Information and pictures of thumb injury due to above rifle malfunction.

While sighting in the rifle I loaded and normally fired one round. I removed the spent round and put the safety to safe. Loaded another live round and closed the bolt. The rifle was in a rifle rest on a table and I positioned myself behind the scope and aimed the rifle. Removed my hands from the rifle and checked if my spotter was ready for me to fire. He was standing behind me and indicated he was ready. I placed my left hand on the grip and clicked the safety tang to fire position and the gun FIRED! The force of the gun firing from the safety release caused the gun to jump from the rest and damage the grip cap of the stock as well as blister my thumb as indicated by the photos. I removed the spent brass and placed the safety back to safe.

As you can imagine, my spotter (brother-in-law) and I were very surprised and worried about what had just happened. The rifle should have never fired from the action of placing the safety to the fire position. We are glad that all safety precautions were being followed and the only injury was my thumb. This could have been tragic.

I was using Remington factory loaded ammunition as it is the only ammunition that has ever been fired from the rifle. I only use Remington cleaning products in the care and maintenance of the rifle and it is stored in a safe with humidity control.

I am sending this letter as well as the rifle back to you to determine what went wrong, repair it or even replace it if at all possible.

The rifle was purchased new by me and has had approx. 60 rounds fired from it. I hope you can understand why this incident has caused me to lose confidence in Remington, especially this rifle. I will admit I am afraid that even if the stock were replaced and the action is repaired this event will always be on my mind when using this rifle. I have confidence in Remington rifles but it will be almost impossible for me to trust this rifle again. This is why I hope you will consider replacing the rifle?

Please contact me to discuss this matter at the above phone numbers.

Sincerely, Joe LaCoco
