Dear Sir:

I received a Remington Model 700, serial # A6206590 for Xmas about 15 years ago. I used it very limitedly and am having a problem.

When putting a shell in the chamber the gun fires.

This doesn't happen all the time but about every 10 times on dry ~~fire~~ loading the gun would fire.

I took the gun like new to a gun Smith and they told me to ~~write~~ write Remington. Please advise.

Respectfully
Nick Caris.
