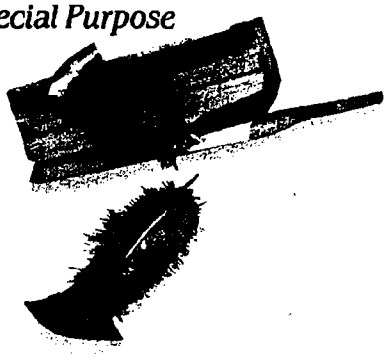
To serious waterfowl, turkey and deer hunters, dull guns are very bright ideas.

Especially rugged, nonglare guns like the Remington Model 11-87™ and Model 870™ Special Purpose Magnums.

Even to the wariest eye, we've made every visible component nearly invisible.

The nonreflective Parkerized finish protects the SP Magnum barrels and receivers. A dull black finish covers exposed bolts and carrier assemblies. We've even added a special coating on the hardwood stocks and fore-ends. It penetrates the wood to form a protective moisture seal. And doubles as a subdued finish that's resistant to reflection.

Each Special Purpose gun also comes with recoil pad and padded camouflage sling of durable, water-resistant Du Pont Cordura® nylon. The sling is detachable, but useful company during a long day's hunt. Whether you need fast handling in tight quarters, or a longer sight plane for pass shooting, you'll appreciate just how well these Special Purpose guns perform.



Model 11-87 Special Purpose Autoloaders.
You can shoot all loads. From 2¾" field loads to 3" magnums, without changing anything but the shell, thanks to the exclusive pressure compensating gas system. This gas system is self-cleaning.

Model 11-87 autoloaders also have thicker extractors, heat-treated piston and piston seal, and a patented detent system in the magazine tube.

All 12-gauge 11-87 shotguns in 26" and 30" vent rib barrels come with flush-fitting Rem™ Chokes.

Model 11-87 And Model 870 Special Purpose Deer Guns.
Choose the 11-87 autoloader with 21" barrel, or 870 pump action with 20" barrel; both come with 3" chamber and rifle sights. The 870 has twin-action bars that eliminate binding or twisting. It's the same action found on our popular 870 Wingmaster™ pump action shotgun. So you get those crucial second and third shots off as quickly and easily as your first shot.

Note: The 11-87 deer gun is designed for optimal performance with slug and buckshot loads and therefore is not pressure compensated, but will accommodate all 12-gauge loads if used with an 11-87 PC-equipped barrel.

Model 870 Special Purpose Pump Action.
All 12 gauge, 3" chambers. Choose 26" or 30" vent rib barrel with Rem Choke.

NICKEL BUCKSHOT

Nickel Tops The Copper

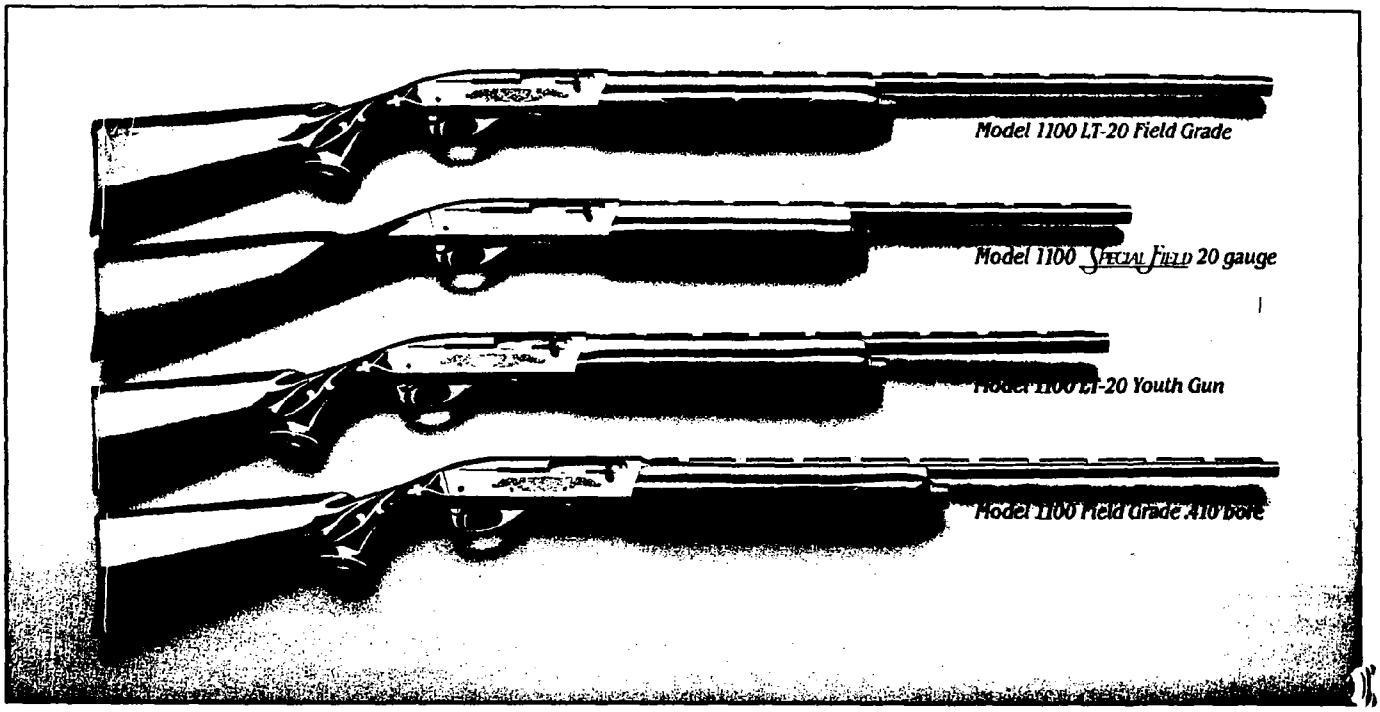
Big game hunters don't have to buy the same old line of buckshot any more. Because now there's new Remington nickel buckshot loads. The roundest, hardest buckshot loads ever developed.

