

RIM FIRE RIFLES - contd.Committee Action: - contd.

The Operations Committee approved the Model 581 Magazine Box rim fire production sample rifle appearance with the Front Sight design being subject to Marketing review. Upon satisfactory completion of R & D function and endurance testing of ten (10) rifles, Management will be requested to authorize invoice shipment.

NOTE: February 28, Marketing requested the removal of the bead from the rim fire and center fire Front Sight.

RIM FIRE RIFLES

Jobbers and dealers believe that adding a serial number to all rim fire rifles would be an advantage in identification and control. There is also the possibility that future legislation will make an identification marking on all guns mandatory.

Committee Action:

R & D and the Ilion plant are to determine where the serial number could be added on each of the current model rim fire rifles. The cost of the following is to be determined.

1. Addition of serial number to the rifle.
2. Marking the serial number on the packing label.
3. Recording and listing serial numbers on invoice.
(Same as now done for center fire and shotguns)
