O File

Ilion, New York June 10, 1963

E. G. LARSON Bridgeport

I am enclosing herewith a box of fired cases received from L. O. Young, who is not entirely satisfied with the performance of his 221 Fireball.

I have measured the cases dimensionally and the chamber seems OK (no check possible on the throat). The heading of the fired cases are on the factory min., as marked. Wayne and I feel there is something in the ammo you will be able to pinpoint and can answer to our friend's satisfaction.