To begin with, these new shells use only the best raw buckshot available. So the shot is rounder. Then, each pellet is electroplated with layers of copper, topped by nickel and finally buffered in the hull to prevent deformation. So the shot stays rounder, patterns tighter—maximizing your on-target performance.

They're the most accurate buckshot loads ever. And only Remington makes 'em. In new 2¾" loads with 00 and #4 buckshot. Or 3" loads in 000, 00, #1 and #4 buckshot.

R2525756

1100 Autoloaders



The Surefire Legends

As Jim Carmichel, Outdoor Life gun editor, puts it, "Anyone who can shoot a shotgun well will probably shoot better with an 1100."

That was true a decade ago. And it still holds true today.

Since its introduction in 1963, the Remington Model 1100™ has brought home more game from the field and trophies from the firing line than all other autoloading shotguns combined. And it's become the standard for pointability, balance and soft recoil.

The Model 1100 is available in 12 gauge Special Field, 20 and 28 gauge and .410 bore, plus a wide range of extra barrels.

The 20 gauge comes with flush-fitting Rem™ Chokes, the only factory-installed choke tubes of heat-treated, seamless stainless steel in Full, Modified and Improved Cylinder—or optional skeet chokes.

And like all Remington shotguns and centerfire rifles, every Model 1100 features a receiver machined from solid, ordnance-grade steel.

All receivers are polished in our "vibra-honing" process to ensure smooth performance. And every Model 1100 stock and fore-end is made from select American walnut for strength and good looks.

With all this going for it, it's no wonder the Remington Model 1100 has become a surefire legend.

Model 1100 Field Grade. The 20 gauge comes with Rem Choke and 2¾" or 3" chamber.

Model 1100 Special Field. Made for quick shouldering and natural pointability with a shorter overall length of 41", a lighter weight and English-style straight grip stock. In 12 and 20 gauge only, with Rem Choke, 2¾" chamber and 21" barrel.

Model 1100 Youth Guns. Shorter stocks and barrel lengths reduce size and weight for youths and smaller-framed adults, but in no way limit performance. Available in 20 gauge, with Rem Choke.

Sights And Safeties. Unless otherwise noted, all Model 1100 shotguns have metal bead front sight and quick access positive cross bolt safety.

Note: All models except Special Field and .410 bore have a 5-shot capacity with 3-shot plug. Special Field and .410 have a 4-shot capacity with 3-shot plug included.

Field To Target In A Snap

Now your long barrel goose gun can also become a great short barrel deer gun.

It just takes a quick, easy barrel change. And changing barrels means your gun is more versatile.

And our extra 12- and 20-gauge field barrels come equipped with Full, Modified and Improved Cylinder Rem™ Chokes—the only factory-installed screw-in choke system made of heat-treated, seamless stainless steel.

Model 11-87™ Extra Barrels. In 12 gauge only. Three lengths: 26", 28" and 30".

Model 870™ Deer Barrels. In 12 or 20 gauge with 20" Improved Cylinder barrel.

Note: New 12-gauge Rem Choke extra barrels will fit previously manufactured guns. But Model 11-87 barrels are not in any way interchangeable with Model 1100 barrels or guns.

New 20-gauge Rem Choke barrels may NOT readily fit pre-1987 Model 1100 LT shotguns. The fore-end may have to be modified by a gunsmith. This modification is NOT covered under Remington's Warranty Repair Policy. Barrels are interchangeable within gauge only.

REMINGTON CUSTOM GUN SHOP

At our Ilion firearms plant, there is an area set apart from the production lines. A series of well-lit, relatively quiet rooms where craftsmen practice a vanishing art.

This is the Remington Custom Gun Shop. Here, a dedicated group of artisans continues to build very special firearms largely by hand.

They work unhurriedly to meet the special orders of hunters and shooters who choose to express their passion for the shooting sports with the acquisition of an extraordinarily fine rifle or shotgun.

Using fine woods, precious metals, hand-selected and assembled components and painstaking methods, they make guns one at a time to fit the dimensions, the style, the taste and the experience of just one customer.

There is no higher achievement in the art of gunmaking. And for the shooting sports enthusiast, few things in life can rival the satisfaction of owning one of these magnificent firearms.

In the Remington Custom Gun Shop, almost anything is possible. To see some of those possibilities for yourself, send a check for $5 to Remington Arms Company, Eden Park Building, Wilmington, DE 19898 for your copy of our handsome, full-color Custom Gun Shop brochure.

The Legendary PARKER *Returns*

The original Parker™ is back. After years of speculation and anticipation, it will be returning to American fields and coverts in 1988. It will be built in 20-gauge AHE grade by The Parker Gun Works Division of Remington Arms Company in Ilion, N.Y. Production will be limited.

Original Parker shotguns earned their legendary stature. In an era sometimes described as "the golden age of shotgunning," a period graced by the presence of many fine doubles, the Parker held top ranking in the affection and preference of American gunners. And for good reasons.

Even before their relative scarcity gave them "collector" status, basic Parker features brought to their proud owners:

☐ Classic, clean lines that were the epitome of what a fine shotgun should look like.

