

GENERAL

ARMS STUDY

The Sub-Committee appointed by the Chairman at the last meeting has prepared a master development list and the designation of items used here coincides with the nomenclature of that list. The Sub-Committee reported the following status of the various items.

Center Fire

C-1 Slide Action Carbine Based on the Model 760

The Sales Department has submitted the following forecast:

	<u>List Price</u>	<u>Number</u>
30-06	\$79.95	3000 per year
30-30	79.95	6000 per year
44 Magnum	79.95	1000 per year

Since it is considered unrealistic to consider offering a modified Model 760 at such a low price, the Sales Department will prepare a supplementary forecast based on the same list price as the Model 760. On the basis of preliminary design information, the Ilion Plant will prepare a preliminary cost estimate. Research and Development will not commence design work until it is determined from the forecast and cost estimate whether this work is justified.

C-2 Colored Metal and Light Wood on Varmint Calibers in Models 721, 722, 725, 740 and 760

The Sales Department has prepared the following forecasts based on the same \$10.00 differential in list price used for the Lightweight Models 552 and 572:

Model 722 - 222	600 guns per year
Model 725 - 222	300 guns per year
Model 740	No interest
Model 760 - 222	100 guns per year
