Mr. Wayne Leek
Remington Arms Company, Inc.
Bridgeport 2, Connecticut

Dear Wayne:

After hearing so many good things about you from our mutual friends, such as Warren Page, Les Bowman and Tom Frye, our visit together in Chicago was one of the highlights of the trip.

I'm certain Remington is going to make gun history this year, after hearing of the amazing groups Tom and Les were able to obtain with the Fireball-Phantom combination.

Pete Morgan offered to send us a Fireball to experiment with here. Al Akin, our Technical Director, has some ideas for varying the power of the Phantom Scope and is also anxious to perfect his plans for a proper mount.

I don't recall whether Les Bowman was going to send you the finer cross-hair that we made up for him, or if you were expecting to receive it from us. In any event, just to play safe, we're making another and will send it on to you today or tomorrow.

Needless to say, any suggestions you have concerning the scope, the mounting, etc., would be most welcome. As far as we are concerned this project has top priority and we don't want to leave any stone unturned.

Just drop me a line or pick up the phone. Either Al Akin or myself will always be available.

Kindest personal regards and all best wishes.

Sincerely,

DPB
