Scott, the procedure used on the 30.06 was as follows.

POI vs. POA, 3-5 shot groups from bench
20 rds. from shoulder
POI vs. POA, 3-5 shot groups from bench
20 rds. from shoulder
POI vs. POA, 3-5 shot groups from bench

The shooting procedure was as follows. Guns were cooled after every group. Each firearm cleaned and fired with five fouling shots prior to beginning the accuracy work-up.

Do me a favor, look at and take pictures of the scope rails on these guns for this afternoon. I'll look at this POI data. If you also could verify procedure, especially between 30.06/270 and this test. We'll call from my office at 4:00 pm.

Scott, let me know if you have any questions. I still need to verify the method.
