Dear Sir,

I recently purchased a Remington Model 700 BDL rifle in a 25-06 caliber. The serial number is B6425005. I am very disappointed that the bolt lock type safety is no longer used on this rifle. My style of hunting requires this type of safety.

I have several Model 700 rifles and it appears that the bolt lock safety switch on the older rifles will inter-change with the newer type safety switch. If this is true, I would like to purchase the bolt lock type safety switch for my new Remington 25-06 Rifle.

You can either bill me for the switch or mail it COD.

Very truly yours,

  
Max O. Usrey 111
