Remington Arms
Ilion, NY

Attn: Mr. Sam Rensi

Dear Sam:

Enclosed is a Model 700 rifle in 7MM Rem Magnum with a "hang fire" problem. When I pull the trigger, the gun will click but not fire for a brief second (up to two seconds on one occasion). This has happened at different times with different ammunition so I am assuming it is something mechanical in the firing mechanism. Please have one of your technicians look it over. If there are any charges for labor and/or parts, please invoice the address above. Upon completion, please send the gun to my attention at the address above.

It has been a pleasure getting to know you this trapshooting season and I am looking forward to furthering relations with Remington in the future. If you have any questions, feel free to call me at 315-458-9080 anytime.

Sincerely,

A handwritten signature in black ink, appearing to read 'Sean R. Cleland'.
