N/700 INSTRUCTION FOLDER - BALLISTICS

Concerning the above subject which we discussed recently, the proposal is to list ballistics for Remington calibers only. Otherwise, thirty four (34) cartridge listings would be necessary. Space is available only for a reduced listing. Remington calibers listing appears to be the solution. Eleven (11) listings would be included using Remington Calibers i.e. 222-222 Mag, 6-7 MM, and 22-250 Rem, 280 Rem. A note would be included to list calibers for the 700 other than Remington not tabled, i.e. 30-06 243, 308, 270 Win and the 264-300 Win Mag. See marked type copy.

Will go ahead and re-set copy, please call me if another solution appears more feasible.
