

9mm LUGER CARTRIDGES

The report from Lonoke on this product is enroute to Bridgeport.

Secretary's note: Report received after the meeting and is set forth in Enclosure 3.

357 PROOF LOADS

The complaint of high pressure rounds came from Helmut Hofmann, the Remington distributor in West Germany, who received it from the Government Proof House. All guns sold in Germany must be proofed at this facility. Also, Smith & Wesson called to ask if we furnished West Germany the same proof loads we furnished Smith & Wesson. We make only one proof round for this caliber. Hofmann is returning 100 rounds for test. 83

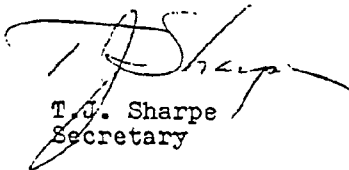

243 WIN CARTRIDGES

Ilion reported two instances of bullets lodging in barrel during testing in November 1972. The LW-UD code, March 1972, has been placed on hold and a letter is being forwarded to Bridgeport on the Lonoke findings.

EXPEDITING SHIPMENT OF EXHIBITS

The Committee directed that exhibit ammunition and firearms involved in complaints which may be potentially dangerous will be sent directly via United Parcel Service.

The meeting adjourned at 1:50 p.m.
