

Model 105 Cti

Quality Concerns as of 07-11-07
J.B. Irving

I have now received a total of 58 calls that are having problems with their gun. That is 16 calls since my last report on 05-01-07.

All of the calls are for cycling issues while using loads of 1 1/8 oz., 2 3/4 dram eq. or heavier. Ten of the calls were on gun that had fired 2 boxes of shell or less. I advised that the Model 105 Cti has around a 5 to 6 box break-in period. If after the break-in period, they are still having problems to send the gun in to our factory.
