W.H. McGuns Service Department 124 North 22nd Avenue Humboldt, TN 38343 Phone:731-784-5746 Fax: 731-784-7661
Hill's Hardware & Sporting Goods 1234 South Second St. Union City, TN 38261 Phone:731-885-1510

Let us know if you need anything else. Have a great weekend.

Customer (1 1) 5/28/2008 6:43:24 PM

Thank you for your reply.What is the name of the Gunsmith in Humbolt,Also the one in Union City
These two are less than half the distance to Paducha.If Paducha is a lot better I do not
mind traveling the extra distance.

Response (Daniel) 5/28/2008 12:17:33 PM

We have 2 gunsmiths in TN, one in Humbolt and the other in Union City. Paducah shooters Supply In Kentucky is
one of our premier service centers and come highly recommended. Any one of these Shops can determine what the
issue is and get the gun working properly.

Customer (1 1) 5/22/2008 8:44:57 PM

I waited a week for you to tell me I should take some action. I know I should take action,That is why I made the
contact.Should I return the rifle to Remington or part of the rifle such as the action or trigger assembly. Do
you know of a reputable Gun smith in the Memphis Tn. area.

I saw that you had a repair shop in Paducha Ky. that is not close,but it is the nearest to me.

All I want is the rifle to be safe to use. My brother has already spent well over\$100 and he feels the rifle is
still not safe. What are my options. Thank you for your time .

Ronnie Jones

Response (Daniel) 5/22/2008 6:02:03 AM

Initially I would highly recommend some action be taken on the rifle to get it back to safe working order, but
after the rifle has been rectified then any available load for the 7mm Ultra Mag would be more than sufficient
for any bull elk you could ever hope to encounter. The Core-Lokt Ultra Bonded and Swift Scirocco load we offer
are specifically designed for just this kind of heavy skin, and large boned animal and should perform flawlessly
and give you effective killing power out to a range of about 600 yards where it is still delivering
approximately 1500 ft/lbs of energy.

Customer (1 1) 5/15/2008 10:14:30 AM

I was not sure you received the message.Thank you for the reply.

My main concern is to make sure the rifle is safe to shoot or
hunt with.My brother paid a gunsmith a great deal of money to
fix the rifle. Would this rifle do to hunt Bull Elk in South-
West Colorado. If so what load do you recommend? Also what load do you recommend
for Whitetail deer. For your information I live in North central
Mississippi about 50 miles-SE of Memphis Tn. My address is 170
Mar bury drive,Holly Springs,Ms. 38635.Thank you again.

To Whom It May Concern:

My brother has a Remington model 700,7mm Ultra Mag.

The serial number is S6393408. The gun is not safe.The gun has fired more than
once when he starts to push the safety off.His finger has not been on the trigger.
He has had the gun worked on by a gunsmith. The gun still fires without pulling the
trigger.I think know it is with the safety off(not sure about safety) I do know if the butt of the gun is
bumped against a hard surface you can hear the trigger click.

My brother has had the gun for a good while,but because he feels it is unsafe and
has lost confidence in the rifle lets it remain in his vault. I know have the Rifle,what can I

do to correct the problem.

I started to take the rifle to a gunsmith, decided not to because he has already spent a great deal of money on the rifle and the problem is not corrected. Please inform me of my options.

Thanking you in advance, I am.
