MAIN FAULT

Mfg. 4/70 Unable to duplicate customers concern as well. Trigger adjusting screws were altered outside of factory witnessed by the absence of factory sealant and the position of the screws within the housing, also bluing missing around one screw and red adhesive around overtravel screw. Replace trigger Assy. at special price in exchange as a gesture of good will. We do not recommend that the trigger be adjusted outside of the factory.

PARTS

COMMENTS

Trigger pull measured at 7.5 LBS as received.
