Everything went v well – thank you. I gave Al a few minor edits on the 4-fold but we passed out about 20 of them and I still have some left. I am meeting with Al today about ad schedule and static photos for MSR that should be taken today. Next step is getting the ACR in for static photos and action photos in several environments. I am working with my guys to schedule this. Since the first ads are all MSR, I have a little time to get the shots with the ACR that I want done right.

Thanks for your help – the product (attached) was a professional one and the 4-fold helped explain who we are.

JPS

Just following through to see how the SOCOM briefing went last week. Did the powerpoint and printed piece work for your needs? Anything different we need to do to better support such meetings?

Let me know.

Thanks.

Eric
