

BUSINESS MEETING - contd.RESEARCH PERFORMANCE - contd.ProgramRemington Promotional Telescopes

Marketing reported that purchase of the promotional telescopes direct from a Japanese manufacturer is being investigated. This offers a potential increase in annual earnings of \$100,000. Putting the Remington name on the telescopes is being considered to give a choice of manufacturer without raising questions of continuity of the telescope name.

The Operations Committee strongly recommended that the Remington name should not be on products made by others.

R & D will test the candidate telescopes to determine quality acceptability.

R & D reported that the 1975 competitive evaluation program will involve about 50,000 rounds of test firing. The testing program will include the following:

Model 3200 O/U Project Support

Multiple Barrel Skeet Sets
Winchester Skeet Sets
Browning Skeet Sets

Single Barrel Trap Guns
Browning
Winchester
Perazzi
Mauser

Lightweight O/U Shotgun
Browning Lightweight - (Ordered)
