SHOOTING PROMOTION - XP-100

Neil Simmons related a Captain William F. Gregory of the Air Force Skeet Team contacting him at Colorado Springs. The Captain was shooting on the Air Force Team.

Neil says that he used to shoot Browning but has now been converted over to Remington. As I understand it an interest was expressed in doing work on our XP-100 with the idea that a model be prepared for Captain Gregory to use in the Free Pistol competition. Neil said that he wants an electric trigger. My guess is that he would also want a wood stock and grips made to suit his own anatomy.

Neil Simmons says the Captain is enthusiastic over such a project and said that he would fly in here with his gunsmith in order to get started. Neil agreed to "carry the message" and the Captain's address is:

William F. Gregory
1915 Essex Lane
Colorado Springs, Colorado 80909

We do not plan to initiate any contacts with Captain Gregory unless Marketing directs us to do so.
