Classic Remington® Model 700™ CDL™ Now Available with Distinctive High Polish Blued Finish

Madison, NC – With its classic styling, superior performance and rugged reliability, the Model 700 CDL (Classic Deluxe) has become one of our best-sellers in the renowned Model 700 family of bolt-action centerfire rifles. For 2008, Remington is pleased to introduce the latest addition to this distinctive family – the **Model 700 CDL with High Polish Blued** finish, chambered in the highly popular 270 Win, 30-06 Sprg and 7mm Remington Mag.

Originally introduced in 2004, the well-designed Model 700 CDL rifle is housed in a satin-finished, straight comb American walnut classic stock with right-handed cheekpiece. The stock's distinguished look is further enhanced with laser cut checkering, traditional black fore-end tip and grip cap. Setting this new CDL apart from other family members is the striking high polish blued finish on the clean 24-inch carbon steel, hammer-forged barrel (26-inch barrel length on magnum offering). A jeweled bolt body completes this rifle's classic look.

Performance-enhancing features of this bolt-action start with the rigid, cylindrical receiver design that adds stiffness and a solid bedding area for the action in the stock. A counterbored bolt face encloses the cartridge head with an unbroken ring of steel, which then fits inside of the barrel chamber, surrounded by the receiver – creating the famous Remington “three-rings-of-steel” and the receiver is milled from a solid bar of steel for unparalleled strength. Our patented X-Mark Pro™ trigger, with its tight tolerances and mirror-like finish, has this Model 700 CDL delivering superior accuracy and shot consistency right-out-of-the-box. And your performance won't be negatively affected by recoil with the addition of our patented recoil pad.

Other standard features of the Model 700 CDL are convenient hinged floorplate magazine with four round capacity in 270 Win and 30-06 Sprg chamberings and a three round capacity in 7mm Remington Mag; rear and front sling swivel studs; integral extractor set inside the rim of the bolt face; and two-position safety.

The **Model 700 CDL with High Polish Blued Finish** is the latest member of this classically-styled, high performance line. For a complete listing of the CDL family of rifles and other Model 700 offerings, visit our web site at www.remington.com.
