attn. Mr. Valeri.

Dear Mr. Valeri,

As we spoke on the 13th regarding my model 700 Bolt action 30-06, serial number B6773267, I immediately packaged the rifle and sent it to you.

The rifle's safety function is malfunctioning when the safety is actuated ~~the~~ to the "fire" position the firing pin is automatically firing. Complete care has been taken to insure no pressure is on the trigger, it simply fires when the lever is moved forward.

I would appreciate prompt repair.

As I am sure you are aware of the season in progress. I will be leaving for Northern Maine this weekend and next ^(day) service would be warranted. Please call with any questions. Thank you for interest and help over the phone. Chris Peucher
