

GENERAL - contd.MODEL 700 CUSTOM GUN - contd.

- . Engine turned Bolt.
- . Barrel hand lapped and bedded.

Committee Action

The committee approved the plan as proposed by R & D and Sales for the announcement of the Model 700 Custom gun in 1964.

This reconfirms the committee action in Minute #4 - 1964, and General Management approval.

NYLON 66 - MODEL 550-552-572

At the June Operations Committee Meeting, a review was requested to make recommendations to improve the quality image of the Nylon 66 and Models 550-552 and 572.

Nylon 66 - No recommendations were presented for changes to the Nylon 66.

Model 552-572 - Sample Model 552 and 572 guns were previously delivered to Bridgeport for review by Sales. The guns included the features as shown on Table 3 plus a variation in Front and Rear Sights. Full factory cost figures for the additional cost of each feature was furnished and also shown to the Operations Committee. Since it was indicated that a selling price increase would be necessary, the proposed program was changed to a continuation of the Model 552 and 572 as now offered and consideration of including a premium grade which would incorporate the features as listed the 1965 Firearms Line (Table 3).

Model 550 - Art work of the proposed modifications to the Model 550 were shown to the committee. After discussion, it was agreed that R & D would prepare a model gun for review at the October meeting.
