Steve,

As we discussed at the Product Team Meeting, our strategy is to place the 40-X adjustable version into target and varmint models only at this point in time. I have already discussed this with Dale Wills as has Danny.

John,

Have you had a chance to consider using the 40X version of the X-Mark Pro for all guns?

Subject: M40X XMP Trigger Ass'y DAT Exit Letter

Importance: High
Sensitivity: Confidential

John,

As you're aware we have completed the DAT on this product variant and test results support a successful exit from formal DAT activity. Attached is the official DAT Exit Letter supporting this position as per past practice. A formal report will follow shortly. Any additional testing planned to look at incorporating this trigger assembly into non-target variants will be reported on independently.
