**Explosive New .17 Remington® Fireball Caliber in Five Bolt Action Rifle Offerings – Available Only From Remington**

**Madison, NC** – At 4000fps, the exciting new .17 Remington Fireball breaks the barrier for small caliber performance. Only Remington can match this extremely fast, highly accurate and flat-shooting caliber with the legendary “out-of-the-box” performance of the Model 700™ and Model Seven™. For 2007, Remington is pleased to announce five bolt-action offerings chambered for the latest member of the .17 caliber family - the highly collectible **Model 700 CDL™ SF LTD Edition (Classic Deluxe Stainless Fluted)**; two specially-designed varmint rifles, the **Model 700 VSF™ (Varmint Synthetic Fluted)** and the new **Model 700 SPST™ Varmint (Special Purpose Synthetic)**; the durable workhorse **Model 700 SPS**; and the compact **Model Seven CDL**. All five rifles are based on the Model 700 platform, one of the strongest and most accurate actions available, and feature the new Remington X-MARK PRO™ trigger, further enhancing their tack-driving capabilities.

**Model 700 CDL SF LTD Edition** – Engraving on the hinged floorplate denoting the introduction of the .17 Remington Fireball cartridge, “Model 700 Limited” rollmark on the receiver and limited production quantities set this commemorative rifle apart. The CDL features a satin finished, straight comb American walnut stock with right-handed cheekpiece, generous cut checkering, black fore-end tip and grip cap. The durable 416 stainless fluted barreled action, clean 24-inch hammer-forged barrel and jeweled bolt – all feature a satin stainless finish. Other features include receiver drilled and tapped for scope mounts; four round magazine capacity; R3® Recoil Pad; and sling swivel studs. This second offering in the collectible Model 700 CDL SF LTD Edition series is available for one year only. Suggested retail price: \$1065

**Model 700 VSF** – Recently upgraded, this heavy-barreled rifle features a well-designed H.S. Precision composite stock with a contoured beavertail fore-end, defined ambidextrous finger grooves, palm swell and twin front tactical-style swivel studs to accommodate a sling and bipod. The desert tan stock has a textured, black webbed finish. The 26-inch hammer-forged, carbon steel barrel with satin blued finish features concave target-style crown and six longitudinal flutes for rigidity and increased heat dissipation as well as weight reduction. Receiver is drilled and tapped for scope mounts and the hinged floorplate magazine has a four round capacity. With its full length aluminum bedding, the VSF is designed for the precision shooter or long-range varmint. Suggested retail price: \$1159

**Model 700 SPS Varmint** – An exciting new line of bolt-action rifles for 2007, available in .17 Remington Fireball and five additional chamberings. Performance-enhancing features of the SPS Varmint rifle include a 26-inch heavy varmint-contour barrel; newly-designed matte black synthetic stock with vented beavertail fore-end for heat dissipation, weight reduction and stability; non-reflective matte blued finish on exposed metalwork; dual front sling swivel studs; receiver is drilled and tapped for scope mounts; and the hinged floorplate magazine has a four round capacity. At the core of the Model 700 SPS Varmint rifle is the rigid design of the Model 700 receiver, machined from solid steel bar stock. This combined with the famous “three-rings-of-steel” design which completely supports the cartridge make the Model 700 one of the strongest and most accurate actions available. Suggested retail price: \$647

**Model 700 SPS** - This synthetic version of the venerable Model 700 provides the avid hunter with a durable and accurate rifle or is the perfect “work tool” around the ranch. The Model 700 SPS features a redesigned, more ergonomically appealing black synthetic stock and features the recoil-reducing, Remington R3 Recoil pad. The clean 24-inch barrel has a matte blued finish and is drilled and tapped for scope mount. The hinged floorplate magazine has a capacity of four rounds. This moderately-priced rifle delivers the solid design features and out-of-the-box accuracy that you expect from the Model 700. Suggested retail price: \$604

**Model Seven CDL** – This compact, easy-handling rifle has a traditional American walnut, straight comb stock with right hand cheekpiece, accented with black fore-end tip and grip cap, handsome cut checkering and satin finish and clean 20-inch carbon steel barrel with target crown. The metalwork has a non-glare, satin blued finish. Jeweled bolt handle; hinged floorplate magazine with four round capacity; receiver drilled and tapped for scope mounts; sling swivel studs; and R3 Recoil Pad complete this well-designed package. Suggested retail price: \$907

Match any of these full-featured, highly accurate rifles with the introductory 20 gr Premier® AccuTip-V™ offering and varmints beware! For complete specifications on these offerings and other fine Remington products, please visit our web site at [www.remington.com](http://www.remington.com) or your local dealer.
