

Sling Strap

The Production Department pointed out that the price list included a sling strap for the Nylon 11 and Nylon 12 rifles, yet this accessory has not been formalized by Committee action.

It was agreed by the Committee that brown Nylon 66 sling straps and fittings would be supplied for the Nylon 11, Nylon 12 and Apache Black Nylon 66, as a special order accessory.

NYLON 76 RIM FIRE RIFLE

Pre-pilot assembly of approximately ten guns, accomplished at the end of December, revealed functional difficulties. After review by Research & Development and Process Engineering, significant revisions were made in the bolt and disconnector, and minor revisions were made to several other components. Corrected parts will be completed during the week of January 21 to permit pilot assembly of twenty-five guns.

Production assembly of the Nylon 76 will begin in early February, providing pilot production is satisfactory. The Nylon 76 will be available in limited quantities by February 15, 1962, as currently scheduled.

GENERAL ITEM

The Sales Department points out that Remington will have its 150th Anniversary in 1966. It is suggested that plans should be made at an early date for use of this anniversary to promote shooting sports. Successful Colt promotion of 19th century pistols was cited by the Sales Department as an example of historical promotion.

Meeting adjourned at 12:20 p.m.

J. D. CRAMMOND
