

Memorandum of Conference  
Ernest P. Simmons - 3-30-65

-2-

Simmons personnel would set up test procedure to insure quality and performance, as these could be identified in the field as Remington products.

Mr. Simmons states he has many back orders, so would appreciate as fast delivery as possible.

Another item discussed was Remington furnishing powder metal barrel studs for his vent rib assemblies, approximately 200,000 parts yearly. Print will be forwarded to Remington for review.
