Cutting Edge Innovation and Match-Grade Accuracy – New Offerings of Remington® Model 700™ VTR™ for 2009

Madison, NC – The 2008 introduction of the Model 700 VTR took the shooting world by storm! Its unique design attributes and tack-driving accuracy caught the attention of the nation's best hunters and shooters. New for 2009, the **Model 700 VTR** centerfire, bolt-action rifle will be offered in two new chamberings; the blazing hot **17 Remington Fireball** and the versatile **243 Win.** The 17 Remington Fireball eclipses many popular varmint cartridges with its blistering 4,000 fps muzzle velocity and has quickly gained the overwhelming approval of small-caliber centerfire fans.

Also new for 2009, Remington is excited to introduce the **Model 700 VTR Desert Recon** featuring the popular Tiger Stripe Products® Digital Tiger™ TSP Desert camo pattern; available in **223 Remington** and **308 Win.**

The Model 700 VTR is a culmination of our time-tested rifle design, fused with truly innovative new features available only from Remington. For starters, the Model 700 VTR is fitted with a unique patent-pending, triangular contoured target-grade barrel. This is a result of rigorous research and development that is focused on reducing weight, enhancing rigidity and promoting rapid heat dissipation. To decrease recoil and muzzle jump, this uniquely contoured 22-inch barrel has an integral muzzle brake that is machined-in during production.

For optimal accuracy, the distinctive barreled action is then fitted with the new Remington X-MARK PRO™ Adjustable trigger. The advanced design allows for consistent 3 ½ pound trigger pulls set directly from the factory. Should you feel the need; the trigger can be externally adjusted within a range of 2 pounds (3 to 5 pounds) with the included tool.

To complete the package, the Model 700 VTR barreled action is mated to a newly designed, synthetic stock with vented beaver-tail fore end and black overmold grip areas. This unique stock design is another exclusive feature available only on the Model 700 VTR.

For more information on these new **Model 700 VTR** offerings and other fine Remington products, please visit our web site at www.remington.com.
