

TRAPSMODEL 100T AND 200S TRAPS

Four (4) new traps having the latest revisions including the new brake design were installed at Lordship. Since the performance of the present traps is now satisfactory, not all of the other improvements were made. Representatives will again be in attendance at the Great Eastern Shoot to provide assistance and evaluate trap performance.

TOURNAMENT TRAPS

It was reported that a model hand-loading auto-angling pneumatic Tournament Trap will be tested at Lordship in July.

TARGET TELESCOPE

Attached as Exhibit 6 is a report by R & D on the proposed Remington Target Telescope. The R & D figures were used to establish the format for economics as shown as Exhibit 7.

Production is to be in the R & D Custom Shop.

It was indicated that Remington's marketing of a Target Scope should be of little concern to other scope manufacturers and desirable experience would be gained. Remington may at a later date consider entering this field through acquisition or a set-up for manufacturing.

Marketing believes this development should be undertaken.

Committee Action:

The Committee recommended that R & D submit a project for General Management consideration.

The meeting closed at 2:25 p.m. The next meeting is scheduled to be in Ilion on Thursday, July 18, 1968 at 10:00 a.m.
