All -

I will change the M/700 Police rifles to call for the X Mark Pro fire control.

Thanks -
Mike

Gentlemen,

It again raises the question about refit. I defer to your judgement, but keep in mind it is also more expensive. Food for thought.

Regards,

Bob

Mike,

At this point I agree with Chris.

I'm concerned that the 40X fire control would cause a constraint to production for large order sizes. I vote for x-mark pro's as that is what the production area is designed to produce.

Mike,

One of the issues is that each 40-X fire control has to be hand lapped.

We need to look at an alternative.

Combine with the M547?

Steve -

I spoke with Bob Pantle and he would like to use the adjustable 40X-style fire control on all M/700 Police rifles.

Chris/John -

Are there any production and/or planning issues with using fire control #F27591 on all M/700 Police rifles in 2007?

Please let me know.

Thanks -

Mike

Mike,

There is not an option.

We will either put in the new X-Mark Pro or the 40X.

Let Bob know that we will begin putting in the X-Mark Pro in 2007 unless otherwise directed.

Please coordinate the cut-in.

Here's the last info I have from Bob Pantle on the X-Mark Pro in Police rifles.

Thanks -

Mike

Mike,

It appears that the return is mixed, some would like to test the system and some say go with the adjustable. They also brought up the points that, will the new X Mark Pro require a refit should someone need to return a rifle? Based on the input, the fact that it requires a change anyway than I would say put in the M/40X based on its compatibility with older models and we can say it is an upgrade to the system should it need repair.

Bob -

Per our phone conversation, here are the costs for the various fire controls:

- * Current fire control - #F26345 - \$23.70
- * New X Mark Pro fire control - #F305571 - \$33.70 (est.)
- * Adjustable (M/40X Police) fire control - #F27591 - \$30.86

The adjustable fire control is currently offered on only 2 SKU's - #27223 and #27028.

Thanks -

Mike

Mike,

You need to help the handicapped, I have no idea what that means, but it sounds like the replacement has already been well thought out. If you could give me the "Reader's Digest" on it I would appreciate that.

Gentlemen -

Per Jim Doolittle's note below, the fire control used in our M/700 Police rifles will be phased out by the end of this year, replaced with the X Mark Pro. We had discussed switching over all M/700 Police to use an adjustable M/40X-style fire control in the past, but I don't know where you stand on that now.

Please let me know what fire control you'd like to use for the M/700 Police rifles. Feel free to give me a call to discuss.

Thanks -

Mike

Mike,

Remington is planning on phasing out the current fire control used in the M700 police guns with the new X Mark Pro fire control by the end of the year. Please inform the necessary people and provide us with the feedback.
