

RIM FIRE RIFLES - contd.MODEL 591-592, 5mm RIM FIRE BOLT ACTION RIFLES - contd.

Three (3) of the five (5) new milling machines required for the permanent operations have been received. The other two (2) should be received by the end of September. Part of the permanent tooling has been received and where applicable, gages and fixtures are being used. All the permanent tooling should be received in August.

MODEL 514 BOLT ACTION RIM FIRE RIFLE

Marketing approved the proposal to discontinue manufacture of the Model 514 Bolt Action Rim Fire Rifle in 1971.

The Iliion plant is to complete rifles for the 1970 forecast and spare parts requirements.

Committee Action:

The Committee recommends General Management approval to discontinue manufacture of the Model 514 Bolt Action Rim Fire Rifle in 1971.

TARGET TELESCOPES

The schedule is to produce fifty (50) Target Telescopes per month. Iliion R & D is coloring the aluminum components. Samples were also satisfactorily colored by the Keystone Corporation, Buffalo, N. Y. This provides two sources.

Committee Action:

Since the coloring problems have been resolved and production schedules are being met, reporting will be dropped by the Committee.
