DESIGNATION OF MODEL 700 AS BANTAMWEIGHT

In Operations Committee Minute #6-1961 the new lightweight bolt action rifle is designated the Model 700 - Bantamweight.

The name Bantamweight has been registered by Harrington and Richardson and Remington would be infringing that trademark by calling the proposed new rifle the Bantamweight. It is therefore requested that the name be dropped and consideration given to choosing a new name as soon as possible. The longer the name is used, even just internally, the harder it will be to change.

It is further requested that all names for new models or new names for old models be cleared by the Patent Attorney prior to adoption.

John W. Phipps
Associate Patent Attorney
