Project C-0550 Investigation of Future Center Fire Rifles
 Class Improvement of Established Business - General Ledger
Arms Design - Center Fire

1965 Expenditures (estimated) TD-65312

\$ 5,000

Request for 1966

\$ 11,000 ✓

REASONS: Future sporting rifle design as envisioned will be recoilless, have electric ignition and a tapered
bore to provide ultra high velocity. Stock must provide space for electric ignition and exhaust
gases from the recoilless cartridge.

OBJECTIVES: 1. Development of model stock with present action.
2. Check for styling, balance, sighting, strength, portability, etc.
3. Follow-up with further investigation.
