**Remington Arms Company Inc. Awarded US Army TACOM**  
**FMS Contract for M24 Sniper Weapons Systems for Multiple**  
**US Allies.**

**Madison, NC** - Remington Arms Company Inc. is proud to announce the recent US Army TACOM contract award for the sale of 1700 + M24 Sniper Weapon System (SWS). This sale is in support of the Foreign Military Sales (FMS) program which supports our allies' world wide in the Global War On Terrorism. The M24 SWS has been the "standard" issue sniper rifle for the US Army and US Air Force since 1988.

Based on the venerable Model 700 bolt action platform, like the USMC M40 the M24 SWS provides exceptional accuracy, reliability and durability. The M24 SWS is considered the "standard" by which other sniper weapon systems are judged providing extreme accuracy out to and beyond 800 meters as well as providing well over 10,000 rounds of service before requiring any maintenance beyond operator level.

This contract award marks a collaborative effort by the US Tank-Automotive and Armament Command (TACOM) and Remington Arms Company to provide the very best for US Allies. The Model M24 SWS was designed to meet or exceed all current and anticipated mission profiles encountered and conducted by snipers in training and combat. Due to its superb reputation the M24 SWS have been procured by a significant number of US Allies, US LEA and US DOD agencies.

Remington Arms Company Inc. welcomes the continued relationship with our nation's military and is continuing to strive to develop and provide the tools needed by our combat forces.