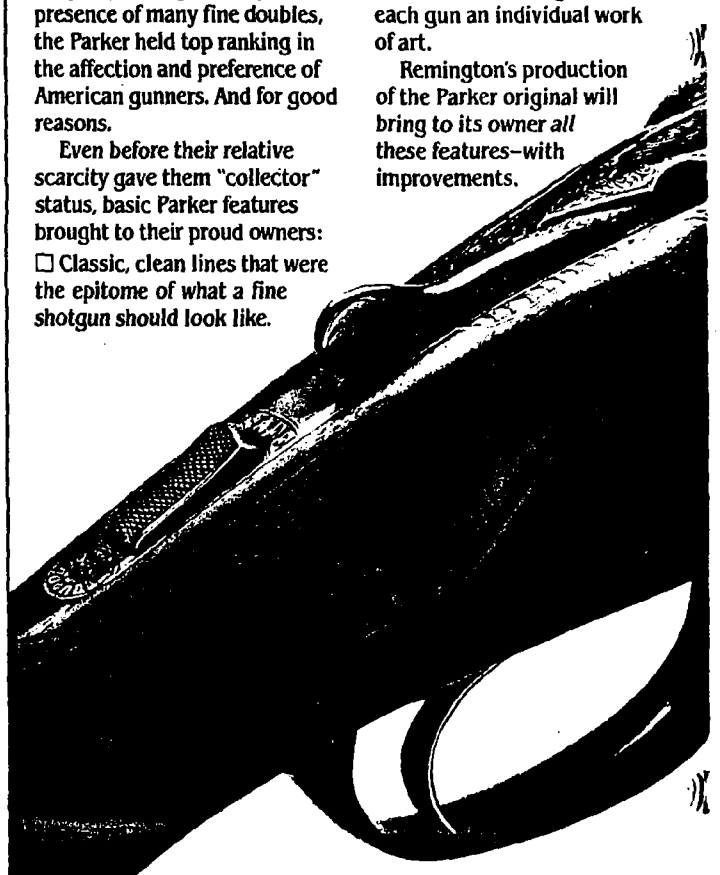
☐ Superb balance and handling qualities afield that seemed "to do your shooting for you."

☐ Dependable performance that earned them the nickname, "The Old Reliable."

☐ One-at-a-time production and hand-fitted "Old World" craftsmanship all the way down to the basic standard grades.

☐ In the higher grades, an esthetic level of wood figure, extensive custom engraving and fine-line checkering that made each gun an individual work of art.

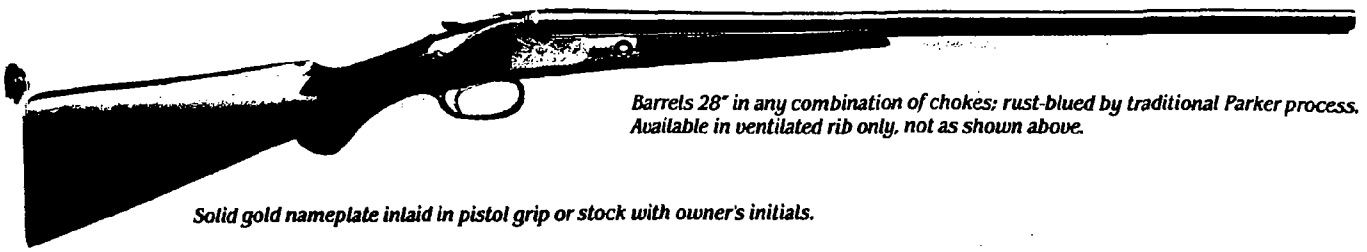
Remington's production of the Parker original will bring to its owner *all* these features–with improvements.



Straight or pistol-grip stock of finest select walnut. Made to customer dimensions.

R2525759

1988



Barrels 28" in any combination of chokes; rust-blued by traditional Parker process. Available in ventilated rib only, not as shown above.

Solid gold nameplate inlaid in pistol grip or stock with owner's initials.

Ivory front and mid beads.

Without sacrificing any of its classic visual elegance and "between-the-hands" feel, Remington has given "The Old Reliable" even greater strength and performance reliability. Modern, heat-treated metals are used throughout. A completely new, single selective trigger mechanism not only improves functional reliability, but offers exceptionally fast lock time.

A new and simplified design increases automatic ejector reliability.

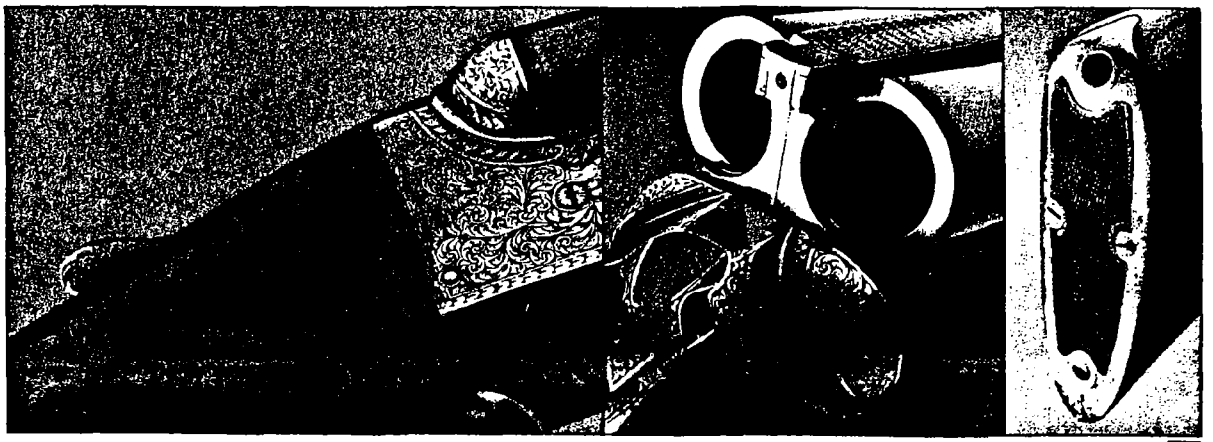
Beyond these useful but inconspicuous refinements, the new Parker retains all the timeless qualities of fit, feel and finish of the vintage originals. In the hands of a proud owner it will continue to allow the classic reply to an admiring comment: "It's not *just* a shotgun. It's a *Parker.*"

Matching splinter or beavertail fore-end.

Initially available in ventilated rib only, not as shown above.

Case-hardened receiver with natural hue and luster.

