Subject: safety

Hi I have a model 700 inline muzzle loader. It had an accidental fire on me about a year after I got it. I found that if you take the trigger completely apart at lease annually and clean you can eliminate that problem. I like the gun so recommended it to my Brother in law. His son was going hunting with it and it went off and was a near miss. Very scary. What happens is when you go from safe to fire it goes off automatically. My home phone is 1-337-566-2180 if you need any further info. Thanks.
