

SHOTGUNS - contd.28-410 Gauge Conversion

R & D personnel working with Simmons Gun Specialties have made suggestions that should improve the functioning of future Simmons 28 and 410 Gauge Model 1100 conversions.

The original concept was to provide Simmons with 20 Gauge Barrel blanks bored for 28 and 410 gauge. Production problems and added costs would result. In the review, Simmons requested Remington furnish standard 20 Gauge Barrel Assemblies and that 28 and 410 gauge liners would be assembled by them as part of the conversion.

Committee Action

This item will be dropped by the Committee.

Deer Gun (Rifle Sight Barrel)

Ten (10) Rifle Sight Barrel Assemblies should be completed by May 21. Pilot shotguns will be assembled to verify the sight height before production is released.

Barrel production should start in June and warehousing of guns in July.

MODEL #70-1100 SHOTGUNSMonte Carlo Stock "TB" - "TC" Grades

Production reported through April, one hundred and ninety (190) Model 1100 "TB" Monte Carlo Stock shotguns were produced to the warehouse. To date in May, there are an additional forty-six (46). The schedule for May is two hundred (200).
