

BENCH REST BULLETS - contd.

Since production of bench rest bullets is limited at the present time, the initial lots will be used for the testing of Model 40XB rifles. Announcement to the field will be held until quantity production is accomplished.

Marketing had agreed to defer shipment of bench rest bullets to the field for testing.

TRAPSELECTRIC TOURNAMENT TRAP

R & D reported that a decision was made after the third design test of the prototype Electric Tournament Trap to revise the cocking mechanism. There was excessive pin breakage. Alterations will also be made to reduce the casting weight and method of machining.

It is planned to use the present castings for initial tests of the new cocking design. Design testing should resume by the end of July.

The meeting closed at 1:50 p.m. The next meeting is scheduled to be at Elion Thursday, July 23, 1970 at 11:00 a.m.