Game scenes and extensive, delicate scroll engraving. *2¾" chambers.* *Rubber recoil pad or skeleton steel butt plate.*

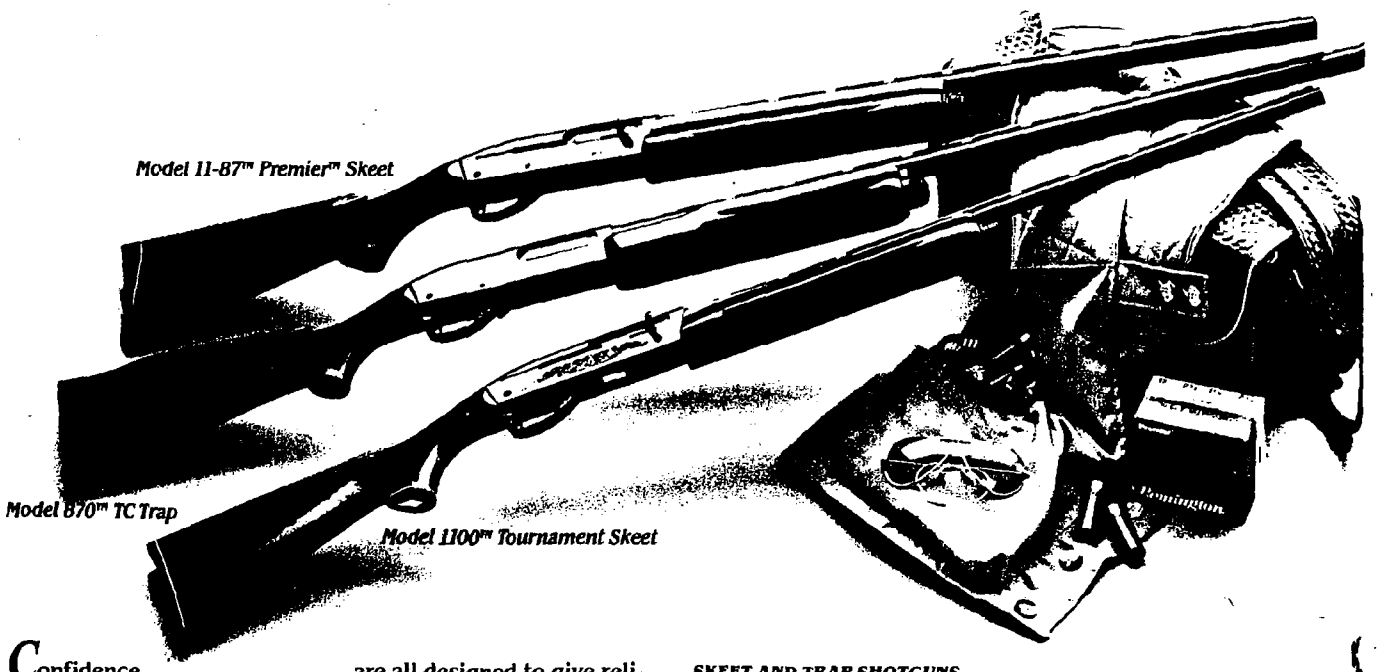


This vintage Parker is shown for illustrative purposes only. Engraving and checkering designs will vary.

R2525760

TARGET SHOTGUNS

Step Up To The Line With Confidence



Confidence.

It's something all champion shooters have in common. Confidence in themselves. In their loads. And most of all, in their shotguns.

Now Remington offers three shotguns that will increase the confidence of any shooter.

The Remington Premier™ Trap and Premier Skeet are designed with all the balance, pointability and soft recoil for which Remington autoloaders are famous. Along with features that make the Model 11-87™ twice as durable as any autoloading shotgun we've ever made.

The magazine tube is stainless steel, to resist rust and corrosion. And the extractor, new firing-pin spring, heat-treated piston and piston seal are all designed to give reliable, maintenance-free operation.

Or if you prefer a pump action for shooting clay targets, pick up a newly designed Remington Model 870™ TC Trap. It gives trap shooters the same dependable pump action that has made the 870 the choice of more than 4 million shotgunners worldwide.

But no matter what your choice, both the Model 11-87 and the Model 870 TC Trap offer overbored fixed or Rem™ Choke barrels. And all three Remington target shotguns feature American walnut stocks and fore-ends, with tournament-grade cut checkering, handsome satin finishes and tournament-style trap or skeet vent ribs.

All 11-87 and 870 TC Trap barrels are overbored, reducing recoil and improving patterning.

