

SHOTGUNS - contd.MODEL 32 OVER AND UNDER SHOTGUN

The visit to Taiwan to evaluate the feasibility of manufacture by the Combined Service Forces, Republic of China, of the Model 32 Over and Under shotgun has been delayed.

Based on high spot estimates, the cost of manufacture at Ilion would not be economically justified. Detailed estimating has been delayed to give priority to the XR Bolt Action Rifles.

Committee Action

It appears that only possible economic justification for manufacture would be in Taiwan or some other foreign country. Further action to develop firm costs will be dropped by the Ilion plant.

CENTER FIRE RIFLESMODEL 600 BOLT ACTION RIFLECosts

Production reviewed the third quarter 1964 costs shown on Table 2. The average through September is \$ .40 under the first year project costs. The program to reduce costs is continuing.

Committee Action

Comparison with project expenditures as requested for the Model 1100 are to be included as part of the next three month review.
