

field representatives, who will advise of the potential problem and request the distributors to place an immediate hold on all such guns.

- The Ilion Plant will make available adequate supplies of new replacement barrels (made from steel produced under the old process) and will proof these barrels on slave receivers or special proofing fixtures.
- Replacement barrels will be shipped to the field representatives involved, who will go to the distributors, remove the old barrels from the affected shotguns, and replace them with new barrels. Old barrels will be returned to the Ilion Plant.
- Selected warranty gunsmiths will be contacted for assistance in this barrel replacement program if and when the need should arise.

(Acting Secretary's Note: Subsequent to this Meeting, the Executive Vice President approved these recommendations.)

  
Acting Secretary  
J. D. Glenn
