

Remington Arms,

Enclosed is a modle 700 6mm.

Please change the safety so that the rifle will stay on safe when I unloade the weapon. I find it very dangerous that you have to remove the weapon from safe to unload it .

I have already had one accident with the rifle that is a direct result of this design.

Please call me and let me know how much it is to change this . I have seen the new modle 700 and like the new design much more.