SKEET AND TRAP SHOTGUNS

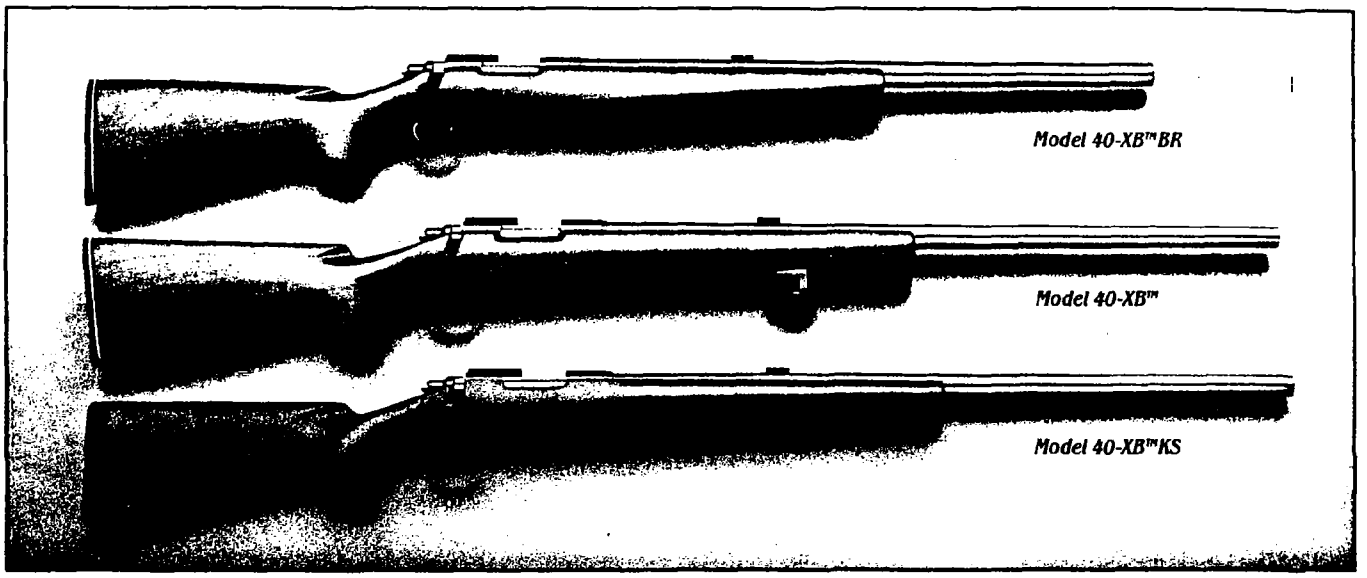
TARGET RIFLES

The Most Accurate Production Rifles Made



The ability to maintain accuracy. That's the primary consideration of any shooter investing in a new target rifle. And that's why more shooters consider Remington the only brand of target rifle to buy.

In fact, the Remington name dominates at national benchrest events across the country. That's because in any event—benchrest, metallic silhouette or position target—Remington provides the legendary out-of-the-box accuracy, crisp triggers and faster lock times champion shooters demand.

Silhouette shooters who want an accurate, single shot, match-quality pistol will appreciate the Remington Model XP-100™. The stock is one piece of Zytel™ nylon. The competition-proven action, match-type trigger and drilled and tapped receiver are standard.

And Remington target rifles, or the Remington XP-100 target pistol, are manufactured with all the strength needed to not only attain—but maintain—accuracy round after round and event after event.

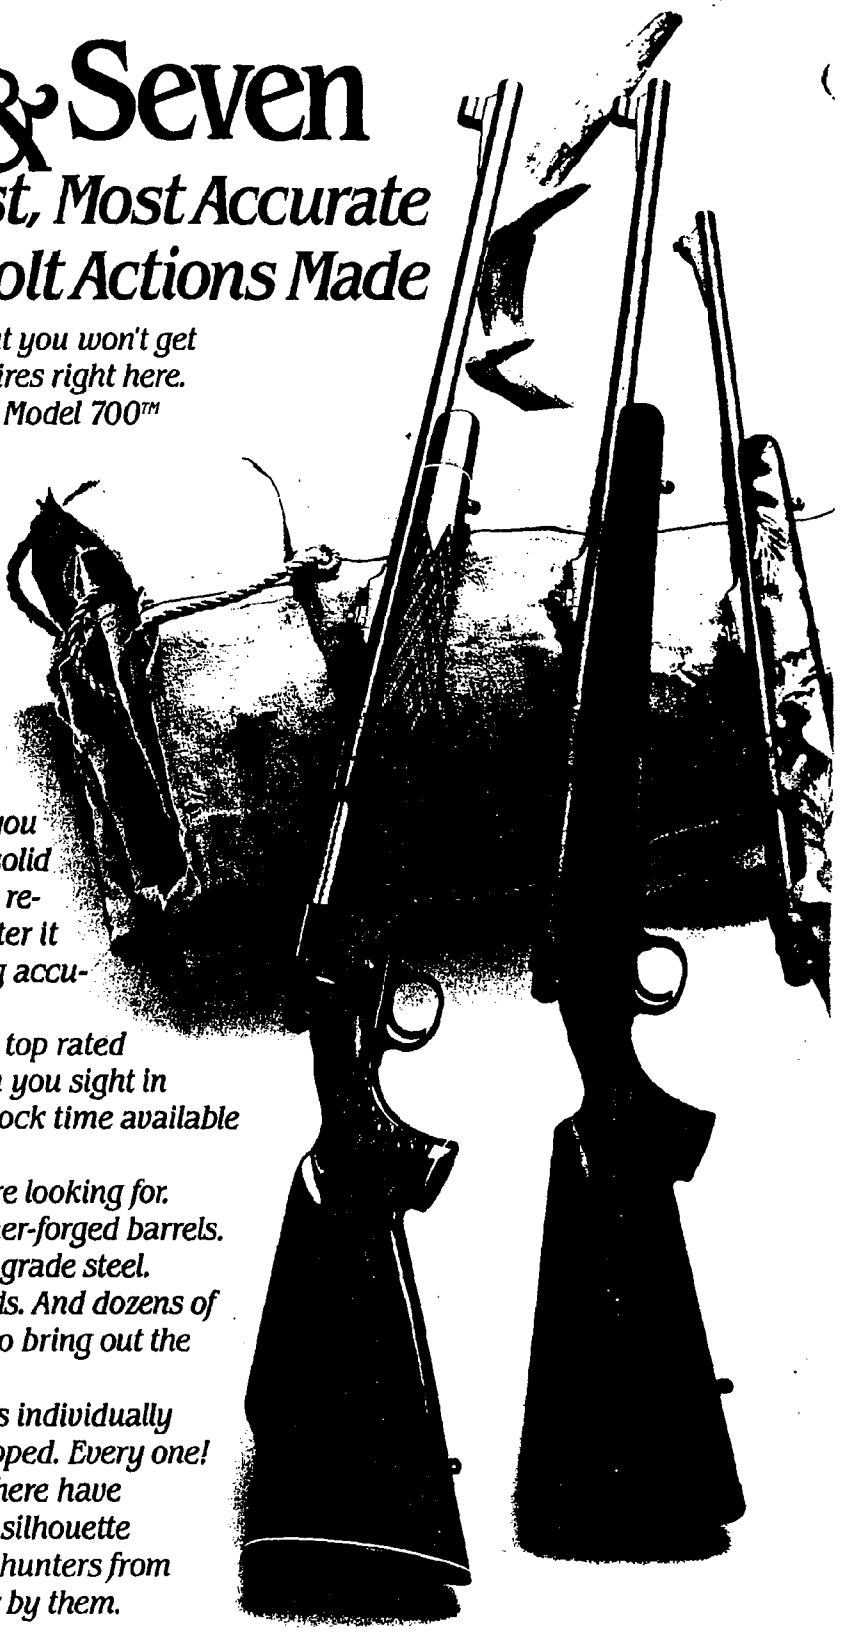
Model 700 & Seven

The Strongest, Most Accurate Out-Of-The-Box Bolt Actions Made



You can easily pay more for a rifle, but you won't get more rifle than the bolt action centerfires right here.

