

SHOTGUNS - contd.MODEL 3200 PREMIER TRAP SHOTGUN
(Introduction 1974)

Production reported that product improvements have been made to 56 guns previously produced to warehouse. No customer guns have been returned. 107 were returned from GmbH and 14 from Canada.

361 guns had been produced before the product improvements were initiated.

MODEL 3200 ONE OF 1000 SKEET SHOTGUN
(Introduction 1974)

Production reported that product improvements have been made to 15 guns previously produced to warehouse. No customer guns have been returned.

230 guns had been produced before the product improvements were initiated.

MODEL 3200 FIELD MAGNUM SHOTGUN
(Introduction 1975)

R & D reported that 5 prototype guns were made with modified Vent Ribs. Test results for point of impact were not satisfactory. Five more Barrel Assemblies are being made and will be tested the week of February 24.

Each additional lot of guns has shot closer to the required point of impact. It is hoped that design can be released to production March 1.

MODEL 3200, 32" BARREL TRAP SHOTGUN
(Introduction 1975)

Production reported that guns will be available April 1, as scheduled.

R & D reported that point of impact is being verified on the trial and pilot lot of guns.
