SHOTGUNS

SPORTSMAN-58

Plastic Grip Cap

This committee and the Management approved the use of the "Remington Scroll" grip cap on the Sportaman-58 (See Minute No. 1, 1957) as a replacement for the aluminum cap, which is not completely satisfactory, in the belief that this design could be used without modification on the Sportaman-58. When the Plant found that the approved grip cap would not fit the Sportsman-58, they undertook further work on the plastic grip cap previously under development. Following preliminary presentation at the last meeting, additional samples were made and presented to Sales.

Of the samples submitted by Production, Sales has chosen sample No. 4 (metallic brown) for use on the ADL, B and C grades.

Final tooling is being obtained, and samples will be submitted for final approval, with costs. It is believed that the new design will be economically attractive.
