**Remington Introduces A New High-Powered, Magnum Bolt
Action Rifle – the Model 673™ Guide Rifle**

Madison, NC – Recognized in the mid 1960s by guides as a highly prized back-up gun for big game hunters, the Remington® Model 600 Magnum and its descendants, the Model 660 and Mohawk 600, have been absent from the Remington line-up for over 20 years. Remington is pleased to announce a modern day version of this classic – the Model 673 Guide Rifle.

Based on the Model Seven action, the Model 673 Guide Rifle is available in the extremely efficient and new to the market .300 Remington Short Action Ultra Magnum and the reintroduced, hard-hitting .350 Remington Magnum. Partnered with the Remington Premier® and Express® lines of ammunition, the Model 673 Guide Rifle delivers plenty of punch in an efficient, easy handling rifle.

Complimenting the performance of the Model 673 Guide Rifle is its distinguished look, featuring a wide striped, weather resistant, laminated Monte Carlo-style stock of alternating dark and light veneers with Model 600 style checkering and swivel studs. The 22-inch magnum contour barrel has a distinct, machined steel ventilated rib with iron sights, reminiscent of the Model 600, allowing for quick sight acquisition. The receiver is drilled and tapped for scope mounts. The blind magazine has a 3 + 1 round capacity with hinged floor plate.

With today's interest in high performance short action cartridges, compact and swift-handling rifles and the resurgence of classic-styled firearms, the Model 673 Guide Rifle fits the bill. Available at a suggested retail of \$
