Remington Model 700 SPS Tactical

Madison, N.C. – The **Model 700 SPS Tactical** combines features that made the Model 700 action the number one choice of police and military marksmen and the Model 700 SPS series rifles the most popular bolt-action rifle in America. A new stock, fire control group and other accuracy-enhancing features make this the perfect tactical rifle.

Recognized for its legendary performance and accuracy, the Model 700 has a rigid, cylindrical receiver design that adds stiffness and a solid bedding area for the action in the stock. A counterbored bolt face encloses the cartridge head with an unbroken ring of steel, which then fits inside of the barrel chamber, surrounded by the receiver – creating the famous Remington “three-rings-of-steel.” This revolutionary design creates an action of unparalleled strength. With this solid construction and advanced design, the Model 700 has earned a reputation for its out-of-the-box accuracy.

The Model 700 SPS tactical has an all-black, synthetic Hogue Overmold stock with a wide fore-end. The soft-touch stock is extremely comfortable during extended range or over-watch sessions and assures a firm grip in inclement weather. The Dual Point Pillar bedding systems guarantees a solid interface between the action and stock to prevent point-of-impact shifts.

A heavy contour, tactical-style barrel measures 20 inches and is the perfect balance between handling in tight spots and generating fight-stopping bullet velocity. The rifle is chambered for two popular tactical calibers, .223 Rem and .308 Win, allowing the hinged floorplate magazine a five-round capacity. All external metal has a tough and durable black oxide blasted finish. The rifle also features the new X-Mark Pro fire control system that delivers crisp, perfect trigger pulls.

This model retails for just \$499, a great value for the tactical shooter on a budget. For additional information on the Model 700 SPS Tactical and other Remington rifles, please visit our web site at www.remington.com.