These are the legendary Remington Model 700™ and Model Seven™ rifles. Put simply, they're the strongest, most accurate production-line rifles available today.

You won't find gimmicks or tricks on these rifles. What you will find is proven design, classic good looks and a dedicated attention to finish and detail that makes each of these rifles a purebred in accuracy, handling and reliability.

Each Remington bolt action offers you the renowned 3 rings of steel lockup: solid steel in the bolt face, barrel and milled receiver surround the cartridge and center it in alignment with the bore for startling accuracy and unsurpassed strength.

Their crisp triggers are consistently top rated among all production rifles. And when you sight in on your target, you'll have the fastest lock time available today in a production rifle.

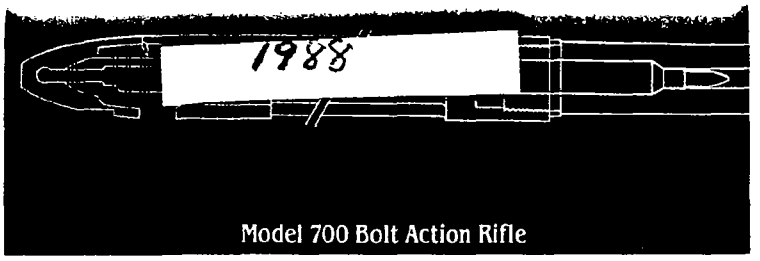
You'll also have all the features you're looking for. Select American walnut stocks. Hammer-forged barrels. Receivers milled from solid, ordnance-grade steel. Rich, deep-cut checkering. Swivel studs. And dozens of subtle refinements evolved over time to bring out the best in you.

Every Model 700 and Model Seven is individually inspected and test fired before it's shipped. Every one!

No wonder outdoor writers everywhere have praised them. National benchrest and silhouette champions have won with them. And hunters from Albuquerque to the Arctic Circle swear by them.

All RS and FS rifles feature non-glare matte finish on exposed metal surfa

R2525763



Model 700 Bolt Action Rifle

Synthetic Stocks

We've combined the flawless bolt actions of our Model 700™ and Model Seven™ with stocks of fiberglass reinforced with Du Pont Kevlar® and of Rynite®, a tough thermoplastic resin developed by Du Pont and available only from Remington.

Result? Unwavering accuracy—no matter what the weather. Because these new stocks won't absorb moisture or react to changes in temperature that can throw off a rifle's point of impact.

Through heat, cold, rain, snow or humidity, a sighted-in rifle stays that way. With no movement. No surprises.

And you'll find that these new stocks add nothing to the weight of the rifle. (In fact, the fiberglass stock, reinforced with Kevlar, weighs almost one pound less than comparable wood-stocked models.)

They're stronger. Tougher. Virtually indestructible. And they'll absorb more felt recoil, which is important when you're shooting a lightweight, large-caliber firearm.

The Rynite stock feels solid throughout, with inletting held to extremely close tolerances. The fiberglass stock is laid up and bedded by hand, with Kevlar reinforcement at all critical stress and bedding points. Yet with all the technology in these rifles, you won't have to pay custom gun prices to own one.

All FS and RS models have straight-line combs, solid black English-style recoil pads and sling swivel studs. Choice of gray/black or camo finishes.*

Model 700 RS.
These right-hand long-action rifles are available in three game-stopping calibers. Stocks are Du Pont Rynite (RS), with a textured finish from fore-end to butt except for the cheekpiece, which is smoothed for comfort. With a historic "Remington Arms" insignia on the grip cap. A hinged floorplate and iron sights.

Model 700 FS.
The Kevlar-reinforced fiberglass stock (FS) version of our Model 700. Choose from three right-hand or three left-hand calibers. The hammer-forged barrel features iron sights, and the rifle has a blind magazine.

Model Seven FS.
The lightest, most compact of the Remington synthetic stock rifles—but with plenty of knock-down power. Available in three right-hand calibers. With hinged floorplate, tapered barrel, ramp front sight, adjustable rear sight. Textured stock.

