

SHOTGUNS - contd.MODEL 3200 SHOTGUN - contd.

R & D work on tubes will reduce effort on other jobs.

MODEL 3200 ONE OF 1000 SKEET SHOTGUN  
(Introduction 1974)

R & D reported that N/C programming on the checkering and engraving Model 3200 One of 1000 skeet shotgun is in progress. Tapes for production use are expected in December.

MODEL 3200 FIELD MAGNUM SHOTGUN  
(Introduction 1975)

Production reported that the Model 3200 field magnum shotguns with Barrels suitable for iron shot can be produced to warehouse in July, 1974 if authorized to start in October, 1973. Marketing was informed of this schedule and will determine whether or not this is adequate for January, 1974 introduction.

Marketing reported that the introduction for the field magnum gun would be 1975. Production was requested to continue on the schedule to have guns available in July.

Marketing is to develop a statement for the customer's guidance on the effect of using iron shot shells in the Model 3200 shotgun.

MODEL 3200 TRAP 32" VENT RIB BARREL  
(Introduction 1975)

Production reported it is planned to complete the trial and pilot lot of Model 3200 Trap 32" Vent Rib Barrel guns in September, 1974. Management approval to release to production will be requested in November when economics are completed.

R & D reported that 32" Barrels have been designed and calculated for the correct point of impact. However, preliminary testing of a prototype gun may not give the correct answer. After the Barrels are in production, it may be necessary to make adjustments for point of impact.
