Dear Lyle:

Thank you for your response. We will need to have the entire gun at the factory as we are able to work on just parts.

I will forward the Trigger assembly to your factory as requested. This is a Firearm safety issue and therefore I believe you should be aware if you are not already, that there may be other potential similar 700ML that could have the same deffect. Lyle

Dear Lyle:

We regret that you are experiencing problems with your firearm. Based on the information you have provided, we suggest that you send your firearm to our Ilion, NY facility.

2. Pack your firearm for safety and to prevent further damage in shipping and handling. Preferably, ship in a firearm box, not a hardcase.
3. Remove all accessories from your firearm to prevent loss or damage. This would include scope, slings, or extra choke tubes.
4. Enclose a letter with the firearm detailing the model name or number of your firearm and serial number along with a full description of the problem. Be sure to include your full name and address (P.O. Box and Street Address), including zip code, daytime telephone number, and e-mail address.
5. Ship your firearm by either United Parcel Service (UPS) or Parcel Post (US Post Office). Remington is not responsible for damage or loss during shipment, so you may elect to purchase insurance from your carrier. Customer is responsible for shipping charges to the factory.

the trigger sear broke in two pieces on a Model 700 ML (Muzzleload) for no apparent reason. This was a extreme safety hazard- As soon as the bolt was closed and the Safety released, it would fire. This is the second incident which I have heard of where this has happened. Please explain? What is Remington doing or done about this?