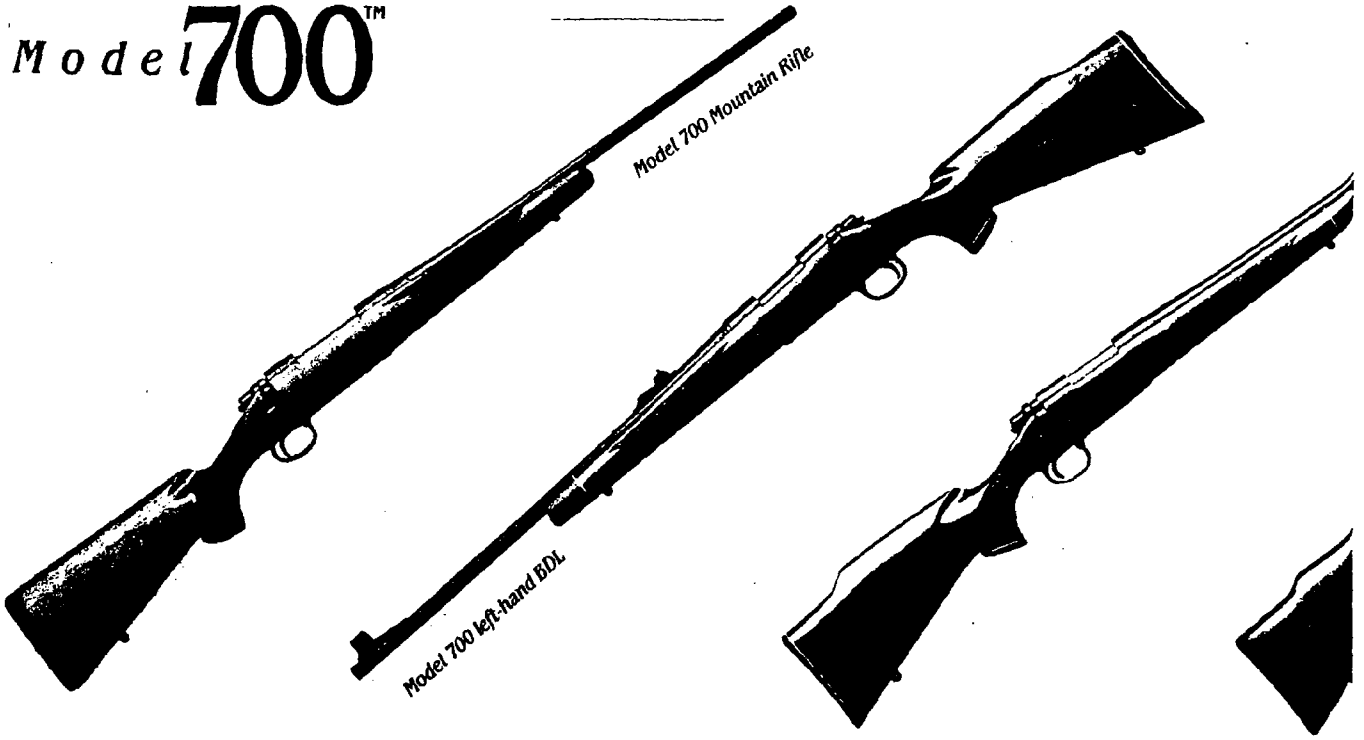
1988

Model 700™



Centerfires For Everything From Prairie Dogs To 10-Pointers

Model 700™ Mountain Rifle.

New for 1988—.243 Win., 7mm-08 Remington and .308 Win.

At just 6¾ lbs., the Mountain Rifle answers the demand by many knowledgeable riflemen for a full-size rifle at an easier-to-carry weight. By tapering the barrel and slimming down the stock, we've given it superb handling characteristics with no loss in accuracy or strength.

The pistol grip is pitched lower to help keep your wrist straight for better shot placement. The American walnut stock has a satin finish, and features 20-line deep-cut checkering and a smooth, trim cheekpiece to position the eye properly. Includes a hinged floorplate, sling swivel studs and butt pad. Drilled and tapped for scope mounting.

Model 700 BDL.

The bolt action that's proven its game-getting qualities all over the world. It combines outstanding performance, perfect proportions and handsome detailing—and offers it all in both right- and left-hand models.

A Monte Carlo American walnut stock has a high-gloss finish, and features positive-cut skipline checkering to add a distinctive touch. Hinged floorplate, sling swivel studs, hooded ramp front sight and adjustable rear sight are also featured on the Model 700 BDL.

Model 700 Varmint Special.

All the styling and features of our Model 700 BDL, but with a barrel that meets the special demands of the dedicated varmint hunter. It's a heavier, hammer-forged barrel that reduces vibration and delivers extraordinary accuracy—throughout a whole day's shooting.

Model 700 ADL.

It's a Model 700 all right, but we've limited some of the extra features to put pure 700 performance in your hands at a better price. You'll still appreciate the satin-finished walnut stock, the cut checkering, the sling swivel studs—and the accuracy and reliability of the finest bolt action rifle at an affordable price.

And there's also a new Model 700 ADL laminated stock available in 30-06 caliber.

Model 700 Classic.

For 1988, Remington again offers its 700 Classic, this year chambered for the .35 Whelen cartridge. Purists and handloading enthusiasts will recognize the .35 Whelen as one of the most talked-about "wildcat" loads ever. (And this year, Remington will offer the first factory-loaded .35 Whelen cartridges. See page 23 for details and ballistics.)

A straight-line stock with cut checkering, satin finish, swivel studs and hinged floorplate give this year's Classic all the good looks and pure shootability you'd expect from this limited-edition series.

RIMFIRE RIFLES

You can't beat the Remington system. We make the rifles and the cartridges. We make them perfect for each other. No one else in America does. And no other manufacturer approaches the level of strength, accuracy and quality that has distinguished Remington .22s for generations.

They're accurate, well made and a lot of gun for the money. So no matter which .22 you put with what ammo, you've picked a combination made for each other.

