MINUTE #1-1962

<u>Model Guns</u> - Original scheduling called for completion of 25 model guns by February 1, 1962. Changes in design will delay completion of these guns. The Sales Department feels that model guns should be made available as soon as possible even though latest design changes are not incorporated therein. As improvements are added, additional testing will be made.

C

MODEL 870 - 28 and 410 GAUGE CONVERSIONS

ſ

Research & Development reports that further work on adopting the Simmons conversion was deferred on the basis of a Sales Department indication that magazine capacity of two shells was insufficient. Further, design concentration on the Sportsman 68 made extensive work on these items impractical.

This item will be dropped from the agenda.

SINGLE BARREL AND DOUBLE BARREL SHOTGUN INVESTIGATION

- E

Q.,

32 The Production Department reports that Bernetta has been requested to send three shotgun actions for bur investigation. The Production Department is also considering the possibility of Brazilian manufacture of a high grade over and under shotgun.

- 200 MODEL 700 BOLT ACTION RIFLE

Scheduling

The Arms Development Schedule establishes a warehouse date February 1, 1962 for these items. Delays have been experienced d the Schedule has been revised as follows: . see of and
