Skeet Trap -

On schedule.

100 (100) 100 (100) 100 (100) 100 (100) 100 (100) 100 (100) 100 (100) 100 (100) 100 (100) 100 (100) Mechanical Trap -Design will be completed in July, 1975. A. 1997 September 1

Model 1100 Improvements Exhibit 27 Design transmitted.

Models 742-760 New Generation, BDL -Exhibit 27 - Design released for cost estimating only. The new high strength samplified locking system is in development and may not be ready for introduction as part of the current new generation program. The total program is good but the timing is tight. Introduction timing also ties in with machine cut checkering which was discussed earlier in this meeting.

An appearance prototype Model 742 BDL new generation with photo-etched game scenes on the Receiver was shown and was well received. Game scenes were gold filled.