They're Made For Each Other

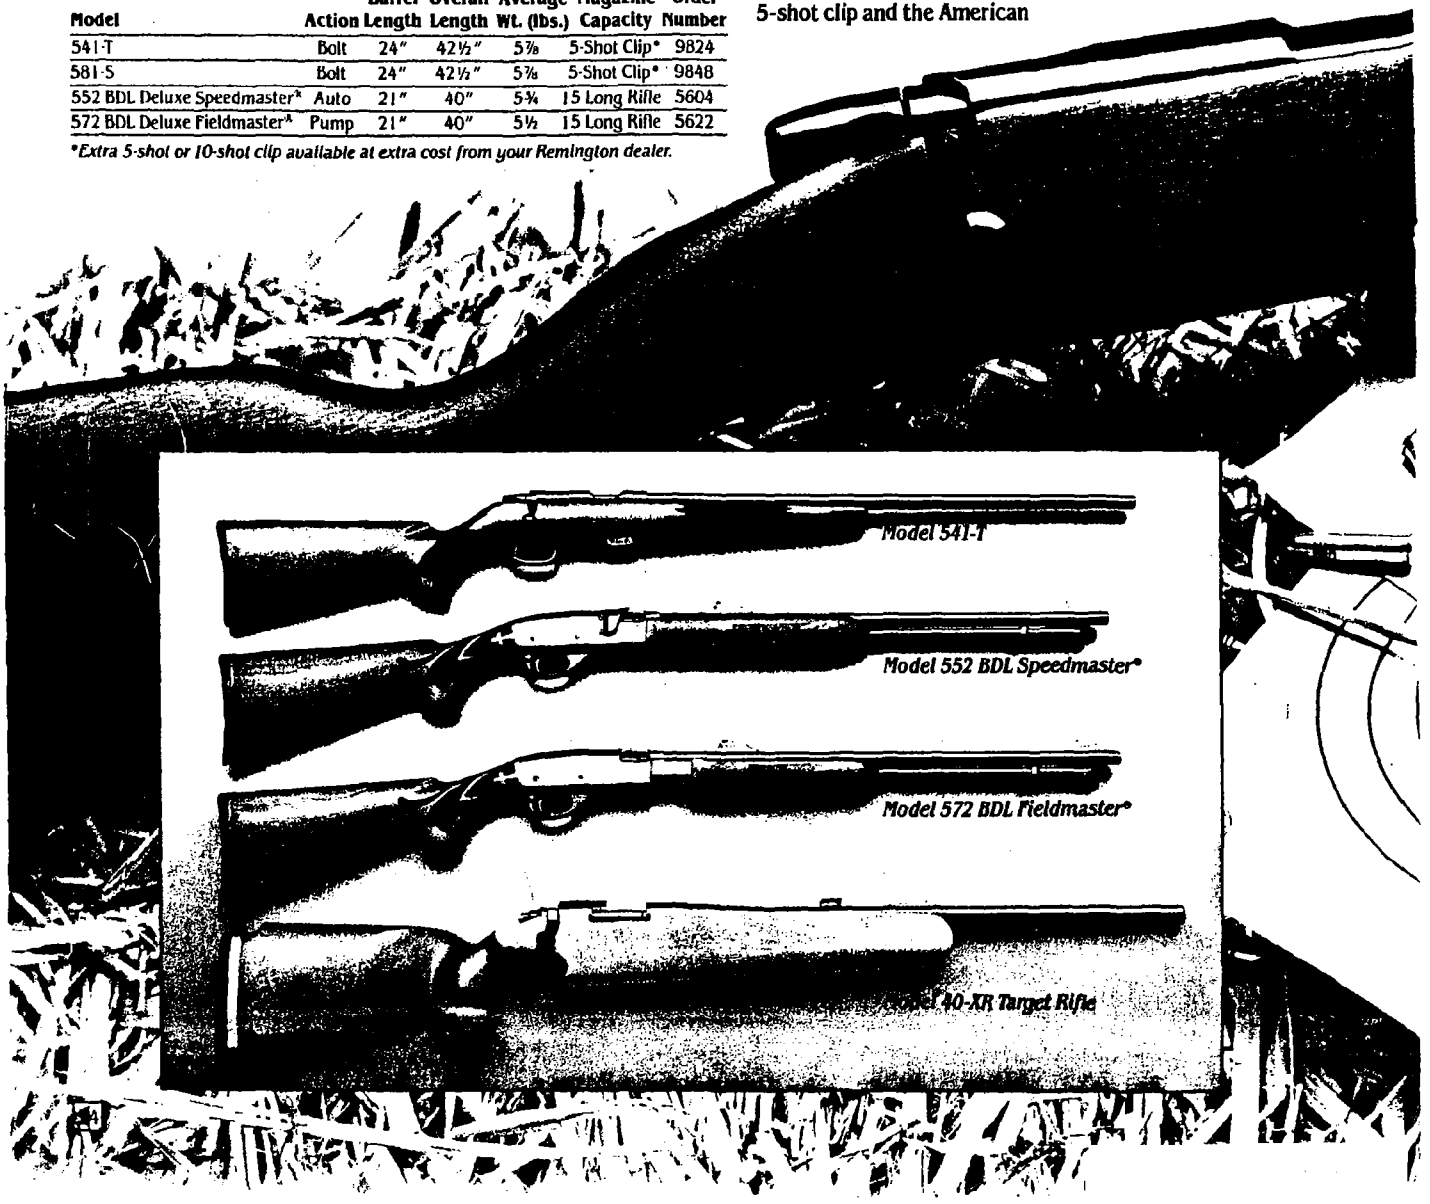
RIMFIRE RIFLES

Model	Action	Barrel Length	Overall Length	Average Wt. (lbs.)	Magazine Capacity	Order Number
541-T	Bolt	24"	42½"	5⅞	5-Shot Clip*	9824
581-S	Bolt	24"	42½"	5⅞	5-Shot Clip*	9848
552 BDL Deluxe Speedmaster®	Auto	21"	40"	5¼	15 Long Rifle	5604
572 BDL Deluxe Fieldmaster®	Pump	21"	40"	5½	15 Long Rifle	5622

**Extra 5-shot or 10-shot clip available at extra cost from your Remington dealer.*

Sportsman® Model 581-S™ Rimfire Rifle.
A strong, dependable firearm choice for the most experienced shooter or more recent beginner. Run shorts, long, or long-rifle cartridges through the 24" barrel all day. The full-sized stock cradles comfortably against your cheek. Standard 5-shot clip. Extra clips available from dealers.

Model 541-T™ Bolt Action.
The T stands for target. That's how accurate this gun is. If you're serious about shooting, you'll appreciate the fine bolt action, the crisp trigger, the 5-shot clip and the American walnut stock with detailed, deep-cut checkering. It's drilled and tapped for scope mounting.

Model 572™ BDL Pump Action.
The famous Remington Fieldmaster® is the only .22 pump action rifle still made in America. It has a satin-finished walnut stock, custom checkering and big game rifle sights.


Model 552™ BDL Autoloader.
The same styling as our famous pump action rifles, only in a semi-automatic version. Round after round, it delivers consistent performance.
