NODEL 870 Police Gun - Military Version Bayonet Attachment Model 7180 Model 1100

## Police Gun - Military Version

The Bayonet Attachment was initially designed for a military gun 83 in which the hand guard is pinned to the Barrel Rear Sight Base. This plus the spacing of the holes in the Bayonet Adapter would have resulted in a new Barrel Assembly being required as part of a conversion kit for field police guns. After review with Marketing, the design was revised to provide a Bayonet Attachment without hand guard which could be used as a conversion kit.

The design changes delayed delivery of the formed Bayonet Adapter one month and changes to previously designed tooling. If vendors are able to meet present promise dates, the July schedule can still be net.

The proposed conversion kit would be without hand guard or the M7 Bayonet. The Bayonet Attachment kit would be for 18" and 20" Barrels and have a bead Front Sight. The estimated retail price would be \$9.60 each. If swivels and sling strap are to be included, the estimated selling price would be \$10.47. Service Armament Company quoted on an M7 Bayonet at a cost ranging from \$4.50 to \$5.00 depending on the quantity purchased. A sample will be procured to assure that the assembly to the Remington Bayonet Adapter Assembly would be satisfactory.
