THE NEW MODEL 700™ VARMINT STAINLESS FLUTED
Stunning from the Bench, Lethal in the Field

Madison, NC If you value tiny groups and the weather resistance of stainless steel and synthetic, you may want to consider Remington's newest rifle in the Varmint line, the Model 700 VSF.

The Model 700 VSF has all of the legendary performance features of the Model 700 platform. Rigid cylindrical receiver milled from a solid bar of steel, providing consistent shot to shot placement. The "three-rings-of-steel" design (counterbored bolt face encloses the cartridge head with an unbroken ring of steel, which then fits inside of the chamber, surrounded by the receiver) provides for unparalleled strength.

Its 26-inch, hammer forged, heavy contour barrel is fluted for weight reduction while maintaining rigidity and promotes rapid cooling. The concave dish crown protects the rifling lands and promotes tack-driving accuracy. The rugged synthetic stock has Hogue® overmolded grip panels for a sure grip and vented beavertail fore-end that allows air to flow around the barrel. Dual front swivel studs and rear stud allow for attachment of sling and bipod.

The Model 700 VSF rifles are equipped with the new X-MARK PRO Adjustable trigger which provides for a crisper trigger pull and comes set with a 3 ½ pound trigger pull directly from the factory. The X-MARK PRO Adjustable trigger can be externally adjusted up to 2 pounds of range with included tool. (Remington recommends trigger pull weights above 3 pounds)

When long-range precision performance is required, Remington delivers with its accuracy-driven line of Model 700 Varmint rifles. Welcome the newest member of this impressive family, the **Model 700 VSF**. Available at a suggested retail price of \$919.
