Dear Mr. Jones,

Enclosed is a prepaid UPS shipping label to cover shipment of your firearm to our factory for examination.

Please include a copy of this letter to put inside the shipping container. The letter inside is important as sometimes the outside label gets damaged in transit and we want to be sure the firearm is logged in correctly. Mark the ends of the box with "Product Service". Product Service will be inspecting the firearm and will contact me with the results.

I hope that this action will keep you a loyal Remington customer.

Sincerely,
D. Fulcher

Please describe your problem and date of occurrence: November 27, 2010 After being loaded when the safety was attempted to be pushed to "F" position, it locked. I moved the bolt handle slightly and again pushed the safety to the "F" position - it fired without touching the trigger. Again I loaded the gun and although the safety did not lock it did fire when the safety was pushed forward without touching the trigger. I unloaded the gun & went thru the same process & the gun did fire without touching trigger. I have repeated this several times with perfectly normal results since this incident.
